Trial Examiner Ballinger: The Examiner understands this is material leading up to something in a subsequent question that will connect it up with the case on trial.

On that basis, the objection is overruled subject to renewal.

The Witness: May I have the question, please?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: In the overall picture, yes, I assume that that would be true. I do not think that it would be or would have anything to do with the determination of a cost differential.

By Mr. Hanley:

Q. In your judgment, Mr. Warmack, as an accountant, if there were anything seriously wrong with the cost accounting methods of the Respondent company in respect of its marketing activities, would that not be criticized by the accountants for the Federal Government, and by as responsible an accounting firm as Price-Waterhouse?

6991 Mr. Austin: I renew the objection to that on the
ground that it is irrelevant and immaterial as to
whether or not criticism would be or has been made by
Price-Waterhouse or by the Government for the purposes
of this case.

Trial Examiner Ballinger: The objection is overruled, subject to renewal.

The Witness: In the overall picture, I would say, "yes" to your question, but in the separation of the company's costs in regular accounting procedure as to classes of customers or products, I certainly do not, and could not have an opinion as to just how extensively the public accounting firm of Price Waterhouse would be interested in those matters, or just how much they would be concerned with them, or go into them.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. I understand from your answer that you now understand what the term "overall" means?

A. Well, the way I used it means that accounting firm would look at the picture in a broad sense and not necessarily with respect to product classifications, customer classifications; that is what I mean, expense to one single item which might be termed an overall expense.

6992 Q. You spent considerable time, did you not, Mr. Warmack, examining into account 004 having to do with salaries?

A. Yes, sir, at the Detroit field for the year 1940.

Q. And at several points in your testimony you have questioned the manner of Respondent's allocation of salaries and other expenses, have you not?

A. Not necessarily the manner, I questioned the measuring factor, the accuracy of the measuring factor as developed by the Respondent company.

Q. Did you not state, page 5854—if you desire to follow me—state a criticism of the Respondent's methods of allocations of these expenses because of the fact that these allocations are made on a composite basis and not upon the basis of the time spent by any individual group of salesmen?

A. I stated that.

Q. In your judgment as an accountant, would you suggest that the allocations could more properly be based upon individual groups of salesmen?

A. In my opinion they can, assuming of course that the measuring factors for the individual groups were properly worked out.

Q. After allocating each individual group of salesmen's and expenses as you suggest, would you recapitulate the separate group allocations to secure a total for the particular expense classifications referred to under account
004—salaries—; account 032, traveling expense; ac-
6993 count 047, operation and maintenance of vehicles;
account 102, depreciation on vehicles?

The Witness: Your Honor, I do not understand that. May I have the question read.

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: I do not just exactly understand that, Judge Hanley.

By Mr. Hanley:

Q. What do you not understand about it?

A. What do you mean by "recapitulate"?

Q. Just what the word means, Mr. Warmack. How would you handle the other accounts?

A. Which other accounts?

Q. The ones I named; 032, 047, 102, 004?

A. Those accounts should follow the salesmen.

Q. Would you add them together, the individual group expenses, to get a composite total for those three accounts?

A. If I wanted an average I would; if I did not want an average, I would not.

Q. If you were allocating on form 189, would you do it?

A. I would determine what portion of that expense went to each class of salesman.

Q. Would the procedure that you suggested increase the amount of accounting work necessary and
6994 result in increased cost for the maintenance of records of the company?

A. Well, I do not mean in the regular accounting procedure. I do not quarrel with the way the company keeps its accounts. It can keep them in any way it likes, and I think it should be satisfactory to anybody if it is satisfactory to the company; but, for the purpose of proving a cost differential I think that is a different matter.

Mr. Hanley: The Respondent moves to strike the answer to the question as not responsive and asks that the question be reread to the witness.

Trial Examiner Ballinger: Before the Examiner passes on the motion, read the question and the answer.

(The reporter read the last question and the last answer.)

Trial Examiner Ballinger: The motion is granted. The witness may answer the question.

The Witness: May I hear the question?

Trial Examiner Ballinger: Read the question.

(The reporter read the question as follows:

"Q. Would the procedure that you have suggested increase the amount of accounting work necessary and result in increased cost for the maintenance of records of the company?")

The Witness: Yes, sir, it would involve more costs
6995 but I think that needs an amplification, your Honor.

Trial Examiner Ballinger: You may offer an explanation.

The Witness: My answer to the previous question was intended; that is, the refinement was stated as being necessary, was intended if a study were made to determine the cost differential, but it was certainly not intended that the company should keep those records to such a degree of refinement.

By Mr. Hanley:

Q. Do you know whether or not as an accountant, Mr. Warmack, that any company could prove to your satisfaction a cost differential without keeping records to the degree of refinement which you have indicated in your testimony in this case?

A. It is my opinion that it could, but it would take a cost study to determine the cost differential. I know that it is not common practice for companies to keep costs in such a way at all times to determine cost differentials without making some greater refinement of the separation of those costs than are currently kept on their records.

Q. Assuming your practice were adopted or your suggested practice, would the end result be any different from that already reached by the Respondent in its present accounting?

A. In this case you mean, Judge Hanley?

Q. Yes.

6996 Mr. Austin: Referring to the same four or five accounts.

The Witness: A cost study would prove that and that is the only way that could be proven.

By Mr. Hanley:

Q. Do you know?

A. A cost study and analysis could prove it; that is the only way it could be proved in my opinion.

Q. Do you know?

A. Of my own knowledge?

Q. Yes, do you know? I am asking you.

A. I have not made such a cost study, and I am sure the company has no other studies; I have not seen any information along that line.

Q. You are sure the company has not made any such?

A. I am sure if they had been, Houghton would have given me the papers on it.

Q. That is your opinion, I assume?

A. I certainly do believe that Mr. Houghton would have given me anything in the world I asked for, and I asked him for that, and that information was not there.

Q. Mr. Warmack, is it not true that the end result would vary if the salaries of one group of salesmen failed to conform to the average of all groups?

The Witness: May I have that again?

6997 Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: Oh, not necessarily. A study would show that, and that is the only way it could be developed, would be by a proper study.

By Mr. Hanley:

Q. Well, is not that question clear to you?

A. Yes, sir, and it has been answered. I answered it.

Q. You answered it but I understand from the question that no study is necessary; I will repeat the question.

A. Yes.

Q. Would not the end result vary only if the salaries in one group of salesmen failed to conform with the average for all groups?

A. Vary from what? Vary from what, Judge Hanley?

Mr. Austin: If I can help—maybe this should be off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. Mr. Warmack, you have criticized this 004 account on the ground that it was kept on a composite basis for salaries. You have stated that you thought a group salary basis would be a more proper method of handling the account.

6998 Now, I asked you if the end result of that method, or suggested method would be any different from the result obtained by the Respondent in its accounting, and you said you did not know.

Now, I am asking you would not the end result vary only; that is, would not the end result of your method vary from the method used by the Respondent only if the salaries of any one group of salesmen failed to conform with the average for all groups?

A. On the assumption that the—

Trial Examiner Ballinger: (Interposing.) There is no occasion for an assumption.

The Witness: I object to another thing in this, your Honor, that the company did not do.

Trial Examiner Ballinger: One moment, as to what you object to, that is immaterial.

Read the question.

(The reporter read the question.)

Mr. Hanley: That question can be answered "yes" or "no."

The Witness: No, sir, that implies an assumption only—

Trial Examiner Ballinger: (Interposing.) One moment.

The Witness: I cannot answer it then—

6999 Mr. Hanley: Very well.

Trial Examiner Ballinger: You may answer the question "yes" or "no" and then explain your answer.

The Witness: The answer is I do not know, Judge, for the reason of this, that the distribution of time cost sheets did not show—

Mr. Hanley: Just a moment. If your Honor please, if the witness does not know he does not know. The witness has given an answer that he does not know, that answers the question, and he can not explain that.

The Witness: That is not correct, and it leaves it without—

Mr. Hanley: One moment.

The Witness: Judge, I am entitled to put on the record—

Mr. Hanley: Mr. Warmack—

Trial Examiner Ballinger: One moment.

Mr. Hanley: Mr. Warmack—

Trial Examiner Ballinger: One moment, Judge Hanley.

Mr. Warmack, you have answered the question that you do not know. ~~Now, do you~~ desire to offer an explanation?

The Witness: Yes, sir, I certainly do.

Trial Examiner Ballinger: You may.

Mr. Hanley: This is for the record, if your Honor please, any attempt by the witness to add to the an-
7000 swer that he does not know, an answer to the effect that he does not know something, is objected to for the reason that no explanation is necessary. He has simply said he does not know. Why he does not know is of no importance.

Trial Examiner Ballinger: The Examiner thinks there is much substance to the objection, but for the purposes of this record, if the witness desires, he may offer an explanation.

Mr. Austin: Off the record.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. Mr. Warmack,—

Mr. Hanley: First, Mr. Austin, will you please restate what you told the witness while he was off the record.

The Witness: I can answer the question.

Mr. Hanley: Please wait a moment, Mr. Warmack.

(There was a short pause.)

Mr. Austin: I am waiting for the direction of the Examiner.

Mr. Hanley: I repeat the question that counsel be directed to restate on the record what he told the witness while off the record.

7001 Trial Examiner Ballinger: While we were off the record?

Mr. Hanley: Yes.

Trial Examiner Ballinger: Will counsel be kind enough to do so?

Mr. Austin: What is that?

Trial Examiner Ballinger: Read the statement.

(The reporter read the statement.)

Mr. Austin: I said to the witness that he restrict his— it was my suggestion that he restrict his answer to the reasons why he does not know; the answer to the question and the reason why he is unable to answer it upon the assumptions included in the question.

Trial Examiner Ballinger: Proceed.

The Witness: May I hear the question?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: The question by Respondent's attorney, as I understand it, was based on the contention of the Respondent that the Commission's Exhibits 88, 89, 102, and 103 being distribution of time for all salesmen in the Detroit field covering the year 1940 were accurate and correct, and that I did subscribe to such contended accuracy and correctness, but I most assuredly do not. If those distribution of time sheets were correct, the answer to the Re- 7002 spondent's question would be—yes.

By Mr. Hanley:

Q. That is to say, that the end result would vary as between the composite and the group method of allocating, assuming that the exhibits to which you have referred are correct?

A. Yes, sir, it would vary.

Q. How much?

A. For each class of salesmen, Judge Hanley?

Q. Reseller.

A. I have given testimony on that, and I will be glad to look up the record.

Trial Examiner Ballinger: You may look up the record.

The Witness: On my sheet.

Trial Examiner Ballinger: You may look up the record.

The Witness: May I have that last question?

Trial Examiner Ballinger: Read the last question.

(The reporter read the following question:

"Q. That is to say, that the end result would vary as between the composite and the group method of allocating, assuming that the exhibits to which you have referred are correct?")

The Witness: Your Honor, after reviewing my 7003 working papers I find that a test has not been completed which would show just how far it varies—if it would be it falls—the composite figures used in the separation would make from the use of the figures, that is, percentages for each of the separate groups of salesmen in Detroit for the year 1940 in this particular instance. In my answer to the previous question it was intended to state that if the composite figures varied from the separate group figures—which they will for any particular group—and inasmuch as certain particular groups of salesmen were assigned to the direct shipment business in 1940 then the salary variations and the difference between the composite percentages and the group percentages would vary the figures of Respondents for this particular class of expense as shown on Respondent's Exhibit 101. That is assuming, of course, that the distribution of time reports shown in the records as Commission's Exhibits 88, 89, 102, and 103 were arrived at, and were the results of proper accounting study, which, in my opinion, they were not.

We do have the information which Respondent's attorney has requested, and that has been properly tested in connection with the 200 account, and they have not been thoroughly made for the 004 account—the tests have not been thoroughly made for the 004 account—

By Mr. Hanley:

Q. (Interposing.) Just a moment. Your answer,
7004 returning now to a question I asked you a moment ago, when you said there would be some variation—I will ask you again if the end result would not be subject to a variation only if the salaries in one group of salesmen failed to conform with the average for all groups.

A. Yes, sir. That is correct, assuming that the distribution of time reports are correct.

Q. Now, did the salary of reseller salesmen fail to conform with the average in the Detroit field in 1937?

A. I do not have the—

Q. That should be 1940, Mr. Warmack.

A. I do not have the average right at hand, Judge Hanley, for all of them, for that year,—rather, if I could make a calculation—well,

Q. (Interposing.) Well, you have not made it, have you?

A. Not for all the salesmen, I do not have it for the Detroit field, which are reflected in account 004.

Q. Mr. Warmack, in your judgment, would it be even more desirable from a sound accounting point of view to allocate all of the salaries and expense of salesmen individually rather than dealing with groups?

A. That brings us down to a great refinement, of course, that would be the most accurate thing to do, but from a practical standpoint, why, I just wonder if it is the thing that should be done. I do not subscribe to splitting 7005 hairs, and I think that reasonable accuracy in determining a cost differential should be sufficient.

Q. Will you please return to the exhibits which you were examining, being Commission's Exhibits 88, 89, 102, 103?

A. Yes, sir.

Q. Have you them?

A. Yes, sir.

Q. Do you understand that each one hundred units indicated on each of these exhibits represents one salesman?

A. Yes, sir.

Q. When the units are added for a tank wagon reseller channel, is it not true that the combined component parts of all classes of salesmen who have worked in that channel are shown; is that not correct?

A. That is correct according to the way the distribution of time sheets are prepared.

Q. Now, looking especially at Exhibit 103, representing September 1940.

A. Yes, sir.

Q. Do you note that the total tank wagon reseller units are 1726 while the total units of classes of salesmen shown in that fifth column is 6300? Do you follow that, Mr. Warmack?

A. It is not on here.

Mr. Austin: It is on Exhibit 89.

7006 Mr. Hanley: Yes, it is on 89.

Trial Examiner Ballinger: Do you desire the question read?

The Witness: Yes, sir.

Trial Examiner Ballinger: Read the question.

(The reporter read the question as follows:

"Q. Do you note that the total tank wagon reseller units are 1726 while the total units of classes of salesmen shown in that fifth column is 6300? Do you follow that, Mr. Warmack?")

Mr. Hanley: And make that refer to 103.

By Mr. Hanley:

Q. Now, Mr. Warmack, when 1726 is divided by 6300, what is the result as shown by the exhibit?

A. 27.4 per cent.

Q. What is your understanding of how the Respondent uses that figure?

A. According to the examples of those varying expenses; that is, as shown on page 2 of Respondent's Exhibit 99,—

Q. (Interposing.) Very well, there is no occasion for you to read that if that is all you know about it, Mr. Warmack.

If every salesman made exactly the same salary the process of adding the percentages without weighting would be all right, would it not, in your judgment?

A. For the purposes of determining a cost differential, do you mean, Judge Hanley?

7007 Q. Well, on the basis of your criticism of this account 004.

A. No, sir, if some groups of the salesmen were going to spend more time on one class of business than any other, and then if this class of salesmen were engaged in direct shipment business, and a portion of that time were assigned to direct shipment business, which is not given effect on Respondent's Exhibit 89, why, the question would arise there as to the accuracy in connection with the question you just asked.

Q. Mr. Warmack, we started out with a discussion of two different methods of allocating this expense; that used by the Respondent on a composite basis and that suggested by you on a group basis.

Now, let us stick to that premise and, with reference to the different channels as shown on Commission's Exhibits 88, 89, 102, and 103, if every salesman made exactly the same salary, the process of adding the percentage without weighting would be all right, or be the same, substantially, in every case, would it not?

A. Well, I could not answer that exactly, I would just have to see the figures and then I could answer the question.

Q. Well, assuming that each one of them made one hundred dollars per month, say,—

7008 Mr. Austin: (Interposing.) Judge Hanley, is that question directed to salaries on the computation on Exhibits 88, 89, 102, and 103, or does it go further in the segregation of direct shipment cost which is not included in this regular accounting form?

Mr. Hanley: No, my question goes to the exhibit to which I have just referred the witness, Mr. Austin, and which he has criticized because it deals with salesmen, reseller salesmen, on a composite instead of a group basis. Now I am trying to find out how much difference it would make, if any.

By Mr. Hanley:

Q. You said you would have this figure, Mr. Warmack, and to simplify it, I suggested to you that you assume that each salesman made one hundred dollars—my first question asked you was if every salesman made exactly the same.

A. My answer was that if every—every salesman does not make exactly the same, and if they did—

Trial Examiner Ballinger: (Interposing.) Mr. Warmack, that is not the question.

The Witness: I thought it was.

Trial Examiner Ballinger: You should answer the question based upon the assumption stated therein.

The Witness: Well, Judge, if we were to make an
assumption for that, and if I might have the time to
pick up all of these figures and run them out I could
7009 say that it would or would not, and I could not do
it any other way.

By Mr. Hanley:

Q. Do I understand that you cannot answer the question?

A. I have answered the question.

Q. Do you know of the monthly salary represented—

A. (Interposing.) I beg your pardon. I was looking at this book?

Q. Do you know the average monthly salary represented by these men, the reseller salesmen in Detroit in 1940?

A. I know that figure for the month of January, 1940.

Q. That is what?

A. That is the one month I made a detailed analysis for, of that particular account.

Q. Well, do you know this—whether or not the average salary for the reseller group is above or below the average salary for the entire group of salesmen?

A. Judge, may I make the computation?

Trial Examiner Ballinger: Do you desire to refresh your memory by examining records?

The Witness: I would have to do that in order to answer the question.

Trial Examiner Ballinger: If counsel desires an answer to the question, you will be afforded that opportunity.

Mr. Austin: The question was: Does this witness
7010 know; if that is all that counsel wants I should think
that it could be answered without a computation.

Mr. Hanley: It may be well to get that answer first, if your Honor please.

Trial Examiner Ballinger: Do you know now without refreshing your recollection?

The Witness: No, sir. I have all of the information in the working sheets or papers, though.

By Mr. Hanley:

Q. Mr. Warmack, I doubt very much if the computation will be of any value to you or to any of us unless you first answer the question that if every salesman made exactly the same salary, the process of adding the percentage without being weighted would result in the same thing; that is, your method and the Respondent's method would result the same way? If you do not know that, I do not know of any value of the computation.

A. It would take a computation to determine that.

Q. If they were made exactly the same thing?

A. you are asking me if I know of my own knowledge. I have not made the calculation and I cannot know.

Trial Examiner Ballinger: Mr. Warmack, the question did not ask you as of your own knowledge, but presupposed a situation, and you are asked to answer it on that supposition.

The Witness: Judge, I cannot know that unless I
7011 write down figures and determine that.

Trial Examiner Ballinger: You are not asked to know it.

The Witness: I cannot know it, and I cannot give an opinion on it.

By Mr. Hanley:

Q. I understand, Mr. Warmack, that you have been asked to, and you are entitled for the purposes of this answer to assume the accuracy of this series of exhibits, Commission's Exhibits 88, 89, 102, and 103. That is assumption No. 1.

You may also assume that each of the salesmen in all of the groups makes exactly the same salary. You may not think that is true, and perhaps that is not, but please assume it for the purposes of this question. That is assumption No. 2.

Now, on the bases of those two assumptions, please answer the question:

Would the putting of the two groups in on a composite basis, or putting them in on a group basis that you suggest, make any difference in the end result?

A. Well, in my opinion it would, but I would just have to see the figures written down, and then I could say yes or no definitely.

Q. How would it make any difference, then?

A. For the reason that in one group of salesmen you have twenty-six salesmen, and if those salesmen made
7012 one hundred dollars a month, we would have $2,600, and we apply in Respondent's Exhibit 89 the ratio of $1357.00 to $2600.00—a portion of that expense, to the tank wagon reseller expense, while in the case of another group of salesmen it would be a very much less number, and maybe no portion of their salaries which would be one hundred dollars per month per salesman would go in the tank wagon reseller expense.

Now, you ask me there if it was—if that separation were made on that basis on the salesmen's percentages what the composite percentages would be, and whether if that separation were made on that basis of the composite percentages, would it come out the same as if it were made upon a group, and I answered—I do not know, but I can work out the figures.

Q. In view of your present answer, Mr. Warmack, I now call your attention to a question and an answer on the record a few moments ago.

I asked you: If the end result would vary only if the salaries of one group of salesmen failed to conform with the average of all groups?

And you answered me—yes.

Now, after I have not only given an equal average, but an exact salary figure equal for every salesman, you answer the same question—no. Now, please, what do you
7013 mean?

A. That is not true. That is not true.

Q. Just a moment, please, Mr. Warmack, if you please. Do you mean that is not true that you answered as to the end result of varying only if the salaries of only one group of salesmen failed to conform with all groups, by—yes?

A. I mean that the Respondent's statement is not complete, and does not cover everything that I have stated in this connection.

Q. Well, all right. Would not the end result vary only if the salaries in one group of salesmen failed to conform with the average for all groups? You have already answered that—yes.

Trial Examiner Ballinger: Mr. Warmack, these questions are susceptible of a definite answer "yes" or "no." You have said that you wanted to say something about them. You can tell us that and then if you want to or desire to do so you may offer an explanation.

The Witness: May I make a calculation, Judge, and answer the question—Judge—as the Judge has asked it?

Trial Examiner Ballinger: There is no necessity for a calculation.

The Witness: I cannot answer that question any better than I have answered it without making a calculation.

By Mr. Hanley:

7014 Q. I would like to have the record clear on this, Mr. Warmack: I said, did you or did you not say or is it or is it not true that a few moments ago you answered "yes" to the question as to whether the end result would vary only if the salaries in one group of salesmen failed to conform with the average for all groups?

A. (There was no answer.)

Trial Examiner Ballinger: Did you answer "yes" to that question?

The Witness: I do not remember, your Honor. That answer which, if I answered it "yes" should be this—that I could determine that as a fact and I would not know, without making the calculation.

By Mr. Hanley:

Q. Do you regard it as necessary to make a calculation to answer these questions if you are permitted to make two assumptions already stated, that you may make, namely, that assumption that Commission's Exhibits 88, 89, 102 and 103 are accurate; and secondly, that each salesman in all of the groups earns one hundred dollars per month?

A. To give you an accurate answer I would have to make a calculation—to give a correct answer, I mean.

Trial Examiner Ballinger: Judge, if the witness is satisfied with his answers, suppose we pass on to something else.

7015 Mr. Hanley: I am just hunting to where to go, Judge. I am just looking through these papers.

(There was a short pause.)

Trial Examiner Ballinger: Proceed.

By Mr. Hanley:

Q. Mr. Warmack, by reason of the Respondent having used the composite method in Commission's Exhibits 88, 89, 102, and 103, as distinguished from the group methods suggested by you, is the tank wagon reseller channel on Form 189 overcharged or undercharged?

Mr. Austin: Do you mean form 189 or Exhibit 101?

Mr. Hanley: Well, it may be Exhibit 101.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: Will you read the question now and I will try to straighten it out.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Austin: I want to object to that, your Honor, because I think 189 is material here only in so far as it forms the base for Respondent's Exhibit 101.

By Mr. Hanley:

Q. Form 189, Commission's Exhibit 119, was that
7016 overcharged or undercharged?

A. A test has not been fully made to show that information, Judge Hanley.

Q. Does that mean that you do not know?

A. That means that I do not know without making a test or completing the test.

Q. In your direct testimony, is it not a fact that you did arrive at some kind of a percentage based on your theory of how this group allocation should have been made?

A. No, sir.

Q. And did you not indicate the percentage of 29.19, as distinguished—

The Witness: May I have that read?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: I think you are mistaken about that. Look here. (The witness shows a document to Mr. Hanley.)

Mr. Hanley: Well, I think I am mistaken, Mr. Warmack. And I will withdraw that question until I find out what I am asking you here.

Trial Examiner Ballinger: Question withdrawn.

Mr. Hanley: Well, I will just have to proceed, if your Honor please, as to certain presumptions as to what the witness knows, I think.

Trial Examiner Ballinger: Off the record.

7017 (There was a discussion off the record.)

Trial Examiner Ballinger: On the record, proceed.

By Mr. Hanley:

Q. Have you made an examination of the worksheets prepared by Respondent's accountants upon which Respondent's Exhibits 100 and 101 are based?

A. Yes, sir. Most of them.

Q. Will you refer to page 6140 of the record. I am going to ask you a question about that, Mr. Warmack.

A. Yes, sir. (The witness examines the record.)

Q. Have you found that place, Mr. Warmack?

A. I am on page 6140, Judge Hanley.

Q. One moment.

A. Yes, sir.

Q. On that page of the record, 6140, you stated that 12.40 per cent of the industrial salesmen's time was spent on tank wagon consumer business. Will you now please turn to page 18 of Respondent's Exhibit 100 and tell the Court and the Commission what percentage of direct shipment selling time of this class of employees was taken from the tank wagon consumer channel.

A. Judge Hanley, do you mean that portion of the exhibit which was assigned to the tank wagon—to the direct shipment business, or taken from the tank wagon consumer channel—that is, 12.4 per cent of that expense?

7018 Q. On Page 6144 you stated that 87.09 per cent of industrial salesmen's salaries were charged to "other methods."

Please refer again to Exhibit—Respondent's Exhibit 100, page 18, and read the ratio of direct shipment costs taken out of this channel.

A. 87.09 per cent.

Q. On page 6145 you testified that .45 per cent of industrial salesmen's time was charged to auto supplies. Will you please read page 18 of Respondent's Exhibit 100 and state what the ratio of the take-out was?

A. .45 per cent.

Q. In other words, Mr. Warmack, is it not true that the take-out of direct shipment cost for industrial salesmen was exactly in accord with the ratios for that particular class of salesmen?

A. That is correct. That is the point we are quarreling with.

Q. Did you check the ratios for lubricating engineers?

A. Well, I have them here, Judge Hanley.

Q. Well, just, did you check them?

A. I did not go into that particular study while in Detroit.

Q. You have checked reseller salesmen?

A. Yes, sir.

Q. Did you check the B-Station salesmen?

A. No, sir.

7019 Q. And station reseller?

A. No, sir. I have the percentage of course on page 18, Respondent's Exhibit 100.

Q. And city salesmen?

A. No, sir. Again, I have the percentage on page 18, Respondent's Exhibit 100.

Q. That includes the sales classes that I have just named?

A. Yes, sir.

Q. As well as automotive salesmen—asphalt?

A. That column checks—we only made checks in Detroit,—

Q. (Interposing.) Well, do you know it to be a fact or does the exhibit show that very large group of salesmen on Respondent's accounting taking the direct shipment cost out of the direct shipment channel on the same basis that that particular group had been included in the original average?

A. That is correct, the particular group that went in to make up the composite percentages which were used for the original allocation in Respondent's form 189.

Q. Were any salesmen included in the distribution of time making up the allocation ratios as given on Commission's Exhibits 88, 89, 102, 103, which had nothing to do with direct shipments?

A. Well, I will have to check, Judge Hanley, in order to answer your question.

Q. Well, perhaps I can aid in that.
7020 Is it not true that there were such groups of salesmen and that they were known as "specialized salesmen"—"heating oil"—"domestic heating oil salesmen"—"specialized salesmen—reseller"?

A. Yes, sir. They were regarded as not having [illegible]y connection with the direct shipment business of the Respondent company.

Q. That all appears on pages 18 and 19 of Respondent's Exhibit 100?

A. Yes, sir. The sales groups you have just mentioned did not appear on those pages which means that they had been worked in connection with the direct shipment business of the company, as I interpret Respondent's Exhibit 100.

Q. Are there any salesmen's positions shown on pages 18 and 19 of Respondent's Exhibit 100 which contain—which do not compose a part of the personnel used in the preparing of Commission's Exhibits 88, 89, 102, and 103?

A. Well, I will have to check that, Judge Hanley.

(Witness temporarily excused.)

Mr. Hanley: If your Honor please, it is now twelve, and I move that we rise for luncheon.

Trial Examiner Ballinger: Now, at twelve o'clock noon, the hearing stands in recess until 1:30 p. m.

(Whereupon, at 12:00 noon, a recess was taken until 1:30 p. m., this day.)

7021 Afternoon Session.

1:30 p. m.

Trial Examiner Ballinger: Come to order. You may proceed.

WILLIAM J. WARMACK resumed the stand and testified further as follows:

Cross-Examination (Continued) by Mr. Hanley.

Q. Now,—

Trial Examiner Ballinger: There was a pending question unanswered before adjournment. Is the witness prepared to answer the question?

The Witness: Yes, sir, I believe so.

Trial Examiner Ballinger: Do you desire the question read?

The Witness: If you will, please.

Trial Examiner Ballinger: Read the question.

(The reporter read the question as follows:

"Q. Are there any salesmen's positions shown on pages 18 and 19 of Respondent's Exhibit 100 which contain—which do not compose a part of the personnel used in the preparing of Commission's Exhibits 88, 89, 102, and 103?")

The Witness: May I hear that again, please?

7022 Trial Examiner Ballinger: Read it again.

(The reporter again read the question.)

By Mr. Hanley:

Q. Can you answer the question?

A. Yes. The answer is yes.

Q. Would you name them, and please state the salary charge?

A. What is the question?

Q. Will you name them and please state the salary charge?

A. Do you mean the salary charged to direct shipment, Judge Hanley, please?

Q. Well, yes, if you can do that.

A. Yes, sir. That is shown on pages 18 and 19 of Respondent's Exhibit 100.

Q. Just name the salesmen that are omitted—that you state were omitted, I mean, by classes.

A. Agent salesmen are shown on page 19 of Respondent's Exhibit 100 with a charge of $495.54, the salaries as shown as applicable to direct shipment cost, the agent salesmen who are not shown on Commission's Exhibits 88, 89, 102, and 103;

There is a classification of salesmen on page 19 of Commission's Exhibit 100 entitled "White oil salesmen" on which the charge is $1,414.54, which is shown as applicable to direct shipment business. That group of salesmen is not shown on Commission's Exhibits 88, 89, 102, and 103.

Mr. Austin: A moment ago you said Commis-
7023 sion's Exhibit 100. Did you mean Respondent's
Exhibit 100?

The Witness: Yes.

The classification of the group of salesmen shown on page 19 of Respondent's Exhibit 100 entitled "Candle Salesmen" for which the charge $2,767.89 is assigned to salesmen's salaries as Candle salesmen to direct shipment business, which is not shown on Commission's Exhibits 88, 89, 102, and 103, I do not believe—that is all I see, Judge Hanley.

By Mr. Hanley:

Q. What does this total, if you know?

A. A little over $4,600.

Q. To be exact is it not $4,677.97?

A. I believe that is correct.

Q. Is that a part of the total direct shipment charge of $13,639.17?

A. Yes, sir.

Q. How is the percentage figure of 2.67 at the bottom of page 19, Respondent's Exhibit 100, secured?

A. That percentage represents a percentage of the total of $13,639.17 which was assigned to direct shipment business taken out of the tank wagon reseller column; that is, $364.33 of the $13,639.17 was taken out of the tank wagon reseller column and assigned to the direct shipment business.

Q. You have now stated, Mr. Warmack, that
7024 there are component parts of personnel that is used
in securing the distribution of salesmen which have

nothing to do with direct shipment costs, and there are sales positions involved in direct shipment costs not included in the average of distribution of time; is that not correct?

The Witness: May I have that question again, please?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: I wonder if counsel would please reframe that question, it is a little—just a little enlightenment, please.

By Mr. Hanley:

Q. Do you understand it, Mr. Warmack?

A. It is not clear, Judge.

Q. Referring you to Commission's Exhibits 88, 89, 102, and 103, you have testified, have you not, that includes salesmen, and classes of salesmen on their distribution of time which have nothing to do with direct shipment business?

A. (There was no answer.)

Trial Examiner Ballinger: Is that correct?

The Witness: I do not believe that I stated that, or else I did not understand the question.

By Mr. Hanley:

Q. Is it true, Mr. Warmack,—will you look at
7025 those exhibits and state now, again, if this is not true?

A. It is my understanding that some of these salesmen whose time is shown on Respondent's Exhibits 88,—Commission's Exhibits 88, 89, 102, and 103 are not concerned with direct shipment business.

Q. Did I not understand you to testify that heating oil salesmen, domestic heating oil salesmen, and specialized salesmen,—reseller, are not included in that time distribution, this morning just shortly before lunch, Mr. Warmack—they are not involved in direct shipment business?

A. That is my understanding, Judge Hanley.

Q. Now, you have just finished testifying to a list of salesmen who are involved in direct shipments, and which do not compose a part of the personnel of the salesmen appearing in Exhibits—Commission's Exhibits 88, 89, 102, and 103?

A. Yes, sir. That is correct, but it is my understanding that these—

Q. (Interposing) Well,—

A. —that the salesmen—that the salaries of these salesmen are assigned to channels in the company's regular accounting procedure on the basis of the percentages for the other groups of salesmen appearing on Commission's Exhibits 88, 89, 102, and 103.

Q. Do you know that?

A. May I review my records, your Honor?

7026. Trial Examiner Ballinger: You may do so. Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. If it suits you, Mr. Warmack, you might refer to Respondent's Exhibit 99, page 1, I believe it will aid you.

A. Thank you.

(The witness examines page 1 of Respondent's Exhibit 99.)

The Witness: Yes, sir. I believe the records will show that the candle salesmen and white oil salesmen are separated to channels on the basis of a different basis from the distribution time sheets.

However, I believe the records will further show that agent salesmen are separated on the basis—their salaries are separated on the basis of those time sheets.

By Mr. Hanley:

Q. I will restate the question I asked you a moment ago, now, Mr. Warmack.

A. Yes.

Q. You have now stated that there are component parts of personnel used in securing the distribution of salesmen's time which have nothing to do with direct shipment costs and there are sales positions involving—or in-

7027 volved in direct shipment costs not included in the averages of distribution of time. You have just now so stated, have you not?

A. Well, I just did not follow you.

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: That is my understanding, yes, Judge

Hanley,—I believe, though, that they are involved in direct shipment cost.

By Mr. Hanley:

Q. So that there will be no mistake, I will repeat the question to you again: You have now stated that there are component parts of personnel used in securing the distribution of salesmen's time which have nothing to do with direct shipment costs, and there are sales positions involved in direct shipment costs not included in the averages of distribution of time. Is that not what you have now just stated?

A. That is my understanding, yes, Judge Hanley. That is clear.

Q. And you understand that question as I have just put it to you?

A. That is right. The other was slightly different, I think, but it meant the same thing.

Q. Then, Mr. Warmack, as a matter of fact, is the percentage of 2.67 as shown on Respondent's Exhibit 100, page 19, comparable with the 29 per cent as
7028 represented by tank wagon reseller portion of petroleum
products selling cost as testified to by you on page 6133 of the record?

A. I should think that it should be comparable, or at least reasonably comparable for this reason, that this class of expense that we are dealing with here; that is, the candle salesmen, white oil salesmen, and agent salesmen are rather small amounts; that is, the total salaries paid to those salesmen, I think, were rather small amounts in comparison with the salaries paid to all of the salesmen in the Detroit field for the year 1940.

Q. Do you regard it as a matter of sound accounting, Mr. Warmack, to compare two figures on the basis of similarity, when those figures do not include similar—when your basis for those figures do not include similar component parts?

A. Well, the extent of the inclusion or the exclusion would have a bearing and would be the ultimate deciding point there, and if you do not have the actual figures some comparison might be made.

Q. Well, you had the actual figures here, Mr. Warmack, did you not?

A. Well, we went to the refinement and just a little different point of making the actual comparison. We went, as I say, to a refinement and just a little bit beyond that in the actual making of the comparison which we made.

Q. I wonder, Mr. Warmack, if you cannot answer
7029 that question, if not, I will try to reframe it.

A. Thank you.

Q. You have heard the questions which I have asked you in regard to this, have you not, Mr. Warmack?

A. Yes, sir.

Q. You have here a situation wherein you have one set of figures built up of component parts, namely, salaries of certain class; on the other hand, you have another figure built up of component parts being salaries of a different class.

You have undertaken to compare the percentage arrived at by using one of those totals with the percentage arrived at by using the other total.

Now, do you regard that as sound accounting?

The Witness: May I have that please?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

A. (There was no answer heard.)

By Mr. Hanley:

Q. Mr. Warmack, the question really means, and this is a homely example, and I mean it entirely respectfully, would you, as an accountant, add up oranges and lemons and get an answer in apples?

A. Well, I would not, but I do not think that your statement is exactly what happened in this instance.
7030 You said, Judge Hanley, that you took one class of salesmen, or one group of salesmen, including several component parts, and compared the cost with another group.

Now, in each one of these is a figure that we have here—or as each one of the figures which we have here—I will put it that way—we have a large group in there of the figures arrived at which would or at least which was included on both sides, for example, in your allocation of costs in the beginning, you had lubricating engineers, industrial salesmen, reseller salesmen, B-station salesmen, city salesmen, automotive engineers, asphalt products salesmen—

Q. (Interposing.) Well, you need not read the exhibit, Mr. Warmack, if you please.

A. Well, I am just straightening you out.

Mr. Hanley: If your Honor please, the witness is not straightening me out and his answer is not responsive to the question. I wonder if we may have the question read to the witness and get an answer from him.

The Witness: It is responsive, your Honor.

Trial Examiner Ballinger: Read again the question to the witness, and take the witness' answer.

You may start all over.

(The reporter read the question as follows:

"Q. You have here a situation wherein you have 7031 one set of figures built up of component parts, namely, salaries of certain class; on the other hand, you have another figure built up of component parts being salaries of a different class.

"You have undertaken to compare the percentage arrived at by using one of those totals with the percentage arrived at by using the other total.

"Now, do you regard that as sound accounting?")

The Witness: In the first place, the statement of counsel is not complete, and I have to show the counsel what was on the other side, and then I can answer the question, your Honor.

Trial Examiner Ballinger: Well, now, you do that without going to the books and records and pointing out the specific things. You can do that.

Mr. Hanley: I submit, your Honor, that it has been done. The witness has testified as to the classes of salesmen excluded on the one side and included on the other side in each of those instances and has given a figure.

Trial Examiner Ballinger: The Examiner is in complete agreement with counsel for the Respondent as to what the witness has done, but now when the direct question is put to him he evidently desires to change those answers.

The Witness: No, sir. That is not what I desire to do, your Honor.

7032 I desire to get the facts as to what was done and give them to Respondent's counsel, who has asked me a question whereby he would have my understanding of what was done, and what I said in the record that one group of costs was handled or set aside in one place, and another group of a different kind of costs was set aside in another, and then a comparison is made, and if the testimony is in my opinion that such a comparison is sound accounting—that is not what was done, and I am not going to state if it is my opinion that such a comparison is sound accounting. I did not say so before.

What was done was this, for the most part, the same groups of salesmen were on both sides. That is what happened.

~~By~~ Mr. Hanley:

Q. What do you mean by "for the most part"?

A. I mean all except the salesmen whose time is not separated on the basis of distribution of time reports and that is by far the smallest group.

Q. Mr. Warmack—

~~A.~~ Yes, it is.

Q. Mr. Warmack, one of these totals that is being dealt with is that portion of the expense allocated to the direct shipment channels being $13,639.17. That is right, is it?

A. That is correct.

7033 Q. The component parts of those salesmen to whom you have been referring, and about whom you testified—candle salesmen, white oil salesmen, and agent salesmen, totaling $4,677.97, which is about 34 per cent of the total of one of these groups upon which the percentage figure is reached.

Would you regard that, from a sound accounting standpoint, as being so trivial as being proper to disregard it?

A. That is not the comparison that we made, not the complete comparison that we made.

Q. I will call your attention to your comparison, page 6133 of the record, and will ask you if you were not asked this question or questions, and if you did not make these answers:

"Q. Then, do I understand that in the company's regular accounting procedure, 29 per cent of the salaries of all salesmen were allocated to the tank wagon reseller channel, whereas only 2.67 per cent of the amount of salesmen's salaries charged to direct shipments was deducted from the tank wagon reseller channel?

"A. That is a correct assumption, sir; as a matter of fact, that is what was done."

Did you so testify?

A. I so testified and that is what was done.

Q. But you have now testified, Mr. Warmack, that the 2.67 per cent as deducted was made up of different 7034 component parts from what the 29 per cent was; is that not true?

A. It may have included—

Trial Examiner Ballinger: Now, Mr. Warmack, not what it may—state what it did.

The Witness: Well, it did, as I understand it, include two component parts, minor parts of the total salesmen's salary in the Detroit field, but that comparison is amplified by an actual figure of what the effect was in dollars and cents, and not of percentage, and I will be glad to give that for the record as exactly what was done.

By Mr. Hanley:

Q. I am not interested in those figures, and they appear in the record, Mr. Warmack; I want to know what your views are on the procedure or the comparison that you made, from the standpoint of sound accounting, in your judgment.

Will you please refer to that and answer "yes" or "no" as to whether you think that kind of a comparison is sound accounting?

A. It is not complete—in and of itself it is not sound accounting, in and of itself, but we went further than that and showed the facts and what happened, and that is proper accounting.

Q. Well, Mr. Warmack, I call your attention to the fact that these component parts of the amount assigned to the direct shipment channel which component parts are 7035 not a part of the reseller channel figures equal one-third of the total, approximately, of the entire assignment of amount to the direct shipment channel. In view of that fact, do you insist or say now that an attempt to compare the percentage of 2.67 with the percentage of 29 is sound accounting, and will you please answer that "yes" or "no"?

A. Well, I can not answer your question yes or no without an explanation. With it I can answer your question yes or no.

Trial Examiner Ballinger: Please do so.

The Witness: The answer is "no" if no further comparison than that is made. We did make a further comparison, and that comparison is not complete in itself;

that is as to what we showed, your Honor, we showed the facts.

Trial Examiner Ballinger: In your opinion.

The Witness: No, sir. We showed what the books showed, what their own calculations showed.

By Mr. Hanley:

Q. Do I understand from that statement, Mr. Warmack, that the facts were not disclosed by the records and the exhibits submitted by the Respondent?

A. The particular fact as to the amount that was left in the tank wagon reseller column on Respondent's Exhibit 101 by the use of the methods employed by the Respondent was overstated in the extent of something
7036 over two thousand—is what I have in mind, Mr.
Houghton and I made a thorough study of that—and I have the figures on it which go beyond the comparison of this 2.67 per cent, because my own chief accountant questioned that and said—

Q. (Interposing.) Mr. Warmack, we are not interested in what your chief accountant said or did. We are interested now in what you have to say.

A. Yes.

Q. Referring to this page 6133, the testimony which I read to you and which you say you gave—are you now changing that testimony?

A. No, sir. I am affirming that testimony.

Q. And you are affirming it, I take it, on the basis, Mr. Warmack, that you are comparing on the one hand a set of figures composed of entirely different component parts with another set of figures composed of different component parts?

A. That is incorrect, Judge, you have a misunderstanding altogether as to what happened.

Q. Well, I have the testimony and I think the testimony will speak for itself, Mr. Warmack, but to make very certain of it, however, I will summarize.

You have stated that candle salesmen, white oil salesmen, agent salesmen are not included in the reseller channel computation—

Mr. Hanley: I will withdraw that.

7037 By Mr. Hanley:

Q. —by distribution—time I should say, time distribution, from Commission's Exhibits 88, 89, 102, and 103; that is right, is it?

A. I do not understand your question.

Q. I will repeat the whole question.

You have stated that candle salesmen, white oil salesmen, agent salesmen are not included in the time distribution as made on Commission's Exhibits 88, 89, 102, and 103?

A. Yes, sir. That is correct.

Q. And attributable to those classes of salesmen and included in the item of salaries to the direct shipment column on Respondent's Exhibit 101 is the sum of $4,677.97, is that true, and you have so testified just a few moments ago?

A. Very well.

Q. And that amount just named is a part of the total and so assigned to direct shipment column of $13,639.17. That is true, is it?

A. You are speaking of the $495.54?

Q. Will you read the question again, please—I did not say anything about $495.54.

The Witness: What is the question?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

7038 Mr. Hanley: I will restate this to make it clear.

By Mr. Hanley:

Q. On this amount just named, being $4,677.97, that is a part of the total of $13,639.17 assigned to the direct shipment channel on Respondent's Exhibit 101?

A. Yes, sir, I assume your figures are correct. I have not added them.

Q. I think, Mr. Warmack, you had better do so right now, if you will, please. I do not want any questions about this testimony.

Trial Examiner Ballinger: We will take a recess for five minutes for that purpose.

(A short recess was taken.)

Trial Examiner Ballinger: Proceed.

Have you added the figures?

The Witness: Yes, sir, I have.

Trial Examiner Ballinger: Please state the result.

The Witness: $4,677.97—and, your Honor—

Trial Examiner Ballinger: One moment. Do not volunteer anything. Wait for a question.

By Mr. Hanley:

Q. Mr. Warmack, it is upon that figure of $13,639.17 that the percentage of 2.67 is based, is it not?

A. Yes, sir. That is my understanding.

Q. You have so testified, Mr. Warmack?

7039 A. I believe that is correct, Judge Hanley.

Q. The percentage of 29 per cent is based upon the figures as appearing in Commission's Exhibits 88, 89, 102, and 103; is it not?

A. Well, there are percentages, Judge Hanley, others—29 per cent is one of them.

Q. I think that is right, Mr. Warmack.

A. That means a little different for each part.

Q. I am referring to the one of the exhibits to which you referred in your testimony given at page 6133.

A. Yes, sir.

Q. And the figures upon which the 29 per cent is based is made up of the different and other component parts from the figure of $13,639.17; is it not—you can answer, if you will, please, "yes" or "no."

A. (The witness examines papers.) The answer is—no. The 29 per cent, to be exact, is 29.19 per cent, which represents the total salaries, including the salaries which you just stated in the Detroit field in 1940, which were assigned to the tank wagon reseller channel.

That does not mean that any portion of this—of those particular salaries was assigned to the tank wagon reseller channel, but it happens in the Detroit field in 1940 the total salesmen's salaries for account 004, which we are speaking of, amount to $220,826.71, of which $60,-
7040 545.87, or 29.19 per cent of that total was assigned to the tank wagon reseller channel.

Q. Is that the 29 per cent that you are talking about all the time?

A. That was the 29 per cent that I was talking about on page 6133 of the record about which or to which you have been referring. The correct percentage is stated on page 6132 of the record in the amount of 29.19 per cent for the year 1940.

Q. Then, that calculation that you made in arriving at the 29.19 per cent is independent of the time distribution records—or exhibits you have been discussing—these exhibits you have been discussing, Mr. Warmack?

A. This is the result of the use of them, plus the result of the use of any other allocations which were made by the Respondent company in the year 1940 in the Detroit field.

Q. Well, if I understand you, you just made a calculation across the salary account on form 189, Exhibit 119.

A. Yes, sir, to determine what portion of all of this class of expense which is included in account 004 the expense of salaries the salesmen bore to it or the extent that the salaries of salesmen had been apportioned to each of the distribution channels on Respondent's Exhibit—rather, on Respondent's form 189.

Trial Examiner Ballinger: Instead of referring to the form, it is better to refer to the exhibit number.

7041 The Witness: Yes, sir.

By Mr. Hanley:

Q. Well, then, have you any criticism remaining of the time distribution forms, therefore, as reflected by Commission's Exhibits 88, 89, 102, and 103?

A. I do not believe that the figures shown on these three or four exhibits have been properly substantiated by thorough studies.

Q. Is it your testimony now that there is no difference in the component parts of the figures underlying what you were referring to by 29 per cent, and the component parts underlying the figures supporting the percentage of 2.67?

The Witness: May I hear that question?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: I think the component parts are the same except for the fact that some of this class of salesmen's salaries that go to make up the total salaries in the Detroit field for the year 1940 of which 29.19 per cent was assigned to tank wagon reseller column, a part of those salaries, as I understand it, were not for salesmen who were engaged in any way in direct shipment business.

By Mr. Hanley:

Q. All right, Mr. Warmack.

A. Yes, sir.

7042 Q. In your testimony you have criticized Exhibit 88 and that series of exhibits as representing estimates and as not representing daily tabulations of time by the respective salesmen, and that the estimates did not actually represent these salesmen's estimates, but they represent the estimate made by the salesmen's supervisors, and that there was no documentary evidence in the company's records in Detroit, as far as you were able to find out, which would support those calculations of the salesmen's time or any other calculation of time; did you check the instructions to salesmen when you were in Detroit, Mr. Warmack?

A. I do not remember that I did, Judge Hanley.

Q. When you stated that there was no documentary evidence of any kind, did you mean to say that the automotive engineers did not maintain a time record?

A. No, sir.

Q. Did he, in fact?

A. I do not know.

Q. Did you find out?

A. I asked.

Q. Did you find out?

A. I asked for all the documentary evidence, and I was given none.

Q. Do you not know it to be a fact that the automotive engineer does maintain a time record; that it was there available in Detroit; now, did you ask for it? 7042

A. I asked for all documentary evidence of any and every kind supporting Commission's Exhibit 88.

Q. Did you ask, Mr. Warmack, for the time records of the automotive engineer?

A. I do not remember that I asked one on him specifically. I did ask for all documentary evidence concerning salesmen or groups of salesmen.

Q. You have stated that before, Mr. Warmack.

A. Yes.

Q. Did you ask for the time record on agent salesmen?

A. I do not remember that I asked for that specifically. I included it in a request for all documentary evidence which would support that.

Q. Do they maintain one?

A. I do not know. I asked for all documentary evidence supporting any such thing and I did not get any.

Q. Did you ask for the time record on reseller salesmen?—

A. No. I asked for any and all documentary evidence on all of these men and I did not get any. I was told there was absolutely none.

Trial Examiner Ballinger: Strike the witness' answer. The witness may answer again.

The Witness: May I hear the question again?

Trial Examiner Ballinger: Read the question.

7044 (The reporter read the question.)

The Witness: I do not remember asking specifically, Judge, for any particular group of these salesmen, as I only asked for documentary evidence on all of them, in an inclusive request which I made many, many times.

By Mr. Hanley:

Q. Did you ask for any time records on lubricating salesmen?

A. I do not recall asking for that specifically, I asked for all the documentary evidence they had, and my request would include each and every one of these people to whom you have referred.

Q. Did you ask for any documentary evidence in connection with specialized reseller salesmen?

A. I do not remember that one. I asked for all documentary evidence concerning anything which would support this, and I was given none.

Q. Now, did you ask for a documentary evidence in connection with domestic salesmen—domestic fuel oil?

A. I do not remember specifically asking for that one. I did ask for any and all documentary evidence which would support any and all of these figures—I was given none.

Trial Examiner Ballinger: Mr. Warmack, it is not necessary, in view of your preivous statement, for you to add the additional statement that you have been adding to each one of your answers.

7045 The Witness: Just so that the record will show what I did.

Trial Examiner Ballinger: The record will show exactly what you have been testifying to. He is asking you only with reference to these specific items.

By Mr. Hanley:

Q. Did you ask for time records on B-Station salesmen?

A. I do not remember that I asked for them specifically.

Q. While you were in Detroit, did you ask to see any correspondence files between the Detroit office and the general office with respect to any changes in time distribution estimates for salesmen?

A. No, not as such, no, sir; I just asked for all documentary evidence.

Q. Did you go to Detroit and see Mr. Houghton and did you say to Mr. Houghton, in substance, "Mr. Houghton, I want documentary evidence to support this time study, or this study"; is that what you mean by your testimony?

A. To support the distribution of time reports of which Commission's Exhibit 88 is one.

Q. Is that all that you said?

A. Oh, no, I pleaded for it.

Q. But you did not ask for any particular one, you just said, "I would like to see documents"?

7046 A. Oh, I rather think that I asked for some of them particularly.

Q. But you have not been able to remember one single one.

A. Well, I know I requested them, and I talked to Mr. Hamer, the man that dealt with reseller salesmen, because Mr. Hamer is the head of that group, as I understand it, and I spoke to him rather specifically about it.

Q. Can you remember a single specific request that you made?

A. Of Mr. Houghton?

Q. Of anybody in the company for documentary evidence of any specific character?

A. Yes, sir.

Q. Was any of it along the line that I have indicated?

A. I remember specifically asking Mr. Hamer with reference to the salesmen under his supervision, and one of those, and the principal one he stated was made up by these reseller salesmen, and I asked him specifically for the reseller salesmen, I do recall that, and I recall that I made a point of asking for that because he stated to Mr. Houghton to give me anything that the company had, and he also talked about specific special reseller salesmen, when I asked him what he had on that and he stated to me that occasionally they made notes of the time spent by the reseller salesmen when the special salesmen traveled with the reseller salesmen.

Trial Examiner Ballinger: Now you say "they": whom do you mean by that?

7047 The Witness: Speaking of the special salesmen, special reseller salesmen, under Mr. Hamer. He had to do with that.

By Mr. Hanley:

Q. Mr. Warmack—
A. I would like to finish my answer.
Trial Examiner Ballinger: Let the witness finish his answer.

By Mr. Hanley:

Q. You have not finished your answer?
A. Not quite.
Q. I beg your pardon.
A. That is all right.
Trial Examiner Ballinger: Proceed.
The Witness: I asked Mr. Hamer to furnish me with any notes that may have been made by this group of special salesmen whom he said traveled with the reseller salesmen, and he stated that none were available for 1940, and then I asked Mr. Hamer if he had any for December, 1941, which was the nearest date to the time when I was there, if he would make it available to me, and he stated that he had none.

By Mr. Hanley:

Q. Now, is that the only instance that you can recall talking about those things?
7048 A. I talked to Mr. Locke about those things. As a matter of fact, I think Mr. Houghton brought in almost everybody that would know anything about the situation, to talk to, and I talked to them. I do not recall every person that I talked to.
Q. Mr. Warmack, I will tell you that in the group of blank forms, Respondent's Exhibit 109 for identification, there were many time report forms. I just advise you of that now.
A. I do not recall.
Q. You said you recognized many of those forms. Do you mean to say now that you did not get any documentary evidence on this question of salesmen's time?
A. None was furnished me showing the time that the salesmen spent with customers or on products.
Q. Mr. Warmack, when you were out in Detroit—
A. (Interposing.) Yes, sir, Judge, if I may add, which would support Commission's Exhibit 88.
Trial Examiner Ballinger: The latter is a conclusion.

The Witness: Well, Judge, I did not see any paper. I did not see any physical paper. That is not a conclusion.

Mr. Hanley: I move to strike it out.

Trial Examiner Ballinger: The conclusion is stricken out.

By Mr. Hanley:

7049 Q. You understood, did you not, Mr. Warmack, that you were to be given anything that was available that you wanted or needed or would interest you when you went down there, did you not?

A. Yes, sir.

Q. Is it your understanding now, that you were or were not given what you asked for?

A. It is my understanding that I was given everything that I asked for that existed.

Q. Then if these things existed, Mr. Warmack, it would follow, would it not, that you did not ask for them, if you never saw them?

A. It certainly would not.

Mr. Hanley: I ask that the question be read to the witness.

Trial Examiner Ballinger: Read the question to the witness.

(The reporter read the question.)

The Witness: It certainly would not.

By Mr. Hanley:

Q. Then is it not true, Mr. Warmack, that the only other alternative is that the employees of the Respondent company just refrained from giving them to you?

A. I do not think they refrained from giving anything to me that I asked for that was available.

7050 Q. Mr. Warmack, would you regard it as a sound accounting practice, or study, and a proper accounting approach to a criticism of any other's accounting study to simply ask for documentary evidence supporting the exhibit, an exhibit like Respondent's Exhibit 100, without, as an accountant, specifying what you wanted?

A. I certainly would not regard it as a proper coverage from the standpoint of sound accounting—and that is not the way I made the investigation.

Q. In your opinion, would it be better to allocate selling costs on the basis of salesmen's records?

A. Well, I certainly do not know.

Q. I am asking for your opinion.

A. I say I do not know.

Q. If you do not know, then, upon what foundation have you been for weeks criticizing the accounting methods employed by the Respondent?

A. For the reason that I have not seen any information that would convince me that the allocation factors and the distribution of time reports of which Commission's Exhibit 88 is one, had been properly established from the standpoint of sound accounting.

Q. Well, I am asking you now from the standpoint of sound accounting, in your opinion, would it be better to allocate selling costs on the basis of salesmen's records? That is a simple question. 7051

A. Well, it certainly is not. I certainly do not know.

Q. You still continue to criticize the methods of allocation used by the Respondent in that regard?

A. Oh, no, that is not true, I have not. I have not, I have no criticism to make about the Respondent's allocation of its costs, but for the purpose of establishing a cost differential you have to do something more than that, and if you are going to arrive at proper methods for arriving at proper measuring factors, you are going to make a study, and if you do not make a study you are not going to arrive at the measuring factor or factors that are properly supported.

Q. Have you made any sufficient study in all of the time you have been working on this thing to give me any kind of an answer or information about whether it would be better to allocate selling costs on the basis of salesmen's records?

A. I certainly do not, you have a volume of salesmen's records out there and I certainly could not say that they would serve as a basis for the allocation of that class of expense.

Q. Is there a seasonal variation of duty of reseller salesmen?

A. I assume there would be.

Q. Do you not know?

A. No, I would not know.

7052 Q. Did you make any inquiry and did you find out?

A. Yes, sir. I talked to Mr. Houghton about those things.

Q. What did you learn? What did you find out?

A. He referred me to Mr. Hamer, and Mr. Hamer explained it and went into considerable detail in regard to it.

Q. Well, if you found out, will you please answer the question, Mr. Warmack, which is just this: Is there a seasonal variation of the duties of reseller salesmen?

Trial Examiner Ballinger: Based upon the information you received?

Mr. Hanley: Of course.

The Witness: Judge, I would just have to look up the records on that. I cannot remember all of those in my head.

By Mr. Hanley:

Q. Are you sure you never found out?

A. I am sure I discussed it with those people, your people.

Q. Well, you have no information now what the fact is, or what you learned?

A. Well, it was my understanding if my memory serves me correctly, that Mr. Hamer stated that there was a seasonal factor involved, and he particularly pointed out the things that you had to do in the spring, like the change over situation, and possibly in the fall of the year. And there was some discussion, I remember, with reference to 7053 fuel oil activities. I rather think that they were not discussed in connection with the reseller salesmen, although it might have been.

Q. Well, do you not know when the reseller salesmen devoted the largest portion of their time to tire salesmen, or the campaign for accessories, or they would take up with the people other matters of that kind, and they would speak to the tank wagon reseller, and the motor oil salesman, and engage in the selling of annual requirements of specialty products on some sort of a discount arrangement; do you know anything about the general field about which I have just given you a few ideas?

A. None.

Q. Did you go into it?

A. I may have discussed it, yes.

Q. Would it not be necessary from the standpoint of sound accounting for you to go in detail before you would be in a position to criticize the allocation method of salesmen's time as those methods are used by the Respondent?

A. No, sir. In my opinion it would not, but if you are proving a cost justification, it most certainly would. I did not start out to prove your case of cost justification or to disprove it.

Q. Just to find out if the methods were proper, and if the costs were properly allocated, Mr. Warmack, 7054 would not it be necessary for any accountant to investigate these problems?

A. Yes, sir, it certainly would, but whenever we—

Q. (Interposing.) And if you did not do it, then to that extent, your criticism lacks foundation, does it not?

A. That is not true. That is not true. I went out there to see what you did.

Q. Just one further question on that: If there be a seasonal variation wherein the sales group devoted an abnormal portion of their time during the month of December to any given line of merchandise, would not be sound accounting to adopt actual past time records for allocation of future expense items?

A. Right there—I would like to have that question again.

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: It would not, assuming that the month of December was not a representative month for the next three succeeding months in which you would allocate your cost.

By Mr. Hanley:

Q. How would you allocate it, how would you make it up?

A. I would make a study—I would make a time study of a representative period for establishing a measuring factor, however, by which we could determine accurately and correctly what cost differentials should be used.

7055 Q. Well, while you were in Chicago did you meet and talk with Mr. R. E. Clark, the treasurer of the company, and to Mr. C. T. Bergeson, comptroller, and Mr. F. L. King, auditor, salesmen's department?

A. Yes, sir, I met Mr. Clark and Mr. Bergeson and Mr. King in the Chicago office.

Q. Did you inquire of any of these men what records were maintained over a period of years of the allocation of time of the various sales groups by field and by products?

A. I do not recall that I did, Mr. Hanley.

Q. Did you make any comparisons of estimates; that is, salesmen's time estimates submitted by the Detroit office ~~over~~ a period of years?

A. Yes, sir. I would not say a period of years, but they did take out of their records the distribution of time reports, of which Commission's Exhibit 88 is one, and I reviewed them. I do not know just how far that was—how far back that was. I saw some reports also for 1941, Judge Hanley.

Q. Did you make any comparisons or estimates or did you make any comparisons of the estimates submitted by Detroit over a period of years or for any substantial time?

A. I think I made some superficial review of those; yes, sir, Judge.

Q. Do you regard a superficial review as sufficient
7056 to entitle you to attack the accounting and allocation
methods of the Respondent company?

A. A review of that kind would not be sufficient; or would not have been sufficient, and in fact would not have been necessary to state that the figures set forth in Commission's Exhibit 88 and other distribution of time reports were estimates—I went beyond that. I did not stop there.

Q. Did you see correspondence in the Detroit office wherein that office made any changes or suggested any changes, to the general office in connection with the estimates of time in connection with the estimates of time allocations for salesmen?

A. I did not.

Q. Did you do anything of that kind in the Chicago office?

A. I did not.

Q. Did you learn whether or not the Respondent once allocated its salesmen's salaries and expense on the basis of past activities?

A. It is my understanding that it does that now.

Q. Is that your present understanding?

A. It is my understanding that these distribution of time reports—as explained to me by Mr. Hamer—were based upon the company's experience of what the salesmen had been doing, and the estimated effort of what it expected
them to do, and that that was the basis for the prep-
7057 aration of these distribution of time reports.

Trial Examiner Ballinger: Read the previous question.

(The reporter read the following question:

"Q. Did you learn whether or not the Respondent once allocated its salesmen's salaries and expense on the basis of past activities?")

Trial Examiner Ballinger: Did you or did you not?

The Witness: That was my understanding.

By Mr. Hanley:

Q. Do you now understand that the present system has in it a substantial element of future expectancy of the company?

A. Oh, yes, it has that in it.

Q. Is that a desirable method of allocating salesmen's time when their time is, on various products, subject to seasonal variations?

A. I think that is very well from the standpoint of general accounting practice to afford the management figures that it desires, but unless a cost study is made to establish these measuring factors as properly correct, or the accuracy of the result to be obtained by the use of that for the purpose of a cost justification—once that is done, it is all right, and, unless it is done in my opinion it is no good. In other words, you must have this foundational cost study and unless the cost study is made to establish these measuring factors, as I said before, as properly correct, 7058 or the accuracy of the results to be obtained from or by the use of them for the purpose of a cost justification for the company, then, in my opinion, it is no good whatever.

Q. Mr. Warmack, if the system of accounting accurately advises the management of its costs, then what criticism have you of that system of accounting as a basis for determining a cost differential?

The Witness: May I have that again?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: I would have no criticism of it if the figures were accurate. They may be sufficiently accurate for managerial ~~purposes, but they~~ may not be sufficiently accurate for purposes of cost justification.

By Mr. Hanley:

Q. Mr. Warmack, I told you in the question that if the figures are sufficiently accurate, if the accounting system is sufficiently accurate to advise the management of its costs, would it not be sufficiently accurate to sustain a cost differential?

A. Not necessarily.

Q. Does that simply mean this, Mr. Warmack, that even though the figures are such, and the accounting procedures are such as to accurately advise the management of the Standard Oil Company (Indiana) as to its costs

7059 that those same figures which accurately advise them, that group of men, of costs would not equally accurately advise you of costs?

A. They certainly may not.

In the case at bar, this company has not even segregated its costs of direct shipment business. How on earth if that is not done can those same figures afford costs that would be sufficient to prove a cost differential?

Q. If—have they done it on Exhibit 101?

A. They have tried to treat it by breaking it up piecemeal.

Q. Has not it been done?

A. It has been partly done.

Q. Do you regard Respondent's Exhibit 100 as a cost study?

A. Yes, sir.

Q. You really think it is?

A. Yes, sir. It is not the kind of cost study that I think is sufficient to prove a case of cost justification.

Q. I wonder if you would answer this, please, Mr. Warmack:

If you think it would be possible, as an accountant, for any company doing a large volume of business in a number of different products and serving a number of different customers by different means to make any cost study or devise any system of accounting which would satisfy you as a basis for a cost differential?

A. I know of a fact that that has been done in the case of the Byrd case.

7060 Q. That is about the only one in Christendom.

A. No, we have many investigations made in which I thought that the companies had sufficiently proven their costs as a practical matter, why, from the standpoint of sound accounting, it might be entirely a presumption for a company to be asked to do it ordinarily, because it might be entirely too burdensome for a company to keep costs sufficiently accurate at all times to prove a case of cost justification.

Q. Does that mean that it has none there?

A. Oh, no; no, indeed.

Q. You say that it is not here in this case.

A. I did not mean that.

Q. Did you say it?

A. Do I understand—

Q. (Interposing.) Did you say that this cost differential does not exist in this case?

A. Oh, no, I certainly do not say that.

Q. Have you any opinion about it?

A. I certainly do not.

Q. Then you do not find very much out and did not when you were out in Detroit, did you?

A. I found and I have been testifying for three and a half weeks about what I have found out out there.

Q. Of course, about the matter of whether or not the cost differential exists.

7061 A. I did not study it because I did not start out to prove a case of cost justification of the cost differential.

Q. Mr. Warmack, as I understand this case, and as I assume you understand it, the purpose here is to determine whether or not this cost differential exists; is that not your understanding?

A. That is my understanding; that is what should be the purpose.

Q. But is not that the question also?

A. I do not know what you mean.

Q. Is not that the question you were trying to answer, to find out when you were in Detroit, whether this cost differential exists?

A. No not necessarily. No, sir.

Q. Maybe not necessarily but is it not the primary question that you were interested in?

A. No, sir. I had no care as to whether or not it existed or not, and I do not now care as to whether or not it exists. That was not my assignment.

Q. Is it not a fact that the thing that you did care about was to find some means of criticizing the accounting of the Respondent company in such fashion as to make it appear that this differential did not exist?

A. Oh, no, why, that was not the purpose at all, I only wanted to find out why the Respondent had included in

their costs and in their attempted determination of
7062 a cost differential certain things and how those costs
had been separated, just the factual data, Judge, was
what I wanted.

Q. All right. How many specialized reseller salesmen are there in the Detroit field?

A. Certainly I do not know. I could not tell you.

Q. Is that not one thing that you would want to find out and that you were sent out there to find out? Is it not?

A. It is all over the record right here. Would you like for me to look it up, if you want it I will look it up.

Q. All right. Refer to Exhibit 103, please.

A. Yes, sir.

(The witness referred to Exhibit No. 103.)

Q. What is it? How many?

A. Special Salesmen—reseller, are shown on Commission's Exhibit 103 as three salesmen.

Q. Now, please outline their duties.

A. (The witness inspects the documents.)

Q. Just briefly, from your own knowledge.

A. The record will show this.

Q. Do not read the exhibits of the Respondent already in evidence, please.

A. I do not assume to remember everything.

Q. I am undertaking to find out, among other things,
what you know about this, as well as finding out
7063 facts, Mr. Warmack, so I would like your knowledge.

Trial Examiner Ballinger: Can you answer the question without reference to Respondent's Exhibit 100?

The Witness: I probably can give an answer to it, Judge, but I thought he wanted a full answer.

Trial Examiner Ballinger: That may be found in the answer.

By Mr. Hanley:

Q. I can read the Exhibit, Mr. Warmack, I just want you to tell me if you know what you know about it.

A. My knowledge goes no further than the source of it, the source of it is these records (indicating various records) and the information I got from them.

Q. All right. Do you know from these, or from any source, whether the reseller or whether the specialized salesmen, I should say, ride with the reseller salesmen, and observe them at work?

A. I was told by Mr. Hamer that they did.

The Witness: Your Honor, may we have a short recess?

Trial Examiner Ballinger: We will take a five minute recess.

(A short recess was taken.)

Trial Examiner Ballinger: Come to order.

By Mr. Hanley:

7064 Q. Mr. Warmack, in addition to the specialized reseller salesmen, the number of whom you have given, were Messrs. Locke, Hawk, who are salesmanagers —resellers, did they ride with these salesmen to observe their work?

A. It is my understanding that they did occasionally, Judge Hanley. It was just occasionally.

Q. It is my recollection—let me ask you, does Mr. Hamer, whom you interviewed the assistant field manager —resellers—also ride with reseller salesmen and observe their work?

A. Well, he did not state to me that he did do that, but I assume that he does occasionally.

Q. Do you know that?

A. That is the only thing I know what I have told you.

Q. How many reseller salesmen are there—just give us the figure by referring to the exhibit.

A. (The witness referred to the exhibit.) Yes, sir, 26.

Q. Twenty-six?

A. Twenty-six.

Q. It would appear from what you have said, now, that there are seven supervisors over the activities of these twenty-six reseller salesmen. Is that right. The three special list of salesmen—is it there or four?

A. Those seven—that includes the special salesmen—leases, of which there is shown one, on the exhibit— Commission's Exhibit 103, I do not know, however, if
7065 those special salesmen can be considered as supervisors.

It is my understanding that they may exercise some degree of supervision.

Q. It would follow then, would it not, Mr. Warmack, that there are seven men in a supervisory capacity, irrespective of the work of these twenty-six men, who observe the work of these twenty-six men, these reseller salesmen?

A. It is my understanding, Judge Hanley, I understand that Mr. Hamer may be over some of the other group outside of the regular reseller salesmen. I think I can look that up.

Q. Is it not true that his primary duty, as manager of the reseller group in the office is that very thing? Indeed, is not that his title "Manager of the Reseller Group in the Office"?

A. Yes, sir. I understand that his primary duty is acting as manager of the reseller group in the office.

Q. I believe the exact title is "Assistant Field Manager-Reseller".

A. Let me look. That is correct.

Q. Is that correct?

A. That is correct.

Q. I do not know, but I think you have fully answered this, Mr. Warmack, but I will ask you if you know, does the automotive engineer maintain a time record?

A. I do not know.

7066 Q. Would the company need an observer on this position? I assume you are familiar with his duties.

A. There is only one man and I should think he would know more about what he did than any other person could know, Judge Hanley.

Q. I should think so.

A. Yes.

Q. You have testified that Mr. Hamer advised you that reseller—that specialist salesmen reseller frequently prepared memoranda of salesmen's allocation of effort?

A. Yes, sir.

Q. He told you that?

A. Yes, sir, and he said that they rode with them—it is my understanding that that is correct, on the days that they rode with them, it is my understanding that that is correct, but not otherwise.

Q. Now, of these men in the supervisory capacity and who observe the twenty-six salesmen who are all fulltime employees—I will ask you that first—are they not?

A. That is my understanding, yes, that these seven men are full time employees.

Q. Now, in your opinion, Mr. Warmack, are seven observers adequate to estimate the allocation of time of twenty-six employees?

A. Oh, in my opinion, they are quite adequate to
7067 make an estimate, yes, sir.

Q. Does the lubricating engineer make a daily call record report showing calls made, product causing the call, and the time spent on each call?

A. I do not know.

Q. You do not recall whether you know or whether you have gotten that particular documentary evidence?

A. I recall that I did not get it.

I should like for the record to show, your Honor, that when Mr. Hamer or Mr. Houghton stated to me that some of these higher officials did keep a time record—Mr. Houghton told me that and right at that moment Mr. Houghton had to leave very suddenly because of the illness, or because of the death of his father, and if those records did exist, I do not remember getting into that matter again.

You will recall that the hearing started on this case in Detroit about February 16 or 17, it seems to me, if my memory serves me correctly, and Mr. Houghton and I had to attend that hearing, and I do not recall that we again raised the question during the course of this field investigation made by me.

Q. You did not press that matter?

A. I did not press that particular one.

Q. All right, Mr. Warmack.

Mr. Austin: I would like to know what the witness
7068 meant when he said "higher officials."

The Witness: I think Mr. Houghton meant some of the employees of the—that is, salesmen who may have been classified as automotive engineers or of that class of employees, Mr. Austin. I do remember that discussion.

By Mr. Hanley:

Q. Now, Mr. Warmack, if you do not know, you can say so—and I believe you said you did not—that the lubricating engineer kept a time record—but will you assume that he does for the purposes of this question?

A. Yes, sir.

Q. Please refer to Exhibit 103 and tell me what percentage of the time of this class of salesmen is devoted to "other methods" channel?

A. 258/300ths, Judge Hanley.

Q. What?

A. The percentage would be something over 80 per cent.

Q. Would it not be eighty-six per cent?

A. The relationship of three hundred to 258 is 86 per cent; yes, sir.

Q. Did the industrial salesmen working under the lubricating engineers or do they?

A. I do not know.

Q. Assume that to be a fact, does the lubricating engineer working with industrial salesmen on special

7069 problems—do you know that?

A. Yes, sir, it is my understanding that they do, I think Mr. Miller gave me that information in Detroit or Mr. Roth.

Q. Now, again referring to Exhibit 103, tell me what percentage of industrial salesmen's time is devoted to other methods?

A. Approximately 87 per cent.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. Mr. Warmack, I asked you to assume, in the absence of your knowledge, and now ask you, that the lubricating engineers keep time records, and you have told me that their time allocation on "other methods" channel was 87 per cent.

A. Yes, 87 per cent.

Q. The industrial salesmen work under the lubricating engineers, you said, did you not, and if you said you did not know that was so, I will now ask you to assume that as a fact.

A. I will assume it.

Q. And you have indicated that the industrial salesmen's time on "other methods" is 87 per cent?

A. Yes, sir; that is on Commission's Exhibit 103.

Q. Now, assuming, if you do not know the fact

7070 to be, that the industrial salesmen do not keep time records and that they keep only call records, and assuming again that the lubricating engineers do keep time records and supervise the efforts of the industrial salesmen, would you say, as an accountant, what as to the responsible and reasonable accuracy of the relationship of 86 per cent of the time based on an actual record kept as to the 87 per cent of supervised employees, which 87 per cent is an estimate?

A. I would question that, I think the cart is before the horse.

It seems to me that the supervised time spent in supervisory activities should follow the time of the person supervised rather than the person supervised, that his time should follow the time of his supervisor, that is.

Q. Perhaps you do not understand the methods in use, as to the work of these men, Mr. Warmack. If you do not, assume it to be a fact, and it is, that these two groups of salesmen or employees work together to a very considerable extent.

A. Yes, sir.

Q. With that understanding would you not say that the estimated time allocation of 87 per cent is, from an accounting standpoint, reliable and reasonably accurate?

A. No, not just on its face, Judge Hanley. I would have to know more as to whether or not the activities of these industrial salesmen, as to whether or not those activi-
7071 ties follow with the activities of the supervised's su-
pervisors, if they do, I would most certainly say that is a proper method of separating the time.

Q. How many B-Station salesmen did you find, Mr. Warmack?

A. I find now six.

Q. How many supervisors work with these B-salesmen? Do you know that?

A. No, sir. I do not know that.

Q. Well, then, assume that to be—which is a fact—it is the assistant manager—wholesale, assistant manager—wholesale as well as the manager—wholesale, and assistant sales manager—wholesale.

Mr. Hanley: I withdraw that question and will start it over again.

By Mr. Hanley:

Q. Mr. Warmack, then assume it to be a fact—which is the fact,—it is the assistant manager—wholesale, sales manager—wholesale, assistant sales manager—wholesale, three of them; do you know whether those men ride with the B-Station salesmen and observe their work and methods of work?

A. No, sir. I do not know that they do. I assume that they do occasionally.

Q. Do you know whether or not it is true that these three men prepare a time allocation on these six B-Station salesmen?

7072 A. Did you give me their names?

Q. Names of what?

A. Of the supervisors.

Q. Of the supervisors?

Mr. Hanley: Off the record.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. Do you know Mr. Blaugh, assistant manager—wholesale; Mr. Smith; sales manager—wholesale; I am sorry I do not know the name of the other assistant.

A. I am not—it is my understanding that Mr. Blaugh and Mr. Smith have to do with the allocation or the determining of the allocations of time of the persons whom they supervise.

Q. Now, assuming it to be a fact, if you do not know, that these three men in a supervisory capacity prepare the time allocations on these six B-Station salesmen, that they ride and whose work they observe—that they ride with and whose work they observe, would you regard those three men as a sufficient number of supervisors and consider them to be in a position to accurately prepare time allocations and make estimates for time allocation purposes?

A. I am sure that they could if they made proper notes as to the activities of the persons whom they super-7073 vise, and if they were with them a sufficient amount of time.

Q. To what channel is all of the asphalt salesmen's time charged?

A. To the "other methods" channels. That is one man.

Q. Is it your understanding that his total sales would be classified in this channel?

A. That is my understanding, yes, sir.

Q. To what channel is all of the time of the special salesmen, heating oil and domestic heating oil charged?

A. That is charged to the tank wagon reseller channel column, or tank wagon consumer business.

Q. Is it not a fact that all of the gallonage sold by these men is also in the tank wagon consumer channel?

A. That is my understanding, Judge Hanley.

Q. Mr. Warmack, I want to ask you if you agree with the following quotation, which I think has already been put in the record, Mr. Warmack, but I can speed it up if I can, possibly, by just again asking you to listen while I make this quotation from page 38 of "Cost Studies and Distribution Cost Accounting for Manufacturers and Wholesalers," which is now Commission's Exhibit 134 for identification, the statement as follows, and the question is, do you or do you not agree with the statement?

Mr. Austin: Before you read that, have you a copy of that document here?

7074 Mr. Hanley: I only have the one copy.

Mr. Austin: Very well.

By Mr. Hanley:

Q. I will now ask you to listen to this quotation which I am going to read from page 38 of Commission's Exhibit 134 for identification, and ask you the question: Do you or do you not agree with it:

"It is obviously very difficult and frequently impossible even for observers to ascertain the actual time engaged in each of these direct selling activities applicable to each commodity the salesman handles numerous items. Perhaps one basis for ascertaining the estimated time applicable to each commodity would be for observers or the salesmen to report the approximate segregation of the interview time applicable to each commodity."

Do you or do you not agree with that statement?

A. That statement is taken as a part of the context of a study which we made here in the Commission and I believe I testified before that I agree with certain of the context, and this is still my opinion; that statement taken alone and by itself is not exactly all of what that particular context shows.

Q. No, this is taken from a book, 150 pages long, Mr. Warmack, and I am just trying to get from you a
7075 statement as to whether or not you agree with the principles that are enunciated in the paragraph which I read:

Mr. Austin: Is not that the question which was asked repeatedly heretofore?

Mr. Hanley: It is.

Mr. Austin: And I have the particular paragraph to which you refer, which I believe was stated in the record repeatedly.

The Witness: That is correct.

Mr. Hanley: That is correct.

Mr. Austin: I do not see the purpose of it.

Mr. Hanley: I do not recall, if your Honor please, whether this was one of the statements which the witness modified by quoting other portions of the text or not; there was some such, but I would like to have this witness answer now if you agree with the principles as stated in the quoted language.

Trial Examiner Ballinger: You may answer.

The Witness: Your Honor, I agree with the context of the book from which this is taken—

By Mr. Hanley:

Q. (Interposing.) Mr. Warmack, this is a quotation, disregard the book now, if you will, and tell me as an expert accountant out of your own knowledge, observation, and experience, and out of your own head, whether or not
7076 you agree with the principles enunciated there.

A. They are stated in the quotation which you read?

Q. They are stated in the quotation which I read.

The Witness: May I have the question read, your Honor?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: Tell me what is respondent's attorney referring to when he says "each of these direct selling activities"; what does he mean? He says "these" and I do not know what he means by that.

Mr. Austin: Your Honor, we got into this once before, and the same question is on the record twice, and the same quotation, and I think he was asked in connection with that book, and perhaps not in connection with it also, and the witness answered as follows—

Trial Examiner Ballinger: (Interposing.) Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: If there is pending a question by Respondent's counsel it may be withdrawn and I will ask another question.

Trial Examiner Ballinger: Question withdrawn.

Mr. Hanley: I will reframe the question.

7077 Trial Examiner Ballinger: The question will be reframed.

By Mr. Hanley:

Q. Mr. Warmack, tell me, out of your experience and observation as a cost accountant, whether or not you agree in principle with the following statement:

"It is obviously very difficult and frequently impossible even for observers to ascertain the actual time engaged in each direct selling activity applicable to each commodity when the salesman handles numerous items."

Do you agree or disagree with that statement?

A. I agree with it to the extent that that would be very true in some instances, it may not be true in others, each case will have to stand on its own.

Q. Do you agree with the principle enunciated in that statement? It will not do you any good, Mr. Warmack, to read the book.

A. I may read whatever I wish, but in some situations I think that is very true, in other situations I think that it may not be anything but impossible to determine that information.

Q. Now, do you agree or disagree with the following statement:

"Perhaps the only basis for ascertaining the estimated
time applicable to each commodity would be for an
7078 observer or a salesman to report the approximate
segregation of the interview time applicable to each
commodity"?

A. That may be true, I agree with that in its application in some instances, and in some instances I think that that would be stretching the imagination to think that you could not come out with something more accurate.

Q. Mr. Warmack, do we understand that you do not know whether you agree or disagree?

A. I have given my answer.

Q. Please answer the question.

A. I have.

Mr. Hanley: May I have an answer to that, if your Honor please?

Trial Examiner Ballinger: Are you familiar with the question?

The Witness: Judge, I have answered it the best I know how.

Trial Examiner Ballinger: Are you familiar with the question, is my question to you.

The Witness: Yes, sir, I think I am. I would like to hear it.

Trial Examiner Ballinger: Read the question.

(The reporter read the following question:

"Q. Mr. Warmack, tell me, out of your experience 7079 and observation as a cost accountant, whether or not you agree in principle with the following statement: "'It is obviously very difficult and frequently impossible even for observers to ascertain the actual time engaged in each direct selling activity applicable to each commodity when the salesman handles numerous items.'"

"Do you agree or disagree with that statement?")

Trial Examiner Ballinger: Now, read the pending question.

(The reporter read the following question:

"Q. Mr. Warmack, do we understand that you do not know whether you agree or disagree?")

Trial Examiner Ballinger: Now you may answer.

The Witness: Yes, sir, I know.

By Mr. Hanley:

Q. Then, what is it, do you agree or disagree?

A. I agree with the question as put, subject to the qualifications which I have just enumerated.

Q. Mr. Warmack, I am going to ask you please just to be fair with me in connection with this question. I have asked you as an accountant if you agreed with these statements in principle. Now, as an accountant, I assume you know what is in your own mind. Will you please tell 7080 me whether in principle you agree or do not agree with these statements, and you can answer that "yes" or "no."

A. (There was no answer.)

Q. What is it?

A. I have already answered the question. I answered it previously. I answered it previously.

Mr. Hanley: May I have an answer?

Trial Examiner Ballinger: Apparently, the witness is incapable of giving you any better answer than he has already given you. He is testifying as an accountant, and he has given you the best answer he can.

Mr. Hanley: Well, of course, if your Honor please—

Trial Examiner Ballinger: Which he says he can give.

Mr. Hanley: It is extremely difficult for the Respondent to present its case if the Commission's expert witness simply refuses to answer, and sits silent.

The Witness: I am not refusing to answer the question, your Honor.

Trial Examiner Ballinger: Well, I cannot perceive any difficulty in answering the question.

The Witness: I have answered it, and properly, in my opinion.

Trial Examiner Ballinger: The statement is:

> "It is obviously very difficult and frequently impos-
> 7081 sible even for observers to ascertain the actual time engaged in each of these direct selling activities applicable to each commodity when the salesman handles numerous items."

Is not that of necessity a fact that it is very difficult for the observer to observe the time of salesmen, of the salesman who is engaged in selling each of several commodities which he handles?

The Witness: Oh, sure, but it is not impossible—your statement was—impossible.

Trial Examiner Ballinger: Is it impossible to arrive at a technically accurate time?

The Witness: I certainly do not know. Each case will have to stand on its own. That is the idea.

Trial Examiner Ballinger: Is there a case possible of arriving at such an accurate situation?

The Witness: In many cases. Many of the accountants say that it has been done and have demonstrated it to me, have demonstrated to me figures which I consider to be rather accurate. That statement comes from a book and as I said before, I agree with the context as is stated in the book, I agree with that one hundred per cent, in full, but not just a paragraph here and there.

Trial Examiner Ballinger: Judge Hanley, you may proceed.

7082 By Mr. Hanley:

Q. Now, will you name the class of salesmen, Mr. Warmack, where the Respondent has failed to adhere to the practices and principles outlined in the quotation read to you from page 38 of Commission's Exhibit 134 for identification?

A. I do not understand the question.

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: I certainly could not answer that question. It is impossible of an answer. That book did not sit down and outline what study is to be made or at least that quotation certainly did not—

By Mr. Hanley:

Q. (Interposing.) You said you could not answer the question, is that true?

A. What do you think?

Trial Examiner Ballinger: Well, now,—

Mr. Hanley: If your Honor please—

Trial Examiner Ballinger: (Interposing.) Mr. Warmack, there must be no further repetition of questions back and forth, you must either answer the question of counsel for the Respondent, or you must state that you do not understand.

The Witness: I am sorry.

7083 Trial Examiner Ballinger: Then they will be explained to you.

The Witness: Well, Judge, when the Respondent treats me in the attitude that he has just been treating me, and addresses me that way, I am sorry, but I cannot tolerate it.

Trial Examiner Ballinger: The Examiner did not observe anything unusual in the attitude of Respondent's counsel.

Mr. Hanley: Will you read the question, please?

The Witness: Maybe you just were not looking, Judge, I am sorry.

Mr. Hanley: Read the question.

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

Trial Examiner Ballinger: Can you not give him an answer?

The Witness: I think I stated that, Judge. Of course, if I may have the question I will try to state it again.

Trial Examiner Ballinger: Read the question again to the witness.

(The reporter again read the question.)

7084 Mr. Hanley: Now, if your Honor please, the question having been read again, I would like to make a motion to strike out all that has happened before, and perhaps I can reach a more satisfactory conclusion by asking another question. Therefore, I move to strike out all that has happened during the interim of time from the last question, because I believe that will be a shorter way of getting at it.

I had asked this last question hoping that that would save time rather than make a motion to strike out. It did not do so.

Therefore, my last question may be withdrawn. I now move to strike the answer of the witness beginning with the words "It is impossible."

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

The motion to withdraw the last question is granted.

That portion of the motion to strike from the record the answer of the witness is denied. It is the opinion of the Examiner it should remain on the record.

By Mr. Hanley:

Q. You have heard your answer read, Mr. Warmack. I ask you now if you meant by saying that that was an impossible question to answer, if you meant it was impossible for you to answer?

A. I certainly did not.

Q. For whom are you assuming to pronounce that judgment?

A. It would be impossible for any person to answer your question as framed.

7085 Trial Examiner Ballinger: Do you understand the question?

The Witness: Yes, sir.

Mr. Hanley: If your Honor please, we are not making any progress at all, and perhaps we should adjourn at this time.

Trial Examiner Ballinger: None whatever, and this witness can speak only for himself. He cannot go beyond. The Examiner suggests that you pass on to something else.

Mr. Hanley: If your Honor please, I would be glad to pass on to something else, but I assure your Honor that I shall have to have some cooperation of the witness if I am going to proceed at all, and this being an unusual jurisdiction in which I find myself, I do not know just what proceeding might be appropriate for me to take in order to compel that cooperation. I assume it to be within the province of the Examiner, but if it is not and does not reside there, then I earnestly request the Examiner to tell me if I should present the matter to the Commission.

Trial Examiner Ballinger: The Examiner considers the answer, while unsatisfactory, undoubtedly, nevertheless an answer.

Mr. Hanley: I think so.

7086 The Witness: Your Honor, I will be glad to explain to Respondent's counsel why this question could not be answered.

Trial Examiner Ballinger: That is, why you could not answer the question?

The Witness: Yes, sir. I cannot speak for anybody except myself.

Trial Examiner Ballinger: All right.

Now, will you explain what you meant in answering the question?

The Witness: I should be just too happy to do so.

Mr. Hanley: Well, before the Examiner asks the question—

Trial Examiner Ballinger: The Examiner has directed the witness to explain to you why he cannot answer your question, if you desire that information you may have it, otherwise the Examiner will withdraw the question.

Mr. Hanley: The Respondent would prefer that the Examiner do withdraw the question for the reason that it will simply open up another interminable repetitious speech which will not be helpful to any one in the lawsuit.

Trial Examiner Ballinger: Question of the Examiner is withdrawn.

By Mr. Hanley:

Q. Mr. Warmack, are you acquainted with the complaint under which these hearings are being held?

7087 A. Yes, sir.

Q. Do you understand it to be a fact that the complaint is directed to the price differential between two classes of customers, namely, jobbers on the one hand and tank wagon reseller customers on the other hand?

A. That is my understanding, for the year 1940.

Q. As an accountant, would you say that the cost differential should reflect differences incurred in serving these two classes of customers?

A. I should think it should in the place where the complaint is drawn.

Mr. Austin: Your Honor, I think I had better move to strike that question and answer. I think that involves a conclusion of law as to what cost differential should be included, based upon a construction of the complaint. I was under the impression that counsel was leading up to something else, or I would have objected at the time. The question, as framed, is as to an opinion of the witness based upon his knowledge, as an accountant, of a legal matter, and I would like to object and move that the question and answer be stricken.

Trial Examiner Ballinger: The objection should have been made at the time the question was asked. The objection comes too late, and the answer is in. Motion is denied.

By Mr. Hanley:

7088 Q. You have, in the course of your testimony, criticized the fact, Mr. Warmack, that the Respondent did not keep separate cost accounts for leased out service stations on the one hand, and for 461 accounts on the other hand; have you not?

A. I did not get the question.

Mr. Hanley: May the question be read?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

Trial Examiner Ballinger: Answer the question.

The Witness: No, sir.

By Mr. Hanley:

Q. Then, I have misunderstood your testimony. I thought that you took the position, Mr. Warmack, that there was something faulty in Respondent's Exhibit 101 because there was no separation between leased out stations, and 461 accounts.

A. That is an entirely different question, you asked me if I questioned the way the company keeps its accounts. I certainly do not. That was in your other question.

Q. All right. You have made a criticism included in my last question, have you not?

A. I have questioned the propriety of grouping the lessee stations with the non-lessee stations in the absence of making a cost study to determine that they should be so grouped, and I feel that until that is done they should be separated.

7089 Q. While you were in Detroit did you ascertain whether the leased service station operators in the account 461 type of account paid the same price for gasoline delivered by tank wagons?

A. Did I inquire about that?

Q. Yes.

A. Yes, I inquired about that.

Q. What did you ascertain?

A. Well, I was told that they did.

Q. Did you understand that the record in this case establishes that to be true?

A. Yes, sir, that is why I did not look up the vouchers and the bills.

Q. Did the Respondent's accountants bring together the different expenses and rent income resulting from marketing gasoline through the 461 type of outlet, and the leased type of account?

The Witness: I will have to have that question.

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

Trial Examiner Ballinger: Do you understand the question?

The Witness: It is not exactly clear to me, Judge, I think I understand it; I will try to answer it on the way I understand it.

7090 By Mr. Ha[illegible]y:

Q. Well, foundationally, let me ask you if you understand Respondent's Exhibit 101.

A. I think I understand that exhibit; that is, the facts set forth in that exhibit.

Q. Do you understand Commission's Exhibit 119, being Respondent's regular accounting form 189 for the year 1940, in Detroit?

A. Yes, sir.

Q. Then, Mr. Warmack, you could not possibly misunderstand anything about the question.

A. I certainly do not know if I understand your question, but I will answer it, I will answer it and if I do not, I do not want to try to answer it if I do not understand it—and—

Q. (Interposing.) You are not getting anywhere—is it not true that all of the expenses and rentals that are shown on the books of the Respondent company for both the 461 accounts and leased out accounts for the year 1940 are reflected separately so far as the rent account is concerned on Commission's Exhibit 119?

A. That is my understanding.

Q. And included in the figures on Respondent's Exhibit 101?

A. Yes, sir, that is my understanding.

Q. Then, will you please answer that question, Mr. Warmack?

7091 A. Will you please restate it?

Q. All right, for the fifth or sixth time now, Mr. Warmack, you are going to hear it, and will you please listen to it and answer it?

A. Just a second, that is the second time only that you have asked me that question.

Trial Examiner Ballinger: Counsel—

By Mr. Hanley:

Q. (Interposing.) Did the Respondent's accountants bring together all expenses and rent income resulting from marketing gasoline through the 461 type of outlet and the leased out type of account?

The Witness: Your Honor, I resent being addressed in any such manner by Respondent's attorney.

Trial Examiner Ballinger: The Examiner directs that the remarks of counsel for Respondent as to the number of times that the question has been asked the witness, and the last remark of the witness be stricken—not physically—from the record.

And he now requests counsel for the Respondent and the witness that counsel for Respondent address his questions to the witness and the witness to answer without any exchange of remarks between them.

The Witness: Thank you, your Honor.

Answering the question, they are thrown together 7092 in Respondent's Exhibit 101.

Trial Examiner Ballinger: Is that an answer?

Mr. Hanley: I move to strike the answer of the witness as not responsive and request the Court to direct the witness to give a direct answer to the question.

Trial Examiner Ballinger: The motion is granted.

The answer to the question is stricken and the question will be reread to the witness.

Mr. Austin: Your Honor, I object.

Mr. Hanley: If your Honor please, I wonder if we are not making such slow progress that it would be worthwhile to recess at this time.

Trial Examiner Ballinger: We will take a five minute recess if you desire.

Mr. Hanley: No, I was thinking of recessing for the day.

Trial Examiner Ballinger: I think we should try to go on a little while longer.

The Witness: Your Honor, I stated that they did do that in Respondent's Exhibit 101, or that is my understanding of what was done in the preparation of Respondent's Exhibit 101 that that part of that class of expense and rental income was put together; that is my answer.

By Mr. Hanley:

7093 Q. Mr. Warmack, do you understand it to be a fact that that is the regular, general accounting procedure of the Respondent?

A. Not exactly that. In Respondent's regular accounting procedure, they have a column set aside for the leased service station business; that is, certain expense incurred with the leasing activities of the Respondent company, which are offset by the rental revenues on the column. (The witness indicates certain columns on an exhibit.)

Q. Is that not closed into and brought together with the selling cost as set out in the tank wagon reseller channels on the Respondent's regular accounting form 189?

A. Let me review the matter.

(The witness inspects certain papers for several moments.)

The Witness: It is my understanding that all of the costs shown on Commission's Exhibit 119, which is the Respondent's regular accounting form 189, are marketing costs in the Detroit field. There is a column provided on that sheet in which the landlord activities are set out showing the costs and the rent revenues, and that has to do with these leased service stations, and the net figure as shown on Commission's Exhibit 119, company's form 189, is the net cost for the year 1940 of $48,506.44, and I do not see on this form where that is closed into anything.

By Mr. Hanley:

7094 Q. Mr. Warmack, do you not know from your studies of the methods of the Respondent in keeping its marketing costs that when the unit cost of marketing is determined by the company; that is, the unit cost of marketing through the tank wagon reseller medium of outlet, that the loss or profit, or the amount gained or lost in this so-called landlord and tenant operation is closed into and becomes a factor in determining such unit cost of marketing through that particular medium of outlet?

A. Again, I will review the record. (The witness examines certain documents.)

Trial Examiner Ballinger: Do you understand the question?

The Witness: Yes, sir.

Mr. Hanley: I will withdraw that question.

By Mr. Hanley:

Q. Does this Exhibit 101, so far as this Exhibit 101 is concerned, it is true that that is brought together, is it not—you are satisfied of that, are you not, Mr. Warmack?

A. Yes, that is a fact, that is brought together; that means the leased service station cost and the landlord costs are brought together with the tank wagon reseller and a portion of it goes into the "other methods" column.

Q. Now, the result of that would be, would it not, that
the amount shown in the reseller column on Respondent's
7095 Exhibit 101 is a composite average cost of serving
all classes of tank wagon reseller outlets paying the same price for their gasoline?

The Witness: May I have the question?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: Yes, sir, that is correct; that includes almost in fact all of the landlord expense that went—well, that we were just talking about.

By Mr. Hanley:

Q. You testified, Mr. Warmack, page 6782, if you care to look at it,—as follows:

"It is my contention that to study—"

There may be something missing here—

"—should have been made by the Respondent to determine the cost applicable to sales through leased service stations as against sales to independent operators. It could be possible from the standpoint of sound accounting that the study of this account may prove to be impractical, but at least in my opinion a study should be made to determine whether it is practicable to make such a separation."

You did so testify, did you not?

A. Yes, that is paraphrasing my testimony.

Q. It is, in part?

7096 A. Yes.

Q. Are you of the opinion now that such a separation would be practicable or impracticable?

A. Indeed, I certainly could not know that, Judge Hanley, and the only way that that point could be established would be by a study of the situation, a proper study.

Q. On the same page, I think, Mr. Warmack, you testified further, and you may find this is somewhat paraphrased:

"There is a question in my mind as to whether or not this class of expense which is offset by rentals received by the Respondent company from the lessees of the station has a place in determining a cost differential."

Did you so testify?

A. Yes, sir, I made that statement.

Q. What is your opinion now as to whether or not it is a proper item to be included in the expense of selling gasoline through the reseller column?

A. I certainly do not know.

Q. Have you any definite idea at this time as to whether it has any place in determining a cost differential?

A. I stated on direct examination I did not know, and that is still my opinion.

Q. You said there is a question in your mind?

A. Yes, sir.

7097 Q. Am I to understand when you say that there is a question in your mind that you are not sure whether it should or should not be used?

A. That it should or should not be used?

Q. You do not know in your own mind?

A. No, sir, and I could not know without going into the same more extensively than I have been required to go.

Q. Did you, while in Detroit, ascertain whether there was any net rent income for any of the months of 1940?

A. No, sir.

Q. Did you not learn that, Mr. Warmack?

A. I may have learned it, Judge Hanley, I received and reviewed each of these accounts on form 189, and the material, there was considerable material, but since the company was dealing wholly with their cost differential on the basis of the full year 1940—for the full year, I mean, not for any one month in it,—I did not concern myself materially with any particular month except from the standpoint of making tests.

Q. Where those accounts used to show the rent account on leased station is closed into the account which were or appears in the reseller channel, would not the result be, Mr. Warmack, that wherever there was an amount of rent in excess of real estate expense that, to that extent, the cost of selling gasoline through the reseller channel 7098 would be reduced?

A. Yes, sir, according to the company's method of accounting. That is—that assumes, of course, that the landlord activities of the company on the other hand reflected cost of operations, was or should be credited as revenues to the cost of operations.

Q. And the reverse would be true, I presume, would it not; that is, any net rent cost when incorporated in the reseller channel would result in an increase in the net cost, and increase in the cost of selling gasoline through the reseller channel?

A. Any rent put out or paid would cause an increase and any rent received would reduce the cost.

Q. Well, you were in Detroit for about two months. While you were in Detroit did you at any time have a segregation of the tank wagon reseller cost between these stations, and the 461 accounts shown to you, or did you make it?

A. I did not attempt to make any such segregation, and none was shown to me.

Q. Did you discuss the practicability of this segregation, Mr. Warmack, with Mr. Houghton?

A. Yes, sir.

Q. At considerable length, Mr. Warmack?

A. Yes, sir. I believe I did.

Q. Was he not in a position to point out many in- 7099 tangibles that such analysis may have faced for past periods, without maintaining records on this basis?

A. Yes, sir, he pointed out many difficulties in his mind that would arise in that attempted segregation. He did not show me that he attempted such a segregation, or that an attempt at such a segregation had ever been made by the company. He was just speculating as to what might happen.

Q. Now, in your judgment, Mr. Warmack, for those accounts which have been allocated on a time basis such as account 004, salaries—salesmen; account 006—salaries—drivers; account 008, salaries—warehouse labor; account 200, office expense—salaries—accounting, and so forth, would there not be, or would there be any standard for segregation between the two classes?

The Witness: I will have to have that again.

Trial Examiner Ballinger: Read that again.

(The reporter read the question.)

The Witness: I do not understand the question, Judge Hanley. I am sorry.

By Mr. Hanley:

Q. Can you tell me what you are having difficulty with?

A. With the word in there about would there be any standard of segregation between the two classes.

Q. The classes being the lessee stations group on the one hand, and the 461 group on the other hand.

7100 Mr. Austin: Your Honor, I am not objecting to the question, but I may be able to shorten this discussion a little.

I will stipulate on the record that it is not contended by the Federal Trade Commission that there is any difference in the unit cost of serving lessee stations and non-lessee stations as to the expense going into any of the four accounts just named by Judge Hanley.

During the direct examination several accounts were mentioned where the witness stated that a portion of the expense in such accounts, these leased service station expenses he thought should have been classified or separated as such, and of course, that goes to all of the A, B, C, accounts which, as I understand it, are already separated by the Respondent to the leased service station column, as neither accounts include the three mentioned at the beginning by Judge Hanley, and therefore, in an effort to save time, I am willing to stipulate, Judge Hanley, and it is stipulated for the purposes of this case that there is no difference in the cost of gasoline to the lessee service stations and the non-lessee service stations.

Mr. Hanley: Counsel states that he stipulates that there is no difference in the cost of gasoline to the lessee service stations and the non-lessee service stations. That is not the purpose of the question.

7101 Trial Examiner Ballinger: If there is no controversy over the question, what is the object of pursuing the question?

Mr. Austin: Maybe the Respondent contends there is some difference.

Mr. Hanley: The Respondent does contend that a certain situation exists, and that will be gone into later on. However, I am not asking this witness whether he attacks the position that there may have been no difference, or whether the Commission is now taking the position that there was a different cost on these particular items as between one class or the other; that is not the purpose of my question. I do not care whether that is agreed to or not. That is definitely not the purpose of the question.

Mr. Austin: May we be off the record?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Austin: As long as I made the statement on the record, I would like to state that that statement was, of course, confined to the metropolitan Detroit area, and the stipulation is based on the further idea that it would save time.

The Witness: He amplified that question just a little
bit by clarifying it, and may I have the entire
7102 question?

Trial Examiner Ballinger: I will direct the reporter now to read the question.

(The question referred to was read by the reporter as follows:

"Q. Now, in your judgment, Mr. Warmack, for those accounts which have been allocated on a time basis such as account 004, salaries—salesmen; account 006—salaries—drivers; account 008, salaries—warehouse labor; account 200, office expense—salaries—accounting, and so forth, would there not be, or would there be any standard for segregation between the two classes?")

(And the reporter also read:

"Q. The classes being the lessee stations group on the one hand, and the 461 group on the other hand.")

The Witness: That "standards" is just a little bit confusing to me; just what does that mean, Judge Hanley, please?

By Mr. Hanley:

Q. I will have to ask you, as an accountant, what it means; that is the meat of the question, Mr. Warmack—what standards?

A. What do you mean by "standards"—your Honor, that is the thing I would like to know.

7103 Q. I am asking you if there are any standards and if there are, what are the standards for segregation of the expense?

A. That is the first time I have heard of the word "standards."

Trial Examiner Ballinger: Do you mean methods of accounting?

By Mr. Hanley:

Q. Yes. What treatment would you use there, what yardstick would you use?

A. I positively could not answer your question, and no one in the world could answer your question unless they had studied it, and they had made a study of the situation to find out what methods were used, and studied the logic behind those things, then your question could be answered, and, your Honor, then and only then could it be answered.

Q. Now, Mr. Warmack, you were familiar with the questions in the Detroit office, and I assume you know it to be a fact that so far as serving the reseller outlets is concerned, that the lessee stations and the 461 accounts are handled identically the same way from an accounting standpoint, and from the actual, physical delivery of gasoline, from the standards of salesmanship, standards of form, and everything standard except in one instance the operator owns his own station and in the other instance the operator leases his station.

7104 A. Yes, sir, that is my understanding.

Q. That is your understanding?

A. Yes, sir.

Q. Now, that being the case, I would like to have you reconsider this question that I asked you and to outline as an accountant what could be done, what conditions exist between the 461 and the lessee stations so that something could be done to handle them differently from the standpoint of costing, and if anything could be done, what standards or methods could be used?

A. Your Honor, Judge Hanley, I answered your question and told you that I could not say what should or could be done without going out there and employing methods, and testing methods, and studying the logic of their methods to see what could be done, otherwise I cannot answer the question.

Q. Take the one account 004, salaries—salesmen, you are familiar with the fact, are you not, that these salesmen—reseller salesmen make calls on operators that are in both 461 accounts and leased station accounts, you know that?

A. That is my understanding.

Q. And they call on these two classes indiscriminately?

A. That is my understanding.

Q. They may spend an hour with a 461 station and the next two hours with a lessee station, and maybe thirty minutes with the 461 station and the next hour
7105 with the lessee station, and so on down the street
during the day; is that your understanding?

A. That is my understanding.

Q. Those salesmen are selling various commodities; that is, your understanding, is it?

A. Yes, sir, the company's products.

Q. And they are striving to sell those same commodities to each of this group?

A. Yes.

Q. Or either of these groups, both groups?

A. Yes, sir.

Q. They are?

A. Yes, sir.

Q. From time to time those same salesmen undertake to give instructions in sales methods to operators, do you understand that to be true?

A. Yes, sir. That has been testified to.

Q. That is done indiscriminately, is it not, as between the two groups, the 461 and the lessee stations?

A. I understand so, yes, sir.

Q. With that background and understanding, Mr. Warmack, what kind of a study, what approach by way of a study as you have said you thought one should be made, could you make what sort of a thing would you
do, as an accountant, to begin to study that situation
7106 to learn anything about it that you do not already
know?

A. I certainly could not tell you without going into it, but I certainly could go out and make many different kinds of studies.

Trial Examiner Ballinger: Can you answer the question?

The Witness: No, sir. I have told and told and told that I could not answer that question without making the study.

Trial Examiner Ballinger: He wants to know what you would do in making such a study.

The Witness: I would go out and study the situation. I recall that when the same question was asked of Mr. Boatwright in connection with another matter covering the company's business, he said he did not know.

Trial Examiner Ballinger: You may strike the witness' answer as to Mr. Boatwright.

The Witness: I am sorry.

By Mr. Hanley:

Q. I am hoping you do know when you say it should be separated.

A. I would—I was told that in the Detroit office what I know about it.

Q. All right, continue with that one account, Mr. Warmack, 004, what could you learn in the Detroit office?

7107 A. I could have interviewed these salesmen, I could have these salesmen keep time records, which, as I understand it, they have never done, showing the segregation of their time worked up in accordance with proper accounting methods. I would make a study to determine what sales resistance and just how much sales resistance was involved in connection with the two groups.

Q. Just a minute. Do you mean by "sales resistance" you think it might be well to find out whether it would be harder to sell an operator in a lessee service station than it would be in a 461 account, or vice versa?

A. I imagine you would, and I should imagine that would be very beneficial information to the company, if it does not already have it.

Q. Do you assume that any such difference in sales resistance exists?

A. I certainly do not know, but a study would show, that is just the beginning of how you would start. I can give you a little start there. There are many other things that would be done.

Mr. Hanley: If your Honor please, I move that we adjourn until tomorrow morning.

(Witness temporarily excused.)

Trial Examiner Ballinger: The motion is granted.

And now, at 4:55 p. m., the hearing stands ad-
7108 journed to be reconvened in Room 532, Federal Trade
Commission Building, Washington, D. C., July 24,
1942 at 9:30 o'clock, a. m.

(Whereupon, at 4:55 p. m., July 23, 1942, the hearing in the above entitled matter was adjourned.)

7109

Room 532, Federal Trade
Commission Building,
Washington, D. C.
Friday, July 24, 1942.

Met, pursuant to adjournment, at 9:30 a. m.

Before:

Webster Ballinger, Trial Examiner.

Appearances:

Cyrus B. Austin, Esq., attorney for the Federal Trade Commission.

Harold R. Hanley, Esq., (910 South Michigan Avenue, Chicago, Illinois,) appearing for the Respondent.

7110 PROCEEDINGS.

Trial Examiner Ballinger: Come to order. The hearing of Docket No. 4389, case entitled "In the Matter of Standard Oil Company (Indiana)" is reconvened pursuant to notice at 9:30 a. m., on the twenty-fourth day of July, 1942, in Room 532, Federal Trade Commission Building, Washington, D. C.

The last hearing was held at the same place, July 23, 1942.

The reporter will note counsel for the Commission and Respondent present.

You may proceed.

Mr. Hanley: Mr. Warmack, will you please resume the stand?

Mr. Warmack: Yes.

WILLIAM J. WARMACK resumed the stand and testified further as follows:

Cross-Examination (Continued) by Mr. Hanley:

Q. Mr. Warmack, just at the close of the session yesterday you gave testimony in respect of what you called the "sales resistance" as applying to the 461 operators and lessee operators.

Tell me, please, just what you meant by the term 711 "sales resistance"?

A. Well, my definition of "sales resistance,"—which will probably sound crude to a good salesman—but my idea of it is the difficulty which the customers offer, and the resistance which the customer may offer to a sales representative when he is trying to make a sale; this means when the sales representative is trying to sell a product to the customer and the customer is offering every excuse in the world why he should not buy that product, or probably not buy as much of it as the sales representative would want him to buy. That is what I mean, and that is probably crudely stated.

Q. Now, I think that is clear enough for our purposes.

A. Yes, sir.

Q. You made the suggestion in your testimony, or at least I think that is what you were doing, that there might be a greater so-called "sales resistance" on the part of lessee dealers than on the part of the 461 dealers, or perhaps vice versa; I am not just quite sure what you did mean, Mr. Warmack; is that the sense of your testimony yesterday?

A. Yes, sir. That is correct.

I think I was pointing out yesterday—I have not reviewed the testimony to which you refer—some of the things that would have to be considered and explored if a cost study were made to determine if it were possible to

separate this Respondent company's lessee business from
a non-lessee business. I was addressing myself to
7112 that particular point.

Q. Is there anything within your knowledge or observation of the company's business which leads you to believe that there may be greater sales resistance on the part of the lessee dealer than the 461 dealer?

A. Oh, I certainly do not know.

Q. Assuming this example, Mr. Warmack: Say that "X" who is a service station operator, is leasing his station from the Standard Oil Company and handles their products; assume that "Y" is a service station operator, and he owns his own station, and likewise obtains petroleum products from the Standard Oil Company.

What differences, if any, is there in your mind, from a sales resistance standpoint or otherwise, that exists in the treatment and handling, or cost of handling those two accounts from a sales standpoint or a marketing cost standpoint?

A. Well, Judge Hanley, I could not state what difference there would be. I believe you have several hundred stations, reseller stations that you serve in the Detroit field, and if you were to go into it with such refinement as to determine that point—sales resistance, it might be that there would be a different degree of sales resistance in every station, or there may not be.

That was just one point that I brought up we would
7113 have to explore in the study which I would consider
would be proper before you could determine just what separations could be made of these selling costs as applying between reseller customers.

Q. My question included sales resistance because you used the term, Mr. Warmack, and I included it and was meaning to make a little inquiry as to sales resistance. I mean to ask you—as I think I did—what, from any standpoint of handling the two accounts on a sales basis, would be the differences, what would create differences in marketing costs, in your judgment, basing your answer on your observation and on the fact that you saw fit to criticize the company's present method of handling the account.

A. I did not criticize that.

Trial Examiner Ballinger: The question relates to salaries and the sale of gas.

Mr. Hanley: No, petroleum products, whatever may be handled through the service station normally, your Honor.

By Mr. Hanley:

Q. What I am undertaking to find out from you, Mr. Warmack, is what, from your own viewpoint and from your observations, create these differences between the handling of a hypothetical dealer "X" and hypothetical dealer "Y" from a sales standpoint and marketing cost standpoint.

A. Well, Judge Hanley, a study would disclose that.

We are getting into this fancied idea or conjecture
7114 as to what may be found in a study, without having
made the study.

Q. Of course, Mr. Warmack, I am, I think, quite rightfully assuming that inasmuch as you saw fit to criticize the Respondent's method of handling these two classes or types of dealers, there must, of necessity, have been something that suggested itself to you as being of importance there that formed—or that you must have seen some differences—now, I am asking you what they are.

A. Well, I am trying to answer that for you, Judge Hanley, thank you for illuminating and explaining further to me.

Q. Proceed.

A. In the first place, the Respondent keeps its accounts as it desires, and I have no objection or argument with the way the company keeps its accounts.

It sees fit to separate some of these costs and earmark them as applying to the leased service station business, as identified from other, or distinguishing from other similar costs which do not apply to the leased service station business, for example, account 066. In that account we have miscellaneous expense. That is separated on Respondent's form 189, I believe into four separate parts in Respondent's Exhibit 101, and in the regular accounting form 189.

Account 066—miscellaneous operating expense, does
7115 not apply in any part to the leased service station
business, according to my interpretations of what is
kept in that account.

Account 066-A—miscellaneous operating expense (service station owned properties complete) has to do with leased service stations.

Account 066-B—Miscellaneous operating expense (service station owned buildings on leased ground) is kept separately. It has to do with leased service stations.

Now, account 066-C entitled "Miscellaneous operating expense (P.O.S.S.L., properties leased out)" has to do with leased service stations.

And the company sees fit to keep that separate.

Q. Now, Mr. Warmack, just at that point, is that not just a refinement of the general account—"miscellaneous operating expense"?

A. That is about the—

Q. (Interposing.) Now, just do you complain about that, that there was a refinement?

A. Oh, I should like to say, if your Honor please, that I am not complaining about the way the company keeps its books—any way it sees fit to keep them.

Q. Do you criticize the fact that the company did break up that sort of an overall miscellaneous expense account, and show a certain refinement in connection with it—

7116 A. Yes?

Q. —do you criticize that?

A. Judge Hanley, as I just stated, I certainly do not criticize that, and I do not criticize anything that the Respondent does in the way that it keeps its accounts.

It is the way that it separated its cost for the purpose of determination of a cost differential that I question.

Q. Well, is there anything in those four accounts of the 066 series that appears, that you question?

A. Yes, sir. There are some fiugres in the 066 account, directly, that I question.

Q. First, let me say that my question is referring to this subject of leased service stations versus 461 stations. I do not want to get back into your general accounting criticism, but first, just this that is before us, Mr. Warmack—

A. (Interposing.) Yes, sir. That is right. Of course, I have not explored those four accounts sufficiently as to comment on what is in those accounts. I think the record is sufficient for our purposes as to showing what are in those accounts. There are some costs in those accounts that I would question as being used in a cost differential, but that goes back to the other point, Judge Hanley, the general question.

Q. Now, adverting to the example that I gave you a moment ago, are you able to give me any definite
7117 suggestion, as an accountant, as to what specifically as between those two types of dealers might give rise to any possible difference in marketing costs?

A. Only this, if it is to be assumed that all of the costs which have not been separated between the two accounts; that is, lessee stations and non-lessee stations—of which we are speaking—if all of those costs applied equally according to the gallonage units of each group, then the landlord expense involved in the lessee group would cause a higher cost.

I cannot see that those costs would be equal. I am not saying that they would not be equal. And the only way that that could be determined would be by a study. And a study would also show if it could be determined.

Now, there is this question that arises in my mind; if the company saw fit to go to the refinement that it has gone to and that it currently goes to in breaking down some of these costs, then, I am at a loss to understand why, from a standpoint of sound accounting, that it did not go to the extent of applying its breakdown; applying its refinement in the case of the other accounts.

Q. Mr. Warmack, let us add to this illustration another dealer whom we will call "Z". He leases a station, but he does not lease it from the Standard Oil Company. He leases it from Judge Ballinger, or yourself, or
7118 somebody else.

A. Yes, sir.

Q. And he likewise buys his petroleum products through the Standard Oil Company, as do "X" and "Y". Is there anything in that situation or in that type of a dealer that to your mind, as an accountant, differentiates him from the standpoint of the company's marketing costs from either "X", or "Y", or both?

A. We are again, Judge Hanley, in a field of conjecture, in the absence of a study. I do not know.

Q. Is it your contention that such a study should be made to determine that?

A. To determine if this separation could be made of costs of serving lessee stations and costs of serving non-lessee stations. If such a separation were possible or practicable that question should be determined by a study, in my opinion.

Q. Well, do you think it either possible or practicable to make a study relative to the so-called "Z" class of operators who are leasing their stations from some one other than the Standard Oil Company; that is to say, how would the company get the information?

A. Oh, I am not going into the question of exploring the customer's cost at all.

Q. No, no. I am not asking you about that.

7119 A. I am sorry.

Q. How would the company even know, in some instances, whether a dealer owned his station or whether he was leasing it from some person unknown to the company?

A. As far as the company was concerned, or is concerned, it would be my opinion that it would not care whether he owned the station or he rented his station from somebody else, surely, he did not lease it from the Respondent company,—

Q. In those circumstances, would your study be complete?

A. Well, I just do not understand that, Judge Hanley.

Q. Well, you have indicated that there may be differences in marketing costs, including sales resistance and other elements which you have in mind between the 461 dealer, and the lessee dealer, arising just out of that relationship. Now I am asking you would your study be complete unless you also ferreted out what you might want to ferret out in connection with your study, in connection with the dealer who leased from somebody other than the Standard Oil Company?

A. Your cost study would show that if you went that far, but I think you are going in too great a refinement, however.

It is very difficult a problem to separate costs on the basis of averages or two principal groups. It may be possible to separate these costs, or some of these costs right down to determine what it costs to serve one single station.

7120 Q. I am going to ask you that, after a while, Mr. Warmack, but just tell me how.

A. You can not study—you can not say that without making a study. Make a study. Make a study. That is the only way.

Trial Examiner Ballinger: Judge, if it will not interrupt you, I would like to have Mr. Warmack dictate on the record the study that he thinks should be made.

The Witness: Judge, I could not do that, and no one in the world could do it without giving it a thorough and full study of the situation, see what methods should be employed, and the logic of the methods. Why, it would be absurd to, if an accountant could possibly do that, from the standpoint that it is just too broad a situation. I could not do that.

By Mr. Hanley:

Q. Well, do you think it practicable or possible for the Standard Oil Company to include in any such study lessee dealers who lease from others than the Standard Oil Company, assuming from the moment that they may make a lease of the station from others.

A. I would have to make a study to do that.

Q. How would you know whether the 461 dealers or one of the lessee—

A. (Interposing.) I suppose that the company's records would show which are lessees of the company.

7121 Q. I am not asking about that now, I am asking about this third person.

A. I do not know as I have put in any testimony to that effect, talking about the owner of a station or one who has leased from someone other than the company.

Q. I am trying to find out so far as you are concerned what does the suggestion that you suggest amount to, and what you want to do to make it.

A. I do not want to make it.

Q. Do you think it practicable or possible for the company to go to that extent and if you do, as an accountant, how would you suggest that the company go about it?

A. Just exactly like they would make any other study. And I should like for this record to show, if I might state, that I stated at the outset, when I was first asked about the lessee service stations and non-lessee service station expense, that I questioned the propriety of the usage of the landlord expense in determining cost differentials, and that if it were used, then, in my opinion, it will be necessary for the company to, at least, make some other effort to segregate lessee service station business against non-lessee service station business. And I am certainly sure that I did not say anything about the separation, the further separation of the non-lessee business, and I cer-

tainly could not see what effect further separation
7122 like that—what good purpose that any further
separation like that would have.

Q. Well, we will get to that in a moment. Adverting to the lessees from the company; do you understand in some instances—I assume you know, as a matter of fact, that the company owns the station, the ground, and the building; do you know that to be a fact?

A. No, sir.

Q. Well, assume it to be a fact—it is—

A. (Interposing.) I do not doubt it, Judge.

Q. That would be one class of lessee, would it not, in that instance, a lessee that would be leasing the ground and the building from the company?

A. That is correct.

Q. In other instances the company leases from some third person, and re-leases the property to an operator.

That would constitute another class; would it not, Mr. Warmack?

A. Yes, sir.

Q. In some instances the company leases ground from a third person and puts it to use, and puts on it, at its own expense, a building on that ground; that would constitute yet another class; would it not?

A. That is correct.

Q. Now, what would you do about separating those
various classes?
7123 A. I have never said anything about separating—
Q. (Interposing.) I am asking you now.

A. I think you are going into entirely too great a refinement, but it can be done in my opinion, but the cost would not be commensurate with the benefit obtained.

I could not see any useful purpose in it. If the management wanted it done, the accountant would have no alternative but to do it.

Q. In your opinion, as an accountant, when you are considering the costs as a foundation for a cost differential, Mr. Warmack, what have you to say about the need for doing it?

A. I would not see any useful purpose of doing that in this particular case.

I am sure I would not object to the company doing that if that is what they cared to do, it.

Q. Supposing you had never seen form 189, and that the company had abandoned the use of account 066-A, 066-B, 066-C for the purpose of cost control, would you then object to the use of accounts 088, 088-A, 088-B, 088-C having to do with station operated tools and equipment?

Mr. Austin: I object to that question, your Honor, it is a question asked the witness, what he would object to in an accounting procedure if it were different from what it is, and I think that is irrelevant and immaterial.

Trial Examiner Ballinger: This is cross examina-
7124 tion. The objection is overruled.

Mr. Austin: It seems to me we have enough to find out what did take place.

Trial Examiner Ballinger: No, but he has the right to test this witness' knowledge, in his opinion.

Read the question.

(The reporter read the question as follows:

"Q. Supposing you had never seen form 189, and that the company had abandoned the use of account 066-A, 066-B, 066-C for the purpose of cost control, would you then object to the use of accounts 008, 008-A, 008-B, 008-C having to do with station operated tools and equipment?")

The Witness: I do not understand your question, Judge Hanley.

By Mr. Hanley:

Q. Suppose you did not know anything about accounts 066-A, 066-B.

A. Then what?

Q. Would you then object to the use of accounts 088, 008-A, 008-B, 008-C?

A. I see no reason why I should not; inasmuch as the company designates those three expenses as shown in accounts 088-A, 088-B, and 088-C as "Landlord Expense," and by virtue of the fact that it might fail to show in its accounting the proper segregation of some of
7125 that landlord costs, I would not see any reason why we should not question it.

I might direct your attention, Judge Hanley, to account 506, and I might direct your attention to account 506 because account 506 has to do, I believe the records will show, entirely with leased service station expense; in the regular accounting form it did not even put it in there—

Q. (Interposing.) We will reach that in a moment.

A. Yes?

Q. In your judgment, where does the landlord expense stop and marketing expense begin?

A. I could only answer you a general answer to that, I could not specifically give it to you, Judge Hanley, without making a detailed study myself of this.

Q. Just give me your answer, whatever it is.

A. The costs involved in the landlord activities and offset by the revenues received in those activities, in my opinion, constitute a proper accounting for landlord activities.

And all other activities in the way of distribution costs separate from that point, your company has used the net of the landlord activities, which is the net cost, as shown by Commission's Exhibit 19, which is Respondent's form 189, as the cost of distributing the company's products in determining a cost differential. I do not know if this is correct or not. I have so testified several times 7126 here before.

Q. Mr. Warmack, assuming that you did make this segregation that you are talking about, would that not involve splitting these accounts on form 189?

A. I do not know. I do not think so.

Q. Which ones would it not involve splitting?

A. Any account on form 189 that would not apply to the landlord activities or to the cost of serving lessee stations.

There are several accounts on form 189 that do not even apply to tank wagon business at all.

Q. I am speaking of the reseller channel.

A. Oh. (The witness inspects the document.) I think that most of those accounts would have to be split. The company has already split several of them.

Q. Would it not involve splitting every single one of those accounts?

A. I do not know about that. A study would show that. Nothing else would. You would have to.

Q. Well, you would have to distinguish the group, would you not, Mr. Warmack?

A. Yes, sir.

Q. Would not that involve a splitting of every account?

A. I certainly do not know, and I have stated I do not know. I could not know. I have a little idea here, for instance, we have a little account here called "rent 7127 revenues credit," $14.70, and you say every account, now, that account should be split—how could I know?

You have an item here "demurrage, railroad storage," $10.97. And you ask me could we split that. I do not know. I do not know.

Q. You would have to split it if it involved any part of the lessee group, and any part of the 461 group?

A. If it were an influencing factor it would be necessary to split it on a gallonage basis.

Q. If you made the segregation, you were suggesting, would it not be necessary from an accounting standpoint to split it?

A. I do not know if it would or would not. If it applied to it, yes, if it applied to it, yes, and if not, no.

Q. Assuming that it applied in part to the lessee station group and in part to the non-lessee station group, would it be necessary to split it?

A. It would be necessary to split, that was not the question that was asked me, as it was asked me if it would be necessary to split the accounts and the answer was—I do not know.

Q. The method of dealing with the lessee group, as you testified yesterday, is the same as dealing with the 461 group, from the standpoint of sales service?

A. That is my understanding; yes, sir.

Q. That being true, would it not be necessary to 7128 split every account that had to do with sales serving and cost of marketing to these two groups which are now included as one group in the reseller channel on form 189?

A. It certainly would not. Take the ELA expense, account 070, that did not even apply to the leased station service.

Q. Is that the only one?

A. No, sir.

Q. How many others?

A. I do not know how many others, but I can point out a few that it would not be necessary on.

Q. All right. Please do so.

A. In the absence of any making of a detailed study with which to answer your question, I do know of a few accounts and I will call attention to them. I am sure that account 070, an account which you would not have to be splitting; account No. 514 is an account which you would not have to be splitting.

Q. What is account 514, Mr. Warmack?

A. Dismantling service stations other than ELA, I see.

Account 506, that account would not have to be split, and we are talking about splitting for the purpose of establishing a cost differential.

So far as account 290 is concerned, prorata general administrative, why, even this just would not make any difference, because it is separated on a gallonage
7129 basis, and if you were going to follow that through,
you could either throw it out or you could leave it in and the cost differential would not be changed.

Account 295 would make no difference at all where you put it. You have already gone to the extent of splitting just a great number of these accounts, and why, I do not know, right off, which other accounts would have to be split. I would have to make a study to determine that.

Q. Mr. Warmack, if such expense items were allocated between the two classes of outlets on a gallonage basis, and those accounts now assigned to tank wagon reseller accounts directly were also split between two classes on a gallonage basis, would not the major business in marketing cost be largely the net no lease cost as shown in the column "income and expense leased service stations" regular form 189, $48,506.44, divided by gallonage through such account making 9/100ths of a cent as compared with the sum of account 070 ELA expense $15,233.46, and account 111 depreciation ELA of $3411.97, a total of $18,645.43 divided by ELA gallonage of approximately fifteen million, or an equal of 12/100ths of a cent per gallon?

A. That would not be exactly true, no.

Q. Well, what would be the fact if that is not true?

A. The records may show that account 506, and will show that account 506 is a leased service station expense.

7130 Q. 506?

A. Yes.

Q. Does not 506 include bulk plants?

A. We have an exhibit of that account here in the record.

Q. Do you not know?

A. We can look it up.

Q. Do you not know?

A. I do not know of anything of my own knowledge here (indicating). I will look up the record. I do not trust my memory so much.

(The witness examines papers.)

I think, Judge Hanley, Commission's Exhibit 130 which shows what they—

Q. (Interposing.) What is that exhibit, please, not just the number, but what is the title.

A. It is entitled "Statement showing analysis of charges to marketing ~~expense account~~ of losses by dismantling (other than E.L.A.) for the Detroit field for the year 1940."

And the figure as shown here, as stated by the exhibit; that is, the loss represents loss sustained on capital assets at service stations which were entirely dismantled and rebuilt ~~into~~ combination service stations and greasing stations during the year 1940, total expense was $24,156.57 of that account.

7131 Now, I believe, or it is my understanding, according to the information set forth on this exhibit that that is expense incurred in connection with the landlord activities of the company.

Q. Only?

A. That is my understanding.

Q. Do you know it to be a fact that since this lawsuit started, Mr. Warmack, that three of the bulk plants in Detroit have been dismantled, and that that expense has been put into account 506?

A. Well, if it has, then the costs that your company gave me and the allocations of these service stations numbers that are shown on this exhibit are incorrect.

Q. I did not say that. I do not know what the dates may be. But I asked you if you knew it to be a fact that since this lawsuit started three of the bulk plants of the Respondent in Detroit have been dismantled and that the cost has been put into account 506?

A. Does it appear in this figure of $24,156.57?

Q. I do not know that it does. Just answer the question, please.

A. I beg your pardon.

(The question was read by the reporter.)

The Witness: I do not know that of my own knowledge.

7132 By Mr. Hanley:

Q. You are familiar with, having studied as you say the code of marketing accounts of the company, and do you know it to be the fact therefore that in both account 506 and account 514 bulk plant dismantling expense is included?

A. Well, that was not so included in 1940, or else there was no such expense in 1940.

Q. That may be possible, Mr. Warmack, but I am asking you now about your testimony on accounts 506 and 514, which you say would be uninfluenced by the segregation of the leased accounts and the non-leased service stations.

A. Well, I was talking about 1940, Judge Hanley. I did not know we were talking about all years.

Q. I am talking, Mr. Warmack, about the influence on this accounting, if your suggestions were followed that non-leased and leased service stations be treated as separate and distinct groups. That is what I want to know, as to what is involved.

You have indicated that you are in some doubt as to whether it is practicable or possible. I want to know if you regard it as possible at all, and how practicable you regard it.

A. I certainly do not know, and no one could know until he attempted the study.

Q. Now, in your study, as you suggest, Mr. War-
7133 mack, how would you go about that from the stand-
point of the number of leased stations as distinguished
from the number of 461 stations?

A. The study would do so.

Q. Any one of the following bases:

Would you do it on a gallonage basis?

Would you do it on the size of the station basis?

Would you do it on the basis of the number of operators in the station?

Would you do it based upon the location and distance from the main office?

Would you do it based upon the distance from a bulk plant?

Would you do it based upon the time that the salesmen and all other supervisors spent in connection with it?

Or, just how would you do it?

A. Well—

Q. Or would you do it by all of these things?

A. Would I do what by all of these things?

Q. Measure the difference in cost between serving the 461 account and the leased account.

A. No one that you named, Judge Hanley, could you pick up as being a support for all of those costs, because the thing would have to be tested out from the whole general field, and then no single one would be incorpo-
7134 rated and a proper study would probably develop several measuring factors on which these separations could be made, rather than any particular one. In other words, the study would have to be a general one from the standpoint of the entire situation as it presented itself to you, and then as a result of that, you would probably wind up, as I said before, by developing several measuring factors on which the separations could be made.

Q. Will you please state what the several possible measuring factors would be?

A. Several of those you just named.

Q. I thought you said that it might be some of those and more, or that it would be only one.

A. If you only used one single one, I do not think you would arrive at a proper answer to the problem. You can not use one measuring stick when you are going to measure the distance from here to the moon and the weight of a chunk of green cheese.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: Proceed.

By Mr. Hanley:

Q. All right. We have leased stations that fall within the 25,000 gallon class, and a couple of blocks away there is a 461 station that does five thousand gallons per month.
7135 The first is a super-station; the second is just an ordinary station that does nothing but pump gasoline.

How are you going to study what the difference in cost is as between serving those two stations; and if you can tell, then the fact that one is a leased station and the other is not, would that have anything at all to do with the costs, in view of the variation in gallonage handled?

A. I certainly do not know, and the only way would be by making a study.

Q. What is your best judgment about that?

A. I do not know. I have not made the study.

Q. Why have you made the suggestion, Mr. Warmack, that it is probably improper for the Respondent to carry these two accounts together, and to undertake a cost justification on the basis of that type of accounting, then?

A. I do not understand the question.

The Witness: May I hear the question, your Honor? May I hear the question again?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: I have not made any such statement for this record.

By Mr. Hanley:

Q. Well, you have criticized the fact that the two types of accounts are treated as one and in the same way;
7136 now I am asking you why you made that criticism?

A. I said that in my opinion if you were going to use this landlord expense in determining a cost differential, then in my opinion, it would be necessary to separate your non-lessee business from your lessee business; or, at least to make a study to determine if such were practicable. And I believe that was my statement.

Q. Mr. Warmack, is it your understanding that the Respondent company is in the real estate business, or, as distinguished from that, in the business of merely undertaking to obtain outlets for its products through the medium of leased stations?

A. I understand the latter, Judge Hanley.

Q. Is it your understanding, Mr. Warmack, that the company is not seeking primarily to profit from the real estate business, but rather seeking a means of distributing its products?

A. That is my understanding. It is further my understanding that this is done by the company because of a keen competitive situation.

I have not inquired into that. I was told that by responsible people of the company.

Q. Now, assuming that to be the fact, that the company is seeking an outlet rather than seeking real estate profits, would it not be true, in your judgment and observation as an accountant, that the rental revenues would sub-
7137 stantially equal or be offset so far as the dealer is

concerned, who is leasing, by substantially the same expense on the part of the 461 dealer, who owns his station to which expense the 461 dealer would be put in carrying his own investment?

The Witness: May I have the question?

Trial Examiner Ballinger: Do you desire the question read?

The Witness: Yes, sir.

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: Mr. Hanley, I just do not follow it. I am sorry. I wonder if you will explain it for me.

Mr. Hanley: Oh, I will withdraw it.

Trial Examiner Ballinger: Question withdrawn.

By Mr. Hanley:

Q. Supposing that the company is leasing stations primarily for the purpose of getting outlets, and not to obtain a profit on real estate; would the landlord and tenant feature of the business on a general overall basis, in your judgment as an accountant and from your observation of the company's business, result in any substantial addition or reduction of the marketing cost to the lessee dealers as compared to the marketing cost of the 461 dealers?

A. Well, I certainly could not know that, Judge Hanley, without making a study.

7138 In this particular instance, your real estate activity is segregated on Respondent's accounting form 189 which showed that the expense assigned to the landlord activity exceeded the revenues received from the lessees by around $48,000, but in at least one instance, in the case of account 506, and I believe 514, for the year 1940, it is my understanding that those accounts were for the lessee stations—if that understanding is correct, why, of course, your leased station expense would be a little bit greater than $48,000, as is shown. I just do not know what those things are and how they will run over a period of years, but they might offset completely, and they may not.

Q. You recall the testimony, do you not, Mr. Warmack, that at some times there is an over-plus in the landlord account, sometimes there is a loss shown in the landlord accounts which reflects in the final marketing cost one way or the other by either an upping of it, or a reduction of it, and that that happens not only from time to time, but from field to field; you remember that, do you not?

A. Oh, sure, in every field I assume, and I think it is reasonable to assume that those activities might show a net profit on the landlord business, as we term it, and have talked about it here, in one field, and not in another field where it might show a loss, and the next month this thing might be vice versa.

7139 Q. Exactly, and I think that is what is disclosed.
A. Yes.

Q. Now, that being true, would you regard it practicable, as an accountant, to undertake a cost separation between these two groups in order to determine as at any given hour or minute what the situation is?

A. Well, I doubt very much if it can be determined as of any given hour or minute.

Q. Or as of the first of any month?

A. Now, you speak about what the situation was, Judge; just what do you mean by that, please, if you do not mind?

Q. I mean the question of whether there was any difference in the cost of marketing to the one group as distinguished from the other; that is, the lessee as distinguished from the non-lessee group.

A. I do think that it would not be practicable to undertake a study to determine that very thing for a period; I doubt if it can be determined for an hour or a minute.

Trial Examiner Ballinger: How long a period would you suggest?

The Witness: Whatever the records might show, your Honor, as being a representative period. I do not think that it should cover the peak or the low, unless you are going to take a year-round period; three months' period in
some businesses is sufficient; a six-months' period in
7140 some other business is sufficient; and I have seen one
month checked out and accepted as satisfactory.

By Mr. Hanley:

Q. Well, if you are establishing a cost differential, Mr. Warmack, your test is for the year 1940, for instance, in Detroit, might give you a particular result in that particular year in Detroit. The next year it might change, might it not?

A. You are very well right—I mean that is quite true, Judge Hanley.

Q. Then, from a practicable accounting standpoint, when we are undertaking to determine what is the real cost differential, what good would that kind of a segregation be; what useful purpose would it serve?

A. Well, a proper separation of all of your costs by sound and accepted accounting principles and procedure would certainly afford you a cost differential that could not be disputed, and if for future periods the cost study has been made, I certainly could not feel or subscribe to the fact that the company, or any company going to the extent of making another cost study as thorough as the cost study should be made, every year or every few months, or probably every year or two—the company, when it establishes a cost differential properly will know the various factors that will change—influencing factors which
7141 will change over the course of the years, and the next year and the ensuing years when tests are made to show what factors—and what influencing factors have come about and have arisen that you must now consider, and if there are any others that have been taken out; those that were there in the beginning that have passed away, and you can come to a pretty close calculation of what your cost surely is.

Q. Would you accept this, as an accountant for the Commission, if the Respondent were charged some years hence with an infraction against the Robinson-Patman Act?

A. If such a study were made now, do you mean, Judge Hanley?

Q. That is what I mean.

A. Yes.

Q. Assuming that could be made?

A. Yes, sir, as I have just outlined, where the cost differentials were established beyond question of doubt, and then in, we will say, three years, the company may be requested again to, or required again to show its cost differentials—test them again, Judge Hanley, so that they may be well supported.

Q. Would you accept it?

A. I would take such a study if presented to this Commission, and I were assigned to it, and study what influencing factors had come about or died in connection with the company's business, if the company presented all of that information in a proper and thorough manner,
7142 and then it could be determined whether the—

Q. (Interposing.) Statement of the landlord—

A. —the cost differential were still justified.

Q. Excuse me. I thought you had finished.

Trial Examiner Ballinger: Mr. Warmack, your answer is not responsive.

The Witness: Well, Judge, I could not say whether I would accept it, I would try to ascertain, but how would I know whether I could accept something that is theoretical and imaginary, and that I have never seen or heard of—it is just wild imagination.

By Mr. Hanley:

Q. It is your judgment, as an accountant, Mr. Warmack, that where there is any admitted slight fluctuation, at least in the influencing of the landlord business, that if those accounts are to be carried together, that there should be an annual study to determine the cost differential in order that the Respondent company may be safe from attack under the discrimination laws?

A. Not necessarily.

Q. What do you think is necessary, as an accountant?

A. I think if the company wishes to know at all times that its differences in price make no more than due allowances or differences in cost of manufacturing, sale,
7143 or delivery arising from different methods Respondent is handling, that it would have to keep some tab on its costs, but I certainly could not subscribe to continuously having to make detailed cost studies.

Such is not required, and in many instances, and in all probability your company, it may be just an impracticable thing to try to carry current records so that it would show that.

Q. Well, that would mean—

A. That is my opinion, Judge Hanley.

Q. That it would be impossible, in your judgment as an accountant, for the Standard Oil Company to justify a cost differential?

A. Oh, no; no indeed. That is not what I am testifying to at all.

Q. If it is impracticable in your judgment as an accountant, assuming that it is impracticable in your judgment as an accountant, the company would never be in a position to establish, to your satisfaction, that fact; is that not true?

A. If what were impracticable?

Q. Keeping what you call sufficient accounts to separate and support these factors in order to support a cost differential.

A. I do not understand.

Q. To keep what you call sufficient accounts to support the cost differential? 7144

A. It is not necessary to keep sufficient accounts; that is, to carry current costs to such a great refinement at all times as to within a moment's notice, so to speak, show a cost differential, but in the absence of that it would be necessary to make a cost study if you wanted a cost differential, or you wanted to know what your cost differential was. You could not just go back and rely on a bunch of records which might be quite sufficient for managerial purposes, because in many instances, especially in connection with—with certain stockholders they are not interested in what money is made on the sale of one product, they want to know what the overall situation is; that is, that is what the tax people want to know—is what the overall situation is.

Q. Well, we are going a little bit away from our topic. We are getting a little bit off the subject.

A. I beg your pardon.

Q. You said a moment ago you thought it would be necessary for the company to keep some tab on its costs if they wanted to know what its cost differentials were?

A. Yes, sir.

Q. Do you regard the accounting form 189 of the company, as kept, as producing a close tab on its costs of both the lessee group and non-lessee group, and keeping that currently?

A. Yes, sir, it keeps a tab on those things to a 7145 certain extent, but I rather think maybe for managerial purposes it keeps it quite sufficiently, as far as I know it has never made a study to determine just what it costs to serve either lessee or non-lessee customers, or if such a separation may be properly made. A study would determine and show it.

Q. Mr. Warmack, would it not require the Respondent to set up a duplicate set of offices in effect, if the lessee group were treated as a separate group from the non-lessee group of reseller buyers?

A. From the standpoint of determining a cost differential, Judge Hanley, please?

Q. From the standpoint of handling it as a separate group, from an accounting standpoint.

A. I certainly should not know, I should not think so.

Q. You saw the method of operation in the Detroit office?

A. Yes, sir.

Q. Did you not?

A. Yes, sir.

Q. Is it not true that from all of the sales effort and from an accounting effort, the whole operation, so far as the reseller group, including both lessee and non-lessee is concerned is identically the same?

A. It is my opinion that it is.

Q. Now, if you separated those two groups so that you
kept accurate costs on each group, as distinguished
7146 from the other, would you not in effect have to run
two offices to accomplish identically the same things
except from an accounting standpoint?

A. I certainly could not know, but I cannot understand why that would be, I did not inject anything like that and I have not stated that it is my opinion that the company is not keeping its records correctly.

Q. I am asking you these questions, Mr. Warmack, as an accountant, and I wish you would answer them. I have a very excellent reason for asking them.

A. Yes.

Q. What would be the effect?

A. What would be the effect of what?

Q. What would be that effect?

A. I do not know—do you mean that it would cause you to set up two offices? I certainly did not mean that you would set up two offices.

Q. Or two separate sets of records; would they have to be kept?

A. I certainly do not know.

Q. If salesman Brown calls on a lessee dealer, and on a non-lessee dealer, and assuming that he keeps accurate time records, would not it be essential that there be two sets of records to receive his reports and records; that is:

First: In respect of lessee stations;
7147 Second: In respect of non-lessee stations?

A. Now, I do not know the procedure that could be followed. You could hire fifteen accountants and each one would probably put in a different kind of system for the keeping of that, and every one would probably be different—but I cannot understand what you would want that information for.

Q. I know, but I want your opinion on it.

Trial Examiner Ballinger: Mr. Warmack, how can the account be accounted for otherwise than as Judge Hanley has suggested?

The Witness: He has not suggested any way.

Mr. Hanley: I have suggested—

The Witness: I would certainly love to see his system.

By Mr. Hanley:

Q. Well, I am not going to write out a full system. I am trying to keep it as simple as I can. You tell us one way you would go at this thing would be to have the salesman keep a time record of what he did. That would mean, if I understand you at all, that if he called on a lessee dealer, he would include the hour or the time, whatever it may be, that he called on the lessee dealer, and then he would go down the street and talk with one of the non-lessee dealers and spent forty-five minutes there, and so forth and so on, throughout the day.

7148 Now, when he gets back to the office and his report is made, is it not necessary that there be two sets of books, one to receive his time in respect of lessee dealers, one to receive his time in respect of non-lessee dealers; and is that not true in respect of every case allocable to either group?

A. It most certainly is not on these accounts that you keep; you keep tank wagon reseller business, tank wagon consumer business, and tank wagon—other methods, and do you mean to argue here or state that your company keeps a separate and independent set of books for every one of those things—it does not.

Q. Do you mean to state that the books are set up to be used other than that? In other words, do you mean to say that the books are set up not just that way? Do you know how it can be otherwise done?

A. Well, I do not follow you there very well.

Trial Examiner Ballinger: He is asking you what would be required in order to establish the actual cost of these two separate accounts.

The Witness: And I am supposed to know, without going out and making a study. I have said five times I do not know what would be required, and that no accountant would state what he would do and that no accountant would set up a different system, unless he made a 7149 study he would not set up anything. And certainly any accountant that would go in there would not set up a different system and he would not need a separate set of books, and if that does not answer the question, I do not know how to answer it. If anyone went in there, the first thing that they would be doing would be to make a study of the situation and then they would take care of it. It would not take a different set of books. Of course, I did say that each accountant would probably approach it according to his individuality, to a certain degree, but he would be governed by sound and accepted principles and procedures of cost-accounting.

Otherwise I do not know how to answer the question.

In the second place, I did not and do not subscribe to any such refinement. I have not urged in this record that any such refinement be gone into, but that a study be made to the end of establishing a cost differential upon a sound and reasonable basis, and not as the current operation. Even if the company wanted to do that, that would be their own business, but that would not be necessary in order to determine the matter which they have here to determine.

Trial Examiner Ballinger: A cost study to determine a cost differential this year, if the conditions changed next year would not portray the differential that would exist the following year, would it?

The Witness: It may or it may not.

7150 Trial Examiner Ballinger: Well, if the conditions changed it would not, would it?

The Witness: Well, Judge, you can give effect to the influencing factors that have changed. Maybe all of them did not change, only maybe one or two out of the lot, or maybe five of them might change and you would have to go back and pick up that factor, and if all of the rest of them ran out, all right, but as to those particular ones you would run out on the same tests and if it showed that the costs were running reasonably constantly as to those various items, they would be all right.

To give an amplification of that, I subscribe to carrying these things continuously if the company would be setting up, Mr. Hanley says, setting up two offices, and then have another office even beyond that in Detroit—that is what he says I subscribe to. I certainly do not subscribe to anything like that. I have never subscribed to anything like that and I do not subscribe to anything like that now.

I think it should be made clear on this record that whenever there is a change, after you have primarily established your costing factors one year, and then the next year you may have a change in, say, from one to five of them, you can give effect to those one or five as the case may be, and you can run out and make tests on them, and show whether or not your costs are running reasonably constant, 7151 and if they are not, you can make due allowances for them.

By Mr. Hanley:

Q. What accounts would have to be extended?

A. If the company would desire to go to such greater refinement, of course, there is a limit to how far they can go.

Q. I am sure that the company does not so desire. I am just asking you what would be necessary to carry out your suggestion.

A. I did not suggest that they go out and do anything like that.

Trial Examiner Ballinger: Judge Hanley, we have been running for an hour and a half continuously, and I think we will now take a five minute recess.

(A short recess was taken.)

Trial Examiner Ballinger: Come to order. You may proceed.

By Mr. Hanley:

Q. Mr. Warmack, assuming—as is the fact—that there are large super-service stations doing 25,000 gallons, 30,000 gallons, 40,000 gallon volume per month, at both lessee stations and non-lessee stations class, and assuming also—as is the fact—that there are small service stations doing 4,000 gallons, 5,000 gallons, 6,000 gallons per month, sometimes less, in both lessee and non-lessee class. Per- 7152 haps you do not have to assume the fact; do you know that to be true?

A. No, sir. Not of my own knowledge.

Q. Well, then, assume it—it is a fact—you stated the other day that there was a tendency for costs per unit to reduce as volume increases.

Would it not be your judgment as an accountant that it is probably the fact that the cost would be less, that it cost less per unit in marketing service, to service a large group of accounts as distinguished from a small group of accounts?

A. Of course, a study would show that, Judge Hanley. I do not know whether it would be or not. Ordinarily, as volume increases, the cost per unit decreases.

Q. Would that be your judgment as an accountant?

A. That would be a reasonable assumption.

Q. What is your idea as to the propriety, as an accountant, of making the kind of a split, just as you have suggested, that split to be made between the lessee group and the non-lessee group?

A. Many companies over the country are doing that very thing. They have been doing it for some time.

Q. And where do you draw the line, Mr. Warmack?

A. That is up to the management of the company involved, and the desires of the persons employed coupled with the desires of the persons making the study.
7153
In other words, the two may, after discussing the point, elect somewhere to draw the line. It may be that they may draw several lines. They may set up several groups and make a study as in the case of Standard Brands Company. In that case, Judge Hanley, the company had prices per unit ranging from around fourteen cents per unit, in steps, up to twenty-five cents per unit.

Q. That was their accounting system, was it?

A. I assume they had several at several different prices.

Q. I am asking you now where the line should be drawn in the service station business.

A. Oh, I could not tell you.

Q. Well, where would it satisfy you, as an accountant for the Commission, if the Respondent were called to account for a claimed price differential or discrimination?

A. I certainly do not know.

Trial Examiner Ballinger: The witness can not answer for the Commission. He can only answer for himself.

Mr. Hanley: That is all I asked him. I asked him where it would satisfy him as an accountant.

The Witness. The answer is—I do not know. Each case has to rest on its own foundation, and be studied as such. In the absence of a sutdy or a review of the matter,

it is just a wild fancy, or a mere conjecture as to what
7154 would be done. You can not study at a desk and visualize
what you will do unless you do it.

By Mr. Hanley:

Q. That being true, Mr. Warmack, in your judgment as an accountant, is there any way for the Respondent company other than keeping a detailed, continuous, running cost study of an almost daily nature, to provide against a charge of price discrimination, other than being called into Court to determine, or for a determination by the Court as to whether this company has been in conformity with the law?

A. I can not speak for the courts. I can give you my opinion.

Q. I am asking you for your opinion, Mr. Warmack. I am not asking you what the court may or may not do. I am asking you if there is any way that the company may know, in your judgment as an accountant, whether it is in conformity with price discrimination laws other than keeping a constant, running cost study in the greatest detail and refinement.

A. In my opinion, it can.

Q. Will you tell me how?

A. Make periodic cost studies to the refinement or to the extent or sufficient to prove beyond a reasonable doubt the accuracy of the cost studies.

Q. Prove that to you?

A. Prove that to the court, you were talking about. That is my opinion.

7155 Q. And how often would those studies have to be made, in your judgment as an accountant?

A. I do not know how often they would have to be made. That would depend upon many, many factors. If the company in question was continuously changing its prices and changing its methods of operation, I rather think that it would have to make those studies at such times and as in great detail, as any great changes of that nature were made.

I have special reference to the changes in prices. That means where a change of price that you are selling to one customer, and correspondingly changing the price that you are selling to another customer, but not, maybe, by the same degree. But, in view of the fact that distribution cost accounting is relatively—I really can say even at this date—in its pioneer stage, in many instances, it would not be a practicable thing. It just not would be keeping this information—current statements. In some cases it may be. I think that is—that is all.

Q. Have you finished your answer?

A. Yes, sir.

Q. Did you encounter any data or make any observations while in Detroit or Chicago which led you to expect any significant difference of marketing cost between this lessee and non-lessee group of dealers?

7156 A. I made no study of that matter.

Q. I understand. You have said that before, Mr. Warmack. But the question is before you: Did you encounter or make any observations that would lead you to expect any significant differences to be established if the most detailed study were made?

A. I did not encounter any data, in view of the fact, of course, that I did not make an independent study myself of the situation.

Q. Was there anything that flagged—that met you—that made you think that there may be any significant difference between the cost of marketing to those two groups?

A. Well, naturally, the question would come in there that would then make you think that some exploration should be made of the situation, in view of the fact that the larger portion of the tank wagon reseller business of the Respondent company in the Detroit field is carried on through lessee stations.

I think out of sixty-nine million gallons of gasoline and refined oil sold through the tank wagon reseller business in the Detroit field, in the year 1940, why, Commission's Exhibit 119 will show that fifty-four million gallons of that gasoline were sold through the lessee stations.

Q. All right, Mr. Warmack. Did you see anything in
that that leads you to believe that there would be any
7157 significant difference in the cost of marketing as be-
tween those two outlets?

A. No, Judge. But I think that question would have to be explored if I were going to make a cost study. I know I would explore it. And I think it would be incumbent upon any accountant if he undertook to make a cost study, and it was his responsibility to determine the cost differential, I think that matter should be looked into.

Q. But you did not, as I understand it, go far enough into it to see whether or not there was anything apparent on the face of the matters that would lead to any significant difference in the marketing cost between the two groups? Am I correct in that?

A. You are correct in that, inasmuch as I did not study it to prove the Respondent's case of cost justification, or to disprove it, Mr. Hanley.

Q. From your observation as an accountant, is it not a natural resultant of good business stewardship that if one class of outlet carried marketing expenses substantially lower than the other that there would be only one type of outlet?

A. I did not get that, Judge Hanley. I am sorry.

Q. In your observation as an accountant, what have you to say as to the fact of whether or not there were or
would likely develop only one type of outlet if that
7158 type of outlet could be operated at a substantially
lower cost than other types of outlets?

A. Oh, I certainly do not subscribe to that. I do not believe that is true.

Q. Do you believe it is true—

A. (Interposing): I mean generally. I am not speaking with respect to your company, Judge Hanley.

Q. Do you believe, Mr. Warmack, that if it were true that, we will say, for instance, the lessee type of outlet were a substantially more costly type of outlet to serve as distinguished from the 461 type of outlet, that there would be a marked tendency to gravitate through the 461, and towards it, and to abandon the more costly type of operation?

A. I—

Mr. Austin: (Interposing): I object to that question, your Honor. I wanted to object to the previous one, but the witness answered before I could do so.

Trial Examiner Ballinger: The objection is sustained.

By Mr. Hanley:

Q. Are you able to draw any conclusion, Mr. Warmack, as to the probability of substantially equal marketing costs in serving these two types of outlets, from the fact that both methods of operation are used by substantially all, both large and small, petroleum companies in the country?

7159 The Witness: May I have the question read?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: No, sir. I am not able to draw any conclusion out of a generality of that kind.

By Mr. Hanley:

Q. I will try to simplify the question. I asked you just a moment ago this, and I want to get your opinion as to whether it is true or not, Mr. Warmack, that one of these methods of operation was much more costly than the other, in your judgment as an accountant and observer of business, would not the more costly type of operation be substantially abandoned in favor of the more economic type of operation?

Mr. Austin: I object to the question, also, as speculative, your Honor.

Trial Examiner Ballinger: The objection is sustained. This witness is an accountant; he is not an economist.

Mr. Hanley: Do you not regard him as qualified to answer that question, or that kind of question?

Trial Examiner Ballinger: The Examiner does not.

Mr. Hanley: Very well.

The Witness: May we be off the record for a moment, Judge?

Trial Examiner Ballinger: There is no cause for 7160 going off the record.

By Mr. Hanley:

Q. On page 6744 of the record, in response to a question on account 021, Commission's Exhibit—

Mr. Austin: (Interposing): What is the page?

Mr. Hanley: 6744.

Mr. Austin: May we be off the record?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: Back on the record. Perhaps you had better withdraw that question and start over again.

Mr. Hanley: I will withdraw the question and put a new question.

By Mr. Hanley:

Q. On page 6744 of the record in this case, in response to a question on account 021—Commissions—you stated that:

"It has no place in Respondent's Exhibit 101."

Again, at page 6753 for account 024,—expense of transferring fuel oil due to lack of storage—you stated:

"It is my contention that commission business should be separated from salary station business."

The Witness: What page is that?

Mr. Hanley: 6753.

7161 By Mr. Hanley:

Q. "I think that particular expense should be applied only to the commission agent business. If the expense is going to be used for the purposes of determining a cost differential."

That ends the quotation. There are other places in the testimony where you have referred to this segregation of cost between commissioned and salaried stations.

Now, do you recall this line of testimony?

A. Yes, sir.

Q. What do you mean, Mr. Warmack, by the statement that commission costs have no place in Respondent's cost justification as set up on Respondent's Exhibit 101?

A. Exactly that, Mr. Hanley. I do not think they have a place in there.

Q. Why not?

A. Well, there are two or three reasons.

First: The salaried station business referred to in this record as A-Station business is a separate and distinct method of operation from the B-Station business, or activities of the Respondent company.

Second: There is another point. It is my understanding that this complaint was drawn in Detroit, greater Detroit, and it is my understanding, further, that the principal portion of the company's products are distributed in Greater Detroit through the A-Stations.

7162 Third: There is another point. If a comparison is going to be made in determining the cost differential, as has been done, then it is my opinion that the B-Station business, which is commission business, should be separated from the A-Station business because of the fact that, for the most part, the B-Station business is rural business, carried on in rural communities. There may be an exception to that. I think there is an exception in the activities in Dearborn. However, for the most part the B-Station business, as I understand it, represents that carried on in rural communities whereby the product is dispensed to customers in a method different from the way it is dispensed from the large A-stations which are located, as I understand it, for the most part in the larger cities served by the Respondent in the Detroit field, the largest of which, of course, is Detroit.

Q. Those were all of your reasons?

A. Yes, sir. I think that covers the situation.

Q. That is the answer, Mr. Warmack? I asked you if those are all of your reasons.

A. Yes.

Q. Mr. Warmack, when does a marketing cost have a place in a cost justification, in your judgment as an accountant?

A. When it varies from the units sold to the 7163 separate customers and classes of customers who purchase the same unit at different prices.

Q. And what are the characteristics of marketing expense which have no place in a cost justification, in your judgment?

A. Those expenses which cannot be segregated except on a unit basis, which unit—each unit carrying an equal part thereof, such as advertising for consumer acceptance as between classes of customers for which the cost justification is to be determined for the purpose of establishing or justifying a price differential, and—

Q. Did you—

A. —some costs which are of such a general nature like "donations." I do not see how that class of expense could have a place in the cost justification. And a proper study would probably disclose others.

Q. Do you believe that your answer to the third preceding question now falls within the two definitions you have given in your—in that last question?

A. I do not remember the third preceding question. If I might have that question.

Q. That was the question in which you stated your reasons for saying that commissions should be excluded from the cost justification of the Respondent.

A. I gave the reasons why the commissions should be excluded.

7164 If the Respondent company desires to determine a cost differential between serving commission stations and serving jobbers, naphtha and gasoline, that is another matter.

However, they throw them all together. I object to doing that for the reasons stated. In my opinion the last answer given is in perfect accord with that.

Q. Now, you have defined, Mr. Warmack, what your views are as to what should be included and what should not be included in marketing cost. Purely from an accounting standpoint, will you tell the Court the definition of "cost" with particular reference to "marketing cost" as it occurs in the Robinson-Patman Act?

Mr. Austin: Just a minute. I object to that question referring to the meaning of the word as used in the statute. I do not object to the witness stating his definition of marketing cost when not related to the statute.

Trial Examiner Ballinger: The objection is overruled. This witness is constantly working under that law and preparing accounts under it.

The Witness: Well, I will do that if I can have the question again, your Honor.

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

Trial Examiner Ballinger: Do you understand the

7165 question?

The Witness: I would like to hear it again.

(The reporter again read the question as follows:

"Q. Now, you have defined, Mr. Warmack, what your views are as to what should be included and what should not be included in marketing cost. Purely from an accounting standpoint, will you tell the Court the definition of 'cost' with particular reference to 'marketing cost' as it occurs in the Robinson-Patman Act?")

The Witness: With reference to marketing cost, it is my idea that any cost pertaining to marketing of the company's goods is marketing cost. That does not mean that that cost must be used to determine a cost differential. There are many marketing costs that could not be used in determining a cost differential, your Honor.

By Mr. Hanley:

Q. All right, Mr. Warmack. You have now defined "cost" as any cost of marketing the company's products. However, you have stated that that does not mean that those costs could be used to determine a cost justification of a cost differential. That being true, how could you state some expenses, now, or expense items as falling outside of the pale of a cost differential justification?

A. Any cost will fall outside of that—that is.
7166 cannot be used in determining a cost differential
which must be supported, such as: radio advertising would be a very excellent one; newspaper advertising is another one, Judge.

Q. Does that mean that it is just a question of your judgment as to which item of marketing cost may be used as a justification for a cost differential and which may not be used as a justification for the company's cost differential?

A. I answered it that in my opinion—

Q. (Interposing): Will you please answer "yes" or "no"?

A. In my opinion, the answer I gave is the answer to it. Judge Hanley, I am not speaking for any one else in the world but myself. My opinion was the answer I gave.

Q. I understand that. I do not believe you understand the question.

A. Perhaps not.

Mr. Hanley: Will you read the question?

Trial Examiner Ballinger: Read the question and the answer of the witness.

(The reporter read the question and the answer.)

Mr. Hanley: I move to strike the answer as unresponsive. I ask that the witness answer the question.

Trial Examiner Ballinger: The motion is granted. The witness may answer the question.

Mr. Austin: May I hear the question again?

Trial Examiner Ballinger: Read the question.

7167 (The reporter read the question.)

Mr. Austin: Now, I object to the question, your Honor. It has not been answered as the record stands now. It cannot possibly add to this record in any way at all. It is a question of the witness' judgment as to what this cost should be used to sustain a cost differential. That definitely is a question of law.

Trial Examiner Ballinger: He has expressed his views with reference to what he thinks should or should not be included in this account.

Mr. Austin: Yes, sir, but now this question is whether ultimately the matter of the witness' judgment as to what costs can be or cannot be used as the cost differential—

Trial Examiner Ballinger: (Interposing): I think that it would be well to have the question read. Read the question.

(The reporter read the question.)

Trial Examiner Ballinger: That relates to all of his testimony.

Mr. Hanley: Surely, if he is not entitled to answer that question he has not been entitled to testify against the Respondent in this case.

Trial Examiner Ballinger: The objection is overruled. The witness may answer the question.

The reporter will read the question.

7168 (The reporter read the question as follows:

"Q. Does that mean that it is just a question of your judgment as to which item of marketing cost may be used as a justification for a cost differential and which may not be used as a justification for the company's cost differential?")

The Witness: Your Honor, I do not know how I can answer it any better than I have. I said that I gave my opinion. That was my opinion.

By Mr. Hanley:

Q. The question does not call for that.

A. Then I beg to be advised as to what the attorney wants.

Q. I want a "yes" or "no" answer to that question.

Trial Examiner Ballinger: Read the question again.

(The reporter again read the question.)

The Witness: Yes. That is my opinion. That is what I gave you.

By Mr. Hanley:

Q. Were any of the jobber outlets in 1940 located in territories served by commission employees?

A. I think the record will show that. I do not recall at this moment. However, if my memory serves me correctly one of the Ned's stations was or may have been served by the Dearborn station. The record will show that.

Q. Well, do you know what proportion?

7169 A. Oh, no indeed.

Q. Did you make any effort to determine that while you were in Detroit?

A. No, sir.

Q. Do you not regard that as of some importance and did you not when you were considering criticizing this Respondent's Exhibit 101 by the suggestion of the elimination of all commissions?

A. I did not think that would be a material factor, as far as I was concerned. I pointed it out to Mr. Boatwright ~~in~~ August of 1941. I suggested that if you were going to make the study, in my opinion he should explore the question of commission agent business. He did not do so. He has stated in the record that it could not be done in retrospect. I am sure it could be done in prospect. In my opinion, it should be done.

Q. What good would that do?

A. You mean a study of some of your accounts of that character?

Q. Yes.

A. Well, you made a study of some of your salesmen's time in prospect, and then applied it back in retrospect, and if you can do that you can also do that with commission agent business.

Q. Would that satisfy you as an accountant?

7170 A. If it were done properly, yes, it would suit me.

Q. Do you think it could be done properly?

A. Why, certainly, all they would have to do would be to want to do it.

Q. Why?

A. All that would be required is that they want to do it.

Q. That is all that you would require?

A. It would require doing it, which they did not do, as far as I have been able to learn up to now.

Q. You know there were some jobber outlets in 1940 located in territory served by the commission method?

A. Oh, no, I do not know that of my own knowledge.

Q. You do know that Dearborn was the commission station?

A. I so understood that.

Q. That Dearborn is in the territory operated by this litigation?

A. I understand that; yes, sir.

Mr. Austin: Well, the record is perfectly clear, your Honor, that only a part of the outlying portion of Dearborn was served by commission stations, and I think that ought to appear and be taken into account.

The Witness: I have stated it in my understanding that by far the greater portion of the gallonage sold in Detroit was by A-station business.

By Mr. Hanley:

7171 Q. If there were any in Detroit, would not commissions have some place in the cost justification for testing the price level?

A. Oh, they might have, but we are speaking very probably about a very trivial thing. We do not split hairs in these things.

Q. Do you not?

A. We certainly do not.

Q. Have you not done so in connection with your criticism of this accounting, Mr. Warmack?

A. I certainly have not.

We do not accept guesswork either.

Q. Do you regard it as your function, as a cost accountant, and did you in these matters to decide what geographical area should be covered in the defense of a cost differential?

A. Not necessarily.

Q. Well, "not necessarily," but do you at all, whether necessarily or otherwise?

A. Well, the complaint has to do very much with the cost studies that are going to be made. I think in this particular case the complaint was drawn in Detroit at the outset. As an aid in deciding the cost justification, the Respondent put in cost defense for the State of Oklahoma. I certainly do not agree to that.

Q. I understand you do not. But you were not 7172 asked about that, Mr. Warmack.

A. I think—at least, I thought your question was only directed to that point. If not, I am sorry.

Q. Would not the cost differential justification you referred to require a complete segregation of costs within the Detroit field between the two geographical areas both of which would include some commission and some salaried stations?

A. Probably so. However, you are splitting hairs there. We do no not do that in this Commission.

Trial Examiner Ballinger: The answer after "probably so" is stricken.

The Witness: I am sorry.

Trial Examiner Ballinger: You can only speak for what you do as an accountant.

The Witness: That is correct.

Trial Examiner Ballinger: And not for what the Commission does.

The Witness: That is correct. I am sorry.

Mr. Austin: Answer the question. Do not volunteer.

By Mr. Hanley:

Q. You said "probably so." Do you not know it to be the fact that it is so, Mr. Warmack?

A. I understand there is some degree of overlapping.

Q. Do you think that you understand the com-
7173 pany's records well enough to know whether such a
breakdown could properly be made for any period in the past in its business?

A. Of the past?

Q. Yes.

A. Without going and giving any effect to a period of current operations, I rather think that it could not be.

Q. I do not follow you there.

A. Without giving any effect to a period of current operations, Mr. Hanley, I rather think that it could not be. The company made a study of current operations, and you have established a measuring factor and applied it back. If they can do that for one thing, they can do it for the other, in my opinion.

Q. Would a true study of its condition require studies by separate classifications and cost treatment which would accumulate costs by these two geographical areas as those costs were incurred?

A. Without making a cost study I cannot tell just exactly what it would entail. It would entail an accumulation of underlying material which is, at the present time, not being accumulated by the Respondent company. Just how much that material would be, I am not in a position to state.

Q. What is your judgment as to whether or not such a study would actually have to be based upon future developments, rather than attempting to make a segregation
7174 based upon records of past accomplishments?

A. I have in mind particularly the statement by Respondent's witness, Mr. Boatwright, who stated that it could not be done in retrospect.

Q. I did not ask you for Mr. Boatwright's judgment. I have the benefit of that. I asked you for your judgment.

A. Well, I rather doubt if it could be made in retrospect, in the absence of any study of current operations.

Q. Did you discuss the problem of separation of markets with Mr. Houghton when you were in Detroit?

A. Separation of markets?

Q. Yes, Mr. Warmack, I refer to the segregation of commission and salaried drivers' segregation that we are talking about during this discussion.

A. A-Station and B-Station. I discussed that with Mr. Houghton—

Q. (Interposing): Not at all—oh, I beg your pardon. I thought you were restating the question.

A. No.

Q. Proceed with your answer.

A. I stated that we discussed the A-Station business and B-Station business.

Q. Do you think the segregation could be made?

A. Yes, sir, I rather think that such a segregation could be made. If it could be made, a proper study would show that it could. If it could not be made,
7175 a proper study would show that it could not. I think that it could be made.

Q. Do you think that the matter has not been given consideration by the accountants of the Respondent company?

A. Oh, no, indeed. I do not think that at all.

Q. Now, you say you think it probably could be made?

A. I think it could be made.

Q. I want you to tell the Court how you, when confronted with the matter of doing it, would meet the following problems.

A. Yes.

Q. Many of the accounts of the Respondent, as you know, are allocated among channels on the basis of time distribution. You know that?

A. Estimated time.

Q. That applies particularly to salesmen's salaries—expense; accounting department—salaries and expense.

A. Yes.

Q. Now, what would you recommend as a suitable means of allocating this expense as between the two geographical areas?

A. Just a moment. You made a little greater refinement of that separation in the case of your account 200—accounting department. If you have your salesmen make a time report of their activities if they were serving both classes of sales, and I understand you have
7176 many salesmen who serve one, and others who serve two, either the A-Station or B-Station, that would not entail anything very difficult.

Q. As I understand you now, you would have a salesman make a time report as to whether he would or was calling on a commission served or a driver served station; is that what your answer means, Mr. Warmack?

A. That is exactly what it means. Of course, I would conduct on that study, ahead of that, Judge Hanley—if I may, since you ask—I would conduct a study with the separations that already had been made on commissions paid. I do not question those things. I assume they are correct. I would accept them as correct, from the studies I did make in connection with account 025. It would not be a great deal of study. It might require a month. That would not require much of a study.

Now, account 050, that would not require much study.

Mr. Austin: Do you not mean account 055?

The Witness: 055, I am sorry.

And there are several of these separations that you have already made. So, since you went to that refinement here, why not carry it through with these others?

By Mr. Hanley:

7177 Q. It would be just easy, in your judgment?

A. It would be a little better than guessing at it.

Q. Mr. Warmack, we now have this salesmen's—as I understand you—marketing time report on a segregation as between salaried stations and commission stations?

A. For the class on each.

Q. Earlier this morning, we had a marketing segregation of time as to whether he was calling on a lessee station or on a non-lessee station.

A. If such greater refinement is desired.

Q. Well, you are requiring it, are you not?

A. No,

Q. You have criticized both of these inclusions in Respondent's Exhibit 101, have you not?

A. Yes. I criticized Respondent's Exhibit 101 in that respect to this extent, that I am saying that that refinement is required as a test, but not as a current proposition. I am not saying that that refinement is required as a current proposition.

Q. You are requiring it so far as you are concerned as an accountant in this case?

A. That is the point. I have got to explore if you are going to establish a cost differential which is accurate and correct, beyond any reasonable doubt.

Trial Examiner Ballinger: Can you establish such
7178 a result?

The Witness: I should hope so, your Honor.

Trial Examiner Ballinger: Establish an account that is absolutely accurate beyond a doubt?

The Witness: The best that the accountant can establish it, your Honor.

By Mr. Hanley:

Q. What accountants?

A. Any competent accountant or group of competent accountants who are willing to do it.

Q. Do you regard Mr. Houghton and Mr. Boatwright as competent accountants?

A. Yes, sir.

Q. Are you familiar with the fact that Mr. Boatwright has testified, and Mr. Houghton told you, that in their judgment this was an impossible thing to do? And do you disagree with that testimony and with that statement?

A. I could not. I certainly could not agree with it. If they did not show me anything more than just word of mouth that it could not be done. I could say that some things can not be done, but if I did not not try them I do not know.

Q. You went into this question in Detroit and you indicated—

A. (Interposing): No.

Q. —that you thought it would be quite an easy task, and referred to a number of accounts that you thought would not need much attention in the course of
7179 your stay there, so that you did give it some attention?

A. I gave it some thought. I did not study it or make a study.

Q. In view of your observations of the problem while you were there, do you or do you not disagree with Mr. Boatwright's testimony and Mr. Houghton's statement to you?

A. To the effect that what?

Q. That it could not be done—

A. (Interposing): I certainly—

Q. —with any degree of accuracy, or with a result that would have any reasonableness of result to it?

A. I do not think that Mr. Houghton stated any such thing to me. I am positive that Mr. Boatwright made the statement in the records that the records of the company, from them, such a cost study could not be made in retrospect. That certainly has not told me that it could not be done.

Q. Well, to do it in the future, in your judgment, would it require a complete analysis and segregation and restatement of the records so that there would be distinct segregation of all this type of business under commissions, as distinguished from the business under salaried drivers?

A. I do not know that such exactitude, even if it could be attained, would be required. I rather doubt that. But, a cost study, Judge Hanley, is a cost study. It can be thin or it can be in detail. That is left to the elec-
7180 tion of the making of such, or the persons in whom that making is entrusted.

Trial Examiner Ballinger: And the accuracy depends entirely upon the extent to which the accountant has gone?

The Witness: Yes, sir. It depends upon the refinement to which he has gone, or to the coverage.

By Mr. Hanley:

Q. This study would be made for the purpose of satisfying you, as a representative of the accounting department of the Commission, and with that in mind as to the extent of refinement, how would you meet this difficulty of segregating salesmen's salaries and expense; and, accounting—salaries and expense?

A. In the first place, I would separate those salesmen that worked on B-Stations business as against those that worked on A-station business exclusively. I would then make a reasonable survey to determine if the per unit sale cost ran equally or reasonably equally. I would not necessarily go to such a great refinement of splitting hairs as you would have the record appear here. That would be impossible. Your own witness stated it could not be done in retrospect. That means, in my opinion, that it could be done in prospect. That means it could be done.

Q. Very well. You do start with your definition of your salesmen distinguished as between commission 7181 business and driver business. You have already indicated that that is an overlapping of territory.

A. Yes.

Q. Now, Mr. Warmack, if you make that separation of salesmen, would not it very probably follow that you would be sending two salesmen into the territory where one had prior to that time served that territory. Would not you start out your study with a distortion in time cost?

A. That is not correct. I do not know about ~~why~~ you would send two salesmen. If you do not want to do that, Judge, you just do not have to do it. And if you want to do it, you just do it. You asked me whether that would be a distortion.

Q. Will you answer that?

A. I said—no.

Q. Very well.

A. Now, the study that I would set up would be no such thing.

Q. Very well. Let us analyze that in a moment. Here is a territory, we will say, that is being served in part by commission drivers and in part by salaried drivers. Into that territory goes a salesman. The territory is one which that salesmen can cover. He calls upon both customers served by commission drivers and customers served 7182 by salaried drivers. At the outset of your study he will be immediately called off either one or the other of those groups. There would necessarily be another salesman assigned to take care of the group which he was required to refrain from selling. Hence, you would be having twice, or at least two salesmen in the territory where you formerly had but one.

Now, I ask you, Mr. Warmack, if it is sound and good accounting sense that that is an immediate distortion of your cost?

A. If such a thing were to happen—which I have never heard or imagined happening—your costs may be increased in both instances just by virtue of the fact that you wanted this salesman to keep a time book and he did not want to keep it, so the company says, "Well, we will hire two salesmen, then, and segregate it."

I think that is absurd.

Q. All right.

A. Yes.

Trial Examiner Ballinger: Now, your explanation is this: That the one salesman would keep an accurate account of his time spent at the different stations, Mr. Warmack?

The Witness: B-Station as segregated from A-Station.

Trial Examiner Ballinger: The A-Station and the B-Station?

The Witness: Yes, sir. Yes, sir. And they are
7183 doing that all over the country, your Honor, not in
this particular identical case.

Trial Examiner Ballinger: You would spend some time in traveling from one station to the other?

The Witness: Yes, sir.

Trial Examiner Ballinger: How would you compute that time?

The Witness: We can take care of that situation if he kept a time record.

By Mr. Hanley:

Q. How would you take care of it?

A. Well, travel time is, in some instances, allocated in one way, and in some instances allocated in another way. In the case of Standard Brands, in that case, where the travel time was in question, that was segregated on the basis of the so-called "call time" of the drivers.

Trial Examiner Ballinger: In applying it to this case, how could you segregate it?

The Witness: I would have no objection to such an allocation.

Trial Examiner Ballinger: Would not it of necessity be an arbitrary segregation?

The Witness: No. Not necessarily. No, sir.

By Mr. Hanley:

Q. Going back, Mr. Warmack, to what you said a
7184 moment ago about this time allocation business. I
asked you if that is the way you would have those salesmen handle this thing in your study; that is, make a time segregation of his time calling on the commission

served customer and on the driver served customer, and then segregate it further as to whether he was calling on a lessee customer or a non-lessee customer. You said that was just a little along in the study, and that you would start your study farther back than that.

A. Yes, sir.

Q. Then you would put—does that mean that you would start your salesmen on a separation as to the B-Station business and the A-Station business?

A. Yes, sir.

Q. Now, you are speaking of time segregation based upon the same salesmen—

A. (Interposing.) No.

Q. Just where would you separate your study? First, let me ask you where you would start out with it? Let us get to that first.

A. I would first make up my mind to make the study. After I had done that, Judge Hanley, I would set up a plan of procedure, and study the logic of it by application to determine if it were workable. I would explore the costs in that manner.

Now, to argue about the reason you did not do it,—make
the study—to say that you did not do it because you
7185 did not want to do it, or did not think it was prac-
ticable, without making such a study—I say, that is
absurd.

Q. You are, of course, assuming we did not make any study?

A. I did not see any such study. I asked for it.

Q. I understand that. But you are just assuming it, are you not?

A. Well, I asked if you had made such a study. I asked Mr. Boatwright. I asked some of the others here and there. And I also asked Mr. Houghton in Chicago.

Q. Very well. Will you please answer the question of a few moments ago—which remains unanswered—as to whether you would put on these separate salesmen as you said you would once, or would you rely upon the time segregation by the salesman, himself; as you have said that you would do once or twice?

A. I do not understand your question.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

The Witness: Would I put what on what? Would I put what on the salesmen? This additional work? Evidently, I do not understand your question, Judge Hanley.

Trial Examiner Ballinger: Well, now, which course would you adopt?

The Witness: Well, he said would I put on salesmen

7186 Trial Examiner Ballinger: Would you put on two salesmen?

The Witness: Do you mean engage them?

Trial Examiner Ballinger: One for the A-Station, one for the B-Station, or would you rely upon one salesman making a proper and accurate allocation of his time between the A and the B stations?

The Witness: Oh, I understand now. I thought that the question was directed to putting additional work on them.

Trial Examiner Ballinger: Answer the question.

Read the question to the witness.

(The reporter read the following question:

"Q. Going back, Mr. Warmack, to what you said a moment ago about this time allocation business. I asked you if that is the way you would have those salesmen handle this thing in your study; that is, make a time segregation of his time calling on the commission served customer and on the driver served customer, and then segregate it further as to whether he was calling on a lessee customer or a non-lessee customer. You said that was just a little along in the study, and that you would start your study farther back than that."

The Witness: I would have no option in that. I would not be the management of the company. I would have nothing to do with that. I would suggest that the 7187 proper course of procedure to be worked out, as I suggested to Mr. Boatwright in August of 1941, and then apply it to determine whether it was workable. That is the way I would do it.

By Mr. Hanley:

Q. Mr. Warmack, we are asking these questions now of you as an accountant.

A. Yes.

Q. The Respondent's management undoubtedly would be very happy to keep out of this type of proceeding, which is substantially criminal in nature.

Now, the management, as you say, has decided that it cannot do this thing and reach any reasonably accurate result. You say differently.

Now, please tell us what you would do.

A. Make a cost study.

Q. Which one of those methods would you use? Just to make it specific, which one of those methods would you use?

A. I certainly would not recommend to the management going out and hiring any additional group of salesmen. That would be up to the management. But I would work out a plan of procedure whereby salesmen's records would be studied and measuring factors would be prepared.

Trial Examiner Ballinger: You could not make a study without going out in the field.

7188 The Witness: Nobody said anything about that, your Honor.

Trial Examiner Ballinger: He is asking you to go out in the field; how would you make the study there?

The Witness: Judge, either it may be there without sending an extra agent out in the field or not. Sometimes salesmen will keep time details of their time, which I think would happen in this company, at least I thought so until I went out to Detroit and find out that they were not.

Trial Examiner Ballinger: Have you any further answer to that question?

The Witness: Judge, I have answered his question properly.

Mr. Hanley: If your Honor please, it is now almost half past twelve.

We have been running pretty steadily this morning. I suggest and therefore move you, sir, that we recess until two o'clock.

Trial Examiner Ballinger. The motion is granted.

And now, at 12:20 o'clock, p. m., the hearing stands in recess to be reconvened at 2:00 o'clock, p. m.

(Whereupon, at 12:20 p. m., a recess was taken until 2:00 p. m., this day.)

7189 **Afternoon Session.**

2:00 p. m.

Trial Examiner Ballinger: Come to order. You may proceed.

WILLIAM J. WARMACK resumed the stand and testified further as follows:

Cross-Examination (Continued) by Mr. Hanley.

Q. Mr. Warmack, just prior to the noon recess, you made the statement that certain cost studies should be made in connection with matters such as leased stations versus non-leased stations; commissioned drivers versus salaried drivers to a point where it would prove costs beyond a reasonable doubt.

I think I did not ask you at the time, and will now: To whom do you mean that cost should be proved beyond a reasonable doubt?

A. I mean that the cost would be proved to the satisfaction of any person who might be concerned with respect to the accuracy of the costs and the cost differential sought to be determined. And the term "beyond a reasonable doubt" might be from an accounting standpoint going further than the same accountant could consider that such a calculation could be made. However, what I mean to say, and what I intended to say was this, that
7190 studies should be made in accordance with sound and
accepted accounting principles, and practices, in order to substantiate a properly determined cost, and to properly determine the correctness of the unit costs desired.

Q. Shortly before you gave that testimony, and when I was asking you questions as to how a company such as the Respondent company might proceed with studies in setting up records in connection with the lessee stations versus non-lessee stations, you made the statement that if we got fifteen accountants to do the work that we would probably get fifteen different systems.

Now, which out of the fifteen would be accurate beyond a reasonable doubt?

A. To design a system would not mean at all to establish accuracy, and it may be that either one of the systems that may be devised by the separate men may be quite sufficient to establish the accuracy desired if a cost study were made or if it were desired—which is seldom the case—by a company carrying current records sufficient to afford any figures that may be desired currently.

Q. Would it not be just as likely that if those—if each of those fifteen accountants made a cost study rather than set up a cost system that there might also be fifteen different results?

A. If they made a proper study being for the pur-
7191 pose of determining the unit cost, although they may have approached the subject from different angles, I doubt very seriously if they would come out at figures that would vary to any worthwhile extent at all as unit cost figures; that is, if the studies were properly carried through, sound principles were applied, and they did not resort to guesswork.

Q. Have you revised your ideas, Mr. Warmack, that the business of cost accounting is not an exact science?

Mr. Austin: Objected to until more specific reference is made as to what testimony is referred to, or what statement of the witness is referred to.

By Mr. Hanley:

Q. In view of counsel's objection, I am glad to advise the witness that I am referring to his testimony repeatedly given over many days of testimony, that cost distribution accounting is in the pioneering stage and is not susceptible of complete accuracy of results, and that he, himself, has had the experience of approaching a single problem from two angles and himself reached two different results, and has had the experience of working with other accountants on a single problem when each of the accountants reached a different result and a similar line of testimony permeating this entire record.

Trial Examiner Ballinger: The witness may answer. The objection is overruled.

7192 The Witness: I have not changed my ideas on that subject. The example that you just spoke of did not have to do with distribution cost accounting.

By Mr. Hanley:

Q. But that is all that I have been talking about, that and nothing but that. That is all I am talking about, Mr. Warmack.

Mr. Austin: He is referring to the example that he ha referred to. He is not referring to your question.

The Witness: The example that I referred to.

By Mr. Hanley:

Q. Is there any difference between distribution cost accounting and production cost accounting except, as you have said, that distribution cost accounting is not in as well settled a condition; it is not as well settled in its various principles as production cost accounting?

A. That statement is correct.

Q. Now, I asked you if you have revised your views? Do you think that these fifteen men would reach the same result, and that it would be an accurate result?

A. In my opinion, if they made proper studies, I do not see that they would come out at the identical figure, I do not see that in my mind's eye, and I do not believe I said that they would. But if they made proper studies, in all probability they would come out at a figure that they
7193 would be so close on that there would be relatively
little difference. That is also true in the instances of my own personal experience in the handling of manufacturing costs.

Q. Well, so much for the cost study by the fifteen accountants. Now, assume that they set up their fifteen systems of accounting—and you said that they would probably be fifteen different systems—which would naturally follow that it would result in fifteen different results; which of the fifteen would prove beyond a reasonable doubt from an accounting standpoint to be the proper and accurate one?

A. Your Honor, that question is impossible of answer. It is purely a hypothetical situation that is posed.

Trial Examiner Ballinger: Well, you cannot answer the question?

The Witness: No, sir. I cannot answer the question.

By Mr. Hanley:

Q. Well, can you answer this question, Mr. Warmack: That when these fifteen accountants, having set up their system, their respective system, each of which will get a somewhat different result—

A. (Interposing.) I would not know that they would get a different result, they might be exactly the same.

Q. —is it not probable that they would?

A. They might. They might not.

Q. I understand that, but what are the accounting
7194 probabilities as to whether or not they would?

A. I certainly do not know. I rather think that if they made a proper study, irrespective of their approach, if they made a proper study along the lines of sound accounting—

Q. (Interposing.) We are talking about system.

A. —well, if they set up their systems, it all goes to the same point, the greater the refinement that they go to in their studies the more correct and accurate is going to be the result. The more that they resort to these estimates and guesswork the more questionable the results will be.

Q. Well, these are your fifteen hypothetical accountants; they are not mine, Mr. Warmack. You understand that. You have testified that they would probably each have a different system.

Now, I think the whole force of your testimony, and understand this, I mean by that, try to recall your testimony, is that this is not an exact science, that different accountants reach different results working on the same problem, and if any one of those systems were used as a basis for a cost differential justification, how would you know which of the systems, and which of the resulting cost differentials was proved beyond a reasonable doubt?

A. By study. By a study.

Trial Examiner Ballinger: Mr. Warmack, would not that be merely a question of opinion?

7195 The Witness: Yes, sir; absolutely.

Trial Examiner Ballinger: You mean by that your opinion, and another accountant's opinion? In other words, you might have an opinion of your own?

The Witness: Yes, sir.

Trial Examiner Ballinger: Another accountant may have a different opinion?

The Witness: Yes, sir. Mr. Lundball would have his opinion. Mr. Boatwright would have his opinion. Another accountant might have his opinion. Mr. Houghton would have his opinion. Other accountants would have their opinions.

Trial Examiner Ballinger: And then it would be proved beyond any reasonable doubt one system in the opinion of one accountant, another system in the opinion of another accountant, and so on. Is that not correct?

The Witness: That is correct. Generally, I have found

that among accountants who concern themselves with distribution cost accounting, and the development of it that involves the matter of studies, your Honor, I have seen accountants go to the extent of starting a cost by—same identical case—by two or three different methods—studies, make a study and start it, find out what the result is by that study, ~~and set~~ it aside; make another study on another
premise and on another basis, set it aside, and make
7196 another study, and in the end it would of course be up
to this accountant or the management if it saw the results to elect which it thought, or they thought afforded the most accurate and correct picture.

Trial Examiner Ballinger: Well, if the management decided the matter, it would not be the opinion of the accountant?

The Witness: Well, it is up to the accountant to express his opinion to the management, and in many instances, the management of the business have a very good knowledge of accounting.

Trial Examiner Ballinger: Excuse me, Judge Hanley, for breaking in. Please proceed.

By Mr. Hanley:

Q. It all goes back, does it not, Mr. Warmack, that when you say "proved beyond a reasonable doubt," you mean proved beyond a reasonable doubt to your satisfaction?

A. Well, of course, I am speaking for myself, Judge Hanley. Of course, I am not speaking for any other person. I can not speak for any other.

Q. Now, do you believe, as an accountant, Mr. Warmack, that any question of cost distribution accounting which contemplates a large business, many customers, many methods of distribution, many commodities can be proved beyond a reasonable doubt to the satisfaction of yourself or any
other accountant on earth?

7197 A. Well, as I stated once before, the term "proved
beyond a reasonable doubt" may not mean the same thing to you or to others as it may mean to me.

My idea of "proved beyond a reasonable doubt" that term used in cost accounting, in my idea, means substantiating the accuracy of a figure, properly substantiating and supporting the determination of it, supported by the use and application of sound and accepted accounting principles and practices, and involved with no guesswork.

Q. Of course, you are dealing continuously, are you not, Mr. Warmack, as an accountant with these accounting questions under the Robinson-Patman Act, which is a criminal law?

Mr. Austin: I object to that. The Robinson-Patman Act is not a criminal law in whole. It may have criminal sections.

Mr. Hanley: Of course, if there is a criminal section in it, I say it is a criminal law.

Mr. Austin: Well, the part administered by the Federal Trade Commission is not the criminal part.

Trial Examiner Ballinger: Violations become criminal.

Mr. Hanley: Of course.

Mr. Austin: I do not believe so, your Honor, I do not believe there is any penalty prescribed in the Act, except for Section 3, which is not administered by the Federal 7198 Trade Commission.

Trial Examiner Ballinger: I appreciate that Section 3 is not administered by the Commission. It is administered by the Department of Justice. That deals with violations.

Go ahead.

Mr. Hanley: I am not sure that the question is complete. Will you read the question so far as it has gone?

Trial Examiner Ballinger: Read the question.

(The reporter read the question as follows:

"Q. Of course, you are dealing continuously, are you not, Mr. Warmack, as an accountant with these acounting questions under the Robinson-Patman Act, which is a criminal law?")

Mr. Hanley: That is a complete question.

Trial Examiner Ballinger: The witness is not asked anything about the criminal law.

By Mr. Hanley:

Q. I am asking him if he is continuously dealing with accounting questions under the Robinson-Patman Act, which is a criminal law. This is a question of fact.

Are you not dealing with those problems?

A. Yes, sir. I am engaged for the most part and have been for the past eight years in the Commission on 7199 studies which have to do with distribution cost accounting under the Robinson-Patman Act, and some of the fair trade acts, and distribution cost accounting generally.

Q. And you have repeatedly testified that you did not undertake to prove the cost study or prove the cost differential of the Respondent in your studies in this case, and that you did not make any studies of your own in the sense of a determination of what the differential was: is that true?

A. Yes, sir. I did not study it to prove the case of the company's cost justification, or to disprove it.

Q. Yet, you were satisfied so far as you were concerned?

A. I—

Mr. Austin: I object.

Mr. Hanley: I withdraw that question.

Trial Examiner Ballinger: Question withdrawn.

By Mr. Hanley:

Q. You are familiar with the terms of the law which require the Respondent company, if it seeks to justify and to establish its justifications and assume the burden of establishing a justification, are you not?

A. That is my understanding.

Q. And your approach to these problems, and with particular reference to this case, is that that justification must be established beyond reasonable doubt to your satisfaction?

7200 A. It must be properly substantiated by the application of sound accepted accounting principles.

Q. Which, to your mind, means beyond a reasonable doubt, so far as you are concerned? Is that not what you have testified to?

A. Reasonably so. It might be impossible to establish something that would have no doubt about it.

Q. Reasonable doubt—is that the term you used?

A. I have explained that twice already on this record what I meant.

Q. I have said, Mr. Warmack, "reasonable doubt" as you understand it, which you have explained. The terms are interchangeable in your mind.

A. Very well.

Q. It is you I am talking about.

A. Yes?

Q. From your standpoint as an accountant, then, you take the position and approach the problem as an accountant that he who is charged, namely, the Respondent company, as the Respondent company in this case, is in effect required to prove his innocence beyond a reasonable doubt from an accounting standpoint, and as you have explained "reasonable doubt" and as you understand it? Is that not true?

Mr. Austin: I object to that on the ground that it goes into the question of proof and the opinion of the
witness as to what is required to justify an order
7201 of the Commission which is immaterial. That is
really what it amounts to.

Mr. Hanley: If your Honor please, I think it is of some importance to test the attitude and approach of this witness.

Trial Examiner Ballinger: Only for that purpose can it be considered at all.

Mr. Hanley: Yes, of course.

Trial Examiner Ballinger: The Examiner will allow the witness to answer.

The objection is overruled.

The Witness: I should like to have the question, if your Honor please.

Trial Examiner Ballinger: Read the question.

(The reporter read the question as follows:

"Q. From your standpoint as an accountant, then, you take the position and approach the problem as an accountant that he who is charged, namely, the Respondent company; as the Respondent company in this case, is in effect required to prove his innocence beyond a reasonable doubt from an accounting standpoint, and as you have explained 'reasonable doubt' and as you understand it? Is that not true?")

The Witness: Your Honor, I work for the Commission and do what the Commission says. I actually do not ex-
ercise any control over what position is to be taken.
7202 What I am trying to do is to go out and determine
the facts. That is all I do.

Trial Examiner Ballinger: Do you approach these investigations with any thought in mind other than the ascertainment of facts?

The Witness: That is the only approach I make.

By Mr. Hanley:

Q. Mr. Warmack, you approach these problems with the end in view of expressing your opinions? Do you not do that, as an accountant?

A. Well, I am required to do that by the Commission, through my chief, who is the chief economist.

Trial Examiner Ballinger: Well, you expect when you get through with your work to express an opinion as to the report you have submitted? Do you not do that?

The Witness: Yes, sir. Of the studies I have made when I am required to do that by my chief, I do so.

By Mr. Hanley:

Q. And you do that on the basis of what satisfies you beyond a reasonable doubt?

A. I do that on the basis of what I may find in my studies. I report facts to this Commission and only facts. And then if required to do so, which I am often, as just stated, I give an opinion on the situation as I see it.

7203 Q. Well, do I now understand that you made no study out in Detroit?

A. Yes, I certainly made a study. I worked nights and days, week ends.

Q. Did you make what you referred to as a "factual and objective study" of any of these matters?

A. No, sir. No, sir, I did not. It would take a group of accountants six months, at least many accountants, to cover such a situation as you have in Detroit. I was in Detroit two months alone.

Trial Examiner Ballinger: Did you endorse or pass or approve any account about which you had any doubt?

The Witness: I did not approve of any account about which I had any doubt. I did not. No, sir.

By Mr. Hanley:

Q. Well, is there any account on earth in cost distribution accounting about which some accountant might not have some doubt?

A. Oh, I can only testify about my ideas. There are some accounts in here about which there are none at all.

Q. None at all?

A. Yes, sir; there are. I should like to point them out to you.

Q. No doubt at all?

A. No doubt at all. I just reviewed the method you employed. I do not impugn any good faith with re-

7204 spect to sound accounting. I think that is O. K.

Q. Now, adverting to this commission drivers versus salaried drivers. How would you handle this difficulty if you were undertaking to make a segregation which you have indicated you thought proper?

During the course of a year employees and vehicles and dispensing equipment would be transferred from one area to another.

Would it not be necessary to trace expenses back to the individual, and to the position?

A. I would not know.

Q. You have made some investigation of this thing. How would you treat that situation?

A. If I were to make a cost study to determine what it cost the company to deliver its goods through B-Stations, which you are terming "commission drivers," and to deliver its goods through A-Stations—

Q. (Interposing): Now, let me correct you, Mr. Warmack: I am not just confining this to commission drivers and B-Stations. I am talking about commission drivers versus salaried drivers, which is the accounts that you have attacked. It is you who has injected into this thing the A-stations and the B-stations.

My questions are always directed to the commission 7205 drivers versus salaried drivers.

A. That is not the term, Judge Hanley, which we have used, and that I used in discussions with Mr. Gillis and Mr. Houghton, in talking about the matter of which I thought you had made reference, or to which I thought you had made reference, although that term is used in Respondent's Exhibit 100.

Q. Well, just now, Mr. Gillis and Mr. Houghton are not asking you questions.

A. Yes, but I wanted it clear in my mind.

Q. When I ask you the question I am referring to the accounts as they appear on Respondent's Exhibit 101, which is the account that you have criticized. I am talking about commission agents versus salaried drivers.

A. I am or was under the impression you have stated commission drivers—commission drivers versus salaried drivers. My understanding of the direct term "commission drivers" were the drivers that picked up certain of the company's products at the A-Stations and sold those products and received commissions thereon, as distinguished from the regular B-station agent.

Q. I am talking about account 006 and account 021 in Respondent's Exhibit 101.

A. Yes.

Q. That is what my questions referred to, Mr. Warmack.

A. Yes, sir. (The witness examines certain documents.)

7206 Q. Now, with that clear in your mind, and assuming that you are undertaking to make this segregation of those two classes of employees, will you please advise us how you would surmount the difficulty incident to this transference of dispensing equipment from one area to another?

A. I would make a study of the situation, and the material effect it would have on the cost differential from that type of procedure. You might have plenty of cost in order to establish the differential without even exploring that very item, which, in my opinion, may be a very small item of cost. We are not splitting hairs.

Q. Well, if it is a very small item of cost—

A. (Interposing.) I say, it might be.

Q. You say in your opinion it may be. Now, if it is, do you regard it as an easy thing to overcome?

A. No. That would probably be a difficult thing. But I wonder if we are not undertaking trifling things in this.

Q. I do not know. If we are, why, you say so, Mr. Warmack. Is that a trifling thing or not?

A. If you can point out the account, I think, the particular item of cost that it is carried in, I can give you an idea on that.

Q. Well, do you not know?

A. In account 189, will you please refer to the account to which you make reference?

7207 Q. I do not know what it is. I assume you know. You have gone into this thing sufficiently to criticize it to a considerable extent.

A. Well, you have asked the question. I assume you know what account you are referring to.

Q. I asked you how you would surmount that particular difficulty, whether it be a large part, or a small part, whether it referred to a large number or a small number.

A. I did not make a study to determine, and I just would not guess at it and let it go at that.

Q. Mr. Warmack, almost every question I ask you you answer that you would make a study. Is that all you know about whether or not there is any merit to your contentions that there should be a segregation of the commission account from the salaried drivers account?

A. Will you please explain that question?

Mr. Hanley: Will you read the question?

Trial Examiner Ballinger; Read the question.

(The reporter read the question.)

The Witness: No, sir. No, sir. That is not all.

By Mr. Hanley:

Q. Then, I assume that you do know something about it, Mr. Warmack, which inspired your criticisms, and have suggested an alternatve method to be used by the Respondent, to that used by the Respondent. On that 7208 assumption, I ask you how you would surmount this difficulty to which I have just called your attention if you were to undertake that segregation.

A. I have not worked out any plan of procedure. I offered to sit with Mr. Boatwright on it. I did talk to him about that very thing in August, 1941. I suggested that he do it. He did not desire to do so, apparently.

Q. Well, do you not know, or do you know how this can be made, or do you not know?

A. A study would develop, Judge Hanley, the way, and that is the only way it could be done.

I cannot tell what I would do, and how I would do it, now. I cannot tell you how I would approach these costs or the procedure that has to be worked out. The procedure that is to be used has to be worked out from a very careful study and analysis of each situation. Why, I could not begin to sit down here and tell you how you are going to make a reparation or what obstacles you are going to encounter, without first going out and encountering them, and then I could tell you more about it.

Q. Do you know how you could overcome it?

A. No. I do not.

Q. Do you know that you could overcome it?

A. No, I do not know that, but many of them are 7209 overcome by accountants where a separation of costs are involved.

Q. Is it not a fact that you are just assuming that something might be done, that you do not know anything about it, Mr. Warmack?

A. That is not my feeling about it at all.

Q. Then, tell us how you would meet that situation.

A. I cannot tell you how I would meet any situation.

Trial Examiner Ballinger: One moment. The question has not been fully stated.

By Mr. Hanley:

Q. Then tell us how you would meet that situation. Take this situation and tell us how you would meet this situation: Would not all averages and supporting data, such as construction work orders, individual plant expense vouchers, machine shop orders and the like have to be traced to each individual plant, and then classified according to location, and all such accounts as plant maintenance at both bulk plant and retail outlets, rent revenue, miscellaneous operating expense, station operative tools and equipment, water, light, and fuel other than main office, depreciation and taxes?

A. A study would show that there would be a good many of those cases of expense that could be separated when they were recorded on the records. There would be some of them that would involve the necessity for the use of a measuring factor. Then it would involve the use of a
7210 measuring factor for those, and then the problem is to establish your measuring factor.

Q. What do you think would be a good one in this segregation?

A. They may require several.

Q. What are they?

A. I have not made a study.

Q. What are they?

A. I have not made a study to find out.

Q. What are they that would be satisfactory to you at all?

A. Anything that would develop or be developed from the standards of sound accounting; that is, by the application of sound accounting principles and procedure.

Q. All right. Mr. Warmack, you have indicated that our accounting is not sound.

A. I certainly have not.

Q. You have indicated a method that you think would be sounder?

A. Oh, no.

Q. Now, I ask you what factors would that measuring factor include that you would use to make this segregation to bring about that which you indicate in your judgment is a sounder method?

A. I had not, in the first place, questioned at all your method of accounting.

I have questioned the fact that you have not made any
segregation of the costs of the serving your customers
7211 through B-Stations as against the cost of serving
your customers through A-Stations, and the mere separation between account 006 drivers, as to which there is a question as to separating—although I have not studied the underlying data in the Detroit office to any worthwhile extent—and as between the cost of commission agents in account 021; that is, in a thorough separation.

Q. (Interposing): I did not hear the last.

A. That would be a thorough separation; that is, just to offset one against the other, something in account 021, here,—this is commission agents which have been referred to here as commission drivers, probably many, many services that are not performed by the employees represented in account 006 are performed by them.

I wonder if that is an answer to your question.

Q. No. It is not an answer to my question.

My question is as to what you suggest specifically, not simply by stating to me that a study would show, but specifically how you would meet some of these difficulties if you were undertaking this segregation which you say is better to establish a cost differential—I will put it that way—than the method shown by Respondent in Respondent's Exhibit 101.

A. I can only answer that, your Honor, generally. I
have not made any study and it is my contention that
7212 it is or would be necessary in order to determine prop-
erly a cost differential, it will be necessary to separate B-station business from A-station business. The cost that could be applied directly should be so applied. The remaining cost would be necessary—it would be necessary to separate the remaining costs which are of a general nature on the basis of various measuring factors which I could not possibly know, which would be the best, I mean, without having a study, and could only be established by a study itself.

Now, I am asked what would be the best. Why, there would be many of them, and I could not possibly know without making a study.

Trial Examiner Ballinger: Mr. Warmack, how would you go about making the study of the costs of A-Stations and B-Stations?

The Witness: I would first study the company's plan of merchandising. That would be my first study.

My next step, I would study the functions involved separately as to each group, and jointly as to the two groups.

Then, I would carry the study next to determine where the influencing factors were that cause the incurrence of this cost.

Now, your Honor, that is a cost approach. From that standpoint, there would be various separations to be made of separate classes of costs.

7213 But, to outline definitely which would be the best method to employ in the separation of costs, I do not know exactly which would be the best. It may be the study of the salesmen's time; that is, those serving both classes of trade may disclose the fact that salesmen's calls may be quite sufficient. It may disclose that some other measuring factor could be established without going to such refinement. A study of the other factors may show other things.

We have a separation here of just various kinds of cost, your Honor, and you could not separate the non-salary expense that would be susceptible to a separation based on cost analysis, on the basis of salesmen's time, probably, Therefore, you would have to establish a measuring factor for that.

And that is the story.

Now, am asked here by Respondent's counsel to tell just exactly what I would do. I would have to make a study and then I could tell what I would do.

By Mr. Hanley:

Q. I have not asked that broad a question. This is the question I have asked, and which I am going to ask you, and they are simple questions as to how you would meet these particular difficulties that I am outlining. For instance, to allocate ELA costs between two geographical areas, would you not have to trace each individual 7214 expenditure to each piece of equipment, and then trace each piece of equipment to allocations throughout the year?

A. If you were making a cost study or if you were keeping your current information?

Q. Either one or both.

A. If you were keeping that current information, you would tabulate it as it comes in. If you were making a cost study it might be necessary to follow the plan that you outlined or at least to follow it to some extent, to see how the cost curve would run.

Q. Does that occur to you as being a difficult situation?

A. I do not regard any of these separations which involve the establishment of a measuring factor and the separation of joint costs especially as being child's play.

Q. Well, in your judgment as an expert accountant, this matter of segregating these classes of accounts is child's play?

A. No, sir. It is anything except that.

Q. I understood or misunderstood, perhaps; what do you mean is child's play in connection with it?

A. I said that that work would not be child's play, Mr. Hanley.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: Proceed.

7215 By Mr. Hanley:

Q. How would you meet this difficulty, what would you do in regard to overlapping territories where station boundaries do not correspond with geographical areas; that is, like Detroit and Dearborn, or where Royal Oak plant is located at that point outside of the City of Detroit, and part of the territory is inside and part of it is outside?

A. With respect to what class of expense?

Q. With respect to a segregation between these two classes of accounts, commission and drivers; that is all we are speaking of.

A. What class of expense are you talking about would have to do with that particular problem?

Q. All of the expense that would need to be segregated.

A. I am sure that taxes would not overlap, and such things as that.

Q. I am talking about all expenses that you say should be segregated. Is not that clear?

Trial Examiner Ballinger: Mr. Warmack, he is talking about marketing expense, Judge Hanley is.

Mr. Hanley: Taxes are?

The Witness: Taxes are marketing expense.

Mr. Austin: Off the record, please, your Honor?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

7216 Trial Examiner Ballinger: On the record.

Mr. Austin: May we have a five minute recess?

Trial Examiner Ballinger: We will take a five minute recess.

(A short recess was taken.)

Trial Examiner Ballinger: On the record, please. Read the pending question.

(The reporter read the question as follows:

"Q. How would you meet this difficulty, what would you do in regard to overlapping territories where station boundaries do not correspond with geographical areas; that is, like Detroit and Dearborn, or where Royal Oak plant is located at that point outside of the City of Detroit, and part of the territory is inside and part of it is outside?")

The Witness: I think I can answer that, maybe, in a general way—I was under the impression that counsel had been pointing out specific expense items. Generally there would be many classes of expense that would not overlap, irrespective of the overlapping of the territories, so there would be little overlapping expected.

Take in the case of salesmen who serve both A-Station business and B-Station business. If those salesmen kept time records, why, it would not be such a difficult problem
to determine whom they called upon and whether they
7217 were A-Station customers or B-Station customers.

If you take the deliveries, if deliveries were made alternately to a customer from an A-Station or a B-Station, why, some little problem may be involved there. I do not know that such is the case.

With respect to the example given of salesmen, I think that fairly covers your question, Judge Hanley.

By Mr. Hanley:

Q. Well, from your observation of the problem, do you regard what I have incorporated in that question as being a difficult thing, making this segregation between commission accounts and drivers accounts?

A. Wel, surely, it is a difficult problem.

Mr. Austin: May we have a recess?

Trial Examiner Ballinger: We will take a five minute recess.

(A short recess was taken.)

Trial Examiner Ballinger: Come to order. You may proceed.

By Mr. Hanley:

Q. I believe there is a question pending on the record. Are you ready to answer that question, Mr. Warmack?

A. I thought I had answered it, if not, I will.

Trial Examiner Ballinger: Read the last question on the record.

(The reporter read the following question:

7218 "Q. How would you meet this difficulty, what would you do in regard to overlapping territories where station boundaries do not correspond with geographical areas; that is, like Detroit and Dearborn, or where Royal Oak plant is located at that point outside of the City of Detroit, and part of the territory is inside and part of it is outside?")

The Witness: By segregating any costs that are involved jointly, but the problem is to establish a measuring factor. Without having made a study I could not tell you exactly how to establish a measuring factor. I have given you an example in the case of salesmen.

By Mr. Hanley:

Q. Would it not meet this difficulty if you agree that it is a difficulty?

A. What?

Q. First let me ask you this: What would you do in meeting this difficulty, if you should agree, Mr. Warmack, that it is a difficulty?

A. What is it?

Q. How would you treat the salaries of drivers and the operation and maintenance of trucks in the same vehicle and same driver when the same vehicle and same driver may be serving in both of the geographical areas?

A. I do not know that the geographical area has a 7219 lot to do with it. It is my understanding that the segregation would be made between the trade served by A-Stations and the trade served by B-Stations. That is my understanding of the problems involved. I do not know that there was a twilight zone around where they are going and serving in other territories.

Q. I understand that you expected the segregation to be made between the geographical area of greater Detroit, as you have expressed it, and that area lying outside of greater Detroit area.

A. I think that such a study could be made.

Q. Well, is not that the one study you suggested?

A. I rather think that I stated that I suggested for Mr. Boatwright's consideration, that Mr. Boatwright's consideration should be given to the possible separation of the commission agent business from the A-Station—the commission agent business being the B-Station business.

Q. Well, from your last answer I gather that you do not think that this question I have asked you poses any difficulties?

A. Oh no, indeed. I certainly did not mean to imply that. If I stated anything to indicate that I did not intend to. Certainly, all problems where the separation of joint costs are involved, those things do involve difficulties.

Sometimes the difficulty is great. Sometimes the difficulty is not so great. 7220

Q. Well, now,—

Mr. Austin: (Interposing.) Mr. Hanley, now for the purpose of clarification, if I may ask a question of counsel, counsel has been directing his questions toward separation of A-Station business and B-Station business. Is not counsel now directing his question to the separations of cost by territories regardless of whether the territory includes the A-Station or the B-Station?

Mr. Hanley: Both.

Mr. Austin: In other words—

Mr. Hanley: (Interposing.) Both of them were involved in the criticism. That is what is involved in the suggestion of the witness. I am directing my questions to the difficulties, if the witness sees any, in the separation which necessarily involves the separation by geographical areas, and a separation by class of employees, commission as distinguished from salaried driver.

By Mr. Hanley:

Q. Mr. Warmack, you gave this particular matter considerable attention while you were in Detroit, did you not?

A. I made quite a study of these services that were performed by the B-Station agents; that is to say, commission agents or commission drivers that are called sometimes that.

And I gathered considerable information with respect 7221 to the way that they were compensated for their services, and their activities; that is, the functions that were performed for the company, and I actually visited a couple of the stations.

Q. Did you not give consideration in your studies to each of the problems that I have asked you about?

A. Not to the end of preparing a plan of procedure, no.

Q. As a matter of fact, did you not make a study?

A. I did not make such a study as I would be required to make if I were proving a case of cost justification.

Q. Did you not make a study which satisfied you at least as to the difference in cost, if any, between the salaried drivers and the commission employees?

A. Not between the business served by each, no. I reviewed how they paid the commission drivers, or what I believe is termed by the company in its Detroit office as "B-Station agents," and I also made a sufficient review coupled with my studies of Respondent's Exhibit 99 and 100 and 101 from which I learned how, or reasonably how, compensation was made to the salaried drivers, and how the separations of salaried driver costs included in account 006 is separated between channels on Respondent's regular accounting form 189, and which figures are also reflected in identical amounts, I believe, on Respondent's Exhibit 101.

Q. You have said you did not make any study to arrive at an answer as to a difference in cost between the 7222 two classes of business. Did you make any such study relative to any geographical areas, to any differences in geographical areas?

A. Oh, no, sir. That is something which was not included in my activities.

Q. Did you make a study, Mr. Warmack, which resulted in a figure which you arrived at as to the difference in cost per gallon as between commission employees and salaried drivers?

A. I do not understand the question. Back of the organization of the whole business of the B-Station men, and the A-Station men, I did not make any kind of a study. I just looked into the matter.

Q. Please answer the question.

A. I beg your pardon.

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: No, sir, I have not. That would be a very simple matter to take these two accounts and divide by the gallonage and you have the figure.

By Mr. Hanley:

Q. Mr. Warmack, did you not tell Mr. Houghton in Detroit when you and he were both there considering this matter of costs, that you had made calculations and that you had determined or concluded that there was only a different of two-one-hundredths of a cent between the 7223 gallonage handled by commission employees as distinguished from the salaried drivers?

A. I do not remember that. I remember this, that Mr. Houghton and I took one of these forms and tried, with what information was at hand, to make a separation but the separations just did not come out, with the facilities which we had, we did not have the information to make it.

Q. Did Mr. Houghton undertake to make any such segregation in Detroit, in your presence, or within your knowledge?

A. He and I worked on it to see if there was information sufficient to make it, and there was not.

Q. Did you not tell him that you were satisfied or had concluded that there was only two one-hundredths of a cent difference in cost per gallon in handling gasoline in those two groups?

A. As between what?

Q. You can answer that question "yes" or "no."

A. No, I cannot. As between who?

Q. Commission employees on the one hand and salaried drivers on the other hand.

A. That means A-Station and B-Station.

Q. It means salaried drivers on the one hand and commission employees on the other hand.

A. I can make that calculation here if you restrict me to those two accounts.

7224 Q. Mr. Warmack, I did not ask you that question.

Mr. Hanley: Please read the question.

The Witness: Well, I do not know what he is asking then.

Trial Examiner Ballinger: One moment. Read the question to the witness.

(The reporter read the following question:

"Q. Did you not tell him that you were satisfied or had concluded that there was only two one-hundredths of a cent difference in cost per gallon in handling gasoline in those two groups?")

Trial Examiner Ballinger: You understand that he refers to Mr. Houghton, and you understand the two groups referred to are the A-Stations and B-Stations?

Mr. Hanley: No, this first question refers to the commission employees as distinguished from the salaried drivers.

Trial Examiner Ballinger: That is right.

The Witness: And then it does not go any further than those two accounts; is that my understanding?

Mr. Hanley: Yes.

Trial Examiner Ballinger: Now you can answer the question.

By Mr. Hanley:

Q. It goes, Mr. Warmack,—if you do not under-
7225 stand it, do not attempt to answer it until you do.
Perhaps I had better reframe it.

Mr. Hanley: I withdraw the question.

Trial Examiner Ballinger: Question was withdrawn and will be reframed.

By Mr. Hanley:

Q. Did not you tell Mr. Houghton in Detroit last spring, when you and he were both there, that you had made some calculation or study and that you had determined or become satisfied that there was only two one-hundredths of a cent per gallon difference in marketing cost between the gallonage handled by commission employees on the one hand, and salaried drivers on the other hand?

Trial Examiner Ballinger: The question is: Did you or did you not tell him that?

The Witness: I certainly do not recall telling Mr. Houghton that there was any cost differential established for either of these two accounts; that is, account 006 or 021, or that there was any cost—unit cost established for the determining, that is, unit cost established as to cost of serving through B-Station agents or through A-Station agents. I was not clear, Judge, whether he means the two accounts or the whole business.

Trial Examiner Ballinger: Mr. Warmack, in your answer you use the word "established."

7226 The Witness: Yes, sir.

Trial Examiner Ballinger: In the question you were asked whether or not you stated to Mr. Houghton that you were satisfied?

The Witness: And I have not yet understood what I was supposed to be satisfied about.

By Mr. Hanley:

Q. It does not make any difference about that, Mr. Warmack. I am trying to—I will try to explain the question a little more about this, then I will ask the reporter to reread it to you. I am asking you now—

A. (Interposing.) I will listen.

Q. —whether or not you made a statement to Mr. Houghton, and the only thing that you need to answer is whether you did or did not make that statement.

A. I see.

Mr. Hanley: Now, Mr. Reporter, please read the question.

Trial Examiner Ballinger: Read the question.

(The reporter read the question as follows:

"Q. Did not you tell Mr. Houghton in Detroit last spring, when you and he were both there, that you had made some calculation or study and that you had determined or become satisfied that there was only two one-hundredths of a cent per gallon difference in market-
7227 ing cost between the gallonage handled by commission employees on the one hand, and salaried drivers on the other hand?")

The Witness: In answer to that, I can give this: The answer is—no Positively no. No such study had ever been completed. Mr. Houghton and I did make a calculation, or tried to,—

By Mr. Hanley:

Q. (Interposing): That is all I want to know is did you or did not you make such a statement?

A. I answer your question.

Q. Very well. Please answer identically the same question—.

Mr. Austin: Off the record.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. Did you not tell Mr. Houghton in Detroit last spring, when you and he were both there that you had made some calculation or study and that you had determined or become satisfied that there was only two one-hundredths of a cent per gallon difference in marketing cost between the gallonage sold and delivered out of A-Stations on the one hand, and out of B-Stations on the other hand? —Gallonage, referring to gasoline in the reseller channel, in both instances.

7228 A. The answer is—no. I should like to explain, your Honor, if I may.

Q. There is no explanation necessary.

A. I think an explanation is positively necessary.

Mr. Hanley: If your Honor please, this question is asked definitely as an impeaching question. I do not care to have any more explanation on the record. He either made the statement or he did not.

The Witness: Your Honor, I think I am entitled to show what Mr. Houghton and I did do.

Trial Examiner Ballinger: No. It is unnecessary, in view of the question and answer.

The Witness: Well, Mr. Houghton and I did a lot of—

Trial Examiner Ballinger (Interposing): Mr. Warmack, you will answer the question propounded by counsel.

The Witness: You do not want the whole story?

By Mr. Hanley:

Q. Mr. Warmack, you have indicated that you thought there should be a segregation of cost as between leased stations and non-leased stations, and you have indicated that you thought there should be a segregation of cost as between commission employees' gallonage and salaried drivers' gallonage.

Would it not be possible that there would be at least as many as four times gallonage costs resulting 7229 from the adoption of that plan or those plans at any conceivable time?

A. Yes, that is possible. I do not say that I—or at least I think your statement is a little bit off to the effect that I said that that must be done with respect to lessee and non-lessee.

Q. I just thought you had suggested that it be done, Mr. Warmack.

A. I beg your pardon. I can give you what I thought—

Q. (Interposing): You have. You have told us. Would not it be possible that you may not get one gallonage cost with reference to lessee stations served by commission drivers and another cost for lessee stations served by salaried drivers, and another cost by other stations served by—

A. (Interposing): I am sorry, I was looking at this document and I did not hear your question.

Mr. Austin: May we be off the record?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: We will take a five minute recess.

(A short reces swas taken.)

Trial Examiner Ballinger: On the record. Is there a question pending?

Mr. Hanley: I will withdraw the question and ask
7230 it again.

Trial Examiner Ballinger: Question withdrawn.

By Mr. Hanley:

Q. You have told us, Mr. Warmack. Would it not be possible, if not probable, that you would get one gallon unit cost for lessee stations served by commission employees, another and different unit cost for lessee stations served by salaried drivers, another and different unit cost for non-lessee stations served by commission employees, and another and different unit cost for non-lessee stations served by salaried drivers?

A. All of those things are entirely possible. Any separation that you make may afford different costs and it may not.

Q. Now, assuming that you do get that kind of result, which one, if any, would you say is the basis for determining what cost differential you would adopt, or what the cost differential was, as between the tank wagon reseller customer, and the jobber customer?

A. You can say every one, although in that instance you can say each one of the unit costs per gallon arrived at to determine this differential would be any of the other group, if you want to go to that great refinement.

Q. I understand, as a matter of fact, that arithmetically, Mr. Warmack, a subtraction could be made, but as a matter of setting up a cost differential, or as a matter of cost
7231 justification for a cost differential, which of those four costs if any or, in your judgment, any group of them, as an accountant, would be the proper one to use to establish the cost differential?

A. I think you should use them all and then I should think you would take the costs of greater Detroit. You have established those costs—I do not know if that is the one that you have set up—and compared it with the cost of serving your jobber business. That would be your most proper comparison.

Q. How would you use them? By taking in a geographical area?

A. Well, that would be just a matter of simple arithmetic, of comparing one with the other, or one with all of the others, or each of the others, for that matter, rather.

Q. Which resulting figure would be the differential?

A. That would be for the Commission to decide.

Trial Examiner Ballinger: Well, you say it would be for the Commission to decide, but as to which method of accounting would be the proper method, would you say that it would also be for the Commission to decide?

The Witness: I am sorry. I do not understand the question.

Trial Examiner Ballinger: Also, would it be for the Commission to decide as to which method of account-
7232 ing would be the proper method?

The Witness: Yes, sir. That is correct.

Mr. Hanley: I did not hear the question and answer.

Trial Examiner Ballinger: Read the question and answer.

(The reporter read the question and answer.)

By Mr. Hanley:

Q. Well, now, suppose this, Mr. Warmack, that instead of the Respondent having done what it did do, and grouped all of these various accounts with a resultant single unit cost, suppose that it had some years ago adopted your theories, and it now came into court with the four different unit costs, would you then be expected to throw all of these accounts together just as we are now expected to, and are unable to unscramble the eggs and separate them all for your benefit, would you then state what would be the proper thing to do? What, then, would be the proper thing to do; that is, to establish the proper cost to use for the differentials?

A. Are we going into the theories of probabilities?

Q. I am asking you as an accountant.

A. Well, should think—

Trial Examiner Ballinger: (Interposing): The Examiner is of the opinion that the question addressed to this witness is too broad. He cannot speak for the Commission as to what it would do.

7233 Mr. Hanley: He can speak as an accountant as to what he thinks would be the proper justification for the differential. He can speak as an accountant.

Trial Examiner Ballinger: Certainly, he can speak that way. He can go at it from the basis of an accountant, but he can not speak for the Commission.

Mr. Hanley: I was asking the question of the witness as an accountant, which of the four unit costs, Mr. Warmack, as an accountant, would it be proper to use to establish the cost differential?

Mr. Austin: I object to this as incompetent and immaterial and irrelevant. I think to ask this witness as to what would happen if somebody representing the Respondent came in here with a different method of accounting from that which is presented here—

Trial Examiner Ballinger: Well, we have had a situation of that kind present here once or twice during the hearing.

The witness may answer.

The Witness: I would make a comparison of all of the costs. I would lean to the feeling that the cost of serving reseller customers in the place where the complaint is drawn; namely, Detroit, Michigan, would be the cost which should be compared for the unit cost of serving jobber customers when, as, and if that unit cost is estab-
7234 lished in examining the cost differential.

By Mr. Hanley:

Q. Now, I do not understand what you mean by using all of the costs. You say you would do it.

A. In the grouping of them. You have named four separations that you have made, and that is what my answer was addressed to, each of those separate separations of cost.

Q. Do you mean you would have four differentials to justify?

A. I stated that I would make a comparison of each, but that I would run to the feeling that the cost of serving reseller customers in Detroit, Michigan, through whatever service or methods of handling that the company employs in serving its customers, that unit cost should be compared with the unit cost of serving the jobber customers, when, as, and if that unit cost of serving the jobber customer is established.

Q. All right, Mr. Warmack. Limit it for the purpose of this question to that Detroit area, and assume that four unit costs would be in it, because they would be there, because all of the elements are in that area; then, what would you say would be the proper unit cost to use to determine the differential?

A. Inasmuch as the commission agent business is limited materially in the City of Detroit, I certainly would not use that.

7235 That would leave the A-Station costs. There you have, if you can establish, you have, if it is possible and practicable, you have costs of serving reseller stations ~~which are lessee stations, and costs of serving reseller sta-~~ tions which are not lessee stations. I would make a comparison of those—of each of those unit costs.

Q. Then, what?

A. Then, with the unit cost of serving these preferred customers who receive the price—the lesser price.

For a determination—

Q. (Interposing.) I understand. Have you finished your answer?

The Witness: I would like to hear my answer.

Trial Examiner Ballinger: Read the answer.

(The reporter read the answer.)

The Witness: Yes.

By Mr. Hanley:

Q. Well, certainly one of the unit costs in the reseller channel is that area under consideration would be low and another would be intermediate, and the third would be high.

A. I do not know that.

Q. Well, if they are all different, that would have to be true, would it not?

A. Well, I would make the comparison with each one of them.

7236 I am asking you, in fact I was going to ask you how you would get three different answers—you would, would you not?

A. I might, I might not.

Mr. Austin: The witness said two not three.

Mr. Hanley: All right. Two is enough.

By Mr. Hanley:

Q. One would have to be greater than the other?

A. I do not know. A study might develop that it might not.

Q. We are assuming, Mr. Warmack, that you got four different unit costs out of the use of your various studies. You have now said that you would not regard any but two of them, as an accountant.

A. That is because the complaint was prepared for Detroit.

Q. Now, necessarily, one of those unit costs would be greater than the other, if they are different?

A. If they are different, one would be larger than the other.

Q. You have now said you would compare the jobber price with each. If you do you would necessarily get two different answers?

A. Well, you would have two comparisons and I do not know exactly, just exactly what you mean by answers.

Q. I mean, if you subtracted five from eight you would get three, and if you subtracted five from seven you
7237 would get two; and there is a difference between two and three.

A. That is correct.

Q. Well, can you answer your question then?

A. I beg your pardon? I did not mean not to answer it.

Mr. Hanley: Read the question.

Trial Examiner Ballinger: Read the question.

(The reporter read the following question:

"Q. You have now said you would compare the jobber price with each. If you do you would necessarily get two different answers?")

The Witness: Yes, you would get two different answers, and in one instance on this assumption, Judge Hanley, that you have just given me, it might be that your price differential was greater than your cost differential in one instance, and in the other instance it may be just the other way.

By Mr. Hanley:

Q. Exactly.

A. That is correct.

Q. And then what would you do about it?

A. I would tell the Commission; that is all I would do.

Q. And from there on it is the Commission's problem?

Trial Examiner Ballinger: Mr. Warmack, as an accountant, would you not yourself decide which method of accounting would produce the most accurate result?

7238 The Witness: Why, Judge, I was under the assumption that both methods of accounting—that the same method of accounting had been employed. That was my assumption.

Trial Examiner Ballinger: Read my question.

(The reporter read the question.)

Trial Examiner Ballinger: That is assuming that you explored the question of differential on two different accounting methods, let us assume that.

The Witness: Yes, sir.

Trial Examiner Ballinger: And you had arrived at two different conclusions.

Would you not yourself choose and determine which method would produce most accurate results, and adopt that method?

The Witness: Yes, that is not the question involved here at all. I am sorry, but that is not my understanding.

Trial Examiner Ballinger: What would be your action under those circumstances?

The Witness: Under those circumstances I would accept the figure that I thought had been most properly developed. That was not the question here at all.

Trial Examiner Ballinger: Well, you would not put that question up to the Commission?

The Witness: No, sir, but that was not the question. 7239

The question was asked me by Judge Hanley if, by the use of sound and accepted accounting principles, it were determined that it cost one unit cost to serve lessee stations and one unit cost to serve non-lessee stations, and each one of those unit costs had been properly established, and further than that that a proper study had been made, according to sound accounting principles and procedure, whereby the unit cost of serving jobber customers had been established, which one would I compare —I would compare each with the other. That was the question, your Honor.

Mr. Hanley: That was the question, I think, fairly stated with this modification—I did not say "according to sound accounting principles." I said if these accounts had been kept in accordance with the theories advanced by you in your criticism of Respondent's Exhibit 101—with that modification, I think your statement of what you were asked is fairly correct.

Trial Examiner Ballinger: Now, Mr. Warmack, I want to ask you whether it would be possible to make two investigations, both according to sound accounting principles, and along different lines, which would result in different results?

The Witness: Different lines of approach, you mean, your Honor?

7240 Mr. Austin: Your Honor, can we go off the record?

Trial Examiner Ballinger: No, I prefer to say on the record at this time.

Mr. Austin: Why, then, I will have to say on the record that your Honor is completely under a misapprehension and have a complete misconception of the previous question. And I think these questions that you are now asking Mr. Warmack, are not in any way touching upon the questions asked by counsel.

Trial Examiner Ballinger: You may make your point, but the witness may answer the question.

Mr. Austin: I think the answer to your Honor's question was a perfectly good and relevant one, but I want to call your Honor's attention to the fact that it was not in line with the previous question. I am not in any way objecting to the question.

Trial Examiner Ballinger: Do you understand the question?

The Witness: Yes, sir.

Assuming, of course, your Honor, that you were speaking about for the purposes of determining a unit cost in this case.

Trial Examiner Ballinger: That is right.

The Witness: If both of the procedures were properly worked out.

7241 Trial Examiner Ballinger: Well, now, when you say "properly"; what do you mean by "properly"?

The Witness: In accordance with sound and accepted accounting principles. Some of the approaches would have to be of necessity identical; that is, of the same identical situation. Some would not. In the end, the figures may vary some tiny bit. I feel that they would come out almost the same.

Trial Examiner Ballinger: Mr. Warmack—

The Witness: (Interposing): Reasonably the same.

Trial Examiner Ballinger: Mr. Warmack, in the final analysis, would not the accountant be required to himself determine which was made upon the soundest basis?

The Witness: Oh, yes, indeed, your Honor. Yes, indeed, your Honor.

Trial Examiner Ballinger: All right.

The Witness: That is correct.

Mr. Hanley: If your Honor please, as mentioned to you earlier in the day, we have come to a point where we can perhaps make better progress if we were to recess at this time. And if it is agreeable to your Honor and to counsel and to the witness, I would like to adjourn at this time, if your Honor please. There is only less than an hour of the day to go.

7242 (Witness temporarily excused.)

Trial Examiner Ballinger: The request of counsel for the Respondent is granted.

And now, at 4:10 p. m., the hearing stands adjourned to be reconvened at 9:30 a. m., July 27, 1942, in Room 532, Federal Trade Commission Building, Washington, D. C.

(Whereupon, at 4:10 p. m., July 24, 1942, the hearing in the above-entitled matter was adjourned.)

7243 Room 532, Federal Trade
Commission Building,
Washington, D. C.,
Monday, July 27, 1942.

Met, pursuant to adjournment, at 9:30 a. m.

Before:

Webster Ballinger, Trial Examiner.

Appearances:

Cyrus B. Austin, Esq., attorney for the Federal Trade Commission.

Harold R. Hanley, Esq., (910 South Michigan Avenue, Chicago, Illinois,) appearing for the Respondent.

7244 PROCEEDINGS.

Trial Examiner Ballinger: Come to order. The hearing of Docket No. 4389, case entitled "In the Matter of Standard Oil Company (Indiana)" is reconvened pursuant to notice at 9:30 a. m., July 27, 1942, in Room 532, Federal Trade Commission Building, Washington, D. C.

The last hearing was held at the same place, July 24, 1942.

The reporter will note counsel for the Commission and Respondent present.

You may proceed.

WILLIAM J. WARMACK resumed the stand and testified further as follows:

Cross-Examination (Continued) by Mr. Hanley.

Q. Mr. Warmack, you were in attendance at the hearing in this matter in Detroit last spring, I believe.

A. I attended most of them.

Q. Do you recall the incident where either you or your counsel made the request that Respondent furnish some documentary evidence, and about two truckloads of steel filing cases were delivered in the court room and remained there for approximately three days?

A. I remember that time that all of those records were brought in. Yes, sir.

7245 Q. And there was a very large number of them, were there not, Mr. Warmack?

A. Yes, sir.

Q. Inside of the railing of the Courtroom? Did it not?

A. I believe that it did, yes, sir.

Q. And overflowed against the back wall?

A. I believe that is correct.

Q. Did you look at those records?

A. No, sir.

Q. While they were in court?

A. No, sir.

Q. You were in Detroit for some weeks thereafter? Were you not?

A. Yes, sir.

Q. Did you examine those records after they were returned to the company's offices?

A. I saw—I was there some weeks. I say "some weeks"; probably I was there a week. I beg your pardon. I did not mean to interrupt you. What was the question?

Q. Did you examine those records after they were returned to the company's offices?

A. I may have looked at some of them. I am sure that I did not look at the larger portion of them.

Q. In your judgment as an accountant would that be, or at least much of that material be regarded as

7246 documentary evidence, Mr. Warmack?

A. Well, inasmuch as I did not look at any of it, I could not vouch for what was in those records. However I assume that it contained vouchers and the like. Of course, that is documentary evidence.

Q. Of course you had the opportunity to look at them? You understand that you had that opportunity?

A. Yes, sir. I had the opportunity to look at them.

Q. That is the reason, is it not, in your understanding that they were delivered into the courtroom?

A. I do not know about any of these documents as to what they were. I did not look at them.

Q. Well, of course, if you did not, that is because you did not elect to look at them? Is that not true?

A. Surely. I had no occasion to look at them.

Q. They were there?

A. Yes.

Q. And you understood that they were there at your request or at the request of your counsel?

A. They were not there at my request.

Q. For your examination?

A. They were not there at my request.

Q. They were brought in there, perhaps, at the request of counsel for the Commission?

7247 Mr. Austin: Your Honor, I object to any further continuation of this line of examination. I do not believe it serves any useful purpose. It is immaterial.

Trial Examiner Ballinger: I asked: What is the purpose of it?

Mr. Hanley: I did not hear your Honor's comment.

Trial Examiner Ballinger: What is the purpose of it?

Mr. Hanley: Simply, your Honor, to establish the fact that we had supplied a very large amount of documentary evidence. And it seems apparent that the witness did not examine it. It was supplied at the request of either Mr. Warmack or Mr. Austin. I do not recall who called for them. Either Mr. Warmack or Mr. Austin asked for certain information, and this material was furnished in the form of an answer to that request.

Trial Examiner Ballinger: Is it not true that the Commission asked for the submission of certain statements embodying the information contained in the documents? Further, that there was some question that arose as to whether or not the Respondent would furnish it in the breakdown form that the Commission desired it, and as a result of that, the documents were produced in the hearing room and then later—

Mr. Hanley: (Interposing.) Well, Judge—

Trial Examiner Ballinger: —and later on the 7248 Respondent did furnish the information that was satisfactory to the Commission?

Mr. Hanley: As I remember it, there were several requests made. Some of them we could break down and furnish the information in statement form. On those we did so.

There was one request, as I recall it, that we could not break down. That was the request for furnishing the basic material. As I remember it, Judge, we never did furnish—we could not furnish all the information that was requested except by furnishing the original documents —that information in statement form. The reason we did not, as I say, was because we could not.

Trial Examiner Ballinger: Judge, as I understand it, after some inquiry, the Commission has not questioned the correctness of the figures of cost portrayed by the statements submitted by the Respondent. It has questioned only the allocation of the cost channels. Am I correct?

Mr. Austin: Yes, your Honor. We have not questioned the amount of costs actually incurred so far as the totals are concerned.

Trial Examiner Ballinger: The Commission has accepted the books of the Respondent company as actually portraying the actual cost of the operation of the Respondent company. It has only questioned the allocation of the costs as to the marketing channels.

7249 Mr. Hanley: Of course, I understand that to be the attitude of Mr. Austin on behalf of the Commission, your Honor. However, the witness has repeatedly said, many, many times, that he did not get any documentary evidence. I think it is important that it be shown that when he made this request that he got two truckloads right into the Courtroom.

I do not care to press the matter. He says that he did not examine them, and did not care to examine them. That is as far as I want it to appear, that he did not do so.

Trial Examiner Ballinger: Apparently from his testimony, it would not have afforded him anything if he did examine them. According to his testimony he would have to make an exploration along different accounting methods to have determined what he would have considered to have been a proper method to have employed. This he did not do, and probably he could not have done if all of the documents in the possession of the Respondent company had been submitted to him.

Mr. Hanley: Of course, that is what I think he was there for—was there to do, which he did not, and apparently he did not do so.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

7250 Q. Referring you to account 025, Mr. Warmack, truck rental expense. That is allocated on a commission gallonage basis. Is that your understanding?

A. Yes, sir. That is my understanding.

Q. Now, if you like you may refer to your testimony—I am going to quote it—at page 6166.

A. What page is that?

(The witness examines documents.)

Q. 6166.

A. Thank you.

Q. Have you that page?

A. Yes, sir.

Q. Did you not testify as follows:

"It is my opinion that a sounder method could have been used than the method used in the separation. * * *"

And further:

"I think that this particular class of expense; that is, truck rental expense, should following the compensation paid to the commission agents."

Did you so testify?

A. I—

Trial Examiner Ballinger: (Interposing.) Did you so testify?

The Witness: Yes, sir. That is a part of the statement shown on page 6166.

By Mr. Hanley:

7251 Q. Is that your view now?

A. Yes, sir.

Q. During your sojourn in Detroit, did you get acquainted with Respondent's method of compensating its commission agents and drivers?

A. Yes, sir.

Q. Does the method of compensation reflect different rates for different products?

A. For example, please, Judge Hanley?

Q. Well, just that, Mr. Warmack. I do not think I can clarify it much. "Different products" would be different products—gasoline, kerosene, heating oil, lubricating oil—just those different products.

A. There may be some separation between the different products, but it is my understanding, as a result of my studies that that class of products just named, such as naphtha, gasoline, refined oil, and such like, carried the same pay rates; that is, pay gallon rates on which compensation is calculated for payment to the B-Station agents.

Q. You say you are acquainted with the system. Now, do you mean to say that the same pay applies to each product?

A. No. Not necessarily each product, but the named products I have just given, I believe, carry the same rates. I understand you have around six thousand prod-
ucts. I would not have you think that the same
7252 rate would carry each one of those products, but
products of a similar nature, is what I am driving at.

Q. Does the method of compensation reflect different rates for different customers?

A. Yes, sir. It does.

Q. Will you explain, please?

A. I have given that in the record heretofore. I will be glad to explain it again.

Q. Do it very briefly, if you please, Mr. Warmack.

A. The company compensates its B-Station agents—which have been referred to in this record in some instances as commission drivers—on what it calls pay gallons. Where deliveries are made to a customer whose business is relatively near to the B-Station agent's plant; that is, the B-Station bulk plant, they carry one pay gallon rate. For example, for each gallon delivered the rate may be one pay gallon for each gallon delivered.

When deliveries are made at a distance, from several miles, we will say, from the B-Station agent's plant, he may receive for each gallon he delivers a pay gallon rate of, we will say, three gallons for each gallon delivered. In the end; that is, at the end of the month, the B-Station agent renders a report making calculations made and based upon the pay gallons that he is allowed for these separate
activities. There is a number of pay gallon rates
7253 that means how many pay gallons will be allowed for
the delivery of one gallon of the company's product
in any given instance.

Q. As an accountant, do you regard that there is anything improper about that system of paying on the basis of effort?

A. No, sir. It appears to me to be a good system.

Q. Are sales of heater oil, furnace oil, Diesel fuel, kerosene, and tractor fuel included in the tank wagon consumer channel as well as gasoline?

The Witness: What is the question?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: Yes, sir.

By Mr. Hanley:

Q. And are different pay gallon factors awarded the commission employee for selling each of the above products and gasoline?

The Witness: What is the question?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: I could not say just exactly the pay gallon rate applicable to each of those, or to the customers engaged—

Trial Examiner Ballinger: (Interposing.) You were not asked for that.

Mr. Hanley: No. I am not asking that, Judge.

The Witness: I mean—I am sorry.

7254 Trial Examiner Ballinger: Read the question again.

(The reporter again read the question.)

The Witness: Oh, yes. It is my understanding that the difference of the haul has to do with the pay gallon rate with respect to each of those products named.

By Mr. Hanley:

Q. Does the Respondent company's plan attempt to compensate the commission employee for variations of selling effort or solicitation time?

A. It is my understanding that the pay gallon rate is based primarily upon the distance of the haul. I cannot answer with respect to the selling effort, Judge Hanley.

Q. Well, you made a study of this matter? Did you not?

A. Well, I made a superficial review of everything out there, but you understand I was only there a very short time and I had no other accountant from the Commission to assist me.

Q. Well, you were there two months?

A. I had many hundreds and hundreds of things to cover during that one month or two months.

Mr. Hanley: Your Honor, I do not just thing this record out to be so frequently encumbered with statements of that kind.

Mr. Hanley: You Hono:, I do not just think this record
ought to be so frequently filled with questions as to
7255 what this witness should have done in Detroit. The
witness may answer questions as to what he actually did. I therefore request your Honor to instruct the witness and counsel both on that point. I think there has been entirely too much of that sort of thing in the record.

Trial Examiner Ballinger: The record portrays the time that the witness was in Detroit and in Chicago.

It also portrays the volume of work that he was supposed or required to review. It would appear to the Examiner that it is unnecessary to keep on including that in the record.

Mr. Austin: I do not think the witness is called upon to justify how he spent his time, either.

Mr. Hanley: I—well, now, I am perfectly willing to accept the ruling of the Court. But if Mr. Austin cares to make that additional statement, then, I have something to say, your Honor.

Trial Examiner Ballinger: Well, the Examiner does not agree with the statement of counsel for the Commission. So, you may pass that over.

The Witness: I want to say that while I was in Detroit I attended hearings—

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

7256 By Mr. Hanley:

Q. Mr. Warmack, have you ever attempted to determine how much time those commission employees devoted to selling as distinct from delivery?

A. No, sir. I have not made any study of that matter. I was under the impression, inasmuch as they are spoken of as, by counsel for the Respondent—as commission drivers, that their activities are largely the delivery of the goods rather than the selling of them.

Q. Is not that the premise upon which you have undertaken to criticize the accounting of the Respondent company?

A. Not necessarily. No.

Q. Very well. Tell us, if you can, how much time approximately the commission employees devote to selling as distinct from just delivery?

A. That is in the record. I have no way of knowing. I do not know of my own knowledge. And I have made no study.

Q. Do you regard it as logical that the commission employee should be paid for his selling effort?

A. I should certainly think that he should.

Q. And from your study, whatever study you made, did you arrive at the conclusion that the commission employee was paid for his service in selling effort, as well as a purely mechanical employee effort?

A. Yes, sir. That is my understanding, that he
7257 was more than a commission driver.

The salaried driver, Mr. Warmack, is just a delivery man, is he not? In your contemplation of this setup, is that not so?

A. The salaried driver?

Q. Yes.

A. Yes. That is my understanding, Judge Hanley.

Q. And he has no selling responsibility at all. Is that your understanding?

A. Well, that is my understanding, with this qualification: I believe that it has been testified in the record that every employee of the Standard Oil Company (Indiana) is interested in the placement of the company's products in the hands of the consumer.

Q. Oh, well, yes, of course, Mr. Warmack. That, perhaps, is true in any company. However, with respect to specific duties of the salaried driver, as distinguished from the commission employee, is it your understanding that the salaried driver delivers a load of products that have already been sold and ordered, as distinguished from the purely selling effort?

A. Yes, sir. That is my understanding. It is further my understanding, in connection with the salaried driver, that he may drop a load of gasoline to a customer maybe
who has not ordered it if he happens to have that load
7258 on his return trip. And that is one of the situations
where he would serve those that wanted that.

Trial Examiner Ballinger: Generally, what Judge Hanley has asked you is true; is it not?

The Witness: Oh, yes. That is my understanding. But, you just can not make an ironclad statement.

Trial Examiner Ballinger: All right. With some exceptions.

The Witness: Yes, sir. That is my understanding. That is the reason that I have tried to get away from the combination of it, the B-Station agents with commission drivers, because they do more than drive, or that is my understanding.

By Mr. Hanley:

Q. Now, is selling by the commission employee much of a factor at service stations owned and leased to private operators, or owned privately and leased by the Respondent company, or served on a 461 contract for annual periods?

The Witness: Well, your Honor, I don't get the question.

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: Well, I certainly could not know that. I have not made a study of that situation. The records would have to speak for themselves

It is my understanding that he exercises certain 7259 responsibility in connection with the selling. It is my understanding that in a small village like or similar to the places I visited at Detroit, that the B-Station agent attends to most of the selling over in those villages. He is among a bunch of his friends and he promotes the activities of the company, and the company's business, to the best of his ability.

Trial Examiner Ballinger: Generally he performs the dual function of both salesman and delivery man? Does he not?

The Witness: Yes, sir. That is my understanding, your Honor. That is why it is my opinion that this is two separate classes or methods of dispensing the Respondent company's products.

By Mr. Hanley:

Q. All right. What company employees are primarily responsible for securing tank wagon seller outlets?

A. I certainly do not know; not of my knowledge.

Q. Well, from your study of the setup in Detroit, what is your best judgment.

A. It is my understanding that the salesmen for your company, and the B-Station agents have something to do with it in their territory.

Q. Passing from that, what company employees are primarily responsible for selling the products of the Re-
7260 spondent company, to influence contract consumers, farmers, and the like?

A. (The witness examines papers.)

Q. If you can, of course, Mr. Warmack, it would be more helpful if you could answer this out of your knowledge. It is your own knowledge that I want.

A. Well, I could not remember, possibly, all of this information, Judge Hanley. It is my understanding that the B-Station salesman has something to do with it; and, also, the B-Station agents who are engaged in that manner of activity.

Q. Very well.

A. I have not studied those things. I have not made a time analysis to cover all of these methods. I could not know of my own knowledge.

Q. Is truck rental expense in account 025 a compensation for the sale and delivery of products, or is it a cost for equipment operated by the commission employee?

A. It is the latter, according to my understanding.

Q. That is to say, it is a company operating cost?

A. Well, certainly all of those are company operating costs. It is my understanding that everything on Commission's Exhibit 119 is operating cost in the Detroit field.

Q. And are the commissions based on selling and making the delivery, both?

A. The commissions—now, you are speaking of 021 account?

7261 Q. I am speaking of the commission class of employees, and the compensation paid for classes of employees.

A. Yes, sir?

Q. I am not sure what the account was.

A. Yes, sir, I am sorry. I thought you were only speaking of truck rental expense.

Q. I mean in 025, but that applies, as I understand it—

A. (Interposing): I believe that the truck rental expense is a fixed rate per month to the agent for the use of his truck chassis, and the company furnishes along with that the tank which goes on that chassis. And that cost is in 055. Just to make clear my understanding on that, 025 account represents what were paid, fixed amount paid as fixed compensation, and 021 account represents commissions paid on the pay gallons.

Q. What I am really interested in learning, Mr. Warmack, is this: From whatever observations and studies you made, do you agree and is it your understanding that the compensation paid to commission employees—however payment be made—includes the compensation for both selling and delivery effort?

A. That is my understanding.

It is not my understanding that those are equal things. It is my understanding that the B-Station agent is compensated primarily for a delivery of the company's products; that is, in view of the fact that these pay gallon
7262 rates are in effect based upon the pay gallons delivered at different distances, but they were charged with the promoting of the Respondent company's business in his territory—at least to some extent they are charged with that.

Q. Did your studies or observations proceed to a point where you are able to tell the Court approximately what percentage of the time on the average, the B-Station agent devotes to selling as distinct purely from delivery or the care of the bulk plant?

A. No, sir. I have no such information as that. A cost study would be the only way that you could secure that information.

Q. I am just asking you if you did secure that?

A. Oh, I have not been required to make the time study, and I have not secured it.

Trial Examiner Ballinger: Well, the B-Station agent first has to obtain his customers before he can commence making deliveries? Has he not?

The Witness: It is my understanding, your Honor, and Judge Hanley.

Trial Examiner Ballinger: Well, then, would not that be his primary function?

The Witness: No, sir. He is not having a general turnover of customers all the time, I do not think. His biggest job is running that truck and delivering the goods to
7263 the customers, I think.

By Mr. Hanley:

Q. That is your judgment?

A. That is my judgment, or my understanding, especially in view of the fact that these people are termed "commission drivers"; and there is a reason for that term.

Q. Have you any information—have you any information, Mr. Warmack, which enables you to alter the suggestion of an approximate thirty-five per cent of the time of the B-Station agent is used in selling as distinct from mere delivery and operation; that is, mechanical operation of the bulk plant?

The Witness: May I have that question?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: Oh, I certainly would not dispute that if they were ever established by any reasonable time study. I have not made any study. I would accept it if it were established by the company.

By Mr. Hanley:

Q. Do you agree, Mr. Warmack, that it is a proper operating and marketing cost of the Respondent company that pay gallons, as you have explained that term, should be based on elements of distance, profit, size of dump, selling effort, and like factors?

A. It is my opinion that they should be based on
7264 those things, especially on distance.

Q. Do you agree that that is a proper method of accounting?

A. I certainly would have no objection to it. I have not gone into that matter, Judge Hanley. There may be some things that I would object to, but in principle, I certainly do not object to it on my cursory study of it. I think it is reasonably satisfactory, or should be, in accordance with sound accounting on such study.

Q. Does it still appear to you, as an accountant, that total amounts paid would prove a more appropriate means of allocation of account 025 than commission gallons?

A. Yes, sir. That is right. That is my opinion, and that would be my opinion in the absence of information that will show that it should not be.

Q. Now, is your position on this account based on a factual and objective cost study as you have used that term heretofore?

A. No, sir. I have not made a factual or objective cost study of any item in Respondent's Exhibit 101.

Q. Will you please now refer to account 055—vehicle tank expense.

A. Yes, sir.

Q. You have testified that commission gallonage is not a correct and proper method of allocation of this expense. Is that true?

A. I do not believe that that statement is exactly correct.

7265 Q. Please refer to page 6181 of the record.

A. (The witness examines document.)

Q. Have you got the page?

A. I have the page.

Q. Now, can you answer the question?

A. I have not read the page.

Q. Please do so, Mr. Warmack. Prepare yourself, please, to answer the question.

A. I am not prepared to answer the question.

Q. Please do so.

A. (The witness read the page referred to.)

The Witness: It is my opinion that that is not the correct way to do it unless and until some proper study is made to show that that is a correct way to do it if such study were made.

By Mr. Hanley:

Q. Mr. Warmack,—

Mr. Austin: (Interposing.) Wait a minute. You were not asked your opinion.

The Witness: Oh, I thought so.

By Mr. Hanley:

Q. The question was, did you—

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

By Mr. Hanley:

7266 Q. Will you please answer the question?

A. May I have it again?

Trial Examiner Ballinger: Read the question.

(The reporter again read the question.)

Mr. Hanley: Respondent moves to strike the answer of the witness beginning with "It is my opinion"; the question was simply asked whether that was true.

Trial Examiner Ballinger: The motion as made is granted to strike the testimony.

Now, you can answer that question. It does not call for an opinion.

The Witness: Evidently I misunderstood the question, your Honor.

Trial Examiner Ballinger: Do you want the question read again?

The Witness: I will have to have it read again. I evidently misunderstood it.

Trial Examiner Ballinger: Please read the question again.

(The reporter read the question as follows:

"Q. You have testified that commission gallonage is not a correct and proper method of allocation of this expense. Is that true?")

The Witness: I have said that that is not exactly correct. That is my answer. Is that satisfactory to 7267 counsel?

By Mr. Hanley:

Q. Now, I now refer you to page 6181—

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. I now refer you to page 6181 in the question referring to account 055, in part you were asked this:

"In your opinion, is that a correct and proper method of allocation of this expense, referring now to account 055, having in mind the purposes of this cost study?"

"A. In my opinion it is not."

Were you asked that question and did you give that answer?

A. Yes, sir. That is correct. That answer should state, "In my opinion it is not, in the absence of information which will prove positively otherwise."

Q. Is it your desire now to alter or explain or modify the answer that you have already given on page 6181?

A. It is my desire that the answer be shown as stated this moment.

I should be happy, your Honor, to explain these things—

7268 Q. You have explained for five weeks, Mr. Warmack. If you will just please answer the questions we will get along.

A. I am getting tired of this five weeks business, too.

Trial Examiner Ballinger: Mr. Warmack, this conversation between witness and counsel must stop. You must confine yourself to statements on the witness stand only to answers to the questions of counsel.

The Witness: Thank you, Judge. I intend to do so.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. Mr. Warmack, you visited some Respondent bulk plants? Did you not?

A. Yes.

Q. Did you notice a large tank for storing gasoline and other of its bulk products at the bulk plants?

A. Yes, sir.

Q. Limiting your attention to the tank holding Standard "Red Crown Gasoline," for the moment. Do you understand it to be the fact that deliveries of Standard Red Crown Gasoline may be made to either the consumer or the reseller customers out of the same bulk plant tank?

A. That is my understanding.

Q. Assuming that the annual maintenance cost
7269 on that tank is $50. Just assume that, Mr. Warmack.

As an accountant, in your judgment, would it be proper to allocate this expense item between tank wagon reseller and tank wagon consumer channels on the basis of gallonage.?

A. In my opinion that would be the proper method.

Q. Well. now, what is the difference between the stationary tank and the mobile tank, in your judgment as an accountant?

A. Well, in my opinion, the mobile tank; that is, the tank on the chassis moves from the point of being a piece of property that is fixed and in which all gallons move out of it. This tank is mobile, is on a chassis; it will move ten miles into the woods or somewhere else and deliver and come back, and it will get the rickets that the road may give it. Inasmuch as the life of a truck, or an automobile, or that kind of a vehicle is largely dependent upon the mileage that that vehicle is required to travel, I see no point in splitting hairs, or saying that a tank on a chassis should carry equal depreciation charges or maintenance charges when the chassis or the truck may move one block across the street and deliver a dump, and in the next instance, or the next delivery, a dump fifteen miles

out in the woods. Now, it does not take an accountant, or an engineer, or any person to know that it costs more, and that the maintenance is more, and all of those things are more on this delivery vehicle if it delivers ten miles in the woods, than it does if it runs a delivery
7270 across the street. And that is my reasoning in the matter.

Q. How would you do it?

A. How what?

Q. What better way, Mr. Warmack, than the way just outlined in the way of handling a stationary tank? Now, you have given your opinion as to what should be done there. How would you handle a mobile tank which admittedly carries fungible property—gasoline—and carries it for both reseller and consumer channels? How could you do better than on a gallonage basis? Just exactly what would you do? And please, now, be specific, Mr. Warmack.

A. I will be glad to.

In the case of the depreciation on mantenance of the mobile vehicle, or the tank on such a vehicle, the distance, the wear and tear involved by that distance, is the governing factor and must be considered.

Q. You say you would consider it. What would you do? Would you treat every individual delivery as an individual delivery? Or would you undertake to determine the wear and tear on every single delivery?

A. No, indeed.

Q. Well, what would you do?

A. I would first study the situation from the standpoint of determining what functions involving the usage of that particular piece of property—

7271 Q. (Interposing.) We know that Mr. Warmack.

A. If you just will wait while I make my answer, Judge Hanley, I will figure out on this—

Trial Examiner Ballinger: Strike the statement of the witness commencing with "If you will just wait while I make my answer, Judge Hanley—" from the record—not physically.

By Mr. Hanley:

Q. I want to ask you this question, Mr. Warmack. We know what the functions are. That truck is delivering to reseller customers in the reseller channels. It is delivering to consumer customers in the consumer channel. So, we know what the functions are.

My question is now: How are you going to split those functions on any better accounting basis than the gallonage basis? That basis you say is properly applicable to the stationary tank at the bulk plant.

Trial Examiner Ballinger: Answer the question.

The Witness: Your Honor, may I answer that question without interruption?

Trial Examiner Ballinger: You have not been interrupted thus far.

Proceed.

Mr. Austin: I think that he was interrupted.

The Witness: I was interrupted four times.

7272 Trial Examiner Ballinger: Go ahead and answer the question.

Mr. Austin: Well, I think he was interrupted.

Trial Examiner Ballinger: Now, no more or further remarks on the record.

Now, proceed to answer. The record will speak for itself.

The Witness: I would make a study of the functions involved in connection with the use of this class of property, this equipment.

I would determine what influence those functions have with the general classes of costs involved in the use of this equipment. I would determine in detail the distance that the truck has to travel.

As a matter of fact, that information is or could be readily shown on the separate sales tickets. With such information, it would certainly be possible to allocate in a reasonable and fair and equitable manner the expense incurred in connection with the maintenance and depreciation of that delivery equipment. That includes the truck chassis and the truck tank on that truck chassis. In the absence of such a study it would seem reasonable to me that, and it is my opinion that the allocation of this expense on the basis of total gallonage handled is not in accordance with sound accounting.

7273 Trial Examiner Ballinger: In order to determine depreciation, would you not have to first determine the life of the chassis?

The Witness: Surely.

Trial Examiner Ballinger: Would not that require a series of thing—

Mr. Austin: (Interposing.) Well, your Honor, depreciation is determined by referring—

Trial Examiner Ballinger: (Interposing.) I am asking the witness, not counsel.

Mr. Austin: I am not answering the question either.

Trial Examiner Ballinger: Well, let us take the witness' answer.

The Witness: Excuse me, Judge. May I hear your question now?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: The depreciation, your Honor, would be over a series of years. I presume that is what you mean by series of things.

Trial Examiner Ballinger: More than that. Would not the depreciation depend upon the life of the chassis?

The Witness: The estimated life of the chassis, which estimates, of course, will have to give effect to usage to which the chassis is to be put and various factors of
7274 that kind. Now, the question at bar, as I understand it—

Trial Examiner Ballinger: (Interposing.) And could that be determined by a mere estimate? Would you not have to have an accurate test?

The Witness: Yes, sir. You would have to couple past experience in the way of tests with expected life of the truck less salvage value and maybe other factors. Having established that, then you have to make a test to determine how that cost is to be assigned. It is absolutely erroneous in my opinion not to make some calculation, then as a result of not doing that, to just arbitrarily say, "We will allocate each gallon to this depreciation that we have determined."

While, in the very next account that would still be a different amount for the dispensing of this particular product. What I am trying to say, your Honor, is this: This truck, that is, chassis and truck is used for dispensing a particular product of, we will say, gasoline to a nearby filling station, we will say, one thousand gallons. Now, maybe we have a customer or two customers or three customers together ten miles in the woods who will take that same amount of this petroleum product.

Now, the truck, after it makes the short delivery, performs the long delivery. It seems inequitable to me, from

the standpoint of sound accounting, to do that when the
wear and tear on that truck in making the short
7275 delivery—and the tank on the truck—is certainly
more than it is in making the long delivery—I mean,
just the opposite of that—that is my contention.

Trial Examiner Ballinger: Do you not believe that the law of averages would apply in such a case?

The Witness: Well, if all of one class of customers; that is, the short delivery; and all of another class of customers; that is, the long delivery, I do no think the law of averages will apply.

By Mr. Hanley:

Q. Well, do you know that?

A. Of my own knowledge?

Q. Yes.

A. No, sir. I have never made a study, but it is certainly indicated by your Respondent's Exhibit 101.

Q. Did you make studies of any of these matters that you are talking about, as to the effect?

A. That question is not complete, I do not believe, Judge Hanley.

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

By Mr. Hanley:

Q. Does that not seem complete to you?

A. Not complete.

Q. Can you answer it? Is that all right?

7276 Trial Examiner Ballinger: Do you understand
the question?

The Witness: No, sir. In my mind it is not complete.

Trial Examiner Ballinger: Do you understand the question?

The Witness: Yes, I understand the wording of the question. I can inquire as to what counsel means, and answer it.

Trial Examiner Ballinger: You may.

The Witness: What kind of "studies" do you refer to, Judge? And what effect do you refer to?

By Mr. Hanley:

Q. I refer to studies as to whether or not it costs more to operate a truck to make delivery to consumer customers than it does to reseller customers, and if you have made such studies, what do you think would be the effect?

A. I did not make such studies. My answer is based upon common knowledge.

Q. Well, is it a fact that you only have to go across the street to deliver to reseller customers, and you have to go ten miles in the woods to deliver to a consumer customer?

A. I have not made any study of those things. That is my opinion—

7277 Q. (Interposing.) You made that statement. I would like you to give me a direct answer.

A. I stated an example—

Q. (Interposing.) I asked you is that the fact?

Trial Examiner Ballinger: What is that example? Is that one of your own knowledge?

The Witness: No, sir. I have never made a study of this. I never made one of the B-Stations, taking a ride with the man. I spoke from my understanding as to what happened.

I did do this: when I visited one of these B-Stations, one of the reseller stations served by your agent was comparatively a short distance back up in a little village that we visited.

I asked Mr. Houghton then what about the pay gallons and he explained them to me. He stated either at that time or went into a greater detail at a later time that the reason that the heavy gallonage went into the consumer column on Respondent's Exhibit 101 as well as in Commission's Exhibit 119, which is the company form 189, that the reason that the larger proportion of the commission was in that column was in view of the fact that the gallonage talked about, and which column was comparatively more in the Detroit field, was because consumer customers, for the most part, were at quite a distance from the bulk plant, and that the B-Station agents were entitled to a greater compensation because of the 7278 fact that it costs more money to deliver to this class of trade—to serve that class of trade than it did to serve reseller stations. Now, that did not mean that some resellers may not be quite a distance from the B-Station plant.

By Mr. Hanley:

Q. Well, do you know?

A. Why, certainly I do not know.

Q. How many, how many bulk plants does respondent have?

A. I do not know.

Q. How many, or do you know how many it is in the Detroit field?

A. Not of my own knowledge. In the records is all of that information. I do not try to remember all of that stuff.

Q. You visited how many?

A. I visited two B-Stations and one A-Station. I walked through an A-Station and I walked through one of the B-Stations. I walked around the other B-Station. The agent did not happen to be there so I just could not go into his little dinky warehouse that he had there.

Q. Is that the experience upon which you based your criticisms of this account?

A. Oh, certainly not.

Q. Very well. How would you paint trucks in respect of allocation of the expense, Mr. Warmack?

A. How would I paint it?

7279 Q. What would you do with the expense of painting the truck?

A. Make an allocation according to your code of account.

Q. No. I am asking you how you would do it as an accountant on one of these trucks. What would you do with your expense item?

A. Charge it to the maintenance of the truck. Does that answer your question, Judge?

Q. No.

A. Do you want me to say I would get a bucket of paint and get out there and paint it?

Mr. Hanley: If your Honor please, I am undertaking to learn what this witness as an accountant would do with an item of expense extending to painting one of these trucks. I am sorry.

The Witness: I stated that I would charge that expense to the maintenance of that truck. Now the attorney says I did not answer his question.

Trial Examiner Ballinger: Would you put a separate expense account in connection with each truck?

The Witness: Oh, I do not know that that is necessary. It depends upon the refinement that the company wants. I would not do it myself.

Trial Examiner Ballinger: That is what the Judge evidently desires to know.

The Witness: I would not do it. I do not see any 7280 great benefit to be obtained by that, if you want that greater refinement you can keep it, and you could actually keep it by parts of the truck.

By Mr. Hanley:

Q. Is that part of account 055 or not, Mr. Warmack? That is the account we are discussing now.

(There was a short pause.)

Mr. Hanley: While he is looking at that, Judge, may we have a two or three minute recess?

Trial Examiner Ballinger: We will take a two or three minute recess.

(A short recess was taken.)

The Witness: It is my understanding that the painting of trucks, that means truck chassis owned by the B-Station agent are borne by that agent, and he would paint both, as such, but that the paint on the tank on that truck, which is owned by the Respondent company, that cost, in my opinion, would appear in account 055 entitled "Vehicle Tank Expense—Other Than Mounted on Company Chassis."

By Mr. Hanley:

Q. Now, I am asking you how you would allocate that

A. The painting of the truck?

Q. Yes.

A. I would put it all in to that account.

Q. Yes, but you have been criticizing the method of allocation.

7281 I am asking you now, Mr. Warmack, how in your judgment as an accountant it should be allocated.

A. In my judgment as an accountant it should be allocated according to the way that the truck rental expense should be allocated. And that, in my opinion, in turn should be allocated on the basis of effort in connection with the use in which the truck is put.

Q. Mr. Warmack, in your sojourn in Detroit and in Chicago, did you request of Mr. Houghton, or any one else representing the Respondent company, information as to the use of mileage applicable to these trucks as a factor for the purposes of allocation of expense?

A. I did.

Q. That is your criticism now? Is it not?

A. That I did not request it?

Q. No, no. That the allocation is made on a gallonage basis rather than on a mileage basis or effort basis. Is that not the gist of your criticism?

A. Yes, sir. For the purposes of this cost study, I think that the mileage basis would be a more equitable basis. For the purposes of keeping the records ~~of~~ the Respondent company, I would see no objection to the way of keeping that.

Q. However they may be keeping them, did you ask Mr. Houghton, or Mr. Boatwright, or Mr. Gillis, or anybody—or anybody representing the Respondent company, as to the experience of the Respondent company in the 7282 matter of allocating these things on the basis of mileage as distinguished from gallonage?

A. I do not remember requesting any information with respect to that particular point; that is, documentary information. I rather think that probably it was discussed by Mr. Houghton and I. We tried to discuss every one of these accounts, or most of them, and the propriety of the allocations used by the Respondent company in working up its cost differential of 1.51 per gallon—was the matter of discussion.

Q. (Interposing): Mr. Warmack, is that the most definite answer you can give?

A. I think that is a definite and true answer.

Trial Examiner Ballinger: You have no independent recollection of having requested information of him on this?

The Witness: Not with respect to that particular point. We discussed these things appertaining to commisison agents at length.

Trial Examiner Ballinger: You have answered the question.

By Mr. Hanley:

Q. I think a moment ago, Mr. Warmack, when I used the illustration of the maintenance cost of $50.00 on a bulk plant stationary tank that you agreed that that might be properly allocated on a gallonage basis. Am I correct in my recollection about that?

7283 A. That is correct.

Q. Now, would you say salesmen's salaries is a basis for allocating that item?

A. Oh, no.

Q. You would not?

A. No, sir. I would not. I should like to state this, Judge: Your question previously, I believe, was along this line—that if Red Crown Gasoline were placed in this particular tank which we are talking about, and that a portion of that gasoline was dispensed to one customer or class of customers, and a portion dispensed to another customer or class of customers, then should not the cost of maintaining and the depreciation on that tank be allocated, for costing purposes, on the basis of gallonage—that was the question I think.

Q. That is right.

A. And if—to carry that just a little further—different products were stored in that tank and neither of those products are in—to say this—that one of those products were no more harmful to the tank than another product, why, the answer would stand the same.

Q. We are assuming for the purposes of these questions, Mr. Warmack, that there is just one product in the tank.

A. Yes, sir?

Q. Entirely Red Crown Gasoline.

A. Yes, sir.

7284 Q. Which is sold, as I think now, to both reseller customers and consumer customers?

A. Yes, sir. That is correct.

Q. Now, I think you have stated that you would not use salesmen's salaries as the basis for allocating that expense? Would you?

A. I would not.

Q. Would you use cost of delivery to allocate that expense item?

A. I would not.

Q. But you would put the mobile tank on a different basis from the bulk plant tank; that is to say, you would put it on a mileage basis?

A. Yes, sir. I think that that manner of allocation would probably be the most accurate.

You are asking me, Judge Hanley, exactly what I would do without my having the benefit of having made a study —detailed study—of the exact situation. That I have not done. I am giving you answers purely from an accounting standpoint, and generally what I think should be proper and acceptable from the standpoint of sound accounting.

Q. Well, of course, Mr. Warmack, I am asking you in each of these question for your very best judgment as an accountant. I am at a serious disadvantage of being criticized by you as an accountant, when you say that you have not made a study and do not know about these
7285 things. Things, the handling of such you are assuming to criticize.

Now, you have in this particular account 055 recommended a change as being more proper a method of accounting. I want you to tell the Court, if you will, just briefly and in a summarized way, exactly what that change is, and what your reasons for it are. I refer you to the change you have recommended.

A. I stated that for this record two or three times already this morning. Do you want it again? I will be glad to try to give it again.

Trial Examiner Ballinger: Judge, is that not repetitious?

Mr. Hanley: I do not know. Maybe it is, Judge. If you think it is, I will withdraw the question.

Trial Examiner Ballinger: It is the recollection of the Examiner that you covered these same grounds.

Mr. Hanley: Very well.

By Mr. Hanley:

Q. Would you say the combination of salesmen's salaries and cost of delivery to allocate the expense item of $50 to the bulk plant tank would be proper?

A. Well, I do not know. I can only establish that as to exactly what I would do as a result of a study. If I were trying to so study it to prove the cost of a cost justification or to determine a cost differential, I
7286 would not allocate it on any basis at all until I had made a thorough study and analysis.

Q. Does the commission employee often deliver to both reseller outlets and to a consumer on the same trip and out of the same tank load?

A. I could not answer that of my own knowledge. It is my understanding that occasionally that is done.

Q. Now, as I understand you, Mr. Warmack, you are prepared to say and have said that you would allocate the stationary tank at the bulk plant on a gallonage basis as between the reseller and the consumer channels of distribution. Am I right, thus far?

A. That is correct. And that assumes, of course, that those are the only two classes of consumers served out of that tank.

Q. Yes.

A. Yes.

Q. I understand further that you criticized the use of the same allocation method in respect of the expense incident to mobile tanks out of which tanks both reseller and consumer customers are served? Am I right thus far?

A. Yes, sir. You are correct. I think that that class of expense should follow the depreciation of the vehicle itself.

Q. And I understand further that you have made no study of this in respect of that matter, but that you are just criticizing it nonetheless? Is that true?

7287 A. I have made a review and study of the records in this case. I have not made a study of the underlying data on these matters in the Respondent company's offices.

Q. I understand further that you have made no request of the Respondent company relative to any information the Respondent might have as to the propriety from an accounting standpoint of allocating the expense to these mobile tanks on a mileage basis?

A. I do not remember having requested that kind of information while I was in Detroit. That was primarily due to the fact—

Q. (Interposing): You have answered the question.

Trial Examiner Ballinger: You have answered the question.

The Witness: Well, I am entitled to state why.

Trial Examiner Ballinger: There is no explanation necessary. You have explained that once or twice previously.

The Witness: That is correct; but, it leaves the record blank if I cannot explain.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. May I now direct your attention to account 106, please, Mr. Warmack?

7288 A. Yes.

Q. This has to do with the depreciation expense —of vehicles, trucks, motor and horsedrawn.

You have testified in substance that that portion of account 106 which is applicable to equipment such as vehicle tanks on commission agent chassis should be separated between channels on Respondent's Exhibit 101 in exactly the same manner as prescribed for truck driver expense, namely, account 025.

Is that your present opinion?

A. I do not quite follow it. May I hear it, please?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: Yes, sir. That is my opinion. Will you please give me the page in the record that you refer to, Judge Hanley?

By Mr. Hanley:

Q. 6183.

A. Thank you.

Q. Have you found the reference, Mr. Warmack?

A. Yes, sir.

Q. Is that your testimony?

A. Yes, sir.

Q. Now, without going into great detail, Mr. Warmack, is your testimony already given in connection with

7289 accounts 025 and 055 applicable to this account 106?

I am just skipping a lot of questions here if you agree that it is the same.

A. Yes, sir. It is the same. I think there is one point that should be brought out in connection with these, Judge Hanley, if you do not mind.

Q. Very well.

A. In all of these things, the refinement required, in my opinion, in determining a cost differential, will be governed to some extent by the amount of the money involved in these separate things. It is never my intention as an accountant to go to limitless ends in the separation of a small account that would just not make any difference anyway as to which allocation was made of it.

Q. Mr. Warmack, have you any knowledge as to how many of these truck tanks the Respondent company has and uses in its operations?

A. No, sir. I do not have any knowledge of that, Judge Hanley, as to my own knowledge.

Q. Well, the fact is—and you may assume it for the purpose of this question—that there are well over six thousand of such tanks.

Now, in your judgment as an accountant, in order to keep the books on the suggested theory that you have advanced, tell the Court what would be involved in the way of additional accounting work.

7290 A. In the first place, I do not subscribed to that as such; that is, keeping the books in great detail.

In the second place, I think that if the record were kept showing all of the tanks of Respondent company which are loaned to B-Station agents, that would be one record, and all of the tanks used by the company otherwise—speaking of tanks on trucks or truck chassis—that would not involve in my opinion a great deal of records to have such information, to keep count of the depreciation on those trucks. The greatest thing that would be involved would be where there would be switches from an A-Station to a B-Station and vice versa. And if it were desired to keep information, that information, it would not be so difficult. I rather think that you have certain information of that kind already in your Detroit office.

Q. Are those tanks interchangeable, or these trucks?

A. Do you mean—may I inquire—do you mean, can they be used by the A-Station and then by the B-Station?

Q. I mean mechanically, Mr. Warmack. Can you take one of these tanks off of truck "X" and put it on truck "Y," just indiscriminately?

A. Well, it is my understanding that some changes are going on. For instance, a tank may become damaged and have to be taken off for repairs, and then another tank will have to be supplied immediately, and that 7291 this tank may not be returned to the truck chassis from whence it came.

Q. I think you are right in individual instances, Mr. Warmack. But, I am addressing my question to these six thousand plus tanks in operation by the Respondent company. Are those tanks interchangeable?

A. The only way I know I can answer your question is by the way I answered you.

Trial Examiner Ballinger: Can they be removed from one truck and placed in another truck?

The Witness: Yes, sir. I said they could be and that—

Trial Examiner Ballinger: (Interposing): Without change or alteration?

The Witness: Well, it is my understanding that when they are taken off, why, they are serviced before they go on another truck. But I do not know whether that is true in every instance.

Trial Examiner Ballinger: As a matter of fact, you do not have any personal knowledge in reference to the matter? Have you any, Mr. Warmack?

The Witness: No, sir. I just know what I talked about with employees of the company.

Trial Examiner Ballinger: Did any employee of the company ever tell you that they were interchangeable?
7292

The Witness: No, in using that term; no sir. The situation that I just told you about I have discussed that, and I certainly know I discussed that with Mr. Houghton and that is why it came into my mind as a true situation.

By Mr. Hanley:

Q. Just supposing that they are interchangeable or could be made interchangeable by the machine shop job, Mr. Warmack. If one were shifted from a salaried driver truck to a commission employee truck, it would follow, under your suggested method of accounting, that there should immediately be a new type of allocation of expense followed in the use of that tank? Is that not true? Notwithstanding it continues to serve customers in the reseller channel?

A. That certainly is not my opinion.

Q. What is your opinion about that?

A. I have—

Q. (Interposing): Supposing that one of these tanks is shifted from a salaried driver's truck to a commission employee truck.

A. What is my opinion about that?

Q. Yes.

A. I have no quarrel whatever with the way that the company keeps its records.

Trial Examiner Ballinger: Now, for the purpose of determining a cost study, what is your opinion? That is what we are discussing.

7293 The Witness: For the purpose of a cost study, it would be necessary to determine what the depreciation on the two classes of equipment, or reasonably determine that, especially if the department did what in my opinion it should do—make a study to determine the cost of certain customers served by B-Station agents as compared with the cost of serving customers through A-Stations. I believe that answers the question.

By Mr. Hanley:

Q. I am not sure that it does. Is it not the sense of it, then, that if it were done by the Respondent company, namely, shifting of one of these tanks is made from one salaried driver's use to commission employee's use, under your suggested method of accounting a different allocation system would have to be used? Now, it does seem to me that you can answer that "yes" or "no" without any explanation.

A. Well, it takes—

Trial Examiner Ballinger: (Interposing): Can you not answer that question "yes" or "no"?

The Witness: No, sir. Not without an explanation.

Trial Examiner Ballinger: Answer it "yes" or "no." It is capable of a "yes" or "no" answer. And then if you desire to explain it you may explain it.

The Witness: I will try.

7294 Trial Examiner Ballinger: Read the question to the witness.

(The reporter read the question as follows:

"Q. I am not sure that it does. Is it not the sense of it, then, that if it were done by the Respondent company, namely, shifting of one of these tanks is made from one salaried driver's use to commission employee's use, under your suggested method of accounting a different allocation system would have to be used? Now, it does seem to me that you can answer that 'yes' or 'no' without any explanation.")

The Witness: No, sir. It would not. And—

Trial Examiner Ballinger: Now you may explain.

The Witness: And the reason that it would not have to be used is this, I think that the method of allocating this class of expense in other instances for the purposes of determining a cost differential—I have no argument about the way the company keeps its books—but for the purpose of determining a cost differential, I think the maintenance and depreciation of this class of property should be—in the absence of a cost study which will show otherwise—follow the depreciation of the truck chassis for that class of expense.

Trial Examiner Ballinger: Would you follow the depreciation from time to time, or up to the time of the

7295 shift, and from that time on?

The Witness: It should be on the same basis, I think, Judge, unless you can study it to determine that it should be on some other basis. Therefore, by the study you might show that the shift should be made or that a shift should not be made. If the study should show that the shift should not be made, then it should not be made.

Trial Examiner Ballinger: How could your study be made without some actual experimentation?

The Witness: It could not be.

Mr. Austin: I would like to call your Honor's attention to the fact that no deduction was made for that from the Respondent company's figures with regard to that account, which is one of the accounts included in Commission's Exhibit 133.

Mr. Hanley: That is one which bears the asterisk too, is it not, Mr. Austin?

Mr. Austin: No. It does not.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

(Witness temporarily excused.)

Mr. Hanley: I move, if your Honor please, that we adjourn until two o'clock, p. m. I have a pressing matter which I would like to attend to during the interim.

7296 Trial Examiner Ballinger: The motion is granted.

And now, at 11:40 a. m., the hearing stands in recess until 2:00 o'clock, p. m.

(Whereupon, at 11:40 a. m., a recess was taken until 2:00 p. m., this day.)

7297 Afternoon Session.

2:00 p. m.

Trial Examiner Ballinger: Come to order. You may proceed. Mr. Warmack, will you resume the stand?

WILLIAM J. WARMACK resumed the stand and testified further as follows:

Cross-Examination (Continued).

By Mr. Hanley:

Q. Mr. Warmack, what is your understanding of the functions and duties and activities of the real estate and tax department in the Detroit office of the Respondent company?

A. I would have to refer to my notes, Judge Hanley.

Q. Please do so.

A. (The witness examines his papers.)

The Witness: It is my understanding that the real estate and tax department is concerned with that particular class of work in the Detroit field, Judge Hanley. The salaries of the people in account 215—

By Mr. Hanley:

Q. Interposing.) Well, is it your understanding, Mr. Warmack, that the real estate people, as designated in this account, do the work of leasing stations?

A. Oh, I do not know about what the person or persons in the Detroit office actually have to do with leasing
7298 of service stations.

Q. Is it not a fact that the marketing department undertakes that chore of finding lessees, and actually making the leases, and does the work and bears the expense?

A. Yes, sir. That is my understanding.

Q. So that the real estate department has nothing to do with the cost wherever it goes?

A. Of course, I do not think that they do, I think that they are concerned primarily with matters of real estate that may come into the picture in connection with some of these, but I do not know just who in the real estate office; that is, what persons have to do with the making of the leases or the finding of the lessees.

Q. Are you sufficiently familiar with the operations of the company to know that that activity is purely a marketing activity?

A. You say "that activity"; do you mean the finding of the lessee?

Q. I mean the finding of the lessee and the making of the deal with him, of the arrangements, the negotiations, the signing of the lease, the handling of the servicing of that lease.

A. It is my understanding that it is so regarded by the company.

Q. So that that is not in your concept a part of the 7299 duties of the real estate department?

A. Well, indeed I do not know. I did not make a thorough study as to what every man was engaged in in the Detroit field. I could not know unless I did make that review. I think these records show that information maybe several times.

Q. Well, Mr. Warmack, I am just asking you: Is it your understanding that that is not a function of the real estate department, but rather a function of the marketing department?

A. The marketing department represented by which account? We are talking about account 215, as I understand it. Now, the marketing department, as I understand it, is regarded by the company as embracing every account in form 189, including 215.

Q. That is true; and that is particular designated as the real estate department; and they have certain things to do.

A. Yes, sir.

Q. What I am asking you, Mr. Warmack, is: If you have made a sufficient observation of the operations of the company, so that you know whether or not it is a fact that the real estate department does not undertake the task of finding lessees, negotiate with them—

A. (Interposing): I—

Q. —and making the actual lease with them?

7300. A. I do not know of my own knowledge. The only knowledge I have on that score is what is in these records, Judge Hanley. (The witness indicates certain records.)

Trial Examiner Ballinger: What do the records show?

The Witness: These two Respondent's Exhibits do not give the exact detail of what the employees in the real estate and tax department do.

Trial Examiner Ballinger: What exhibits do you refer to, and what pages?

The Witness: Respondent's Exhibit 99, page 25. Respondent's Exhibit 100 page 109. But if we can find it in the record I believe that Mr. Boatwright's testimony went into that very point very materially.

Trial Examiner Ballinger: What was it in substance?

The Witness: Well, Judge, I will have to look it up. I cannot keep all of this stuff in my head.

Trial Examiner Ballinger: What is your recollection? Do you not recall?

The Witness: No, sir. I understand those two departments, real estate and tax departments, are concerned with real estate activities of the company.

The tax department is concerned with the taxes to be paid by the company. And all things along that line. Now, just the exact function, just what else they do, I do not know that, I am sure. These records I think are
7301 replete with it.

Mr. Hanley: If your Honor please, I do not think the matter is of great importance. The fact is, and I hoped he might be able to clear it up, that the actual leasing of a station is regarded as a marketing function, and not a matter for the real estate and tax department.

By Mr. Hanley:

Q. I am not sure whether you can subscribe to that or not, from your own knowledge, Mr. Warnack.

A. That was my understanding—of—

Q. (Interposing): If you can, all right.

A. —that situation, to make it really clear in my mind; I should be happy to have the record show, if possible, just what account covers these particular expenses.

Q. Well, is the answer that you just do not know?

A. Not right off. No, sir. I think we can find it in the record.

Q. Now will you please look at page 6775 of the record in this case, Mr. Warmack?

A. Yes, sir.

(The witness examined the record.)

Q. Have you found the reference, Mr. Warmack?

A. Yes, sir. I am on page 6775 of the record.

Q. During the morning you have criticized the methods used by the respondent in allocating expense in account 055.

7302 I now call your attention to page 6775 of the record, and your testimony in which you gave the following answer in part:

"I do not object to the allocation made between channels on Respondent's Exhibit 101 if it is to be used, and if those figures stand in determining the cost differential, they would not influence any change on the cost differential."

That refers to this particular account 055?

A. Yes, sir.

Q. I will now ask you if you rely upon that answer on page 6775, or whether you still are of the view that there is an impropriety of accounting—

A. Of course—

Q. —in the method used by the Respondent in its allocation under account 055?

A. I refer the Respondent's attorney to further statement made by me on page 6777 where that statement is corrected, and the correction was made:

"I am sorry that I overlooked that for a second. That is a correction. I stand corrected on the previous statement."

Q. I find that statement, Mr. Warmack.

Will you please tell me what it means? As I understand it, you had made some calculations and I think that is

7303 what your statement on page 6777 refers to. Am I in error about that?

A. I think it is perfectly clear what the statement on 6777 refers to.

Q. Well, now, will you please read the whole page 6777 and see if I am not right that the statement that you referred to has to do with certain calculations that you made, Mr. Warmack?

A. (The witness examines the document.)

Q. Take your time, whatever you need.

A. (The witness examines the document.)

The Witness: This statement has to do with calculations. And the calculations as given were a correction of the statement given on page 6775. I think that was fully understood at that time.

By Mr. Hanley:

Q. That is what I want to clari[illegible]

A. Yes, sir.

Q. Do you wish now, Mr. Warmack, to make any clarifications or change of this statement; I refer to the one on page 6775:

"I do not object to the allocation made between channels on Respondent's Exhibit 101 if it is to be used and if those figures stand in determining the cost differential they would not influence any change on the cost differential."

A. Well, it was my understanding that that was fully corrected on page 6777 and if it was, I will be
7304 glad to have my statement appearing on page 6777 be inserted in the record at this point.

Trial Examiner Ballinger: Counsel has afforded you an opportunity to offer an explanation.

The Witness: Well, it is wholly repetitious, your Honor, but I will be glad to put it in again.

Trial Examiner Ballinger: Whatever you desire.

The Witness: It is my opinion that the figures appearing in account 055 entitled "Vehicle Tank Expense—Other Than Mounted on Company Chassis"—should follow the allocation made—or the allocation that is, that I have stated in my opinion should be made for account 025 entitled "Truck Expense—Truck Rental Expense." That was my statement on page 6777, and it is my opinion.

When I stated that I "stand corrected on the previous statement," that is the statement made by me on page 6775, which was just quoted by Respondent's counsel.

By Mr. Hanley:

Q. Is it to be understood now that you have changed your statement on page 6775 by the statement which you have just now made, Mr. Warmack?

A. The answer is—yes. It was modified on page 6777, and as I restated it again here, that statement is modified.

Q. Very well. Now, please refer to account 400—Bad Debts.

7305 A. Ye[illegible]ir.

Q. I refer you to page 6807 of the record, Mr. Warmack.

A. (The witness examines the papers.)

Q. Tell me when you have found that place.

A. Yes sir. I have found the page.

Q. As I understand it, you said in substance, referring to account 400—Bad Debts Collected:

"This is a credit account as shown on Respondent's Exhibit 101, and in my opinion it has no place in the exhibit. In my opinion the account would not influence in any way or was not by the operations of the company in the year 1940."

Referring you to page 6809 of the record, you continue in your discussion of this account by saying:

"It is my opinion that expense incurred during 1940 in connection with the collection of bad debts for prior year is not an expense which can be used for the determination of a cost differential."

Did you so testify?

A. In substance, yes, sir.

Q. In the year 1940, the income from bad debts previously written off was greater than the expenses of collecting bad debts incurred in prior years? Was it not?

A. Yes, sir.

Q. Is it not true that the net influence upon the
differential of eliminating these two items would
7306 increase slightly the differential?

A. Just to make it clear, Judge Hanley, you are speaking of eliminating account 400, and eliminating account 512—yes, sir, it would slightly increase the differential. Did I not state that in my testimony?

Q. Well, Mr. Warmack, I would like to understand your theory of accounting wherein you think it necessary to eliminate these accounts in reference to the justification of the cost differential. Will you just please explain?

A. Well, transactions having to do with years other than 1940, I do not see how they have any influence on establishing a cost differential for the year 1940. That is the premise on which I approached it.

Q. Well, these things happened in 1940? Did they not, Mr. Warmack—

A. (Interposing): It is my understanding—

Q. —and what would you do with them as an accountant?

A. It is my understanding that these represented a transaction for prior years. In the case of account 400, bad debts collected written off pri~~or years for the field~~ in the amount of $5,481.45, the company was fortunate in being able to collect the expense that for some prior

year or prior years prior to 1940 had been received during 1940. I just questioned because I cannot understand how that can have any bearing on the selling cost
7307 of gasoline in 1940.

Q. Well, it happened in 1940, Mr. Warmack? Is that true?

A. You happened to collect the bad debt in 1940. Now, if you collected it in 1942—I do not follow that kind of reasoning. I think—

Q. (Interposing): Will you please just answer the question: It happened in 1940? Did it not?

A. Yes, sir.

Q. Now, what would you do with it as an accountant?

A. Well, from an accounting standpoint, it could be handled in two or three different ways. Your company elects to throw it right into current income—or expense. I do not agree with that. It could be handled through a reserve account which would be a charge to operations giving effect to the proportions of this class of expense which would be applicable to a current year. When this was received, why, naturally it would be handled through a reserve account. As an alternative to that from the standpoint of accounting, many companies credit this to surplus. That is not an unusual thing to do.

Q. Do you object to the handling of it and the treatment of it to any such manner as will reduce the current marketing cost for the current year?

A. Frankly, I do not have any great deal of objection to it. It is a trifling amount. It would not amount to very much from the standpoint of the amount
7308 of all of the expenses incurred in this statement.
If that were the only objection we had to this, I would not care how you did it.

Q. Will you answer the question?

A. I answered the question.

Trial Examiner Ballinger: Read the question.

The Witness: Does that not cover it?

Trial Examiner Ballinger: Read the question.

(The reporter read the question as follows:

"Q. Do you object to the handling of it and the treatment of it to any such manner as will reduce the current marketing cost for the current year?")

By Mr. Hanley:

Q. For the year 1940?

A. Yes, sir. Yes, sir. I do not see how you could apply it to 1940. I know if it were taken out of here it would increase slightly—and when I say slightly, it is very slightly—the differential not above 1.51; but somewhere along the line 1.51 plus several ciphers, it would be increased slightly.

Q. The fact is that it would, as it was treated by the Respondent, have the effect of reducing the cost differential? Is that not so?

A. Not the cost differential of 1.51. But if that cost differential were to go to, say, 1.5111119, why, it might reduce it to the last figure of 18.

7309 Q. I am not talking about the amount, but about the principle involved. The fact is that it was treated as it was by the Respondent has the effect of reducing the cost differential. Does it not do that, Mr. Warmack?

A. Oh, surely. If it is carried out far enough, why, you could absolutely identify it. To me, that is like splitting gnat bristles.

Trial Examiner Ballinger: You may strike the last sentence of the witness on the record—not physically, of course.

By Mr. Hanley:

Q. In the year 1940, Mr. Warmack, what is the fact as to whether or not the income from bad debts previously written off was greater than expenses of collecting bad debts incurred in prior years?

The Witness: May I hear the question?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: May I inquire, Mr. Hanley, do you mean for the entire Detroit field—tank wagon reseller?

By Mr. Hanley:

Q. No, I mean for the Detroit field, just what the account shows.

A. Yes, sir?

7310 Trial Examiner Ballinger: The answer is "yes"; is that correct?

The Witness: I lost it. I thought he said what was the extent of it.

By Mr. Hanley:

Q. You asked me what area—I said the Detroit field—Mr. Warmack.

A. Well, the amounts shown are bad debts collected written off prior years it was $5,481.45. The expense $835.35. The excess of the bads debts collected over the expense of prior years is approximately $4,645.00. Does that answer your question?

Q. I do not know. Do you think so, Mr. Warmack?

A. Well, I have just forgotten what the question was.

Mr. Hanley: Will you read the question, please? And make sure that the witness is satisfied with his answer.

Trial Examiner Ballinger: Read the question.

Mr. Austin: He did not ask for amounts at all.

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

(The reporter read the question again as follows:

"Q. In the year 1940, Mr. Warmack, what is the 7311 fact as to whether or not the income from bad debts previously written off was greater than expenses of collecting bad debts incurred in prior years?")

The Witness: Yes, sir. The fact is that the company collected an amount of bad debts above the cost of what was incurred in collecting them.

By Mr. Hanley:

Q. Is it not the fact that the net influence of that upon the differential is to increase—

Mr. Hanley: Strike that.

Trial Examiner Ballinger: Question withdrawn. Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: We will take a five minute recess.

(A short recess was taken.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: I will restate the question.

By Mr. Hanley:

Q. Is it not a fact that that inclusion of an account so far as its influence upon the differential is concerned, is to decrease the marketing cost of reseller gallons for the year 1940?

A. Yes, sir. That is true. But that would not be ap-
plicable to those figures that I just gave. The figures
7312 in the 400 account in the year 1940 applicable to
tank wagon reseller, $705.37, the $705.37 is a portion
of $5,400.00 plus, which is stated in the cost of collecting
of bad debts written off in prior years in account 512 shown
in tank wagon reseller of $262.44 as a portion of the
$835.00 for the total.

Q. Well, now, do you have any complaint, Mr. Warmack, as an accountant, with the handling of the collection of those bad debts for the year 1940 as they were handled by the Respondent company?

A. For the purpose of establishing a cost differential, I do not think that they have any place in there.

Q. Even though they have an effect of reducing the cost differential?

A. Judge Hanley, I do not care whether they have the effect of increasing or reducing it, we are after facts here, as near as we can get them.

Q. Whatever you say as to whether or not the expense items entered in these accounts by the Respondent for the year 1940 should represent and are representative of the same types of costs for other years?

A. Oh, I do not know. You are speaking of account 400 and account 512?

Q. Yes.

A. I certainly do not know.

Q. Well, did you check them?

7313 A. For prior years other than that year?

Q. Any years.

A. No.

Q. Did you check them for 1940?

A. I do not think I went into that matter. If I may review just a moment, your Honor.

Trial Examiner Ballinger: Yes.

(The witness examines papers.)

The Witness: With respect to account 400, I said at page 6808 of the record, "Answering question No. 3," which inquires as to the extent that I studied the account, "I have not made any detailed study or analysis of this account."

Trial Examiner Ballinger: Why did you use the word "detailed"? Did you make a study of it?

The Witness: I looked over what is in these records, Judge. I did not look over anything further than that.

In connection with account 512, I said:

"This account has not been studied except in connection with my study of credit card costs as set forth in my answers to questions in connection with account 208."

By Mr. Hanley:

Q. Very well. Irrespective of your study or lack of it in connection with these two accounts, please answer this
as an accountant: Would such items as these ap-
7314 pearing here ever be a charge against current sales
even though they are or may be a normally expected
income and take off these accounts X-dollars of sale?

A. Some accountants think so. I do not know. I think that each case would stand on its own.

Q. What do you think?

A. I do not lean toward the idea of mingling other years, past years, other years in with the present year, as an accountant, I think each one should stand alone. That is my opinion on this, Judge Hanley.

Q. Mr. Warmack, if you had a bad debt incurred in 1938 or 1939 and you were able to collect it in 1940—

Mr. Austin: May we be off the record?

Trial Examiner Ballinger: Off the record..

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Were you referring to having these accounts written off in 1938 or 1939, Judge Hanley?

Mr. Hanley: Perhaps it would be better to revise that question.

Trial Examiner Ballinger: The question is withdrawn.

By Mr. Hanley:

Q. Supposing you had accounts which result in bad debts and become known as such in 1938 or 1939 and they
are written off as such. And then by effort or by good
7315 fortune they are collected in 1940. And suppose that
in 1940 you sell goods to people who do not pay. They
are written off as bad debts, but subsequently they are collected in 1941 or 1942.

Now, Mr. Warmack, as an accountant, what are you going to do with those collections?

A. In the first place, you do not handle them correctly. That is the whole confusion that is in this record here. They should have been made provision for all bad debt losses in the year in which they were incurred. Inasmuch as your company did not do it and did not elect to do it that way, we have this confusion. I have not calculated the exact figure there, because I have no quarrel with the way they elected to keep these records, but that is the business of handling this account, or the way that it is handled by your company.

Frankly, I do not think that is the best way of handling this account. In other words that is what we call in accounting the cash receipts and disbursements method, so to speak. You get the money and you pay out the money, it is cash receipts and disbursements.

Q. Well, I have asked you, Mr. Warmack, to tell me what you would do with it. You have not answered that yet.

~~A. I have~~ stated two or three times.

Mr. Austin: Your Honor, I have hesitated to make objections to this line of questioning because I have not been clear in my own mind yet as to how far it was
7316 relevant and how far it was not. It seems to me that it applies largely to the general accounting of the company, of accounts of profits and losses of the accounts in question rather than the use of those expenses in a cost differential in this case. Now it seems to me that we are going far, very far afield when we discuss general principles of accounting except as they apply particularly to this cost study. I do not object to questions as to what he would do with this expense in preparing a cost study for the purpose of showing a cost differential in the year 1940.

I do not think we should get too far away from what we are driving at here.

Trial Examiner Ballinger: Counsel for the Respondent has been endeavoring to ascertain that from the witness for some time.

The Witness: I told him at least five times, I think, what I would do with it.

Trial Examiner Ballinger: I confess the Examiner does not understand what will become of it.

The Witness: I will be glad to state it again.

By Mr. Hanley:

Q. Mr. Warmack, you have not told me yet, and I will ask you specifically this question: Assume that the Standard Oil Company (Indiana) sold gasoline to customer "X" in 1938, and failed to collect the bill.

7317 Assume that in 1940, the Standard Oil Company (Indiana) was able to collect that bill or some part of it. Assume that it realized a certain amount of cash in 1940 for goods sold to that customer "X" in 1938.

Now, as an accountant, what would you do with that realization of cash in 1940?

A. Put it in the bank.

Trial Examiner Ballinger: That does not answer the question.

The Witness: Yes, I can trace this and tell him how to handle bad debts.

Trial Examiner Ballinger: One moment. It is a very simple question. Now, you would certainly make some disposition of it in your account?

The Witness: Yes, sir.

Trial Examiner Ballinger: Now, where would you put it?

The Witness: I would put it to surplus if I had no other place to credit it.

By Mr. Hanley:

Q. If you had no other place to credit it. Suppose you had the reseller channel dealing with the cost of handling identically the same kind of gasoline or identically that same type of general product?

A. Well, I would not put it there.

7318 Q. Why not?

A. Because it would not be the proper place to put it.

Q. Please. Why?

A. You are handling costs in that column. That is the reason. I will be glad to tell you again the plan or the two or three plans of handling bad debts.

Q. Well, you say you would not put it there, Mr. Warmack. Now, in 1938, when it was sold through that channel and lost, and charged off, in your judgment as an accountant, would it have been proper in 1938 to have charged it as a cost to doing business through that channel?

A. I lean to the feeling of regarding all bad debts as a cost, but I will call your attention to the fact that some very, very learned accountants have leaned to the feeling that it is not cost at all, it is reduction from sales.

Q. I am just asking one learned accountant his opinion, would you charge it as a cost in 1938?

A. I would, yes, sir.

Q. Now, if it is collected in 1940, do you regard it as improper accounting to reduce the cost in that year by the recovery of that amount which you formerly charged off in 1938 as a cost against that channel?

A. I regard it as an improper accounting operation, yes, sir. And, your Honor, I did not fully explain my answer with respect to that previous question. If I may I would like to.

7319 Trial Examiner Ballinger: What previous question do you refer to?

Mr. Hanley: Judge, I do not know that there is any occasion for an explanation. If the witness cares to talk to his counsel or anything of that sort, I am perfectly agreeable to that and for that purpose, I propose that we may have a recess.

The Witness: I just wanted to turn back, your Honor, and outline how I would handle bad debts from an accounting standpoint.

Trial Examiner Ballinger: That is not necessary at this point. If counsel for the Commission desires to ask you any question with reference to it, he may do so on redirect examination.

Mr. Hanley: May we have a five minute recess?

Trial Examiner Ballinger: We will take a five minute recess.

(A short recess was taken.)

Trial Examiner Ballinger: Come to order. You may proceed.

By Mr. Hanley:

Q. Mr. Warmack, directing your attention—directing your attention to account 200 on Respondent's Exhibit 101 entitled "Office Expense—Salaries—Accounting" you have testified as follows:

7320 "In my opinion credit card costs cannot be used in determining a cost differential between tank wagon reseller business and jobber, naphtha and gasoline business."

If you care to check on that, the reference is page 6795 of the record, Mr. Warmack.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. Have you found that reference?

A. Yes, sir.

Q. Is that your testimoy?

A. Yes, sir.

Q. In respect to account 201, office expense—stationery and office supplies, you have testified as follows:

"A considerable portion of this expense is incurred in connection with the handling of credit cards, and in my opinion credit card expense cannot be used in determining a cost differential."

A. What is the page?

Q. That reference is at page 6797 of the record in this case, Mr. Warmack.

A. Yes, sir. I see it.

(The witness read the document.)

7321 Q. Is it not true, Mr. Warmack, that you made suggestions similar to that and gave similar testimony in connection with account 206 having to do with office expense—light, fuel, water, etc.; account 208 having to do with credit information; account 510 having to do with losses by bad debts; account 511 having to do with expense of collecting bad debts; with account 202, which you have there, account 204, I believe that was the one here; account 066, this account is shown on this page here. I cannot accurately specify pages in respect of each of those, but I assume you know whether or not I am right in my assumption?

A. That is my feeling with respect to all of the accounts which have to do with credit card business.

The Witness: The reporter may read me those various numbers and I will check them.

Trial Examiner Ballinger: The reporter will read the numbers one by one.

The Reporter: Account 206.

The Witness: Account 206. I do not find account 206 in credit card costs. Account 200 is here.

The Reporter: Account 510.

The Witness: That is here.

The Reporter: Account 511.

The Witness: That ~~is here~~.

7322 Mr. Austin: What exhibit is that?

The Witness: Commission's Exhibit 132.

The Reporter: Account 202.

The Witness: 202? I have that.

The Reporter: Account 204.

The Witness: 204. Yes, sir.

The Reporter: Account 066.

The Witness: 066. Yes, sir.

The Reporter: Account 201.

The Witness: 201—yes, sir.

The Reporter: Account 200.

The Witness: 200. I have that.

By Mr. Hanley:

Q. Referring you directly to account 206, which you say you did not testify about, I ask you if account 206 being office expense—all other—water, light, fuel, rent, and so forth, did not or does not have an influence on credit cards?

Mr. Austin: Is that not stated backwards?

Mr. Hanley: I believe it is clear either way.

The Witness: May I review that, your Honor?

Trial Examiner Ballinger: You may.

(The witness examines documents.)

Trial Examiner Ballinger: Read the pending question.

(The reporter read the question.)

7323 Mr. Hanley: May we be off the record?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Read the question to the witness.

(The reporter read the question.)

The Witness: I will have to hear it again, if you do not mind.

Trial Examiner Ballinger: Read it again.

(The reporter again read the question.)

The Witness: It may be, Judge Hanley, but whatever costs that may be incurred in that class of expense in connection with credit cards would not be, or rather, was not taken up by Mr. Houghton and I when we went over to determine what the credit card expense was in the Detroit field. We did not make a study that could be said to be the most thorough study. We made the best study that we could in view of the time that we had at our disposal.

By Mr. Hanley:

Q. Mr. Warmack, I will ask you if you will please not undertake to speak for those in respect of the study beyond yourself, that was made in connection with credit cards. First, is not a clear study of the credit card situation set forth in Respondent's Exhibit 100?

A. I do not think that that is set forth in one place as such, Judge Hanley.

7324 Q. Irrespective of whether it is in one place or not, will you please answer the question as to whether or not there is a clear exposition of the credit card situation set forth in Respondent's Exhibit 100?

A. In my opinion, there is none.

Q. Are we to understand that you and Mr. Houghton jointly undertook the study of the credit card situation?

A. Well, undertook the study, I undertook the study and Mr. Houghton was there and assisted me as far as was possible to do so.

Q. Do you care to go any further than to say that, Mr. Warmack, that he answered the questions that you asked him?

A. Oh, yes, he helped me to make calculations, and he helped me to run the vouchers and do everything that he could to try to expedite the work that we were engaged on in Detroit.

Q. Are you prepared to go any further than that on the record with regard to respondent's account 206? Did you study that account in connection with credit card matters?

A. I do not believe that we did, Judge Hanley.

Q. I refer you to page 6799 of the record at which point you testified concerning account 206. You may refer to it to see if you care to amplify your answer in any degree.

A. That was 6207?

Q. No, no. 6799.

7325 A. What?

Q. 6799, Mr. Warmack.

A. Yes.

(The witness examines the document.)

The Witness: I do not know that that needs any amplification. I said in connection with 206 that the answer to these three questions would be the same as those given for account 205. In account 205, I call attention to the fact that some portion of expense may be applicable to credit cards. That is probably true with account 206, but I do not think we went into that subject of credit cards in connection with account 206. There may be some expense in there—

By Mr. Hanley:

Q. (Interposing): Well, we will go into that now.

Mr. Warmack, please tell the Court what your understanding is of the plan in use by the Respondent company is relative to these credit cards, the use made thereof, the service that the company must render credit card holders, and generally the whole subject of how you think the credit card setup is handled.

Please tell the Court your views on it.

A. I believe that is in the record but I will be glad to try to state it again.

It is my understanding that credit cards are issued to the public at large; that is, persons who when investigated for credit ratings would be established whereby 7326 such holders may receive the benefit of credits on the purchase of gasoline; that is, exercising the privilege of credit in the purchase of their requirements from the tank wagon customers of the Respondent or any reseller customers who sell Standard Oil gasoline or gasoline of various affiliated companies of the Standard Oil Company of Indiana.

It is my understanding that when the customer makes a purchase of the products from these reseller stations, that he has the privilege of signing a slip and that slip is accepted by the Standard Oil Company as though it were cash. In turn the Standard Oil Company undertakes to collect the payment for that purchase directly from the consumer that desired the product.

That is my general understanding of the situation, Judge Hanley.

Q. How does the application for a credit card originate, Mr. Warmack?

A. I rather think that it could originate in several ways, but I do not have any positive information on that.

Q. Well, your best judgment from whatever studies you made?

A. Well, I have not made any studies along that line. It is my understanding that the customer—that is, the automobile driver may ask the company to issue him a credit card and that after due investigation, he either will or will not receive a card.

7327 Q. Does he ask the company or does he ask the service station operator, which?

A. I imagine that he can ask either. I think if I were to write in to your company and ask for a card, after due investigation you would either issue or would not issue me a card.

Q. In your judgment, how do you think most of them arise?

A. I should imagine most of them arise from contacts of the reseller station with the consuming public.

Q. Assuming that such a request is made of a reseller operator, what happens?

A. I assume that an application is prepared whereby certain information is required by the company and is filled out by him, the—

Trial Examiner Ballinger: The applicant?

The Witness: The applicant, and either handed to the operator or the reseller station or mailed directly to the company.

By Mr. Hanley:

Q. What happens then?

A. It is my understanding that the credit investigation is made on that particular applicant.

Q. And then what happens?

A. And then the company either issues the card or does not issue the card. That is my understanding.

7328 Q. Supposing the company does issue the card. What happens then?

A. It is sent to the applicant.

Q. And what happens then?

A. From the standpoint of the company or the applicant?

Q. Both.

A. If the applicant so elects, why, he may buy gasoline. Assuming that he does buy gasoline from the reseller station, he signs a slip for the purchase of that, and it finds its way back to the company's offices. The company in turn sets about the collecting of the payment for the purchase of the holder of the card. That is my understanding.

Q. Do you agree or disagree, Mr. Warmack, that there is an expense to which the company is put in the matter of making the credit investigation first, and secondly in setting up the accounting record on a card if one is issued?

A. Yes, sir.

Q. Do you regard that as a proper marketing cost of gasoline?

A. Yes, sir.

Q. And if you so regard it, where do you think that it has a place, if any, in the accounting procedure of the Respondent company?

A. I certainly do not know. I would assume that the cost of collecting would be charged to collection ac-
7329 count, and the cost of determining credit card information would be charged to a credit information account. There may be many of these costs of collection incurred. They may be charged to several accounts.

Q. But you do believe that it is a proper marketing cost?

A. Yes, sir.

Q. Then, tell me what you mean by this—(counsel opens a record).

The Witness. What is the page?

By Mr. Hanley:

Q. 6797.

A. Thank you.

Q. A considerable portion of this—well I will just read it to you:

"A considerable portion of this expense is incurred in connection with the handling of credit cards and in my opinion credit card expense cannot be used in determining a cost differential."

A. That statement is perfectly clear. I can give you my reasons for it.

Q. Yes?

A. My reasons are that it is wholly and entirely upon the—it is wholly and entirely up to the user or the holder of a credit card as to when, where, and how he elects to

purchase his gasoline requirements or other petroleum
7330 products which he may require in the conduct of his
business and the operation of his automobile. Well, I just do not see how the company can claim a differential. I just do not see how that cost, that marketing cost can be assigned directly or indirectly to a class of customers in determining a cost differential.

For example, supposing I held a credit card of your company. I drive out a street in Detroit, I come to a traffic light. I am allowed maybe to turn left or to the right, but I could not go through—

Q. (Interposing.) Can't you get to the point, please, Mr. Warmack?

A. —that is where I contact a reseller station which is served by one of your jobbers, and I will drive in and buy a tank of gasoline. And I exercise the use of my car. Then again, there is a day when I drive along the same way, and I might happen to get to that street and I drive straight on, and I drive in on to one of your stations which is served directly, and I buy my requirements of gasoline and I exercise the use of the credit card. It happens that the change of that light, or my election as to how and which account gets the handling of the expense in connection with my credit card, and how on earth that kind of cost in the handling of that expense in connection with
my credit card can serve to determine or to be used
7331 in arriving at any cost differential. I do not believe
it can be done.

Q. Granting everything you say, Mr. Warmack, even including the change in the traffic light, does that make the slightest difference so far as the cost is concerned to which the Respondent company is put in handling any particular or given credit card?

A. No, indeed. No, indeed.

Q. Then what difference does it make?

A. Well, it has a considerable bit of difference because of this election of mine or because it just happens that that particular light is turned as you are going down the street. I think it is purely an absurdity to think that any such thing can ever be relied upon for the purpose of determining a cost differential.

Q. Well, Mr. Warmack, in the first place, is it not true that in the accounting of this Respondent company credit card expense is charged into the reseller channel of distribution?

A. That is my understanding.

Q. Just as the basic proposition. Is that not true?

A. It is my understanding, Judge Hanley.

Q. Well, is it not true that is where it belongs, in your judgment as an accountant?

A. Well—

7332 Q. (Interposing.) Is it not through that channel that credit card customers are served?

A. No, not necessarily. This will have to have an explanation going beyond "yes" or "no"—

Q. (Interposing.) Oh, my God. Again?

A. I cannot answer it with just "yes" or "no."

Trial Examiner Ballinger: But you have answered it "no"?

The Witness: Well, I will answer it "no" again, Judge Hanley, but it needs an explanation.

By Mr. Hanley:

Q. What other channels may there be any expense chargeable to, so far as credit cards are concerned?

A. To any channel where costs of serving reseller stations either directly or indirectly are concerned, and one of those channels is jobber, naphtha and gasoline column, in Respondent's Exhibit 101.

Q. Well,—to that, Mr. Warmack—

A. (Interposing.) Very well, but I would like—I was asked where else could it be charged to on the reseller channel.

Q. But in the first place, is it not just the consumers of gasoline, the drivers of automobiles that use these credit cards?

A. That is my understanding.

7333 Q. And they go into any station? Do they not?

A. That is my understanding.

Q. And use their credit cards?

A. That is my understanding.

Q. Now, tell me just what difference does it make what station they go into so far as the cost to the company is concerned in reference to servicing from the accounting standpoint of that particular credit card customer.

A. It does not make one bit of difference. That is what I contend. You have no cost from which you can establish a cost differential.

Q. Then, Mr. Warmack, how can you say that this has no place as the marketing cost?

A. I did not say that at all.

Q. Is it not a fair setup to say that those credit cards which arise out of the jobber business and the cost incident thereto should be charged to the jobber business, and those credit cards which arise out of the ordinary reseller channel business should be charged to the reseller channel?

A. It is a wide stretch of the imagination. I do not think it should be charged in any such place. The company has no control—

Q. (Interposing.) Will you explain to the Court why you think that is an unfair division?

A. The example that I gave just now, your Honor,
7334 that it does happen that the customer drives into a
station and he elects to drive into it, it does not make any difference.

Trial Examiner Ballinger: What difference does it make what station he goes in or whether he exercises the right of the card's credit on his card?

The Witness: Not any that I know of.

Trial Examiner Ballinger: What difference does it make? He is speeding by down the road, and he will turn in to any station at all and purchase some gasoline at any time he likes?

The Witness: Not one ounce of difference in the world. That is why I am cutting it out. That is what I am getting at. That is why I say there is no measuring factor that the Respondent can establish. The Respondent has no control over where he buys his stuff. He can buy his requirements from anybody that sells Standard Oil goods.

By Mr. Hanley:

Q. That is quite true, Mr. Warmack. Nonetheless, do you agree that the Respondent company has an obligation to discharge the cost of servicing the credit card irrespective of how or where or when it originates?

A. Oh, yes. They certainly would, yes.

Q. Now, suppose, Mr. Warmack, that it originates in a station that is served by one of our jobbers.

A. Yes, sir.

7335 Q. We will say that that is credit card "X."

A. Yes, sir.

Q. Now, another credit card originates in a reseller channel, the reseller channel of the Respondent company. We will say that that is credit card "Y."

A. Yes, sir.

Q. Do you agree that it is incumbent upon the Respondent company to bear the cost of servicing from an accounting standpoint of both of those cards, "X" and "Y"?

A. Why certainly, if they exercise the privilege—

Q. (Interposing) Very well, Mr. Warmack.

A. —of doing the business. That is why—

Q. (Interposing) Irrespective of where the holders of "X" and "Y" card buy their gasoline, is there any difference? Is that not a fair separation of the cost to charge that "X" card administration to the jobber business where it originated, and the "Y" card administration to the reseller channel where it originated, utterly irrespective of where the holder of those cards buy their gasoline and their petroleum derivatives?

A. No It is not. That has absolutely nothing to do with it. That is absolutely nothing but an absurdity.

Q. All right. Tell us why.

A. Because of the fact that your company has no control whatsoever over where I or any one else who owns
7336 a credit card may buy their requirements.

Q. We granted that, Mr. Warmack. Tell us what difference that makes.

A. Yes—

Q. (Interposing.) If any? It does not change the cost? Does it?

A. Not in the aggregate. But how in the world, your Honor, can the cost of a credit card—

Trial Examiner Ballinger: (Interposing) One moment. You will answer the question. You are now answering the question with a question. Now, offer your explanation and stop. If you have any further explanation to offer, do so.

The Witness: I think I have stated this over and over again, Judge. I will be happy to do it again. I hope I have.

By Mr. Hanley:

Q. You have not yet, Mr. Warmack. Please explain that.

A. Explain what?

Q. Tell me, inasmuch as it costs the company just the same amount of money to service a card irrespective of where the holder of that card buys his product, why it makes any difference as a matter of cost to the company where that individual buys his product?

A. Well, in my opinion, it does not make any difference where he buys it. That is my contention. 7337

Q. What is your criticism of this account?

A. Because you have tried to use it to establish a cost differential. You have no control over it.

Q. What is wrong with that?

A. I think it is just wild imagination.

Q. Why?

A. Because you have no control over where this cost is being incurred. It is entirely a matter of election of the holder of the card.

Q. Mr. Warmack, does it make any difference in the cost to the company where the holder of the card buys his product?

A. It is my understanding that it does not.

Q. And it does not?

A. It is my understanding.

Q. Very well. Just what difference does it make where he buys his product so far as the cost of marketing is concerned?

A. It makes no difference.

Q. Then what is your criticism?

A. Because that is not a cost that will afford a cost differential. It just does not make any difference where he buys his stuff. How is a cost like that—

Trial Examiner Ballinger: (Interposing.) Mr. Warmack, you have been instructed by the Examiner several times not to attempt to answer the question with a question.

7338 The Witness: Well, I am sorry. I have stated my opinion on that.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. I refer you now to your exhibit—Commission's Exhibit 132, Mr. Warmack.

A. Yes.

Q. I will ask you if you know how account 208,—credit information expense was prorated between tank wagon customers on the one hand and jobber customers on the other hand?

A. I can look that up.

(The witness examines documents.)

The Witness: What is the question again?

Trial Examiner Ballinger: Read the question.

The Witness: I will have to look that up.

(The reporter read the question.)

(The witness examines the papers.)

The Witness: That is shown in considerable detail on page 56 of Respondent's Exhibit 100.

By Mr. Hanley:

Q. Was there anything the matter with that separation, in your judgment as an accountant?

A. Surely. There was.

7339 Q. Tell the Court what it is.

A. You endeavored to make a separation of credit card expense on the basis of credit card tickets. And then you claim that that separation afforded a cost differential. It is absolutely absurd from the standpoint of sound accounting.

Trial Examiner Ballinger: Mr. Warmack, you used the word "absurd" and the words "absolutely absurd," repeatedly throughout your testimony. It is unnecessary to indulge in that kind of language, Mr. Warmack.

The Witness: Yes, sir.

Trial Examiner Ballinger: You can say "it is incorrect," and it will answer the same purpose.

The Witness: I see.

By Mr. Hanley:

Q. Just explain what is the matter with it, Mr. Warmack.

A. What I think is the matter is that you have set up to support a class of expense and separate it on some arbitrary basis, which class of expense is a marketing expense over which the Respondent company has no control and over which—that is, exercises no control as to where the holder of a credit card purchases his products, by virtue of the fact that he happened to drive in to the place.

Then, you set about trying to arrive at a, by some tabulation or tabulations that you have made as explained 7340 on page 56 of Respondent's Exhibit 100—you have endeavored to separate that expense and determine a cost differential. This is general expense which will afford no cost differential.

Q. Mr. Warmack, let us use an example. Let us see if we can make it simple. Let us see if we can make this thing concrete. Just assume that the Respondent company issued 100 credit cards in the Detroit area. Let us assume that 90 of them were issued as the result of applications coming from service stations in the regular tank wagon reseller channel. Let us assume that 10 of them were credit cards which originated from applications coming from jobber stations.

It is true, is it not, that the Respondent company, in respect of all of those applications would make a credit investigation?

A. That is my understanding. Yes, sir.

Q. And incident to that investigation there would be some expense. Would there not be?

A. Oh, yes, indeed.

Q. Assuming that after the investigation is made and 90 credit cards are issued which originated in the reseller channel, and that 10 cards are issued which originated in the jobber business—assume that.

A. Yes.

Q. From month to month those holders of credit
7341 cards would be buying products. It would be income
by the company from that, and it would be incumbent upon the company to bill that credit card holder for his monthly purchases? Is that not true?

A. Yes, sir. That is my understanding of the procedure.

Q. That would be true would it not, irrespective of where the credit card holder in either class bought his merchandise?

A. That is my understanding; yes, sir.

Q. Now, Mr. Warmack, in your judgment as an accountant, does it make the slightest difference where one of that group of 10 credit card holders originated from the jobber group as distinguished from one of the 90 credit card holders in the reseller group buys his merchandise? Does that make any difference so far as the cost to the company is concerned in servicing from an accounting standpoint those two groups of credit cards?

A. It is my contention that it makes no difference.

Q. Right?

A. Right.

Q. Now, if it makes no difference where these people buy their products, and if, as you maintain, the company has to bear the expense of servicing the cards from an ac-

counting standpoint, is it not a fair separation of expense
as between the reseller channel and the jobber channel to
charge to the reseller channel those cards which origi-
7342 nated in the reseller channel and charge to the jobber
channel those cards which arise in the jobber channel?

A. In my opinion that should not be for the purpose of establishing a cost differential.

Q. Just why.

A. Because of the fact that the place where the cards originated, in the first place, is not the controlling factor at all.

The tank wagon reseller serviced by the respondent company have, may have a credit card initiated through him, and when the holder receives his card he may exercise it wholly and entirely with a jobber, and there may be vice versa of that situation that may arise also.

Therefore, certainly could not subscribe to the belief that where the card originated is proper as being an influencing factor from the standpoint of determining a cost differential.

Q. Well, Mr. Warmack—

Trial Examiner Ballinger: (Interposing.) Mr. Warmack, there is a difference in cost, is there not? In other words, part of the cost incurred by the reseller channel and part of which is incurred in the jobber channel? Is that not true?

The Witness: In my opinion, no, your Honor.

Trial Examiner Ballinger: No part of it?

7343 The Witness: No part of it. No, sir. That is my
opinion.

Mr. Austin: Well, you do not mean any part of it, no part of it would be indicated in the jobber channel?

Mr. Hanley: That is objected to as being testimony on the part of counsel. If you want to ask him a question that would be all right.

The Witness: In the jobber channel, your Honor?

Trial Examiner Ballinger: Is it attributable to one channel, or should it be divided as between the two channels?

The Witness: For the purpose of what?

Trial Examiner Ballinger: I want to know.

The Witness: I will have to know for what? Not for the purpose of the cost differential.

Trial Examiner Ballinger: Do we get a division? There is a cost that is charged to some extent to both channels? Is there not?

The Witness: It is chargeable to every gallon of gasoline that is sold to car drivers either directly or indirectly.

Trial Examiner Ballinger: Well—.

The Witness: (Interposing.) One each unit of gasoline, and each unit of gasoline is the governing factor.

If this company, as it has shown, sells fifteen million gallons of gasoline through the jobber, naphtha 7344 and gasoline channel, and 69-million gallons of gasoline through the tank wagon reseller channel, then this is the class of expense that will be separated on that type of gallonage.

By Mr. Hanley:

Q. Is that based on a factual and objective cost study, Mr. Warmack?

A. That is not. It is based on my opinion as to how, from the standpoint of sound accounting, this class of expense should be separated.

Q. Mr. Warmack, suppose that a credit card holder—that is, a credit card holder of a card issued by the Respondent company, was entitled to buy nothing on that card except the products of the company. Now that is not in accordance with the facts, but just assume that. Would that change your opinion in any particular?

A. From the standpoint of determining a cost differential, it would not. Now, there might be some specific instances where the company elected to allow the purchasers or holders of credit cards to purchase several hundreds of dollars' worth of goods, and by some cost incurred in that, there may be some vague possibility of some part of the cards coming in for the possibility of a cost differential, but I think such a situation would be too remote to be considered.

Q. Well, Mr. Warmack, I fear I will have to pursue this subject at quite some length, but just to finish up 7345 this afternoon session before I ask the Court for a recess, I wish you would please, if you will, tell the Court what the relationship is between the fact that the credit card holder may purchase products hither and yon from various companies with the fact of a definite cost to which the issuing company is put in servicing that credit card from an accounting standpoint?

Is the question clear to you?

A. I am afraid it is not, Judge Hanley. I am sorry.

Q. All right. We have a situation of a company having, we will say the Respondent company in this action, issuing a credit card after an investigation.

A. Yes, sir.

Q. And then after that, month after month, that customer is serviced from an accounting standpoint; that is, he is billed on the basis of what he purchases and he pays his bill and the records are put through and kept and so forth.

A. Yes, sir.

Q. Now, he may buy at stations handling Standard of Indiana products or he may buy from British Columbia Company or Continental or somebody else.

A. Yes.

Q. But whatever he buys is charged on his account and he is billed by the Standard Oil Company of Indiana which issued the card.

7346 A. Yes, sir.

Q. That is your understanding is it?

A. Yes, sir.

Q. Now, tell me if you can what possible relationship there is between the fact that that customer may buy gasoline at a Continental station as distinguished from the Standard Oil Company of Indiana station and the cost to which the Standard Oil Company of Indiana is put in servicing that card and account from an accounting standpoint?

A. Well, from an accounting standpoint, naturally, it is a cost. It is a cost incurred in connection with the credit card, because of the fact that the company elects to do what we might say cinch its customers. And that is very closely, in my opinion, comparable to the cost incurred in connection with advertising for customer acceptance. And I do not see how, from an accounting standpoint, how they could have any relationship to the methods of sale or quantity sold in the Detroit area when this customer is purchasing his goods completely without the Detroit area, or such like.

Q. Mr. Warmack, I am sorry, you are not answering the question. Possibly it is my fault.

I did not make it entirely clear. I will try to simplify it.

A. I am sorry.

7347 Q. Suppose that credit card holder "X" who has a credit card issued from Standard Oil Company of Indiana buys during a given month fifty gallons of gasoline. Suppose he buys it at Continental stations.

A. Yes, sir.

Q. Now, under the plan he would be billed for that gasoline by the Standard Oil Company (Indiana)?

A. That is my understanding.

Q. That is your understanding?

A. Yes.

Q. And then there would be a company adjustment between Indiana and Continental?

A. That is my understanding, sir.

Q. Supposing that instead of buying that 50 gallons of gasoline at a Continental station, he bought that 50 gallons of gasoline from stations handling Standard of Indiana products—so, he would buy Standard, say, Standard Red Crown Gasoline.

A. Yes, sir.

Q. And he would be billed by the Standard Oil Company of Indiana for the 50 gallons of Standard Red Crown. Now, Mr. Warmack, so far as the cost is concerned to the Standard Oil Company of Indiana of the handling of that credit card account for that month, does it make the slightest difference whether that customer "X" bought 50 gallons of Continental gasoline or 50 gallons of Standard Red Crown Gasoline?

7348 A. In my opinion, it makes no difference at all. The cost is incurred. The only question I think is this of separation of the cost for determining a cost differential.

Q. Now—well, now; does the fact that he may have bought the Continental gasoline raise a question in your mind as to the propriety of using that as a basis for a cost differential?

A. Well, it raises that question but not necessarily. I think there are many other questions that are probably much stronger.

Q. You agree largely, do you not, Mr. Warmack, that there is a different marketing cost in handling that credit card or is not, for that month's business?

A. Absolutely, I think it would be the same. The very identical thing that there is a common cost, Judge Hanley, of newspaper advertising. It runs hand in hand with newspaper and radio advertising.

Q. Now, suppose—suppose that that credit card originated from some station served by a jobber class of customer. Do you not regard it as an appropriate and fair method of accounting to allocate the cost of handling that credit card and servicing that account from an accounting standpoint to the jobber group of customers as differentiated from the whole reseller channel on the other hand; is that not a fair thing to do?

A. No, only to that extent in your refinement by 7349 your management that would be—I am sure that I would make no objection, however, but I certainly do not think it is proper to make any such segregation for the purpose of a cost differential. I am certain that it should not be done.

Q. Is that not what Mr. Boatwright set forth in his opinion as to what should be done?

A. It is my opinion that is what he did and that is why I objected to it.

Q. Do you think that is improper accounting?

A. For the purpose of establishing cost differential, I think it is improper accounting. That is because the costs of that kind do not afford a cost differential basis.

Q. Do you think it may not be given any consideration at all on either side of the ledger? Is that what you mean to say, Mr. Warmack?

A. No, I do not mean to say that. I just mean to say that you have this cost and several other costs that are costs of a general nature. They just do not afford any cost differential. They are costs, they are just costs, many of which are general costs, among which we have the general office costs. They do not afford a basis for a cost differential.

Trial Examiner Ballinger: Mr. Warmack, you say they do not afford any basis for separation or a differential; do you mean by that that the differences in the cost is not ascertainable?

7350 The Witness: Judge, not exactly. I do not mean that in connection with this account.

Trial Examiner Ballinger: What do you mean?

The Witness: This class of expense that is incurred at the pleasure of the company for the purpose of cinching the users of the company's products, and is not incurred in connection with the selling of their products either through the tank wagon reseller or jobber customer channels. Now, it must be cost. In other words, to afford a cost differential, it must be cost incurred directly or indirectly in connection with the serving of this company's customers. That class of cost is not what is incurred here.

By Mr. Hanley:

Q. Mr. Warmack, I am going to ask you one more question and then I am going to ask the Court to grant us an adjournment.

A. Yes.

Q. You grant that there is a cost incident to the handling of these credit cards?

A. Yes, sir.

Q. Do you not?

A. Yes, sir.

Q. If Respondent company elects to allocate all of its cost of handling all of the credit cards that arise out of the jobber business on the one hand, and elects to and does allocate that cost to the jobber business, and then over here on the other hand allocates all of the costs of 7351 those credit cards that arise out of the reseller channel to the reseller channels, and makes that division in a clear split; do you as an accountant regard that as unfair and improper accounting?

A. I do.

Mr. Austin: Judge—

Mr. Hanley: I wonder if we may have a recess or an adjournment as I previously suggested?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Austin: I would like to ask a couple of questions if I may.

Trial Examiner Ballinger: You may on the record.

Mr. Austin: Mr. Warmack, if we take account 208 as an example of an account which includes an aggregate expense, how is the aggregate expense in account 208 allocated by the Respondent between tank wagon reseller and tank wagon consumer or other methods channels in its regular accounting procedure on form 189?

The Witness: The expense therein referred to is allocated to the various channels on a gallonage basis, excluding direct shipment gallonage.

Mr. Austin: In your opinion, is that a correct method of allocation that I am speaking about?

7352 The Witness: In the regular accounting procedure, Mr. Austin, I have no objection to how they allocate it in the aggregate, as you speak of it, or any part thereof. I do not think it is correct, however. I think that the consumer business is concerned with credit cards. That is my opinion.

Mr. Austin: Well, in your opinion, is the method of allocating correct as to tank wagon reseller and other methods channel?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Austin: I withdraw the question.

The Witness: I do not—

Mr. Austin: I will just ask you how in your opinion should the credit card expense be allocated on Respondent's Exhibit 101 between the six petroleum product channels?

The Witness: On the basis of the gallonages shown in the tankwagon reseller, other methods, jobber naphtha and gasoline, jobber other products—in the absence of a more detailed study—of the gallonage as shown in those four channels. I know of no other basis that it could be allocated on.

Mr. Hanley: Have you finised?

Mr. Austin: Yes.

By Mr. Hanley:

7353 Q. That means that you would put it on the same basis as account 075—Advertising? Is that so?

A. Yes, sir. And it would afford no cost differential. This is a class of expense that affords no cost differential.

Mr. Hanley: If your Honor please, I now move that we recess at this time to reconvene tomorrow morning, Tuesday, July 28, 1942, in this same room.

(Witness temporarily excused.)

Trial Examiner Ballinger: The motion is granted.

And now, at 4:30 p. m., the hearing stands adjourned to be reconvened at 9:30 a. m., July 28, 1942, in Room 532, Federal Trade Commission Building, Washington, D. C.

(Whereupon, at 4:30 p. m., July 27, 1942, the hearing in the above-entitled matter was adjourned.)

7354

Room 532, Federal Trade
Commission Building,
Washington, D. C.
Tuesday, July 28, 1942.

Met, pursuant to adjournment, at 9:30 a. m.

Before:

Webster Ballinger, Trial Examiner.

Appearances:

Cyrus B. Austin, Esq., attorney for the Federal Trade Commission.

Harold R. Hanley, Esq., (910 South Michigan Avenue, Chicago, Illinois), appearing for the Respondent.

7355

PROCEEDINGS.

Trial Examiner Ballinger: Come to order.

The hearing of Docket No. 4389, case entitled "In the Matter of Standard Oil Company (Indiana)" is reconvened pursuant to notice at 9:30 a. m., July 28, 1942, in Room 532, Federal Trade Commission Building, Washington, D. C.

The last hearing was held at the same place on July 27, 1942.

The reporter will note counsel for the Commission and Respondent present.

You may proceed.

WILLIAM J. WARMACK resumed the stand and testified further as follows:

Cross-Examination (Continued) by Mr. Hanley.

Q. Mr. Warmack, there seems to be some confusion in respect of the mechanical method employed by oil companies in handling these credit cards.

I would like to clarify that, if you will, please.

A. Yes, sir.

Q. Is it your understanding that various companies have a reciprocal plan whereby they honor each other's credit cards?

A. That is not my understanding. No.

Q. What is your understanding?

7356 A. It is my understanding that companies of a group, such as the Standard Oil Company and its affiliated companies may have such a reciprocal arrangement, in view of the fact that on the back of the copy of the credit card which is in the record it states, I believe, that this record will show, the names of the companies where the cards—your card will be honored.

It is my understanding that those companies have some degree of affiliation with your company.

Q. I do not understand what you mean by "affiliation," Mr. Warmack. Will you please explain that?

Mr. Austin: I object to the question. The question of affiliation is unimportant. Now it is only a question of what the companies do or do not do in connection with honoring credit cards. This matter of affiliation, it seems to me, is immaterial.

Mr. Hanley: Your Honor, I am inclined to agree with counsel in his statement just made. I asked the question because of the first answer given by the witness. The fact is that there is no affiliation between many of the companies who honor each other's credit cards.

Apparently, the witness is not aware of that fact.

The Witness: Well, I naturally assumed that the companies listed on the back of your credit cards were affiliated companies. If they are not, then they are not.

By Mr. Hanley:

7357 Q. Well, Mr. Warmack, let us apply the suggestion of your own counsel in respect of that.

Is it your understanding that as between the companies listed on the credit card, entirely apart from questions of affiliation, there is a reciprocal arrangement between those companies whereby the one company honors the credit card of the other company?

A. Yes, sir. Those are the names of the companies on the backs of your credit cards. Some of those companies, I am sure, are affiliated with your company,—but that is—

Q. (Interposing.) Well, that may be, but as your counsel has said that is unimportant, and you may disregard that.

A. I see.

Trial Examiner Ballinger: Well, do each one of the companies listed on the back of the credit card issue like credit cards?

The Witness: I do not know. I assume they do, Judge. I do not know.

By Mr. Hanley:

Q. Mr. Warmack, assuming that the Standard Oil Company (Indiana), the respondent here, issues a credit card and suppose the holder of that credit card purchases gasoline in the State of California on some tour that he may be making.

A. Yes, sir.

Q. What is your understanding of the mechanics
7358 of what happens in connection with this credit purchase?

A. Well, I have not made a study of that: I can give you my understanding or my assumption. It is my understanding that if this purchaser of petroleum products holds this credit card and makes a purchase in California and signs a ticket for that purchase at a station of a reseller station operator, that the reseller station operator turns in that card to his supplier, and that it ultimately finds its way back to the office of the company issuing that card. The collection is then made by such company issuing the card.

Q. Which would be in this instance, Standard Oil Company (Indiana)?

A. Yes, sir. If it had issued the card.

Q. Supposing, Mr. Warmack, the Standard Oil Company of California issues a card. Supposing that the holder of that card buys gasoline one day at some station in Detroit supplied through the regular reseller channel of the Respondent company. As a result of that transaction, there would be a ticket. Would there not?

A. It is my understanding that there would.

Q. That ticket would be handled by the Detroit office of the Respondent company? Would it not?

A. It would be turned in to them. That is my understanding.

Q. And that then they would make the necessary bookkeeping entries, and give the local dealer the proper
7359 credit, as such, for the final collection with the Standard Oil Company of California?

A. It is my understanding that would be the transaction. In many instances it would not be accounts with local dealers.

Q. Those credit cards?

A. I understood you to say that he would be given a local credit. It is my understanding that the local dealer turns it in for cash. There would be no account.

Q. The card that is given the local dealer has nothing to do with the credit card in such a case?

A. I answered your question. You said he gave credit. I understand it would be a cash transaction. There would be no credit.

Q. As between the company and the dealer?

A. Yes, sir.

Q. Is that your assumption?

A. Yes, sir.

Q. That has nothing to do with the holder of the credit card? ———

A. Not as far as the holder of the credit card is personally concerned.

Q. Is it true that it is ultimately billed by the company that issued the card? ———

A. That is my understanding.

Q. Supposing that the next day in Detroit that some credit card holder buys gasoline at one of the jobber's stations handling the Standard Oil Company products. What would be the mechanics of handling that transaction?

A. It is my understanding that it would be handled in the same manner.

Q. Well, just what does that mean? What would happen?

A. Exactly the same thing as we just outlined in the other situation.

Q. Will you please outline it?

The Witness: Your Honor, must this repetition go on and on and on?

Trial Examiner Ballinger: Mr. Warmack, answer the question, unless there is an objection interposed by counsel for the Commission.

The Witness: It is my understanding that in the first place the holder of the credit card would issue or sign a ticket which would be picked up by the reseller station operator. The reseller station operator would, in turn, pass that ticket to his supplier. That would be one of the jobber stations or jobber customers in Detroit, unless it were one of the Ned's Stations, in which event Ned's would pass the card to the Standard Oil Company in Detroit.

In the case that it were one of the other jobbers, the jobber would pass it to the Standard Oil Company. The
Standard Oil Company would, in turn, forward the
7361 ticket through channels to the place where the card
was originally issued, and there the billing would be
made. That is all an assumption. I do not know that to be a fact.

By Mr. Hanley:

Q. Just to summarize, Mr. Warmack, whether this credit card holder from California or Chicago or wherever he may be from, buys gasoline from a reseller station handling Standard Oil Company products in Detroit, or whether he buys it from a jobber station handling Standard Oil Company products in Detroit, the tickets get into the Detroit office of the Respondent company, and the accounting and bookkeeping work is done of those tickets in that office. Is that true?

A. That is my understanding.

Q. Now, I think we can get into the detail of that a little more in the future, Mr. Warmack.

A. Yes.

Q. I would like first now to refer you to Commission's Exhibit 132.

A. Yes.

(The witness examines Commission's Exhibit 132.)

Q. We have discussed account 208. Now, I want to direct your attention particularly to account 551.

A. Yes?

Q. You have listed on Commission's Exhibit 132 this
account 511 having to do with expense collecting bad
7362 debts current year, amounting to $1.50 for the full
year. That was found to be wholly applicable to
credit card business.

Was that amount allocated between tank wagon and jobber channels on the basis of credit sales tickets received from each class of customers?

A. I can look that up in the record.

Q. Please do so.

A. (The witness examines records.)

The Witness: May I have the question?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: That is my understanding. Yes, sir.

By Mr. Hanley:

Q. Referring you now to the same Exhibit 132, account 512, being expense collecting bad debts prior years amounting to $2.50 for the year. How was that allocated between tank wagon and jobber customers?

A. It is my understanding it was allocated on the same basis as account 511.

Q. That is to say, on proportion of tickets handled?

A. Yes, sir.

Q. Again referring to the same exhibit, account 510, losses by bad debts. That account shows the total amount identified to credit card business of $3,109.83. Is that correct?

A. Yes, sir.

7363 Q. Did Respondent's accountants in this cost study, as reflected by Respondent's Exhibit 100, analyze each voucher to ascertain this amount?

A. I do not know.

Q. Did you make any study of that when you were in Detroit?

A. Yes, sir. I inquired. I could not know if they studied each voucher.

Q. Did you satisfy yourself as to the facts in connection with it?

A. That they studied each voucher?

Q. Yes, sir.

A. I was satisfied with the figures that they reported out. But I did not make any minute study of each voucher myself.

Q. Do you question the results?

A. No.

Q. How did the accountants of the Respondent allocate that amount between tank wagon and jobber customers?

A. (Witness examines document.)

The Witness: That information is shown at page 57 of Respondent's Exhibit 100. Would you like it read into the record?

By Mr. Hanley:

Q. No. There is no occasion for you reading an exhibit into the record; that is already in the record, Mr. Warmack.

I am asking you for your knowledge.

7364 A. I do not have any knowledge other than what is on this page.

Q. Whatever the source may be, will you please give us the benefit of your own knowledge?

A. I have no knowledge except what is on this page. And I doubt if I could say it as well as what is on this page. The page speaks for itself

Trial Examiner Ballinger: Read the question.

(The reporter read the question and answer.)

Trial Examiner Ballinger: That can be answered very easily. How did they allocate it?

The Witness: Your Honor, they have got into it a big long description of how. I will be glad to paraphrase it the best I can. I cannot come out and make just one little word and explain it.

Trial Examiner Ballinger: Mr. Warmack, without any explanation, make the best statement that you are capable of, on the record.

The Witness: May I read this page, your Honor?

Trial Examiner Ballinger: Not into the record.

The Witness: Oh, no, indeed. I must inform myself on it.

Trial Examiner Ballinger: Certainly.

(The witness reads the page.)

The Witness: Your Honor, this is a very compli-
7365 cated situation, I would just have to—

Trial Examiner Ballinger: Did they make their separation in exactly the same basis?

The Witness: Yes, sir. I copied their separation.

By Mr. Hanley:

Q. There was a separation on the basis of tickets, was there not, Mr. Warmack; that is to say, number of sales tickets handled from the different classes of customers?

A. That is my understanding, Judge Hanley, but that is elaborated on materially here in Respondent's Exhibit 100. I think, essentially, that is what was done.

Q. Well, of course, Mr. Warmack, I am assuming, and if I am wrong please correct me, that inasmuch as you have seen fit to criticize the method of handling this account on the part of Respondents that you are familiar with the methods used by the Respondent in making these cost separations on credit card expense.

Am I wrong about that?

7366 A. In the first place, I do not question the handling of these accounts in the company's regular accounting procedure.

In the second place, I do not assume to remember all of these endless separations that were made. The records show them, and I have studied them.

Q. Well, my questions, Mr. Warmack, are not going primarily to the method of separation used in the ordinary accounting of the Respondent company. They go primarily now to this cost study, namely, the separation as between the reseller channel on Respondent's Exhibit 101, and the jobber channel on Respondent's Exhibit 101, and the methods used by the Respondent in allocating cost of handling this class of credit card business as between the one class of customers distinguished from the other.

Now, did you not make a study of that?

A. Surely. I reviewed what are in your exhibits, Respondent's Exhibits 99 and 100. That was about the extent of my study as far as determining how you made the separations.

Q. Well, now, are you able to answer definitely, then, whether or not that separation was made as to cost, based on the effort and time expended and expenses incurred in handling the tickets originating from the reseller channel on the one hand, and originating from the jobber channel on the other hand?

A. No sir. Not of my own knowledge. I accept
7367 what you have in these reports, Judge Hanley.

Q. I do not understand what you mean, Mr. Warmack.

A. Yes?

Q. I wish you would please try to answer the question. I do not know where you got your knowledge, but if you have a knowledge, will you please answer the question?

A. Well, Judge Hanley, I have answered the question and I have stated—

Trial Examiner Ballinger: (Interposing.) One moment. Read the question.

(The reporter read the question.)

Trial Examiner Ballinger: Read the answer.

(The reporter read the answer.)

Trial Examiner Ballinger: The witness has apparently answered your question.

By Mr. Hanley:

Q. Did you—

Mr. Hanley: May I understand, if your Honor please, from the witness whether or not he subscribes to the fact that this cost study was made by separating on the basis of tickets?

By Mr. Hanley:

Q. Is that your understanding?

A. That is my understanding, Judge Hanley.

7368 Q. Now, will you please look at account 400 on Commission's Exhibit 132, and tell the Court the amount of bad debts collected written off prior years and assignable to credit cards?

A. $70.82.

Q. Did the Respondent's accountants analyze each of the vouchers to ascertain this income amount?

A. I do not know.

Q. Do you question that figure?

A. No, sir.

Q. Tell the Court, please, how Respondent's accountants allocated that amount between tank wagon and jobber customers?

A. It is my assumption that they are separated on the same basis that they separated the account just above it—account 510, but I can look it up in these records.

Q. I will have to ask you to do so, if you do not have it in mind, Mr. Warmack.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

The Witness: That information is shown, Mr. Hanley, at page 57 of Respondent's Exhibit 100. That goes into the detail of the mechanics employed by the Respondent's accountants in making the separation.

Trial Examiner Ballinger: And the statement 7369 there was accepted by you?

The Witness: Surely. I did not go into those things; that is, to the extent of examining those with a fine tooth comb, Judge. I accepted their figures.

By Mr. Hanley:

Q. Referring you, Mr. Warmack, to accounts 202 and 204, 066, 200, 201. Is it your understanding that the separation was made by Respondent's accountants between the reseller channel and the jobber channel on identically the same method, namely, effort and time expended in handling tickets originating from credit card business?

A. That is my understanding, Judge. There may be some tiny division. I do not know. These records will show it, but it is my understanding generally that that was done.

Q. Therefore, if I understand you correctly, the Respondent's accountants first isolated the cost of this particular class of sales for each of the accounts mentioned. And then split that expense between tank wagon customers and jobber customers on the basis of number of sales tickets? Is that correct?

A. Yes, sir. That is my understanding. There may have been some part of some of the expenses that the accountants may have assigned directly, but I do not question that, nor your statement. I think it is essentially correct.

Q. Each of these accounts of expense items have to do with the handling of the records incident to this type
7370 of credit sale? Do they not?

A. That is my understanding. I might elaborate on that just a little bit. It is my understanding that for credit reports you pay for those credit reports.

It is my understanding, also, that bad debts recovered would not necessarily represent particularly that record. (The witness indicates the document.)

They would represent money received. With respect to bad debt losses, which is one of the largest items that that represents, actual amounts that the company is enabled to recover, or expects to be enable to recover for these things, that would represent money received.

In addition to that manner of expense it is my understanding that the remaining portion of the expense for the most part has to do with the keeping of records on these particular credit cards.

Trial Examiner Batinger: Items of account?

The Witness: Credit cards, Judge.

By Mr. Hanley:

Q. Yes.

A. The largest item on the sheet is credit reports $11,900 plus as against $30,700 plus dollars.

Q. Does the cost of maintaining accounting reports such as checking the accuracy of the price, filing the tickets, sum-

mation of tickets to a monthly total, and billing of
7371 customers, and so forth, tend to vary with the number
of tickets handled?

A. It is my understanding that it should.

Q. Is it not a fact, Mr. Warmack, that the collecting and filing of tickets having a value of five dollars is just as easy as one for one dollar?

A. I should assume that, Judge Hanley.

Q. Having analyzed these various accounts, Mr. Warmack, is it not true that the Respondent's accountants' method of handling credit card accounts is based upon the sales ticket filing system?

A. Not in its regular accounting procedure. It is my understanding that it is not. But in connection with this cost study that was made out of which came Respondent's Exhibits 100 and 101, it is my understanding that that is substantially correct.

Q. What is the system regularly in vogue in the regular accounting system in the Respondent company?

A. In the account 200, are you speaking, Judge Hanley?

Q. Just the method of the Respondent from an accounting standpoint in handling credit card accounts. Is it not done on the basis of the sales tickets filing system just regularly, entirely apart from this particular study?

A. It is my understanding that you make no provision in your regular accounting work for the segregation, but
I will be glad to look that up. You may.
7372 Q. I am not interested in amounts, Mr. Warmack.
A. Yes.

Q. If you know the method, will you please tell me? Is it not the system in use by the Respondent in its regular accounting system to handle these credit card accounts on a ticket filing basis—

A. (Interposing.) I should be glad—

Q. —and then billing the customers monthly or periodically on the basis of tickets received evidencing his purchases?

A. Judge, I will be glad to answer your question, but I do not know exactly that I understand it. I was under the impression that you meant at the outset the allocation in your regular accounting procedure of the time spent by your office personnel in Detroit in connection with this manner of business. But I am afraid I misunderstood it. I wonder if you would explain it just a little further for me.

Q. I will try to, Mr. Warmack. I am sorry I am not making myself more clear to you.

Without reference to any allocation of time in the regular accounting procedure of the Respondent company, is it not true that the method of handling of credit card customers is on the basis of a ticket filing system, and that the effort expended by the Respondent company's accounting forces has to do with filing of these tickets, making a summation of them at the end of the month, and billing
7373 the customer and receiving his remittance, and maintaining a duplicate copy, and maintaining just whatever records are necessary to complete that credit transaction?

A. I should certainly assume that that is correct, Judge Hanley. I did not, of course, check into the actual procedure employed; that is, the mechanics employed in the handling of these credit cards at any time.

Q. Is it not a fact that the credit card customers in Detroit did not use their card privileges and jobber outlets to as great a proportion as was the jobbers purchases of gasoline to tank wagon reseller volume?

A. I am sure I have no knowledge with respect to that point.

Q. Did you make any investigation into the question at all?

A. I have read the record here, and have heard it testified, I believe, by witnesses of the Respondent that—

Trial Examiner Ballinger: (Interposing.) The question is: Did you make any investigation yourself of the matter?

The Witness: No, sir. I had no occasion to.

By Mr. Hanley:

Q. Do you know why businesses encourage their customers to establish a line of credit with their particular organization?

A. I have a general knowledge of those things,
7374 but not specifically in this case.

Q. Well, what is your idea, Mr. Warmack, on that subject—

A. (Interposing.) I do—

Q. —as to why these credit cards are used?

A. They are used for the purpose of cinching the user of the company's products, so to speak, to hold the users and keep them from purchasing petroleum products from other petroleum companies, so to speak. That is probably a rough explanation, but it is my feeling about it.

Q. Now, assuming that two distributors selling the Respondent's products, each having certain credit buyers, and one of these distributors has ample capital to finance the credit he extends, and the other does not, which would recommend to his customers the use of a credit card account with the Respondent supplying company?

The Witness: May I have that question, your Honor?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: Certainly, I do not know. I could only give you a guess. I would be happy to guess, if you want that.

By Mr. Hanley:

Q. I want your best judgment, Mr. Warmack, as an accountant, irrespective of upon what it is based.

Mr. Austin: I object to the question, your Honor.
7375 I think it is too speculative, and that it would permit
an answer which would have no evidentiary value, only.

Trial Examiner Ballinger: Well, unless the witness has some general knowledge derived from an examination of accounts and investigation of the business, and if he has not, he may so state.

The Witness: Your Honor, I—the only thing I could do here would be to guess.

I know people, I know instances where a man has very little capital, still he has credit accounts, and he is glad to have credit accounts. He arranges for his own financing.

Of course, I know of other instances where people have considerable capital and their businesses are well capitalized, and they do not go after certain classes of credit business. That is only conjecture. That is the only way I can answer.

By Mr. Hanley:

Directing your attention particularly to the situation in Detroit in this case, Mr. Warmack: Is it not true that in the Detroit market between the jobbers on the one hand that they carry a great deal of the financial credit load—

A. Of whom?

Q. The jobbers on the one hand carry a great deal of

their own credit load to customers as distinguished
7376 from the ordinary reseller service station operators on the other hand?

A. Well,—

Trial Examiner Ballinger: (Interposing.) Did you investigate the matter?

The Witness: No, sir. I certainly should assume that the jobbers would carry a certain credit load, but it is my understanding that gasoline is sold for cash, at least for the most part, to the reseller stations.

By Mr. Hanley:

Q. ~~I am~~ referring, Mr. Warmack, not to the arrangement between the supplying company and the reseller customer. I am referring to the consumer customer who is buying gasoline at a service station—the kind of a fellow who would be using a credit card, now.

A. That is, the driver of an automobile?

Q. Yes.

A. Yes?

Q. Now, with that explanation, do you have any knowledge that you think entitles you to answer the question as to whether the jobbers in Detroit carry a substantial part of their own credit extensions as distinguished from the reseller group of operators who are dependent upon the company, supplying company, to issue credit cards and carry the credit load if credit is extended to the consuming customers?

A. I—

7377 Trial Examiner Ballinger: Now, Mr. Warmack, if you have any knowledge which will enable you to answer, say, if your information is derived from reliable sources that will enable you to answer the question, proceed to do so.

The Witness: Judge, I know no more on that point than what is in these records.

From a general standpoint, however, I may state it is my understanding that by and large the automobile user pays cash for his gasoline; that there is not only—

Strike that.

Mr. Hanley: No, no.

The Witness: That is, the credit card activity of these companies is carried on to hold the users to a certain product—I am sure I do not have any credit card and I do not now single man who does have a credit card.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record. Come to order. You may proceed, Judge Hanley.

By Mr. Hanley:

Q. Mr. Warmack, are you familiar with the ratio of flow of credit card business in the tank wagon branch of Respondent's business as distinguished from the jobber business?

A. Judge, I am sorry, I did not hear the question.

Trial Examiner Ballinger: Do you understand
7378 the question?

The Witness: Yes, sir. I believe so. I should like to inquire if you mean tickets—represented by tickets—

By Mr. Hanley:

Q. Yes, by volume of tickets.

A. Yes, sir. That is shown in Respondent's Exhibit 100. I am familiar with that.

Q. I have been using the term "reseller outlets" as distinguished from "jobber outlets," Mr. Warmack, in my questions, I think you have yourself understood tank wagon business as distinguished from jobber business?

A. Yes, sir.

Q. You have so understood? Have you not?

A. Yes, sir. That has been my understanding, Judge Hanley.

Q. Now, just assuming, Mr. Warmack, that a credit card holder would normally purchase more frequently at stations served by tank wagon from the Respondent company as distinguished from purchases made by the same ticket or credit card holder at jobber supplied stations.

Would not that fact enhance the cost of the Respondent company in handling credit accounts as assignable to tank wagon sales?

A. I do not think that it should, necessarily.

Q. I do not mean ticket for ticket, Mr. Warmack.

Supposing that it is true—and I ask you if you
7379 do not think it is true from your studies in Detroit—
that a credit card holder in Detroit would normally buy more gasoline, or buy more frequently at stations served by regular tank wagon from the Respondent com-

pany than he would buy from stations served by the jobbers?

A. Of course. I could have no knowledge of that any more than what is shown in these records.

Trial Examiner Ballinger: Well, is it shown in the records?

The Witness: Yes, sir.

Trial Examiner Ballinger: Then can you answer the question?

The Witness: I can tell—

Trial Examiner Ballinger: Based upon what the records show?

The Witness: I can tell counsel what the records show. I do not see the number of tickets or the volume, Judge Hanley, here as between tank wagon reseller stations or jobber stations.

(Witness examines documents.)

By Mr. Hanley:

Q. Well, you are not at the moment, then, Mr. Warmack, familiar with the flow of tickets through the company's offices arising out of credit card purchases?

A. I do not have the information in my mind; no, sir.

7380 Q. You have stated, Mr. Warmack, that in your understanding the allocation of expense to credit card business in these various accounts which have been called to your attention and which are outlined on Commission's Exhibit 132 was made on the basis of time expended, effort, and actual out-of-pocket cost.

From an accounting standpoint, do you not regard that as a fair and proper method of allocation?

A. For the purpose, might I inquire, of determining a cost differential?

Q. For any purpose to determine cost, of doing business.

A. For the purpose of determining a cost differential, it is my opinion that such a separation would be of no value.

In my opinion, this class of expense is a class of expense that should be separated on the basis of gallonage. That would not afford a cost differential. If it is the company's desire to make such a refinement or go to such a refinement in its endeavor to separate costs which it styles "credit card costs" for any purposes, I have no objection to that.

My objection goes to this one point that this class of expense, in my opinion, is not an expense that can be separated in any way whatsoever, which would afford a cost differential. The only and most equitable way for
the purpose of determining a cost differential would
7381 be the separation on the basis of the gallonages in-
volved. Naturally, that would not afford a cost differential. That is my feeling about the matter.

Q. I am going to ask now, Mr. Warmack, one summarizing question—

The Witness: (Interposing.) If my answer to one of those other questions—I find that on page 59—excuse me for interposing.

Trial Examiner Ballinger: Page 59 of what?

The Witness: Page 59 of Respondent's Exhibit 100. There is shown a group of percentages, and those percentages range from 10.07 per cent to 14.40 per cent applicable to the separate accounts shown on page 59 and applicable to the jobber business.

If those percentages are to represent the volume of the credit card sales through jobbers as compared with volume of credit card sales through the regular tank wagon resellers, why, naturally, the volume through the resellers would be considerably greater than the volume of credit card business through jobbers. I believe that answers your other question, Judge Hanley.

By Mr. Hanley:

Q. I do not know. Do you know? Is that what it means?

A. That was my understanding.

Trial Examiner Ballinger: Well was that your
7382 intent?

The Witness: Yes, sir. To give an answer to the other question.

By Mr. Hanley:

Q. Now, Mr. Warmack, have you testified that you have made no particular study of this credit card situation, or the methods used by the Respondent in its handling of the credit card accounts, or of the method of the Respondent in handling tickets that originate from credit card purchases and that you have not studied the methods by which Respondent allocates the charges to various accounts, many of which have been called to your attention, and further, that you do not understand and have not studied the relative flow of business arising out of credit cards through the jobber-served stations as distinguished from the company-served tank wagon reseller stations.

All of that being true, I wish you would please just tell the Court as briefly as you can, on what basis and theory you assume to criticize the cost separations made by the Respondent in connection with the credit card expense.

Mr. Austin: Now, your Honor, that has been answered so many times.

Mr. Hanley: I just want it to go on—

Mr. Austin: (Interposing.) The witness has said—

Mr. Hanley: —it may be that he feels that he has 7383 already answered the question in a former statement that he made that he does not think that that has any place in the cost study at all, and if that is his answer, that is entirely satisfactory.

Trial Examiner Ballinger: Do you desire to amplify your previous statement in connection with this matter?

The Witness: No, sir. I think my previous statement covers the situation. I am not entirely in agreement with what was just said by Judge Hanley to the effect that I have made no studies of these various things.

I have made considerable studies, but I have not studied the underlying records of the company which support the information as set forth in Respondent's Exhibit 99 and Respondent's Exhibit 100, and possibly Respondent's Exhibit 101.

Trial Examiner Ballinger: Your conclusions are based solely upon the statements that have been submitted by Respondent.

The Witness: Yes, sir, and the very nature of this class of expense.

By Mr. Hanley:

Q. Adverting now, Mr. Warmack, to account 075—advertising.

A. Yes.

Q. You may want to refer to the record.

7384 A. Yes.

Q. It is page 6810, if you desire to do so.

A. Yes, sir.

Mr. Austin: What is that page?
Mr. Hanley: 6810.

By Mr. Hanley:

Q. You have stated in your testimony, as I recall, as follows:

"The major portion of costs included in this account—" referring to 075—"is for advertising for consumer acceptance, such as newspaper advertising, poster advertising, and direct mail, and so forth, which in my opinion should be allocated on the basis of gallonage sold through reseller stations whether served by Respondent directly or indirectly. The purpose of this advertising is to create a demand in the mind of the public for the Respondent's products, and Respondent has no control over the consumer; that is, a driver of an automobile as to where he elects, or what station he elects to buy Standard Oil gasoline from. No part of this advertising cost for consumer acceptance has been assigned to jobber, naphtha and gasoline column in Respondent's Exhibit 101, which, in my opinion, is erroneous and unsound from the standpoint of sound accounting practice and procedure."

7385 Q. Do you recall that testimony, Mr. Warmack?
A. Yes, sir.

Q. Is that your present opinion?

A. Yes, sir.

Q. While you were in Detroit, did you see any of the advertisements of the four jobbers involved in this action?

A. I do not recall that I did, Judge Hanley.

Q. Did you make any investigation?

A. With respect to what?

Q. Whether or not those jobbers' advertising, and how they advertised, and under what brand names they advertised, and as to what extent they advertised?

A. I have seen several of their advertising cuts, some of which I believe are in this record; that is the extent of what I know about the newspaper advertising performed by the jobbers.

Q. Did you hear some of them testify in this case, in connection with the amount of advertising they did?

A. Yes, sir. I did.

Q. Is it not a fact, that you are familiar to a certain degree at least with the amount of advertising done by the several jobbers in Detroit?

A. Yes, sir.

Q. Did you ascertain whether they advertised Respondent's products under Respondent's brand name?

7386 A. Did I ascertain? Did you say?

Q. Yes, sir.

A. I saw only a newspaper cut which had on it a small crown, as I understand it, representing the Red Crown, very inconspicuously displayed among various other advertised products.

Q. Mr. Warmack, you know it to be a fact that the jobbers have been in business in Detroit for a number of years, and the record shows, does it not, that they have been purchasing Standard Oil Company products for a number of years, and their testimony shows that they have been advertising at their expense in newspapers, through the medium of billboards, and through the medium of radio?

A. Yes, sir.

Q. For a number of years?

A. It is my understanding.

Q. Now, that being your understanding, and is it your testimony that all you know about what their advertising of Respondent's company's branded name products is, is this one little cut that you saw with an insignificant crown? Is that your statement on the record as to what you know?

A. That is the only thing I know of my own knowledge. I have read this record with respect to these things, but of my own knowledge, that is all I know. I may have seen the crown more than once.

7387 Q. What is your understanding as to the fact as to whether or not these jobbers have over the past years, and presently, advertised their our businesses and advertised the Respondent's products under the Respondent's brand names?

Mr. Austin: Your Honor, I object to questions regarding the advertising done by the jobbers.

I did not question the witness on direct examination regarding any advertising done by the jobbers. The testimony which Respondent offered in Detroit in that regard was not admitted. And to the extent that such testimony was admitted, it was later stricken by your Honor on motion of counsel for the Commission. Therefore, I do not believe that any questions regarding the advertising done by jobbers for the purpose of claiming reciprocal benefit, should be permitted on this cross examination.

Mr. Hanley: If your Honor please, if your Honor has any notion at all of ruling adversely to the Respondent on that objection, I desire to be heard, your Honor.

Trial Examiner Ballinger: The Examiner will hear you in any event.

Mr. Hanley: Your Honor did strike certain testimony in Detroit in connection with the reciprocal advantage accruable to the Respondent by reason of jobber advertising. That is a matter which we are forced to go to the Commission with. We shall do so.
7388 It is of the utmost importance, in our view, in this litigation.

I think that this witness as an accounting witness, who has condemned our allocation of account 075, is entitled to be examined by the Respondent as to his views as an accountant, and as an expert witness, advanced here by the Commission as to the effect and influence of this reciprocal advertising.

He has made, and I propose to prove that he has made statements to the effect that he believes that there is a reciprocal benefit. It seems to me, if your Honor please, that it would be most unfair to Respondent to permit this record to remain silent in connection with this reciprocal advertising feature.

Now, as to whether or not the Commission agrees with Mr. Austin or agrees with your Honor's ruling in Detroit; that is something else.

But the Respondent, I earnestly submit to your Honor, is entitled to have in the record the candid judgment of this witness as to what he thinks, as an accountant, is the effect of this reciprocal advertising.

It just seems, your Honor, that it makes good sense that if the witness is right in his first premise, that this is just all consumer advertising, then it must follow, it just must follow that the advertising done by these
7389 jobbers has a reciprocal benefit.

Judge, I just think it is devastating to the Respondent if your Honor keeps this out of the record. I just cannot understand that.

Trial Examiner Ballinger: This is cross examination, Judge.

Mr. Hanley: Yes, sir. Certainly.

Trial Examiner Ballinger: It was not touched upon in direct examination.

Mr. Hanley: The whole advertising question was raised. The whole advertising question regarding this was gone into completely and thoroughly by Mr. Austin on his direct examination. This witness has stricken the entire account 075. He has condemned it to the last penny. And he has even taken out point-of-sale advertising which he admits may be a proper charge, but he has taken it out anyway.

Trial Examiner Ballinger: But it was not touched upon on direct examination.

Mr. Hanley: Oh, but it was, your Honor. I am sorry, but I am sure that it was.

Mr. Austin: No, your Honor, there was no direct testimony regarding any jobber advertising. Now, the situation is this: The witness testified regarding Respondent's advertising expenses. His testimony was limited to that. This other question is an entirely separate 7390 one as to whether the Respondent is entitled to a set-off against that cost. That has nothing to do with the allocation of the cost, itself.

That is all he testified to.

Mr. Hanley: That is an argument for the Commission, Judge.

That has nothing to do with the propriety of asking this witness questions. That is an argument for the Commission, and we will meet that when the issue arises. We are now entitled to interrogate this witness on his judgment as an accountant.

Trial Examiner Ballinger: Judge, so that the record may be complete, and that you may be completely protected when the case goes to the Commission, the Examiner overrules the objection, reserving to counsel for the Commission, the right to renew the objection and a motion to strike, at the conclusion of the testimony.

And it is the present intention of the Examiner to sustain the motion. But, if you think that is important and that it should be before the Commission, the Examiner will afford you the benefit of having interrogated the witness and having it in the record.

Mr. Hanley: Well, Judge Ballinger, I am just deeply appreciative of that ruling, because I do regard it as important that it be in the record whatever view 7391 your Honor and ultimately the Commission expresses as to its relevancy.

Trial Examiner Ballinger: Proceed.

Mr. Austin: Well, if your Honor please, another point that when your Honor struck the testimony regarding jobber advertising and reciprocal benefits in Detroit, it was not on the theory that there was no reciprocal benefit. It was on the theory that the reciprocal benefits had not been proved, and no standard of proof had been laid; secondly, even if it were proved it was not something that the Respondent could take advantage of.

Trial Examiner Ballinger: Exceptions were taken to all of the Examiner's ruling. If the Commission should reverse the Examiner on his rulings in Detroit and also conclude that this is proper testimony to be considered in this case, why, it should all be before the Commission. While the Examiner does not think that it is proper, the Examiner will allow it.

Mr. Austin: On the question as to whether it is proper cross-examination, I move, your Honor, that if counsel for the Respondent desires to question this witness on advertising done by jobbers, since that subject was not touched on on direct examination, then the Respondent be required to make Mr. Warmack his witness.

Mr. Hanley: Oh, I was going to do that a few moments
ago, but the Examiner has made his ruling. He has
7392 indicated he is against me, and probably is going
to strike this testimony.

Trial Examiner Ballinger: In the present situation, the Examiner does not think it will make any large difference whether the witness was the witness of the Commission or a witness of the Respondent.

Proceed.

Read the question.

(The reporter read the question as follows:

"Q. What is your understanding as to the fact as to whether or not the jobbers have over the past years, and presently, advertised their own businesses and advertised the Respondent's products under the Respondent's brand names?")

The Witness: It is my understanding from this record that such has been the case; that is, the advertising of this company's products and other company's products all in the same newspaper advertisment, if that is what you are speaking of, Judge.

By Mr. Hanley:

Q. All kinds of advertising, Mr. Warmack?

A. Well, I—

Q. (Interposing.) Whether it should be newspaper, or radio, or any other type of advertising?

A. I should assume so.

7393 Q. I believe you have—

Mr. Austin: (Interposing.) Your Honor, I want to interrupt here. The witness has frequently said what he assumed.

Now, on this kind of question I request the witness to make no assumption, and that only what he knows of his own knowledge should he testify to. I do not believe, as long as he has not testified on this subject, that his assumptions are material.

Trial Examiner Ballinger: The Examiner does not care to assume the responsibility of stopping the witness heretofore, no objection on part of counsel having been interposed, and the Examiner has allowed the witness to proceed with assumptions. From now on, Mr. Warmack, you will testify only relative to those maters of which you have either personal knowledge or that you are sufficiently satisfied from your examination of the records to be the truth.

By Mr. Hanley:

Q. Did you personally call at various of the Ned's Stores when you were in Detroit, Mr. Warmack?

A. No, sir. I never call at any one of them.

Q. But did you ever see any one of them?

A. Yes, sir.

Q. Do you know what kind of products they sell?

A. Not of my own knowledge; no, sir.

7394 Q. Do you think—

A. Pardon me?

Q. Did you think it was a matter of any importance that you should know, in view of the assignment that you had in Detroit last spring?

A. I did not.

Q. Do you know how much gasoline they sell annually?

A. Not of my own knowledge.

Q. Do you know of anything that developed in the course of any of your studies?

A. I may be able to look it up in these records, Judge Hanley. I am sure I can look it up for the year 1937.

Q. Well, suppose the year 1940, Mr. Warmack, the year that Respondent's Exhibit 101 centers upon. Have you any ideas as to the approximate amount?

A. No, sir.

Q. No ideas at all?

A. None at all. The records will show if it is. I cannot keep that information in my head, not all of it.

Trial Examiner Ballinger: That has been fully established heretofore, and it appears in the record.

By Mr. Hanley:

Q. Well, do you know whether or not it was one gallon or four million, Mr. Warmack? Let us try to get along about this thing.

7395 A. Well, the record—let the record show and speak for itself. I will look it up for you if you want it.

Q. I am not interested in the exact gallonage. I just want to know if you have in mind that it was around four million or five million or whatever you had in mind, Mr. Warmack. It is a foundational question.

The Witness: Your Honor, may I look that up?

Trial Examiner Ballinger: You may.

Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. Is it your understanding that Ned's Auto Supply, through its Detroit outlets, handled approximately four million gallons of Respondent company's gasoline a year?

A. Judge Hanley, they handled that in 1937. I just do not have that in my mind what it handled in other years.

Q. Is it not your recollection of the record that you said you read, that there was an increase yearly in the amount handled by Ned's Service Stations?

A. Judge, I do not remember particularly any. I do not remember except 1937. I will accept your statement, whatever it is.

Q. Well, assume that it is approximately four million gallons of gasoline. Do you know that that organization also handled other petroleum products supplied by the Respondent company, such as lubricating oils and greases? 7396

A. That is my understanding, Judge Hanley.

Q. What is your understanding as to other types of commodities handled by Ned's?

The Witness: Your Honor, can I answer that previous question as to the number of gallons? I have the average gallonage of Ned's shown on Respondent's Exhibit 53 for the years 1936 to 1940, inclusive.

Trial Examiner Ballinger: You may incorporate that in the record.

The Witness: The figures as shown—

Trial Examiner Ballinger: (Interposing.) Commencing with the year 1937.

The Witness: For the year 1937—these are actual gallons instead of averages, 4,240,500.

1938, 4,880,600.

1939, 4,336,308.

1940, 4,320,672.

Now, your Honor, if I may have that last question?

Trial Examiner Ballinger: Read the last question.

(The reporter read the following question:

"Q. What is your understanding as to other types of commodities handled by Ned's?")

Trial Examiner Ballinger: Do you mean in addi-
7397 tion to grease and oils?

Mr. Hanley: Just anything they sell in their stores, if this witness knows anything about it.

The Witness: Your Honor, I can state by understanding, but I cannot state of my own knowledge.

Trial Examiner Ballinger: State what your understanding is.

The Witness: Tires, various kinds of sports goods, garden tools, and things of that nature, Judge Hanley. I know there are many others but I do not know what they are now. I think one is electrical goods.

By Mr. Hanley:

Q. What is your understanding or knowledge of the fact as to whether or not they advertise all of these various commodities through the media of newspapers, radios, and billboards, and do so under brand names of the various products including the brand names of the Respondent company's petroleum derivatives?

A. It is my understanding that they do that, as explained earlier. I stated that I had seen one newspaper cut which had "Red Crown" on the newspaper cut displayed, but not displayed prominently.

Trial Examiner Ballinger: Did that appear in connection with that advertisement of the products?

The Witness: Yes, sir. The principal product on
7398 that cut was Firestone Tires, on the cut that I saw.

By Mr. Hanley:

Q. Is it not true that Ned's at least represents in Detroit that it is the largest central Firestone tire dealer in the world?

A. Oh, I certainly do not know that, Judge Hanley, but they have a sign of Firestone tires quite prominently displayed around their stations, or the station I drove by.

Q. Perhaps you did not understand me. And it is perhaps my fault. I did not ask you if they are the largest Firestone dealers in the world. I asked you if you knew it to be a fact that they represented themselves as being the largest Firestone tire distributors in the world.

Mr. Austin: I object to that question on the ground it is incompetent and irrelevant as to what Ned's claims he is as to Firestone sales.

Trial Examiner Ballinger: The objection is sustained.

By Mr. Hanley:

Q. Are you familiar with the advertising done by the Wayne Oil Company from the newspaper and billboard standpoint, Mr. Warmack?

A. No, sir.

Q. Did you make any investigation?

A. Not of that, no.

7399 Q. Did you learn anything from your reading of
this record, Mr. Warmack?

A. Yes. I remember reading the record.

Q. What is that?

A. Oh, I would have to look it up.

Q. Do you remember anything about the so-called "Blue Ribbon Stations"?

A. I remember reading about that, I believe, but I do not have any recollection as to the extent of the advertising performed.

Q. Without going into any detail as to the extent of it, do you recall as a fact that the Wayne Oil Company does have an advertising program centered around the so-called "Blue Ribbon Stations"?

A. That is my understanding, Judge Hanley.

Q. Did you see the large neonized billboards maintained by Ned's advertising Red Crown gasoline?

A. I am not positive that I did see that sign exactly. I saw all of the neon signs which were lighted at night, at least one or more of the Ned's Service Stations. The only sign that I can remember seeing was the Firestone sign.

Q. Did you see the six large neon identification signs maintained by the Citron Kolb advertising of Standard products at their more prominently located outlets?

A. No, sir. I do not remember seeing any of those stations but I may have seen them, but I do not remember seeing those stations. 7400

Q. Did you not drive around and look at these places while you were in Detroit, Mr. Warmack?

A. Not as a part of this investigation; that is, the jobber station or stations of the preferred customers.

Q. You looked at one bulk plant?

A. I looked at three bulk plants.

Q. All right. Three bulk plants. Was that the extent of your physical examination of the operation of the company at Detroit while you were there?

A. What do you mean by "physical"?

Q. I mean going out and looking at the type of outlets, these jobber outlets, and seeing what they were doing, and how they were doing it.

Trial Examiner Ballinger: Judge, the witness, as the Examiner recalls it, has testified pretty fully with reference to exactly what he did, and what the investigations were that he made, and when he made them.

Mr. Hanley: I do not know, Judge, how intensively he made that, or may have gotten around and seen these things. I am trying to find out. Certainly, he was asked to do a job out there, and we are entitled to know how he did it, and what he did.

Trial Examiner Ballinger: Well, if he did not consider it necessary to go out and make a personal inspection of all of the different establishments, that is one thing. 7401

Mr. Hanley: If he did not do it, he can say he did not do it. That is the fact that I am asking you for.

Trial Examiner Ballinger: Can you answer the question?

The Witness: May I hear the question?

(The reporter read the question as follows:

"Q. I mean going out and looking at the type of outlets, these jobber outlets, and seeing what they were doing, and how they were doing it.")

The Witness: I certainly did not include that as a part of my study; that is, looking at the jobber outlets.

By Mr. Hanley:

Q. Now, assume, Mr. Warmack, if you do not know, that there were these large neon signs maintained by Ned's, and by Citron Kolb advertising Standard Oil products. What is your judgment as an accountant, as to whether or not the Respondent would derive a benefit therefrom, from an advertising standpoint?

A. In my opinion, such signs having the Respondent's products prominently displayed would naturally be an inducement to a driver of an automobile, if he needed gasoline, to drive in and fill up his tank. But, of course, that is a benefit to the station that sells the gasoline, and 7402 ultimately to the person who sells the station the gasoline, and all back along the line.

Trial Examiner Ballinger: Well, now, I understood your testimony to be that such advertisement displayed as the Judge has indicated resulted in some benefit to the Respondent company.

The Witness: I should think so.

It tells the car driver, the public at large, so to speak, this, your Honor—here is a petroleum product.

If the car driver elects to avail himself of the situation at hand, and drives in and fills up his tank, somebody is going to make a profit, somebody is going to be benefited. Naturally, the supplier is going to be benefited to some extent.

By Mr. Hanley:

Q. Would not the same thing be true in respect of newspaper and radio advertising, Mr. Warmack, as done by these jobbers?

Mr. Austin: I object to that question. It is too indefinite. I think there should be something more specific as to what type of advertising is alluded to.

Mr. Hanley: Perhaps, if you do not like my question, I will withdraw the question and reframe it, Mr. Austin.

Trial Examiner Ballinger: The question is withdrawn.

7403 By Mr. Hanley:

Q. Assuming that radio and newspaper advertising was done by these jobbers at their expense in which the brand names of the Respondent company's products were used. Would that not also result in a benefit, an advertising benefit to the Respondent company, in your judgment?

A. In my judgment, Judge Hanley, if that influences one single consumer of the product advertised to come in and buy that product, the supplier of that product would, to some extent, it might be small, it might be large, be benefited.

Q. You have testified that it is your understanding that Ned's handled a considerable line of commodities not related directly to petroleum products. You have said that you saw advertisements dealing with those outside products.

A. Yes, sir. Like Firestone tires.

Q. Yes?

A. Yes.

Q. Supposing that the advertisment which Ned's makes of their bicycles and sporting goods and Firestone tires and garden tools, and what not, induces people to come into Ned's stores and those people purchase petroleum derivatives supplied by the Respondent company. Would you regard that as a fact, that the Respondent company had derived some benefit from the advertising of Ned's, even though that advertising was not pointed directly to
7404 the brand products of the Respondent company?

A. Well, that is getting into economics a long ways. I think that the Respondent company is interested in selling its products and if one customer, irrespective of who he is, one who is a car driver drives into Ned's station or anybody else's station, and buys a gallon of gasoline, the Respondent company has benefited. Irrespective of why he drove in, he may have broken down up the road and may have driven in, there may have been a dozen different reasons why he drove in, and when he drove in and got the gallon of gasoline, or when he walked in and bought a gallon of gasoline, the Respondent company would have benefited, in my opinion.

Q. Did the Respondent company pay any part of the maintenance of these various neon signs, newspaper space charges, or radio advertising time utilized by any of the Respondent company's jobber customers?

A. Oh, I would have to look that up in these records.

Mr. Austin: Do you know?

The Witness: No, not of my own knowledge. No. I cannot remember.

By Mr. Hanley:

Q. Do you not know that it has been testified to, Mr. Warmack, that the Respondent company does not make any advertising allowances or payments of any kind to any of these jobbers?

Mr. Austin: I object to that question, your Honor. 7405 That is something the Respondent knows perfectly well and it is perfectly obvious that this witness cannot know it. I do not think it is a proper question.

Trial Examiner Ballinger: The objection is sustained.

By Mr. Hanley:

Q. You have read this record, have you not, Mr. Warmack?

A. Yes.

Q. And you have testified out of your knowledge derived from a reading of this record?

A. Yes, sir.

Q. Now, do you not know it as a fact from the record if not from other sources—

Mr. Austin: (Interposing.) Same objection.

By Mr. Hanley:

Q. —that the Respondent does not pay any advertising allowances or any part of the advertising cost whatever they may be of these various jobber customers in Detroit?

Mr. Austin: Same objection.

Mr. Hanley: It is a foundational question, if your Honor please. It is in the record of course. It has been testified to largely, before, Judge. It is just a foundational question to ask another question upon. I would like to have this witness, if he does not know it, he may assume it.

Trial Examiner Ballinger: He has answered the
7406 question and said that he does not know, but he said
he would look it up in the record if you so desire. Is
that right?

The Witness: That is correct. I cannot assume to remember all of this material.

By Mr. Hanley:

Q. Well, Mr. Warmack, I do not want to put you to the trouble of looking up the testimony on that point.

Mr. Hanley: May we not agree, Mr. Austin, that there has been testimony in this case in that respect?

Mr. Austin: Surely. I will agree that that has been a subject of testimony.

Mr. Hanley: All I want to have Mr. Warmack understand is that to be a fact before I ask some further questions.

Trial Examiner Ballinger: Proceed.

By Mr. Hanley:

Q. Are you acquainted with the practice rather generally used, Mr. Warmack, of a supplying company making an advertising allowance to its customers; that is, its reseller customers?

A. I have known of it being done, Judge Hanley.

Q. Is it not a rather common practice?

A. I do not know just how common it is. But I say I have known of it being done.

Q. Now, supposing that the Respondent company had
paid 50 per cent of the cost of newspaper advertise-
7407 ments and billboard operation, and maintenance cost,
or radio advertising time used in advertising its prod-
ucts under its own brand names, would that, in your judgment, have been a direct advertising expense against the jobber, naphtha and gasoline?

Mr. Austin: I would like to have the question read.

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

Mr. Austin: I object to the question. It does not state by whom the advertising was made.

Mr. Hanley: All right.

Mr. Austin: It does not.

Mr. Hanley: All right. It does—

Trial Examiner Ballinger: (Interposing.) Well, Judge.

there is a more serious objection to it in the opinion of the Trial Examiner. That is this, that unless that was incorporated in the contract between a jobber and the Respondent company, how could the Respondent company claim any benefits in differentials?

Mr. Hanley: Well, if your Honor please, that question has been raised heretofore in this case. I will confess I do not clearly understand it. If the Respondent company actually makes a payment to a jobber, for instance, for advertising, the fact of the payment and the benefits, if any, exist entirely apart from whether or not there is any contract obligation to make that payment or whether
7408 there is not. It is just identically the same thing as if the salesman goes out and smashes up an automobile. You do not anticipate that. It happens. There is an expense incident to it. It becomes a part of your marketing cost. I do not understand what difference the contract makes. It may prospectively have fallen into an undertaking, Judge, to determine in advance what your costs were going to be over a year ahead, that if you had a contract obligation to make an allowance of so much money per month or periodically to a jobber for advertising purposes, you would set that up in your budget of expense, as an expense in prospect for that period of time. But, if at the end of the year entirely apart from the contract you have spent the money you have given that amount of allowance and he has spent it. It is a cost to you.

Mr. Austin: There is no allowance in this case. Take, for instance, Ned's. Ned advertises unquestionably. Undoubtedly it is primarily to enhance sales at Ned's stores.

Mr. Hanley: Surely.

Mr. Austin: From which he derives an immediate profit.

Mr. Hanley: Surely. That is true.

Mr. Austin: It seems to me that clearly covers that situation.

Trial Examiner Ballinger: Yes. I think that is
7409 something which has to be given consideration in this case. Now, a payment incidentally benefiting the Respondent company where Ned's is handling Respondent company's goods, it would seem to me that that is in the nature of a gratuity. There is no compensation from the Respondent company to Ned's for the advertisement, as Mr. Austin has indicated.

Mr. Hanley: If your Honor please, we take this position, and I think that in all fairness we are entitled to present it to the Commission:

We spent so much money in advertising in the Detroit field. That is set up in account 075. With us that is a marketing cost. There is no disposition on the part of Mr. Warmack, as I understand it, to say that we did not spend that money or to say that it is not a marketing cost. He simply says, "You are not entitled to set that up as a basis for a cost justification on this differential."

Now, I believe I am accurately stating his position.

Trial Examiner Ballinger: Now, let us see if I understand now the exact difference. As I understand, Mr. Warmack's position is this: That your advertising does not enter into this actual cost differential between the retailer and the jobber; in other words, that these sales to the jobbers are not superinduced or accelerated by your advertising—

7410 Mr. Hanley: (Interposing.) Not—

Trial Examiner Ballinger: —and that there it stops. The gallonage sale to the reseller stations and the gallonage sale to the jobbers, and that that alone fixes the sole basis for determining the differential.

Mr. Warmack, am I correct with reference to that? Am I, Mr. Warmack?

The Witness: Your Honor, can I hear that read? I tried to follow it, but I got lost.

Trial Examiner Ballinger: Yes. If I am wrong about it I want to get corrected.

The reporter will read it back.

Mr. Hanley: Judge, I just want—I just want to do this, and I will say to the reporter that before he reads it, I want to make this statement. I want to make it entirely clear to your Honor that this is a very vital thing from the Respondent's standpoint. It goes clear to the heart of this question of price differential. I say that the jobber assumes certain functions and discharges certain obligations that we, as a supplying company, otherwise have to discharge ourselves at our own expense.

Now, it goes far and beyond and above that figure of two one-hundredths of a cent and so forth.

Trial Examiner Ballinger: Judge, in order for you to present that to the Commission, the Examiner has 7411 overruled the objection to this line of examination.

Now, Mr. Reporter, read my statement to Mr. Warmack and see if I have correctly understood his position.

Mr. Austin: I think it ought to show here just what you said so there will be no doubt about it in the record.

Trial Examiner Ballinger: Of course.

(The reporter read the statement of the Trial Examiner as follows:

"Now, let us see if I understand now the exact difference. As I understand, Mr. Warmack's position is this: That your advertising does not enter into this actual cost differential between the retailer and the jobber; in other words, that these sales to the jobbers are not superinduced or accelerated by your advertising—and that there it stops. The gallonage sale to the reseller stations and the gallonage sale to the jobbers, and that that alone fixes the sole basis for determining the differential.

"Mr. Warmack, am I correct with reference to that? Am I, Mr. Warmack?")

The Witness: Your Honor, that I believe covers and portrays my feeling with respect to this class of advertising which is for consumer acceptance.

Mr. Austin: Now, if your Honor please, I have been waiting to make a further objection to the pending question.

7412 The question was whether the witness would consider it a cost to the Respondent if the Respondent made advertising allowances to its jobbers.

The question is indefinite and does not say to whom the payment would be made. So, I object to it on that ground first.

But if it were corrected so as to refer to advertising allowances to jobbers, I would then object to the question upon the ground that since no such allowances are made, which it assumes, and which is not in the case, and that it is an improper question because if the Respondent make advertising allowances and even if that were a cost, that would be immaterial because it would raise legal questions which are not present in this case and which would relate to whether the advertising allowances could be made as to one customer unless made to all customers.

Therefore, the whole question, it seems to me, is not properly phrased.

It is based upon an assumption for which there is no basis of fact in this case, and if the answer were to take that assumption, it would serve no useful purpose in this case.

Mr. Hanley: Of course, the counsel for the Commission is objecting to a question which has never been asked. I said I would amend the question in answer to his 7413 first objection, and would reframe it. Now counsel is just speculating as to what I am going to ask this witness. I have withdrawn the question to which counsel was addressing himself.

Trial Examiner Ballinger: You may reframe your question.

Mr. Hanley: I will do so, your Honor. May we be off the record?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record. Proceed.

By Mr. Hanley:

Q. Assume, Mr. Warmack, that the Respondent company had paid to the four Detroit jobbers 50 per cent of the cost of which those jobbers were put in the matter of newspaper advertising, billboard operation, and maintenance and cost of radio time used in advertising the products of the Respondent company under the Respondent's brand names. Would you from your observation and experience as an accountant, regard that as a direct advertising expense against jobber, naphtha and gasoline?

Mr. Austin: Now, I object to that question upon all the grounds stated in my objection to the previous question.

Trial Examiner Ballinger: Objection sustained.

7414 Mr. Hanley: May I ask upon what grounds, if your Honor please?

Trial Examiner Ballinger: Because it embodies a factual situation that does not exist in this case, so far as the Examiner knows.

Mr. Hanley: Well, I am asking the witness to assume that factual state.

Trial Examiner Ballinger: Why would you indulge in assumptions that have no application to the pending issues?

Mr. Hanley: Well, I will try to explain it by a question.

By Mr. Hanley:

Q. Mr. Warmack, you have testified that you understand that a certain amount of advertising was done by the Detroit jobbers of Respondent's products under Respondent's brand name. Is that correct?

A. Yes, sir. That is my understanding.

It is further my understanding that I believe one of them did not do any of that advertising. Is that right?

Q. Well, perhaps that is true. I believe perhaps there was one of them that did none, or if he did any it was quite negligible.

A. Yes, sir.

Q. Is it not also your understanding that whatever cost
was incident to that advertising, that the jobbers paid
7415 it and were not reimbursed to any extent by the Re-
spondent company?

A. That is my understanding.

Q. Now, Mr. Warmack, suppose that the Respondent company had made allowances or made a reimbursement to the jobbers in respect of their advertising cost in so far as it dealt with Respondent's branded products. Would you regard the sum so paid by the Respondent to the jobber in defrayment of this advertising expense a direct advertising expense against jobber, naphtha and gasoline?

Mr. Austin: Same objection. And further objected to upon the ground that even if the Respondent had made additional advertising expenditures or paid advertising allowances, it would have no effect whatever upon their allocation of the money actually spent by the Respondent as shown in this case, or upon the benefit received by the Respondent from the jobbers advertising.

Mr. Hanley: May I suggest to your Honor that whether your Honor agrees that this is a proper charge or otherwise, that consistent with your Honor's permission to the Respondent to get into this record for final presentation to the Commission, that we ought to be permitted to have the witness' judgment on this question, or whether the fact is or is not so. And whether the Examiner or the Commis-
sion will regard it as of merit in the last analysis, I
7416 do not know, but just consistent, Judge, with your
first ruling, it seems to me that we ought to get this
on the record, because if the witness is not permitted to
answer it, it is just forever lost.

Mr. Austin: If your Honor please, this is going beyond the scope of your prior ruling.

If we are to go into the question of jobber advertising and the benefits received by the Respondent from that advertising, I think we ought to stick to that. I think we have just gone far afield as to the effect of some expenditure which the Respondent never made. It is clearly outside any point which will be within the confines of cross-examination.

Trial Examiner Ballinger: I think we have gone far afield already. I do not know that any serious damage can be done by going a little further off into the brush. The objection is overruled with the right reserved to counsel for the Commission to renew his objection and motion to strike when the answer is in.

The Witness: May I hear the question?

Trial Examiner Ballinger: Read the question.

(The reporter read the question as follows:

"Q. Now, Mr. Warmack, suppose that the Respondent company had made allowances or made a reimbursement to the jobbers in respect of their advertising cost in so
7417 far as it dealt with Respondent's branded products.
Would you regard the sum so paid by the Respondent to the jobber in defrayment of this advertising expense a direct advertising expense against jobber, naphtha and gasoline?")

The Witness: Your Honor, before I can answer that question I would have to make a study of all of the facts in a real situation and I could not possibly answer the question of a hypothetical situation unless all of these facts were presented that would be covered in a real situation. There are many points that would have to be looked into.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Austin: I move that the question and answer be stricken on the grounds previously asserted.

Mr. Hanley: I resist the motion so far as my question is concerned. I am certainly entitled to ask the question. You may move to strike the answer.

Trial Examiner Ballinger: The objection and the motion to strike is sustained and granted respectively.

(Witness temporarily excused.)

Mr. Hanley: I move that we adjourn until 1:45 o'clock, p. m.

Trial Examiner Ballinger: The motion is granted.
7418 And now, at 12:15 p. m., the hearing stands in recess until 1:45 p. m., of this day.

(Whereupon, at 12:15 p. m., a recess was taken until 1:45 p. m., this day.)

UNITED STATES COURT OF APPEALS

For the Seventh Circuit.

I, Kenneth J. Carrick, Clerk of the United States Court of Appeals for the Seventh Circuit, do hereby certify that the foregoing printed pages contain a true copy of Volume V of the printed transcript of the record, filed in this office on July 12, 1948, in:

Cause No. 9215.

Standard Oil Company,
Petitioner,
vs.
Federal Trade Commission,
Respondent,

as the same remains upon the files and records of the United States Court of Appeals for the Seventh Circuit.

In Testimony Whereof I hereunto subscribe my name and affix the seal of said United States Court of Appeals for the Seventh Circuit, at the City of Chicago, this 25th day of May, A. D. 1949.

Kenneth J. Carrick,
(Seal) *Clerk of the United States Court of Appeals for the Seventh Circuit.*

No. 23—Chart compiled by Mr. Marshall on 4-15-41 showing dual operations of the following supplying companies; Standard Oil, Socony Vacuum, Texas Co., Phillips, Shell and Mid-Continent, and showing percentage of distribution both direct and through jobbers and/or resellers in various cities.. 4825

No. 24—Chart and map showing refineries, terminals and pipelines serving Michigan, Indiana and Illinois 4826

No. 25-A—Graph of Michigan refinery capacity prepared by U. S. Bureau of Mines charting thousands of barrels per day for the years 1935 to 1940...... 4827

No. 25-B—Accompanying figures on Michigan refineries showing in figures the information portrayed by the graph (Ex. 25-A) 4828

No. 27—Chart showing volume of Zip and Joy gasoline and price differential below price maintained by Standard dealers from 1936 to 1940............ 4829

No. 28—Chart showing (1) gasoline prices maintained by Standard Oil Company dealers compared with those maintained by leading cut-price markets in Detroit from March 1938 to March 1941 and (2) Standard Oil Company's retail market position compared with the per gallon price advantage maintained by leading cut-price marketers............ 4830

No. 29-A—Chart showing Standard Oil Co., retail market position as related to differential between its retail price and that of cut-price and local brand marketers in metropolitan Minneapolis-St. Paul during same period as in Ex. 28................ 4831

No. 29-B—Similar chart for City of Milwaukee...... 4832

No. 29-C—Similar chart for City of Chicago......... 4833

No. 30—Table showing gasoline volume (from Michigan Tax Inspection Report) for the years 1935 to 1940 for Sunny Service, Puritan and Charles E. Austin companies 4835

No. 31-A—Table showing difference in marketing costs between distribution through regular reseller outlet versus distributing through Ned's Auto Supply Co., for 1937 4835

No. 31-B to Q—Being a table of 16 pages, each page marked as a separate alphabetical 31 exhibit, all dated 4-30-41, with further explanations and breakdowns of respondent's cost justification on the ½¢ differential allowed Ned's from September 1936 to March 1938 on tank wagon deliveries off the tank wagon price 4836

No. 33-A—Cost justification of the 1½¢ differential between jobbers and tank wagon dealer price in Detroit per gallon for the years 1939 and 1940 4852

No. 33-B—Explains the method used in arriving at a tank wagon reseller marketing cost in Detroit for the year 1940 4853

No. 33-C to E—Three separate sheets, each marked as an exhibit, explaining the procedure in reaching the jobber marketing costs on the basis of the 1939 Oklahoma survey 4854

No. 36-B-C-D—Pages from printed booklet containing the Wayne County list of registered wholesale gasoline distributors 4857

No. 37-A to D—List of Wayne County wholesale distributors as of Feb. 1, 1941, showing for each the date of his registration record, each page being a separate alphabetical exhibit of Series 37 4860

No. 38-A to E—Typewritten list, each page having an alphabetical exhibit number of the 38 series, listing information as to 42 Wayne County gasoline wholesale distributors, compiled from the records of the Gasoline Tax Department for the year 1941 as to retail stations and bulk plants and for the month of March, 1941, as to gasoline suppliers 4864

No. 45—Letter Aug. 27, 1936, Ned's to Standard Oil Co., at Detroit regarding intention to accept a competitive offer carrying a larger margin 4868

No. 46—Letter Feb. 19, 1938, Ned's to Standard at Detroit advising of offer from Red Indian Oil Company and from Shell Petroleum Co., requesting tank car price or threatening to acceptive competitive offers 4868

No. 47—Letter Apr. 30, 1941, Red Indian Oil Co., to Ned's, confirming proposed price on Fleet Wing gasoline of discount off tank wagon price and additional advertising and hauling allowances 4869

No. 48—Letter Dec. 23, 1940, from Ned's to Standard at Detroit, confirming quotation from Gulf Refining Co., on their brand name gas delivered at Ned's bulk plant 4870

No. 49-A—Letter Mar. 23, 1940, from Ned's to Standard Oil at Detroit requesting opportunity to discuss situation at earliest convenience 4871

No. 49-B—Promotional letter from Langer's Auto Supply enclosing two pennies and offering saving of 2¢ a gallon 4871

No. 52-B—Statement of dealer tank wagon prices—jobber retail prices—retail wagon margins, on Standard Red Crown gasoline from 1-1-37 to Mar. 6, 1941 4872

No. 53—Chart showing total gasoline sales volume in gallons and ratio of retail and wholesale sales to total sales of each of the four Standard Oil jobbers for the years 1936 to 1940, inc. 4873

No. 54—Chart showing volume of gasoline in gallons of the four Standard Oil jobbers for the years 1936 to 1940 with number of retail outlets supplied by each 4874

No. 55-A & B—Gasoline sales in the Detroit area of wholesale licensed jobbers and distributors of branded gasoline, being a 2 page statement for the years 1936 to 1940, inc., showing the name of the jobber, when he received his wholesale distributor license, his supplier and his gallonage for each of said years 4875

No. 57-A & B—Two page statement showing the gasoline sales in gallons in the Detroit area of licensed wholesale jobbers and distributors handling non-brand gas for the years 1936 to 1940. This is substantially the same type as Ex. 55-A & B, except it covers non-brand instead of branded gas and does not show the source of supply nor the year when the distributor became a licensed distributor 4877

No. 58—Chart showing for the years 1936 to 1940, inc., the total sales in the Detroit area, the total Standard Oil in said area and its percentage of total sales, Standard Oil sales exclusive of jobbers and percentage, Standard Oil jobber sales and percentage, sales of licensed jobbers other than Standard Oil handling branded gas and percentage, sales of licensed jobbers handling non-branded and percentage, sales of all licensed jobbers and percentage and sales of all other companies and percentage 4879

No. 59—Table showing yearly increase or decrease in gasoline sales for the years 1937 to 1940, inc., for the State of Michigan and the Detroit area, showing total Standard Oil sales, Standard Oil jobbers, branded jobbers, non-branded jobbers, all jobbers, and all others 4881

No. 60-A to D—Four page statement, each page marked alphabetically in the 60 series, showing continuous record from June, 1936 to November, 1940, of the retail gasoline price situation in Detroit as reflected by Standard Oil Co., surveys in the dates indicated on each of premium, house brand and third grade gasolines, showing for each the prevailing retail service station price, the dealer tank wagon price, the margin, the number of service stations selling below prevailing retail price and the average amount below the prevailing retail market price.... 4883

No. 63-A, B & C—Three page list, each page alphabetically marked as an exhibit in the 63 series, showing the brand names for gasoline marketed in the Detroit area for premium, house brand and third grade by the various companies................ 4885

No. 96-A—Modification of Ex. 31-A to exclude newspaper and billboard advertising.................. 4886

No. 96-B, C & D—A three page explanation of this modification 4887

No. 99—Supplement to distribution cost analysis, tank wagon reseller channel versus jobber gasoline sales, explaining regular costing procedure in the Detroit field for 1940. This exhibit contains 33 typed pages, explaining and giving examples of the company's regular accounting procedure and method of allocating costs between channels under the following

12 schedules giving account numbers and explanations as to each:

1. Salesmen and Sales Promotion Expense.
2. Advertising Costs.
3. Delivery and Warehouse Cost.
4. Income and Expense Incurred at Leased Retail Outlets Served by Tank Wagon.
5. Marketing Expense Items Incurred at Privately Owned Stations Not Leased But Engaged in the Distribution of Our Products.
6. Credit Information—Bad Debts and Recovery.
7. Field Office and Accounting Cost.
8. Supervision Cost Incurred in Sales Field.
9. Losses—Taxes—Insurance and Additional Salary Considerations.
10. Miscellaneous Marketing Expense Items.
11. Marketing Expense Items on Lubricating Oils.
12. General Office Marketing Costs. 4889

No. 100—Distribution cost analysis, tank wagon reseller channel versus gasoline sales, Detroit field, 1940. This exhibit contains 133 pages showing the actual allocations and figures in carrying out the work explained in Ex. 99 under each of the 12 schedules referred to therein, with numerous sub-schedules under each and explaining exactly what was done in each case 4914

No. 101—Standard Oil Company Form G. O. 189 Long, being the Sales Department Comparative Statement of Expense, Detroit field, year 1940, completely filled out and reflecting the results and processes set forth in Ex. 99 and 100. 5043

No. 103-A, B, & C—Letter Feb. 2, 1942, Mr. Hanley of Standard Oil to Mr. Austin of FTC 5045

Trial Examiner's Report, dated June 25, 1943....... 5047

Exceptions of Commission to Trial Examiner's Report, dated July 12, 1943.................... 5128

Exceptions of Standard Oil Co., to Trial Examiner's Report 5135

Finding as to Facts and Conclusions, filed Oct. 9, 1945 5161

Order to cease and desist, entered Oct. 9, 1945........ 5183

Motion of Commission to modify Order to Cease and Desist, dated Jan. 21, 1946 5185

Order to show cause, entered Jan. 23, 1946........... 5188

Motion of Standard Oil Co., for rehearing and for reconsideration of Order to Cease and Desist........ 5189

Answer and Brief on order to show cause............ 5221

Respondent's Answer and Brief in opposition to second proposed modification of Order to Cease and Desist 5232

Petition of the National Council of Independent Petroleum Associations for leave to Intervene, filed Apr. 8, 1946 5249

Order modifying Order to Cease and Desist issued Oct. 9, 1945, and denying certain other motions, entered Aug. 9, 1946 5253

Modified Order to Cease and Desist, entered Aug. 9, 1946 5254

Dissenting opinion to modified Order to Cease and Desist, dated Aug. 9, 1946 5257

Vol. I, pages 1 to 850; Vol. II, pages 851 to 1736; Vol. III, pages 1737 to 2586; Vol. IV, pages 2587 to 3454; Vol. V, pages 3455 to 4298; Vol. VI, pages 4299 to 5046; Vol. VII, pages 5047 to 5288.

Petition for Review, filed Oct. 4, 1946 5270
    Statement of Points 5276
Cross Petition of Federal Trade Commission, filed Nov. 18, 1946 5280
Stipulation re Exhibits, etc. 5281
Designation of Record 5285
Respondent's Designation of Record 5287

7419 **Afternoon Session.**

1:45 p. m.

Trial Examiner Ballinger: Come to order. You may proceed.

WILLIAM J. WARMACK resumed the stand and testified further as follows:

Cross-Examination (Continued) by Mr. Hanley.

Q. Mr. Warmack, do you feel that point-of-sale advertising may properly be segregated between tank wagon business customers on the one hand and jobber customers on the other hand? Do you, Mr. Warmack?

A. Yes, sir.

Q. And all the rest of the account 075, you would allocate on an all-gallonage basis. Is that correct?

A. I would not say that. No, sir.

Q. Well, how would you allocate it, if at all?

A. There may be some advertising costs in there susceptible of direct allocation. You said "all the rest."

Q. I mean all the rest aside from point-of-sale advertising.

A. Well, that point-of-sale advertising is a pretty broad term, Judge.

Q. Well, you are familiar, of course, are you not, Mr. Warmack, with the items of advertising that comprise 7420 account 075?

A. I am familiar with the general classifications.

Q. That is what I meant.

A. Yes, sir.

Q. In that general classification, there is a classification which has been referred to in this lawsuit as "point-of-sale advertising." Is that not so?

A. I should like to review the classifications, your Honor.

Trial Examiner Ballinger: Can you not answer that question? Did you get the question?

The Witness: Yes.

Mr. Austin: Well, this is a question directed to the record, your Honor. I do not think there is any such classification. I think there are certain classifications which Mr.

Boatwright has referred to as "point-of-sale advertising," but I do not believe that the classification was made as suggested by Mr. Hanley.

The Witness: That is the exact idea, your Honor. That is the reason I was having some question about looking it up without knowing more definitely what they had in mind. I think Mr. Austin has put it clearly.

Trial Examiner Ballinger: Is that an objection on your part, Mr. Austin?

Mr. Austin: I was just trying to clarify the situation, your Honor.

7421 Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

Trial Examiner Ballinger: If no such classification has been described in the record, the witness can so state.

The Witness: Your Honor, I would still have to review the classifications. I do not keep those things in my mind. The record shows.

By Mr. Hanley:

Q. Well, you keep some things in your mind, I am sure. Do you not do that, Mr. Warmack?

A. Yes, sir.

Q. We are now discussing advertising, account 075. This has to do, among other things, with newspaper advertising and billboard advertising, and perhaps some radio advertising, and possibly other types of advertising. You have assumed to eliminate the entire account in your criticisms. Now, surely, I take it you know what kinds of advertising compose that account. Is that not true?

A. I know or I am familiar with the general classifications of advertising, classifications made by the Respondent of the advertising contained in account 075. I should certainly be happy if I am allowed or ~~may~~ be allowed to refer to that classification if they are in this record and look at them.

Q. ~~If it~~ would be a means of refreshing your recollection, certainly there is no objection to your doing 7422 so, Mr. Warmack.

(The witness referred to the record.)

The Witness: May I hear the question again?

Trial Examiner Ballinger: Read the question.

(The reporter read the question as follows:

"Q. In that general classification, there is a classification which has been referred to in this lawsuit as 'point-of-sale advertising.' Is that not so?")

The Witness: Well, the item "point-of-sale advertising" has been used oftentimes in this lawsuit. The general classification of advertising contained in account 075 as portrayed by Commission's Exhibit 84-A, that of course covers the field for 1937, does not contain any such general classification. But in some of the classifications shown on that exhibit there is contained "point-of-sale advertising."

By Mr. Hanley:

Q. What is your understanding—

A. (Interposing.) That is my understanding.

Q. —of "point-of-sale advertising"?

A. What?

Q. Just outline what you understand that classification to contain.

A. I understand point-of-sale advertising, such advertising as occurs at the points where sales of the company's products are made.

7423 Q. Now, adverting to the original question: Do you feel that point-of-sale advertising may properly be segregated between tank wagon customers on the one hand and the jobber customers on the other hand?

A. Yes, sir. I feel that it can properly be done that way and that it may afford some cost differential basis if it were done that way.

Q. In view of the answer, why do you eliminate that entire account, inasmuch as there is much of it which contains point-of-sale advertising?

A. Because your company did not go to the extent of, in their analysis of the advertising account, to my satisfaction, analyzing what portion of that expense would be properly allocable to the separate channels of Respondent's Exhibit 101.

Q. I refer you to Respondent's Exhibit 100 which refers to point-of-sale advertising in detail. I will ask you, first: Have you studied it? If you have, what are your criticisms of it?

A. What page?

Q. I do not know. Respondent's Exhibit 100, in reference to advertising.

A. I find that it begins at page 25 of Respondent's Exhibit 100. May I review that, your Honor?

Trial Examiner Ballinger: You may.

7424 (The witness examines the document.)

The Witness: Now, may I have the question, if your Honor please?

Trial Examiner Ballinger: Read the question.

(The reporter read the question as follows:

"Q. I refer you to Respondent's Exhibit 100 which refers to point-of-sale advertising in detail. I will ask you, first, Have you studied it?—")

The Witness: I have studied it.

(The reporter read the following:

"If you have, what are your criticisms of it?")

The Witness: My criticism of it is that the account has not been properly broken down whereby it can be determined from these records, Respondent's Exhibit 99, 100, and 101, what portion of the point-of-sale advertising is properly applicable to tank wagon reseller customers.

I believe that covers the situation.

By Mr. Hanley:

Q. Referring you to "photos given away at jobber served stations," in the amount of $344.13, Respondent's Exhibit 100. What is your criticism of that breakdown of accounts?

A. What page, Mr. Hanley?

Q. 26.

A. Thank you.

Q. Please examine it.

7425 A. Yes.

(The witness examined the document at the page referred to.)

The Witness: It is not carried through.

By Mr. Hanley:

Q. What do you mean "It is not carried through"?

A. I mean that all of those accounts in which "photos given away," are included have not been properly carried through to show what portion of the expense is applicable to the separate classes of customers to which they apply.

Q. Mr. Warmack, on page 26 of the Respondent's Exhibit 100, under the item "Photos given away $344.13," is that not an exact breakdown of ~~the~~ exact expense to which the Respondent company was put in point-of-sale advertising in relation to jobber stations having to do with photos given away? If it is not, what is the right answer?

A. I think you are confused, very confused. I will endeavor to enlighten you. That item of $344.13 marked "photos given away," as shown on page 26 of Respondent's Exhibit 100 is one of a group of several expenses which Respondent company has calculated to be applicable equally to each of the retail outlets in the Detroit field. Of that total group of expenses which include photos given away, $344.13, Respondent company allocates $636.48 to jobber outlets.

The exhibit is silent as to what part of that class
7426 of expense it regards as applicable to tank wagon
reseller.

One further point: It is my understanding that the item of photos given away in the amount of $344.13, as set forth on page 26 of Respondent's Exhibit 100, that that is not a breakdown at all. It is my understanding that that actually represents the cost of these photos which were given away.

Q. Well, assume that it does.

And assume further that your construction is correct, Mr. Warmack, and that the list of accounts including "photos given away," 24 by 44 cards, station banners, display cards, window stickers, decalcomania for pumps, booklets, leaflets, and so forth, and miscellaneous printed matter having to do with this classification of advertising is applied to all reseller stations including the regular tank wagon business of the Respondent and the jobber business of the Respondent.

What complaint or criticism have you as to the method of allocating the proportion of that expense to the jobber stations as explained on pages 26 and 27 of Respondent's Exhibit 100 on the outlet basis?

A. I have no objection to it.

Q. Then why do you take it out of account 075 in Respondent's Exhibit 101 when you are criticizing the differential as disclosed by Respondent's Exhibit 101?

A. Because of the fact that I did not know what portion
of that class of expense the company assumed to leave
7427 in the tank wagon reseller column of Respondent's
Exhibit 101.

Q. Would not that be the difference between the total and that which was taken out and charged to the jobber channel, Mr. Warmack?

A. Oh, not necessarily, no.

Q. Was it not that, as a matter of fact?

The Witness: May I review, your Honor?

Trial Examiner Ballinger: You may.

(The witness examines certain documents.)

The Witness: Because of the fact that in the beginning when these expenses were originally incurred, as set forth on pages 5 and 6 of Respondent's Exhibit 99, in the company's regular accounting procedure, there is not provided any column where such costs are shown separately for the direct shipment business.

And this class of expense, as I understand your exhibit and other information in these records, is separated in whole or in part on a basis of gallonage between channels as shown thereon. That information is set forth on page 26 of Respondent's Exhibit 100 and does not assume to carry the allocation through to show what portion of this expense is actually in the tank wagon reseller column on Respondent's Exhibit 101, or if a portion of it remains in some of the other columns.

That is my objection.

7428 Mr. Hanley: Respondent moves to strike the answer of the witness as not responsive to the question and asks that the question be read to the witness.

Trial Examiner Ballinger: The Examiner reserves ruling on the motion until the question is read and the answer as given thereto.

(The reporter read the question and answer.)

Mr. Austin: The witness explained that at length, and quite clearly, in my opinion, why he does contend that the total expense on page 26, Respondent's Exhibit 100, is not properly applied for the purpose of the cost differential.

Trial Examiner Ballinger: He was not asked for an explanation. The question does not call for an explanation.

Mr. Austin: Well, I agree with that, but I think that while I agree with your Honor's comment that the question did not call for an explanation I think the explanation is quite proper.

Trial Examiner Ballinger: The witness' answer, "Oh, not necessarily, no," may stand. The rest is stricken.

By Mr. Hanley:

Q. Can you now give an answer to the question, Mr. Warmack? Do you know?

The Witness: I would like to hear the question again.

7429 (The reporter read the following question:

"Q. Would not that be the difference between the total and that which was taken out and charged to the jobber channel, Mr. Warmack?")

The Witness: I only know from the information set forth in these records. And from that information set forth in these records, my answer is—no.

By Mr. Hanley:

Q. Directing your attention to page 26 of Respondent's Exhibit 100, and the list of accounts there appearing which refer to point-of-sale advertising costs. Does it not appear from those pages 26, 27, and 28 of Respondent's Exhibit 100, that there was an allocation made by the Respondent's accountants of point-of-sale advertising costs to jobber served stations?

A. That is my understanding.

Q. Then, does not the balance of the account apply to other tank wagon reseller accounts?

A. It certainly should apply there, yes, sir, in my opinion.

Q. Very well. What is the matter, in your judgment as an accountant, with the allocation used by the Respondent's accountants of this point-of-sale advertising directly to jobber served stations as explained on pages 26, 27, and 28 of Respondent's Exhibit 100?

The Witness: Your Honor, I have answered that 7430 fully with respect to the information on page 26. I should hope that that answer should stand.

Trial Examiner Ballinger: You may answer it unless there is objection.

Mr. Hanley: There has been no answer to that question yet, Judge.

The Witness: Can that answer be recopied here?

Trial Examiner Ballinger: Answer the question.

Mr. Austin: If your Honor please, this question is directed to pages 26, 27, and 28.

The Witness: I have already answered that.

Mr. Austin: I suggest that the witness go ahead with page 27, having previously answered, if your Honor please, most fully with regard to page 26.

Mr. Hanley: If your Honor please, may I have an answer to my question, if it is proper? If it is not a proper question I am sure your Honor will refuse the answer.

Trial Examiner Ballinger: Do you understand the question?

The Witness: I think I do, Judge Ballinger.

Trial Examiner Ballinger: You may proceed to answer it.

The Witness: I will start with page 27, Judge Ballinger. Before I answer that I will have to examine records. May I review?

7431 Trial Examiner Ballinger: Certainly. You may review.

(The witness examines certain documents.)

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

The Witness: Now, your Honor, may I have the question read?

(The reporter read the following question:

"Q. Very well. What is the matter, in your judgment as an accountant, with the allocation used by the Respondent's accountants of this point-of-sale advertising directly to jobber served stations as explained on pages 26, 27, and 28 of Respondent's Exhibit 100?")

The Witness: I have no objection to the way this class of expense was assigned to the jobber outlets, as explained on those pages.

By Mr. Hanley:

Q. Why, then, Mr. Warmack, did you take out of Exhibit 100 the entire account 075 without giving any consideration at all to the point-of-sale advertising?

A. I did not do that.

Q. Did you not eliminate the entire account?

A. No, sir,—yes, sir.

7432 Q. Does that not mean that you did not give consideration to point-of-sale advertising, as between the general tank wagon business and the jobber business?

A. It most certainly does not.

Q. Do you not think as an accountant that point-of-sale items of expense are allocable to various points of sale?

A. Yes, sir. Most assuredly they are.

Q. Then, why, Mr. Warmack, did you eliminate that entire account?

A. Because your exhibits, Respondent's Exhibits 99 and 100 contain no information showing what portion of this class of expense you had assigned to the tank wagon reseller column in Respondent's Exhibit 101. I had no information.

Q. Now, Mr. Warmack, adverting to a question I asked you a little while ago. From purely an accounting standpoint after the elimination of the allocations made to the jobber channels are given consideration, do not the other point of sale costs apply to the tank wagon business of the Respondent company?

A. They surely do.

Q. Then why do you say that you do not know from these exhibits what that expense was and where that expense was?

A. Because that information is not set forth in Respondent's Exhibits 99 and 100. Those exhibits are entirely silent on what portion of expense of the point-of-sale
7433 advertising should be assigned to in the tank wagon
reseller column. I believe that answers your question.

Q. Mr. Warmack, did you not know it as a fact, and could it be otherwise found that it was assigned to the tank wagon business of the Respondent?

A. There is no figure here showing what it is. How can I know how much it is?

Q. Did you do any arithmetic about it?

A. Please explain what you mean.

Q. I mean did you study it? Did you find out? Do you know?

A. I do not know. I could not know.

Q. You have just stated that it must be the balance after the jobber assignments are made, the balance must be assignable to the tank wagon business of the Respondent company.

Now, how did you find that out, Mr. Warmack?

A. In the first place, I do not know what the total was to take this amount that you have assigned to the jobber business from.

Q. Well, you read pages 26, 27, and 28 of Respondent's Exhibit 100? Did you not?

A. Yes, sir.

Q. As I understand it, you do not dispute those figures?

A. Oh, certainly not.

Q. Then you do know what the total was? Do you not?

A. I certainly do not know. I should like to respectfully direct your attention, if I may, to the figures
7434 appearing on pages 27 beginning with the second
paragraph, with advertising signs and jobber outlets which are shown in the amount of $1,358.48. Now, I would like to know if anywhere on that page, anyone can show me what the total of that expense for all of the company is. I do not know. I could not know. It is not there.

Q. Did you undertake to find out?

A. Why, I certainly undertook to find out.

Q. Did you?

A. I did not.

Q. Why not, Mr. Warmack?

A. Because the information is not in these reports.

Q. Did you make any inquiry when you were in Detroit for six or seven or eight weeks?

A. I required of the Respondent company's accountants. I asked them to furnish me with information as to the breakdown of those advertising accounts, particularly account 075.

Q. Did you ask any one in the Respondent company for the total expense of point-of-sale advertising?

A. Nothing that I recall as such.

Q. Do you think as an accountant that you could fairly eliminate the entire account 075 including point-of-sale advertising until you had that information?

A. I certainly could. It is proper to do it. It would be improper to leave it in there in piecemeal form.

7435 Q. Do you feel you had no obligation as an accountant to ascertain the facts before you eliminated the facts?

A. Yes, I did. I made the effort.

Q. Did you make the effort?

A. Yes, sir.

Q. How did you?

A. I asked Mr. Boatwright and Mr. Houghton in Chicago.

Q. What did you ask?

A. I asked if the company were able to furnish me with an analysis or breakdown of account 075. I was informed that it could not.

Q. Did you ask them or either of them at any time to give you the total expenditures of the company applying to the pages, so-called, point-of-sale advertising, as this item or items are defined on page 26 of Respondent's Exhibit 100?

Mr. Austin: If your Honor please, there is an exhibit in the record which is a letter which counsel for the Commission addressed to the Respondent asking the Respondent to produce a breakdown of this account, and also specify the matter to which counsel is now referring; that is, the total of the expense of the Respondent point-of-sale advertising of the nature to be found on pages 26 and 27 of Respondent's Exhibit 100.

That request was not complied with. I never had
7436 anything in the way of a breakdown from them about
it. Therefore, I object to any further questions of this witness regarding any request that he made. Such request, if made by the witness, would have been futile because requests made by the counsel for the Commission had already been denied by the Respondent.

Mr. Hanley: They were not denied.

Mr. Austin: They were not complied with.

Mr. Hanley: That is not a fair statement to the Court. They were not denied. I am asking this witness questions as to what he did and what he was able to find out to get the answers. I do not know the answers. I confess I could not tell you what the answer is. I could not tell you because I do not know.

Trial Examiner Ballinger: Well, if he relied upon that request and went no further, he can so state.

By Mr. Hanley:

Q. I will ask you first, Mr. Warmack, if you knew that that request was made by your counsel?

A. Yes, sir.

Q. And before you called there?

A. Yes, sir.

Q. And did you quit there?

A. No, sir.

7437 Q. What did you do to follow it up?

A. I made a trip from Detroit to Chicago.

Q. What did you do in Chicago?

A. With respect to this particular account?

Q. Yes.

A. I did a lot of things other than this.

Q. Yes?

A. I asked your accountants in your Chicago office for a breakdown of this account.

Q. Well, just state what you said to them. They are both here. I would like to have you state for the record exactly what you said.

A. I said essentially what I stated for the record just one second ago.

Trial Examiner Ballinger: You said in substance that?

The Witness: Yes, sir.

By Mr. Hanley:

Q. What did they say to you?

A. Mr. Boatwright told Mr. Houghton to inquire and determine positively if such a segregation had been made or attempted—as my memory—

Q. (Interposing.) What segregation?

A. —an analysis of this account. That is what we are speaking about? Is it not?

7438 The Witness: If your Honor please, may I go ahead and answer the question?

By Mr. Hanley:

Q. (Interposing.) Mr. Warmack, is not an analysis of this account so far as the jobber situation is concerned and do you not grant that and do you not regard this Exhibit 100 as an analysis of this account "point-of-sale advertising"; so far as the jobber situations are concerned?

The Witness: Your Honor, I have never completed my answer to the previous question. Shall I pick up here? I do not question that.

Mr. Austin: Now, your Honor, the witness was in the middle of stating what the conversations were in Chicago.

Trial Examiner Ballinger: Very well. He may refer to the previous question and finish his answer.

By Mr. Hanley:

Q. What did they say to you?

Trial Examiner Ballinger: Are you familiar with it?

The Witness: Yes, sir. I am familiar with it. I am endeavoring to complete my answer.

Trial Examiner Ballinger: Proceed.

The Witness: Mr. Houghton did take occasion to inquire and determine if such an analysis had been made and study had been made, and he found that the company 7439 had gone through considerable study and made considerable study and such a breakdown, a general breakdown of account 075, which is this account, for the year 1937.

It is my memory that he found that no segregation; that is, analysis of this account, had been made for the year 1940 other than the studies as outlined and portrayed in Respondent's Exhibit 100.

Trial Examiner Ballinger: You said that Mr. Houghton found this. Is that what he reported to you?

The Witness: Yes, sir. I was with the man all of the time. We were going around the departments and reviewing the working papers. We were working together almost the entire time that I was in Chicago, and for a good portion of the time we worked in the same manner while I was in Detroit.

By Mr. Hanley:

Q. Was that a study that you regarded as a competent accounting job, Mr. Warmack?

A. Do you mean Mr. Houghton's inquiry about these papers?

Q. I mean the study that you said that he found.

Trial Examiner Ballinger: I understand that was a study for 1937.

Mr. Austin: That is Commission's Exhibit 84.

Mr. Hanley: I see.

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

7440 The Witness: Will counsel please explain?

By Mr. Hanley:

Q. I cannot explain beyond the question, Mr. Warmack. I am asking you for your judgment as an accountant and you saw it. I have not. I do not know what it was.

Trial Examiner Ballinger: Are you referring now to account 075 for the year 1937?

The Witness: May I review, your Honor?

Trial Examiner Ballinger: Yes.

Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

The Witness: I have before me Commission's Exhibit

84-A, 84-B, 84-C, which is entitled "Analysis of Advertising Expenditures by Media Chargeable to Reseller Channels, Detroit field, 1937."

I certainly do not dispute the figures that appear on that exhibit. It was prepared by the Respondent and presented to Commission's attorneys, as I understand it.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

The Witness: It may be that a more thorough analysis is possible. I do not question that. I do not question the good faith of the Respondent or its accountants, but
7441 such a separation as appears here, as far as I have
ever been able to determine, was not made for the year 1940. And I was told that while I was in the Chicago office.

By Mr. Hanley:

Q. Just one more question on this phase of account 075, Mr. Warmack.

A. Yes.

Q. Irrespective of the amount of the account 075 that might be represented by point-of-sale advertising allocable to tank wagon business, and in view of the fact that a special allocation of point-of-sale expense was made to jobber outlets, do you regard it as fair from an accounting standpoint that you should eliminate the entire account 075, inclusive, of an allocation of some amount of point-of-sale advertising irrespective of whether or not that amount is accurately ascertainable or not from anything that you have seen in your studies?

Mr. Austin: Before the witness answers that, I would like to know what counsel means by "eliminate"? Eliminate from what?

Mr. Hanley: I mean by that, Mr. Austin, that Mr. Warmack has eliminated the entire account 075 as a predicate for the determining of any cost differential.

Mr. Austin: Well, I do not quite agree with that premise. There were two things which were done.

7442 Trial Examiner Ballinger: Well, Mr. Warmack should know.

Mr. Austin: Well, I do not see how Mr. Warmack can eliminate anything. He can state his opinion, and he has testified as to what costs he thinks afford a differential, and as to the accounting procedure of the Respondent, but I think there is a misconception here when we talk about Mr. Warmack eliminating something. What is there is there.

Now, I would like to say this, your Honor. There were two things done which I think counsel is referring to.

In the first place, Commission's Exhibit 133 was prepared. That exhibit includes no part of account 075. And I explained that that exhibit was prepared under my direction, and as to what accounts were included therein and what accounts were eliminated therefrom, that was entirely my responsibility. Mr. Warmack merely followed my direction. The only place Mr. Warmack's accounting experience came into play was in connection with the accounts marked with an asterisk in which he had had the responsibility of making the adjustment which he explained.

Secondly, in the testimony of Mr. Warmack, which he gave concerning computations as to the effect on the cost differential of 1.51 cents claimed by the Respondent that the elimination of this entire account would have.

Now, there again, Mr. Warmack did not eliminate
7443 the account, but he stated his computation and the effect on the cost differential that the elimination of the account would have.

Trial Examiner Ballinger: Well, as I understand, you cast some doubt about the usage of the word "elimination"?

Mr. Austin: I do.

Trial Examiner Ballinger: As to whether that is the proper word to use in that place?

Mr. Austin: I do not think that the question is a proper one that is asked the witness. Counsel has asked several questions of the witness as to whether he did eliminate something and why he eliminated something else.

I think the witness certainly may be asked in any way that counsel wishes to his reasons for contending that account 075 or any part thereof would or would not afford a cost differential or as to the method in which it was handled.

Mr. Hanley: Well, if your Honor please, I regret if my grammar was not acceptable to counsel for the Commission, but it must be apparent to your Honor that this witness has been testifying for four weeks that in his judgment certain things should be eliminated from this account, and certainly account 075 is one of them.

RECORD

P.4314 - 4389

Mr. Austin: He has been testifying to the effect that certain items could not be properly considered.

Mr. Hanley: Well, it is a distinction without a
7444 difference, so far as I am concerned.

Trial Examiner Ballinger: You may use the word "elimination"; it is perfectly plain to the Examiner.

Mr. Hanley: I think it is perfectly plain to the witness.

Trial Examiner Ballinger: They both mean about the same.

Mr. Hanley: I do not think the witness has had any difficulty understanding it. I have asked him dozens of questions of that character.

Trial Examiner Ballinger: Let the witness answer the question.

Read the question to the witness.

(The reporter read the following question:

"Q. Irrespective of the amount of the account 075 that might be represented by point-of-sale advertising allocable to tank wagon business, and in view of the fact that a special allocation of point-of-sale expense was made to jobber outlets, do you regard it as fair from an accounting standpoint that you should eliminate the entire account 075, inclusive, of an allocation of some amount of point-of-sale advertising irrespective of whether or not that amount is accurately ascertainable or not from anything that you have seen in your studies?")

The Witness: It is my opinion that the whole
7445 account; that is, account No. 075 entitled "Advertising," should be eliminated or removed from Respondent's Exhibit 101, or else separated therein on the basis of gallonage which would afford no cost differential unless and until information is at hand to make a proper segregation of the portion of advertising contained in that account which represents point-of-sale advertising, and which may afford to some extent a cost differential.

There is a possibility that some small portion of advertising cost included in account 075 which was incurred in connection with point-of-sale advertising may afford some cost differential.

But that portion of point-of-sale advertising which is included in the account has not been separated from the advertising expense incurred for consumer acceptance by the Respondent. That is, all of it has not been properly separated and segregated, in my opinion.

There are separations made on pages 26, 27, and 28 of Respondent's Exhibit 100 which show portions of point-of-sale advertising which Respondent assigned to direct shipment business. But there is insufficient information on the exhibit as to what portion of this class of advertising should be properly assigned to the tank wagon reseller business of the Respondent.

That is my opinion.

7446 By Mr. Hanley:

Q. All right. That is your opinion. Now, let us get to the fact. When you were in Detroit, did you check the allocations as made to the jobber channel on that class of point-of-sale advertising?

A. Will you explain what you mean by "check"?

Q. Did you follow through and see if that was the amount of advertising that was allocable to the jobber channel?

A. Certainly not. I did not study the underlying records in that particular account. I did not question it—these three pages.

Q. Did you check to see what point-of-sale advertising was allocable to the tank wagon reseller business or tank wagon business of the Respondent company?

A. No, sir. I was not required to do so.

Q. And without doing that—that is, without having done that and other of those things, you condemn the entire account 075? Is that true?

A. That certainly is true. I was not required to prove the company's case of cost justification.

Q. As an accountant, have you ever given consideration as to why organizations spend money on advertising?

The Witness: What is the question?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

7447 The Witness: I never made a general study of advertising activities as such.

By Mr. Hanley:

Q. Is that a difficult question?

A. I can give you an assumption, Judge.

Q. Is that a difficult question, Mr. Warmack?

A. No, sir. But I was directed not to answer assumptions.

Q. I am asking you no assumption.

Mr. Hanley: Will you read the question?

Trial Examiner Ballinger: Have you ever considered that question?

The Witness: I have considered it in connection with these Robinson-Patman cases especially when it has been urged that it should be used in determining cost differentials. I believe that is about the extent to which I have gone into that matter.

By Mr. Hanley:

Q. All right. If you have given it some consideration, Mr. Warmack, why do they do so? What, in your mind, is the end object? What is the purpose?

A. It has always been my general idea that that advertising; that is, advertising activities of the company is to promote the sales of their products and create the demand for their products, and to further the sale of them in every
way possible, to create a good will in the public mind,
7448 and various and sundry other things for the promotion and sale of its products.

Q. Why do these firms employ salesmen?

A. To sell the products, I assume. I have never been a salesman.

Q. Have you not advocated at some points in your testimony that it is sound accounting to allow the indirect to follow the direct expenses?

A. That is often done. And I believe I have so testified in this record.

Q. Is it not correct, Mr. Warmack, that advertising is a mass selling effort, while the work of a salesman is a personal selling effort, and that both have the same objective?

A. Well, it is my testimony, or rather, it is my understanding that every effort made by the company to place its products in the hands of a consumer, is a selling effort. It is my understanding that every employee of your company is, in fact, a salesman pushing the products to the public for consumption.

I believe that has been so testified to here.

Q. Is that an answer to the question, in your judgment?

A. Well, unless I misunderstood your question, Judge.

Mr. Hanley: Will you read the question?

(The reporter read the question.)

7449 By Mr. Hanley:

Q. Will you answer the question?

Trial Examiner Ballinger: Apparently that is not a very satisfactory answer.

The Witness: It is my understanding that they both have the same objective; at least, that is what I tried to state in my answer.

Trial Examiner Ballinger: How ~~about the~~ advertising being a mass selling effort?

Read the question again.

(The reporter again read the question.)

The Witness: Well, the question contains three parts. I only thought it contained one part. I will ask the reporter to read each part and I will answer each part as it is read.

Trial Examiner Ballinger: That may be done.

(The reporter read the following:

"Q. Is it not correct, Mr. Warmack, that advertising is a mass selling effort * * *")

The Witness: It is my understanding that general advertising is performed for the purpose of selling a company's products and generally may be considered as a mass selling effort.

Trial Examiner Ballinger: Read the next part.

(The reporter read the following:

7450 "* * * while the work of a salesman is a personal selling effort * * *")

The Witness: That is my understanding.

Trial Examiner Ballinger: Read the last part.

(The reporter read the following:

"* * * and that both have the same objective?")

The Witness: That is my understanding.

By Mr. Hanley:

Q. Would it be acceptable to you, therefore, to allocate an indirect cost, such as advertising sales effort on the basis of the direct effort; that is to say, the salesmen's salaries?

A. Each case would have to stand on its own.

In the case of advertising, we have several classes of advertising. And for the purposes of establishing a cost differential, I certainly could not subscribe to the use of general newspaper advertising following anything except the per unit basis in the absence of a study showing that it should not follow that basis for the determination of a cost differential.

Q. Well, in this case, to make it specific.

A. In this case, it is my opinion that it certainly should not follow the selling effort of any salesmen for the purpose of establishing a cost differential.

Q. Then, so far as sales effort from advertising 7451 is an indirect effort you abandon any principle that the indirect cost should follow the direct cost?

A. I most certainly do not. In the first place, this word "indirect" cost is a very elusive term.

Q. Is it elusive in the way you have been using it, Mr. Warmack, in your testimony?

A. The term "indirect cost" without stating what those indirect costs are is elusive in any instance.

Q. And that is true throughout your testimony? Is it not?

A. That is true anywhere that term is used if you do not state what it includes.

Mr. Hanley: May we have a five minute recess?

Trial Examiner Ballinger: We will take a recess for five minutes.

(A short recess was taken.)

Trial Examiner Ballinger: Come to order. You may proceed.

Mr. Hanley: I would like to have the last question and answer read.

Trial Examiner Ballinger: Read the last question and answer.

(The reporter read the last question and answer.)

By Mr. Hanley:

Q. Now, Mr. Warmack, assume that there were to be an allocation of an indirect cost; that is, advertising on 7452 the basis of direct cost; that is, salesmen's salaries. I am not asking you to agree with that. I am just asking you to assume that sort of a situation.

Would not such a practice result in creating a substantial differential in a selling effort when the jobber, naphtha and gasoline is $210.68, and there is $207,455.16 salesmen's salaries for petroleum products as evidenced by Respondent's Exhibit 101?

A. Yes, sir. That would be true assuming further, of course, that your salesmen's salaries and expenses had been properly allocated to the separate channels.

Trial Examiner Ballinger: That is embraced in the question.

By Mr. Hanley:

Q. Yes. They were not, in your judgment?

A. They were not, in my judgment.

Q. That would be about one tenth of one per cent of the total? Is that right?

A. I do not know. I have not made that calculation.

Q. Well, just roughly, $210.00 to $207,455.16, Mr. Warmack?

A. I will take your calculation on it.

Q. How much—perhaps you will desire to refer to Respondent's Exhibit 101—how much of account 075 is chargeable to advertising jobber, naphtha and gasoline?

A. I have Respondent's Exhibit 101 before me.

7453 Q. Now, answer the question, Mr. Warmack.

A. May I have the question?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

The Witness: $3,325.24 of the advertising included in account 075 is charged to the column entitled "Jobber, Naphtha and Gasoline" on Respondent's Exhibit 101.

By Mr. Hanley:

Q. Referring to account 075. What is the total of that account applicable to petroleum products, Mr. Warmack?

A. I do not know, but I can tell you what the figure is as shown on Respondent's Exhibit 101.

Q. That will be satisfactory.

A. The figure is $199,827.88.

Q. Is it not true then that the process used by the Respondent's accountants results in a charge of one per cent of advertising, approximately one per cent of advertising—to jobber customers as compared with one-tenth of one per cent of salaries of salesmen?

A. May I inquire, Judge Hanley, do you mean the total of each of those costs after eliminating those portions which were assigned to the automobile supplies?

7454 Q. I mean just the allocation to the jobber or direct sales column, Mr. Warmack.

A. Yes, the relation of that to the total which you have applied to petroleum products or the total of the field?

Q. That is in reference to total petroleum products.

A. With reference to the total petroleum products. The percentage would represent the relationship which $3,275.24 bears to $199,827.88 for account 075.

Now, may I inquire which was the other one, please?

Q. As compared to one-tenth of one per cent of salesmen's salaries or approximately that.

A. May I inquire if you are referring to the figures as shown in account 004 entitled "Salesmen's Salaries"?

Q. Yes.

A. That is correct. Approximately one-tenth of one per cent, or the relationship of $210.68 bears to $207,455.16.

Q. In all fairness, do you think it equitable to charge consumers advertising on a straight gallonage basis?

A. I would have to inquire there, Judge Hanley, do you mean all gallon sold by the Respondent company including all the gallonage as represented by these six petroleum product channels in Respondent's Exhibit 101?

Q. I mean it as you have testified to it, Mr. Warmack. Whatever you mean by "gallonage" is what I mean.

A. Well, I have used the term in many different
7455 instances as bulk plant gallonage, total gallonage, gallonage of tank wagon reseller, tank wagon consumer, gallonage of jobber, naphtha and gasoline. It would cover all of that range. The term "gallonage," simply gallonage, varies with other gallonages. Now, I would like to inquire just which gallonage do you mean?

Q. Well, permit me to ask you—

A. Yes, sir.

Q. If you have not taken the position that account 075 should be charged on a straight gallonage basis, over-all gallonage?

A. No, sir.

Q. What gallonage would you eliminate from consideration in account 075 if any?

A. I would have to make a study to determine just what gallonage I would eliminate. For example, in newspaper advertising, if you are advertising Red Crown gasoline to the automobile driver, it seems to me that the gallonage used in the tank wagon reseller column and the gallonage used in the jobber, naphtha and gasoline, representing, as I understand, the gallonages to be sold by reseller stations, should be your measuring factor for allocating that particular advertising cost. That is advertising for consumer acceptance to that class of consumer for the most part, the automobile driver.

Q. That would include all of the customers for that
7456 gasoline that you have?

A. Yes, sir. That would include all automobile drivers.

If you have consumer customers both, or, we will confine it just for that gasoline then a study would have to be made to determine if that advertising influenced your consumer business or if it were made for the purpose of making or creating a demand on the part of the consumer customer. What I am speaking about is tank wagon consumer business of the customer.

Q. Well, is there any gasoline indicated on Respondent's Exhibit 101 to which you would not spread account 075 in your testimony that it should be done on a gallonage basis?

A. I certainly do not see how in the world that could spread to the other direct shipment customers channel or column on this Respondent's Exhibit 101. I am speaking there directly of advertising for consumer acceptance.

Q. Do you know then that the newspaper advertising, for instance, has a bearing on consumer acceptance from the standpoint of a consumer who may buy, the direct shipment consumer customer?

A. It might.

Q. Well, if it does, is there any reason for eliminating that gallonage, according to your theory?

A. A proper investigation of that entire situation would disclose that fact. And I could not answer from the
7457 witness stand as to that particular point, not having made such a study or having such a study, if any, ever been made available to me.

Q. Do you think a study would disclose it?

A. A proper review would at least afford some information there. I am not sure of that as to whether or not that particular factor is involved.

Q. Do you think that studies result in any accurate results as to what particular customers and in what amount customers are induced to buy, by any particular advertising campaign?

A. I certainly do not know. And I would have to know the extent of the study or the coverage. But I do know this, that the study would afford better information than guesswork.

Q. Have you ever made an advertising study in your entire life, Mr. Warmack?

A. No, sir.

Q. So you really do not know anything about that question; that is the fact. Is it not?

A. Oh, I know a little something about it. Yes.

Q. But you have never done any work along that line?

A. No. ~~I cannot~~ say that I have.

Q. Have you ever heard of allocating those expenditures, advertising expenditures among customers, on the basis of dollar value of sales?

A. Yes, sir.

7458 Q. Do you regard that as a sound accounting procedure?

A. Highly arbitrary.

Q. That is your opinion?

A. There may be some instances where it would be a proper method. We are talking about things generally, I understand.

Trial Examiner Ballinger: He merely asked you if you would express your opinion on it.

By Mr. Hanley:

Q. Is your answer complete as you now want to leave it?

A. I did express an opinion.

Q. If the Respondent had done that, there would have been a resultant cost differential between the tank wagon and the jobber customers? Would there not? I am referring now to the advertising account, of course, Mr. Warmack.

A. Yes, there would have been a differential to the extent of, or at least influenced by the one and a half cent price differential which the preferred customers receive.

Q. Did you give any consideration to the possible influence of that kind of an allocation in your study of this matter?

A. In my opinion, such an allocation would not be proper in this matter. And I have known about it. But I have not made any intensive study of it.

Q. Have you ever heard of allocating advertising according to benefits secured as reflected by gross profit margin, or marketing expense?

7459 A. I have heard of it, yes.

Q. Do you regard that as a sound accounting procedure?

A. If it is properly established by a study.

Q. Supposing that the Respondent company had done that in this instance, would there have been a cost differential?

A. I could not answer that question. I do not know what the gross margin was.

Q. Mr. Warmack, is it not true that any of the customary means of allocating advertising expenditures as used by various accountants except unit of sale, as you have suggested, would result in a cost differential between sales to tank wagon customers and to jobber customers?

A. I have to have some information. Please explain what you mean by “customary.”

Q. Mr. Warmack, I am going to leave that to you. You are an accounting expert and I mean by “customary” procedures, those procedures which are understood among expert accountants to mean customary procedures. I regard myself as far less well-informed than you should be on that subject.

A. Do you regard “customary” procedures the procedure you have just outlined, if so, in some instances, there would be a cost differential. To familiarize myself with all of the procedures used, or the principle procedures used in the allocation of cost by various companies or their accountants, would require a review of some of
7460 the records of this Commission, your Honor. I know
that advertising has been separated in many instances and for many purposes. But just what effect separations, various separations would have as made by others in the case at bar of this particular class of expense, the answer would have to be—I do not know.

Q. Adverting to account 520 on Respondent's Exhibit 101, Mr. Warmack. You have testified at length in regard to that. In your testimony you first limited the cost under this account as having any bearing on cost differential to $26,226.38. You referred to that in your testimony on page 6488. You further reduced that amount to $20,108.90. Is that not correct?

A. No, sir. That is incorrect. It is my opinion, if I might state, that the $26,226.38 is—

Q. (Interposing.) There is no question pending, Mr. Warmack, please. I will ask you a question now.

Trial Examiner Ballinger: One moment. Is there a question or not? Was the witness afforded an opportunity to answer the question?

Mr. Hanley: He did answer it, as I understand it.

Trial Examiner Ballinger: Do you desire to amplify or explain?

The Witness: Yes, sir. I was trying to do so. I was interrupted by Respondent's counsel. May I?

Trial Examiner Ballinger: You may do so.

7461 The Witness: It is my opinion that $26,226.38 in this account representing contributions by the company to match the contributions by the employees for the purpose of annuity and retirement in the Detroit field for 1940 is a proper charge from which to arrive at a cost differential.

By Mr. Hanley:

Q. Very well, now; will you just please answer these questions as to whether you said these things or whether you did not say them, Mr. Warmack, without any explanation.

I refer you to page 6488, and will ask you if you did not make the following statement:

"In the case of account 520, the total in that account of $157,014.35, as shown on Respondent's Exhibit 101, was not used in making the calculation, and in lieu thereof a figure of $26,226.38 was used representing the contributions by the company to match the contributions by employees for the purposes of annuities and retirement in the Detroit field for the year 1940. Using that figure the same procedure was used in arriving at the figure shown on Commission's Exhibit 133, as just described for account 244."

Trial Examiner Ballinger: Did you make that statement?

The Witness: Yes, sir.

By Mr. Hanley:

7462 Q. I now ask you, Mr. Warmack, to refer to page 6863 of the record referring to the same account 520.

I ask you if you were not asked this question and if you did not make this answer:

"Q. You are right, and I would like it from the standpoint of procedure and the figures used.

"A. Well, I had arrived at the manner by which I had calculated the figure of $20,108.90 in my answer just given * * *"

I ask you if you were asked that question and did you make that answer?

A. Yes, sir. That is part of the answer that I gave.

Q. Now, Mr. Warmack, by reducing this amount to $20,108.90, as I understand it, you eliminated the following portions from Respondent's account 520:

(a) $6,117.48 being a part of the company's contributions to match employees' contributions. Is that right?

A. Will you refer me to the page in the record?

Q. I am just asking you the question.

A. I have not any figures in my head on that subject. I gave them all to you. I do not have them with me.

Q. I refer you to page 6488 and page 6863 to which I have just asked you to refer, Mr. Warmack.

A. Page 6488 has no six thousand dollar figure shown on it.

7463 Q. Well, Mr. Warmack, you can subtract twenty thousand dollars from twenty-six thousand dollars, can you not?

A. I think so.

Q. Or could you?

A. I could.

Q. If you can, please do so, and verify that figure.

A. Thank you.

(The witness made certain computations.)

The Witness: I would like to hear the question.

Trial Examiner Ballinger: Read the question to the witness.

(The reporter read the following question:

"Q. Now, Mr. Warmack, by reducing this amount to $20,108.90, as I understand it, you eliminated the following portions from Respondent's account 520:

"(a) $6,117.48 being a part of the company's contributions to match employees' contributions. Is that right?")

The Witness: Yes, sir. That was done in my calculation.

By Mr. Hanley:

Q. Is it true that you also eliminated $108,508.83 being the company payment to a trust fund for retirement of employees?

A. It was eliminated from the account? That was
7464 not eliminated from the first item referred to.

Q. I am asking you if it was eliminated from account 520?

A. Yes, sir. It was.

Q. Did you not also eliminate the amount of $22,279.06 being annuities paid to retired employees in the Detroit field?

A. I did. And I should like to inquire what "eliminated" to? What is the elimination referred to?

Q. I do not know. I am asking you.

A. You say "eliminate." I would like to inquire where, how, and why?

Q. Well, eliminate, the way I have used it, Mr. Warmack, means to take it out of the account.

A. Eliminate it for what purpose? I just do not understand this line here. I do not think it should go in there, that $108,508.83 has a place in your cost differential in determining it, and I do not think $22,279.06 I just referred to has a place in it, but when you say "eliminate", I wonder for what purpose.

Trial Examiner Ballinger: From the cost study.

The Witness: Well, Judge, that does not answer it.

By Mr. Hanley:

Q. Well, you took them out. If you do not like the word "eliminate" or do not understand it, I wish you would say so.

Mr. Austin: Your Honor, I object.

7465 By Mr. Hanley:

Q. You took them out, and refrained from giving them any consideration as a support for the Respondent's claimed cost differential. Does that make it any more clear?

A. In your preparation of what?

Mr. Austin: Your Honor, I think it may be understood that Judge Hanley is directing to the witness' attention calculations in determining how much of account 520 may properly be used in his opinion for the purpose of establishing a cost differential.

Now, if the witness will accept that and counsel for the Respondent will accept it, perhaps it will facilitate answering the question.

Trial Examiner Ballinger: That is what Judge Hanley evidently referred to.

Mr. Hanley: Well, I thought I did, Judge, and I am willing to accept the testimony of both Mr. Warmack and Mr. Austin on the question if I can just get it established; that is, that they have kicked out everything in that account except $20,108.90. Now, having got over that, if the witness can answer the question, I will accept it.

The Witness: Any calculation made by me I calculated —when you say "kicked out," I certainly do not subscribe to Commission's Exhibit 133, if that is what you are driving at.

7466 By Mr. Hanley:

Q. You made that? Did you not?

A. Yes, sir. I made it.

Q. Do you not subscribe to it?

A. No. There are a lot of figures in there that I do not subscribe to. They were not even covered in my study, but if they were studied, I certainly would not want to say that you could do otherwise than kick those out.

Trial Examiner Ballinger: In other words, Commission's Exhibit 133 gives credit to the company for items that you would have eliminated? Is that correct?

The Witness: That I would have eliminated had I made a study of them. Yes, sir, your Honor. So, when counsel says I "eliminated," I have not eliminated anything.

I have made calculations to meet his questions here at various times. But I have never arrived at a figure which I thought is Respondent's cost differential for the reason that the information just is not available with which to do it. I have stated in this record, your Honor, repeatedly, what would have to come out of there. That had to do directly with account 075 and account 502. And I made calculations to meet the request of the Respondent's counsel. And that is all I did.

By Mr. Hanley:

Q. Now, Mr. Warmack, to get back to this thing if
7467 we can. Account 520, as reflected on Respondent's Exhibit 101 is $157,104.35. Are you prepared to say now that the only portion of that amount of money that should be given consideration as a basis for calculating a cost differential is the sum of $20,108.90?

A. I certainly am not, and—

Q. (Interposing.) Well, just what would you do—

A. —I made a few calculations to meet your requests on this record.

Q. I am not asking you to make any calculations, Mr. Warmack, and I have not asked you to.

A. The record will show that you have asked me many, many times to make calculations in this record.

Q. I am asking you this question now. I will ask—

Mr. Hanley: I will ask the reporter to read it, please.

(The reporter read the question as follows:

"Q. Now, Mr. Warmack, to get back to this thing if you can. Account 520, as reflected on Respondent's Exhibit 101 is $157,104.35. Are you prepared to say now that the only portion of that amount of money that should be given consideration as a basis for calculating a cost differential is the sum of $20,108.90?")

By Mr. Hanley:

7468 Q. I certainly wish you would answer that.

A. No, sir. I certainly am not.

Q. Mr. Warmack, I refer you to page 6839 of the record. I will ask you if you did not make the following statements on that and the following page in respect of account 520, annuities and retirement plan expense.

A. What is the page number, again?

Q. 6839.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. "Account 520, Annuities and Retirement Plan Expense.

"Answering question 1: This account consists of three separate parts as follows:

"Part 1. Contributions made by the company to match contributions made by employees engaged in the Detroit field, amount $26,226.38.

"Part 2. Portion of trust fund contributed by the company for the retirement of employees in the Detroit field in 1940 to cover services of such employees prior to January 1, 1939, $108,508.83.

"Part 3. Annuities paid to retired employees in the Detroit field for the year 1940, $22,279.06.

"It is my opinion that parts 2 and 3, as previously
7469 defined, are expenses which were not incurred in mar-
keting activities in the Detroit field for the year 1940, hence, they are not costs which can be used in determining cost differentials."

Will you please reconcile that answer with the answer you have just given, Mr. Warmack?

A. I would be happy to. In my opinion, contributions made by the company to match contributions made by employees engaged in the Detroit field, amounting to $26,226.38, is a proper cost on which a cost differential, in part, can be based.

There are two items of cost, namely, $108,508.83 and $22,279.06 which, in my opinion, are not costs on which a cost differential could be based.

The $26,226.38 which I think can be used in determining a cost differential should follow a proper and sound separation of the compensation of the employees to whom that cost applies in determining a cost differential.

Q. Now, you have been discussing the amount of $26,226.38. If you did it and why you did it—I understand that that figure has been justified by you and adjusted to the reduced figure of $20,108.90. Are you clear on that, Mr. Warmack?

A. I am clear that I did that in a calculation. What you mean by the rest of the question I do not know.

Q. Very well. My question was: Is there any part of
account 520 which should remain in the account for
7470 consideration in the calculation of a cost differential?
Is there any amount other than this $20,108.90?

A. I understood you to say that is what I did. That is not what I said. Is that what you think? That it is not stated exactly clearly is evident. I will ask you if you will kindly restate the question. That is not stated exactly, as you have it there, as to what I have stated heretofore.

Q. If there are any amounts that you think should be given consideration and if so, state further whether or not you did give them consideration in your calculations.

A. It is my opinion that $26,226.38 of this account is a cost on which a cost differential could be determined. Any calculations made for the Commission's attorneys at their request in the preparation of Commission's Exhibit 133 and to meet your request as to how those calculations were made; that is, the amount of $26,226.38 was reduced to $20,108.90 for the reason that many of the salary accounts to which a portion of that class of expense applied could not, under any theory of probabilities in its present form, be used in determining a cost differential.

Therefore, if those salaries which were eliminated and a percentage factor was applied, you would arrive at the figure of $6,117.48 which was thus arrived at, Mr. Hanley. That was deducted from the $26,226.38, leaving a balance
of $20,108.90 in the account which, for the purpose
7471 even of the calculations of Respondent's Exhibit 133
was overstated.

Trial Examiner Ballinger: Do you mean Commission's?

The Witness: Commission's Exhibit 133 was overstated, but for the reason that we did not have the information with which to make the calculation eliminating the proper amounts, that is where the $20,108.90 comes in.

But, your Honor, I should like for this record to show that it is my opinion that $26,226.38 ~~is~~ a proper portion of this account—that and only that amount—which can properly be used by the Respondent company in establishing a cost differential.

By Mr. Hanley:

Q. Now, Mr. Warmack, the question I am asking you is a simple arithmetical question. It may be that the reasons for your opinion are very complicated. I am not concerned about that.

I am trying to find out if the net influence of the adjustment which you made is to reduce the total amount of account 520 from $150,014.35, as paid out by the Respondent company, to the sum of $20,108.90?

A. The calculations were made on that basis, as just explained in my previous answer.

Q. And when you gave an answer some days ago in respect of your judgment as to how, or your views of the

treatment of account 520 should effect the claimed cost
7472 differential, it was on the basis of that kind of an adjustment and calculation. Was that not so?

A. It was on the basis of that exact calculation as just explained which had the effect of leaving in that account the amount which was overstated, because of the fact that the salary accounts to which that total account applies had to be thrown out in part because of the fact that they had not been properly analyzed and studied, and the separations made on Respondent's Exhibit 101 were not properly separated, as far as those accounts are concerned, from the standpoint of sound accounting.

Q. Mr. Warmack, I am going to ask you the same question and I really request you to please answer it.

When you made your statement of a few days ago in respect of your opinion as to how the differential claimed by the Respondent company should be affected in view of your opinions as to the proper treatment of account 520, that differential was predicated, was it not, upon your calculation of reducing the amount paid out by the Respondent company in account 520 of $157,014.35 to the amount of $20,108.90.

Now, that is just arithmetical, Mr. Warmack.

Can you answer it without expressing any opinion on it?

Mr. Austin: The question has already been asked and answered, your Honor. I object to the repetition.

7473 Mr. Hanley: I do not know. Maybe there is an answer somewhere buried in all of that verbiage.

Trial Examiner Ballinger: The answer is not clearly set forth in the record, as far as the Examiner recalls.

I think the witness can give a direct answer.

Mr. Austin: I think he has.

The Witness: I have.

Mr. Hanley: What is it?

Trial Examiner Ballinger: Turn back and read the witness' answer.

Mr. Hanley: We can save time if he would just answer it long before you can read all of this explanation.

Trial Examiner Ballinger: Read the question and the answer.

(The reporter read the following question and answer:

"Q. Now, Mr. Warmack, the question I am asking you is a simple arithmetical question. It may be that the reasons for your opinion are very complicated. I am not concerned about that.

"I am trying to find out if the net influence of the adjustment which you made is to reduce the total amount of account 520 from $150,014.35, as paid out by the Respondent company, to the sum of $20,108.90?

7474 "A. The calculations were made on that basis, as just explained in my previous answer.")

Trial Examiner Ballinger: The witness may answer the question.

The Witness: May I have it read, your Honor?

(The reporter read the following question:

"Q. Mr. Warmack, I am going to ask you the same question and I really request you to please answer it.

"When you made your statement of a few days ago in respect of your opinion as to how the differential claimed by the Respondent company should be affected in view of your opinions as to the proper treatment of account 520, that differential was predicated, was it not, upon your calculation of reducing the amount paid out by the Respondent company in account 520 of $157,014.35 to the amount of $20,108.90.

"Now, that is just arithmetical, Mr. Warmack.

"Can you answer it without expressing any opinion on it?")

(Witness temporarily excused.)

Mr. Hanley: I move that we adjourn until tomorrow morning.

Trial Examiner Ballinger: The motion of counsel for the Respondent is granted.

7475 And now, at 4:15 p. m., the hearing stands adjourned to be reconvened at 9:30 a. m., July 29, 1942, in Room 532, Federal Trade Commission Building, Washington, D. C.

(Whereupon, at 4:15 p. m., July 28, 1942, the hearing in the above-entitled matter was adjourned.)

7476

Room 532, Federal Trade
Commission Building,
Washington, D. C.
Wednesday, July 29, 1942.

Met, pursuant to adjournment, at 9:30 a. m.

Before:

Webster Ballinger, Trial Examiner.

Appearances:

Cyrus B. Austin, Esq., attorney for the Federal Trade Commission.

Harold R. Hanley, Esq., (910 South Michigan Avenue, Chicago, Illinois,) appearing for the Respondent, Standard Oil Company of Indiana.

7477

PROCEEDINGS.

Trial Examiner Ballinger: Come to order.

The hearing in Docket No. 4389, case entitled "In the Matter of Standard Oil Company (Indiana)" is reconvened pursuant to notice at 9:30 a. m., July 29, 1942, in Room 532, Federal Trade Commission Building, Washington, D. C.

The last hearing was held at the same place, July 28, 1942.

The reporter will note counsel for the Commission and Respondent present.

You may proceed.

Mr. Hanley: I will ask Mr. Warmack to resume the stand, please.

Mr. Warmack: Yes, sir.

WILLIAM J. WARMACK resumed the stand and testified further as follows:

Cross-Examination (Continued) by Mr. Hanley.

Q. At the adjournment last evening, Mr. Warmack, you had been asked a question, and you requested permission to make some research that you desired to make.

Now, I will ask you if you will please answer the question which is pending on the record.

The Witness: May I hear the question?

7478 Mr. Hanley: I suggest that it be restated in the record at this point.

Trial Examiner Ballinger: That may be done.

(The reporter read the following question:

"Q. Mr. Warmack, I am going to ask you the same question and I really request you to please answer it.

"When you made your statement of a few days ago in respect of your opinion as to how the differential claimed by the Respondent company should be affected in view of your opinions as to the proper treatment of account 520, that differential was predicated, was it not, upon your calculation of reducing the amount paid out by the Respondent company in account 520 of $157,014.35 to the amount of $20,108.90.

"Now, that is just arithmetical, Mr. Warmack.

"Can you answer it without expressing any opinion on it?")

By Mr. Hanley:

Q. Can you answer that question?

A. Yes, sir, I can.

Q. Please do so, Mr. Warmack.

A. Yes, sir. In the calculations made the amount was reduced to $20,108.90 in making the calculations or the approximations which I have made, and as explained at length previously in the record.

7479 Q. You also, did you not, reduce the amount in Respondent's Exhibit 101, account 520, by the sum of $108,508.83, being a company payment to a trust fund for retirement of employees?

A. Yes, sir. That was included in the reduction whereby the total amount was reduced from $157,014, plus to twenty thousand dollars plus for the calculation.

Q. You also reduced that account by the sum of $22,279.06 being annuities paid to retired employees in the Detroit field. Did you not?

A. Yes, sir. That amount was included in the reduction just referred to.

Q. Now, is it not true, Mr. Warmack, that the net influence of all these adjustments that you made is to reduce the total of account 520 from $157,014.35, as paid out by the Respondent company, to the sum of $20,108.90?

A. Yes, sir. That was done for the purpose of the calculation as just stated.

Q. Now, let us take up each of these amounts eliminated, separately.

We will discuss first the $6,117.48 eliminated from company current contributions for the insurance premium.

By saying that this item cannot be used in the cost justification, is it not the equivalent of charging it equally 7480 on a per unit basis to both the tank wagon and direct shipment business?

Mr. Austin: If your Honor please, I object to that because the witness did not state what the question says. I would like to have it reread.

Trial Examiner Ballinger: Read it.

(The reporter read the question.)

Mr. Austin: That is what I mean, the witness said just the contrary yesterday. The witness said that was a part of the amount which was available for the establishment of the cost differential. The record is clear on that.

I do not see that the question is proper, being a question which is contrary to the words of the witness.

Mr. Hanley: If your Honor please, I have been trying for hours to ascertain whether this witness used in his calculation the sum of $26,226.38 or the sum of $20,108.90.

The witness this morning has testified that he used the sum of $20,108.90.

The Respondent now objects to the testimony given on the part of counsel for the Commission that the testimony given by the witness is inaccurate. It is the witness who is on the witness stand. He says he used $20,108.90 in his calculation. It is entirely improper, if your Honor please, that counsel for the Commission should undertake to testify that another or different figure was used.

7481 Trial Examiner Ballinger: Well, the witness has had the benefit now of the discussion. The Examiner will permit him to answer the question with proper explanation.

Mr. Austin: Your Honor, I would like to go off the record.

Mr. Hanley: If your Honor please, there is an objection on the part of the Respondent to counsel for the Commission going off the record so that the witness can have him—

Mr. Austin: (Interposing.) One moment. I shall be very glad to state it on the record. I would like to read into the record the testimony which the witness gave yesterday, so that your Honor can determine whether the statement made by counsel for the Respondent in his question is correct or not correct.

Mr. Hanley: That is objected to for the reason that this testimony of this witness on the subject has been read into the record, I think, at least three times.

Trial Examiner Ballinger: It is the contention of the counsel for the Respondent, apparently, that the witness has given conflicting testimony upon this point. The witness has been fully apprized of the situation by the discussion that has preceded his answer.

The Examiner feels that the witness is fully capable of taking care of himself.

7482 Mr. Austin: My original point was an objection as to the question. I do not know whether that has been ruled on. It was an objection on the ground that the question states that the witness said something, and the witness actually said the contrary.

Trial Examiner Ballinger: Apparently at that point in the record the witness' testimony was different from that included in the question; but also apparently at other points in the record, the witness testified differently from that.

Now, the question is, which testimony is correct?

Mr. Austin: Your Honor, since that statement appears on the record, your Honor, I would like to be recorded also as not conceding that the witness testified to the contrary.

Trial Examiner Ballinger: The witness is on the stand and I am sure he is fully capable of taking care of himself. If he has not so testified he can so state.

Mr. Hanley: May we have an answer to the question?

Trial Examiner Ballinger: Read the question.

(The reporter read the question as follows:

"Q. Now, let us take up each of these amounts eliminated, separately.

"We will discuss first the $6,117.48 eliminated from company current contributions for the insurance premium.

"By saying that this item cannot be used in the
7483 Cost justification, is it not the equivalent of charging it equally on a per unit basis to both the tank wagon and direct shipment business?")

The Witness: I should like for counsel to explain, please, exactly what he means. I do not think that I understand it.

By Mr. Hanley:

Q. What do you not understand about it, Mr. Warmack? You are eliminating the six thousand dollars.

The Witness: Your Honor, the step-by-step procedure of exactly what I did is in these records at least two or three times.

Trial Examiner Ballinger: Well, now, if there is any question about what you did you may restate it.

The Witness: No, I would like to have the record speak for itself.

Mr. Austin: Your Honor, I would object seriously to that. I can assure your Honor, and I think that he should look through at least some of these pages which I have here, which run for some at least ten pages, going over this very question at least three times in the record, before your Honor rules that this should be restated in the record again.

Trial Examiner Ballinger: I know, but it will take much longer to review that than it will to permit the witness to make a restatement at this time.

7484 Mr. Hanley: If your Honor please, let the record show that the Respondents request an answer to this very simple question. This accounting witness, advanced by the Commission, has made a calculation. I have now asked him the question as to the effect of the calculation which he made. And the Respondent earnestly requests that it may have an answer.

Trial Examiner Ballinger: Judge, the Examiner has ruled, and the witness will answer. No further argument will go on the record.

Mr. Austin: I would like to have the question reread, your Honor. I do not believe that question can be answered.

Trial Examiner Ballinger: Now, Mr. Warmack, if you do not understand it you may so state.

The Witness: I have already stated so, your Honor.

Trial Examiner Ballinger: Read the question to the witness again.

(The reporter read the following part of the question to the witness:

"Now, let us take up each of these amounts eliminated, separately.

"We will discuss first the $6,117.48 eliminated from company current contributions for the insurance premium.")

7485 Trial Examiner Ballinger: Right there. Was that eliminated?

The Witness: In the calculation; yes, sir.

Trial Examiner Ballinger: Proceed.

(The reporter read the following:

"* * * By saying that this item cannot be used in the cost justification, is it * * *")

The Witness: (Interposing.) I never said that in my life.

Trial Examiner Ballinger: Well, we cannot go outside of this record.

(The reporter read the following:

"* * * is it not the equivalent of charging it equally on a per unit basis to both the tank wagon and direct shipment business?")

The Witness: Now, if counsel will please explain that part, I will appreciate it.

By Mr. Hanley:

Q. You made the calculation, Mr. Warmack. Are you able to answer the question or are you not?

A. If you will kindly explain that, I will be glad to answer the question.

Q. What do you want to explain?

A. That last portion.

Trial Examiner Ballinger: He desires the last one.

7486 Read the last part of the question.

(The reporter read the following:

"* * * is it not the equivalent of charging it equally on a per unit basis to both the tank wagon and direct shipment business?")

By Mr. Hanley:

Q. All right. You did eliminate the $6,117.48 in your calculation. Did you not?

A. I did in the calculation made for you and for the Commission's attorney.

Q. Now, I ask you—

A. If you will kindly allow me to complete my answer without interfering.

Q. Have you finished?

A. I have finished.

Q. Having eliminated that in your calculation, I am asking you this: That being so that this item cannot be used—and you did not use it—

A. (Interposing.) And I did not use it.

Q. —in the cost justification, is it not the equivalent of charging it—the amount of $6,117.48 equally on a per unit basis to both tank wagon and direct shipment business?

A. It may have that effect. I see no reason why it should be so charged under any point raised in this case.

And I have not testified, your Honor, that that
7487 particular part of that class of expense cannot be
used in the determination of a cost differential. I have explained many times on this record in the step-by-step procedure the reason that it had to be eliminated in the calculation requested by Respondent's attorney, and also requested previously by the Commission's attorney.

Mr. Hanley: Respondent moves to strike the answer of the witness as not responsive. Respondent requests that the question be reread to the witness. Respondent requests that the Court admonish the witness to answer the question.

Trial Examiner Ballinger: In what respect has not the witness answered the question?

Mr. Hanley: I did not hear your Honor's question.

Trial Examiner Ballinger: In what respect has not the witness answered the question?

Mr. Hanley: He has not stated whether or not by his calculation in eliminating this item it is the equivalent of charging it equally on a per unit basis to both tank wagon and direct shipment business. And that, if your Honor please, is the question, and that is all of the question.

Trial Examiner Ballinger: Read the question and the answer.

(The reporter read the question and answer referred to, as follows:

"Q. Having eliminated that in your calculation,
7488 I am asking you this: That being so that this item
cannot be used—and you did not use it—

"A. And I did not use it.

"Q. —in the cost justification, is it not the equivalent of charging it—the amount of $6,117.48 equally on a per unit basis to both tank wagon and direct shipment business?

"A. It may have that effect. I see no reason why it should be so charged under any point raised in this case.

"And I have not testified, your Honor, that that particular part of that class of expense cannot be used in the determination of a cost differential. I have explained many times on this record in the step-by-step procedure the reason that it had to be eliminated in the calculation requested by Respondent's attorney, and also requested previously by the Commission's attorney.")

Trial Examiner Ballinger: He has stated, as the Examiner understands, that that may be the effect.

Mr. Hanley: Well, if he has stated that, it may be the effect I will now ask the witness.

By Mr. Hanley:

Q. Is it the effect?

A. If it were allocated on any such basis, that would afford no cost differential; and if it were taken out 7489 of there, it would afford no cost differential, therefore, take it or leave it.

Q. Well, on the basis of your calculation—and you made the calculation, Mr. Warmack—is that the effect?

A. The elimination of any item, that item or any other from the account, or the allocation of that item generally on the basis of gallonage as between the two classes of customers in which the cost differential is sought would have no effect whatsoever.

And I made that calculation, and explained it in the record several times. And I—

Trial Examiner Ballinger: That is not necessary.

Mr. Hanley: The Respondent moves to strike the answer of the witness as not responsive. The Respondent requests the Court to have the question reread to the witness. The Respondent requests the Court to admonish the witness to answer the question "yes" or "no", or to say "I do not know."

Trial Examiner Ballinger: Read the answer just given by the witness.

(The reporter read the answer.)

Trial Examiner Ballinger: Is that not the answer?

Mr. Hanley: No, your Honor, it is not.

Trial Examiner Ballinger: Is that not the equivalent of an answer, "Yes"?

Mr. Hanley: I would like to respectfully request 7490 your Honor to require the witness to answer this question "yes" or "no" if he knows. He made the calculation.

Mr. Austin: I do not think the question is susceptible of a "yes" or "no" answer.

Mr. Hanley: The witness by saying that this item cannot be used—and understand, gentlemen, that he refrained from using it in the cost differential justification, is that not the equivalent of charging it equally on a per unit basis to both tank wagon and direct shipment business?

If your Honor please, that question is susceptible of a "yes" or "no" answer.

Trial Examiner Ballinger: Well, his answer is that it is.

Mr. Hanley: It is what?

Trial Examiner Ballinger: Well, his answer is that it would have no effect whatsoever.

By Mr. Hanley:

Q. Well, is that your answer?

A. The record shows. I stated it four times. I wish—

Mr. Hanley: Well, that is all.

Mr. Austin: Well, if your Honor please—

The Witness: (Interposing.) Well, Judge Ballinger, that is my answer. And I was going to say also that Respondent's counsel's statement that I said that this amount of $6,117.48 could not be used in determining a cost
7491 justification, is a misstatement of fact.

Mr. Hanley: The Respondent moves to strike the voluntary statement of the witness. The record shows amply that the witness did reduce the sum of $26,226.38 to the sum of $20,108.90 in the calculation which he made.

Trial Examiner Ballinger: The Examiner will strike both the voluntary statement of the witness and also the comment of counsel, not physically, of course.

Mr. Hanley: The comment of counsel is a motion, if your Honor please.

Trial Examiner Ballinger: Well, the motion is granted so far as it relates to the voluntary statement. The balance of the motion is stricken.

By Mr. Hanley:

Q. Mr. Warmack, what per cent of the total Detroit volume is represented by direct shipment sales?

A. I do not know.

Q. Could you determine?

A. Yes, sir.

Q. Well, will you do so, please?

A. I would be glad to.

(The witness examines documents for several moments.)

The Witness: May I have the question, your Honor, please?

Trial Examiner Ballinger: Read the question.

7492 (The reporter read the question as follows:

"Q. Mr. Warmack, what per cent of the total Detroit volume is represented by direct shipment sales?")

The Witness: For the year 1940 direct shipment sales in the Detroit area represent about 30.3 per cent of the total volume in gallons.

By Mr. Hanley:

Q. Would you now turn to page 87 of Respondent's Exhibit 100.

A. Yes, sir.

(The witness turned to that page of the Exhibit.)

Q. Tell the Court what the total dollar cost for salaries included in account 000—supervision, for handling direct shipment sales amounted to?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Answer the question.

The Witness: Referring to page 87 of Respondent's Exhibit 100?

By Mr. Hanley:

Q. That is right.

(The witness examined the document for several moments.)

Trial Examiner Ballinger: Can you answer the
7493 question?

The Witness: I believe I can answer the question but not from the information set forth on that page.

By Mr. Hanley:

Q. Could you answer it from any information which you have? Have you—If you cannot, just say so, Mr. Warmack, and I will ask you another question.

A. I could probably make a calculation here and determine that but I do not believe that information is set forth on page 87 of Respondent's Exhibit 100.

Q. I will ask you if, as a matter of fact, it is not $641.46?

A. As I understand it that is a portion of the Triple O account which Respondent has assigned to the direct shipment business, but the percentage or the relationship of that to the total expense in the identical year are not shown on page 87 of Respondent's Exhibit 100.

Q. I did not ask you that. I asked you if the amount is not $641.46?

A. That is correct.

Q. Please refer to Respondent's Exhibit 101 and state for the record what the total charge to this Triple O account is.

A. For the year 1940 the total charge for the Triple O account entitled "Salaries—Supervision" shown on Respondent's Exhibit 101 is $51,360.21.

7494 Q. Now, Mr. Warmack, will you divide the direct shipment cost, $641.46 by the total cost, $51,360.21 and tell the Court what the resultant percentage ratio is.

A. I should be glad to made the calculation if it is not shown.

(The witness made certain figures.)

The Witness: In Respondent's Exhibit 100? Do you know if it is shown in there?

By Mr. Hanley:

Q. I believe not.

A. Approximately 1.24 per cent, according to the calculation made here on the witness stand.

Q. Mr. Warmack, in your judgment as an accountant, do you regard it as sound accounting practice to charge 30.3 per cent of an expense for but 1.24 per cent of the effort for which this expense was incurred?

The Witness: I will have to have that read, your Honor.

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: I think it would be quite unusual if any charge were made like that if you knew what the other was.

By Mr. Hanley:

Q. Is that not what you have done?

7495 A. I have not. No.

Q. Is not that what you recommend?

A. No, sir.

Q. Have you not indicated that 30.3 per cent of this account should be charged to the direct shipment business?

A. I have never said any such thing as that in my life.

Q. Is not that the force of all of your criticism of the Respondent's accounting?

A. It most assuredly is not.

Q. I now ask you to consider this, Mr. Warmack:

(a) Referring you to account 001, which indicated a percentage of actual expense of approximately 6.8 per cent;

(b) Account 004, which indicates a percentage of actual expense of approximately 6.6 per cent;

(c) Account 005, which indicates a percentage of actual expense of approximately 2.8 per cent;

(d) Account 215, which indicates a percentage of actual expense of approximately .6 per cent;

(e) and ask you if, in your judgment as an accountant it is sound accounting practice to charge approximately 30.3 per cent of the expense incident to the totals in these accounts for the respective and indicated percentages of effort for which the expense was incurred?

7496 (f) Before you answer that, Mr. Warmack, I assume you wish to verify those percentages. And I am sure that the Examiner will accord whatever time you need to do so.

Trial Examiner Ballinger: If he desires to examine the percentages stated he may do so.

The Witness: Your Honor, if this is going to be required, I think we ought to call somebody up here, one of the accountants with a calculating machine to make this calculation. I do not think it is proper and appropriate to have me make all of those calculations here on the witness stand.

I am not questioning the percentages, however, I think the question is much broader than that, and if I may answer the question, I would like to answer it with respect to each of the accountants separately.

Trial Examiner Ballinger: Do you understand the question?

The Witness: Yes, sir.

Trial Examiner Ballinger: Well, if you do not question the percentages, you may proceed to answer it, adopting the percentages stated by counsel.

The Witness: I do not question the Respondent's calculation of the percentages.

I do not know as they have any weight whether I accept them or do not accept them.

For the purpose of answering the question, I will
7497 accept them.

Trial Examiner Ballinger: Proceed.

The Witness: Now, if I may answer it—with respect to each account separately—I shall be glad to do so.

By Mr. Hanley:

Q. Answer the question any way you see fit, Mr. Warmack.

Trial Examiner Ballinger: Now, read the question to him.

(The reporter read the question as follows:

"Q. I now ask you to consider this, Mr. Warmack:

"(a) Referring you to account 001, which indicates a percentage of actual expense of approximately 6.8 per cent.;

"(b) Account 004, which indicates a percentage of actual expense of approximately 6.6 per cent.;

"(c) Account 005, which indicates a percentage of actual expense of approximately 2.8 per cent.;

"(d) Account 215, which indicates a percentage of actual expense of approximately .6 per cent.;

"(e) and ask you if, in your judgment as an accountant it is sound accounting practice to charge approximately 30.3 per cent of the expense incident to the totals in these accounts for the respective and indicated percentages
7498 of effort for which the expense was incurred?

"(f) Before you answer that, Mr. Warmack, I assume you wish to verify those percentages. And, I am sure that the Examiner will accord whatever time you need to do so.")

Mr. Austin: That does not make any sense to me at all.

Trial Examiner Ballinger: One moment. The witness stated that he understood the question.

Mr. Austin: The witness may have said so but I do not.

Trial Examiner Ballinger: No?

Mr. Austin: Well, I do not.

Trial Examiner Ballinger: Well, if the witness understands it he may answer it.

The Witness: Well, your Honor, the question, I do understand it, but you have about five or six questions there incorporated in one. And I wonder if I might not answer these questions separately?

Trial Examiner Ballinger: You have been advised by the Examiner that you may do so.

The Witness: Well, then, may these questions appear separately, with the answer, so that I may give it?

Trial Examiner Ballinger: Proceed. The Examiner has instructed the reporter to read the question piecemeal.

7499 The Witness: Thank you.

Trial Examiner Ballinger: So that you may answer each and every part that you desire to separate.

The Witness: Thank you.

Now, I should like to hear it read.

Trial Examiner Ballinger: Now read the question.

The Witness: To make sure that I do understand it.

(The reporter read the following:

"Q. I now ask you to consider this, Mr. Warmack:

"(a) Referring you to account 001, which indicates a percentage of actual expense of approximately 6.8 per cent.;

* * *

"(e) and I ask you if, in your judgment as an accountant it is sound accounting practice to charge approximately 30.3 per cent. of the expense incident to the totals in these accounts for the respective and indicated percentages of effort for which the expense was incurred?")

The Witness: That is so complicated, your Honor, may not these be stated separately, and then let me answer them separately? I would like to hear again the very first part of it. I think I have the question, but I think I have a question there of qualification.

7500 (The reporter again read the following:

"Q. I now ask you to consider this, Mr. Warmack:

"(a) Referring you to account 001, which indicates a percentage of actual expense of approximately 6.8 per cent.; * * *

"(e) and ask you if, in your judgment as an accountant it is sound accounting practice to charge approximately 30.3 per cent of the expense incident to the totals in these accounts for the respective and indicated percentages of effort for which the expense was incurred?")

Trial Examiner Ballinger: Will it simplify things, Judge, if you will restate the question?

Mr. Hanley: I cannot simplify these questions to suit this witness, if your Honor please. I do think this question, if it accords with your view as being proper, perhaps, if we take a short recess, the reporter may write this question up, and then the witness will be able to look at it.

Trial Examiner Ballinger: For that purpose we will take a five minute recess.

(A short recess was taken.)

Trial Examiner Ballinger: Come to order.

You may proceed.

7501 Mr. Hanley: Inasmuch as the Examiner adopted the suggestion of Respondent's counsel that the question be written for the witness, it is now requested that the written question submitted to the witness be set forth in extenso in the record.

Trial Examiner Ballinger: Request granted.

(The question referred to is as follows:

"Q. I now ask you to consider this, Mr. Warmack:

"(a) Referring you to account 001, which indicates a percentage of actual expense of approximately 6.8 per cent.;

"(b) Account 004, which indicates a percentage of actual expense of approximately 6.6 per cent.;

"(c) Account 005, which indicates a percentage of actual expense of approximately 2.8 per cent.;

"(d) Account 215, which indicates a percentage of actual expense of approximately .6 per cent.;

"(e) and ask you if, in your judgment as an accountant it is sound accounting practise to charge approximately 30.3 per cent. of the expense incident to the totals in these accounts for the respective and indicated percentages of effort for which the expense was incurred?

"(f) Before you answer that, Mr. Warmack, I 7502 assume you wish to verify those percentages. And, I am sure that the Examiner will accord whatever time you need to do so.")

The Witness: Before I answer this, your Honor, I should like to request counsel to tell me the figures which he used in arriving at 6.8 per cent applicable to the 001 account entitled "Salaries—Supervision—Others."

By Mr. Hanley:

Q. If it will aid you, Mr. Warmack, in response to your request, the percentage figures relating to actual expense in respect of subdivisions (a), (b), (c) and (d) of the question have to do with the actual expense as determined by the cost study of the Respondent as reflected in Respondent's Exhibit 100 and Respondent's Exhibit 101.

Mr. Austin: May I ask a question?

Trial Examiner Ballinger: You may.

Mr. Austin: I am going to ask counsel for the Respondent whether those percentages are the percentages of total direct shipment charges on Respondent's Exhibit 101 to the total expense in the account? It is not clear to me,—

Mr. Hanley: (Interposing.) Well; I think that is it—

Mr. Austin: (Continuing) of what the percentages are.

Mr. Hanley: Will you read me the request of counsel?

7503 Trial Examiner Ballinger: Read it.

(The reporter read the statement of Mr. Austin.)

Mr. Hanley: If your Honor please, I do not know whether I can answer counsel's question any more than or any more fully than by referring him to the answer which I just immediately above gave the witness.

The percentage figures are the expense, the actual expense in handling petroleum products arrived at by an analysis of effort in connection with jobber direct shipment (in connection with direct shipment) as reflected by Respondent's Exhibit 100 and Respondent's Exhibit 101.

Trial Examiner Ballinger: From the information that has been furnished you, Mr. Warmack, can you now answer the question?

The Witness: Your Honor, I should like to ask counsel one other question:

For example, in account 004, entitled "Salaries—Salesmen" on Respondent's Exhibit 101 in which the percentage of 6.6 is shown—does that percentage represent the relationship of the cost set forth under the three direct shipment customer channels to the total petroleum product expense for that account, or to the total petroleum products and automobile supplies account?

With that information I believe I can answer the question.

7504 Mr. Hanley: If your Honor please, I believe that that question is fully answered by the two statements I have already made.

I will restate it this way if it will be helpful, that the 6.6 per cent pertinent to account 004 is the percentage based on the effort expended as disclosed by Respondent's cost study in connection with the jobber direct shipment in relation to the total petroleum products. Now, I just do not think I can state it any more clearly. It may be that—

Mr. Austin: I would like to speak to counsel for the Respondent off the record.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: If your Honor please, it may be that I used the words "jobber direct shipment," in some of the explanation alluded to, and in such instances you may disregard the word "jobber" and let it remain as though the statement were "in connection with direct shipments" as reflected by Respondent's Exhibit 100, and Respondent's Exhibit 101; and also as used by me in saying "in connection with jobber direct shipments in relation to total petroleum products." In both of those instances the word "jobber" should be eliminated, and regard "direct shipments," as including all direct ship-
7505 ments.

Trial Examiner Ballinger: That may be done. With that qualifying statement, are you prepared to answer, Mr. Warmack?

The Witness: Yes, sir. I believe so, your Honor. Just for the sake of clarity, I want to state this, that in the account 004 entitled "Salaries—Salesmen," the total direct shipment costs as set forth on Respondent's Exhibit 101, are approximately thirteen thousand six hundred dollars. And it is my understanding that the 6.6 per cent represents the relationship of that total to the total petroleum products costs in this account of, roughly, two hundred and seven thousand four hundred dollars.

Is that correct?

Mr. Hanley: That is right, Mr. Warmack.

The Witness: Thank you, Judge Hanley. Thank you.

Trial Examiner Ballinger: Proceed to answer the question.

Read the question.

(The reporter read the question as follows:

"Q. I now ask you to consider this, Mr. Warmack:

"(a) Referring you to account 001, which indicates a percentage of actual expense of approximately 6.8 per cent.;

7506 "(b) Account 004, which indicates a percentage of actual expense of approximately 6.6 per cent.;

"(c) Account 005, which indicates a percentage of actual expense of approximately 2.8 per cent.;

"(d) Account 215, which indicates a percentage of actual expense of approximately .6 per cent.;

"(e) and ask you if, in your judgment as an accountant it is sound accounting practice to charge approximately 30.3 per cent of the expense incident to the totals in these accounts for the respective and indicated percentages of effort for which the expense was incurred?

"(f) Before you answer that, Mr. Warmack, I assume you wish to verify those percentages. And, I am sure that the Examiner will accord whatever time you need to do so.")

The Witness: In connection with sub-question (a) of this question which reads as follows:

"Q. I now ask you to consider this, Mr. Warmack:

"(a) Referring you to account 001, which indicates a percentage of actual expense of approximately 6.8 per cent.; * * *"

In answering this question, I should like for the record to show that I do not agree that 6.8 per cent representing
the figures for account 001 as set forth in Respond-
7507 ent's Exhibit 101 is actual expense.

On that basis, I will answer the question—

By Mr. Hanley:

Q. (Interposing.) If you do not agree with the figure, Mr. Warmack, I will ask you please to make a calculation as to what the figure should be. I was under the impression that you did agree with the accuracy of the figures as disclosed in Respondent's Exhibit 99, Respondent's Exhibit 100, and Respondent's Exhibit 101.

If you do not, then I ask you now to indicate to the Court what the figures should be in your judgment.

A. I do not question the mechanical (mathematical?) accuracy of these figures nor the 6.8 per cent applicable to account 001 as set forth in counsel's question.

Trial Examiner Ballinger: Mr. Warmack, does not your objection run to the accounting methods by which those figures were arrived at?

The Witness: That is correct, your Honor.

Trial Examiner Ballinger: Well, now, dealing with that and on the basis of the system that was used by the Respondent, and treating that as correct, will you proceed to answer the question?

The Witness: Yes, sir. I will now answer this question, your Honor, which reads—

(Trial Examiner Ballinger, Interposing.) That
7508 is the question you have previously read? Is it?

The Witness: No, sir. I will read the question now.

That was a statement previously, which read:

"Q. I will now ask you to consider this, Mr. Warmack:

"(a) Referring you to account 001, which indicates a percentage of actual expense of approximately 6.8 per cent.; * * *"

That which I wish to read now is as follows:

"* * * (e) and ask you if, in your judgment as an accountant it is sound accounting practice to charge approximately 30.3 per cent of the expense incident to the totals in these accounts for the respective and indicated percentages of effort for which the expense was incurred?"

The answer to that question is this:

That if a proper study had ever been made by the Respondent whereby it could be definitely determined what is the actual time applicable to each of the six channels as set forth on Respondent's Exhibit 101, if that were done, and if it were found by that study that 6.8 per cent of the actual time of this class of employees were devoted to direct shipment business, it certainly, in my opinion, as an accountant, would not be sound accounting practice to charge
7509 approximately 30.3 per cent to the direct shipment business.

By Mr. Hanley:

Q. Mr. Warmack, do you not regard it as a fact that Respondent's Exhibit 99, Respondent's Exhibit 100, and Respondent's Exhibit 101 reflect the account relative to the actual effort expended by the company in handling jobber business?

A. I do so regard that, Mr. Hanley. But the cost studies as outlined in those exhibits which you mentioned, in my opinion, have not been carried through to a proper completion, but in my opinion, are what may be termed a "piecemeal analysis."

Q. Mr. Warmack, is it not true that the percentage applicable to subdivision (a) of the question referring to account 001, of 6.8 per cent is derived from the cost study as reflected by Respondent's Exhibit 100 and Respondent's Exhibit 101.

A. It is a fact that it was so derived, but my quarrel is with the point that the cost study was never properly carried through to a completion.

Q. Irrespective of your quarrel with the general accounting system of the Respondent, Mr. Warmack, do you dispute the percentage of 6.8 in reference to account 001 as reflected by Respondent's Exhibit 100?

A. In the first place, I do not quarrel with the general accounting system or methods of the Respondent in the keeping of its regular accounting. I do not dispute the facts that the figures, as set forth under the direct
7510 shipment channels on Respondent's Exhibit 101 represent 6.8 per cent of the total of this class of expense. However, the figures as set forth under the direct shipment customers column were arrived at by a piecemeal study, and the figures under the distribution through company bulk plants for those particular accounts represent by far the larger portion of this class of expense, and in my opinion, those figures have never been established by any accurate measuring factor; that is, that the measuring factor has never been properly substantiated.

Q. Mr. Warmack, entirely apart from what you term having a quarrel with the regular accounting procedure of the company, would you please make it definite now for all time, on this record, whether you dispute the accuracy of the figures relative to the expense incurred by the Respondent company in handling direct shipment business as disclosed by Respondent's Exhibits 000 and 001?

A. I certainly cannot. I certainly question their accuracy as I have stated throughout these hearings.

I do not quarrel with the regular accounting procedure of the company.

Q. Of course, you understand, Mr. Warmack, that that changes the entire testimony for the last four or five weeks.

A. I understand that it does not.

Q. You have heretofore, as I understand you, or
7511 have understood you, have repeatedly stated on this record that you did not question the accuracy of the computations of the Respondent.

If you do, and with particular reference to account 001, I now ask you to state what is wrong with it? What is the proper figure that should be used?

A. I cannot state what the proper figure should be. But I can state this, that the figures in each of the six distribution channels on Respondent's Exhibit 101 for that account and for each of the other accounts set forth in this question, namely, account 004, account 005, account 215, have not been established in my opinion for each of those channels by a proper study. In other words, the measuring factors used for the separations have never been substantiated, as far as I have been able to learn, by a thorough cost study and analysis.

Q. Very well, Mr. Warmack. Do you regard the work of Mr. Boatwright and Mr. Houghton, and their assistants, in preparing Respondent's Exhibit 99, Respondent's Exhibit 100, and Respondent's Exhibit 101 as an incompetent accounting job of making a cost study?

A. I certainly do not, but in my opinion—

Q. (Interposing.) That is a sufficient answer.

The Witness: Well, if I may explain, your Honor. I have to.

7512 By Mr. Hanley:

Q. (Interposing.) If that is true—

The Witness: (Interposing.) I have the right to explain I believe.

Trial Examiner Ballinger: One moment.

Mr. Hanley: Yes.

Trial Examiner Ballinger: Do you desire to make an explanation?

The Witness: I was trying to offer one when I was interrupted.

Trial Examiner Ballinger: I asked you a simple question, Mr. Warmack.

The Witness: Yes, sir.

Trial Examiner Ballinger: You may explain it if you desire.

The Witness: I think that that study was a good piece of work as far as it went, but it was not carried through to a proper completion.

By Mr. Hanley:

Q. Well, now, Mr. Warmack, was it not a good enough piece of work, so that so far as account 001 is concerned, it determined the percentage of actual expense on the basis of effort used by the Detroit office in handling direct shipment business?

A. In my opinion, it certainly did not. If you did not
explore the complete account, make a full coverage of
7513 this whole question as well as the rest of the accounts,
and make a separation of all the costs by measuring factors which had been properly substantiated by thorough accounting studies, then the whole separation falls of its own weight.

Q. Did you look at the vouchers?

A. No.

Q. Let us take account 001. Did you follow the tracks of the Respondent's accountants? Did you know what they looked at?

A. I reviewed their work.

Q. Did you look at the vouchers?

A. I do not recall in that particular account that I looked at the vouchers. Looking at the vouchers would certainly not constitute a cost study in this situation.

Q. Did you arrive at any conclusion that the direct expense of the Respondent company was any different in dollars and cents on account 001 from the amount arrived at by the Respondent's accountants? If you did, state how you did it. Also, state how much the difference was.

A. Will you kindly explain to me with respect to account 001 exactly what you mean by "direct"?

Q. I mean the actual expense, Mr. Warmack. Look at the account. It was tabulated so that you could read it.

A. I was under the impression, your Honor, in the last question—

7514 Trial Examiner Ballinger: (Interposing.) Well,
now, it is not necessary to go into explanations. Do you understand the question?

The Witness: No, sir. I was asking counsel.

Trial Examiner Ballinger: Read the question.

(The reporter read the question as follows:

"Q. Did you arrive at any conclusion that the direct expense of the Respondent company was any different in dollars and cents on account 001 from the amount arrived at by the Respondent's accountants? If you did, state how you did it. Also, state how much the difference was.")

Trial Examiner Ballinger: By "direct expense," do you mean expense of handling the products in the direct shipment channel?

Mr. Hanley: The actual expense of handling the direct shipments. That is what Respondent's Exhibit 100 discloses.

The Witness: May I hear the question again?

Trial Examiner Ballinger: Yes. Read the question.

(The reporter again read the question.)

By Mr. Hanley:

Q. The question is simply this: What is your criticism of that? Did you follow it up? Have you had that experience, and if you did, how did you do it? What is 7515 the basis of your objection? Make your answers in dollars and cents, Mr. Warmack.

A. You can not make any answer in dollars and cents. I have not made a cost study of this Respondent's costs for the purpose of determining a cost differential, or a cost justification.

I have reviewed each of these accounts, and I have determined to my own satisfaction which accounts have not been properly explored for the purpose of determining a cost differential, and this is one of those accounts.

This is one of the accounts which, as I have explained, this was separated in part by one method, and the other proration or portion representing by far the larger part was separated by a measuring factor which, as far as I have been able to learn, has never been substantiated.

That is my answer. I think it is the correct answer.

Q. Mr. Warmack, let us try to simplify this thing. Let us look at the direct shipments. What have you to say as to this—as to the accuracy of the results obtained by the Respondent's accountants in determining the actual expense applicable to direct shipments under account 001?

The Witness: May I have that question, your Honor?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

7516 The Witness: I think that is highly arbitrary inasmuch as the whole account was not explored, or rather, that account 000 was not explored, and the expense of this account follows the triple 0 account.

By Mr. Hanley:

Q. How do you know that they were not explored?

A. Because I have explored this account—

Q. (Interposing.) Did you look at the vouchers?

A. Yes, sir. I saw a few vouchers.

Trial Examiner Ballinger: Judge Hanley, the witness has repeatedly stated that he made inquiry as to what had been done and—

Mr. Hanley: (Interposing.) Judge Ballinger—

Trial Examiner Ballinger: —and his testimony now is based solely upon the statements made to him, and the evidence produced in response to his requests.

Mr. Hanley: I do not know whether the record shows that or not. The fact is that Mr. Boatwright has sworn, in his testimony, that he pulled all the vouchers, and that these expenses were determined on the basis of an examination of all the vouchers.

Now, if your Honor please, this witness comes on the stand and says he did not follow the tracks of these Respondent's accountants, and he did not look at the vouchers.

And he says that the results are inaccurate.

7517 Now, I am entitled, if your Honor please, to establish the lack of credibility and weight of this witness' testimony. He does not know what he is talking about because he did not do the work.

Trial Examiner Ballinger: Now, that is a matter of proof that is within the sole possession of the Respondent company. The witness has repeatedly stated the basis of his conclusions. And I think that is so clearly portrayed on the record that it seems to me that it is impossible to go any further with it.

Mr. Hanley: Is it on the record that he, this witness has testified and stated that he did not look at the figures?

Trial Examiner Ballinger: Why, his testimony is very clear that his examination of the records, except in some few instances, was superficial, that he accepted the figures of the Respondent company.

He further says that he had reason to believe, however, after that superficial investigation, to conclude that the records of the company were being accurately kept for their purposes, and that he accepted that.

Mr. Hanley: Very well.

By Mr. Hanley:

Q. Now, Mr. Warmack, you have testified as has been summarized by the Examiner, that you did not make any personal investigation of how this actual expense in 7518 account 001 was allocated to direct shipments?

Mr. Austin: The Examiner did not say that.

The Witness: Why, certainly, the Examiner did not say that, and I never did say that in my life.

By Mr. Hanley:

Q. Is it a misstatement?

Trial Examiner Ballinger: Why, the Examiner's information is, and as I recall the witness' testimony, it is to the effect that the witness made inquiry of the officials and employees of the Respondent company as to what had been done by them, both the type of accounting methods employed in arriving at the conclusions stated with reference to this account, and that he made some superficial examination of the records. And upon their statement to him and upon his limited examination of the records, he bases his conclusions.

Is that correct, Mr. Warmack?

The Witness: That is correct, your Honor, with this, I should like to say I made a study into the methods employed in the separation of these classes of expenses.

I do not question the fact that the company incurred the expense. I do question the methods employed in the separation for the purpose of arriving at a cost differential.

Mr. Austin: You did make such a study, did you not, Mr. Warmack, as that?

7519 The Witness: I most assuredly did. Yes, sir.

Mr. Austin: You did study those? Did you not study those, Mr. Warmack?

The Witness: I certainly did study those. There is no question about that. I studied them very carefully.

Trial Examiner Ballinger: Judge Hanley,—

Mr. Hanley: (Interposing.) I move to strike the volunteer statement of the witness—

The Witness: (Interposing.) It is a statement of the facts. I do not see why it cannot be made.

Mr. Hanley: —as not in reply to any pending question, and not pertinent to the subject under consideration.

We are discussing account 001, and what this witness knows about the method, and the facts underlying the conclusion of Respondent's accountants that there was an actual expense of approximately 6.8 per cent, and that is all that is under discussion in these questions.

Trial Examiner Ballinger: Read the question of the Examiner to the witness and the witness' answer.

(The reporter read the question to the witness, and the witness' answer as follows:

"Trial Examiner Ballinger: Why, the Examiner's information is, and as I recall the witness' testimony, it is to the effect that the witness made inquiry of the officials and employees of the Respondent company as to what
7520 had been done by them, both the type of accounting
methods employed in arriving at the conclusions stated with reference to this account, and that he made some superficial examination of the records. And upon their statement to him and upon his limited examination of the records, he bases his conclusions.

"~~Is that~~ correct, Mr. Warmack?

"The Witness: That is correct, your Honor, with this, I should like to say I made a study into the methods employed in the separation of these classes of expenses.

"I do not question the fact that the company incurred the expense. I do question the methods employed in the separation for the purpose of arriving at a cost differential.")

Trial Examiner Ballinger: The motion to strike is denied.

By Mr. Hanley:

Q. Now, just to summarize this, Mr. Warmack?

A. Yes.

Q. As I understand it, you did not yourself make any examination into the costs or the actual expense of the Respondent company in handling direct shipments in reference of account 001?

A. I did not and do not question the total expense. I did not make an analysis of the account.

7521 Q. Mr. Warmack, that is not the question.

A. I am sorry.

Mr. Hanley: Will you please read the question?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

Trial Examiner Ballinger: Read the answer.

(The reporter read the answer and the question.)

By Mr. Hanley:

Q. Can you not answer that "yes" or "no", Mr. Warmack? Either you did or you did not.

A. Well, in the first place, I made a study which involved this account. And I have the information right here showing the amount of salary paid to each one of these people in this account. That I secured in the office at Detroit.

Mr. Hanley: At this time the Respondent moves to strike the answer of the witness as non-responsive. The Respondent requests the Court to admonish the witness to answer the question directly.

Trial Examiner Ballinger: It is the opinion of the Examiner that the witness has made an answer. It may not be entirely satisfactory to counsel for the Respondent, and if not, he may pursue it further.

Mr. Hanley: If your Honor please, I am entitled to an answer to these questions because this is a "yes" or "no" question.

7522 Trial Examiner Ballinger: I—

Mr. Hanley: (Interposing.) Either the witness made this examination or he did not make the examination.

Trial Examiner Ballinger: Judge Hanley, if you had included in your question the further statement as to whether he adopted and used the figures furnished him by the Respondent, you may have been entitled to a direct answer.

Mr. Hanley: No. I am not going to ask that question. I am going to ask him a very simple question.

Trial Examiner Ballinger: Proceed.

By Mr. Hanley:

Q. Did you, Mr. Warmack, determine by an examination of the records of the Respondent company what the expense was in reference to account 001 to which the Respondent company was put in handling direct shipments? Now, I believe that can be answered "yes" or "no". Either you made that examination of the records or you did not.

The Witness: Your Honor, a "yes" or "no" answer is not appropriate. I have stated what I did for this record —exactly what I did.

Mr. Hanley: The Respondent requests the Court to admonish the witness that the question is susceptible of a "yes" or "no" answer. The Respondent requests that the witness be required to give a "yes" or "no" answer.

7523 Trial Examiner Ballinger: Well, the Examiner is of the opinion that the witness can give an answer "yes" or "no."

The Witness: Well, the question would imply that I did not study this account. If I can make inquiry of the counsel as to exactly what he means, I will be glad to give him a "Yes" or "No" answer.

By Mr. Hanley:

Q. I did not ask you about a study.

Mr. Hanley: Will you read the question again, please?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

Mr. Hanley: May we be off the record?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Have you made a personal study? If you have made a personal study the counsel does not desire for you to portray it on the record but prefers that you state it "yes" or "no," and therefore you may answer that question "yes" or you may answer it "no."

The Witness: May I hear the question read, your Honor?

Trial Examiner Ballinger: Read the question.

7524 (The reporter read the question as follows:

"Q. Did you, Mr. Warmack, determine by an examination of the records of the Respondent company what the expense was in reference to account 001 to which the Respondent company was put in handling direct shipments?

"Now, I believe that can be answered 'yes' or 'no.' Either you made that examination of the records or you did not.")

The Witness: Yes. I made a review of those records. I have a copy of those and they are a part of the record for this particular expense.

By Mr. Hanley:

Q. Very well, Mr. Warmack.

The Witness: May I explain, your Honor?

Trial Examiner Ballinger: Very well.

By Mr. Hanley:

Q. What is the result in dollars and cents?

The Witness: May I explain?

Trial Examiner Ballinger: You have explained repeatedly what study you made.

The Witness: Well,—

By Mr. Hanley:

Q. (Interposing.) Will you answer?

The Witness: I have made a "yes" or "no" an-
7525 swer. I would like to be able to make an explanation of it.

By Mr. Hanley:

Q. You have explained that you made the calculation.

Trial Examiner Ballinger: You have explained that fully in the record heretofore, Mr. Warmack.

The Witness: Well, not to my satisfaction.

By Mr. Hanley:

Q. Having made that study, will you now tell us what the result was? What in dollars and cents was the result?

A. The result of my study in dollars and cents was that I found that you made an expenditure applicable to this account of $13,019.63. And that is portrayed on Respondent's Exhibit, regular accounting form 189, for the year 1940, which is Commission's Exhibit 119, and if you would like to know the names of the salesmen, and the salaries of each employee, added to that, I will be glad to read them into the record—

Q. (Interposing.) What is your figure?

Mr. Austin: What is what figure?

By Mr. Hanley:

Q. What is that figure?

A. $13,019.63.

Mr. Hanley: $13,019.63.

Mr. Austin: $13,019.63?

The Witness: That is right.

By Mr. Hanley:

7526 Q. You have now stated the result of your calculation, Mr. Warmack, which is identical with the calculation or the result of the calculation as appears on Respondent's Exhibit 101.

That being true, on what theory or basis do you question the accuracy or the propriety of the percentage in subquestion (a) of 6.8 per cent as applicable to 'direct shipment' business on account 001?

A. In the first place, I have not stated that I subscribe to the separations of account 001, but that I know, or at least I found out that the total expense was $13,019.63—

Q. (Interposing.) I am not asking you—

A. —with the separations which you have made on Respondent's Exhibit 101 in which you assign 6.8 per cent of this class of expense to direct shipment business and the remaining percentage, which is 93.2 per cent to your bulk plant business, is mostly assuredly wrong, and I most assuredly question those separations.

Q. Well, Mr. Warmack, I intended to ask you and perhaps I am not without guilt of not making it sufficiently clear—I intended to ask you, and I now ask you this: If you did not make a calculation? I am not asking you now about the procedure. I am asking you if you made a calculation, if you made an accurate calculation.

A. A calculation of what, may I inquire?

7527 Q. As to the amount of expense to which the Respondent company was put in handling direct shipment business in connection with account 001.

A. I certainly do not understand your question. If I may inquire—

Trial Examiner Ballinger: (Interposing.) Read the question.

(The reporter read the question.)

Trial Examiner Ballinger: Did you make such a calculation?

The Witness: Your Honor, I checked the calculations of the figures as set forth on Respondent's Exhibit 101, but the counsel is asking me if I established figures. I did not do that.

Trial Examiner Ballinger: Then you did not make any calculation, did you?

The Witness: Your Honor, you can calculate any figures in the world. I can calculate the figures that are shown on here.

Trial Examiner Ballinger: Did you make any independent calculation, based upon your own methods of accounting, of these items?

The Witness: No, sir.

Trial Examiner Ballinger: Well, that is what he wants to know.

7528 The Witness: That is not the way I understood it. It was just that I made the calculation.

By Mr. Hanley:

Q. That being true, Mr. Warmack, I assume that you are not prepared to say that as a matter of figures of the per cent of 6.8 per cent—that is, that the percentage of 6.8 per cent is right, or high, or low? Is that true?

A. I am not in a position to say. I do know this, that I question—

Trial Examiner Ballinger: (Interposing.) Now, Mr. Warmack, that question is susceptible of a "yes" or "no" answer.

The Witness: O. K. I question the figures. I do not know whether they are correct or incorrect, not having been established by a proper study.

By Mr. Hanley:

Q. Well, now, Mr. Warmack, since we have that established, let us go back to the original question.

A. I do not know what original question you mean.

Mr. Hanley: Then I will withdraw that, your Honor.

Trial Examiner Ballinger: Question withdrawn.

By Mr. Hanley:

Q. Is what you have just said in connection with making a calculation in respect of account 001 equally true in respect of account 004, account 005, and account 215?

7529 A. Yes, sir. Now, what did you say—just calculating? May I hear that, Judge?

Trial Examiner Ballinger: Read the question to the witness.

(The reporter read the question.)

The Witness: The answer is—yes, sir.

By Mr. Hanley:

Q. That being true, are you now able to answer the typewritten question in respect of sub-divisions (b), (c), and (d), being respectively pertinent to accounts 004, 005, and account 215?

A. The answer given for account 001 applies equally to those three accounts.

Q. And that is to say, as I recall your answer, that you do not regard it as a sound accounting practice to charge approximately 30.3 per cent of the expense incident to the totals in these three accounts for the respectively indicated percentages of effort for which the expense was incurred?

A. That is the part of my answer, but the other part of my answer is that that is my opinion, as just stated, provided that the proper accounting study has never been made which would show and substantiate the Respondent's allocations to direct shipments business for these accounts, as shown on Respondent's Exhibit 101, whereby the percentages applicable to account 004, account 005, and account 215, as set forth in your question, were arrived at.

7530 Mr. Hanley: Respondent now moves to strike that portion of the witness' answer beginning "The other part of my answer is" and so forth, for the reason that it is unresponsive, a volunteer speech having no pertinency to the question.

It assumes that no cost study was made, it being apparent from the affirmative testimony of this witness that he does not know whether any cost study was made, and it being further the fact that it appears affirmatively in this record that such cost studies were, in fact, made;

And it further appearing that the remarks of the witness have no relevancy inasmuch as he has affirmatively testified that he made no studies to test the accuracy mathematically of the percentages applicable to account 004, account 005, and account 215.

Hence, he is not in a position to say that they are either exact, or too high, or too low.

He has referred his answers in respect of account No. 004, account 005, and account 215, to his answer in respect of account 001, in which he affirmatively testified that he did not know whether the percentage was high, mathematically, or right, or too low.

Trial Examiner Ballinger: The motion to strike is denied.

By Mr. Hanley:

7531 Q. Referring you to that portion of account 520, amounting to $108,508.83 being the company payment to a trust fund for future annuities. What year was the payment actually made in, Mr. Warmack?

The Witness: May I review, your Honor?

Trial Examiner Ballinger: You may.

(The witness examines certain documents.)

Mr. Hanley: May we be off the record?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

The Witness: May I have the question, please?

Trial Examiner Ballinger: You may. The reporter will read the question.

(The reporter read the question.)

The Witness: It is my understanding that it was made in the year 1940. I did not review all of the cash vouchers. I did review records showing that this $108,508.83 was included in the total of $3,411,014.34 paid by the company applicable to the year 1940, but I have information in the working sheets here to show that of that $3,411,014.34 one million dollars of it was paid as of August 31, 1940.

It is my understanding—it is my understanding that the remaining portion of it was paid up to, say, around the end of the year 1940.

7532 By Mr. Hanley:

Q. Does that represent an expense item?

A. I beg your pardon?

Q. Does it represent an expense item?

A. I think that I have testified that in my opinion it represents a charge against accumulated earnings of the company.

Q. Mr. Warmack, I did not ask you that. I do not care where you, as a bookkeeper or as an accountant, want to charge it.

Trial Examiner Ballinger: Read the question.

(The reporter read the question as follows:

"Q. Does it represent an expense item?")

Trial Examiner Ballinger: It either does or it does not. Which, in your opinion, does it represent?

The Witness: I should think it represents an expense item which is properly chargeable to accumulated earnings.

Trial Examiner Ballinger: It does not make any difference where it is properly chargeable.

The question is: Does it represent an expense item?

The Witness: I know—

By Mr. Hanley:

Q. What is your answer?

Trial Examiner Ballinger: What is your answer?

The Witness: May I review, your Honor, the record? 7533

Trial Examiner Ballinger: What does this just represent, an expense item, or does it not?

The Witness: I stated in my opinion that it does. I think the record will show that and—

Trial Examiner Ballinger: (Interposing.) Now, one moment. You have answered the question.

Mr. Hanley: May we be off the record?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record. Proceed.

By Mr. Hanley:

Q. Is it a marketing expense?

A. Not for the year 1940. No, sir.

Q. I did not ask you that, Mr. Warmack.

Is it a marketing expense?

A. I do not know. That is my answer.

Q. You have stated that it is an expense item. If you do not know whether or not it is a marketing expense, state, in your judgment as an accountant, what kind of an expense it is.

A. It is an expense which is of an extraneous nature.

Q. Well, that is very helpful. Is it a production expense, Mr. Warmack?

A. I certainly should not think so.

Q. Is it an expense of selling goods?

7534 A. I would not so regard it. I certainly would not regard it for the year 1940—

Q. (Interposing.) I am not asking you about the time. I am asking you about the fact.

A. I stated I would not so regard it. That is my opinion.

Q. If you do not regard it as the marketing expense, would you regard it as—and be specific—would it be a production expense? Or what kind of an expense would it be?

A. It would be an extraneous expense. It would be an unusual expense. It would be a proper charge against accumulated earning for handling any such costs.

Q. Is it not incident, Mr. Warmack, to the selling of goods?

And are not the funds represented by that pay-out on the part of the company, paid to employees in the marketing department?

A. I certainly do not understand your question.

Mr. Hanley: Will you read the question?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: There are two questions there. May I answer those separately, Judge?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

Trial Examiner Ballinger: Proceed. The reporter will read the first part of the question.

7535 (The reporter read the following:

"Q. Is it not incident, Mr. Warmack, to the selling of goods?")

By Mr. Hanley:

Q. Now, stop right there, and put the question there, and take the answer to it.

A. In my opinion it is not applicable to the selling of goods for the year 1940.

Mr. Hanley: I move to strike the answer.

The Witness: Well, I will have to complete my answer—

Trial Examiner Ballinger: Mr. Warmack, you must not go beyond the answer.

Mr. Hanley: I move to strike it as definitely not applicable to the year 1940. I move to strike that.

Trial Examiner Ballinger: You have moved to strike that. Your motion is granted. Mr. Warmack, you must not volunteer that way.

The Witness: Well, I have to answer it. I can answer it two ways—

Trial Examiner Ballinger: You may answer it.

The Witness: For the year 1940—

Trial Examiner Ballinger: (Interposing.) Now, Mr. Warmack.

The Witness: I cannot answer it any other way.

7536 Trial Examiner Ballinger: Now, Mr. Warmack, you must answer the question.

The Witness: I cannot.

Trial Examiner Ballinger: Well, now, you may not want to answer it without the inclusion of the year 1940, but you can answer it, and if you are asked as to what year it is to apply, you can then state that.

Read the question to the witness.

(The reporter read the following:

"Q. Is it not incident, Mr. Warmack, to the selling of goods?")

The Witness: I do not know. I certainly would say it does not for 1940.

Trial Examiner Ballinger: Now, Mr. Warmack, that is not proper.

The Witness: Well, Judge, if I cannot answer the question properly I will not answer it at all.

Trial Examiner Ballinger: Now, just a moment. This is simply a repetitious statement; unless you are asked about the year, do not contribute anything about that.

Mr. Hanley: For the sake of the record, if you please, I have to make a motion again, to strike the volunteer statement made by the witness.

Trial Examiner Ballinger: The motion to strike the statement of the witness is granted.

7537 (Witness temporarily excused.)

Mr. Hanley: If your Honor please, I now move that we be in recess for luncheon until 1:45.

Trial Examiner Ballinger: The motion of counsel for the Respondent is granted.

And now, at 12 o'clock noon, the hearing stands in recess until 1:45 p. m.

(Whereupon, at 12:00 noon, a recess was taken until 1:45 p. m., this day.

7538 **Afternoon Session**

1:45 p. m.

Trial Examiner Ballinger: Come to order.

Read the pending question.

Mr. Austin: I suggest that it appear on the record at this time so we may know what it is.

(The reporter read the following question:

"Q. Is it not incident, Mr. Warmack, to the selling of goods?

"And are not the funds represented by that pay-out on the part of the company, paid to employees in the marketing department?")

Mr. Hanley: Mr. Warmack, will you please resume the stand?

Mr. Warmack: Yes, sir.

WILLIAM J. WARMACK resumed the stand and testified further as follows:

Cross-Examination (Continued) by Mr. Hanley.

Q. Mr. Warmack, you have just heard the reading of the question.

A. Yes, sir.

Q. Can you answer it?

A. Yes, sir.

7539 Trial Examiner Ballinger: You may answer it.

The Witness: Your Honor, I would like to have the answer in two parts and I would like to have the question read to me in two parts and then I will endeavor to answer each part.

Trial Examiner Ballinger: You may do that.

The reporter will read each section and the record will indicate what is read.

(The reporter read the following:

"Q. Is it not incident, Mr. Warmack, to the selling of goods?")

The Witness: The answer to the first part of the question is—I do not know.

(The reporter read the following:

"And are not the funds represented by that pay-out on the part of the company, paid to employees in the marketing department?")

The Witness: The answer to the second part of the question is—it is my understanding that no part of that expense is paid to the employees—payments go into the fund.

By Mr. Hanley:

Q. So that we may be clear on this, Mr. Warmack, your answer to the first section of the question is to the effect that you do not know whether it is a marketing expense. Am I right thus far?

7540 A. Well, that has been my answer. That is not the complete answer. I will be glad to give the complete answer.

Q. Mr. Warmack, I am expecting you to make complete answers to these questions, of course.

A. Then, the answer is: I do not know, but I do know that it is not a marketing expense for the year 1940.

Q. Now, just a moment, please.

A. Yes.

Mr. Hanley: The answer of the witness in respect of the year 1940 is moved to be stricken by the Respondent inasmuch as he was asked as to no particular time period. The question goes simply to the matter of whether or not this particular expense is a marketing expense.

Trial Examiner Ballinger: The motion is granted. And the witness is requested hereafter to answer these questions without referring to any particular year unless a year is included in the question.

The Witness: Well, I am handicapped there. I am incapable of giving a better answer than the answer I have just given, a part of which was stricken.

By Mr. Hanley:

Q. Are you unable to state, Mr. Warmack, whether or not this expense is a marketing expense?

A. No, sir. I am not unable to state it.

7541 Q. If you are not unable to answer it, will you please answer it: Is it or is it not a marketing expense?

A. The answer is: I do not know—but that is not a complete answer.

Trial Examiner Ballinger: Now, Mr. Warmack, you have made that statement as least once before. Now, will you incorporate in the record at this point your complete answer?

The Witness: The answer to the question is: I do not know if this expenditure could be classified as a marketing expense for any year. I do know that it is not a marketing expense for the year 1940.

Mr. Hanley: If your Honor please, I just feel like apologizing for continually making a motion in respect of striking this testimony.

Trial Examiner Ballinger: The Examiner will save you the trouble. Hereafter, when an answer such as has just been made, the Examiner will strike it out of his own motion.

Mr. Austin: If your Honor please, the witness was asked whether this was a marketing expense. While you may answer those questions generally, supposing it was a marketing expense in 1938 and was not in 1939, the witness would have to explain that otherwise he could not make a truthful and correct answer.

Trial Examiner Ballinger: If it was a marketing expense in any year it would be a marketing expense.

7542 Mr. Austin: Well, I do not know whether that is so or not.

Trial Examiner Ballinger: Well, the witness may state.

Mr. Austin: It seems to me that this would all be solved if the witness were just given a chance to state what, in his opinion, the nature of the expenses were.

Trial Examiner Ballinger: The witness has stated on this record now at least two or three different times that it was not a marketing expense in the year 1940.

Mr. Austin: I agree with that.

Trial Examiner Ballinger: And he undertakes to include that same statement in every answer given, which is wholly unnecessary and repetitious. We understand the position of the witness perfectly with reference to it.

Mr. Hanley: Is there a pending question?

(The reporter read the following question:

"Q. Is it not incident, Mr. Warmack, to the selling of goods?

"And are not the funds represented by that pay-out on the part of the company, paid to employees in the marketing department?")

The Witness: I have answered it the very best way I can. I have answered it in the very best way I know how. I do not know how to give a better answer than I have already given.

7543 By Mr. Hanley:

Q. Are you unable, Mr. Warmack, as an expert accounting witness, to testify as to whether or not that item of expense is a marketing expense without, in your answer, making reference to some definite time period?

A. No, sir. I am not capable of giving that. Without that information, the answer, in my opinion, is incomplete, blank, and valueless.

Q. Are we to understand—

Trial Examiner Ballinger: (Interposing.) Just one moment. It is not necessary for the witness to give what he considers the effect of his answer. He is asked a definite question. And he may either answer it or he may decline to answer it. If he does not know he may so state. The explanations and statements such as just made are improper.

The Witness: Well, my answer, your Honor, is that I do not know, subject to the qualifications just stated in this record.

Mr. Hanley: Respondent moves to strike the answer of the witness beginning with "subject to the qualifications * * *"

Trial Examiner Ballinger: The motion is granted.

The Witness: That is not the whole truth then.

Trial Examiner Ballinger: Mr. Warmack, you must not volunteer statement on this record.

7544 The Witness: Well, Judge, may I ask a question off the record?

Mr. Hanley: The Respondent requests that no conversations take place off the record. Those are usually the ones that we want on the record.

Trial Examiner Ballinger: It is not necessary.

Mr. Hanley: Anything that the witness says, I think, should be on the record.

The Witness: I am willing for it to be. I want to say—

Trial Examiner Ballinger: (Interposing): Mr. Warmack, please. There will be no repetition of these interruptions. You will answer the questions that are asked.

The Witness: May we have a five minute recess?

Trial Examiner Ballinger: Do you desire that?

The Witness: Yes, sir. Thank you.

Trial Examiner Ballinger: Any objection?

Mr. Hanley: No objection on the part of Respondent.

Trial Examiner Ballinger: We will take a five minute recess.

(A short recess was taken.)

Trial Examiner Ballinger: Come to order. You may proceed.

By Mr. Hanley:

Q. As I now understand your testimony, Mr. Warmack, you have said that you do not know whether this item 7545 of $108,000 plus is a marketing expense. You have stated that, in your judgment, it is not a marketing expense, in any event for the year 1940. Am I correct in that?

A. Yes, sir For the purpose of qualifying, however, I may inquire—

Q. (Interposing.) M[illegible] I ask, am I just correct about my understanding of yo[illegible] testimony? If you do not understand that question, I will ask the reporter to read it to you, please.

A. (There was no answer.)

Trial Examiner Ballinger: Do you understand the question?

The Witness: I am not exactly clear on that, and all of that which went before. I would like to inquire, your Honor, on the technical point: What does Respondent's attorney mean when he says, "Expense"? What is the usage or the definition that he attaches to that?

By Mr. Hanley:

Q. I am sorry I cannot explain that to you. You are an expert accounting witness, Mr. Warmack. I am asking you the questions. I asked you if this item was a marketing expense. Your ans[illegible]r was that you did not know. You did say definitely th[illegible] in your judgment it was not a marketing expense for the year 1940. All I am doing in this question now is summing up your testimony. Is that 7546 not your testimony up to now?

A. That is my testimony up to now, but I think that this technical point should be straightened out. There can be—

Q. (Interposing.) Very well.

A. —items of accounting which can be construed charges which would not of themselves in the general terminology be regarded as expenses. Was this one of that kind of charges? is my question.

Mr. Hanley: The Respondent moves to strike the volunteer statement of the witness as non-responsive to the question.

The Witness: That was the inquiry, your Honor.

Trial Examiner Bailinger: The motion is granted.

By Mr. Hanley:

Q. Now, I refer you to page 6380 of the record, Mr. Warmack.

A. What page?

Q. 6380.

A. Yes.

(The witness examines page 6380 of the record.)

Q. Do you find it?

A. Yes.

Q. I ask you now, Mr. Warmack, if at that point you did not make the following statement, in part:

"The amount of $108,508.83 assigned to the Detroit field as a portion of the trust fund established by the
7547 company for the retirement of employees in the Detroit field covering services of such employees prior to January 1, 1939, is in my opinion, a current marketing expense—"

A. No, sir.

Q. "—No, sir?—."?

A. No, sir. I did not make that statement or at least that is not my complete statement.

Q. Well, let us get the page.

Mr. Austin: If your Honor please, I have that page. I previously have read that testimony. There was an error in the stenographic report to my knowledge and recollection. The word "not" was left out of the witness' answer. I read it and had marked it in my copy.

Mr. Hanley: That is objected to, if your Honor please. If they are going to question now the stenographic accuracy of the reporting in this record, that is nothing new.

Mr. Austin: No, sir. I will question that in many cases. I have hundreds of corrections to make in the record, taking the record from page 1 down to where we are now.

Trial Examiner Ballinger: Further discussion of the matter is off the record.

Mr. Hanley: What?

Trial Examiner Ballinger: Further discussion of the matter is off the record.

7548 Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

The witness has answered that he did not make that statement.

By Mr. Hanley:

Q. Referring you to page 6380, Mr. Warmack, do you find the statement reflected on that page as just quoted in my last question?

A. Yes, sir. I find the statement, line 18 of that page, and it should read: "Is not."

Q. Do you find that statement as I quoted it?

A. Yes, sir.

Q. Do you dispute the accuracy of the reporting of your answer?

A. Yes, sir. Line 18 only, on page 6380 of the record.

Trial Examiner Ballinger: What inaccuracy appears there?

The Witness: Well, let us read it, your Honor.

"Is not in my opinion a current marketing expense."

By Mr. Hanley:

Q. You said line 18, referring to page 6380, Mr. Warmack?

A. That is correct.

Q. If I count correctly, line 18 refers to the amount of $22,279.06, and has nothing whatever to do with 7549 the amount of $108,508.83.

Am I incorrect in that?

A. According to the copy of the record which I have before me opposite the figure 18—which is the line number —is a statement, "Is in my opinion a current marketing expense." That line should be changed to read "Is not in my opinion a current marketing expense."

Q. Well, is it to be understood now that you desire to change that testimony—

A. (Interposing.) It certainly is not.

Q. —as it is reflected presently on page 6380 in reference to the item of $108,508.83?

A. It is my desire that line 18 of page 6380 of the record be corrected, and that this stenographic change should be made whereby the last line, or that line will read:

"Is not in my opinion a correct marketing expense."

Q. Mr. Warmack, are you now changing your testimony?

A. No, sir.

Q. Or are you disputing the accuracy of the reporting when that testimony was originally recorded by the reporter?

A. I am not changing my testimony, and I am saying that the stenographic omission of the word "not" should be corrected.

Mr. Hanley: Respondent moves to strike that as 7550 not responsive to the question and if your Honor please, I will ask two questions rather than one.

Trial Examiner Ballinger: One moment.

By Mr. Hanley:

Q. Did you take the—

Trial Examiner Ballinger: (Interposing.) One moment. If you are going to withdraw the question and divide the question up into two questions, the motion is granted, and the matter is stricken.

By Mr. Hanley:

Q. Do you take the position, Mr. Warmack, that you are now changing your testimony from that which appears at page 6380 in reference to the amount of $108,508.83?

A. I am not changing my testimony. I am only stating that a stenographic omission of the word "not" be inserted in line 18 of page 6380 of the record.

Q. Do you take the position that the stenographic record of the testimony, as given by you and as reflected on page 6380 in respect of this item of $108,508.83 is an erroneous reflection of your testimony then given?

A. Yes, sir. There is an incorrect—

Mr. Hanley: I object.

Trial Examiner Ballinger: You have answered it.

The Witness: I will have to tell what it was.

Trial Examiner Ballinger: Wait for the next question, Mr. Warmack.

By Mr. Hanley:

Q. Mr. Warmack, in your judgment as an accountant, does the Respondent derive any current benefits from that payment? Referring to this $108,508.83 item to the trust fund for future annuitants in terms of added contentment of present employees, greater loyalty, and greater efficiency?

A. It may. Yes, sir.

Q. Well, in your judgment as an accountant, does it?

A. I should certainly like to inquire just—you say greater. Greater than what?

Trial Examiner Ballinger: Greater than it would enjoy if the fund were not available.

The Witness: Well, I do not know. My thought with respect to that is this, Mr. Hanley, that had the company inaugurated the plan and set aside these funds, as it did, before, it already had in operation a plan whereby—

Mr. Hanley: I object.

Trial Examiner Ballinger: I do not think the witness has completed his answer.

The Witness: I had not. I will continue. I think I will just start all over again. I do not know. My thought with respect to that is this, Judge, that before the company inaugurated the plan and set aside these funds it already had in operation a plan whereby its employees
7552 expected or knew that they would be retired and
given a pension at the end of a certain time. Therefore, if the setting aside of that fund created any greater cooperation and effort on the part of the employees than they had already given because of the fact that they knew or reasonably expected to receive this pension, I just do not know whether there was any greater cooperation given to the business or whether there was not by the employees.

By Mr. Hanley:

Q. Well, what is your best judgment as an accountant, if you have any judgment about it?

A. It is my opinion that inasmuch as the employees already expected to receive this pension at the end of a certain number of years of employment, that this setting aside of the fund, or rather, having the company carry it on as it has been carried, would have little if any effect to the extent of creating greater cooperative feeling among the employees.

Q. Very well, Mr. Warmack.

Irrespective of the method employed by the company in paying these benefits to the employees, what is your judgment as an accountant as to whether or not the fact that the benefit was to be paid or accorded to employees by some method a thing which would contribute to the greater contentment of the employees, and their greater loyalty, and their greater efficiency?

7553 The Witness: May I hear that, Judge, please?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: May I hear it again?

Trial Examiner Ballinger: Read it again.

(The reporter again read the question.)

The Witness: I think that it is a fair assumption that a thing of that kind should cause greater cooperation, loyalty, and efficiency of employees than if the employee expected to receive no pension of any kind whatsoever.

By Mr. Hanley:

Q. Then are these payments purely for benefits received prior to January 1, 1940, rather, January 1, 1939?

A. It is my understanding that the records show that.

Q. I am sure you misunderstood the question, Mr. Warmack.

A. I beg your pardon.

Q. The question is—in view of your last answer—this: Are these payments purely for benefits received by the company prior to January 1, 1939?

A. It is my understanding that that is correct inasmuch as the Respondent company have other plans to cover benefits applicable to current years.

Q. Mr. Warmack, does not the fact, in view of your second preceding answer, that employees are given consideration through these benefit plans for services
7554 prior to 1939, have any bearing on their loyalty, efficiency, and greater contentment subsequent to January, 1939?

A. I think that is a fair assumption, yes, sir.

Q. Will you refer to page 6381 of the record, please?

A. Yes.

Q. Have you found it?

A. Yes.

(The witness read page 6381 of the record.)

By Mr. Hanley:

Q. Is it not true that you have testified that this payment, in your opinion, was a proper charge against accumulated earnings of the company?

A. Referring specifically to the $108,000 plus item which we have been discussing?

Q. Yes.

A. Yes, sir.

Q. Is the practice you have there recommended in keeping with your opinion of sound accounting?

A. Yes, sir.

Q. Is that practice generally followed by distribution cost accountants?

A. In my opinion; yes, sir.

Q. Have payments to the trust fund been made each year since the annuity plan was adopted?

A. According to my review and studies, and the
7555 information thereby in the company's offices, the
answer is—yes, sir. Yes, sir. Or this, I found that
they were paid during the years 1939, 1940, 1941. I have
no knowledge with respect to the current year 1942. I
will limit my answer that way.

Q. Have the payments been made each year insofar as the years are concerned with which you are familiar upon the same basis and have they been for the same amount?

A. I did not hear your question. I am sorry.

Q. Have the payments made each year insofar as the years are concerned with which you are familiar, been the same amount?

A. No, sir. It is entirely optional with the Board of Directors.

Q. Are the payments to the trust fund subject to approval by the Board of Directors?

A. That is my understanding.

Q. And the plan, can the plan be discontinued by the stockholders if desired?

A. That is my understanding, if desired.

Q. Is the total amount the company will have to pay into the trust fund definitely and actually fixed provided the plan is continued?

A. That is my understanding. Yes, sir.

Q. Is the total subject to variation because of death,
resignations, discharge, modification of retirement
7556 age, and so forth, and so on?

A. Well, it was my understanding, or it is my understanding that actuaries had been engaged by the company to study those things, and to give effect to those very things of which you speak, if variations are to be made, I do not know, however.

Q. Would it be sound accounting to charge an indefinite sum to accumulated earnings?

A. For example, please?

Q. I do not have any example. I am asking you. You are an expert accountant, Mr. Warmack.

Mr. Hanley: Will you read the question, please?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: May I inquire—over a period of years?

Mr. Hanley: Respondent requests the ~~Court~~ to admonish the witness to answer the question.

The Witness: Your Honor, I am trying to find out so I can.

Trial Examiner Ballinger: Do you understand the question?

The Witness: No, sir. I am just trying to inquire so I can answer.

Trial Examiner Ballinger: The latter comment of the witness may be stricken physically from the record.

7557 Mr. Hanley: The Respondent requests that there be nothing physically stricken by the Court said by this witness on the record.

The Respondent again requests that the question be read to the witness and the Respondent requests that the witness be admonished to answer the question.

Trial Examiner Ballinger: In view of the objection of counsel for the Respondent, the reporter will incorporate in the record the matter which the Examiner directed should be physically delineated.

The witness has stated, Judge Hanley, that he does not understand the question. If he does not understand it, he can hardly be expected to answer.

By Mr. Hanley:

Q. Do I understand, Mr. Warmack, that you as an expert accounting witness are stating to this Court that you do not understand the following question:

Would it be sound accounting to charge an indefinite sum to accumulated earnings?

A. I do not understand the question as put. It will have to be amplified more than the broad, general statement. That, to me, means nothing.

Mr. Hanley: Off the record.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

7558 Trial Examiner Ballinger: On the record. Proceed.

By Mr. Hanley:

Q. Now, referring to this trust fund item we have been discussing, as an accountant would you make the charge to accumulated earnings each month as the annual amount is billed upon the books, or annually as voted by the directors?

A. I would not make it monthly.

Q. Why not?

A. If you—thank you for letting me explain. For the reason that the amount to be contributed for each of these years, as I understand it, has and is never definitely determined prior to or around the last day of the year.

Q. Are payments as made by the Respondent in respect of this account, Mr. Warmack—

Mr. Austin: May we be off the record?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: I have lost my connection there. Will the reporter read my statement as far as made?

Trial Examiner Ballinger: Read it.

(The reporter read the question of counsel as far as given.)

By Mr. Hanley:

7559 Q. Are payments as made by the Respondent in respect of this account, Mr. Warmack, regarded as proper charges for the purposes of income tax purposes by the Department of Internal Revenue?

A. May I review, your Honor?

Trial Examiner Ballinger: Do you know?

The Witness: No. Not of my own knowledge. No, sir. But these records may show that.

By Mr. Hanley:

Q. Did you not undertake to learn that before you criticized this account, Mr. Warmack?

A. Mr. Hanley, I wrote down information that I received. I did not try to keep it all in my head.

Trial Examiner Ballinger: Do you desire time in which to examine your memoranda?

The Witness: I would have to, to determine if this information is here, your Honor.

By Mr. Hanley:

Q. Very well. Refer to any memoranda that you may have, Mr. Warmack.

Trial Examiner Ballinger: You may examine your memoranda. For that purpose we will take a five minute recess.

(A short recess was taken.)

Trial Examiner Ballinger: Come to order.

7560 Mr. Hanley: I think there is a pending question. Will you please read it to the witness?

(The reporter read the following question:

"Q. Did you not undertake to learn that before you criticized this account, Mr. Warmack?")

Trial Examiner Ballinger: Did you review your records?

The Witness: Yes, sir. This information is not contained in the records as far as I have been able to learn.

By Mr. Hanley:

Q. Do you know?

A. I do not know.

Q. Did you find it when you were investigating this account?

A. No, sir.

Q. Or did you not regard it as important to learn that fact before you condemned the use of this item—

A. (Interposing): Not that.

Q. —in the accounting of the Respondent for the purpose of establishing a cost differential?

A. No, sir. I did not regard it as necessary.

Q. Are you familiar with the publication known as "The Journal of Accountancy"?

A. Yes, sir.

Q. Will you tell the Court what that publication is, please?

A. It is a publication by "The American Institute of Accountants." In other words, a monthly booklet 7561 that is published by The American Institute of Accountants.

Q. Do you regard it as an authentic accounting publication?

A. Just what do you mean by "authentic" there, Judge Hanley?

Q. In your judgment as an expert accounting witness, do you regard it as authentic from an accounting standpoint?

A. It appears to me to be a question of authenticity. Please explain what you mean by that.

Q. Are you unable to answer the question?

A. I do not understand what you mean by "authentic," there. And I cannot answer the question unless you tell me.

Q. Do you regard the accounting opinions expressed in this journal as being reasonably reliable from an accounting standpoint?

A. Some of them I agree with. Some of them I certainly do not agree with.

Q. I did not ask you that, Mr. Warmack.

Mr. Austin: I think the witness answered the question, because it can only relate to his opinion, and he stated what his opinion was.

Mr. Hanley: If your Honor please, it is entirely immaterial as far as this question is concerned whether this witness agrees with the opinions or not.

Trial Examiner Ballinger: But if he does not agree with them, how can they be reliable in his opinion?

7562 Mr. Hanley: I think it is just the same kind of a question, Judge, as though you or I were asked about the American Bar Association Journal.

Mr. Austin: I agree with that.

Mr. Hanley: I am not trying to find out whether this witness agrees with anything in it or not.

I am trying to find out what his opinion is as to the authenticity of this publication.

Apparently he does not understand the meaning of that word, and I have tried to reframe the question so that it will be understandable to the witness. I think I am entitled to an answer.

Trial Examiner Ballinger: Is it a publication of high standing?

The Witness: In my opinion it is, your Honor.

Trial Examiner Ballinger: In general use by accountants? Is it not?

The Witness: Yes, sir. Or, at least, many of them subscribe to it. I think all of the members of the American Institute of Accountants get it free, or they used to. That was my understanding.

Trial Examiner Ballinger: And the opinions as therein appear as a rule are generally sound, there being exceptions?

The Witness: Yes, sir; there being exceptions.

7563 I should like to call attention ta a grand fight that I saw published in the Journal of Accountancy some several years ago where ~~they had~~ a reputable accountant, a Mr. Finney, take great issue with a Mr. Esquerre, who was also and likewise a very prominent accountant. And they fought it out in The Journal of Accountancy, their own views with respect to many or to several or to some problems, very difficult problems of accounting.

By Mr. Hanley:

Q. Were they in disagreement?
A. They certainly were.

Q. It is true then that accountants do disagree?
A. They certainly do disagree.

Q. Incidentally, Mr. Warmack, did you follow that controversy?
A. Yes, sir. With great interest.

Q. Did you understand the questions involved?
A. I think I did.

Mr. Austin: Your Honor, I think the witness is in the same dilemma that you and I would be if we were asked to establish the authenticity of the American Bar Association Journal as suggested by counsel for the Respondent. I would dislike to have to answer that question.

Mr. Hanley: There is a difference here.

Trial Examiner Ballinger: That may be stricken physically from the record.

7564 Mr. Hanley: I would prefer to have it on, if your Honor does not object.

Trial Examiner Ballinger: Very well. Let it stay.

By Mr. Hanley:

Q. Is it not true, Mr. Warmack, that The American Institute of Accountants conduct a "accounting questions" section each month through its publication, "The Journal of Accountancy?"

A. Well, I do not remember just at this time, Judge Hanley. I have not reviewed the Journal for some time. I am sorry.

Q. Well, is it corect in your understanding that practicing accountants present questions and other practicing accountants submit answers?

A. I think that has been done. And it still may be in practice.

Q. I hand you a copy of the "The Journal of Accountancy" for the month of May, 1940, and refer you to pages 388, 389, and the top of page 390.

And I ask you, first, if the question there posed is not substantially in line with the accounting procedure and practice of the Respondent in handling its annuity plan?

I then ask you to read the five answers submitted by the practicing accountants and tell the Court whether or not you agree, in principle, with the answers submitted by those accountants.

Mr. Hanley: For the benefit of the witness, Court,
7565 and counsel, permission is requested to have spread
upon the record, the question posed as referred to,
and the five answers of practicing accountants also referred
to.

Mr. Austin: If your Honor please, I object to the inclusion on the record of the question referred to.

Any question that somebody else may be asked in an accounting journal, I submit is immaterial and irrelevant, and could not be a proper inclusion in this record. I think that counsel for the Respondent should ask his own questions. If he wants to ask the witness as to his opinion regarding these other statements but as a part of a question put by counsel for the Respondent and in his question, then and in that event, I have no objection.

Mr. Hanley: That has been done. Counsel for the Respondent has adopted the question as appearing therein as his own question, if your Honor please, for the purpose of this question.

Trial Examiner Ballinger: It was my understanding that counsel for the Respondent, Mr. Hanley, had adopted the question as appearing in the Journal at the pages set forth as his own question for the purpose of this question. Is that not right?

Mr. Hanley: That is right, as I just stated. I had my question indicate that the question posed in the Journal was the question I was asking him, in so far as his
studies are concerned of the situation in the case at
7566 bar, and its relevancy thereto.

Mr. Austin: I do not think that comment means very much of anything. It is not clear as to just what counsel has in mind by that statement.

Trial Examiner Ballinger: It is clear to me.

Mr. Austin: That was a question that was divided into two parts. Suppose that the witness answers the first question in the negative. Then that would eliminate and obviate the necessity of answering the other part of the question, or the second question.

Trial Examiner Ballinger: Further discussion will be off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Is there an objection to the incorporation of the question posed and the five answers given appearing in the document?

Mr. Austin: Yes, your Honor. I object to the question being incorporated in the record unless it is adopted by and as counsel for the Respondent's question; and my objection to the inclusion of the opinions referred to is urged unless and until it appears that the question itself is properly directed to the evidence in this case.

Trial Examiner Ballinger: As the witness has
7567 stated that it would require some time for him to
make an examination into both of the questions that are presented by the questions propounded by counsel for the Respondent, in a discussion off the record, and as it is desirable that the proceeding proceed without further delay, the Examiner overrules the objection of counsel for the Commission, permits the inclusion of the matter in the record, which will be considered as a question posed by counsel for the Respondent, irrespective of the fact that it appears in the publication.

Likewise, the same will be true with reference to the conclusions arrived at by the five separate accountants, reserving, however, to counsel for the Commission his objection to the question and a motion to strike both the question and the answer.

Mr. Austin: Your Honor is allowing the second question before the first question is answered, and the second question may not be relevant, or it may be completely stricken out automatically by reason of the answer given by the witness to the first question.

Trial Examiner Ballinger: That is true, in which case it may be reached by motion to strike. The matter is closed so far as it is an incident on this record.

Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

7568 Mr. Hanley: That is perfectly agreeable to the respondent, but in view of the discussion, may it now be understood that the material referred to is in the record just as though counsel for the Respondent had incorporated that material in a direct question to the witness and had dictated all of that material as a part of such question, and that this is being done more largely for the purpose of mechanical convenience than anything else.

Mr. Austin: I do not object to that providing that the two questions are not combined into one.

Trial Examiner Ballinger: I think that matter is perfectly clear on the record.

The reporter at this point will include the material in the record.

The material referred to is as follows:

"Payments to Insurance Company for Employee Retirement.

"Question.

"A client has asked us the proper accounting treatment to be accorded with respect to payments made to an insurance company under the following conditions:

The payments in question have been made under a plan independent and in addition to old-age-benefit provisions of the federal security act. They are made for the purpose of
providing a retirement allowance such as would have
7569 been payable had the security act been in force at the
date of employment of each individual covered. The
plan contemplates the continuance of these payments to the insurance company for approximately twenty years, but the

corporation is not obligated by agreement with the employees or with the insurance company to continue them. They may be stopped at any time. In the event that the payments are stopped, the employees will receive the benefits prescribed by the plan. No refund will be made by the insurance company to the corporation.

"The client wishes to know which of the following procedures are permissible and which is preferable:

"1. The establishment of a reserve by a charge to surplus in an amount representing the estimated total which the corporation will be obliged to pay over the entire twenty years. Payments as made would then be charged against the reserve so set up.

"2. No provision to be made on the books for the total amount to be paid, surplus, however, to be charged at the end of each year with the payments made during that year.

"3. Current income to be charged with payments as made.

"It will be noted that the amount which will be 7570 paid to the insurance company each year will change by reason of the death, discharge, or change of employment of those covered and, therefore, an estimate of the total amount under plan 1 might present some difficulty.

"The client wishes to follow good accounting procedure, but believes that it is not necessary to charge current income as the payments do not represent an item which must, in all events, be paid at recurring intervals and because the board of directors have the right to stop such payments at any time.

"It should be noted that the payments to the insurance company are spread over twenty years only as a matter of convenience to the corporation. A lump-sum payment could have been made at the time the plan was put in force of an amount which would have purchased the deferred annuities called for by the plan. In that event, however, the corporation would be entitled to a refund of the amount paid in respect to any employees who, by reason of death, resignation, or otherwise, lost their right to receive annuities when they reached the required age.

"Answer No. 1

"In reply to your letter regarding the proper accounting treatment to be accorded with respect to payments made to an insurance company, we believe method 3 should
7571 be followed. We do not know of any accounting practice which would support method 2. We do not believe method 1 would be in accord with the facts, which we understand are to the effect that the corporation is not obligated to continue the payments.

"Answer No. 2

"This is in reply to your question as to the proper accounting treatment to be accorded with respect to payments made to an insurance company under certain stated conditions.

"In our opinion, the proper treatment for the payments in question is to charge current income account with the payments as made. The payments are charges which are expected to recur annually for a period of twenty years; the fact that the payments are voluntary on the part of the directors and not in settlement of legal obligations does not justify their omission from the income account. Although the computation of the amounts may be based on past services of employees, it does not necessarily follow that the charges are applicable to such prior periods; presumably, in authorizing the payments the directors have given consideration to the benefits currently derived therefrom by the corporation, such as the added contentment and efficiency of the employees.

7572 "Had the directors chosen to make a lump payment of the total estimated required amount, and at the same time, gone on record that such payment was in recognition and settlement of past services rendered, then a permissible treatment would have been to charge the payment to earned surplus.

"Answer No. 3

"The payments to be made to the insurance company are for the purpose of supplementing the old-age benefits to the employees under the social-security act, so that the retirement allowances prescribed shall be equal to the amounts which would have been payable had the social-security act been in force from the date of the commencement of employment of each individual.

"Thus the basis of the payments is apparently related to services rendered by the employees prior to the inception of the social-security act. Having regard to this retroactive feature, it might therefore be asserted that the annual payments to be made should be charged to the earned-surplus account now in an estimated lump sum or annually as the actual payments are made and not to the current and future annual income accounts; we think that procedure is permissible. On the other hand, we are of the opinion it is preferable to take the view that, inasmuch as
the corporation only now puts into effect a plan for
7573 supplementary benefits to the employees at the date
of retiral, the annual insurance payments should be regarded as in effect the current cost of a supplementary reward or bonus, for services rendered and to be rendered, to be payable at a specified date and that, therefore, regardless of the basis of computation to determine the annual cost, these annual payments should be charged to the current income accounts from the date of the inception of the plan, when the obligation is actually incurred, to the respective retiral date or for twenty years, or so long as the corporation maintains the plan. Had a lump-sum payment been made a deferred charge could have been established, to be equitably apportioned to the income accounts of future years.

"Answer No. 4

"Regarding the procedure to be adopted in charging off the payments to be made to the insurance company, to provide retirement allowances or annuities to employees we believe the first and second procedures outlined in your letter do not reflect good accounting practice since there is no indication that the payments to be made include any amounts for funding the annuities in respect of prior periods and in consequence such payments should
be charged currently to income. Therefore, in our
7574 opinion, the third period outlined is the one which
should be adopted.

"Answer No. 5.

"1. In spite of the evident intention of the present board of directors to continue over a period of twenty years the insurance payments referred to, it would appear to be incorrect to make any allocation of surplus for the purpose of establishing a reserve to meet payments which may never be made.

"2. It would not appear to be correct to charge the annual payments direct to earned surplus in view of the fact that, while these payments may be discontinued, they are in the nature of an expense in connection with the compensation of employees and as such would appear to be operating charges similar to the cost of medical services, recreational facilities, etc.

"3. As stated above, the annual charge would appear to be in the nature of an expense properly chargeable to operations; in this connection it may be noted that expenditures of this nature are deductible for federal income-tax purposes.

"It might be noted also that, should the corporation arrange with the insurance company at some future date to make a lump-sum payment in lieu of remaining annual payments, such lump sum should not be charged
7575 to operations during the year in which made, but
only that part thereof which might be considered to be fairly chargeable to the then current year and the balance deferred to future operations, to be taken up annually over a reasonable period. This method also would be allowable for federal income-tax purposes."

Mr. Hanley: I will ask the reporter to identify this, if I may. I request that the book be marked as Respondent's Exhibit No. 110-A, that page No. 388 be marked as Respondent's Exhibit No. 110-B, that page No. 389 be marked as Respondent's Exhibit No. 110-C, and that page No. 390 be marked as Respondent's Exhibit No. 110-D for identification.

Trial Examiner Ballinger: They may be so marked.

(The documents referred to were marked Respondent's Exhibits 110-A, 110-B, 110-C, 110-D," for identification.)

Trial Examiner Ballinger: Now that that has been disposed of, is there any objection to the question as such?

Mr. Austin: Yes. If your Honor please, I object to this question, in the first place because it is not necessary to prove the Respondent's accounting method in connection with this case by showing something set up in that book, because that is the best proof.

And there is ample evidence in the record already as
to the Respondent's accounting procedure with re-
7576 spect to these facts.

Secondly, and more important, any opinions expressed in that book would clearly be inadmissible and incompetent. It would be in the nature of hearsay. The person who gave the opinion is not here, and would not be subject to cross examination. Any opinion offered by a person not present and not qualified to testify, I say, would be a secondary piece of evidence, and in any event, the person not being present even though they could be qualified, would not be subject to cross examination; and their opinion would be entirely inadmissible and incompetent for any purpose whatsoever.

Mr. Hanley: I am not offering the opinion of any expert witness.

Trial Examiner Ballinger: It is not necessary to argue the question.

The objection is overruled. The witness is merely being asked his own opinion with reference to the opinions therein expressed.

Mr. Austin: I would just like to have the question reread, if I may.

Trial Examiner Ballinger: Reread the question.

(The reporter read the question as follows:

"Q. I hand you a copy of the 'The Journal of Account-
ancy' for the month of May, 1940, and refer
7577 you to pages 388, 389, and the top of page 390.

"And I ask you, first, if the question there posed is not substantially in line with the accounting procedure and practice of the Respondent in handling its annuity plan?

"I then ask you to read the five answers submitted by the practising accountants and tell the Court whether or not you agree, in principle, with the answers submitted by those accountants."

The Witness: Your Honor, to advise this Court with respect to the opinions set forth—

Trial Examiner Ballinger: Mr. Warmack, you are evidently not answering the question. The first one is a question as to: Is the question therein posed substantially the same question now presented in this particular accounting procedure before us?

The Witness: Your Honor, I do not know. I would have to read and study this book for some hours before I could give my opinions on these things. That is what I was trying to state.

By Mr. Hanley:

Q. Suppose you read it, Mr. Warmack. That is what I intended you to do and that is what I handed you the book to do.

A. I certainly could not read it and make a satis-
7578 factory reply because this involves a very intricate
thing, highly technical, and must be studied.

I cannot read all of this data here on the witness stand and give any answer that would be any better than, I think, than snap judgment would be. I do not propose to give any such answer, and I wish to study the document.

Mr. Hanley: The Respondent now requests the Court to admonish the witness to read the material referred to in the question and then give his answer. It is, of course, perfectly obvious that the witness can answer the question not until and unless he does read the material submitted which consists of two and one-fifth pages in a small book.

Trial Examiner Ballinger: If counsel for the Respondent insists upon his answer, the Examiner will certainly afford the witness ample time to read the booklet.

Mr. Hanley: The Respondent does so insist, if your Honor please.

Trial Examiner Ballinger: The Examiner will give the witness sufficient time to give it sufficient consideration to enable him to give a dependable answer.

Mr. Hanley: That is what I have asked him.

Trial Examiner Ballinger: How long should it take you to read and digest the article, Mr. Warmack?

The Witness: I certainly do not know, your
7579 Honor. I have not read one word of it but I rather
think that it will take some time.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record. Proceed.

By Mr. Hanley:

Q. Let us now consider the item of $22,279.06 representing annuities paid to retire employees in the Detroit field. You may want to refer, Mr. Warmack, to page 6382 of your testimony.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record. Proceed.

The Witness: I have it.

By Mr. Hanley:

Q. Is it not correct that you stated that this was properly a charge against accumulated earnings and that if placed on the books at the time applied it may have been properly charged as an operating expense? Do you find that testimony?

Mr. Austin: May we be off the record?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record. Proceed.

The Witness: Yes, sir. I find that.

By Mr. Hanley:

7580 Q. Does that statement on page 6382 as made by you represent and refer to both the item of $108,000 plus as well as the sum of $22,279.06?

A. Yes, sir.

Q. Did the company pay out those amounts of money?

A. It is my understanding that it did.

Q. And with particular respect to the $22,279.06 for annuities during the year 1940, did the company pay that amount of money out during that year?

A. It is my understanding that it did.

Q. Did the Respondent company charge it as a marketing expense during the year that it was paid, namely, 1940?

A. Yes, sir.

Q. Does the amount so paid in connection with this branch of the annuity plan of the Respondent change with the passage of time due to deaths?

A. It is my understanding that it does.

Q. Would you recommend as an accountant that the Respondent company make a charge to accumulated earnings twice a month as payments are actually made?

A. That is not the way that I would handle the situation on a set of books.

Q. Very well. Would you explain just how this particular expense item could be charged, as you say in your testimony, and I quote, "to the books at the time
7581 it * * *" referring to the expense—"applied,"

unless the same were charged only at the time payments were actually made?

A. I do not understand that exactly, Judge Hanley. I will be glad to tell you how I would handle it on the books, or would suggest handling it.

Q. All right. Go ahead, Mr. Warmack.

A. It is my opinion that the company in anticipation of the payment of pensions; that is, the $22,000 odd item should have charged to the current expense of the years in which this particular class of expense would have occurred, and should have closed that charge to current expense, and on its regular profit and loss account, that would be entered, and that the credit for that charge should be reflected in the reserve account or the liability account.

Later, when the payments are made a proper accounting procedure, in my mind, would be to charge the payments against the reserve account which would have been set up as just explained.

Q. Well, granting your shibboleth of the reserve account as something to charge it against, Mr. Warmack, I am concerned about this—not so much as to wherever you charge it, against the reserve account, or wherever you charge it—but, how much then of this twenty-two thousand odd dollars in your judgment as an accountant would be properly chargeable to marketing expense in 1940?

7582 A. None.

Q. Would it be properly chargeable to marketing expense at any time?

A. It may be as I just explained, yes.

Q. Is it a marketing expense in your judgment?

A. I said that it may be so considered. I rather think that it is or would be a marketing expense.

Q. Are you prepared now to state whether or not you now regard the item of one hundred and eight thousand plus dollars as a marketing expense?

A. Not for the year 1940.

Q. The question had no reference to a year. I am asking you again if you so regard that item as a marketing expense, and refer you to your testimony on page 6382 where you classified that item along with the twenty-two thousand plus dollar item?

A. If it had been recorded back over the years it may have been so regarded. In other words, if they regarded it that way and so recorded it, it may have been so regarded.

Q. Well, how do you regard it?

Trial Examiner Ballinger: What do you mean by "so recorded"? Do you mean recorded on the books as a marketing expense?

The Witness: Yes, sir. That was the question I was asked, your Honor.

7583 By Mr. Hanley:

Q. Do you so regard it?

A. I stated that I did not know. I have no way. I have not considered that point in this case. It does not apply to 1940, and that is the extent of my studies in this case.

Q. Well, you are satisfied that the twenty-two thousand dollar plus item is a marketing expense some place. You have just so testified. Have you not?

A. It may have been, yes. It may have been so regarded.

Q. Of course, Mr. Warmack, I say this to you very respectfully—I am doing it for illustrative purposes—I may be able to swim up Niagara Falls backwards, but that does not answer any question.

I am asking you: How do you as an accountant regard this? Now, how it may be regarded by somebody else is of no importance, but how do you regard it as an accountant?

A. I regard it as an extraneous charge properly chargeable to surplus in the event that the company has not made any provisions to take care of it otherwise in those previous years.

Q. In an extraneous charge as distinguished from a marketing expense?

A. The extraneous charge is a charge that may not be regarded as one occurring in regular operations or current operations of the company. It may not be influenced 7584 by the current operations of the company.

For example, if you were to sell a piece of machinery for ten thousand dollars loss, that would be an extraneous charge. It would be comparable to that. It may be that no provision was made in the case of this piece of machinery to cover this ten thousand dollar loss, although in the case of machinery you may have made some arrangement. Maybe you did not make any. So, that will leave you with that.

Q. If you lost the ten thousand dollars on the sale of machinery would it make any difference in your cost whether you charged it to reserve or to a liability account or to accumulated earnings or to profit and loss, or to current operating expense?

A. Cost of what?

Q. Cost of doing business.

A. In the final end that you would have a certain amount of net earnings or net worth, in the final conclusion as to your net worth, net worth would not be affected regardless of how it was handled on the account.

Q. That is what I thought.

A. That also is true with respect to each and every one of these other items. The net worth of the company is not going to be affected, as reflected by the books of account in the final analysis.

7585 Q. Now, when you refer to an item of cost or expense as an extraneous cost, if no part of that cost applies to the cost of marketing the products of the company, does it make any difference whether you call it extraneous or call it something else? Is it not in fact and finally a marketing cost?

A. As stated on page 6382 of the record, it may have been properly charged as an expense item in previous years. I have not studied anything but the year 1940 and I cannot tell you about, and I cannot talk about anything in there except as to 1940.

Q. Well, will you please disregard time elements, Mr. Warmack. I am asking you if the cost, if it had been incurred, and if the company pays out the money; is that not a marketing cost? Forget for the moment, or disregard for the moment where, when, and how it may be charged in the accounts of the company. The question is simple. Is it or is it not a marketing cost?

A. Actually, are you now speaking directly with regard to this $108,000 plus? May I inquire?

Q. I am addressing myself to any cost that is incurred relative to the marketing of products of the company. But you may, for the purposes of this question, regard the question as being addressed to two things, the $108,000 plus item and the $22,000 plus item.

7586 The Witness: I am not just exactly clear, your Honor, with respect to the question. May I have it read?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: I have already stated that for the record on page 6382 where I said if that—these two items of cost—had been placed on the books at the time that they applied, then they may have been properly charged as operating expenses.

I have not made a study of any year except 1940, and I know this did not apply to 1940. I believe that answers your question, Judge Hanley.

Mr. Hanley: At this time, the Respondent requests the Court to instruct the witness to answer the question either to the effect that the costs referred to in the question are a marketing cost, or they are not, or that the witness does not know, whichever may be in accordance with the fact so far as the witness is informed.

And if your Honor please, I have asked that question I do not know how many times and I just never have as yet gotten an answer. The Respondent is entitled, in my judgment, either to an answer "yes" or an answer "no," or an indication of the witness that he is unable to answer the question.

Trial Examiner Ballinger: The Examiner agrees with counsel for the Respondent and so instructs the witness.

7587 The Witness: Your Honor, if these costs are in fact proper marketing costs—I do not know if they are or if they are not—if they are, they certainly should be treated as marketing costs. I have not made a study for other than 1940. I know they are not marketing costs for 1940. I have made a study for 1940.

Trial Examiner Ballinger: Well,—

Mr. Hanley: Respondent moves to strike the answer of the witness as not responsive to the question. Respondent requests the Court to admonish the witness to answer the question.

Mr. Austin: If your Honor please, this is similar to a line of questions which came up on the same subject on direct examination in which counsel for the Respondent was permitted to interpose some questions and at that time the Examiner ruled—at page 6388—

"The Examiner considers that the witness has answered the question so far as it relates to the matter under inquiry."

At that time I objected on the ground that 1940 was the only year that was material to the inquiry. I have not made this same objection on cross examination, but I do think that the witness has fully answered the question. Certainly, he has completely stated, as completely as he can, what his opinion is on the matter. I do not think
7588 the record should be further encumbered.

Mr. Hanley: At that time the Examiner, during the course of the questioning on the part of Respondent's counsel, quite properly, I think, because it was interposed into the then direct examination of the witness, interposed, and your Honor indicated that it was more properly a matter for cross examination and should be reserved for cross examination.

The question is now being asked on cross examination. All I want, your Honor, is for this witness to say either yes, it is a marketing cost, or no, it is not a marketing cost, or thirdly—I do not know whether it is a marketing cost.

Trial Examiner Ballinger: As the Examiner understands the testimony of the witness, it is in substance this: that he did inquire into that item so far as it related to the year 1940, and his investigation satisfied him that in that year it seemed to be and in fact formed no part of the marketing cost; that he has made no inquiry relative to the other years and different years, and therefore he cannot say whether in those other and different years or any one of them it would form any part of the marketing cost or any portion of the same could have been included in the marketing cost.

It seems to the Examiner that that is about as far
7589 as the witness can go.

Mr. Hanley: I will ask another question.

By Mr. Hanley:

Q. You have stated, Mr. Warmack, that you investigated the year 1940, and that you did not think that these items—referring to the one hundred and eight thousand and twenty-two thousand dollar items are properly marketing costs for the year 1940.

Now, without reference to 1940 or any other year, or any other time period, and understanding that the company spent that money, I am asking you as an expert accounting witness: How those items of expense should be classified? Are those items of expense marketing expense? And do not try to fix it to any particular time or period.

Mr. Austin: I object to the question, your Honor, as just indicated, the witness has already answered it several times. Your Honor has just indicated that very clearly on this record.

Trial Examiner Ballinger: Can you answer the question?

The Witness: Yes, sir. I have answered it several times. I will endeavor to do it again.

By Mr. Hanley:

Q. Answer it "yes" or "no", please.

A. That is not a complete answer.

7590 Trial Examiner Ballinger: Do you know?

The Witness: No, sir, I do not know. I have only studied 1940.

By Mr. Hanley:

Q. All right. Why do you —

A. I have said it fifteen times.

Q. Do you not know?

A. I have said I do not know.

Q. I have tried to ask you several times. If you do not know your business, just say so, and that is all.

A. I know my business but I do not understand that I have to memorize the entire proposition of this company's accounting procedures and accounts. I did not study anything beyond 1940.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record. Strike from the record the remark of counsel and the remark of the witness.

Mr. Hanley: I would like for them to be on, your Honor.

Trial Examiner Ballinger: If counsel desires it to remain on the record it may remain.

By Mr. Hanley:

Q. In your opinion as an accountant, did the Respondent derive any benefit from the persons employed by 7591 the company in the year 1940 because it paid annuities to past employees?

A. I have previously answered that question that in my opinion it has—again, I will answer—or that it does.

Q. Did and do the accountants for the Internal Revenue Department, if you know, regard annuity payments as a legitimate charge to current expenses—

A. (Interposing): I do not know.

Q. —for the purpose of income tax returns?

A. I do not know.

Trial Examiner Ballinger: Judge, that is a question that has been previously asked of the witness, has it not?

Mr. Hanley: On a different subject, your Honor.

Mr. Austin: I think not.

Mr. Hanley: If the witness does not know, that is the end of it.

The Witness: I should be glad to find it if it is of any value here.

Mr. Hanley: No, I do not think you can find it, Mr. Warmack.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: Proceed.

Mr. Hanley: If your Honor please, with the exception of the matter which the witness desires to review, and perhaps a few summarizing questions, I think I am
7592 just about ready to excuse the witness on cross-examination.

I will say to you now, Mr. Austin, if it will be of any aid to you, that I propose to use both Messrs. Houghton and Boatwright for what I hope will be a rather short surrebuttal. In the morning if we can clear those pending matters with the witness, I shall release him to you for your further examination or excusing, whichever it may be.

That is the status of the thing so far as my program has any concern.

Trial Examiner Ballinger: Do you desire an adjournment?

Mr. Hanley: I am through so far as tonight is concerned. I can go on with the witness but the witness has the book to read tonight, and consequently, I do not think that I could carry on any further this evening to any benefit.

Trial Examiner Ballinger: Do you desire to take the witness on redirect examination, until he has answered the questions that have been reserved for tomorrow morning, Mr. Austin?

Mr. Austin: No, your Honor.

(Witness temporarily excused.)

Trial Examiner Ballinger: Such being the situation,
the hearing is now, at 4:10 p. m., July 29, 1942, ad-
7593 journed to be reconvened at 9:30 a. m., July 30, 1942
in Room 532, Federal Trade Commission Building,
Washington, D. C.

(Whereupon, at 4:10 p. m., July 29, 1942, the hearing in the above-entitled matter was adjourned.)

7594

Room 532, Federal Trade
Commission Building,
Washington, D. C.
Thursday, July 30, 1942.

Met, pursuant to adjournment, at 9:30 a. m.

Before:

Webster Ballinger, Trial Examiner.

Appearances:

Cyrus B. Austin, Esq., attorney for the Federal Trade Commission.

Harold R. Hanley, Esq., (910 South Michigan Avenue, Chicago, Illinois,) appearing for the Respondent, Standard Oil Company of Indiana.

7595 PROCEEDINGS.

Trial Examiner Ballinger: Come to order.

The hearing of Docket No. 4389, case entitled "In the Matter of Standard Oil Company (Indiana)" is reconvened pursuant to notice at 9:30 a. m., July 30, 1942, in Room 532, Federal Trade Commission Building, Washington, D. C.

The last hearing was held in this same building, July 29, 1942.

The reporter will note counsel for the Commission and Respondent present.

The hearing is recessed until 10:15 a. m., to afford the witness further opportunity to inquire into the question pending at the time of the adjournment.

(Whereupon, a recess was taken until 10:15 o'clock, a. m.)

Trial Examiner Ballinger: Come to order. Reconvened at 10:15.

All parties present at the beginning of the recess and the witness are now present. You may proceed.

Mr. Austin: If your Honor please, before we commence this morning, your Honor, I would like to make a motion regarding certain testimony which was incorporated in the record on July 28, 1942. The testimony, your Honor will recall, had to do with certain advertising expenditures made by the so-called "jobbers" in Detroit.

7596 This witness was questioned in regard to advertising expenditures made by jobbers, although he had not been questioned on that subject on direct examination.

The testimony was admitted by the Examiner, reserving to counsel for the Commission leave to move to strike, at the conclusion of that testimony. That ruling of the Examiner appears at page 7390 of the record.

Counsel for the Commission now moves to strike from the record all of the testimony, both questions and answers, beginning at the middle of page 7392 and extending to and including the general answer of the witness at the top of page 7415 of the record.

I believe that is all of the testimony having to do with the subject to which I have just referred.

Mr. Hanley: Well, if your Honor please, the Respondent I think has presented its views to the Court in respect of this matter. Unless your Honor particularly desires it, I do not believe the Respondent cares to be heard on this motion.

However, I will be glad to state the position of the Respondent again, if your Honor should think it would be of any aid.

Trial Examiner Ballinger: No. It is not necessary.

Mr. Hanley: Of course, should your Honor grant the motion as just made, I assume that it would be granted
7597 as a legal matter, and that the record would stand, and there would be nothing physically stricken.

Trial Examiner Ballinger: The record will stand as it is on the record, except that it will be disposed of as the Examiner directs.

Mr. Hanley: Thank you.

Trial Examiner Ballinger: The motion is granted. And the matter is stricken—not physically—from the record.

Mr. Hanley: May I proceed?

Mr. Austin: I desire to make another motion.

Trial Examiner Ballinger: Proceed, Mr. Austin.

Mr. Austin: Now, if your Honor please, I have here a copy of the record for yesterday, July 29, 1942.

Trial Examiner Ballinger: Let us go off the record for a moment. We may save some time.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record. Proceed.

Mr. Austin: Beginning at page 7568 of the record, there has been copied into the record, at the direction of the Examiner, certain material in the form of a question and five answers thereto. Those appear from the previous pages of the record to have been copied from a publication
known as "The Journal of Accountancy," for May,
7598 1940. This particular material comes from a section
of that magazine entitled "Accounting Questions."

I wish at this time to move to strike from the record the material commencing at the foot of page 7570 and extending to the top of page 7575, including the first six lines on that page. That material is headed "Answer No. 1,"—"Answer No. 2,"—"Answer No. 3,"—"Answer No. 4,"—"Answer No. 5." It appears that those answers are answers which appeared in "The Journal of Accountancy," in the "Accounting Questions," section in answer to the question also appearing in this section of the May, 1940 issue of that magazine.

It is my belief that the purpose of introducing these questions and answers into the record; that is, the purpose of counsel for the Respondent, is to show that a question was posed in "The Journal of Accountancy," which presented the same or a similar question of accounting as that presented here in connection with the trust fund set up by the Respondent for the payment of annuities for services of employees prior to January 1, 1939;

Further to show that five accountants answered that question in that magazine, and that each of the five accountants gave an opinion that the payments into the fund should be charged to current income;

That that opinion is and being at variance with
7599 the opinion given by the witness Warmack.

Before proceeding with my objection, I would like to ask counsel for the Respondent if that is a fair statement with regard to the matter therein referred to.

Mr. Hanley: The Respondent declines to answer.

The Respondent has asked a question upon which the Examiner ruled before the recess yesterday afternoon. It is assumed that the same ruling will obtain in connection with this motion, in the event that he should not, counsel for the Respondent will ask a question.

Trial Examiner Ballinger: The Examiner has ruled.

Mr. Austin: In the first place, if it is desired that the witness be asked to answer the question posed on page 388 of "The Journal of Accountancy," for May, 1940, then I should submit that the witness be asked to answer that question. I have no objection to the question being phrased in the language stated in "The Journal of Accountancy."

I have no objection to that question being included in the record as it is now.

But I submit that the witness' answer to that question, if desired, should be given to the question.

It is entirely unnecessary, in order to obtain the witness' answer to that question, to set forth all the five others, which are, in fact, the five other unidentified, supposedly public accountants, as to what they have
7600 said about it.

Trial Examiner Ballinger: Unnecessary to do what? I did not follow you there.

Mr. Austin: It is entirely unnecessary in order to obtain the witness' answer to that question to set forth what five other unidentified, supposed accountants, have said about it. That will in no way enable the witness to answer the question, nor will it make it possible for him to answer the question more definitely, or conveniently, than if the five answers were not included in the record.

Secondly, I think it is quite obvious, from the standpoint of the law of evidence, and I understand your Honor conceded yesterday, that the opinions of five other unidentified, supposed accountants, if we may even term them that, or any one of them, are inadmissible and have no evidentiary value since the persons are not known, have not been qualified, and any opinion that may have been asked to or have given, is not ~~subject to~~ cross-examination.

Certainly, any answers therein given have no pertinency to this case.

That being true, and since those five answers are not a part of the record in the sense that they have evidentiary value, it must be, of necessity, irrelevant and immaterial as to whether or not the witness agrees with those opinions.

Now, the only question posed with respect to those
7601 five answers is whether the witness agrees with
them. I think that whether the witness agrees or does not agree with something which is now in the record, and with an opinion which has no weight, cannot be considered, and must be incompetent and irrelevant.

Therefore, I can see no basis whatever for including in the record as a basis for the questioning of his opinions or otherwise the five answers which have been placed in the record and which were copied from "The Journal of Accountancy," for the month of May, 1940.

Trial Examiner Ballinger: Have you completed your objection and motion?

Mr. Austin: I have.

Trial Examiner Ballinger: No matter embraced in the question can now or at any future time have or be considered as having any evidentiary value whatsoever.

The question is propounded to the witness solely for the purpose of obtaining his views as an accountant.

His views as expressed by him, alone, can be considered now or at any future time as evidence.

The objection is overruled and the motion to strike is denied.

Are you now ready to proceed with the witness?

Mr. Hanley: I am.

Trial Examiner Ballinger: Will you take the
7602 stand again, please, Mr. Warmack?

Mr. Warmack: Yes, sir.

WILLIAM J. WARMACK resumed the stand and testified further as follows:

Cross-Examination (Continued) by Mr. Hanley.

Q. Will you now answer the question, please, Mr. Warmack?

Mr. Austin: It may be recalled that there are two questions pending, I believe. I assume that counsel is referring now to both of them.

Mr. Hanley: Perhaps it would be well to obtain the precise question.

Trial Examiner Ballinger: At what page does it appear?

Mr. Austin: I think I have it here. 7564.

Mr. Hanley: 7564?

Mr. Austin: Yes.

Trial Examiner Ballinger: Proceed.

By Mr. Hanley:

Q. Mr. Warmack, please refer to page 7564, the last question on the page is the question you are expected to answer. Will you please answer it, Mr. Warmack?

A. What page was that?

Q. 7564.

7603 Trial Examiner Ballinger: Read the question and let it appear in extenso on the record here so that the record will be clear.

(The reporter read the question as follows:

"Q. I hand you a copy of the 'The Journal of Accountancy' for the month of May 1940, and refer you to pages 388, 389, and the top of page 390.

"And I ask you, first, if the question there posed is not substantially in line with the accounting procedure and practice of the Respondent in handling its annuity plan?

"I then ask you to read the five answers submitted by the practising accountants and tell the Court whether or not you agree, in principle, with the answers submitted by those accountants.")

Mr. Austin: Off the record.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record. Proceed.

The Witness: May I inquire, your Honor?

Trial Examiner Ballinger: Yes.

The Witness: May I ask if each of these five answers may be given separately? In other words, may I give my answer to each of the five answers, perhaps I should have said.

7604 Trial Examiner Ballinger: The first question the witness is called upon to answer is at page 7564 and is as follows:

"And I ask you, first, if the question there posed is not substantially in line with the accounting procedure and practice of the Respondent in handling its annuity plan?"

The Witness: In my opinion, the question is reasonably in line. It does not embrace the exact features that the Respondent company's present annuity embraces, but I think that it is reasonably comparable to the situation at hand.

By Mr. Hanley:

Q. Very well, Mr. Warmack. You may now answer the second section of the question.

Trial Examiner Ballinger: Mr. Warmack, you may now answer the second section of the question which, for your convenience, reads as follows:

"I then ask you to read the five answers submitted by the practising accountants and tell the Court whether or not you agree, in principle, with the answers submitted by those accountants?")

The Witness: Your Honor, may I answer each of the five answers by the practising accountants separately?

Trial Examiner Ballinger: You may.

7605 The Witness: Thank you.

Trial Examiner Ballinger: Your answers, of course, would be confined to your view as to whether or not you agree in principle with the answers submitted by those accountants.

Mr. Austin: Your Honor, I object to the phraseology that has been used both in the question and by your Honor in restating it, there being no proof whatsoever in the record that any answers were given by any five practising accountants. The record as set forth in that pamphlet is very clear in that regard.

Trial Examiner Ballinger: The Examiner has ruled on several occasions in connection with this question that the fact that the questions came from some Journal is of no greater weight than if the questions had originated in the mind of counsel for the Respondent, and they will be so regarded.

Mr. Austin: Well, does the Examiner then—well, I take it that the Examiner does agree that there is no proof that any practising accountants submitted any answer.

Trial Examiner Ballinger: None whatsoever so far as this record discloses.

The Witness: Your Honor, may I inquire in answering these, if you please, these five answers which are submitted, which are supposed to have been submitted by,

perhaps I had better say, five different practising
7606 accountants—in giving my answers to those may I
answer and then explain the reasons for my answer
in connection with each of the five answers?

Trial Examiner Ballinger: You may.

The Witness: Thank you.

Trial Examiner Ballinger: Proceed.

The Witness: I do not agree with answer No. 1, shown on page 388 of the Journal of Accountancy for the month of May, 1940. That—

Mr. Austin: If your Honor please, I object to the reference to the book inasmuch as it is already spread upon the record. I think as a matter of convenience it would be better to have it shown as a reference to the record itself. I do not wish to have any record show any reference to "The Journal of Accountancy" when it is unnecessary to do so. I do not believe it can serve any useful purpose. It might only serve to confuse.

Trial Examiner Ballinger: The witness will refrain in the future from any reference to that.

The witness may restate his answer and, for the purpose of clarity, make reference to the pages of the record upon which it appears. I also instruct the witness to read the part with which he agrees or does not agree, so that the record will be clear at that point in the record, just exactly what he does agree with and what he does not agree with, in principle, as inquired into by the question.

7607 The Witness: Yes, sir.

a Answer No. 1 as shown on pages 7570 and 7571 of the record, which purports to be an answer given by an unidentified public accountant—

Mr. Austin: (Interposing): Your Honor, I object to any reference to any unidentified public accountant. There is nothing in the record upon which such a reference could be based. There is no suggestion that they were public accountants identified or unidentified. I think that the reference more properly may be made directly to the number of the so-called answer which is the subject of the witness' discussion here.

Trial Examiner Ballinger: That may be done.

The Witness: May we be off the record?

Mr. Hanley: I object to going off the record.

Trial Examiner Ballinger: Counsel for the Respondent objects to going off the record. Therefore, we will not go off the record. The reporter, however, may strike the witness' reference to page 388 and so forth of The Journal of Accountancy if there is no objection on the part of counsel for the Respondent.

Mr. Hanley: I do most vigorously object to that. I think whatever the witness says should be on the record.

Trial Examiner Ballinger: Then it will remain on the record. It is of no particular importance.

7608 The witness will proceed.

The Witness: I cannot identify what it is, if I cannot identify the question, or refer to it.

Trial Examiner Ballinger: Do you understand the conclusion stated in question No. 1?

The Witness: Yes, sir.

Trial Examiner Ballinger: Do you agree with it?

The Witness: Question No. 1 reads as follows:

"And I ask you, first, if the question there posed is not substantially in line with the accounting procedure and practice of the Respondent in handling its annuity plan?"

I certainly do not.

Trial Examiner Ballinger: You do not agree with it?

The Witness: I certainly do not agree with it.

Trial Examiner Ballinger: You may state your reason for disagreement.

The Witness: In the answer it was stated, "We do not know of any accounting practice which would support a method which would entitle any provision to be made on the books of the total amount to be paid, surplus, however, to be charged at the end of each year with the payments made during that year."

I most certainly do not agree with that statement from the standpoint of sound accounting.

7609 Trial Examiner Ballinger: If you disagree, you may state your reasons.

The Witness: For the reason that this is an extraneous item of cost.

Extraneous items of cost are properly chargeable against accumulated earnings.

The answer is wholly and entirely an unreasoned statement. It does not go to the effect of reasoning the accounting question at issue. The accounting question itself asks, in effect, which of the following procedures are permissible, and which one is preferable. And it names one procedure, "3.":

"Current income to be charged with payments as made."

That question, in itself, is not clear to the witness.

Was the question, "should this class of cost be charged against operating income, or should it not?"

The question as posed to which this answer was offered, about which I am commenting, is silent indeed on that very point. Therefore, there is left in the mind of the witness a doubt as to whether or not the question posed was this: Should this class of an expenditure be charged against operating income? against non-operating income? in arriving at your net operating income, or is it to be charged
7610 or shown on the profit and loss statement as "other deductions from income," in determining net income for the year. Such items, losses on capital assets especially, when they do not get into large amounts, are often placed by practising accountants as income deductions and are not carried to earned surplus as a deduction.

If the answer to No. 1 means that, I still disagree with it.

This answer to which I address myself is not clear. It is difficult to answer a question which is not clear.

Trial Examiner Ballinger: Well, if the answer is not clear to you, do you know whether you disagree or agree with it?

The Witness: I would disagree with him, Judge, in any event, for the handling of an item on a company's cost statement which runs into an amount of three million dollars at least, a year, in an income account which is a proper charge against earned surplus, irrespectively, but as I just stated, this answer is an unreasoned answer.

In my opinion, it is not a complete answer from the standpoint of sound accounting from which any accountant can gain anything, as it is shown on pages 7570 and 7571 of this record.

By Mr. Hanley:

Q. Now, Mr. Warmack, you have just asked your-
7611 self a lot of questions which you say create a doubt in your own mind. Those questions were not asked you by the Respondent. Those questions are not incorporated in the question referred to in Respondent's Exhibit 110-B for identification. Those questions are not dealt with in any answer appearing in this record, and particu-

larly not in Answer No. 1, beginning at page 7570 and which answer reads as follows:

"Answer No. 1.

"In reply to your letter regarding the proper accounting treatment to be accorded with respect to payments made to an insurance company, we believe method 3 should be followed. We do not know of any accounting practice which would support method 2. We do not believe method 1 would be in accord with the facts, which we understand are to the effect that the corporation is not obligated to continue the payments."

Now, method No. 3 is given as follows:

"Current income to be charged with payments as made."

Having that now definitely in mind, will you please state briefly by "yes" or "no" whether or not you agree with the Answer No. 1 as referred to and as I have just read it to you?

A. I have answered that I do not, and I have given my reasons therefor.

7612 Q. Very well. Will you please continue with your answer.

A. Thank you.

Trial Examiner Ballinger: Proceed to Answer No. 2 appearing at the record page 7571 and 7572.

Mr. Austin: Off the record.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Warmack, the Examiner probably was in error in advising you to state your reasons why you either agreed or disagreed with question No. 1.

The question pending is solely as to whether or not you agree or disagree with it. And if counsel desires to know your reasons therefor, he may pursue the inquiry further.

In answering the remaining questions, please state merely whether you agree or disagree, if you can.

The Witness: If your Honor please, a "yes" or "no" answer would be an incomplete answer, but I shall abide by your directions.

Trial Examiner Ballinger: Proceed.

Mr. Austin: I assume, your Honor, that if there is any one of these answers with which the witness agrees in part or disagrees in part, that he is entitled to so state?

Trial Examiner Ballinger: Of course.

Mr. Austin: He may not be able to say "yes" or 7613 "no" that he is in agreement with the principle so far as the entire answer is concerned.

Trial Examiner Ballinger: I think it is perfectly clear. Now, proceed with your answer, Mr. Witness.

The Witness: I disagree entirely with the statement shown as "Answer No. 2," beginning on line 11 page 7571 of the record and continuing to the bottom of that page.

By Mr. Hanley:

Q. For convenience in reviewing the record, please read precisely that with which you disagree.

A. Answer No. 2 reads as follows:

"Answer No. 2.

"This is in reply to your question as to the proper accounting treatment to be accorded with respect to payments made to an insrance company under certain stated conditions.

"In our opinion, the proper treatment for the payments in question is to charge current income account with the payments as made. The payments are charges which are expected to recur annually for a period of twenty years; the fact that the payments are voluntary on the part of the directors and not in settlement of legal obligations does not justify their omission from the income account. Although the computation of the amounts may be based on past services of employees, it does not necessarily 7614 follow that the charges are applicable to such prior periods; presumably, in authorizing the payments the directors have given consideration to the benefits currently derived therefrom by the corporation, such as the added contentment and efficiency of the employees."

I do agree in principle with the statements incorporated in that answer which begins on line 1, page 7572 and continues through line 6.

Q. Would you mind quoting again, please, the exact language with which you now agree, Mr. Warmack?

Mr. Austin: The witness has referred to it by reference in the record. It seems to me that this reading is an unnecessary taking of time.

Trial Examiner Ballinger: For convenience in the record he may read the portion with which he agrees as well as the portion with which he disagrees.

Mr. Hanley: You have more time than I have, Mr. Austin.

The Witness: Your Honor, may I not say what I disagree with and why I disagree with it, to make this all complete?

Trial Examiner Ballinger: You may read into the record if you desire the portion with which you agree and the portion with which you disagree.

7615 The Witness: Thank you, your Honor.

Trial Examiner Ballinger: Proceed.

The Witness: The portion with which I disagree is the portion of the Answer No. 1 on page 7571 of the record, reading:

"In our opinion, the proper treatment—"

Trial Examiner Ballinger: That is Answer No. 2, is it not?

The Witness: I beg your pardon. No. 2.

Trial Examiner Ballinger: Suppose you start over again.

The Witness: The portion with which I disagree is that portion of Answer No. 2 on page 7571 of the record, reading:

"In our opinion, the proper treatment for the payments in question is to charge current income account with the payments as made. The payments are charges which are expected to recur annually for a period of twenty years; the fact that the payments are voluntary on the part of the directors and not in settlement of legal obligations does not justify their omission from the income account."

Up to that point, I should like to call attention specifically to this—that the answer is entirely silent on what part of the income account he would elect to place these 7616 charges.

Further quoting:

"Although the computation of the amounts may be based on past services of employees, it does not necessarily follow that the charges are applicable to such prior periods; presumably, in authorizing the payments, the directors have given consideration to the benefits currently derived therefrom by the corporation, such as the added contentment and efficiency of the employees."

This is the same thing I read a while ago, your Honor.

I might say that quotation beginning with the words "Although the computation of the amounts may be based on past services of employees, * * *" in my opinion, is not even applicable to the present situation, because of the fact that the employees of the Respondent company already knew in their own minds, because of the past practices of the company, that they were going to receive these pensions, as I understand it, and the mere fact that the company set aside now a fund, rather than keeping the money in its general fund to pay that, evidently this answer did not contemplate such.

Mr. Hanley: (Interposing) That last statement of the witness made by him as his own statement when he stopped quoting, is objected to. Respondent moves to strike it on the ground that it is a conclusion and opinion of the witness as to what was in the minds of the employees of the
7617 Respondent company;

Not the opinion as an expert accountant as to the general proposition of whether or not the establishment of these benefit funds have any effect on the greater contentment and efficiency of employees;

Further, that the expressed opinion of the witness as to what was in the minds of the company employees has nothing to do with the accounting procedures, or methods of handling, or the propriety of various accounting procedures and methods of handling of various pension or benefit funds.

Trial Examiner Ballinger: Motion is denied. Proceed.

The Witness: The portion of that quotation beginning on page 7571 of the record and carrying through line 6 on page 7572 of the record styled "Answer No. 2."

I do not agree with the following in principle:

"This is in reply to your question as to the proper accounting treatment to be accorded with respect to payments made to an insurance company under certain stated conditions.

"In our opinion, the proper treatment for the payments in question is to charge current income account with the payments as made. The payments are charges which are expected to recur—"

Trial Examiner Ballinger: You have already read
7618 that. Proceed to the point with which you do agree, if anything.

The Witness: I agree with the following in principle:

"Had the directors chosen to make a lump payment of the total estimated required amount, and at the same time, gone on record that such payment was in recognition and settlement of past services rendered, then a permissible treatment would have been to charge the payment to earned surplus."

I agree with that.

But I wish to call the Court's attention to this, that the statement is incomplete. It does not take various factors into consideration in this case; and—

Mr. Hanley: (Interposing) Now, just a moment, Mr. Warmack.

Respondent moves to strike the answer of the witness beginning with "I wish to call the Court's atention * * *" on the ground that it is unresponsive, it is not an explanation of anything that the witness has said, but is merely an analysis by the witness, or a criticism by the witness of a statement with which he has been asked a specific question as to whether or not he agrees or disagrees. It is entirely outside of the province of this inquiry for the witness to indicate what he thinks some accountant should have said which some accountant did not say.

7619 He is asked to agree or disagree with the material as it appears.

Trial Examiner Ballinger: The motion is granted on the sole ground that the question propounded to the witness is solely as to whether or not he agreed or disagreed. It did not call for any explanation. If an explanation is desired that may be obtained by either counsel for the Respondent or counsel for the Commission.

The Witness: Your Honor, a "yes" or "no" answer would be a very, very incomplete answer. I believe in each instance—

By Mr. Hanley:

Q. (Interposing): You have answered the question, Mr. Warmack.

A. Well—

Q. (Interposing): Will you please continue with your answer?

Mr. Austin: I would like to go back and find the state of the record. The last answer as to whether it was stricken, and what part of it was stricken.

The Witness: May we be off the record?

Mr. Hanley: No. I object to any off-the-record.

Trial Examiner Ballinger: No. Counsel for the Respondent does not wish to be off the record.

The Witness: Can we have a five minute recess?

7620 Trial Examiner Ballinger: No. That would serve the same purpose as an off the record. Therefore, there is no necessity for it that is apparent to the Examiner. We will stay on the record.

Mr. Austin: You were not required to give a "yes" or "no" answer, Mr. Warmack. The Examiner said that you could state whether you agreed or disagreed with it, and the Examiner has ruled that you may state as to what portion you agree or disagree with.

Mr. Hanley: Now, I suppose that counsel has served the purpose of the off-the-record, the recess, or what not that was attempted. In view of that, can we now go ahead?

Trial Examiner Ballinger: The witness has not been asked for any explanation.

Mr. Warmack, you may state whether you agree with this or cannot agree in all or in part. If you agree in part with that answer, you may state it right in the record as to the point with which you agree. If you disagree in part, you may read into the record the part with which you disagree. Of course, if you agree you may read that part in the record also. I wish the record to be clear as we go along as to precisely that with which you agree and that with which you do not agree.

The Witness: Thank you, your Honor. But some of the questions I must certainly agree with except for the

7621 fact that they are not complete.

Trial Examiner Ballinger: If they are not complete, then you would necessarily disagree with them? Would you not?

The Witness: Well, I think I would agree—

Trial Examiner Ballinger: (Interposing): Well, now, Mr. Warmack, without any further discussion, proceed with the questions.

The Witness: That is the thing. I will have to read it.

Trial Examiner Ballinger: The next question is question No. 3, appearing at record page 7572, and extending over on to page 7573.

Mr. Austin: You mean "Answer No. 3"?

Trial Examiner Ballinger: That is right.

(The witness thereupon examined the document.)

Trial Examiner Ballinger: Do you understand, Mr. Warmack, that the question is whether or not you agree in principle with each answer, or the various parts of the answer as set forth therein?

The Witness: This is a long one. I will have to read it.

Trial Examiner Ballinger: All right. Proceed to do so.

(The witness examined the "Answer No. 3" further.)

Trial Examiner Ballinger: Are you now prepared
7622 to answer?

The Witness: Yes, sir.

Answering the question with respect to that part of page 7572 through line 15 of page 7573 of this record entitled "Answer No. 3," I wish to call the Court's attention—

Trial Examiner Ballinger: (Interposing): Now. Not that. Do you agree or disagree with the portion that you are about to—

The Witness: (Interposing): It will be split into parts that I agree with and parts that I do not agree with it. It is all in here together.

Trial Examiner Ballinger: Proceed.

The Witness: "* * * The basis of the payments is apparently related to services rendered by the employees piror to the inception of the social-security act."

I agree with that.

Further quoting:

"Having regard to this retroactive feature, it might therefore be asserted that the annual payments to be made should be charged to the earned-surplus account now in an estimated lump sam of annually as the actual payments are made and not to the current and future annual income accounts; we think that procedure is permissible."

I agree with that. I think that is sound accounting.
7623 Even though the person answering—

By Mr. Hanley:

Q. (Interposing.) All right. Just go ahead, Mr. Warmack.

The Witness: Could I strike out "I agree with that", I mean after that?

Trial Examiner Ballinger: Strike that out, unless there is an objection by Judge Hanley.

Mr. Hanley: No. Whatever the witness says I think should properly appear upon the record.

Mr. Austin: I would like to inquire now as to the state of the record. I would like to hear the witness' answer read as given.

Trial Examiner Ballinger: Read it.

(The reporter read the following:

"I agree with that. I think that is sound accounting. Even though the person answering—")

Mr. Hanley: And I think that should appear on the record. If the witness said it should appear. Of course, I think it ought to have never gone on.

Trial Examiner Ballinger: Very well. It will be legally stricken but it will not be physically stricken from the record.

Mr. Hanley: If your Honor please, I was under the impression that Mr. Warmack was assigned to read this material at the recess last evening. If he has not read it,
7624 I suggest that there is no occasion for all of us to sit
around while he does so. I would like to have a recess if he is going to study it. I think that is what your Honor had in mind last night that he should do.

The Witness: I assure your Honor that I have read it many times.

Trial Examiner Ballinger: Well, if we should take a recess, could you take a pencil, Mr. Warmack, and mark the portions with which you agree and the portions with which you disagree in the remaining questions?

The Witness: No, sir. I could not do that.

Trial Examiner Ballinger: No purpose would be served by a recess under those circumstances. Proceed.

The Witness: I do not agree with the remaining part of answer styled "Answer No. 3" as shown on page 7572 and continuing—

Trial Examiner Ballinger: It is not necessary to put the pages in. You have already indicated that in the record.

The Witness: Well, Judge, I do not think so. This is a new answer.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

The Witness: Do you mean I cannot state just
7625 what it is?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: Your Honor, I think it should be read.

Mr. Austin: Your Honor, he did not intend to read it. He merely was giving the citations on the page so that it would not be necessary to read it.

Mr. Hanley: The Respondent objects to counsel for the Commission stating to the Court or the witness what the witness intended to do, or what he was going to testify, or the manner in which he was going to testify.

Trial Examiner Ballinger: The remarks of counsel for the Commission would appear to be harmless. Proceed.

The Witness: I do not agree with any of that portion of the answer styled "Answer No. 3," beginning with the sentence which begins on line 23 of page 7572 of the record and continues through line 15 at page 7573 of the record reading as follows:

"On the other hand, we are of the opinion it is preferable to take the view that, inasmuch as the corporation only now puts into effect a plan for supplementary benefits to the employees at the rate of retiral, the annual insurance payments should be regarded as in effect the current
7626 cost of a supplementary reward or bonus, for services
rendered and to be rendered, to be payable at a specified date and that, therefore, regardless of the basis of computation to determine the annual cost, these annual payments should be charged to the current income accounts from the date of the inception of the plan, when the obligation is actually incurred, to the respective retiral dates or for twenty years, or so long as the corporation maintains the plan. Had a lump-sum payment been made a deferred charge could have been established, to be equitably apportioned to the income accounts of future years."

By Mr. Hanley:

Q. Is that the entire balance of the answer, Mr. Warmack?

A. No, sir. I will be through in a minute.

Q. I mean, "Answer No. 3," what you are quoting from.

A. Yes, sir.

I agree with that part of the answer "Answer No. 3," beginning with line 8 of page 7572 down through line 14 of the same page, which sets up the payment, and which—

Mr. Hanley: (Interposing.) I wonder if we may not have him requote what he agrees with and what he disagrees with.

It takes up very little more time, if any, than to make these detailed references and it is much more convenient.

I understood that your Honor was so directing the witness:

7627 Trial Examiner Ballinger: That was the intention of the Examiner; that is, to have the witness incorporate in the record the portions with which he was in agreement, and the portions with which he was in disagreement.

The Witness: I understood that it was optional with the witness, your Honor, and I was just trying to expedite the matter.

Trial Examiner Ballinger: Well, now, will you proceed to read into the record the portions with which you are in further disagreement and agreement?

Mr. Austin: I think that we can get the reporter to copy them in, as far as he has gone. That will make the record complete.

Mr. Hanley: Very well.

Trial Examiner Ballinger: That may be done. From here on, the witness will read them as he goes along and there will be no question about the matter.

The Witness: "On the other hand, we are of the opinion it is preferable to take the view that, inasmuch as the corporation only now puts into effect a plan for supplementary benefits to the employees at the date of retiral, the annual insurance payments should be regarded as in effect the current cost of a supplementary reward or bonus, for services rendered and to be rendered, to be payable at a specified date and that, therefore, regardless of 7628 basis of computation to determine the annual cost, these annual payments should be charged to the current income accounts from the date of the inception of the plan, when the obligation is actually incurred, to the respective retiral dates or for twenty years, or so long as the corporation maintains the plan. Had a lump-sum payment been made a deferred charge could have been established, to be equitably apportioned to the income accounts of future years."

From the standpoint of sound accounting—

By Mr. Hanley:

Q. (Interposing.) That is not the question.

A. —disagree with the statement or the statements contained in that quotation for many reasons.

Trial Examiner Ballinger: (Interposing.) Now, the reasons are unnecessary at this point.

The Witness: I feel the record would be incomplete without them and I would be—

Trial Examiner Ballinger: (Interposing.) You have not been asked for your reasons, Mr. Warmack.

The Witness: Quoting from page 7572:

"The payments to be made to the insurance company are for the purpose of supplementing the old-age benefits to the employees under the social-security act, so that the retirement allowances prescribed shall be equal to the 7629 amounts which would have been payable had the social security act been in force from the date of the commencement of employment of each individual."

I agree that that is a proper statement and understanding of the question previously posed to which these answers were given, but that does not take into account all of the questions in connection with the retirement plan of the Respondent company which was in effect prior to 1939, and is in effect since 1939.

Your Honor, can we have just a few minutes recess?

Trial Examiner Ballinger: Off the record if there is no objection.

Mr. Hanley: No, if it is not to discuss these matters.

The Witness: No.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: Now, if your Honor please, it appears from the off-the-record statement that it does change the statement of the witness if he leaves out the word "thus" which is in a part of this statement and appears at line 15 on page 7572. In view of that fact, I desire to ask the witness a question on that particular point at this time.

Trial Examiner Ballinger: Proceed.

7630 By Mr. Hanley:

Q. Do you agree or disagree with this statement: "Thus the basis of the payments is apparently related to services rendered by the employees prior to the inception of the social-security act."

Do you or do you not agree with that?

Trial Examiner Ballinger: If you include the word "thus"?

The Witness: You will have to explain what it means exactly.

Trial Examiner Ballinger: If you include the word "thus" in the quoted portion that you read, would that change your answer?

The Witness: No, sir. It would not change it. The only thing is, it relates back to something else in the record, without saying what it relates back to. But I do not think it makes any difference.

Trial Examiner Ballinger: And—

The Witness: May we have a five minute recess?

Trial Examiner Ballinger: The request for a five minute recess has been made. Is there any objection?

Mr. Hanley: None.

Trial Examiner Ballinger: There being no objection, the hearing will stand in recess for five minutes.

(A short recess was taken.)

7631 Trial Examiner Ballinger: Come to order.

Now, Mr. Warmack, proceed with your answer to "Answer No. 4," appearing on record pages 7573, and ending on 7574.

The Witness: In answer to the question with regard to "Answer No. 4," appearing on page 7573, and answering No. 5—

Trial Examiner Ballinger: Deal with them separately.

The Witness: 5—

Trial Examiner Ballinger: I suggest you deal with them separately.

The Witness: Very well, sir.

Trial Examiner Ballinger: Unless there is objection, you can strike off my instructions to the witness.

Mr. Hanley: I see no reason why the record should not stand as it is.

Trial Examiner Ballinger: Very well.

The Witness: The record carrying over to the top of page 7574 of the record, my answer is that I do not agree with the statement there entitled "Answer No. 4," which reads as follows:

"Answer No. 4.

"Regarding the procedure to be adopted in charging off the payments to be made to the insurance company, to provide retirement allowances or annuities to employees we believe the first and second procedures outlined in your letter do not reflect good accounting 7632 practice since there is no indication that the payments to be made include any amounts for funding the annuities in respect of prior periods and in consequence such payments should be charged currently to income. Therefore, in our opinion, the third procedure outlined is the one which should be adopted."

Trial Examiner Ballinger: Proceed to "Answer No. 5," appearing on record page 7574 and extending on to and into 7575.

The Witness: I do not agree with the statement there appearing under the title "Answer No. 5," reading as follows:

"Answer No. 5.

"1. In spite of the evident intention of the present board of directors to continue over a period of twenty years the insurance payments referred to, it would appear to be incorrect to make any allocation of surplus for the purpose of establishing a reserve to meet payments which may never be made.

"2. It would not appear to be correct to charge the annual payments direct to earned surplus in view of the fact
that, while these payments may be discontinued, they
7633 are in the nature of an expense in connection with the
compensation of employees and as such would appear
to be operating charges similar to the cost of medical services, recreational facilities, etc.

"A. As stated above, the annual charge would appear to be in the nature of an expense properly chargeable to operations; in this connection it may be noted that expenditures of this nature are deductible for federal income-tax purposes.

"It might be noted also that, should the corporation arrange with the insurance company at some future date to make a lump sum payment in lieu of remaining annual payments, such lump sum should not be charged to operations during the yea[illegible] which made, but only that part thereof which might be considered to be fairly chargeable to the then current year and the balance deferred to future operations, to be taken up annually over a reasonable period."

I do agree with the one statement appearing on page 7575 which is the last line of that.

Trial Examiner Ballinger: Read that also.

The Witness: It reads as follows:

"This method also would be allowable for income tax purposes."

Mr. Hanley: Do you not mean to read "This
7634 method also would be allowable for federal income
tax purposes?"

The Witness: Yes. I omitted the word "federal." It should read: "This method also would be allowable for federal income tax purposes." I do not know with respect to that. I have not made a sufficient investigation to answer that.

By Mr. Hanley:

Q. That is according to your best information, is it?

A. As I say, I do not know with respect to that for the reason, as stated, I have not made a sufficient investigation to answer that point.

Q. Mr. Warmack, you have now indicated by quotation, as I understand it, all of the statements with which you do agree, in answers denominated Nos. 1, 2, 3, 4, 5, both inclusive.

Is it to be understood that in connection with any statements in any of those answers, or any of them which you did not specifically quote and state that you agreed with, that you disagree with such answers or statements in the answers?

Mr. Austin: I think that the answers of the witness being set forth on the record, sufficiently speak for themselves, your Honor.

Trial Examiner Ballinger: The witness may answer the question.

The Witness: Do you—may I have the answer? I
7635 mean the question?

Trial Examiner Ballinger: Do you mean that you desire to have the question read?

The Witness: Yes, sir. I would like to have the question read to me concerning those answers. That is what I had in mind.

Trial Examiner Ballinger: Read the question.

(The reporter read the question as follows:

"Q. Mr. Warmack, you have now indicated by quotation, as I understand it, all of the statements with which you do agree, in answers denominated Nos. 1, 2, 3, 4, 5, both inclusive.

"Is it to be understood that in connection with any statements in any of those answers, or any of them which you did not specifically quote and state that you agreed with, that you disagree with such answers or statements in the answers?")

The Witness: Yes, sir. That is correct. I think I should call your attention to the fact that I did quote some of those to which I did not agree, also, but not all of them, perhaps. I would have to have the reporter read all of the record for me to tell that.

By Mr. Hanley:

Q. That was the reason for the question, Mr. Warmack. I just wanted to clarify that, if there were some statements which you did not quote.

7636 A. Yes, sir. I intended to quote them all. It is my understanding that they are, but I could be in error about that.

Q. I understand that you dsagree with anything that you did not quote; you agree with all that you did quote and state expressly that you did agree with it?

A. Yes, sir.

Mr. Austin: And so the record may be clear, I think that the witness quoted certain things and stated that he disagreed with them; he quoted other things and stated that he did not disagree with them.

Trial Examiner Ballinger: That is my recollection.

Mr. Hanley: Perhaps so.

Mr. Austin: May we be off the record?

Trial Examiner Ballinger: Off the record if there is no objection.

(There was a discussion off the record.)

Trial Examiner Ballinger: Proceed.

By Mr. Hanley:

Q. Mr. Warmack, yesterday we were discussing certain parts of account 520 having to do with annuities.

One of those parts involves an amount of something in excess of the one hundred and eight thousand odd dollars. That has to do with a payment into the trust fund to be expended or paid out by the company at some future time. Is that your understanding.

7637 A. It is not exactly my understanding.

It is my understanding that the payment goes into a trust fund, and that it is an irrevocable trust. That the trustee at some future time will make payments out of that fund, and for the benefit and relief of employees who were working for the company prior to January 1, 1939.

Q. Well, I am a bad accountant, Mr. Warmack. That is exactly what I was trying to ask you in my question. I thank you for correcting me.

A. That is the way I understand it, sir.

Q. The amount of twenty-two thousand odd dollars, which concerns another part of this plan, and which you condemn as an improper charge for the year 1940 has to do with certain past services. Is that correct?

A. Yes, sir. That is my understanding. And it is my understanding, just a little further, to go on and clarify that, that that has to do with employees who were retired prior to January 1, 1939, and that that is pensions or annuities being paid by the company, the Respondent company to those employees.

Q. Now, is it not the sense of your accounting thinking in connection with account 520 that if payments are to be made currently or in the future that those payments should be set up as a company cost along and made applicable to the periods to which the payments would fairly appertain?

7638 A. I do not just exactly understand just what you mean, Judge Hanley.

Q. Well, do you not condemn the twenty-two thousand dollars plus item on the theory that it involves a payment made in the year 1940 by the company for services prior to that yearly period?

A. Well, sir, I do not condemn it. I do not think that it is applicable to operations for the year 1940; that is, that it is a charge to operatons for the year 1940, or that it should be so charged as expenses for the year 1940 in determining a cost differential for that year.

I should be glad to give you my reasons—

Q. (Interposing): Is it not your position, Mr. Warmack, from an accounting standpoint that it should have been charged for the years in which it may have been earned or applicable?

A. It is my opinion that that would have been a proper procedure.

Q. Mr. Warmack, is not that exactly what the company does and is doing in connection with that part of its annuity plan involving the one hundred and eight thousand odd dollars plus?

A. Not that thing exactly.

Q. All right. Explain "exactly".

A. I—

Q. (Interposing): Let me ask you this further question: Is it not true that the one hundred and eight thousand dollars involves a fund out of which future pay-
7639 ments are to be made?

A. Yes, sir, by a trustee to employees.

Q. Now, let me call your attention to page 7581 of the record.

A. Yes, sir.

Q. I will ask you if you did not make this statement—

A. (The witness examined several documents.)

The Witness: This one?

By Mr. Hanley:

Q. Are you ready?

A. Yes, sir.

Q. I will ask you if you did not make this statement:

"It is my opinion that the company in anticipation of the payment of pensions; that is, the twenty-two thousand dollar odd item, should have charged to the current expense for years in which that particular class of expense would have occurred and should have closed that charge to current expense and on its regular profit and loss account, that would be entered, and that the credit for that charge should be reflected in the reserve account or the liability account."

"Later when the payments are made a proper accounting procedure, in my mind, would be to charge the payments against the reserve account which would have been set up as just explained."

7640 Did you make that statement?

A. Yes, sir. I made that statement.

Q. Now, Mr. Warmack, is that not the procedure in principle and substance that the Respondent company is using in connection with this part of its annuity plan involving the one hundred and eight thousand odd dollars?

A. Not exactly. No.

Q. All right. Explain.

A. That which the company is doing now with respect to the one hundred and eight thousand odd dollars which is a part of the total amount paid to a trustee for the retirement of employees who worked for the company prior to January 1, 1939, is made solely for the purpose, as I understand it, of providing a fund out of which employees will be paid independent of the company, when they retire; that is, that fund is applicable to the services rendered prior to January 1, 1939.

Q. They are future payments? Are they not?

A. Yes, sir. When these employees retire then they will receive the benefit independent of the company. The company cannot withdraw the money that it has paid into the fund, as I understand it.

Q. Does that make any difference from an accounting standpoint?

A. Not necessarily; but I did not finish my answer.

Judge Hanley.

7641 Q. Proceed.

A. (Continuing): That fund is being set aside out of current funds of the company, and as I understand it, is being built up so that the company may relieve itself, as I understand it, of its obligation to employees which, as I understand it, is a moral liability, a potential liability, and is applicable to prior years; that is, prior to January 1, 1939.

Therefore, it could not be stated that by virtue of the fact that the company was trying to build up the fund applicable to this prior period or periods would be the same thing as building up the fund applicable to current periods to which I addressed myself when I made the answer just quoted by counsel for the Respondent, as shown at page 7581 of the record.

Q. Mr. Warmack, are you willing to state that there are no benefits derived by that by the Respondent Company and by employees current by reason of the fact that the company is building up this fund of one hundred and eight thousand odd dollars currently?

A. I do not believe that that is an accounting question at all.

Q. Well, if you cannot answer it, say so, Mr. Warmack.

A. It is a reasonable assumption.

7642 It seems to me that the company would certainly derive the benefit out of anything that it did to pacify, satisfy, create a good feeling on the part of its employees.

Q. Then what is the significant difference, if any, between the procedures which you recommend on page 7581 with reference to the twenty-two thousand odd dollars and the procedure actually being used by the company in reference to the fund of one hundred and eight thousand plus dollars?

A. The essential difference is this:

The company is now endeavoring, in connection with this one hundred and eight thousand dollars, to do something which it did not do prior to January 1, 1939.

Q. Well, suppose the company did not do it prior to January, 1939. What has that to do with the propriety or impropriety of the accounting principle—

A. (Interposing): Because—

Q. —involved in your recommenadtion—

A. (Interposing): Because—

Q. —on page 7581 in reference to the twenty-two thousand dollar item?

A. Because of this very fact, Judge Hanley:

The company now has a plan whereby it matches contributions with employees for the purpose of retiring its employees and creating a fund for such retirement.

The cost of that plan is current operating cost
7643 of the company. Now, in view of the fact that such a
plan was not in effect any more than the employee expected when he was retired to receive a pension, then the accrual of this fund for back years together with the accrual of the fund for current years would have the effect of putting a charge on the current years which may have properly been applicable to the prior years.

Now, in view of the fact with the prior years' income which had accumulated in the company should be charged with this item of expense which is not charged in prior years, if we charge the two for current years that appertain to current years, we burden the current years, thereby understating their operating profit.

If that is handled in accordance with the same way that the current accruals applicable to current time are being made for current operations, then the profits of those prior years would have been overstated. The extent of this overstatement should properly be charged with the accrual for those years made at this time.

Q. Mr. Warmack, I hope you understand that I am not discussing the amounts that may be payable to employees, or decrease, or increase of a pension.

In these questions I am discussing accounting principles.
Has the expectancy of an employee in any fund, by
7644 way of a pension—

A. (Interposing): I did not get—

Q. Has the expectancy of an employee in any fund by way of a pension anything at all to do with the proper accounting principles applicable to the way that fund is charged and handled by the paying company?

The Witness: What is the question?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: I would like to hear that question again.

Trial Examiner Ballinger: Read the question again.

(The reporter again read the question.)

The Witness: I do not just exactly understand what you mean.

By Mr. Hanley:

Q. Mr. Warmack, you have been criticizing the method of handling this one hundred and eight thousand dollar item for weeks, on the basis of the expectancy of the employees, on the basis of services—the services prior to 1939.

Now, I am asking you just this question, and if you want it read again, ask the reporter.

A. I have not been questioning this on account of the expectancy of the employees as such; that is, the accounting part of it.

7645 Q. Well, just answer—

A. (Interposing): I do not understand the question.

Q. —from an accounting standpoint.

A. I do not understand the question.

Q. Answer the question.

Trial Examiner Ballinger: If the witness does not understand the question, the answer would not be very satisfactory. Would it?

Mr. Hanley: Will you read the question, and we will try to find out if there is anything the matter with it, Judge. If there is, I will undertake to clarify it.

Trial Examiner Ballinger: Read the question.

(The reporter read the question as follows:

"Q. Mr. Warmack, you have been criticizing the method of handling this one hundred and eight thousand dollar item for weeks, on the basis of the expectancy of the employees, on the basis of services—the services prior to 1939.

"Now, I am asking you just this question, and if you want it read again, ask the reporter.")

The Witness: I understand that part of it. I do not understand the other question which I thought this had reference to.

Trial Examiner Ballinger: Read the question prior to that.

7646 (The reporter read the following question:

"Q. Mr. Warmack, I hope you undertsand that I am not discussing the amounts that may be payable to employees, or decrease, or increase of a pension.

"In these questions I am discussing accounting principles.

"Has the expectancy of an employee in any fund, by way of a pension—

"Has the expectancy of an employee in any fund by way of a pension anything at all to do with the proper accounting principles applicable to the way that fund is charged and handled by the paying company?")

The Witness: I think I understand the question. I think that the expectancy of the employee with respect to a fund definitely set up should have no effect with respect to how the company set up the fund and treated it on its records. It should just treat it in accordance with sound and customary accounting principles and practices.

By Mr. Hanley:

Q. Now, you have stated that in your opinion certain benefits would be derived by the company by reason of the fact that they had set up this trust fund?

A. I do not think I stated that.

Q. Well, I am sorry, Mr. Warmack, about that, and if you require the record, well, we will just have to get it.

7647 A. Well, if I stated it, I meant to state that I thought it was a reasonable assumption.

Mr. Hanley: I will ask that the record be read.

(The reporter read the following:

"I think that would be a reasonable assumption.")

Mr. Hanley: If your Honor please, I will withdraw the previous question, in order to save time, and ask the following question:

Trial Examiner Ballinger: The question is withdrawn. Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: We will take a five minute recess.

(A short recess was taken.)

Trial Examiner Ballinger: Come to order. Is there a pending question?

Mr. Hanley: No. I withdrew the previous question. In order to save time, I will just restate it and incorporate it in the suggestion of the witness.

By Mr. Hanley:

Q. Now, you have stated that in your opinion it is a reasonable assumption that certain benefit would be derived by the company by reason of the fact that it had set up this trust fund. You have expressed it as your understanding that the payments out of that trust fund are to be made in the future irrespective of what services
7649 they may apply to—

A. (Interposing): No, sir. I have not stated that.

Q. —you have also—

A. (Interposing): No, sir. No, sir.

Q. —well, is it not a fact that these payments out of this trust fund will be made at a time in the future, and from time to time as employees retire? Did you not just get through saying that?

A. I did not state not applicable to any services. I think it is applicable to services performed prior to January 1, 1939. That is my understanding.

Mr. Hanley: That is just what I said in my question. Will you read the question, please?

(The reporter read the question.)

The Witness: Could I hear that read again?

Trial Examiner Ballinger: Read the question again.

(The reporter again read the question.)

The Witness: No. I did not say that. You said "these services that apply to." I did not say that.

By Mr. Hanley:

Q. Well, I am framing these questions, Mr. Warmack,—

A. (Interposing): I am sorry.

Mr. Hanley: Your Honor, I wonder if I cannot frame a question here that will be simple enough so that it will express to the understanding of this witness what I am trying to ask him. It is now 12:15, and I will under-
7649 take that task if your Honor would now entertain a motion for the noon recess.

I am trying to get something, and will during the noon recess further try to get something together that the witness can understand.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

(Witness temporarily excused.)

Trial Examiner Ballinger: The motion is granted.

And now, at 12:17 p. m., the hearing stands in recess until 2:00 p. m.

(Whereupon, at 12:17 p. m., a recess was taken until 2:00 p. m., this day.)

7650 Afternoon Session.

2:00 p. m.

Trial Examiner Ballinger: Come to order. You may proceed.

Mr. Warmack, will you resume the stand?

WILLIAM J. WARMACK resumed the stand and testified further as follows:

Cross-Examination (Continued) by Mr. Hanley.

Q. At the noon recess, Mr. Warmack, we were discussing that part of account 520 which dealt with the one hundred and eight thousand dollar amount, and that other part which dealt with the twenty-two thousand dollar amount.

I had asked you some questions which apparently were not clear to you.

I now ask you if it is not your position that you criticize the Respondent for not setting up a reserve account for the twenty-two thousand odd dollar item, and do criticize the Respondent for setting up a reserve account on the one hundred and eight thousand odd dollar item.

A. Is that a question?

Mr. Hanley: Will you read it? It was intended to be a question.

Trial Examiner Ballinger: Read the question.

7651 (The reporter read the question.)

The Witness: No, sir. That is not my position at all. I have no care as to how the company elects to keep its records. That is the company's own business.

Trial Examiner Ballinger: Well, for the purpose of this cost differential, in this case; is that a correct statement in that regard?

The Witness: For the purpose of the cost accounting that is my same feeling. I do not have any feeling about how the company wishes to handle these costs or what they do about them.

But it is my feeling that for the purposes of proving a cost differential, procedures as outlined by me be followed, or the effect of those procedures be taken into consideration in arriving at a cost differential for any given period.

Mr. Hanley: I would like to hear that answer read.

Trial Examiner Ballinger: Read the answer.

(The reporter read the answer.)

By Mr. Hanley:

Q. That is to say that unless the procedures as outlined by you are followed, a cost differential cannot be supported?

A. With respect to this account you are addressing yourself, Judge Hanley?

7652 Q. I am referring to your answer.

A. Well, I was addressing myself to this account; and your last question, I thought, was all-inclusive. If you are addressing yourself to this particular account, then that statement is correct.

Q. Well, now, will you please answer the question in respect of supporting the cost differential:

Is it not true that you are criticizing the accounting of the Respondent in respect of the twenty-two thousand dollar plus item for the reason that the Respondent did not set up the reserve you are criticizing?

Trial Examiner Ballinger: Let him answer that first.

Mr. Hanley: All right. Let him answer that.

The Witness: No, sir. That is not my position. I have no care as to how the company keeps its records, whether it wants to make a record of these things or not.

By Mr. Hanley:

Q. From the standpoint of supporting a cost differential, Mr. Warmack, please. Is that not your position?

A. That is my criticism from the standpoint of a cost differential?

Q. That is the question.

A. Thank you. Yes.

7653 Q. From the standpoint of a cost differential, is it not your criticism of the company that they did set up the reserve on the one hundred and eight thousand dollar item?

A. It certainly is not.

Q. Well, then, what is your criticism of the one hundred and eight thousand dollar item?

A. My criticism of the one hundred and eight thousand dollar item, as used by the Respondent in the determining of its cost differential as claimed and as set forth in Respondent's Exhibit 101, is that that class of expense applies to prior periods and is not applicable in any way or in any part to the cost of doing business in the year 1940 in the Detroit field. And that is my opinion.

Q. Is not the payment of the one hundred and eight thousand odd dollars by the Respondent company—is not that—

Mr. Hanley: I withdraw the question.

Trial Examiner Ballinger: Question withdrawn.

By Mr. Hanley:

Q. Is not the payment of the one hundred and eight thousand dollar item by the Respondent company equivalent to setting up a resrve for that purpose?

A. Yes, sir. It is. Setting up the reserve to cover cost of prior operations, probably.

Q. You have answered the question, Mr. Warmack.

A. I see.

Q. One more question in connection with credit cards.

7654 A. Yes?

Q. I have reviewed the record, Mr. Warmack, with my associates, and we are not clear on just what your theory is in respect to the credit card situation.

I just want to ask you one question, and I wish you would please answer it as briefly and expeditiously as you can.

A. Yes.

Q. As I understand your testimony, you placed credit card operations upon the same basis as newspaper advertising; that is, you have some conception that it is a consumer acceptance proposition.

Now, suppose that John Doe makes an application to receive a credit card. Just exactly how is that transaction, in your mind, analogous to a consumer acceptance conception?

A. I would not state that is exactly analogous.

The intentions, as I understand it, of the company when it issued this credit card to John Doe, whom I assume to be an automobile driver and user of gasoline and other petroleum products, was for the purpose of holding that user to the respondent's products as compared with a newspaper cut run in a local newspaper which the automobile driver might read, and might influence him to drive into one of the respondent company's reseller stations; that is, a station supplied either directly or indirectly by the 7655 respondent company, and purchase his requirements of the Company's products.

Now, to bring those two together, we have this situation: In the first place, this automobile driver in the beginning may have read the advertisement. That influenced him to drive in to secure his supply of gasoline from the reseller station. While he was in there, in some way he came to know about the credit card situation. Subsequently to that, the credit card was issued to this same person who, we will say, is this John Doe that you have just spoken of. That credit card served to hold him to the product. And the newspaper advertisement served in the beginning to bring him to the product.

Now, that is the way I see the situation.

Q. How is it comparable, Mr. Warmack, as a matter of expense of selling when the Standard Oil Company issues me a credit card as distinguished from buying and paying for a newspaper advertisement for Red Crown gasoline?

A. I certainly could not conceive of that being analogous. I could not imagine of you, as an employee of the company, buying or would buy anything except the company's product if it suits you.

Q. That is the point. It costs the company just as much to handle my credit card as anybody's else? Is that not so?

7656 A. It is a matter of convenience to you, not to the company, necessarily. They know you are going to buy their products.

Mr. Hanley: I move to strike the answer of the witness as non-responsive. I ask that the question be read to the witness. I further ask that the witness be admonished to answer it.

Trial Examiner Ballinger: The question is a rather simple one.

Do you wish it read to you?

The Witness: Yes, sir.

Trial Examiner Ballinger: Read to the witness the question just propounded by counsel for the Respondent.

(The reporter read the question.)

The Witness: I do not know.

By Mr. Hanley:

Q. Well, you have made a very careful and thorough study of the credit cards? Have you not done that, Mr. Warmack?

A. Yes, sir. I made a superficial study, as I have explained.

Q. You did study this credit card thing? Did you not do that?

A. Oh, yes. I made a superficial study.

Q. All right. What is the difference in cost between handling my credit card and John Doe's credit card, or anybody else's?

A. You may buy twice a month, and John Doe may buy every day; or, vice versa, you may buy every day and 7657 John Doe may buy once a month. How in the world do I have any way of knowing how much it is going to cost to service one credit card as against another? I do not know how often they are used.

Q. Is there any difference in cost—

A. (Interposing.) Yes, sir,—

Q. —between handling the ticket of a purchase which I make and a purchase of John Doe that John Doe makes, on a credit card?

A. I should not think so.

Q. Well, I ask you, Mr. Warmack, what is the difference, if there is any difference—and you say there is—between the action of the company in granting me a credit card and handling the business on that credit card; and buying a newspaper advertisement?

A. When you say "me" do you mean "you" or any customer?

Q. I mean "me."

A. It may be—you mean you, as connected with the Standard Oil Company?

Q. I mean—me.

A. I certainly—

Q. (Interposing.) That is what I said.

A. I certainly should think that the company would be doing you a courtesy and kindness to handle your credit card. I do not think as far as issuing of a credit card to you, personally, is concerned, could be in any way 7658 comparable to the advantages which the company seeks to obtain by the running of a newspaper advertisement.

Q. Now, as a matter of fact, are not about eighty per cent of the credit cards which are issued, issued to customers who are already customers and purchasers of products of the Standard Oil Company (Indiana), or the company who may issue you the credit card?

A. You say eighty per cent?

Q. Approximately eighty per cent?

A. I certainly have not the least idea.

Q. Well, do you not think that—

A. (Interposing.) No, I do not have the slightest idea.

Q. Do you not think it would make any difference in this case?

A. No, sir.

Q. Did you make any investigation of this matter?

A. No, sir. I did not make any investigation. It was not pertinent to the question.

Q. Assuming that it is true, would that change your view at all that the issuance and servicing from an accounting standpoint of credit cards is comparable to newspaper advertising pointed to consumer acceptance of goods?

A. I cannot say.

Mr. Hanley: Read the question.

(The reporter read the question.)

7659 The Witness: Not necessarily.

Mr. Hanley: I move to strike the answer of the witness. I ask that the question be reread. I further ask that the witness be admonished to answer the question.

Trial Examiner Ballinger: Read the basic question, and then read the question which came thereafter.

The reporter read the two following questions and the answer of the witness as follows:

"Q. Now, as a matter of fact, are not about eighty per cent of the credit cards which are issued, issued to customers who are already customers and purchasers of products of the Standard Oil Company (Indiana), or the company who may issue you the credit card?"

"Assuming that it is true, would that change your view at all that the issuance and servicing from an accounting standpoint of credit cards is comparable to newspaper advertising pointed to consumer acceptance of goods?"

"A. I cannot say." * * * "Not necessarily.")

The Witness: Now, what should I say, Judge?

Trial Examiner Ballinger: I do not know.

The Witness: I do not see either. I have answered the best I know how.

Trial Examiner Ballinger: He has asked you for 7660 your opinion.

By Mr. Hanley:

Q. Please answer the question, Mr. Warmack.

The Witness: May I have the question? Evidently I do not understand it.

Trial Examiner Ballinger: Read the question.

(The reporter read the following question:

"Q. Assuming that it is true, would that change your view at all that the issuance and servicing from an accounting standpoint of credit cards is comparable to newspaper advertising pointed to consumer acceptance of goods?")

The Witness: That would not necessarily change my view at all.

By Mr. Hanley:

Q. Well, if it would not "necessarily change your view," would it "change it otherwise"?

A. Otherwise to what?

Mr. Hanley: Will you read the question, please?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

Trial Examiner Ballinger: The question is not clear to the Examiner.

Mr. Hanley: He says it is "not necessarily." I do not care whether it is "necessarily" or not. I am 7661 asking him these questions on the theory that he is an expert accountant.

By Mr. Hanley:

Q. I am asking you, Mr. Warmack, these questions on the theory that you are an expert accountant. If it does not "necessarily change them," does it change them in your view as an expert accountant? Now, is that clear?

The Witness: Your Honor, may the counsel please reframe his question so I can follow it? I am sure I do not understand his question.

Trial Examiner Ballinger: Mr. Warmack, you gave an answer with a qualification. And you gave an answer without any limitations or qualifications to other questions.

Can you give an answer without any limitations or qualifications to this?

The Witness: The question now is separated into two or three different parts.

By Mr. Hanley:

Q. Answer it if you think it is. Answer them separately.

Trial Examiner Ballinger: Read the question to the witness.

(The reporter read the following question:

"Q. I am asking you, Mr. Warmack, these questions on the theory that you are an expert accountant. If it does not 'necessarily change them,' does it change 7662 them in your view as an expert accountant? Now, is that clear?")

Trial Examiner Ballinger: Now, read the question preceding that.

(The reporter read the following question:

"Q. Assuming that it is true, would that change your view at all that the issuance and servicing from an accounting standpoint of credit cards is comparable to newspaper advertising pointed to consumer acceptance of goods?")

The Witness: I still don't think that is the basic question.

Trial Examiner Ballinger: Read the question which preceded that.

(The reporter read the following question:

"Q. Now, as a matter of fact, are not about eighty per cent of the credit cards which are issued, issued to customers who are already customers and purchasers of products of the Standard Oil Company (Indiana), or the company who may issue you the credit cards?")

Trial Examiner Ballinger: You have heard the three questions read. Now, can you answer it?

By Mr. Hanley:

Q. You said it did not necessarily change it. I am asking you whether it changed it at all or not in 7663 your judgment as an expert accountant? Now, does that explain the question?

A. In my opinion—no. May I state my reasons, your Honor?

Trial Examiner Ballinger: Not now.

By Mr. Hanley:

Q. Would it be sound accounting to charge all credit card cost to the advertising budget?

The Witness: Your Honor, I may not explain my answer to the other question?

Trial Examiner Ballinger: The Examiner has already ruled. You have not been asked for an explanation.

The Witness: My answer is not complete.

Trial Examiner Ballinger: The Examiner so considers it.

The Witness: I do not think so.

By Mr. Hanley:

Q. If it is on the same basis, from the consumer acceptance standpoint as newspaper advertising, why would it not be?

A. Why, any charge of this, why not charge it to machinery, that would be just about as reasonable.

Mr. Hanley: Respondent moves to strike the answer of the witness as not responsive. Respondent asks the Court to admonish the witness to answer the question.

Trial Examiner Ballinger: The motion is granted. The question will be reread to the witness.

(The reporter read the last question.)

7664 The Witness: For the reason that in accounting it is customary, and in my opinion in accordance with methods employed by accountants generally that separations be made of classes of property, classes of expense, classes of all various kinds to whatever refinement may be considered necessary in any given situation.

I am certainly convinced that it would not be sound accounting to group these two classes of expense together, or to group them together with all other classes of expense, or any other class of expense if a separation were to be endeavored with respect to the different kinds of expense.

By Mr. Hanley:

Q. You have treated the two accounts, newspaper advertising and credit cards identically the same for identically the same reasons, namely, that they are appeals to consumer acceptance.

In your criticisms of the Respondent's accounting in support of its cost differential, you did that. Now, please tell the Court whether or not the two accounts should not be treated the same?

A. They should not.

Q. Then, state exactly why.

A. Yes, sir.

Q. And why you have criticized the different treatments of the two accounts in the Respondent's accounting.

7665 A. I have not done that. I do not care how you keep your books—

Q. (Interposing.) Just a moment. The answer is not proper.

Mr. Hanley: The answer of the witness it is moved by Respondent, be stricken as non-responsive. The question was clearly directed to the criticisms of the witness in respect of the cost differential claimed by the Respondent.

Trial Examiner Ballinger: The motion is granted. The Examiner would suggest that you divide your question. Apparently there are two questions within one question.

Read the question.

(The reporter read the question.)

Mr. Hanley: I will ask the reporter to read the question slowly, and we will pick out a part of it.

(The reporter read the following:

"Q. You have treated the two accounts, newspaper advertising and credit cards identically the same for identically the same reasons, namely, that they are appeals to consumer acceptance.")

Mr. Hanley: Stop there.

Will you answer that if you can?

The Witness: I beg your pardon?

By Mr. Hanley:

Q. Will you answer that if you can?

Trial Examiner Ballinger: Is that statement 7666 correct?

The Witness: I would like to hear that read again.

Trial Examiner Ballinger: Read it again.

(The reporter again read the excerpt from the question.)

The Witness: I certainly do not understand counsel, or what counsel means when he says "I treated them the same."

Mr. Hanley: I will repeat the question to you and I will change the word "treat" to the word "criticize." Then answer the question.

Trial Examiner Ballinger: Read the question as amended.

(The reporter read the question as follows:

"Q. You have criticized the two accounts, newspaper advertising and credit cards identically the same for identically the same reason, namely, that they are appeals to consumer acceptance.")

The Witness: I do not understand it any better now than I did before. It does not seem to me that it hooks together.

Mr. Hanley: All right. In order to save time I will restate the question.

I will withdraw the question presently pending.

Trial Examiner Ballinger: The question is withdrawn.

By Mr. Hanley:

7667 Q. Did you not criticize the Respondent's handling and treatment of its newspaper advertising accounts and its credit card accounts wherein the Respondent used those accounts in separating or at least in the support of this cost differential, Mr. Warmack, on identically the same basis, namely, that you say that from an accounting standpoint both newspaper advertising and credit card expense are pointed to and are applicable to general consumer acceptance expense?

A. For the most part that is correct.

I have stated that it was my opinion that those two classes of expenses appear to be of a similar nature inasmuch as they were for the purposes of converting the public generally to the Respondent's products as far as advertising—newspaper advertising is concerned; and that the credit card activities are carried on for the purpose of holding users of the company's products to those products.

Q. It all goes to consumer acceptance, in your view? In your opinion; is that so?

A. I have stated in my opinion what I thought it is, your Honor.

Q. All right. Would it be sound accounting to charge all credit card cost to the advertising budget?

A. I certainly do not think so. I think it would be silly and wrong.

Q. Then, if it goes to the same purpose as news-
7668 paper advertising, in your view, even if that be true?

A. I do not understand you. I was looking at this paper.

Q. Even though it goes to the same purpose as newspaper advertising, in your view, Mr. Warmack?

A. Well, I would not charge it there, Mr. Hanley.

Trial Examiner Ballinger: Well, that is hardly an answer.

By Mr. Hanley:

Q. Even though it goes to the same purposes you say you still would not charge it there?

A. It is a matter of keeping—

Q. (Interposing.) As a matter of sound accounting?

A. It is a matter of keeping books. What you want to do or what you do not want to do. I would not charge it there myself.

Trial Examiner Ballinger: For the purpose of cost accounting, where would you charge it?

The Witness: For the purpose of cost accounting I would keep the two accounts or the two budgets, if they are to be regarded as budgets, as separately and for the purpose of determining a cost differential, I would omit the use of those two classes of expense.

By Mr. Hanley:

Q. Because, in your view, they are the identically same kind—

A. Not necessarily the same kind, but they partake of the same or similar nature. 7669

Q. Then, what is wrong with keeping them in the same account from an accounting standpoint?

A. Because it is not good bookkeeping.

Q. In your opinion?

Trial Examiner Ballinger: The witness is expressing only his opinion.

By Mr. Hanley:

Q. Now, Mr. Warmack, what administrative expense charged against marketing cost by the Respondent company as reflected by Respondent's Exhibit 101, in your opinion, is not a marketing cost?

A. I do not know.

Q. Well, take a look at Respondent's Exhibit 101 and see if you can figure it out, please.

A. I do not think that can be determined by just a review of Exhibit 101.

Q. Well, speaking for yourself, and please speak for yourself, Mr. Warmack. Do you mean by that that you cannot figure it out?

A. I can go into these records and find probably some items of cost that might be considered as not marketing cost. That would entail—

Q. (Interposing.) What would what?

A. That would entail some study.

7670 Q. Well, how? Just take a look at all the accounts which are denominated here and tell the Court which of them, in your judgment, as an accountant, is or are not marketing costs?

Trial Examiner Ballinger: You are referring to, dealing with, and giving consideration to Respondent's Exhibit 101 in that question?

Mr. Hanley: Yes, your Honor. I so designated it in the original question.

The Witness: Which accounts do you refer to, Mr. Hanley?

By Mr. Hanley:

Q. All of the accounts on Respondent's Exhibit 101.

A. There are many accounts on here. (Indicating Respondent's Exhibit 101.)

Trial Examiner Ballinger: You do not get the question, I am afraid, Mr. Warmack.

The Witness: There are many accounts on here. I wonder if counsel would be so kind as to tell me what accounts he has reference to.

By Mr. Hanley:

Q. No, the Respondent's counsel will not be so kind. The Respondent's counsel is asking you the question. I think they are all marketing costs. I am asking you, as an expert, which ones are not.

7671 A. I notice you have several revenue accounts on here. I do not consider them as marketing costs.

Q. What kinds of costs are they?

Trial Examiner Ballinger: Designate them with particularity.

The Witness: I would not think that revenue could be a cost of any kind. A revenue is not a cost, Judge Ballinger.

Trial Examiner Ballinger: Will you designate the number and the name of the account.

The Witness: Why, I was addressing myself to, Judge Hanley, these accounts 065-A, 065-B, and 065-C. A revenue is not an expense. It may be used in some instances to offset an expense.

By Mr. Hanley:

Q. What are those numbers, please?

A. 065-A. 065-B. 065-C.

Q. All right. Continue with your answer.

A. A considerable part of account 520 is not a part of marketing cost; that is, for the year 1940. That is the year to which I am addressing my answers.

Q. You need not refer to account 520. You have already testified as to that. You have already testified as to that account. You may understand the question to be directed to all accounts other than account 520.

7672 The Witness: Your Honor, if counsel desires an answer, I will have to have a little time to review this.

Trial Examiner Ballinger: Are you not thoroughly familiar with it? With each and every account portrayed on Respondent's Exhibit 101?

The Witness: Well, sir, he has asked a question about every account on here. I will probably have to, for this record, pick up every account and run it down. I thought we were nearly through but this looks like another day.

Mr. Hanley: Well, if your Honor please, the witness has already had two years, and the Respondent is willing that we take a recess for a few minutes if it will help to get an answer to the question.

Trial Examiner Ballinger: How long will it take you to make an examination of the record in order to enable you to answer the question?

The Witness: I would say—

Mr. Austin: (Interposing.) If your Honor please, why cannot this be restricted if counsel wants an answer to that question, why cannot it be restricted to accounts not listed on Commission's Exhibit 133? Many of those accounts listed on Commission's Exhibit 133, as I understand it, have not been studied by the witness. Furthermore, we have said accounts listed on there were not taken whether we agree with them or not.

7673 Mr. Hanley: At this time, and in view of the remarks of counsel for the Commission, the Respondent moves that Commission's Exhibit 133 be stricken from the record for the reason that the present accounting witness has repudiated Exhibit 133, and has stated affirmatively that he does not agree with it.

Trial Examiner Ballinger: Motion is denied.

Mr. Hanley: Judge Ballinger, if the recess is necessary the Respondent is agreeable to it. We would like an answer to the question.

Trial Examiner Ballinger: If the recess will accomplish anything, the Examiner will grant it. But if it is going to require the rest of the afternoon to look up that information, I want to know that first.

Mr. Hanley: Judge Ballinger, it does not require five minutes. Any accountant can look at this thing and in five minutes he can make up his mind, as an accountant, whether or not he believes it is a marketing cost.

Trial Examiner Ballinger: Well, the witness ought to be able, in the opinion of the Examiner, to express his opinion with reference to the accounts without further research.

If there is any doubt in his mind, he may indicate the accounts to which he may have some doubt and about which he desires to make further inquiry.

The Witness: May we be off the record?

7674 Mr. Hanley: No. I insist that we stay on the record.

The Witness: Your Honor, there are about 125-odd accounts, and some of those accounts include many numbers. To go into those things will take time. If I omit one it would entail all manner of argument. I want this record complete as to what I say. And if this information is desired, then it will be necessary for me to take these accounts one by one and trace them out with my papers, my working papers.

Trial Examiner Ballinger: Is there any account on Respondent's Exhibit 101 of which any part of it is not a marketing expense?

The Witness: Yes, sir. They have revenue accounts on here.

Trial Examiner Ballinger: Can you designate the accounts that are revenue accounts?

The Witness: I have given them already.

Trial Examiner Ballinger: Not yet.

The Witness: Yes, sir, I have.

Mr. Hanley: Not yet, Mr. Warmack.

Trial Examiner Ballinger: You have named only one account.

The Witness: May the reporter please read back and see what I have said?

7675 Trial Examiner Ballinger: The reporter may read the answer of the witness.

(The reporter read the following:

"The Witness: Why, I was addressing myself to, Judge Hanley, these accounts 065-A, 065-B, and 065-C. A revenue is not an expense. It may be used in some instances to offset an expense.")

Trial Examiner Ballinger: You have now referred to 065-A, 065-B, 065-C. Proceed.

Mr. Hanley: These are revenue accounts. They are conceded not to be expenses or expense accounts. Those are revenues coming into the company. It is conceded it is not an expense at all.

Trial Examiner Ballinger: And you named account 520?

The Witness: Yes.

Mr. Hanley: Which was excluded from the question.

Trial Examiner Ballinger: Which was then withdrawn from the question.

Now, are there any other accounts enumerated on the exhibit in this classification?

The Witness: Your Honor, I cannot answer without time to review each and every one of these accounts, over a hundred and twenty-five of them.

Mr. Hanley: The Respondent, in view of the state-
7676 ment of the witness, requests the Court to admonish the witness that he must answer the question, and that he must do so within a reasonable length of time.

This lawsuit was started some two years ago.

This witness has been engaged in a study of the exhibits of the Respondent in reference to this cost study for many, many months. He has spent approximately two months in the Detroit offices and the Chicago offices of the Respondent Company. It is submitted that to grant any substantial length of time to this witness is an unreasonable and unfair hardship upon the Respondent. It is also represented to the Court that to permit the witness to evade this question is also an unfair and unreasonable hardship upon the Respondent company.

The Respondent at this time represents to the Court that it is agreeable to some short and reasonable recess if the witness desires to make a cursory review of Respondent's Exhibit 101 for the purpose of answering the question.

Trial Examiner Ballinger: Can you do it in half an hour?

The Witness: No, sir. I probably can do it in an hour.

Trial Examiner Ballinger: The hearing stands in recess for one hour to afford the witness an opportunity to
7677 answer the question.

(Whereupon, a recess for one hour was taken.)

Trial Examiner Ballinger: Come to order.

Reconvened at 3:45 p. m.

By Mr. Hanley:

Q. After this hour's recess, Mr. Warmack, are you now prepared to answer the pending question, and if so, please do so.

Trial Examiner Ballinger: Do you desire the question reread?

The Witness: If you please.

Trial Examiner Ballinger: Read the question.

(The reporter read the question as follows:

"Now, Mr. Warmack, what administrative expense charged against marketing cost by the Respondent company as reflected by Respondent's Exhibit 101, in your opinion, is not a marketing cost?")

Mr. Hanley: As stated, the revenue accounts are not expense items—account 065-, 065-A, 065-B, 065-C.

Mr. Austin: There are a lot of other revenue expenses in there.

Mr. Hanley: I do not know. That is all he has specified on there. That is what he said.

Trial Examiner Ballinger: Proceed to answer the question.

7678 The Witness: I do not believe that there is any account on here which could not be considered as being in part revenue expense except some of the accounts which may apply or which may be applied to leased service station business of the Respondent company—

By Mr. Hanley:

Q. (Interposing.) What do you mean—

A. —and I question whether those accounts are to be considered as landlord expenses or sales promotion expense.

Q. First, what do you mean by "revenue expense"? Quote revenue expense quote in that question, please.

A. Rents, received.

Q. Now, will you please specify by number what accounts on Respondent's Exhibit 101 you regard as not being marketing expense or cost, if there be any such?

A. Account 000, entitled "Salaries—Supervision" contains expenses which in part are applicable or should be applicable to landlord activities of the Respondent.

There is a question in my mind as to whether the landlord activities are marketing expense; that is, whether they are to be considered as landlord expenses or sales promotion expense.

Q. Is there a difference?

A. Yes, sir. There is a difference.

Q. What is the difference between the marketing
7679 cost and the sales promotion cost?

A. Those I regard as one and the same.

Q. Then explain what you mean by your answer.

A. I mean that a portion of that account should properly apply to the leased, service station business. That means to the property activities and the landlord activities of the company incident to its handling of its service station properties which it either rents from others or owns and then sub-rents to operators.

Q. You have just referred to that activity on the part of the company, or that portion of the company as their sales promotional activity. Is that what you mean?

A. It may be so regarded—

Q. (Interposing.) Now, then, what is the difference between the sales promotional activity and the marketing cost?

The Witness: May I finish my answer?

Mr Austin: Your Honor, I do not think the witness has answered the question.

Mr. Hanley: I thought he had. Did you?

The Witness: No. I had not finished.

Trial Examiner Ballinger: The witness did not make any complaint. You may finish your previous answer if you so desire.

The Witness: It may be so regarded but I have understood that this cost incident to the leasing of service
7680 stations by the Respondent was a landlord expense,
and that is a term by which I have referred to it here. It was my intention to state that some people, some accountants may regard that class of expense as sales promotion cost expense or sales promotion expense.

By Mr. Hanley:

Q. Well, supposing that we get your idea about it.

A. My idea is that the correct term for the expense is "landlord expense."

Q. And not "sales promotion", Mr. Warmack? Is that right?

A. If it is sales promotion I do not know.

Q. Well, I am asking you.

Trial Examiner Ballinger: Mr. Warmack, that does not answer the question.

The Witness: Well, I cannot say, Judge Ballinger.

Trial Examiner Ballinger: Read the question and answer just given by the witness.

(The reporter read the question and answer referred to.)

Trial Examiner Ballinger: What is your opinion? Is it or is it not a sales promotion?

The Witness: It may be so termed, Judge Ballinger, but I do not know.

Trial Examiner Ballinger: What, in your opinion, is it?

7681 The Witness: It is landlord expense.

By Mr. Hanley:

Q. Mr. Warmack, I will ask you one more question. You have had no difficulty in the last two answers in stating what other accountants might term this expense. I now ask you what you term it. Is it or is it not a marketing cost?

A. My answer—

Q. (Interposing.) I am asking you for your opinion.

A. —is—I do not know. I have said that to my counsel on my direct examination.

Q. Very well. Go ahead with the rest of the question.

Trial Examiner Ballinger: You may strike that portion of the answer "I have said that to my counsel on my direct examination."

Mr. Austin: I would like to ask the witness a question if permitted on that subject before we go on.

Trial Examiner Ballinger: If there is no objection.

Mr. Hanley: It is agreeable to counsel for the Respondent if you want to ask him a question—so long as you ask the question.

Mr. Austin: Mr. Warmack, if the expense incident to real estate activities of the company in connection with its
leased service station property be considered as ex-
7682 pense of real estate operation, is it or is it not in
your opinion a market expense?

Mr. Hanley: That is objected to as being identically the same question that was asked by counsel for the Respondent.

Mr. Austin: I did not so understand it.

Trial Examiner Ballinger: Read the question.

Mr. Austin: No, it is not.

Trial Examiner Ballinger: What portion of it is that the witness has answered heretofore?

Mr. Austin: If your Honor please, I would like to state the next question, and I think that will make my position more clear in this regard.

Trial Examiner Ballinger: No, let us take one question at a time.

Mr. Hanley: One at a time is too many sometimes.

The Witness: If this expense is regarded as a real estate expense, in my opinion then it could not be considered as a marketing expense.

By Mr. Hanley:

Q. Well, do you regard it? That is what I am interested in.

Mr. Austin: Well, just a moment now. I had one more question, Mr. Hanley, and I think I had the floor. I had two questions——

Trial Examiner Ballinger: Mr. Austin, you may ask
7683 your second question.

Mr. Austin: If this landlord function of expense be considered as a sales promotion expense, is it in your opinion then a marketing expense?

The Witness: Yes, sir.

Mr. Austin: That is all.

Trial Examiner Ballinger: Now, how do you consider it?

By Mr. Hanley:

Q. How does this thing add up? Is it or is it not, in your judgment, a marketing expense?

A. I do not know. I have stated that.

Q. All right. Please continue your answer with reference to ~~the other~~ accounts on Respondent's Exhibit 101.

A. The same answers given in connection with account 000 apply equally to account 001 entitled "Salaries—Supervision—Others," inasmuch as that account follows the triple 0 account.

Q. Well, now, Mr. Warmack, I will ask you this question, and if you disagree with it you may restate what you said in your former question.

I understand what you mean by saying that these accounts which you have just enumerated follow your answer in respect of Triple Zero, in respect of which you said there was some part which you did not know whether or not it amounted to a marketing cost or constituted
7684 a marketing cost.

If I am incorrect in that interpretation of your answer, then I ask you to be explicit in this: What do you mean in respect of each of these accounts?

A. Yes, sir. It was my statement that a part of the Triple 0 account entitled "Salaries—Supervision," applied to the landlord activities of the respondent company; but that there was a question in my mind as to the proper way that that class of expense should be handled—

Q. (Interposing.) Mr. Warmack, it means more than a question in your mind? Is it not so, and did you not testify that you did not know—

A. (Interposing.) I did not quite finish my answer. If I may finish.

Q. —whether or not it was a marketing expense?

The Witness: May I complete my answer, your Honor?

Trial Examiner Ballinger: You may.

The Witne[illegible] Will you read as much as I have stated so far?

Trial Examiner Ballinger: Read the witness' answer so far as given.

(The reporter read the witness' answer so far as given.)

The Witness: Carrying that thought through, it was my feeling that if that class of expense were going 7685 to be regarded as a marketing expense, then it would be necessary that a segregation be made to determine for the purpose of arriving at a cost differential, to determine what it cost to serve lessee stations as distinguished from non-lessee stations.

Mr. Hanley: The Respondent moves to strike the answer of the witness beginning with the word "Carrying through," for the reason that the same is unresponsive. The witness has been asked nothing about procedures. The witness has been asked a very simple question as to what accounts on Respondent's Exhibit 101 he regards as marketing expense, and which he does not regard as marketing cost. It has nothing whatever to do with allocation or segregation or separation of expense.

Trial Examiner Ballinger: The motion to strike is denied.

Mr. Hanley: Judge, is there anything in my question that has anything to do with separation of costs?

Trial Examiner Ballinger: His answer may require a rather involved answer.

Mr. Hanley: I will try to simplify it then.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Now, Mr. Warmack, either say what was or was 7686 not a marketing expense in your opinion. If you are in doubt about it and you do not know, why, you can so state. However, you can give an answer one way or the other.

Mr. Austin: Your Honor, the last thing I think this witness said was that his answer was the same as to account 001 as it was to account ~~000,~~ and that led Judge Hanley's question to arise as to what he meant by that. That is where we are now.

Mr. Hanley: Well, Judge, perhaps it will ease the situation if I restate the question now.

Trial Examiner Ballinger: You may do so.

By Mr. Hanley:

Q. Mr. Warmack, you have testified that in respect of any of the expense in account 000 that may be applicable to the landlord-tenant business of the Respondent company so far as you are concerned; you do not know whether that is a marketing expense or whether it is not. Is that not true of any similar expense in any other account on Respondent's Exhibit 101? If so, what accounts are they?

The Witness: Judge, may I review?

Trial Examiner Ballinger: Yes.

The Witness: Mr. Hanley, I think your statement is correct. I do not know whether cost which has been termed in this record as "landlord expense" should be properly classified as marketing costs or not. There are other
7687 accounts which are shown on Respondent's Exhibit
101 which represent landlord expense in their entirety.

Trial Examiner Ballinger: Designate those, please.

The Witness: Yes, sir. ~~Account~~ 060-A, 060-B, 060-C, 061-B, 061-C, 066-A, 066-B, 066-C; 088-A, 088-B, 088-C; 110-A, ~~110-B,~~ 110-C; 112-A, 086-A, 086-B, 086-C. It is my understanding that accounts 506 and 514 represent that same class of expense in their entirety.

By Mr. Hanley:

Q. Mr. Warmack, now, is it to be understood that you do not know whether the item of expense represented by the accounts which you have just designated constitute marketing cost as you have testified relative to account Triple Zero?

A. Yes, sir. That part of account Triple Zero applicable to landlord activity; that statement is correct. I do not know.

Q. Are there any other items of cost other than those that you have now designated on Respondent's Exhibit 101 which you regard as not being marketing costs—

A. (Interposing.) No—

Q. —aside, of course, from account 520 which you are entitled to disregard in this question inasmuch as you have testified before about that individual account——

A. (Interposing.) Yes, sir.

Q. —and of course, the revenue accounts are out.

7688 A. Yes, sir. This account 030—entitled "Traveling Expense—Supervision," the same answer is given in connection with account 001 as pertains to the landlord activities applies equally to that account.

That is likewise true in account 045.

Whatever part of account 215 applies to or which may apply to the landlord activities, my answer in that connection in reference to account 000 entitled "Salaries—Supervision" would apply in connection with account 215 entitled "Expense—Salaries—Others."

That same thing would apply in connection with account 216.

That same thing also would apply in connection with account 217.

There is a question in my mind with respect to account 400, account 510, account 511, account 512, all being bad debts accounts. One of them represents bad debts collected—written off in prior years. I have no particular question with respect to that any more than—

Q. (Interposing.) Those revenue accounts, and that is a revenue account, is not account, Mr. Warmack, 400?

A. I do not quite follow your question there.

Q. Perhaps it was a little bit mixed up. That is a revenue account, is it not, Mr. Warmack, and is that not true of the 400 account series?

7689 A. Of course, if the others were going to be regarded as marketing expense that account—400—should properly—at least probably properly be offset against the expense accounts.

There is no particular question in connection with those accounts.

Q. Proceed.

A. It all deals with the way that the company accounts for its bad debts and its bad debt collections.

Q. Proceed.

A. Account 100, entitled "Depreciation Expense—Vehicles—Supervision," the same thing said with respect to account 000 applies to this account.

Q. Proceed.

A. Account 250, account 255, account 260, account 265, account 270, account 280, account 290, account 295 are general office expense accounts. I have no doubt but what some part of the expense included in those accounts are marketing expense properly applicable to the Detroit field,

I question the amounts of the accounts as shown—

Q. (Interposing.) Just a moment, please, Mr. Warmack.

A. Excuse me, Judge.

Q. It now appears that your answer has departed from the question relative to the landlord and tenant operations
of the company when you referred to accounts 250
7690 and the following accounts. Is that right, Mr.
Warmack?

A. Well, I was just going down the line as the accounts appear on the sheet so I would not miss one. There is one I want to go back to.

Q. I understand that. But is not my statement correct?

A. Yes, sir. Your statement is correct.

Q. Please understand, Mr. Warmack, that the question is not pointed to the amount or to the methods of procedures, or to the time.

It is simply pointed to the question of whether or not the item of expense indicated, the character of the expense, the class of the expense is, in your judgment, a marketing cost, or whether it is not a marketing cost.

Now, with that understanding of the question, do you care to make any revision of your answer?

You questioned the amounts. I would prefer not to make a motion to strike. I am not asking you about the amounts. I am asking you about the character of these expenses as to whether or not in your judgment they are proper marketing costs.

A. Mr. Hanley, I think that I can answer that question properly this way:

By stating that if—or, by stating that I think at least some parts of those accounts are marketing costs.

Q. You are now referring to your last answer
7691 beginning with account 250 and following numbers?
Is that right?

A. Yes, sir.

Q. Go ahead with your answer, Mr. Warmack.

A. That same answer will apply to account 515. Some part of that account may possibly be considered as marketing expense. That is one account, I do not believe that I have made a close study of.

Trial Examiner Ballinger: Mr. Warmack, Judge Hanley has asked you for your opinion. When you say that some portion of that account may apply to marketing expense, are you not expressing your own opinion?

The Witness: Well, your Honor, if I have not studied the account I would not know.

Trial Examiner Ballinger: Are you expressing it in your opinion? You say it may. That is my point.

The Witness: Yes, sir. That is right.

Trial Examiner Ballinger: Have you reached any decision as to whether ~~or not~~ any part of that account does apply?

The Witness: Naturally, if I have not studied it I could not reach a decision.

By Mr. Hanley:

Q. Have you studied it? If you have studied it, please say so.

A. I am able to say that I have not studied account 515.

7692 Q. Are you able to state whether or not account 515 is a marketing cost or if it is not a marketing cost, in your judgment as an accountant, what it is?

A. In my judgment from the very nature of the account, as stated; that is, account 515, an account entitled "Experimental—Development and Research Expense," I should think that that class of expense should apply at least in part to the marketing activities of the company. I do not know exactly what experiments are made or what research is made.

Q. Is there anything about it that you question?

A. No, sir.

Q. Continue with your answer, Mr. Warmack.

A. I passed over account 054 entitled "Operation and Maintenance of Vehicles—All Other (other than Office)." I just do not remember about that account. I have got to look it up if I am to give an answer.

Q. Well, in any event, if you have a criticism of it, it does not arise out of the landlord-tenant difficulty which you have expressed here?

A. Well, I am under the impression that that is true, Judge Hanley, but I placed a question mark by that account when I went over it. I do not remember exactly about that account. I will be happy to look it up.

Q. Well, it is not very large, Mr. Warmack.

A. No, sir.

7693 Mr. Hanley: It is only $221, your Honor, in this column, and I do not believe we are justified in taking up any time on it.

Trial Examiner Ballinger: All right.

Mr. Hanley: Not for him to look that up.

Trial Examiner Ballinger: Then you may proceed with your answer, Mr. Warmack.

The Witness: I believe that I have completed my answers. I mean that I have outlined which expenses may not in whole or in part be regarded as marketing expenses.

By Mr. Hanley:

Q. If I understand your answer correctly, Mr. Warmack, you have now indicated that you do not know whether those expenses incident to or that we have been terming here the "landlord-tenant" operations of the company is a marketing cost? That is right. Is it not?

A. Yes, sir. That is correct.

Q. Do you know how much that cost amounts to in these various accounts that you have referred to?

A. I believe that the net of that expense is shown on Commission's Exhibit 119. If it is your desire, I will be glad to look that up.

Q. No. I just wondered if you knew of your own knowledge. Do you know what the influence, if any, is on the claimed differential of Respondent company?

7694 A. No, sir, I do not.

Q. There is one other class of expense which begins with account No. 250, and some further accounts which you named.

A. Yes, sir.

Q. Concerning those, you have said that perhaps a part of those accounts were marketing cost?

A. That was disregarding the figures which are shown here, Judge Hanley.

Q. Well, again understand, I am not asking you about amounts.

A. Yes, sir.

Q. I am asking you about the character of the account, Mr. Warmack.

A. Yes, sir.

Q. You understand that?

A. Yes, sir.

Q. I now ask you what part of those accounts, as shown on Respondent's Exhibit 101, are not and should not be regarded as marketing cost, if any part thereof is shown which should not be so regarded?

A. I certainly do not know.

Q. Do you know the influence, if any, upon the cost differential of the Respondent as claimed in Respondent's Exhibit 101 by virtue of any part, if there be any part of those accounts that ought to be eliminated as marketing cost?

A. No, sir.

7695 Mr. Hanley: That is all.

You may take your witness.

(Witness temporarily excused.)

Mr. Austin: Your Honor, it is now 4:30. I would like to adjourn until either 1:30 or 2:00 o'clock tomorrow afternoon so that I may have a half day to prepare the redirect examination of this witness.

I will have to consult with the witness to some extent regarding the matters which should be taken up.

I hoped that we might get through in time to do what we could about that this afternoon, but we cannot.

Trial Examiner Ballinger: In the absence of objection, the request is granted.

And now, at 4:30 p. m., July 30, 1942, an adjournment of this hearing is taken to reconvene at 1:30 p. m., July 31, 1942, in Room 532, Federal Trade Commission Building, Washington, D. C.

(Whereupon, at 4:30 p. m., July 30, 1942, the hearing in the above-entitled matter was adjourned.)

7696 Room 532, Federal Trade
Commission Building,
Washington, D. C.
Friday, July 31, 1942.

Met, pursuant to adjournment, at 1:30 p. m.

Before:

Webster Ballinger, Trial Examiner.

Appearances:

Cyrus B. Austin, Esq., attorney for the Federal Trade Commission.

Harold R. Hanley, Esq., (910 South Michigan Avenue, Chicago, Illinois,) appearing for the Respondent, Standard Oil Company of Indiana.

7697 Trial Examiner Ballinger: Come to order.

The hearing in Docket No. 4389, case entitled "In the Matter of Standard Oil Company (Indiana)" is reconvened pursuant to notice at 1:30 p. m., July 31, 1942, in Room 532, Federal Trade Commission Building, Washington, D. C.

The last hearing was held at this same place, July 30, 1942.

The reporter will note counsel for the Commission and Respondent present.

You may proceed.

Mr. Austin: Mr. Warmack, will you resume the stand?

WILLIAM J. WARMACK resumed the stand and testified further as follows:

Redirect Examination by Mr. Austin.

Q. Mr. Warmack, you have testified that in January of 1942 you went to Detroit, being sent there by the Federal Trade Commission in connection with this case, after Respondent's Exhibit 99, Exhibit 100, and Exhibit 101 had been introduced into evidence, for the purpose of studying the methods and procedures used by the Respondent in preparing those exhibits, and in arriving at an alleged cost differential of 1.51 cents.

7698 Will you state just whom you contacted upon your arrival in Detroit? What was your initial procedure and activity there?

A. Yes, sir. On my arrival in Detroit in January, I went to the offices of the Respondent company, Standard Oil Company (Indiana), and went directly to the office of Mr. Rupagh. Mr. Rupagh is the manager of the Detroit field. There I contacted Mr. Rupagh and Mr. Houghton. Mr. Houghton is the accountant of the company who was sent to Detroit from the Chicago office to work with me in my studies.

Trial Examiner Ballinger: What do you mean "work with" you? Do you mean to afford you any information you desired?

The Witness: Yes, sir. And in that way to expedite the work as much as possible. On that first morning there, I held conferences with Mr. Houghton and Mr. Rupagh in Mr. Rupagh's office. At that time, I stated, in general, the outline of the work that I contemplated doing in connection with studying the methods employed by the Respondent company in the separation of costs as shown in Respondent's Exhibit 101, and whatever other inquiries were to be made.

I pointed out, at the conference, generally, the coverage that I expected to make; that is, in general, the study and the extent of it that I was planning to make in the company's offices.

7699 Trial Examiner Ballinger: Did you at that time have Respondent's Exhibit 101?

The Witness: Yes, sir.

Trial Examiner Ballinger: And it was in connection with that that you made that statement?

The Witness: Yes, sir. And also in connection with Respondent's Exhibit 99 and Respondent's Exhibit 100.

I outlined there that we were interested especially in the measuring factors used by the Respondent in the separation of its costs; that is, the measuring factors used in the separation of joint costs which were included in many of the accounts on Respondent's Exhibit 101.

I outlined that that involved going into measuring factors such as those used for salesmen—which I understood were on the basis of time studies; that is, established on the basis of time studies.

Mr. Hanley: Well, if your Honor please, are we to understand that these are the things that the witness said at that time to Mr. Houghton and Mr. Rupagh?

The Witness: That is correct.

Mr. Hanley: Very well. Go ahead.

By Mr. Austin:

Q. And you can limit yourself as to what you said: At least, the substance of what you said.

A. Thank you.

7700 Q. The substance of what was said will be sufficient.

A. Yes, sir. That is the general substance of what was stated by me.

I outlined also, or explained also that it would be necessary to go into measuring factors, such as gallonage, which had been used, and it was my opinion and, perhaps I should say it was my intention and purpose to determine, as far as the Respondent company was able to furnish me with information, to determine if those factors had been arrived at and properly determined by the Respondent company in accordance with what I considered to be sound accounting practice.

That, in general, Mr. Austin, was what was studied by me in connection with the work.

Mr. ~~Rupagh~~ assigned a room to Mr. Houghton and myself where we worked and which was our headquarters during the course of the examination made at the Detroit office.

I believe that constitutes my approach to the situation when I arrived in Detroit.

Mr. Hanley: Mr. Examiner, I should like at this moment to ask a qualification question, if there is no objection.

Mr. Austin: I have no objection.

Trial Examiner Ballinger: Without objection, you may.

7701 Mr. Hanley: Mr. Warmack, as I understand it, the conversation you have just been talking about with Mr. Houghton and Mr. Rupagh was just a general exposition on your part of what you proposed to do?

The Witness: Yes, sir.

Mr. Hanley: And that you did not at that time make any specific requests for any specific information?

The Witness: Not more than to talk to Mr. Rupagh, with the understanding, or to the end or the understanding that what I was to have access to was any records available in the Detroit office.

Mr. Hanley: Very well. Thank you.

By Mr. Austin:

Q. Did you make specific requests later to Mr. Houghton for specific information?

A. Oh, yes, sir. I made many such requests.

Q. Was Mr. Houghton continuously in the Detroit office during most of your stay there, and was he available—

A. (Interposing.) Yes, sir.

Q. —for conferences and more requests when you wished to talk with him?

A. Yes, sir. Most of the time. Mr. Houghton had to be absent from Detroit on two occasions because of the illness and ultimate death of his father.

Q. Did you, either independently or with Mr. Houghton; that is, with his help and assistance make any
7702 effort to determine whether or not the separation of unit costs could be made as between commission agent business and salaried station business in the Detroit field on the basis of material at hand?

A. Yes, sir. We spent considerable time in an effort to determine if such a separation could be made with the information at hand.

Q. What was the result of that effort?

A. The result was that there was insufficient information at hand with which to make a separation of all of the accounts that would have to be separated as those accounts on Respondent's Exhibit 101, which would have to be separated contain just all classes of business; that is, commission agent business and salaried station business, commonly referred to in this record as B-Station business and A-Station business.

Q. At that time or at the conclusion of your studies, do you recall any statements which you made to Mr. Houghton or which Mr. Houghton made to you regarding your results or conclusions in respect of those studies?

A. Yes, sir.

Q. What were they?

Trial Examiner Ballinger: Now, are you speaking of the studies of the A-Stations and B-Stations?

7703 Mr. Austin: Yes, sir.

The Witness: Yes, sir.

By Mr. Austin:

Q. What is it?

A. I remember specifically on one occasion when we had gone into several different matters and we came across the work that we had performed in trying to separate this class of business from the information at hand.

Mr. Houghton at that time asked me if I felt that we should devote more time to that work. I stated to Mr. Houghton tha I thought possibly we had already spent too much time on that particular work because of the pressure under which we were working, and the large amount of work to be covered that we had just best not spend any more time on that work.

We did at that time review some of the separations which we had attempted. That review showed that, by and large, the separations were for the most part arbitrary, guesswork, and such like, in view of the fact that the information was not available with which to make these separations.

I stated to Mr. Houghton that it was my conclusion that the best thing to do would be to abandon that particular work or attempt at separating the costs of those two methods of marketing, and to devote our time to other work that we had to cover at that time.

Q. Is it your opinion that a comparison of the unit 7704 costs of those two methods of marketing could be achieved by a prospective properly conducted cost study?

A. Yes, sir. That could. A proper study would show that those two methods of marketing could be properly separated; that is, the costs of the same could be properly separated. I am convinced of that.

Q. I want to be sure that your studies were based upon past information, and were not of the nature of a study of present expense.

A. No, sir.

Q. I probably should say "current expense"?

A. No, sir. They were not studies of current expense.

We simply endeavored to pick up the separate accounts, as shown on Respondent's Exhibit 101, and separate them, if possible, between A-Station business and B-Station business. And we found out that, as a result of our attempt, that you could not arrive at any figure which you could say or even consider as being accurate or correct.

Trial Examiner Ballinger: As the Examiner remembers, you have previously stated that if such a cost study was made, you could not at this time state whether or not it would affect the differential shown by Respondent's Exhibit 101. Is that correct?

The Witness: That is quite correct. Only a study could give that information.

7705 By Mr. Austin:

Q. On your cross examination, Mr. Warmack, you were referred to a statement appearing on page 38 of Commission's Exhibit 134 for identification, which is a booklet entitled "Case Studies in Distribution Cost Accounting for Manufacturing and Wholesaling," compiled by the Federal Trade Commission.

You were particularly asked a question about the following statement appearing on page 38 of that booklet—parenthetically, I might say here that I am not reading all of the material which was read by counsel for the Respondent at the time, but I will read sufficient upon which to base the present question:

"When time studies are conducted through the use of sales representatives' reports or observers to ascertain the time applicable to each commodity-customer cost objective for each salesman who sells a variety of commodities and calls on various classes of customers, it is frequently necessary to make certain more or less rough calculations. In complex situations of that kind, there are often no alternatives except to obtain part of the needed data on an estimated basis."

I wanted to ask you in that connection, Mr. Warmack, whether, in your opinion it was necessary for purposes of this cost study,—referring to Respondent's Exhibits 99, 100, and 101,—to obtain the necessary data for the
7706 allocations of salesmen's salary expense as included account 004 "on an estimated basis"?

A. In my opinion—

Mr. Hanley: (Interposing.) Now, just a moment. How does that link up with the quotation? I just confess I do not understand.

Mr. Austin: May we be off the record just a moment, if your Honor please?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: If your Honor please, I have no objection if the witness understands the question. I have no objection to his answer.

The Witness: May I have it read now?

(The reporter read the question.)

The Witness: In my opinion, it would not be.

By Mr. Austin:

Q. What, if any, alternative method—

Mr. Hanley: (Interposing.) Now, just a moment. That is objected to as not responsive to the question. The question is directed to a point retrospectively. The witness has answered "it would not be." He is asked whether or not it was. I ask that the answer be given to that
7707 question.

Trial Examiner Ballinger: You can answer the question "yes" or "no."

Read the question to the witness.

(The reporter read the question as follows:

"Q. On your cross examination, Mr. Warmack, you were referred to a statement appearing on page 38 of Commission's Exhibit 134 for identification, which is a booklet entitled 'Case Studies in Distribution Cost Accounting for Manufacturing and Wholesaling,' compiled by the Federal Trade Commission.

"You were particularly asked a question about the following statement appearing on page 38 of that booklet—parenthetically, I might say here that I am not reading all of the material which was read by counsel for the Respondent at the time, but I will read sufficient upon which to base the present question:

"'When time studies are conducted through the use of sales representatives' reports or observers to ascertain the time applicable to each commodity-customer cost objective for each salesman who sells a variety of commodities and calls on various classes of customers, it is frequently necessary to make certain more or less rough calculations. In complex situations of that kind, there
7708 are often no alternatives except to obtain part of the needed data on an estimated basis.'

"I wanted to ask you in that connection, Mr. Warmack, whether, in your opinion it was necessary for purposes of this cost study,—referring to Respondent's Exhibits 99, 100, and 101,—to obtain the necessary data for the allocations of salesmen's salary expense as included in account 004 'on an estimated basis'?")

The Witness: I can answer it—no.

By Mr. Austin:

Q. Now, will you state, Mr. Warmack, whether in your opinion—

A. I beg your pardon, sir?

Mr. Austin: You may strike that.

By Mr. Austin:

Q. In your opinion, Mr. Warmack, if estimates were—

Mr. Hanley: What was that? I did not hear it.

Mr. Austin: I will repeat it.

By Mr. Austin:

Q. In your opinion, Mr. Warmack, if it was not necessary for the Respondent company to allocate salesmen's salaries on the basis of estimates for the purpose of this cost study, and you have so described the method used, what alternative, in your opinion, better method was available to the Respondent?

A. The alternative or the better method would be
7709 to have the separate salesmen keep daily reports of
their time showing the customers called upon, the time spent with those customers, in order to make these separations, if a separation or an allocation of this class of expense is had as between the separate channels as shown on Respondent's Exhibit 101.

Q. And in your opinion, would it have been practical for the Respondent to make such a time study for the purposes of this cost study?

A. In my opinion, it most certainly would.

Q. Was it then necessary—

Mr. Hanley: (Interposing.) I would object to that.

Mr. Austin: Very well. Strike that.

By Mr. Austin:

Q. I have another question regarding salesmen's salaries, Mr. Warmack.

I want to refer to your testimony on pages 6137 and 6138 of the record.

A. Yes, sir.

Q. You were cross examined to some extent, Mr. Warmack, about the percentage figures appearing on page 6137 which is a part of your direct testimony.

In order to clear that point up a little further, you stated at the foot of page 6136, and at the top of page
7710 6137:

"* * * Respondent's regular accounting procedure in the Detroit field for the year 1940, which would mean that 29.19 per cent of this class of expense had been assigned by respondent in its regular accounting procedure to the tank-wagon reseller column."

Just what is in that figure 29.19 per cent? From where was it derived?

A. That figure represents the ratio of the amount of salesmen's salaries assigned by Respondents to the tank wagon reseller business.

Q. Where?

A. On Respondent's form 189, to the total of the salesmen's salaries appearing in the account. I refer to account 004.

Mr. Austin: Off the record.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Austin: May I proceed?

Trial Examiner Ballinger: Proceed.

By Mr. Austin:

Q. Now, actually in the Respondent's regular accounting procedure, in charging salesmen's salaries to the three channels; that is, tank wagon reseller, tank wagon consumer, and other methods, is not part of the salaries
7711 of the candle oil or white oil salesmen charged to the
tank wagon reseller channel?

A. No, sir.

Q. Now, in the middle of page 6137 of the record you said:

"* * * I found that by removing from the tank-wagon-reseller channel in Respondent's regular form 189 only 2.67—"

Mr. Austin: Judge Hanley, I notice here that when this was written up, apparently they did not put the per cent mark here. Obviously, this was intended to be a 2.67

per cent. I suppose in reading it I might as well read it as 2.67 per cent?

Mr. Hanley: No. Read it to him as it appears in the record. If he wishes to question the stenographic record, Mr. Austin, that is something else.

Mr. Austin: All right.

By Mr. Austin:

Q. I will repeat the question to you. In the middle of page 6137 of the record you said:

"* * * I found that by removing from the tank-wagon-reseller channel is respondent's regular form 189 only 2.67 of this class of cost which had been in the late study assigned to the direct shipments, instead of removing 29.19 per cent had the items originally gone into that tank-
7712 wagon-reseller channel in the regular accounting procedure, I found that for these particular three months the tank-wagon channel in Respondent's Exhibit 101 for Account 004 had been overstated by the amount of $581.42."

Then you multiplied that figure of $581.42 by 4 to bring it up to an annual basis, which gave you a result of $2,325.68, which figure appears at the top of page 6138 of the record.

Now, as I read your testimony, Mr. Warmack, it would mean to me that if you deducted 2.67 per cent from 29.19 per cent and applied the difference of 26.52 per cent to the total amount of direct shipment charged on Respondent's Exhibit 101 for this account, you should arrive at a result of $2,325.68.

Now, I will ask you if that is correct?

A. No, sir.

Mr. Hanley: (Interposing.) I do not think so.

By Mr. Austin:

Q. If that is incorrect, will you please make a computation as I have suggested for the purpose of showing what result would be reached?

A. Multiply it?

Q. Yes.

A. (The witness made certain calculations.)

The Witness: Multiplying $13,639.17—

7713 By Mr. Austin:

Q. (Interposing.) Now, just a minute. What is that figure of $13,639.17?

A. Representing the amount of this class of expense which would apply to direct shipment business—I was going to tell you—by the percentage you gave of 26.52 per cent, which represents the difference between 29.19 per cent and 2.67 per cent, we get a result of $3,617.10.

Q. Now, will you explain the discrepancy between the figure of $3,617.10 and the figure of $2,325.68 which appear on page 6138 of the record?

A. Yes, sir.

Mr. Hanley: Now, just a minute. That is objected to because no proper foundation has been laid. The witness has made an arithmetical calculation applying 26.52 per cent against the figure, and he has arrived at a result. But it does not anywhere appear in the record that that figure means anything.

Until and unless that is explained, there is no proper foundation for the present question. You can do arithmetic all day, if your Honor please, and it does not make any sense in this record unless it has some pertinency.

Trial Examiner Ballinger: What is the pertinency of this question?

Mr. Austin: I will be glad to explain that more
7714 fully, your Honor, although I thought it had been by
quoting from the record.

It appears at page 6137 of the record; that is, it appears that Mr. Warmack's testimony was 29.19 per cent of salesmen's salaries—total salesmen's salaries were charged to the tank wagon reseller channel in the Respondent's regular accounting procedure;

Secondly, that Respondent in this case, in this cost study, only deducted from the tank wagon reseller channel 2.67 per cent of the amount of salesmen's salaries charged to direct shipment business.

Mr. Warmack says as a result of this, that the 29.19 per cent of these salaries went into that channel and only 2.67 per cent came out, which resulted in an overcharge in this cost study to the tank wagon reseller channel of $2,325.68.

Now, what I have just shown is that in making the computation indicated by his testimony, it would result in a larger figure of $3,617.16 overstatement whereas Mr. Warmack says it was only an overstatement of $2,325.68.

I think there is a discrepancy which should be explained.

Trial Examiner Ballinger: The objection is overruled. The witness may answer.

The Witness: May I have the question, please?

7715 Trial Examiner Ballinger: Read the question to the witness.

(The reporter read the question as follows:

"Q. Now, will you explain the discrepancy between the figure of $3,617.10 and the figure of $2,325.68 which appear on page 6138 of the record?")

The Witness: May I have my answer read as far as I have given it?

Trial Examiner Ballinger: You may.

(The reporter read the witness' answer as far as given as follows:

"A. Yes, sir.")

The Witness: That is brought about by the fact that the candle oil salesmen and domestic heating oil salesmen are—that is, the salaries and compensations of those employees having not been assigned by the use of the distribution of time reports in the Detroit field, and having been assigned on another basis to the other channels on Respondent's regular form 189; that is, other than the tank wagon reseller channel, that allocation in the Respondent's regular accounting form was taken into consideration in arriving at the figure of $2,325.68, and not arriving at the figure of $3,617.10.

The percentages quoted of 29.19 per cent and 2.67 per cent were the results of amounts going into or coming out of the respective channels in the Respondent's regular accounting procedure and late cost study and were 7716 not the percentages used in the allocation of the accounts.

By Mr. Austin:

Q. Then, do I understand, Mr. Warmack, that the amount of $2,325.68, as shown on page 6138 of the record, is the correct amount by which, in your opinion, the tank wagon reseller channel was overstated as the result of the method by which the direct shipment cost was withdrawn?

A. Yes, sir. That is correct. That assumes, of course, that it had originally gone into the respective channels on Respondent's form 189 in accordance with proper methods of allocation for the purposes of the establishment of a cost differential—

Mr. Hanley: (Interposing.) Now, if your Honor please,—

Mr. Austin: (Interposing.) Just one more question—do you want to object to something that has been said? If not, I want to ask one more question, Mr. Hanley.

Mr. Hanley: Go right ahead.

By Mr. Austin:

Q. Well, your computation here is based upon the actual allocations made by the Respondent? Was it not so done, Mr. Warmack? It was not any supposed, different, or other method?

A. Oh, that is quite correct. Yes, sir. My computation here is based upon the actual allocations made 7717 by the Respondent. They are not made upon any supposed allocations, different allocations, or other method of allocation.

Mr. Hanley: Now, may I ask a question? This will be a qualifying question.

Trial Examiner Ballinger: You may do so.

Mr. Hanley: It now appears from the last two answers of the witness that the amounts of two thousand plus dollars, as indicated on page 6138 is adhered to by the witness rather than the computation indicated by counsel of some three thousand plus dollars.

I do not know whether it is the intention of the witness to change this testimony around. I am not very much concerned about that. But I would like to now know, and I think it would be helpful in the record if the witness would state what the effect on the claimed differential of 1.51 cents is of either of those two figures.

Mr. Austin: Well, I think the only figure in question is the one that appears in the record.

On cross examination, it was brought out that these oil salesmen's salaries did not, in any part, go into the tank wagon reseller channel. And the only purpose of the examination was to show that the witness took them into account in arriving at the figure.

Trial Examiner Ballinger: As the Examiner un-7718 derstands the testimony just given by the witness, it is solely for the purpose of correcting an arithmetical computation?

Mr. Hanley: I do not know.

Mr. Austin: Not for the purpose of correcting the record. It was for the purpose of showing that certain facts brought out on cross examination had been taken into account by the witness in arriving at the figure.

Mr. Hanley: This relates back to the controversy which went on at some length because the witness shows a percentage based on a certain group of factors as comparable to a certain percentage group on another set of factors.

Now, my question has not been answered at all.

I think I am entitled to an answer.

Whatever this witness did appears in the record. Irrespective of the result whether it is as a calculation, of the way Mr. Warmack wants to calculate it, of two thousand odd dollars plus, or of the way Mr. Austin wants to calculate it of three thousand odd dollars, I am asking this witness what the effect is in an influence on the differential as claimed by the Respondent of 1.51 cents, if he knows, if any.

Trial Examiner Ballinger: Do you know?

The Witness: No, sir. I can make a calculation for counsel.

By Mr. Austin:

Q. You can make it in about five minutes. Can you not?

7719 A. Yes, sir. It is just simply a matter of dividing $2,325.68 by sixty-nine million odd gallons of gasoline.

Trial Examiner Ballinger: You may make the computation.

(The witness made the computation.)

The Witness: According to my calculation, it would reduce the differential of 1.51 cents per gallon calculated by the Respondent company by the amount of .00332.

Mr. Hanley: What does that amount to in thousandths of a cent, Mr. Warmack, or ten thousandths of a cent, as the case may be?

The Witness: Do you want that answer?

Trial Examiner Ballinger: Is that a necessary question, Judge Hanley?

The Witness: I can do it.

Mr. Hanley: I am not a mathematician, Judge Ballinger. I would like to have these things put in the record in a way so I may understand them.

The Witness: (After making a calculation.) A little over three one-thousandths.

Mr. Hanley: A little over three one-thousandths?

The Witness: Yes, sir.

By Mr. Austin:

Q. I am going to ask you a couple of questions about bad debts accounts Nos. 400, 510, 511, 512.

7720 A. Yes, sir.

Q. I think it has been brought up, has it not, that for the purpose of this cost study, and also in the Respondent's regular accounting procedure, for the purpose of determining field marketing costs, the Respondent treats bad debts written off during the year, and the expense of collecting bad debts collected during that year as marketing expense, and credits against marketing expense any collections of bad debts previously written off.

Have you investigated or do you know whether the respondent consistently handled its bad debt losses and collections in this manner for the purpose of its general accounting procedure, or for the purpose of preparing its annual statements, on that at its home office?

A. It is my understanding that it does not.

I have not reviewed the records of the company with respect to that very point, * * *

Mr. Hanley: Well, just a moment, that is the Standard Oil Company accounting?

The Witness: On that point.

Mr. Hanley: Well, now, if your Honor please, if there is some statistical data that has been available to this witness in the Federal Trade Commission and that is not a part of this record or before the Court, I think we are entitled to know just what this witness did, in fact,
7721 base his opinion upon. I further object to the question and move to strike his answer on the ground that it is improper redirect examination.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Austin: I think perhaps I can clear this matter up.

By Mr. Austin:

Q. What is the source of your information on that point, Mr. Warmack?

A. I have reviewed a large manual here, "Moody's Industrials," for 1942, and information contained in that on this company, Standard Oil Company (Indiana).

Mr. Hanley: I move to strike the answer of the witness to the preceding question on the ground that it now appears that his last answer shows clearly that his information is purely hearsay.

Mr. Austin: Off the record.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: Before the Examiner rules on the motion he will ask the witness if the information obtained from Moody's Manual is the only source of the witness' information.

7722 Mr. Hanley: Well, that question I object to—no, I withdraw my objection. I think that is a proper question.

Trial Examiner Ballinger: Without objection, then, answer the question.

The Witness: Your Honor, I have reviewed the printed statements, the annual reports of this company for—that is for the Standard Oil Company (Indiana), but I would have to review them again to determine that. I do not remember just exactly what they show on that particular point.

Trial Examiner Ballinger: The motion is granted and the answer to the just preceding question is stricken.

Mr. Austin: On what ground?

Trial Examiner Ballinger: On the ground that the witness has now stated, in effect, that he has answered the question on information which is based upon Moody's Manual, and that is hearsay.

Mr. Austin: And that it is hearsay?

Trial Examiner Ballinger: Yes. It is the opinion of the Examiner that before any statement appearing in Moody's Manual would be admissible in this record, it must be first shown that originally the original manuscript appearing in the manual was furnished to the Moody's Company by the Respondent company.

Mr. Austin: Your Honor, the witness has said that he got his information in part from the annual report
7723 of the Standard Oil Company.

Mr. Hanley: He said he did not remember that. Can we not now proceed without arguing the Examiner's ruling on interminably?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Austin: May we have five minutes' recess, your Honor? I want to look at something.

Trial Examiner Ballinger: We will take a five minutes' recess.

(A short recess was taken.)

Trial Examiner Ballinger: Come to order. Proceed.

By Mr. Austin:

Q. Referring to page 7689 of the record, Mr. Warmack,—

Mr. Hanley: May I read that first?

Mr. Austin: Certainly.

(There was a short pause.)

By Mr. Austin:

Q. Referring to accounts 400, 510, 511, 512, you made the following statement:

"There is no particular question in connection with those accounts."

Now, you made that statement that there was no
particular question in connection with these accounts,
7724 and when you did that, to what were you referring?
I wish you would elaborate that because I do not
think it is clear in the testimony.

A. That was in response to a question by Respondent's attorney as to which accounts were or were not marketing expenses; that is, which accounts on Respondent's Exhibit 101 were or were not marketing expenses.

Trial Examiner Ballinger: Does that not plainly appear on the face of this record?

Mr. Austin: I do not think so, your Honor.

By Mr. Austin:

Q. When you said that there is no particular question in connection with those accounts, do you mean that there was no particular question in your mind as to whether or not the expense groups in those accounts may properly be used by the Respondent for the purpose of establishing a cost differential?

A. No, sir. That was not what the answer was intended to be for; that is, I did not mean that there was no particular question with respect to whether or not those expenses could be used in connection with determining a cost differential.

I meant that there was no particular question as to whether or not those costs could be considered as marketing expenses.

Q. Just what is your opinion, referring particu-
7725 larly to accounts 400 and 510, as to whether the expenses and credits in those accounts are proper expenses and credits to current marketing expenses of the Respondent company?

A. Of course, account 400, entitled "Bad Debts Collected—Written Off Prior Years" is a revenue account, and of course, that is not an expense.

Q. Well, that was not my question.

A. I beg your pardon.

Mr. Austin: May the question be read?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

By Mr. Austin:

Q. You see, I referred to credits as well as expenses.

A. Well, according to the way that the company keeps its accounting, as I understand it, in the Detroit field, why, one of those accounts offsets the other. That is the purpose of it. And assuming that, why, those accounts may properly be designated as marketing expenses. Does that answer your question, Mr. Austin?

Q. If that is your opinion?

A. That is based upon the method that the company accounts for its bad debts in the Detroit field. I do not particularly subscribe to that method or manner of accounting for bad debts. I do not believe that bad debts are accounted for in this particular manner in the
7726 company's regular accounting procedure at its main office. But, it was on that idea that I answered your question.

Trial Examiner Ballinger: Do I understand that you made no particular objection to the method employed by the Respondent company with reference to those accounts?

The Witness: With reference to keeping of its accounts? No, sir.

Trial Examiner Ballinger: No. With reference to the appearance of those two accounts in Respondent's Exhibit 101.

The Witness: Well, I do question them, Judge.

Mr. Austin: That is just what I am driving at, your Honor. He has said the answer was limited to solely as to whether they were marketing expense and not as to whether they should be used for the purpose of a cost differential.

Mr. Hanley: I wish to now move on behalf of the Respondent that the answer of the witness beginning "I do not believe" to be stricken on the ground that the witness stated expressly that he had made no study of the matter and does not know anything about it.

Mr. Austin: I do not think the witness said that at any time.

The Witness: No.

Mr. Hanley: Read his answer.

Trial Examiner Ballinger: Read the answer.

7727 (The reporter read the answer.)

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: May I have the answer read again?

Trial Examiner Ballinger: Read the answer again.

(The reporter read the answer.)

Trial Examiner Ballinger: The motion to strike is denied.

Mr. Hanley: I would like to be off the record.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record. You may proceed.

By Mr. Austin:

Q. On your cross examination regarding credit card expense, Mr. Warmack, you stated that in your opinion credit card expense is a proper marketing expense of the Respondent company.

That being true, how, in your opinion, should such expense be allocated for the purpose of this cost study as between reseller gallonage and in "reseller gallonage" I include both tank wagon reseller gallonage and jobber reseller gallonage.

Trial Examiner Ballinger: Off the record.

7728 (There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Are you familiar with the question?

The Witness: Yes, sir.

Trial Examiner Ballinger: You may answer the question.

The Witness: If that class of expense is going to be included in the group of expense used or attempted to be used in the cost justification, then the only way in my opinion it can be separated, and separated properly, would be on a basis of gallonage, and that of course would afford no cost differential.

By Mr. Austin:

Q. When you say "on the basis of gallonage," are you referring to, now, to all reseller gallonage including jobber reseller gallonage?

A. Yes, sir. That is what I would mean. That is what I meant.

Q. Well, that is what I asked for. I wanted to be sure that your answer was responsive.

A. I am sorry.

Q. How was the expense in account 208 entitled "Credit Information Expense," allocated between bulk plant channels by the Respondent in its regular accounting procedure?

Mr. Hanley: There is no objection to the question,
7729 your Honor, so long as the witness can answer it, but there is an objection to the witness reading from any exhibit, what it contains, into the record.

The Witness: I do not wish to read from any exhibit. I was just going to look it up. I do not presume to remember all of this information in my head.

By Mr. Austin:

Q. Proceed.

A. It is allocated on an all-gallonage basis exclusive of direct shipment gallonage.

Q. How was the amount of the expense of that account charged to jobber, naphtha and gasoline, in Respondent's Exhibit 101 arrived at?

A. I did not hear your question. I am sorry. I was looking at this paper.

Q. How was the amount of the expense of that account charged to jobber, naphtha and gasoline, on Respondent's Exhibit 101 arrived at, Mr. Warmack?

A. The portion assigned to direct shipment business was determined on the basis of number of credit card tickets received from the jobbers.

Q. Are you referring now to the entire expense in account 208 or only to the credit card portion of that expense?

A. Only to the credit card portion of that expense.

Q. What portion of the expense of account 208
7730 is credit card expense?

Mr. Hanley: Well, that is objected to because of the fact that the witness has prepared an exhibit which the Court has received in evidence, being Commission's Exhibit 132, which discloses in detail the amounts.

Trial Examiner Ballinger: For the convenience of the record, the witness may answer. The objection is overruled.

(There was a short pause.)

Trial Examiner Ballinger: You may proceed.

The Witness: $11,960.97.

By Mr. Austin:

Q. Out of a total expense in the account of what?

A. $14,111.30.

Q. I would like to call your attention now, Mr. Warmack, to an answer given by you at page 5957 of the record in which you stated as follows:

"That is, at least 40 per cent, I believe, of the company's tank-wagon reseller business in the Detroit field is carried on through commission agents of the company, * * *."

I wish you would look at that portion of the answer which I read, Mr. Warmack, and I would like to know whether that is what you actually said or intended to say at the time you made the statement?

7731 A. I intended to say:

"At least 40 per cent of the company's tank wagon business in the Detroit field is carried on through commission agents of the company * * *"

and I did not intend to say:

"40 per cent of the company's tank wagon reseller business."

I did not intend to include in my answer the word "reseller."

Mr. Hanley: Your Honor, that is just for the purpose of making a correction in the record.

Trial Examiner Ballinger: Let the reporter read to the witness the answer just given by the witness.

(The reporter read the answer as above set forth.)

Trial Examiner Ballinger: Is that correct now?

The Witness: It is.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: Proceed.

By Mr. Austin:

Q. I would like to ask you this, Mr. Warmack—

Mr. Austin: Before I go further with that, I would like to call counsel for the Respondent attention to page 6126 of the record and ask him whether counsel will stipulate that the words "The Witness," preceding the statement
7732 in the center of the page be deleted together with the colon (:) immediately following.

Mr. Hanley: May we be off the record?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record. Are you ready to proceed?

Mr. Hanley: I am now ready to make my statement.

It may be understood that on page 6126 beginning on line 9, it may be understood that lines 9, 10, 11, 12, 13, 14, 15, and 16, appearing as shown there, appear as a statement by "Mr. Hanley," and that none of it is a statement by the witness.

By Mr. Austin:

Q. Now, Mr. Warmack, I would like to call your attention to an answer given by you at page 6810 in the record as follows:

"Answering question 1: The charges to this account, excluding charges directly applicable to automobile supplies, were allocated to channels on Respondent's regular accounting form 189 in creating a ratio of gallons sold by each channel to total gallons sold by all channels, excluding direct shipment gallonage during each month for the year 1940."

Is that what you—does that statement in the sten-
7733 ographic transcript correctly represent what you said, or that you intended to state at the time you made the answer?

A. No, sir. It does not. I should like to state for the record what I intended to say.

Trial Examiner Ballinger: You may do so.

The Witness: I intended to say:

"The charges to this account, excluding charges directly applicable to petroleum channels and to automobile supplies, were allocated to channels on Respondent's regular accounting form 189 by a ratio of gallons—"

Mr. Hanley: (Interposing.) By what?

The Witness: By a ratio of gallons.

Mr. Hanley: Thank you.

The Witness: (Continuing.) "sold by each channel to total gallons sold by or through all channels—"

Mr. Hanley: (Interposing.) "Through," instead of "by"?

The Witness: By or through.

Mr. Hanley: Thank you.

The Witness: (Continuing.) "excluding direct shipment gallonage during each month of the year 1940."

By Mr. Austin:

Q. Mr. Warmack, turn to account 506, account 514, on Respondent's Exhibit 101.

A. Yes, sir.

7734 Q. Account 506 is entitled "Losses By Dismantling—Abnormal—Other than ELA."

Account 514 is entitled "Losses by Dismantling—Out of Pocket Expense—Other than ELA."

I believe you testified on direct examination that there was a connection between those accounts, and that in your understanding the cash expenditures of account 514 were made in connection with the dismantling operation which gave rise to the expense in account 506—on your cross-examination, I believe you stated that there was a question in your mind as to whether, or, to put it differently, that you did not know whether the expense in those two accounts was or was not a marketing expense.

I would like to know, Mr. Warmack, whether in your opinion expenses going into those two accounts are similar to the expenses in the (A), (B), (C) accounts on Respondent's Exhibit 101 in that they are current operating expenses of the Respondent company in connection with its landlord and tenant function—

Mr. Hanley: (Interposing.) What account?

Mr. Austin: The A, B, C, accounts on Respondent's Exhibit 101.

By Mr. Austin:

Q. —or are they, or is there a difference between the current landlord and tenant expenses and the ex-
7735 penses in these two accounts?

Mr. Hanley: What number of A, B, C, accounts?

Mr. Austin: I refer to the A, B, C, accounts generally, because all of, or at least all of the accounts on Respondent's Exhibit 101 which represent, or rather, which include expense segregated by the Respondent to the lessee operations of the company are the (A), (B), (C), accounts, and carry the (A), (B), (C) after them.

Mr. Hanley: Then it may be understood that the question refers to all of the (A), (B), (C), accounts on Respondent's Exhibit 101?

Mr. Austin: That is right; as a class.

The Witness: I think these two particular items of expense; that is, account 506 and account 514 are somewhat different from the regular (A), (B), (C), expense accounts shown on Respondent's Exhibit 101; the (A), (B), (C) expense accounts representing a cost in each instance applicable to landlord activities of the company, as I understand it.

In the case of account 506, entitled "Losses by Dismantling—Abnormal—other than ELA," it is my feeling that that class of expense might properly be capitalized by the company. In other words, that—

By Mr. Austin:

Q. (Interposing.) Mr. Warmack, it might be—but should it be?

7736 A. Well, it in my opinion should be, Mr. Austin. We have an exhibit in the record that covers that particular item which amounts to $24,156.57. Largely it would not be a recurring item over the years unless the company were to engage continuously in the dismantling of its filling stations.

Q. Well, did you make an investigation into the expense going into this account as to whether it was an expense of a continuing nature or not?

A. Yes, sir. I inquired into that. This expense; that is, the expense in account 506, represents the difference between the capital investment of the company in filling stations dismantled during 1940 less depreciation already claimed by the company on those particular stations. In other words, it is a different—

Mr. Hanley: (Interposing.) Do you mean—

The Witness: (Continuing.) it is a difference in the investment—

Mr. Hanley: I would like to ask a question for clarification.

Mr. Austin: I would like to continue. I just have one more question on this particular line. I do not think it would assist very much to interrupt at this moment.

Mr. Hanley: Go ahead.

By Mr. Austin:

Q. Did you make any investigation, or did you
7737 have any information obtained by you in Detroit as
to whether or not there was any special program of remodeling filling stations being carried on by the Respondent company in 1940 or any other factual reason why this expense would be, if it was, higher in 1940?

A. Yes, sir. I made inquiry into that while I was in the company's offices in Detroit, Michigan. It was my understanding—

Trial Examiner Ballinger: No, no. What were you told?

The Witness: I was told, your Honor, that the company built during 1939 and 1940 especially a number of large filling stations, service stations which it in turn rents out to operators. I was told also that it was necessary for the company to engage in this activity of remodeling and rebuilding this kind of property in order to meet the competitive conditions; that is, competition of other petroleum companies.

Mr. Houghton showed me one of the stations that had been remodeled; that is, we passed by one large streamlined station, as I would call it.

Trial Examiner Ballinger: Is that not an expense that is recurring annually?

The Witness: Well, your Honor, it was my under-
standing that this was a rather large program,
7738 probably, during that particular time, say, coming
over from 1939 through 1940, and there would not be a large dismantling charge during other years.

Trial Examiner Ballinger: Would it not be of necessity fluctuating from year to year?

The Witness: I rather think that it would be incurred in a very minor way in some years. For example, if you build one hundred stations or twenty stations, and the next year you build two, or dismantle two, I mean, why, your cost would be quite abnormal, which the account shows. It is an abnormal cost. I think that is true of this account. I think that this particular class of expense might properly be capitalized.

By Mr. Austin:

Q. In your opinion, is the expense entered into these two accounts for 1940 a marketing expense of the Standard Oil Company (Indiana) for that year?

A. Mr. Austin, to answer your question, I have just stated that I thought that these two items should be capitalized, and that would mean that they are not expense at all. So, if they are not an expense, if they are a capital item, they could not be any kind of an expense.

Q. Now—

Mr. Hanley: (Interposing.) Now, a moment ago I
was not permitted to ask a clarification question,
7739 which your Honor finally did ask the witness, your
Honor, but, I think I would like to tie it up if I may
ask one further question?

Trial Examiner Ballinger: You may.

Mr. Hanley: Did you or did you not know whether these items of expense which you say should be capitalized are recurring expenses in the Standard Oil Company (Indiana)? Now, you can answer that "yes" or "no."

The Witness: Not of my knowledge.

Mr. Hanley: Do you know that?

The Witness: I—

Mr. Austin: (Interposing.) I want to know what counsel means by "recurring expenses"; does that mean the same kind of expense one year as another year?

Mr. Hanley: I adopted the language of the witness. He said they were not recurring expenses. I simply adopted his language.

Mr. Austin: He also told the Examiner that they might well differ in different years.

Trial Examiner Ballinger: He does not know any more about that than he does about the original proposition.

Mr. Austin: About what?

Trial Examiner Ballinger: About whether they will recur, and as to the amount.

Mr. Austin: Oh, I do not think that is important at all.

7740 Mr. Hanley: Of course, that merely represents counsel's opinion.

Mr. Austin: That is right.

Trial Examiner Ballinger: Proceed.

By Mr. Austin:

Q. Now, Mr. Warmack, you have stated that in your opinion these expenses should be treated as capital expenditures. That being true, would it not follow that there would be depreciation expenses upon the buildings—upon the remodeled stations from year to year?

A. Yes, sir.

Q. How would you treat that depreciation expense as to whether it is or is not a marketing expense?

A. I would treat it as a landlord expense. There is some question in my mind as to whether landlord expense is a marketing expense.

Q. That is what you explained yesterday?

A. That is correct. And I could not settle that question in my mind without making myself or reviewing a thorough study of this situation, if it were ever made; that is, of these non-lessee stations and lessee stations businesses.

Q. Mr. Warmack, have you made any investigation to determine what the procedure or practice of these large industrial corporations is in handling an expense such as that included by the Respondent in its account 52[illegible]
7741 You will recall that there were three types of expense going into that account as described by you. My question is, having testified as to how that expense was handled by the Standard Oil Company (Indiana), you have made any inquiry or have any information as to how it is handled by other companies?

Mr. Hanley: Now, please answer that "yes" or "no", Mr. Warmack.

By Mr. Austin:

Q. That is right. Answer it "yes" or "no."

A. Yes, sir. I have.

Q. What has been the nature of the investigation which you have made?

A. I have studied information in this Commission which has been received from several large companies which shows how they handled this particular class of expense.

Mr. Austin: I would like to have this document marked for identification, your Honor.

Trial Examiner Ballinger: The reporter will mark the document Commission's Exhibit No. 135 for identification.

(The document referred to was marked Commission's Exhibit 135 for identification.)

By Mr. Austin:

Q. I show you Commission's Exhibit 135 for identification, Mr. Warmack—

7742 Mr. Hanley: (Interposing.) May I have a copy of it?

Mr. Austin: I do not have it at the moment, but I will have it marked for identification and then you may look at it.

Mr. Hanley: The Respondent requests a copy of the exhibit.

Trial Examiner Ballinger: The exhibit has not been offered in evidence. Until it is, it is not necessary to furnish a copy to counsel for the Respondent.

Mr. Hanley: Perhaps not, your Honor. Maybe he is not going to ask any questions about it, but I just assumed he was. I will postpone my request until a more appropriate time.

By Mr. Austin:

Q. Mr. Warmack, I show you Commission's Exhibit No. 135 for identification and ask you if you will please describe it, and its contents, and what it is, if you know.

A. Commission's Exhibit No. 135 for identification is a document entitled "Forty-first Annual Report to the Stockholders of the United Fruit Company for the Fiscal Year 1940."

Q. Was that a report furnished to the Federal Trade Commission by the United Fruit Company, Mr. Warmack?

A. Yes, sir.

Q. Will you let me have it, please?

7743 A. Yes, sir.

Mr. Austin: I now hand this to you, Judge Hanley, so that you may inspect it. It is the only one that I have at hand at the moment. You are welcome to inspect it.

Mr. Hanley: No. I will wait until I am furnished with a copy so that I may inspect it as the examination proceeds. This would be of no service to me whatever.

Mr. Austin: I would like to know whether on the basis of the testimony already given by the witness in identifying this particular document, whether or not Respondent's counsel will concede that this document, Commission's Exhibit No. 135 for identification, is a copy of the "Forty-first Annual Report" of the United Fruit Company. If it is going to be questioned, why, it may be necessary for me to bring someone here to identify the report. On the other hand, if counsel is satisfied after making an examination of this, of its identity, that will save time.

Mr. Hanley: Respondent concedes nothing. I do not know what is in it. I have never seen it. I do not know anything about it. I have not made any investigation of the matter. It is purely a hearsay matter, in my opinion, so far as this case is concerned. I do not think it has any place in this case whatsoever.

I have asked for a copy and I have been denied the reception of a copy of the Exhibit.

7744 Mr. Austin: I show you this one. A copy is not as good as the original. The exhibit is better than the copy.

Mr. Hanley: Oh, I cannot keep the exhibit. That serves no purpose whatever.

Trial Examiner Ballinger: I do not think anything except the exhibit which has been presented and identified, but which has not been offered in evidence, has come before us as yet.

What is the present situation?

Mr. Austin: Well, my position would be that that is the annual report of the United Fruit Company which has some authenticity, and if it is not conceded, why, I apparently will not have to pursue the matter now, but at some later time.

Mr. Hanley: It is definitely not conceded, your Honor.

Mr. Austin: I cannot prove it at the moment.

Mr. Hanley: I think if counsel can ask his question, we can probably dispose of it before then.

Off the record?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record. You may proceed.

7745 By Mr. Austin:

Q. Now, another question, Mr. Warmack. This is a very general question which is suggested by some questions which were directed to you on cross examination, I believe, by both counsel for the Respondent and by the Examiner.

Assuming that a study was made of a particular marketing expense or class of expenses of a given company for a given year of several different accountants;

Assume that each of those accountants, after making his own cost study, decided upon a different method of allocating the expense in question;

Assume further that each different method of allocation if applied to the expense would produce a different result; which result would you accept, as, in your opinion, the most sound and correct?

A. I may not accept any of them.

Mr. Hanley: Probably not.

The Witness: But the one that I would probably accept would be the one that went to the greatest refinement in the studies made.

By Mr. Austin:

Q. What do you mean by "refinement"?

A. For example—I can give it best by an example—salesmen's salaries is a very excellent example, I think.

One of these accountants may have secured some 7746 estimates from the management;

One of the accountants may have secured some estimates by the sales supervisors;

One of them may have secured some estimates from the salesmen themselves;

Another one of the accountants may have, after securing all those things, tried to see and use all of the estimates in working out some measuring factor;

Another accountant may have had the salesmen make a tabulation of the number of calls that he made;

Another accountant may have had the salesmen make a tabulation of the number of calls, keeping information with respect to their travel time;

Another accountant may have had that tabulation made of calls together with information with respect to travel time, and in addition to that, information with respect to promotional activities that these salesmen carried on—in the instances I have given you, there would be a slight degree of greater refinement in each of the studies than would have been undertaken by the first accountant that I spoke of—;

Another accountant in addition to all these things I have just named, may have had all salesmen keep a time report with respect to customers, or to groups of products;

and in addition, secure information with respect to travel time and to customers—

7747 Mr. Hanley: (Interposing) If your Honor please, I just do not mind the witness answering the question—

The Witness: May I finish the answer?

Trial Examiner Ballinger: Let the witness finish his answer.

Mr. Hanley: Do you regard that as responsive, your Honor?

Trial Examiner Ballinger: Let him finish his answer.

The Witness: (Continuing.) The last outline given as to what probably would be done by that accountant, the result in my opinion that he would arrive at by his studies would have gone, in my opinion, to a greater refinement. He would have gone to a greater extent in his effort to determine the true result and, in all probability, it would be the figure that he arrived at that I would accept as an accountant.

Trial Examiner Ballinger: Mr. Warmack, is not the final analysis, after he pursued any of these studies that you have outlined, that the result would be at best an approximation? Would it not?

The Witness: Well, that is an opinion, your Honor,
but I certainly do not think that it could be regarded as an
approximation if you want to and went to as great a
refinement as I have outlined in the last instance
7748 just now. I think that is the closest approach to that
that accountants can get at in such a study.

Mr. Hanley: Respondent's counsel now moves to strike the answer of the witness to the second preceding question after the first sentence thereof, on the ground that it is not responsive;

That it is purely a voluntary statement;

That the examples used by the witness in defining what he thinks an indeterminate number of accountants might do, distorts the entire question;

And that the whole answer to the question may be and is included in the first statement made by the witness.

Trial Examiner Ballinger: The motion to strike is denied.

Mr. Austin: May we be off the record, if your Honor please?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. Mr. Warmack, commencing at page 6951 of the record, you were asked a question which was answered in piecemeal, and I believe there was considerable colloquy and argument between the witness and counsel regarding your understanding of the question and what counsel for the Respondent meant.

7749 The question was as follows:

"Q. * * * Has the Respondent resorted to a gallonage allocation factor in any case except where the expense item was of an overall nature?"

The question, of course, referred to the allocations used on Respondent's Exhibit 101.

Mr. Austin: I believe that is conceded, is it not, Judge Hanley, that you were referring to that cost differential?

Mr. Hanley: It is conceded that both the witness and I were talking about the cost study.

Mr. Austin: Yes.

By Mr. Austin:

Q. I would like to ask you, Mr. Warmack, whether you, having read this testimony—have you read it?

A. Yes, sir.

Q. Whether you feel that the testimony as given sets forth your answer to the question or whether you would like to answer the question any further at this time?

A. Well, I do not remember what I said.

Mr. Austin: May we be off the record in order to give the witness time to examine the record?

Trial Examiner Ballinger: For that purpose we will be off the record.

(There was a discussion off the record.)

7750 Trial Examiner Ballinger: On the record.

The Witness: I do not think that the question was ever properly answered, due to the fact that I did not exactly understand what Respondent's counsel meant exactly by the term "overall nature," when he gave his example of the president's salary.

In my opinion, some of the accounts on Respondent's Exhibit 101 were spread on a gallonage basis, and which accounts were not and could not be, in my opinion, considered as overall accounts.

I will give you an example of what I mean; by referring you to the very account that we were talking about some minutes ago. That is account 506—"Losses by Dismantling —Abnormal—Other Than ELA." I certainly do not think that is an account of an overall nature.

By Mr. Austin:

Q. Is account 111 allocated in part on a gallonage basis?

A. Yes, sir.

Q. Do you consider that an account of an overall nature?

A. No, sir. I do not. And there may be several others on here. I do not remember just which ones they are—

Q. (Interposing.) If you can remember, state them. If not, we will pass along.

A. —they may, or that may be a—that may be of an overall nature or may not be.

7751 Q. Look at it.

A. Well, I was just trying to run down there to see if I could get an answer to your question there, but there are some on here that are of an overall nature, and there are also some on here of an overall nature that were allocated on the basis of gallonage.

Q. That is the only thing I wanted to find out.

A. Yes, sir.

Q. In answer to that question.

A. Yes, sir.

Trial Examiner Ballinger: Will not those accounts that he has not mentioned already, portray in the record; were they not and are they not at the present time portrayed in this record?

Mr. Austin: I am not sure that I understand your Honor. You say "are not those accounts that he has not mentioned already portrayed in the record." I am not sure.

Trial Examiner Ballinger: He has not mentioned all of the accounts in that record that are not based upon an all gallonage basis?

Mr. Austin: No, your Honor. That is the question which was asked by Judge Hanley which was whether there were any accounts which the Respondent had allocated on an all-gallonage basis which were not expenses of an 7752 overall nature, to which I was addressing myself here, rather than that question.

Now, the witness now says, yes, there were some accountants not of an overall nature. He has not made a list of those accounts, and as far as I am concerned I do not care whether he has or not.

Trial Examiner Ballinger: I am sure that Judge Hanley will want to know.

Do you, Judge?

Mr. Hanley: I struggled, as I note now from looking at this record for many pages trying to get an answer to this question. So, as far as I am concerned, I think the whole record up to this minute just simply proves that the witness does not know what is meant by "expense of an overall nature." And I think I am going to be content with that. I will prove that with my own witnesses.

Trial Examiner Ballinger: Proceed.

Mr. Hanley: Anything else?

Mr. Austin: Your Honor, those are all the questions that I have for Mr. Warmack at the moment.

The witness tells me that some of the most recent volumes of his testimony on cross-examination which he has not had the opportunity to read over yet—I think there are one or two or three of them, and inasmuch as we are pausing for Mr. Houghton for tomorrow, I would not
7753 want to be precluded from putting Mr. Warmack back on the stand for one or two more questions if it should be desired, although at the present time I have nothing in mind, and I do not think there will be anything.

Trial Examiner Ballinger: With that reservation, the redirect examination is concluded?

Mr. Austin: Yes, sir.

Mr. Hanley: Judge, I do not have any objection to the announcement of counsel, but I do want Mr. Warmack concluded before Mr. Houghton takes the witness stand. I am of the opinion that there will not be any recross examination. I have one question which, by way of clarification, I would like to ask, if I may ask it as an interposing question?

Trial Examiner Ballinger: Proceed.

Mr. Hanley: But I do want it understood that Mr. Warmack will be finished tomorrow morning before Mr. Houghton takes the witness stand, if he is going to be interrogated further.

Trial Examiner Ballinger: Proceed.

Mr. Hanley: Mr. Warmack, you stated that you would allocate credit card costs between tank wagon and jobber, naphtha and gasoline columns on a gallonage basis.

Is that based upon a factual and objective cost study of the manner in which these costs are incurred?

The Witness: That is not.

7754 Mr. Hanley: That is all.

Mr. Austin: I do not have anything further.

Mr. Hanley: If I may have just a few moments, your Honor, I can tell you perhaps whether we will have anything further for the witness.

Trial Examiner Ballinger: We will be off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: I will not announce that there will be no further recross examination.

Trial Examiner Ballinger: Since tomorrow is Saturday, what time do you gentlemen desire to start in the morning?

Do you now desire this witness excused?

Mr. Hanley: Yes, sir.

(Witness excused.)

Mr. Hanley: If your Honor please, I now move you, sir, that the hearing adjourn to reconvene tomorrow morning in this same room at nine o'clock a. m.

Mr. Austin: Did you say nine o'clock?

Mr. Hanley: Yes.

Trial Examiner Ballinger: The motion is granted.

And now, at 4:30 p. m., the hearing is adjourned to reconvene at 9:00 a. m., in Room 532, Federal Trade
7755 Commission Building, Washington, D. C., August 1,
1942.

(Whereupon, at 4:30 p. m., July 31, 1942, the hearing in the above-entitled matter was adjourned.)

7756

Room 532, Federal Trade
Commission Building,
Washington, D. C.,
Saturday, August 1, 1942.

Met, pursuant to notice at 9:00 a. m.

Before:

Webster Ballinger, Trial Examiner.

Appearances:

Cyrus B. Austin, Esq., attorney for the Federal Trade Commission.

Harold R. Hanley, Esq., (910 South Michigan Avenue, Chicago, Illinois), appearing for the Respondent Standard Oil Company of Indiana.

7757

PROCEEDINGS.

Trial Examiner Ballinger: Come to order.

The hearing in Docket No. 4389, case entitled "In the Matter of Standard Oil Company (Indiana)" is reconvened pursuant to notice at 9:00 a. m., August 1, 1942, in Room 532, Federal Trade Commission Building, Washington, D. C.

The last hearing was held at this same place, July 31, 1942.

The reporter will note counsel for the Commission and Respondent present.

You may proceed.

Mr. Austin: Your Honor, there are one or two matters which I have to discuss with the witness, Mr. Warmack, before I can determine whether further testimony is necessary, I am willing to do that now, if your Honor please, or I am willing to wait until Monday, but in any event, of course, the witness is not dismissed. I am perfectly willing to accommodate Mr. Houghton, and to interrupt to take the testimony of Mr. Houghton.

Mr. Hanley: Respondent objects to any further continuances on behalf of the Commission. The Respondent requests the Court to instruct counsel for the Commission either to rest his case or to put the witness on the stand and finish.

Mr. Austin: Oh, well, I am not resting my case 7758 with this witness. I have several other witnesses to call. You asked if you could interrupt our case now to put Mr. Houghton on today as a matter of accommodation to Mr. Houghton. I was willing to accede to your request for that purpose only. I am by no means finished with our case.

Mr. Hanley: Well, I do not want to put Mr. Houghton on until you finish with Mr. Warmack. I am putting Mr. Houghton on in surrebuttal in connection with the testimony of Mr. Warmack.

Trial Examiner Ballinger: How long will it require for the conference with Mr. Warmack?

Mr. Austin: Well, I should judge fifteen or twenty minutes, I think. It would take about that time. I request a recess for that purpose.

Trial Examiner Ballinger: The request is granted. We will take a recess for fifteen minutes.

(A short recess was taken.)

Trial Examiner Ballinger: Come to order. You may proceed.

Mr. Austin: I will recall Mr. Warmack for further redirect examination.

WILLIAM J. WARMACK resumed the stand and testified further as follows:

7759 *Redirect Examination (Continued) by Mr. Austin.*

Q. Mr. Warmack, referring to page 7349 of the record, the statement appears beginning at line 19 of that answer:

"They are costs, they are just costs, many of which are general costs, among which we have the general office costs. They do not afford a basis for a cost differential."

I would like to know whether the meaning of that sentence is, or whether you intended to state that the general office costs of the Respondent did not afford a basis for the cost differential?

Mr. Hanley: That is objected to as an improper question. The statement speaks for itself. The question does not alter the meaning of the statement made by the witness.

Trial Examiner Ballinger: The question asked is merely for the purpose of clarification or possible correction.

The objection is overruled.

The Witness: Line 20; that is, line 19, 20 and 21—line 19 beginning with "They are costs—" I will read the way—

Trial Examiner Ballinger: (Interposing.) The counsel for the Commission has just read that. Will you state your corrections?

7760 The Witness: I was going to read it the way it should sound.

By Mr. Austin:

Q. Read it as it should be.

A: "They are costs, they are just costs, many of which are general costs, among which we have some of the general office costs." I believe that corrects it.

Mr. Hanley: Now, is it to be understood that you are changing your answer?

The Witness: No, sir.

Mr. Hanley: Well, if your Honor please, what are we to understand from this kind of testimony?

The Witness: I am just stating that that is the way I intended to state it in the beginning. I have not changed anything.

By Mr. Austin:

Q. Mr. Warmack, your answer is what appears on here.

A. I see.

Q. And that just dictated is the way that it should be?

A. I am changing the answer as shown at page 7349 to the way that it was intended that it should be.

Mr. Hanley: All right.

Trial Examiner Ballinger: Now, in substance, just what is the change?

The Witness: Well, your Honor, line 20 reads:

7761 "among which we have the general office costs."

It should read, in part:

"Among which we have some of the general office costs."

Mr. Hanley: Well, just a moment. Let me see what that question is.

Trial Examiner Ballinger: Very well.

(There was a short pause.)

Mr. Hanley: May I ask a question now, your Honor?

Trial Examiner Ballinger: You may.

Mr. Hanley: You have now changed your answer on page 7349 where you referred to general office costs, by modifying that term to "some general office costs"?

Does that mean that you now grant that certain of the general office costs are costs which afford a basis for a price differential?

The Witness: Yes, sir. It is my opinion and has been right along that some of the general office costs, if separated properly, should afford and in all probability would afford a cost differential.

I misunderstood your comment just now, Mr. Hanley, when you asked me if I were changing my answer. I thought that you asked if I was changing my opinion.

Trial Examiner Ballinger: Any further questions?

By Mr. Austin:

7762 Q. Regarding credit cards, Mr. Warmack. One of the Respondent's credit cards is produced in evidence as Commission's Exhibit No. 21. On it it has listed, in addition to the name of the Respondent, the names of a number of other oil companies at whose outlets the credit card may be presented and honored.

I believe you stated on your cross-examination that one of the purposes of the Respondent in issuing the credit card was to hold the customer to the issuing company.

Does that mean that the customer is held or retained as a customer by all of these companies, or just by the issuing company, or can you elaborate that statement a little further?

Mr. Hanley: That is objected to unless the witness knows. He has already testified that he does not know the mechanics of the handling of credit cards.

Trial Examiner Ballinger: Have you any knowledge with reference to the mechanics of handling credit cards?

The Witness: Not of my own knowledge, your Honor. I have a general knowledge. I believe that I have stated on many, many pages of the record my understanding of the situation.

Trial Examiner Ballinger: The Examiner sees your point.

Mr. Austin: I have asked the witness' opinion, 7763 anyway, upon the effect of credit cards on consumer acceptance; at least, that is the purpose of the question. It is not directed to any particular practices of Respondent in handling credit cards.

Trial Examiner Ballinger: Have you any personal knowledge with reference to that matter?

Mr. Hanley: Just a moment.

Trial Examiner Ballinger: Yes?

Mr. Hanley: That is further objected to as calling for the conclusion and opinion of the witness as to whether the customer would be held by any particular company.

The witness has already testified and has based his opinion in respect of credit cards upon the statement of opinion that the credit card holder is at liberty to and does purchase from anybody, and he cannot possibly answer this question in view of that expression of opinion unless he changes that opinion.

Trial Examiner Ballinger: The ruling upon the objection will be deferred until the witness answers the question directed to him by the Examiner.

The Witness: May I hear that question, your Honor?

Trial Examiner Ballinger: Read the question.

(The reporter read the following:

"Trial Examiner Ballinger: Have you any personal knowledge with reference to that matter?") 7764

The Witness: Not of my own knowledge, your Honor, no more than I have reviewed, and heard in these records and hearings.

Trial Examiner Ballinger: The objection is sustained.

Mr. Austin: Your Honor, I will try to frame the question again.

By Mr. Austin:

Q. Mr. Warmack, did you make an investigation of credit card costs while you were in Detroit?

A. Yes, sir.

Q. Did you go into that with Mr. Houghton while you were out there?

A. Yes, sir.

Q. Did you study the expense of the company in that connection, in the way in which they were handled?

A. Yes, sir.

Q. Are you familiar with the nature of the credit cards issued by the Respondent company?

A. Yes, sir.

Q. Are you familiar with the way in which the credits arising from the use of those credit cards are handled by the Respondent company in their accounting procedure?

A. I do not understand what you mean by "credits arising".

7765 Q. Are you familiar with what happens when a customer presents a credit card and that charge ultimately reaches the books of the Respondent company?

A. Yes, sir. That is, I have a general knowledge of it.

Q. Well, you went into the subject? Did you not? Did you go into that subject while you were in Detroit, Mr. Warmack?

A. Yes, sir.

Q. Then I would like to have your opinion as an accountant regarding the effect of the use—rather, regarding the effect of the use of the credit cards as handled by the Respondent, and the nature of that expense in connection with the effect of the credit cards upon the Respondent's business.

Mr. Hanley: Well, now, just a moment, Mr. Warmack.

That is objected to as repetitious and not proper redirect examination, the witness already having fully expressed an opinion—unless this question is intended to elicit an answer from the witness which indicates a change of opinion on the part of the witness.

Trial Examiner Ballinger: The objection is sustained.

Mr. Austin: And on what ground?

Trial Examiner Ballinger: Unless he desires to express an opinion different from that previously given.

Mr. Austin: Do I understand, your Honor, that I 7766 am not entitled to examine this witness on matters which were raised by the Respondent counsel on cross-examination?

Trial Examiner Ballinger: The witness has heretofore testified fully with reference to this.

Mr. Hanley: He has testified to that on direct examination.

Mr. Austin: Your Honor, I would like to have a fifteen minute recess. I want to refer to the testimony and read it into the record.

Mr. Hanley: The Respondent objects to any recess, as requested by counsel for the Commission, on the ground that it is an unfair, prejudicial and unjust hardship upon the Respondent.

Trial Examiner Ballinger: The Examiner will ask the witness a question or two:

Mr. Warmack, are you familiar with the testimony you have previously given upon this point?

The Witness: Yes, sir. I believe that I am, your Honor.

Trial Examiner Ballinger: Have you not fully covered this matter in your previous testimony?

The Witness: Well, sir, I believe there are some matters that were not fully covered. I can only answer questions propounded, your Honor.

Trial Examiner Ballinger: That is one of the mat-
7767 ters that was not fully covered?

The Witness: In my opinion, yes, sir.

Trial Examiner Ballinger: The Examiner will then reverse his previous ruling and permit the witness to answer.

The Witness: Now, may I hear the question, your Honor?

Trial Examiner Ballinger: Before you answer the question, the Examiner would like to inquire of counsel how this witness, merely because of the fact that he is an accountant, is in any better position to express an opinion that any one else would be with reference to this matter?

Mr. Austin: Well, the reason I wanted to look up the testimony, your Honor, is that I think that we had a considerable lot of cross-examination as to the witness' reasons with regard to these matters. It is into that particular matter that I wish to inquire.

Trial Examiner Ballinger: Do you think that the mere fact that this witness is an accountant enables him to give a better or more dependable opinion than any layman?

Mr. Austin: Well, I do not know, your Honor, but I do know that he was cross-examined as to his reasons and as to his theories about credit cards, and their effect as consumer advertising, and his reasons for stating that this cost would not afford a cost differential. I think that some
7768 of that was not clear.

As a matter of fact, the witness, as I understand it, did say that he wanted to be given a chance to clarify that testimony.

Trial Examiner Ballinger: It does not appear to the Examiner that this is a question upon which any expert can express an opinion except and unless he had been out in the field and had actual experience. However, the witness may answer.

The Witness: May I hear the question, if your Honor please?

Trial Examiner Ballinger: Read the question.

(The reporter read the following question:

"Q. Then I would like to have your opinion as an accountant regarding the effect of the use—rather, regarding the effect of the use of the credit cards as handled by the Respondent, and the nature of that expense in connection with the effect of the credit cards upon the Respondent's business.")

Mr. Hanley: I will add to my objection that the affirmative testimony that was given by the witness demonstrated his legal incompetency to answer that question as to the effect of the Respondent's handling of credit cards.

Trial Examiner Ballinger: The Examiner is of the opinion that the witness' opinion when expressed is of
7769 little or of no evidentiary value in view of the fact
that he has been asked similar questions before.

The witness may answer.

By Mr. Austin:

Q. Do you recall the question?

A. No, sir.

Mr. Austin: This goes to his reasons for his accounting testimony in the distribution of the expense.

Trial Examiner Ballinger: You have said that you were not familiar with the question. Do you desire it read?

The Witness: Your Honor, I should like to hear the question read again.

Mr. Hanley: Just what question is that?

Mr. Austin: It is the pending question before this discussion took place.

Trial Examiner Ballinger: Read the pending question.

(The reporter read the pending question as follows:

"Q. Then I would like to have your opinion as an accountant regarding the effect of the use—rather, regarding the effect of the use of the credit cards as handled by the Respondent, and the nature of that expense in connection with the effect of the credit cards upon the Respondent's business.")

The Witness: May I hear that again, please?

7770 (The reporter again read the question.)

The Witness: I think I would like to have that again, slowly.

(The reporter again read the question.)

The Witness: It is my opinion that the effect of the use of the credit cards by the Respondent would be for the purpose of tying customers to the company's products, and inviting, in addition to that, the customers of other companies who reciprocate in the issuance of these credit cards, to the use of the Respondent's products.

It is my understanding, and I believe that the records show that some other oil companies; that is, petroleum companies reciprocate with the Respondent company in the issuance of credit cards.

It seems to me that there is an additional benefit to the company in the issuance of these credit cards.

I feel and it is my opinion that when credit privileges are afforded to the buying public, the automobile driver, that it serves to increase the sales of the companies generally. I know as a matter of fact that in some instances where credit privileges are afforded, many people take advantage of those credit privileges.

For example, on Saturday afternoon, before pay day on Monday, why, a credit card holder may buy five gallons of
gasoline on the credit card that, if they did not have
7771 the credit card, they may not buy. In other words,
if they did not have the credit card they may not buy
that gasoline. That is a very simple illustration, I think, but it goes to the benefit that accrues to the company issuing the credit card.

Does that answer your question, Mr. Austin?

By Mr. Austin:

Q. I—

Mr. Hanley: (Interposing.) Respondent now moves to strike the entire answer to the question for all of the reasons stated in the several objections to the question;

And for the further reasons that it does not appear that the statement made by the witness is explanatory or in amplification of the opinions, or in modification of the opinions which he has heretofore expressed, and that the matter as stated by the witness is purely repetitious of matter already stated by him on both his direct examination and his cross-examination;

Further that his answer has no probative value;

Further for the reason that it is not proper redirect examination.

Further, that the affirmative testimony of the witness has been to the effect that he made no objective and factual cost study or any cost study at all about credit cards, and that he is not legally entitled to express any opinion.

7772 Trial Examiner Ballinger: The motion to strike is denied.

Mr. Austin: That is all I have, if your Honor please.

Trial Examiner Ballinger: Counsel for the Commission now rests his redirect examination of this witness?

Mr. Austin: Yes, sir.

Mr. Hanley: Does that rest your case?

Mr. Austin: No. Definitely, I do not rest my case.

Mr. Hanley: There is no cross-examination.

Trial Examiner Ballinger: The witness is excused.

(Witness excused.)

Mr. Austin: If your Honor please, I would like to make a motion at this time.

Trial Examiner Ballinger: Proceed.

Mr. Austin: Yesterday, I offered some information through the witness Warmack, the information being the facts and figures appearing in "Moody's Industrial Manual."

Your Honor ruled that such testimony was inadmissible, and stated that the information as given in Moody's Industrial Manual would not be admissible unless and until it was proved and shown that the information came from the Respondent, the information in this case being information regarding the Respondent, Standard Oil Company (Indiana).

7773 In view of that ruling, I am encouraged to ask your Honor, and do now so move to strike Respondent's Exhibit No. 3.

Respondent's Exhibit No. 3 is a chart purporting to show automobile production for the years 1936, 1937, 1938, 1939, 1940. It was introduced through Mr. Boatwright, who testified that the information which was used for compiling the chart was obtained from some Federal Reserve Board or Federal Reserve Bank publication.

There was no proof offered whatsoever that the information in the Federal Reserve publication was obtained from the automobile manufacturers.

In my opinion, Moody's Manual is just as well recognized as a source of information as the Federal Reserve publication which was used as the basis for this exhibit.

However, although I objected upon that ground at the time, the exhibit was admitted by your Honor over my objection with leave, or at least the right saved to me to check the chart against the figures in the Federal Reserve publication. Anticipating a similar ruling yesterday, I had the Moody's publication right here, although the information offered yesterday in regard to the Respondent, I felt that the Respondent would have ample opportunity to check the correctness of that information.

However, I wish to say that in my personal opinion,
7774 I think your Honor's ruling yesterday was correct, and I believe that the same ruling should have been made in connection with Respondent's Exhibit No. 3.

Therefore, since the information used as the basis for the production of this chart was never substantiated and never even offered, I now move to strike Respondent's Exhibit No. 3 from the record.

Trial Examiner Ballinger: The Examiner will take the motion under advisement.

Mr. Hanley: If your Honor has the slightest idea of ruling favorably on the motion of counsel for the Commission, the Respondent desires to be heard.

Trial Examiner Ballinger: The Respondent will be afforded an ample opportunity to be heard.

Mr. Hanley: I assume now, your Honor, that this is just like the objection to the exhibit when it was put in, that nothing has been changed as a matter of record?

Trial Examiner Ballinger: The Examiner is merely taking it under advisement so that he may examine the record as to what it is.

Mr. Hanley: We do not want to try this whole lawsuit all over again. We do not want to have counsel explore each one of the Examiner's rulings. If so, I doubt if we will ever get done.

Have you finished, Mr. Austin?

7775 Mr. Austin: Yes, sir. I think the rulings are inconsistent. I think that the Examiner should be consistent one way or the other.

Trial Examiner Ballinger: It was agreed that the Respondent might interrupt the Commission's surrebuttal this morning in order to put on a witness.

You may call your witness.

Mr. Hanley: Before doing so, if your Honor please, the witness Warmack having been finally excused, the Respondent renews all of its several motions to strike all of the testimony of the witness Warmack, and renews all of its several motions to strike such testimony in part for all of the reasons assigned at the time the motions were made.

Now, for the further reasons that the affirmative testimony of the witness Warmack discloses that he made neither a factual nor objective cost study, nor any study at all of any substantial character of the accounting problems involved, and that his affirmative testimony indicates that whatever survey of the accounting problem involved may have been that he made was so scanty, lax, and superficial as to give him no knowledge of the factual situation.

Further, that this motion does not go merely to the weight or credibility that should be accorded the witness' testimony, but goes to the legal competence of the witness to testify.

7776 It is earnestly urged by the Respondent that the affirmative testimony of the witness discloses that he lacks knowledge of the accounting problem involved to a point where he becomes legally incompetent to express any opinions at all relative to the accounting problems involved in this proceeding.

It is understood that the objection and motion going to the legal competence is properly directed and addressed to the Examiner as distinguished from the Commission.

Trial Examiner Ballinger: The several rulings of the Examiner on motions by counsel for the Respondent during the course of the testimony of the witness Warmack are reaffirmed, and the motion to strike in its entirety is denied.

You may proceed.

LEONARD W. HOUGHTON was thereupon called as a witness for the Respondent and, having been first duly sworn, testified as follows:

Direct Examination by Mr. Hanley.

Q. Please state your name.
A. Leonard W. Houghton.
Q. Please give your residence address.
A. 8939 South Throop Street.
Q. And the city?
7777 A. Chicago, Illinois.
Q. Mr. Houghton, by whom are you employed?
A. I am employed by the Standard Oil Company (Indiana).

Q. Mr. Houghton, are you an accountant?

A. Yes, sir.

Q. Have you had formal training as an accountant?

A. I have.

Q. In what school?

A. I graduated from the School of Business of the University of Wisconsin.

Q. How long have you been associated with the Respondent company, Standard Oil Company of Indiana?

A. Approximately twelve years.

Q. During that time, has your work involved the accounting business of the company?

A. Generally, yes.

Q. During the early part of 1942, did you have an assignment in the Detroit office of the Respondent company in connection with the accounting problems involved in this lawsuit? If so, what was it?

A. Yes. I received an assignment to go to Detroit to meet Mr. Warmack, accountant for the Federal Trade Commission, and there to explain to him to the best of my ability the procedures used in establishing this cost study and differential.

7778 Q. Did you do that?

A. I did.

Q. How long were you there while Mr. Warmack was there?

A. Oh, approximately six weeks.

Q. During that time did Mr. Warmack ask you questions about the company's accounting procedure?

A. He did.

Q. Did you answer them?

A. Yes, sir. To the best of my ability, I did.

Q. Have you read the testimony of Mr. Warmack, that Mr. Warmack gave in this proceeding?

A. I have.

Q. Have you noted the numerous times that Mr. Warmack said that he asked you for documentary evidence, and that it was refused him?

A. I have.

Q. Was there any occasion when Mr. Warmack made a request of you for documentary evidence that it was refused him? If so, please state what that incident was.

A. Well, Mr. Warmack asked me for documentary evidence relative to the establishment of the distribution of time as applied to allocating salesmen's cost. I did not have any documentary evidence of that kind, therefore I was unable to furnish it to him.

Q. Is that the only instance?

7779 A. That is the only one to my recollection.

Q. Do you remember the incident in the Detroit hearing, in the spring of 1942, when, at the request which was made either by Mr. Warmack or Mr. Austin, a couple of truckloads of filing cases were taken into the court room?

A. I do.

Q. Do you recall that they were later returned to the offices of the company in Detroit?

A. Yes, sir.

Q. Did Mr. Warmack, at any time, so far as you know, look at any of that documentary evidence?

A. To my knowledge, Mr. Warmack did not.

Q. Mr. Warmack was asked this question and gave the following answer:

"Q. Mr. Warmack, in your sojourn in Detroit and in Chicago, did you request of Mr. Houghton, or any one else representing the Respondent company, information as to the use of mileage applicable to these trucks as a factor for the purposes of allocation of expense?

"A. I did."

What is the fact as to whether or not Mr. Warmack ever asked you for that kind of information, documentary or otherwise?

Mr. Austin: What page of the record is that on?

Mr. Hanley: 7281.

7780 By Mr. Hanley:

Q. Proceed with your answer.

A. Well, of course, I cannot speak for any one else, but to my knowledge Mr. Warmack never discussed this basis of allocation with me.

Q. On the same page, Mr. Warmack was asked this question:

"Q. However they may be keeping them, did you ask Mr. Houghton or Mr. Boatwright, or Mr. Gillis, or anybody —or anybody representing the Respondent company, as to the experience of the Respondent company in the matter of allocating these things on the basis of mileage as distinguished from gallonage?

"A. I do not remember requesting any information with respect to that particular point; that is, documentary information. I rather think that probably it was discussed by Mr. Houghton and I. We tried to discuss every one of these accounts, or most of them, and the propriety of the allocations used by the Respondent company in working up its cost differential of 1.51 per gallon—was the matter of discussion."

Were there any discussions between you and Mr. Houghton relative to that subject?

Mr. Austin: I think the record should state what the subject is. I do not know that that is clear.

Mr. Hanley: Mileage.

7781 Mr. Austin: Well—

Mr. Hanley: As distinguished from gallonage.

Mr. Austin: On the contrary, I think this part of the record refers specifically to the mileage of trucks operated by commission agents. I think that is shown clearly that discussion is of account 055 and account 025.

Therefore, I would like to know whether that is understood by the witness, and was understood by the witness in his previous answer to this.

By Mr. Hanley:

Q. Well, now, Mr. Houghton, after you have heard the question fixed up by Mr. Austin, can you answer it?

A. That was my understanding, Mr. Hanley, that this mileage question of allocating costs applied to these accounts mentioned by Mr. Austin.

Q. Was there any such discussion?

A. To my knowledge there was none.

Q. He just did not ask you anything about it? Is that true?

A. That is my recollection.

Mr. Hanley: Page 5936 of the record, if you want to see it, Mr. Austin.

Mr. Austin: Thank you.

By Mr. Hanley:

Q. At page 5936 of the record, Mr. Warmack was asked the following question by the Trial Examiner, and 7782 made the following answer:

"Trial Examiner Ballinger: Do you mean that you were not furnished any information either documentary or oral?—"

Mr. Austin: Just a moment.

Mr. Hanley: All right.

By Mr. Hanley:

Q. (Continuing.) "The Witness: I was not. I would get a lot of arguments, Judge, but what I wanted to know was if the gallonage allocation is sufficient, either gallonage between tank wagon reseller, tank wagon consumer, and other methods or if a part of the costs are allocated in them what part of them between tank wagon reseller and tank wagon consumer, which I believe will be the case of this triple naught account.

" 'Well, why?'

" 'Well, why? We do it that way.'

" 'Well, why? What did you ever do to prove that that is the right way to do it, from a cost accounting standpoint?' "

"Mr. Hanley: Prove it to you.

"The Witness: 'And if you did do anything where is the documentary evidence of what you did?'

"And I got nothing."

Did anything like that ever happen?

7783 A. Well, Mr. Hanley, to the best of my recollection, Mr. Warmack did not ask me for documentary evidence as the basis of allocating cost.

He did ask me for an explanation, and I gave it to him to the best of my ability, however. I do not presume and did not then presume it was going to take the form of an argument, as I merely tried to explain why we used that method of allocation.

Q. Did it take the form of an argument?

A. I do not think so. In my opinion it did not.

Q. Did you understand that you answered his questions sufficiently and satisfactorily to him?

A. Well, of course, I cannot answer as to whether it was satisfactory to him or not. At the time I thought I did.

Q. Did you understand that you were giving him all the information he asked for, whether the information was satisfactory or not?

A. That is correct.

Q. Mr. Warmack was asked this question and made the following answer—

Mr. Hanley: This appears at page 6604 of the record, if you wish to follow it, Mr. Austin—

By Mr. Hanley:

"Q. Mr. Warmack, I do not want your conclusions about what you asked. Please state exactly what you 7784 said.

"A. I said:

" 'Mr. Houghton, will you please furnish me with any documentary evidence which you may have here, or documentary information which will support your statement on Respondent's Exhibit 31-L, which reads:

" ' "However, not all the time of these individuals was spent on calling on Ned's accounts. It was estimated by Mr. Rupagh and Mr. Blough that Robinson spent 35 per cent of his time at Ned's, of which 7 per cent was on gasoline; Moulenberg spent 25 per cent, of which 5 per cent was on gasoline; Coutchie spent 25 per cent, of which 5 per cent was on gasoline." ' "

" 'After calling Mr. Houghton's attention to that, I asked him the question:

" ' "What do you have in the way of documentary information which will support those estimates?" ' "

Did Mr. Warmack ever ask you that question?

A. Mr. Hanley, that conversation is entirely foreign to me. As a matter of fact, that subject to the best of my recollection was not discussed between Mr. Warmack and myself.

As a matter of fact, the working papers on that exhibit were in the Chicago office on Mr. Boatwright's desk, or at least in Mr. Boatwright's office. I would not have even had that with me in Detroit.

7785 Q. That is, relating to Exhibit 31?

A. That is correct.

Q. Exhibit 31, being the half cent differential set up in Ned's service stations?

A. Yes, sir. That is correct.

Q. Mr. Warmack was asked the following question and made the following answer—

Mr. Hanley: Mr. Austin, that is at page 7226 of the record.

By Mr. Hanley:

Q. "Q. Did not you tell Mr. Houghton in Detroit last spring, when you and he were both there, that you had made some calculations or study and that you had determined or become satisfied that there was only two one-hundredths of a cent per gallon difference in marketing cost between the gallonage handled by commission employees on the one hand, and salaried drivers on the other hand?

"A. In answer to that, I can give this: The answer is—no. Positively no. No such study had ever been completed. Mr. Houghton and I did make a calculation, or tried to."

Did or did not Mr. Warmack tell you in substance that he had determined or become satisfied that there was only two one-hundredths of a cent per gallon difference in
7786 marketing costs between the gallonage handled by commission employees on the one hand, and salaried drivers on the other hand?

A. He did.

Trial Examiner Ballinger: Did he tell you that after he had made the computation?

The Witness: After he had made the computation.

By Mr. Hanley:

Q. He said further in this answer:

"Mr. Houghton and I did make a calculation, or tried to."

Did you ever make any calculation of that kind with Mr. Warmack?

A. I did not make a calculation, myself. Mr. Warmack made a calculation in which he asked me about each account on form 189 as to whether it would be most applicable to a commission delivery cost or a salaried delivery cost. In order that Mr. Warmack may be more familiar with the operation of our business, or might be more familiar with the operation of our business perhaps I should say, I took him to one of our stations which was a commission station, and to one of our salaried stations, and he himself talked to the agent of the salaried station, and at the commission station also, so that he would be better able to determine just where those things should be allocated.

7787 Q. Do you know what he put in or left out of his calculations?

A. No, sir.

Q. Do you know what the result of his calculation was? Did he tell you that?

A. To the best of my memory on that, he came to the figure of 1.62 on salaried delivery cost and 1.60 on commission delivery cost. That is my memory.

Q. Is that what he told you?

A. Yes, sir.

Q. You do not know how he reached that result?

A. No.

Q. That was an amount, then, that he had arrived at?

A. That was the amount that he arrived at himself.

Q. That would mean then that he arrived at the conclusion, so far as the figures are concerned, that he told you about—

A. (Interposing.) I did not make any of the calculations.

Q. —that commission drivers or employees, was a cheaper method of marketing than salaried drivers?

A. Yes, sir. That is what those figures would mean.

Q. Now, you said he told you these things while you and he were both in Detroit and he was doing something with his cost study?

A. That is correct.

Q. Did Mr. Warmack ever tell you, or ever ask 7788 you specifically for—

A. I did not—hear the question—

Q. Did Mr. Warmack ever ask you specifically for any documentary evidence as to the propriety of allocating costs on a gallonage basis?

A. To the best of my memory he did not.

Q. Not all of the time that you and he were together?

A. That is right.

Q. Did there come a time when Mr. Warmack went to Chicago?

A. That is correct.

Q. That was after his stay in the Detroit office?

A. That is correct.

Q. And were you in Chicago at that time?

A. I was.

Q. And did you continue with your assignment to give whatever assistance you could to Mr. Warmack?

A. Well, just part of the time.

When Mr. Warmack was in Chicago, I was sick, I believe, for approximately three days or so, in which case he worked with Mr. Boatwright and Mr. Russell in the sales research department.

Q. Who is Mr. Russell, by the way? I do not think that appears in this record, Mr. Houghton.

A. Well, Mr. Russell is a cost accountant in the sales research department.

7789 Q. One of Mr. Boatwright's staff?

A. That is right.

Q. What did you do with Mr. Warmack in Chicago?

A. I principally served to take him to the various departments so that he could get the information that he desired while he was in Chicago.

Q. Did he make any request for documentary evidence or for information while in Chicago either to you or in your hearing, of any documentary evidence or other information that was not furnished to him?

A. None. No, sir. He did not request any documentary evidence or any information while in Chicago in my hearing that was not furnished to him. Now—

Q. (Interposing.) Was everything that he asked for from you or that he asked for in your hearing furnished to him?

A. There might be. Of course, there is one case that I cannot say definitely. For example, he asked for documentary evidence from certain officials and they were to prepare it for him. Then I was sick and I do not know whether he obtained it or not.

Q. Do you know what that was?

A. Well, in one case in question it had to do with annuity, with the annuity question.

Q. He asked that, to whom?

A. Well, I think that he talked to Mr. Anderson in
7790 connection with that matter.

Q. He spoke to Mr. Anderson?

A. Yes.

Q. Do you mean Anderson or Bergeson?

A. Bergeson.

Mr. Hanley: Will it be conceded that the memorandum, Commission's Exhibit blank, is the documentary evidence that Mr. Warmack so requested from Mr. Bergeson?

Mr. Austin: No. Mr. Warmack says that he asked for a great deal more than that.

Mr. Hanley: Well, will it be conceded that he got that from Mr. Bergeson in response to a request?

Mr. Austin: Well, it already appears in the record, your Honor, that that statement came from Mr. Bergeson, your Honor, otherwise it would not have been admitted.

Mr. Hanley: That is sufficient.

By Mr. Hanley:

Q. Is that all that you know of that was requested that you do not know about being furnished to Mr. Warmack?

A. To my knowledge.

Q. Was everything else that he asked for of you or in your hearing supplied to him?

A. That is correct.

Q. Did you take him to see Mr. King, the chief of the marketing auditing department?

7791 A. I did.

Q. Did he talk to Mr. King?

A. Yes sir.

Q. Did he ask him questions?

A. Yes, sir.

Q. Did Mr. King answer them?

A. He did.

Q. Did you take him to see Mr. Clark, the treasurer of the company?

A. I did.

Q. Did he talk to Mr. Clark?

A. He did.

Q. Did he ask questions?

A. Yes, sir.

Q. And Mr. Clark answered them?

A. He did.

Q. Did he or did you take him to see Mr. Bergeson, the comptroller of the company?

A. No. I do not think that I talked to Mr. Bergeson.

Q. That was the incident that happened while you were gone?

A. Yes, sir.

Q. Did you take him to the seventeenth floor, and show him the general cost accounting department of the company?

A. Yes, sir.

Q. Did you tell him what it was?

7792 A. Yes, sir.

Q. Did he ask any questions about it?

A. He might have asked some general questions. I do not recall specifically.

Q. If he did, did you answer them?

A. To the best of my ability.

Q. Do you remember the last time when Mr. Warmack was in Chicago, the very last day he was there?

A. I do recall the last day Mr. Warmack was in Chicago.

Q. Was there a conversation at which Mr. Warmack, Mr. Boatwright, and you were present?

A. There was.

Q. Prior to his leaving that last day?

A. Yes.

Q. Did Mr. Warmack say anything at that time in your presence, or in Mr. Boatwright's presence, as to whether he had received all of the information, data, and the like, that he desired or not? If he did, so state, state as nearly as you can recall what Mr. Boatwright said.

A. As I remember it, we were just getting together and Mr. Boatwright asked Mr. Warmack:

"Now, is there anything else that we can give you that you want?"

To the best of my remembrance, Mr. Warmack replied:

"No. I have got everything I want."

7793 Mr. Hanley: You may take the witness.

Trial Examiner Ballinger: We will recess for five minutes.

(A short recess was taken.)

Trial Examiner Ballinger: Come to order.

Cross-Examination by Mr. Austin.

Q. Mr. Houghton, I understood you to testify that while Mr. Warmack was in Detroit in the early part of this year that he asked for certain time reports of salesmen, if any, which were used for the purpose of preparing the quarterly distribution of time reports for salesmen, and that you were unable to supply him with any time reports such as that. Is that correct?

A. That is correct as supplying to the salesmen themselves.

Q. Now, I will quote one sentence from the first page of Respondent's Exhibit 99, as follows:

"A memorandum was maintained by each salesman showing the amount of time spent in selling products applicable to each channel of distribution during the last month of each quarter."

Is that the memorandum for which Mr. Warmack asked you gentlemen to supply and which you did not supply?

Mr. Hanley: Answer if you know.

The Witness: I do not know. My recollection is 7794 that Mr. Warmack did not ask for any specific memorandum.

By Mr. Austin:

Q. Well, did Mr. Warmack ask you for any time reports or memoranda kept by the salesmen which were used as the basis for the preparation of the quarterly distribution of time reports?

A. Yes. He did ask me for any tests or checks that had been made at any time in the office.

Q. Or any reports of the salesmen?

A. Or reports of the salesmen testing that distribution of time.

Q. Did you supply him with any such reports?

A. No, sir, I did not.

Trial Examiner Ballinger: And your reason was, as I understand it, that no such reports were in existence?

The Witness: Well, I was unable to locate any.

By Mr. Austin:

Q. Now, you were asked some questions with regard to Mr. Warmack's testimony at page 6604 of the record. That related to Respondent's Exhibit 31-L. There it states that:

"It was estimated by Mr. Rupagh and Mr. Blaugh that
Robinson spent 35 per cent of his time at Ned's, of which 7
per cent was on gasoline; Moulenberg spent 25 per cent of
his time, of which 5 per cent was on gasoline; Cout-
7795 chie spent 25 per cent, of which 5 per cent was on
gasoline."

Did Mr. Warmack discuss with you or do you recall whether he discussed with you while he was in Detroit these estimates or the methods used in arriving at the distribution of time by these salesmen in connection with Ned's, in 1937?

A. No, sir. He did not.

Q. You do not recall him discussing—

A. (Interposing.) I do not recall him—

Q. —with you that exhibit at all?

A. No, sir.

Q. Regardless of where Mr. Boatwright's worksheets were, do you recall Mr. Warmack asking you any questions regarding the distribution of salesmen's time in 1937?

A. As applying to these particular salesmen?

Q. Yes, or as applying to any reseller—well, I will not say any reseller salesman, but as applying to reseller salesmen in the metropolitan Detroit area.

Mr. Hanley: Do you limit that question to 1937?

Mr. Austin: Yes.

The Witness: I will answer this way: There was no discussion as to any distribution of time relative to Exhibit 31-L. Now, Mr. Warmack may have asked questions regarding 1937 distribution of time as it applies to this previous question that you asked me relative to separate data.

7796 By Mr. Austin:

Q. But you do not recall now any conversation or discussion with Mr. Warmack regarding time spent at Ned's by any salesman in 1937?

A. No, sir.

Q. Regarding the various accounts on Respondent's form 189 which are allocated between bulk plant channels on a gallonage basis in Respondent's regular accounting procedure.

I understand you to have testified that Mr. Warmack did ask you regarding those gallonage allocations and as to the support for them, and that you explained to him to the best of your ability the company's reasons for allocating those accounts, or at least the principal expense in those accounts on a gallonage basis.

Mr. Hanley: Now, just a moment, Mr. Houghton. I am not sure whether that is a proper question or not. If counsel means this: Did Mr. Warmack ask you about the tests or studies in connection with gallonage distribution? Then, I think your question is a proper question.

Mr. Austin: Well, I have not quite gotten to that point, Judge. I was just asking this as a basis for another question.

Mr. Hanley: This question is not proper unless that is what it means. That is what was gone into and with this suggestion that it is objected to unless it was confined 7797 to the question which was asked of the witness about the gallonage distribution.

Mr. Austin: I am referring to a gallonage distribution.

Trial Examiner Ballinger: The objection is sustained. The question may re reframed.

By Mr. Austin:

Q. Mr. Houghton, Mr. Warmack did discuss with you the gallonage allocations used by the company in its regular accounting procedure in allocating many of its expense accounts between bulk plant channels on form 189. Did he not?

A. Yes, sir. He did.

Q. And did I understand you to testify that you explained the company's reasons for using that gallonage method of allocation, to Mr. Warmack, to the best of your ability?

A. No, sir. I explained what was in the account; what kind of expenses went into that account, sir.

Q. Did not Mr. Warmack ask you what the reasons were, or what the company's reasons were, or the company's accounting theory was in using these gallonage allocations?

A. Yes, he did. May I amplify that answer?

Q. Yes.

A. When I previously said that I told him what was in each account, I was referring to those salary and com-
7798 mission splits.

Q. No. I was not talking about that.

A. Yes, sir.

Q. I am just asking you whether Mr. Warmack asked you for any support or reasons for the use of the gallonage method in the distribution of expense in the company's regular accounting procedure where that method is used.

A. Yes, sir. Mr. Warmack did.

Q. And did you explain to him the reasons for the use of the gallonage method where that method is used?

A. To the best of my ability.

Q. Did not Mr. Warmack ask you whether the Respondent company had any documentary support or analysis supporting that gallonage allocation?

A. To my memory, he did not.

Q. I am asking you now whether he asked you for any specific document, or I might ask you whether Mr. Warmack ~~did not~~ ask you whether respondent had any documentary support or any cost study which would support the use of the gallonage method?

A. No, sir.

Q. When you explained to Mr. Warmack the reasons for the use of the gallonage method, did you, in connection with that explanation, state that there was no study or no documentary evidence that you could produce in support thereof?

A. No. I do not remember that I did. I just gave
7799 the explanation of why we used that basis of allocating costs.

Q. Did Mr. Warmack discuss specific accounts with you in that connection?

A. You are referring now to what?

Q. Use of the gallonage.

A. Use of gallonage as the basis of allocation?

Q. Yes.

A. Well, I would say generally that we discussed many of the accounts that went into that.

Q. Can you name one of the accounts which was discussed?

A. (There was no answer.)

Q. I will ask you if you did discuss account 086, taxes—real estate—personal property?

A. Well, I cannot say definitely, but it is very probable that we did discuss that account.

Q. Can you state now the reasons that you gave Mr. Warmack for the allocation of that account on a gallonage basis?

A. Well, the general explanation of using gallonage basis is the fact that our company has used that method for many years, and it has been testing it and checking it up with accountants who are in our office. As a matter of fact, it has been checked up by many of the accountants in the office. Furthermore, as a matter of fact, when we hire a new fellow, new help, or an accountant comes in to the concern, one of their first assignments is to check our
7800 allocation of cost. Over this period of time we have as yet been unable to find a better way of separating our costs and studying them, and setting them up.

Q. What do you mean by "checking and testing" the gallonage allocation?

A. By examining the various accounts, by checking alternative methods, and applying those methods to these various accounts.

Q. And do you have the records of those tests and checks in your office?

A. No. I do not have them.

Q. Are they in the Chicago office?

Mr. Hanley: Answer if you know.

The Witness: Well, I was just going to say I do not know whether they are there or not. I said that is one of the assignments that the new accountant has to do with.

By Mr. Austin:

Q. Who gives them that assignment?

A. Well, it would be the auditor of sales, or the comptroller.

Q. But you do not know whether any of those tests or checks are in existence or not?

A. No. I do not.

Mr. Austin: I would like to have this sheet marked for identification, your Honor.

Trial Examiner Ballinger: The reporter will mark the paper Commission's Exhibit No. 136 for identification.

7801 (The document referred to was marked Commission's Exhibit 136 for identification.)

By Mr. Austin:

Q. Mr. Houghton, I show you this sheet marked Commission's Exhibit No. 136 for identification. I ask you whether this is in your handwriting, or whether those figures were written by you.

A. That is correct. That is my handwriting. Those figures were written by me.

Q. Do you recall when that sheet was prepared by you?

A. No, I cannot recall the exact date of this thing.

Q. Was it done while Mr. Warmack was in Detroit, and while you were working with him on this cost study?

A. That is correct.

Q. Does that relate to one of the accounts on Respondent's Exhibit 101?

A. Yes, sir, this relates to the commission payments on Respondent's Exhibit 101.

Q. Does it have anything to do with—

A. (Interposing): Sub-account 021, Commission Paid.

Q. Then you did assist Mr. Warmack, did you, to some extent in making the calculations in connection with this account?

A. Well, yes, I do not mean to say that I did all of his calculations, but I did help him to make calculations, in order to expedite the work.

7802 Q. You did work with him on this account and other accounts in making tests and explaining the methods of allocation you used?

A. Yes, sir. I would make some figurations to show him how it was handled, if it would clarify the explanation, also the same way with sub-account 200—

Q. (Interposing): Also true with account 004, I believe. Is that true, Mr. Houghton?

A. I believe that is true.

Mr. Hanley: May Respondent see that exhibit, if you please?

Mr. Austin: Certainly. I hand it to Respondent's counsel.

Mr. Hanley: Thank you.

Well, there is nothing there on that.

Mr. Austin: May we be off the record?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record. Proceed.

By Mr. Austin:

Q. Now, when Mr. Warmack went to Chicago, I guess that was around the end of February. Is that not so, Mr. Houghton?

A. I think it was somewhere along the first of March. It was somewhere in that.

Q. Well, around the end of February or the first
7803 of March. And you were in Chicago, in the Chicago
office, were you not, most of the time when Mr. Warmack was there?

A. I do not believe it was most of the time.

Q. Well, did you assist Mr. Warmack in Chicago in making his investigations?

A. To some extent, yes.

Q. Do you recall Mr. Warmack asking you, or asking Mr. Boatwright in your presence, for an analysis or breakdown of the expense in account 075 for the Detroit field for 1940?

A. No, sir. I do not think that was handled through me. I know Mr. Warmack did discuss it. I do not remember any specific requests that he made.

Q. Do you—you do remember discussing that account?

A. I think that was discussed.

Mr. Austin: That is all.

Trial Examiner Ballinger: Redirect examination.

Redirect Examination by Mr. Hanley.

Q. One question, Mr. Houghton, in regard to this discussion about Commission's Exhibit 136 for identification.

I believe you testified on your direct examination, but I want it clear in the record:

Did you at any time participate with Mr. Warmack in making calculations and arriving at conclusions?

A. Not as to any final analysis. My work with Mr.
7804 Warmack was to demonstrate how these accounts were
spread or how they were handled and shown on form
189.

Q. He put his figures together to suit himself? Is that not true?

Mr. Austin: I object to that as leading and also calling for a conclusion of the witness as to what Mr. Warmack did with his own figures.

Trial Examiner Ballinger: The objection is overruled.

The Witness: Well, of course, I have no information as to what Mr. Warmack did with the final figur[illegible] All I know is that in any of these accounts to explain them, why, oftentimes I would do some of the arithmetic showing how the figures were arrived at.

By Mr. Hanley:

Q. Specifically, as I understand your testimony, you do not know how he arrived at the conclusions he did arrive at in relation to commission drivers as distinguished from salaried drivers?

A. That is correct.

Mr. Hanley: That is all.

Re-cross Examination by Mr. Austin.

Q. Mr. Houghton, Mr. Warmack did explain to you, did
he not, frequently while he was in Detroit, and in fact,
7805 continuously as to the problem in which he was in-
terested, and which he wished to investigate?

A. Yes, sir. Mr. Warmack asked about them. He was trying to find out what was in the various accounts.

Q. Then you knew what Mr. Warmack was working on, and working to try to develop while you were working with him in Detroit?

A. Generally, I knew pretty well what he was striving to get at. But I did not know the actual mechanics that he went through to get it.

Q. Will you just refer to that particular period of time again, and tell me this:

From the time that he arrived in Detroit until the time that he left, you had a pretty good idea as to what he had in mind doing?

A. Yes, sir. That is correct. I will not say in every instance I did not know. On some of these items that he checked, what his final answer was I do not know.

Q. As a matter of fact, you were just referring them to commission agents versus A-Stations?

A. That is true. I will not say as I said before that in every instance I did not know. On some of these items that he checked what his final answer was, I may have had some idea what he had in mind on these things. Just how far, I would have to refer to the particular item to tell you.

7806 Q. As a matter of fact, you did know what he was trying to find out and in many instances the results that he reached? Did you not know that, Mr. Houghton?

A. That is correct.

Q. I thought that was what you meant by your two last preceding answers but they were not very clear.

A. I am sorry. That is correct.

Mr. Austin: That is all.

Mr. Hanley: That is all.

Trial Examiner Ballinger: The witness is excused.

(Witness excused.)

Mr. Hanley: Is that all?

Trial Examiner Ballinger: Anything further today?

Mr. Austin: I think it is a little late to call another witness, your Honor.

Therefore, I move that we adjourn until 9:30 Monday morning, August 3.

Mr. Hanley: If your Honor please, I wonder if it would be possible to get some idea of what the future progress of this hearing is going to be and what length of time is going to be consumed.

I will say to your Honor that I have been in communication, or rather Chicago has been in communication with me since the middle of this week.

7807 I was indeed directed to ask for a recess, to come back home, to release Mr. Houghton and Mr. Boatwright and myself, and to do so at once. I at the time thought that, your Honor, that we could conclude this thing in a day or two next week. I persuaded my people to let us close this record on the theory that it was desirable from everyone's standpoint to get the job done.

Trial Examiner Ballinger: How long will it take the Commission?

Mr. Austin: Your Honor, I will finish up Monday morning unless there is an extended cross-examination.

I have two witnesses. I am going to call them only on a very limited field of questioning. I do not believe I will be over half an hour apiece with those two witnesses. Unless there is an extended cross-examination, I should be able to finish with them by noon on Monday.

Mr. Hanley: Well, will that close your case, Mr. Austin, when you have exhausted those witnesses?

Mr. Austin: That will close my case.

Mr. Hanley: Very well.

Mr. Austin: And may I ask you, will you take very much time as to your witnesses that you have to follow mine?

Mr. Hanley: Well, if it may be understood that I am going to go ahead with my surrebuttal—

Mr. Austin: Yes.

7808 Mr. Hanley: I am going to go ahead as soon as you finish yours.

Mr. Austin: Now, may I ask how long you expect to take?

Mr. Hanley: I will not be very long, Mr. Austin. I cannot tell you exactly, but I am sure that my direct examination, all told, will not be over a few hours at the most.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

The motion is granted of counsel for the Commission.

And now, at 11:47 a. m., the hearing stands adjourned to be reconvened at 9:30 a. m., Monday, August 3, 1942, in Room 532, Federal Trade Commission Building, Washington, D. C.

(Whereupon, at 11:47 a. m., August 1, 1942, the hearing in the above-entitled matter was adjourned.)

7809 Room 532, Federal Trade
Commission Building,
Washington, D. C.
Monday, August 3, 1942.

Met, pursuant to adjournment, at 9:30 a. m.

Before: Webster Ballinger, Trial Examiner.

Appearances:

Cyrus B. Austin, Esq., attorney for the Federal Trade Commission.

Harold R. Hanley, Esq., (910 South Michigan Avenue, Chicago, Illinois,) appearing for the Respondent, Standard Oil Company of Indiana.

7810

PROCEEDINGS.

Trial Examiner Ballinger: Come to order.

The hearing of Docket No. 4389, case entitled "In the Matter of Standard Oil Company (Indiana)" is reconvened pursuant to notice at 9:30 a. m., August 3, 1942, in Room 532, Federal Trade Commission Building, Washington, D. C.

The last hearing was held at this same place, August 1, 1942.

The reporter will note counsel for the Commission and Respondent present.

You may proceed.

Mr. Austin: I will call Mr. Lundvall.

ARTHUR E. LUNDVALL was thereupon called as a witness for the Commission and, having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. Please state your name.
A. Arthur E. Lundvall.
Q. Where do you reside, Mr. Lundvall?
A. Baltimore, Maryland.
Q. What is your present position?

A. Chief accountant for the Federal Trade Commission.

Q. Will you outline your past experience as an 7811 accountant, and training, and so forth, briefly?

Mr. Hanley: Well, Mr. Austin, I should be glad to concede the general and formal qualifications of Mr. Lundvall as an accountant.

Mr. Austin: All right. Thank you.

By Mr. Austin:

Q. Mr. Lundvall, let me ask you, are you a certified public accountant?

A. I am, in the State of Maryland.

Q. Have you, in the course of your duties as chief accountant for the Commission, kept yourself familiar generally with the progress of this case, Commission's Docket 4389, in the matter of Standard Oil Company of Indiana?

A. In a general way, I have.

Q. Have you been present at a number of the hearings in this case?

A. I have.

Q. I believe you sat in on most of the testimony given by Mr. Boatwright, which was given here last spring; and by Mr. Warmack, given this year?

A. I do not know about most of it. I did sit in on a good deal of the testimony of those two gentlemen.

Mr. Austin: Your Honor, may Mr. Warmack speak to Mr. Lundball off the record?

Trial Examiner Ballinger: Off the record.

7812 (There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. Are you familiar with the exhibit known as Respondent's Exhibit 101, Mr. Lundball? I show you a copy of that exhibit.

A. Yes. I am generally familiar with it.

Q. One of the accounts listed on that exhibit is account 520, which is entitled "Annuities and Retirement Plan Expense."

A. Yes.

Q. Are you familiar with the nature of the expense which is included in that account as shown by Respondent's Exhibits 99, 100, and by Commission's Exhibit 108, which is this little booklet entitled "Retirement Plan for the Employees of the Standard Oil Company"?

A. Yes.

Q. Have you seen that?

A. Yes, sir.

Q. Have you read it?

A. I have read it.

Q. Are you familiar with the description of the expense in account 520 given by Mr. Warmack?

A. I am.

Q. In his testimony?

A. I am.

7813 Q. On the basis of those descriptions of the expense in this account, as shown in the record by the exhibits, and by Mr. Warmack's testimony, what is your opinion as to whether the expense in that account, being the Respondent's expense for the Detroit field in 1940 entered on that account, may properly be treated as a selling cost of the Respondent for the year 1940?

Mr. Hanley: Now, just a moment.

May I ask a question for the purpose of clarification?

Trial Examiner Ballinger: You may.

Mr. Hanley: Have you made that study of the account 520, Mr. Lundball, and the plan of the Respondent company, and the underlying data and facts in respect thereof?

The Witness: I have read the plan and am fairly familiar with the testimony in the case.

I have not made a detailed study.

Mr. Hanley: The question is objected to by the Respondent for the reason that the witness has not made any study of the plan, or the underlying data, and his only source of information is, apparently, what Mr. Warmack has said, and the exhibit 108 of the Commission, which was called to his attention.

He is not legally competent to render an expert, critical opinion in connection with the Respondent's treatment of account 520.

7814 It will, of course, be understood by the Court that this objection goes to the immediate and specific problem, the general qualifications having been conceded.

Trial Examiner Ballinger: Have you studied all of the underlying data upon which your opinion about to be expressed is predicated?

The Witness: I think I have, your Honor. I have read the plan. I have read the testimony, Mr. Warmack's testimony.

I am generally familiar with the accountant treatment by the company of this type of expense.

Trial Examiner Ballinger: The objection is overruled. The witness may answer.

Mr. Hanley: May it be understood, if your Honor please, that that objection may stand as to any opinion questions that are asked the witness?

Trial Examiner Ballinger: It will be understood to be a continuing objection to the entire line of examination of this witness.

The Witness: Judge, may I have that question?

Trial Examiner Ballinger: Read the question.

(The reporter read the question as follows:

"Q. On the basis of those descriptions of the expense in this account, as shown in the record by the exhibits, and by
Mr. Warmack's testimony, what is your opinion as to
7815 whether tthe expense in that account, being the Re-
spondent's expense for the Detroit field in 1940 entered on that account, may properly be treated as a selling cost of the Respondent for the year 1940?")

Trial Examiner Ballinger: First, have you arrived at an opinion?

The Witness: Yes, sir. I have.

Trial Examiner Ballinger: You may express it.

The Witness: Well, as I understand it, it is in the amount of a hundred fifty-seven thousand dollars plus charged to the account 520 for the year 1940 covering these annuities and retirement account expenses.

Of the total amount, it is my opinion that twenty-six thousand plus dollars of the amount is properly applicable to the year 1940; approximately one hundred and thirty-thousand dollars plus is not applicable to the Detroit field.

By Mr. Austin:

Q. When you say "applicable"; what do you mean?

A. I am speaking of the marketing expense for the year 1940.

Q. Now, of course, I would like to have you describe first, what the nature of expense is in each instance.

A. Well, the last item on that account, making up a hundred and thirty thousand plus dollars, one part, namely, one hundred and eight thousand plus dollars represents a

portion of a trust fund contributed by the company
7816 for the retirement of the employees in the Detroit
field in 1940 to cover the services of its employees for the period prior to January 1, 1939.

As I understand the plan, the amount with respect to this one hundred and eight thousand dollars—

The Witness: Strike that.

A. (Continuing:) The amount is for services performed by the employees prior to January 1, 1939, and as such does not constitute cost of doing business in 1940.

The item of twenty-two thousand dollars plus of the hundred and thirty-thousand dollar item is to cover annuities paid to retired employees in the Detroit field for the year 1940; that is, those employees who were retired prior to the year 1940.

Obviously, that amount is for services performed prior to the year 1940, and as such, does not constitute an expense of marketing for the purposes of a cost differential for the year 1940.

By Mr. Austin:

Q. What is the twenty-six thousand plus item that you refer to?

A. That represents contributions made for the company to match contributions made by employees engaged in the Detroit field. Since that is for the year 1940, and it is for
services performed in that year, I would think that
7817 that that is properly included as a marketing expense
in 1940 for the purpose of this case.

Q. Have you the exact amounts you referred to, Mr. Lundball? You gave them in thousands of dollars.

A. I have the exact figures.

Q. Would you mind first stating them in the record, and again state in the record what you regard as marketing expense and what, in your opinion, is not, so that we may have the exact amounts?

A. That total charge for the year 1940 for the annuities and retirement plan expense is $157,014.27.

$26,226.38, I understand, represents the contributions made by the company to match the contributions by employees engaged in the Detroit field for the year 1940.

$108,508.83 of the total represents the portion of a trust fund contributed by the company for the retirement of employees in the Detroit field to cover services performed prior to January 1, 1939.

$22,279.06 is the amount of annuities paid to retired employees in the Detroit field for the year 1940 to cover the services of the employees performed prior to 1940.

I think I have said that the first item of $26,226.38, I believe, is a proper charge to 1940 business as a marketing expense, and that the other two items I would not
consider proper charges to marketing expense for
7818 the year 1940 for the reason that they are paid to
cover the services performed prior to the year 1940.

Q. Is it your opinion that any such payments, either into the trust fund or actual annuity payments for services performed in 1940 are not selling cost to the Respondent for the year 1940?

A. I do not regard them as such.

Mr. Austin: That is all.

Cross-Examination by Mr. Hanley.

Q. You have stated, Mr. Lundall, that you regard the part of account 520 represented by matched payments or payments into an annuity fund in the amount of $26,226.38—

Mr. Hanley: Off the record.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. —is a proper marketing cost of the Respondent company? That is true, is it not?

A. Yes, sir.

Trial Examiner Ballinger: For the year 1940?

The Witness: That is right.

By Mr. Hanley:

Q. For the year 1940?

7819 A. That is right.

Q. Are you familiar with the testimony of Mr. Warmack to the effect that in his calculations he reduced that figure to approximately $20,108. plus?

A. I—I do not think I am familiar with that.

Q. Well, do you agree that it should be done? And assuming that it was done—do you agree that it should be done?

A. That it should be reduced?

Q. Yes, sir.

Do you think that the entire sum of $26,226.38 is a proper marketing cost for the year 1940?

Mr. Austin: Now, your Honor, there are two questions. I have no objection to this latter question.

I do object to the former question, and I think they are both pending. I would like to know which one counsel is pressing.

Mr. Hanley: I do not think the former one requires any answer because he said he did not know.

Trial Examiner Ballinger: Read the former questions and answers.

(The reporter read the following:

"Q. Are you familiar with the testimony of Mr. Warmack to the effect that in his calculations he reduced that figure to approximately $20,108. plus?

7820 "A. I—I do not think I am familiar with that?

"Q. Well, do you agree that it should be done? And assuming that it was done—do you agree that it should be done?

"A. That it should be reduced?")

Trial Examiner Ballinger: Now read the pending question.

(The reporter read the pending question as follows:

"Q. Yes, sir.

"Do you think that the entire sum of $26,226.38 is a proper marketing cost for the year 1940?")

The Witness: I do not have any opinion now otherwise than that the entire amount is a marketing expense for the year 1940.

By Mr. Hanley:

Q. Very well. Thank you, Mr. Lundball.

If you will permit me, Mr. Lundball, I am going to use round figures here. I think we will understand each other all right.

There is one item of approximately one hundred and eight thousand dollars. There is another of twenty-six thousand odd, and another of twenty-two thousand odd. Is that right?

A. That is right.

7821 Q. Do you regard the items of a hundred and eight thousand dollars plus and twenty-two thousand dollars plus as a market charge—

Mr. Hanley: Strike "charge."

By Mr. Hanley:

Q. As a marketing cost—I am not asking you a question relative to the year 1940, or any period of time, I am simply asking you, in your judgment, is it a marketing cost?

A. Judge, I would have to answer that in this way: That I think it would be a marketing expense for the year in which the cost was incurred for the services rendered. I think that that has everything to do with it.

Q. You stated that you were familiar with Mr. Warmack's testimony in respect of this account?

A. Yes.

Q. As I recall it, he testified that it was not good accounting to charge the twenty-two thousand dollar plus item to 1940, because of the fact that applied to payments actually made for services in years prior to 1940. Is that your recollection of his testimony?

A. It is.

Q. As I understand his testimony, and as I now understand yours, your thought is that some kind of a current fund should be kept up, so that these things are made payable as they come along?

7822 A. That is right, according to the accrual system of accounting.

Q. Yes, sir. Mr. Lundball, referring you to the one hundred and eight thousand dollar item, which is the trust fund item, is not that exactly what the company is doing, namely, building up currently a fund which will be applicable on date of retirement to the services of employees who continue in the employment of the company?

A. Well, as I understand, it is to build up this fund to compensate the employees for the services performed prior to January 1, 1939. As I understand the plan, it simply gives formal recognition to a plan that had been in effect for a good many years.

Q. And you understand, do you not, Mr. Lundball, that the employees who will ultimately participate in that fund, continue to work for the company?

A. I do.

Q. And that in 1939 or thereabouts there was a change in the form of annunity plan, or pension plan, of the company?—

A. I—

Q. —And that this trust fund just gave recognition to that change?

A. That is right.

Q. Is that your understanding?

A. Yes, sir.

7823 Q. Do you regard it as bad accounting to give recognition to that pre-existing annuity plan in reference to continuing employees of the company and charging it currently against the accumulated fund of amount necessary to discharge the obligations of the company as incurred under the pre-existing plans?

A. I think the better procedure would be to charge this amount, such as this one hundred and eight thousand dollar item to surplus, rather than to the current year's operations, because it obviously applies to services performed in prior years, and to whatever extent the payment is made in 1940 it is made to correct, in a sense, the understatement—or the overstatement, rather, of prior years' earnings by reason of the fact of the failure to provide an accrual to cover this portion of the plan for services performed in the years prior to 1939.

Q. Mr. Lundball, as I understand the plan, assuming that it had been continued, and if there had been no change in the method of paying annuities, would you then regard the amounts of money necessary to care for that plan in 1940 and subsequent years, as a current, marketing charge?

The Witness: Could I have that question again, please?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

7824 Mr. Austin: Mr. Hanley, do you mean that if the Respondent had set up no trust fund and no insurance fund at all, and had just gone on paying these things as they came due?

Mr. Hanley: Well, perhaps nobody understands this question. I am sorry.

By Mr. Hanley:

Q. I will tell you what I mean, Mr. Lundball. You understand that there was a change in the plan of the company which was in 1939, whereby a new system was put into effect to pay annuities to employees upon retirement?

A. Yes, sir.

Q. And the plan that was in effect up until 1939 was abandoned, but there was a certain accrued liability, at least, moral ones under the plan in effect up until 1939 when this new insurance plan went into effect.

A. Yes.

Q. Now, my question contemplates this: Suppose that the company had rot changed the plan in effect up until 1939, but had just continued along that same old plan; would you regard the amounts of money necessary to satisfy the requirements of that plan from year to year as current marketing costs?

A. Well, I think if there had not been any other features to this plan, and it was a payment from year to
year, or provision made from year to year to take
7825 care of the retirement of employees, I would regard
that as a marketing expense from year to year with respect to the pro rata amount.

Q. If that be true, Mr. Lundball, why do you object, from an accounting standpoint, to the payment of the twenty-two thousand plus dollars which was simply a continuation of the old plan in connection with employees—in connection with employees that did not shift over to the new plan?

A. Well, my answer had in mind those employees that were still with the company.

These employees for which the twenty-two thousand dollar payment was made, as I understand, had been retired, and it is not for services performed in this current year.

Q. Now, Mr. Lundball, I am asking you if that old plan had continued, and that amount of twenty-two thousand dollars, under the operation of that plan, had fallen due in 1940—which it did, notwithstanding it was applicable to retired employees who may have retired in 1939, I do not know—would that not still be a current, 1940, marketing expense under that old plan?

A. I think with respect to employees that would be retired in any one year, that any payments made for that purpose would apply for services in the past, and some portion of which would apply pro rata for those past years, and no part thereafter.

Q. Well, do you not think, Mr. Lundball, that the
7826 1940 charge of twenty-two thousand dollars is a
proper charge for 1940—

A. (Interposing): Well—

Q. —you understand, I assume it was not due, it was not payable—could not be until 1940 under the old plan.

A. My answer would have to be there, Judge, that was for services performed by the employees prior to those years, and as such, should have been spread or applied back over those years.

Q. Now, Mr. Lundball, you have said that you thought these are charges to surplus rather than marketing expense.

This may be a silly question from an accounting standpoint, but it has been very much in this case:

Would you tell us, please, what the difference in cost to a company, or the character of the cost, assuming that you charged up the same total of money over a five year period to surplus, or whether you charged up the same total of money over the same period of time to marketing expense?

A. Well, it is still a cost to the company.

Q. That is the trouble I am having, Mr. Lundball. It is still a cost. I cannot get an idea about this charging to surplus and charging to marketing expense—

A. (Interposing): Maybe I can explain it this way. According to good accounting, you are supposed to provide for all of the current costs of doing business, and all of the income applicable to doing business within the
7827 year in order to show the net income from doing business for a current year.

And any charges that would apply to prior years, by reason of the failure to provide for them in those years, would be a charge to surplus, on the theory of the only way you could correct the prior condition would be to take it out of accumulated earnings over prior years, as it would be.

Q. Now, Mr. Lundball, suppose that we did not, as a matter of bookkeeping, and instead of this current payment being so charged, it was charged to marketing expense. You have already said, as I understand you, that it is a cost to the company.

A. Well, it is a cost to the company.

Q. For the purposes of establishing a cost differential, does it make the slightest difference whether you take the pro rata charge to surplus, or whether you take the current marketing expense, if it amounts to substantially the same amount?

A. I think so, Judge, because what you are concerned with are the costs of doing business for a very definite period of time, in connection with this case, the year

1940. I think that the year's operations ought to include only those costs and expenses that are applicable to doing business in that year.

Q. All right. We are charged with having given
7828 an improper and illegal price differential in the year
1939. That is what we are trying in this case, Mr. Lundball.

For the purposes of expediency, and as I understand, agreement between accountants for both the Commission and Respondent, it was determined to use the year 1940 as the period upon which to predicate the cost study.

Assuming that you confine everything to the year 1940, on your restricted theory of using these current costs applicable to that particular period;

Does then your condemnation of this charge in 1940 prove or disprove anything from an accounting standpoint as to whether or not the cost differentials being accorded by the Respondent in any current period are right or wrong?

Mr. Austin: I would like to have that question read.

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

Mr. Austin: Well, if your Honor please, in the first place, you are not just concerned with the price differential in 1939. There is a misstatement of that there.

And I also object to the question upon the ground that it calls for the conclusion of the witness as to whether or not the evidence in the case justifies or does not justify the price differential, while he was asked whether it proves
it from an accounting standpoint.
7829 I do not see how the witness can answer that
question, particularly in view of the fact that the direct examination here has been upon one account. There has only been a question here about one account.

Trial Examiner Ballinger: Is that objected to on that ground? If so, is that the object and purpose of the question, Mr. Hanley?

Mr. Hanley: I do not understand, Mr. Austin, and therefore I cannot answer your question.

Read Mr. Austin's objection and statement.

(The reporter read the objection and statement of Mr. Austin.)

Mr. Hanley: Of course, as to that last objection, your Honor, I can answer that. I am asking this witness only as to the effect of this particular account that he has been examined upon. I am not expanding the scope of the direct examination, of course.

Trial Examiner Ballinger: The objection is overruled. The witness may answer.

The Witness: Well, I am still of the opinion that whatever year is involved in the cost differential, the total cost of doing business should reflect just those costs and expenses that apply to the year in question.

By Mr. Hanley:

Q. Getting at it this way, Mr. Lindball: Supposing that your theory were adopted to charge these two 7830 classes; that is, the past employees and the trust fund employees groups to reserve on a pro rata basis over the years, rather than on a current yearly marketing cost basis.

When you were determining the actual cost of doing business, would it make any difference over a substantial period of time—period of years, three years, four years, five years, how you did that bookkeeping?

A. Well, I think it would, Judge, for this reason: that these payments as they build up become increasingly smaller than those. This one hundred and eight thousand dollar item becomes increasing smaller with the increase in the time period.

Q. Would it make any difference, Mr. Lundball, assuming it will become increasingly smaller; that maybe this amount for 1940 is a little more costly in that account than, perhaps, 1941 would be? Is that the meaning of what you are saying?

A. Well, no. The services for which the payment is made were performed prior to this date, January 1, 1939. No part of the payment is for, or could in no way be considered as additional compensation for the employees for the year 1940; that is, under my theory of accounting. I believe that is a cost that applies to the doing of business in the prior years.

Q. Why are you of the view that those payments are going to get smaller?

7831 A. I do not believe I said that they would get smaller.

Q. Maybe I misunderstood you. I thought you said that those trust fund payments would grow smaller.

A. I certainly did not have that in mind if I said it.

Trial Examiner Ballinger: Read the question and answer referred to.

(The reporter read the following question and answer:

"Q. Getting at it this way, Mr. Lundball: Supposing that your theory were adopted to charge these two classes; that is, the past employees and the trust fund employees groups to reserve on a pro rata basis over the years, rather than on a current yearly marketing cost basis.

"When you were determining the actual cost of doing business, would it make any difference over substantial period of time—period of years, three years, four years, five years, how you did that bookkeeping?

"A. Well, I think it would, Judge, for this reason: that these payments as they build up become increasingly smaller than those. This one hundred and eight thousand dollar item becomes increasingly smaller with the increase in the time period.

7832 "Q. Would it make any difference, Mr. Lundball, assuming it will become increasingly smaller; that maybe this amount for 1940 is a little more costly in that account than, perhaps, 1941 would be? Is that the meaning of what you are saying?

"A. Well, now. The services for which the payment is made were performed prior to this date, January 1, 1939. No part of the payment is for, or could in no way be considered as additional compensation for the employees for the year 1940; that is, under my theory of accounting. I believe that it is a cost that applies to the doing of business in the prior years.")

By Mr. Hanley:

Q. It was to those questions and answers that I had reference in my last question, Mr. Lundball.

A. I see.

The Witness: What was the last question that was asked me?

Trial Examiner Ballinger: Read the pending question to the witness.

(The reporter read the following question:

"Q. Why are you of the view that those payments are going to get smaller?")

The Witness: Well, when I answer the other question I did not fully understand it.

7833 I do not have any particular reason to expect that they would get smaller except as these employees die off, and there were fewer employees than that would participate in this one hundred and eight thousand dollar item.

By Mr. Hanley:

Q. Well, that will also adjust itself by picking up all of these new employees under this new plant, would it not, Mr. Lundball? Is not that all that this amounts to?

A. Well, if you mean with respect to the matched contributions?

Q. Yes, sir.

A. The employees for those currently employed?

Q. Yes.

A. Well, I do not know whether it would be picked up because this twenty-six thousand dollar plan is in effect for the employees now with the company, and it is to cover the services from January 1, 1939, on.

Q. Twenty-six thousand dollars?

A. Yes, sir.

Q. Now, Mr. Lundball, is not the fact this, that the Standard Oil Company had an annuity plan which was continuing on year after year, and which was taking care of current employees, past employees, future employees, and that in 1939 for reasons best known to the management, they decided to change the form of that plan, which they did by taking out insurance annuity policies,
7834 which is the current plan;

And that these two other parts of this account, namely, the one hundred and eight thousand dollar part, and the twenty-two thousand dollar part, are just simply a clean-up and continuance and a switch-over of the old plan to dovetail it in to and fit it in with a new plan;

And that when those amounts are paid out that the entire load which is now being carried by both will be carried by the new insurance annuity plan?

Is not that really the practical situation, and the way they kept the books?

A. Well, with the advent of the Social Security legislation to this contribution plan, this—we will call it the "twenty-six thousand dollar plan,"—plan that we have spoken of, I suppose the company wanted to give recognition to the services of its employees who had been with the company prior to the time when this social security and the twenty-six thousand dollar pension fund part of the plan went into effect, and that they simply gave formal recognition to that, and it was specifically for services performed in the past; whereas, the social security payment and these contributions made by the company to match contributions made by the employees were to cover present and continuing services of the employees; that is, for that part of their compensation.

Q. Mr. Lundball, I do not want to pursue this very much further, but you understand, do you not, that
7835 these plans were in effect long before there was any social security legislation?

A. Yes, sir.

Q. And that this plan never did have anything to do with the social security legislation?

A. It is my understanding that it is independent of that.

Q. Now, can you not just give me an answer to that question that I asked you, that this thing and the happenstance of these three different types of figures in account 520 is a result of a shifting of one system of annuity to another, and that the system of annuity just continues on and has continued on for years? I should say, instead of "system," the last time, I should say the fact of annuities has continued on for years?

A. Well, I understand that it is a continuing plan, Judge. It has been going on for years, and I suppose with the advent of social security legislation, it brought about this whole change in the plan. It gives formal recognition to employees that have been with the company for a good many years. It is to provide for their current services through the current contribution of the company matching those that are made by the employees.

I think there is a definite distinction there.

Q. Mr. Lundball, the social security thing is entirely apart from this. It has not a thing in the world to
7836 do with it. I hope your understand that.

A. Well, you can leave that out of the discussion.

Q. The fact is—I am trying to find out this—that the social security and old age pension insurance under the Federal statutes or any other thing applicable to such statutes are paid in addition to the entire fund here, entirely apart from this 520 account, pension fund.

A. That is my understanding, Judge.

Q. So the social security has not a thing to do with it.

A. That is right.

Q. What have you to say as to this that, assuming, Mr. Lundball, that the reason for the existence of three different groupings of accounts in account 520 is the result simply of a change in the plan of paying annuities, that recognition of past obligations to the employees under pre-existing plans as well as recognition of future obligations to employees under the plan resulting in current benefits, redound to the benefit of the company from the marketing standpoint where those payments are applicable to marketing department employees?

A. Well, I think this, that the present employee who has been with the company a good many years, he knows that he is going to participate to the extent of his current services through this part of the plan, that this twenty-six thousand dollar item that we are talking about is a part, and that the one hundred and eight thousand dollar part of the plan represents the payments for services that he has performed in the past and which he knows he will get just so long as he stays with the company.

Now, of course, any loyal employee is going to feel stronger towards the company by virtue of anything that the company does for his well-being, and I think to that extent there is some benefit to the company, but how much that benefit would be, I do not know.

Q. Referring you specifiically, Mr. Lundball, to the two classes of account, twenty-two thousand dollars and one hundred eight thousand dollars, what is your answer as to whether or not in your judgment there are any current benefits to the company from paying those two items of expense?

A. Now, with respect to the twenty-two thousand dollar item, I do not see that there is any benefit to the company because the employee is no longer with the company, he is not performing any service with the company.

Q. Just on that point, Mr. Lundball. Do you think it is any benefit to the company to have those employees who are still with the company have knowledge of the fact that the company is keeping faith with the employees who may be retired?

A. Well, as I said before, if he is a loyal and conscientious employee, he cannot help but have a feeling of loyalty to the company.

7838 Q. Well, is not that a current benefit?

Mr. Austin: Your Honor, I feel that I should interrupt and interpose an objection to this line of questions.

The question here is whether or not these costs are selling costs to the company.

Such questions as are now being asked about whether the company gets any intangible benefit in the form of loyalty or confidence of employees, it seems to me is something that are~~, on~~ their face, matters that cannot be measured, if it does have any value, obviously, it does not have any value so far as the selling expense is concerned.

Trial Examiner Ballinger: The objection is overruled. The witness may answer.

The Witness: May I hear the question?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: I think it is a current benefit. How much of a benefit it is, I do not know.

By Mr. Hanley:

Q. Well, Mr. Lundball, in keeping this account in the way it has been kept by the Respondent company, is the Respondent company in accord with the Federal Income Tax regulations in respect of its expenses?

A. Well, I think maybe it is. I have not exam-
7339 ined the company's records and the particular features of this plan with respect to its tax situation, but I think that those payments are generally allowable deductions for tax purposes. But, as you know—

The Witness: Strike that out.

By Mr. Hanley:

Q. Mr. Lundball, I refer you to page 7568 of the record.

A. Yes?

Mr. Hanley: I asume that Mr. Lundball will want to look at the record before he answers the question.

Mr. Austin: Page 7568?

Mr. Hanley: Yes.

By Mr. Hanley:

Q. At that point, there was set forth, or there was begun to be set forth in extenso a question and five answers by practising accountants extending through to the top of page 7575.

The statement of facts and the five answers were taken from "The Journal of Accountancy," for the month of May, 1940 being Respondent's Exhibit for identification 110-A, 110-B, 110-C, 110-D.

It has been testified to by Commission's witness Warmack that the statement of facts referred to is substantially the same as the state of facts in the Respondent company to which account 520 applies.

7840 I will now ask you whether or not you agree, as an accountant, in principle with the five answers which are set forth in respect of the way in which the account should be handled.

Mr. Austin: I object to that question for various reasons, as follows:

In the first place, your Honor, there is no proof in the record that any accountants gave any answers or opinions. I make that objection because that is a part of the question.

Secondly, he stated that the opinions appeared in "The Journal of Accountancy," and I contend that that is wholly improper, and as I understand it, the question was only allowed to be in on the ground that your Honor found it to be adopted by Judge Hanley, and there was no reference made or reliance based on the fact that it had come from "The Journal of Accountancy," or any other place.

Third, I think it is entirely immaterial whether this witness or any other witness for the Commission agrees with some hypothetical statement that is not substantiated.

Fourth, I am not under the impression that Mr. Warmack testified to the fact that the facts upon which these questions were based are the same as those posed in this case, and I do not think the facts are the same.

You can satisfy yourself on the facts by an examination of the record. It is identical, and of course

7841 applies to the same thing.

Trial Examiner Ballinger: The Examiner considers your question objectionable in view of the statement that this was a question as propounded to five practising accountants, and the accountants had expressed their views.

If you eliminate the accountants and present this as a mere hypothetical question, the Examiner will allow the question.

By Mr. Hanley:

Q. I am just asking you, Mr. Lundball, if you agree in principle with the five answers set forth in the record, which have been called to your attention as to their setting forth a proper method of accounting?

Trial Examiner Ballinger: The witness may answer.

Mr. Austin: The same objection, your Honor.

Trial Examiner Ballinger: The objection is overruled.

Mr. Austin: I should say, if your Honor please, just so that my objection will appear as the question is now framed, that I do object to the question upon the ground that it is irrelevant and immaterial;

That the question as it is now framed amounts to this that if a certain answer were given to a certain question, would you agree with it?

The witness has already stated his opinion regard-
7842 ing the direct question.

Now, as to the hypothetical question, we are presented with this situation: I think that the question if it were to be asked, your Honor, whether the witness agrees with certain posed answers to that hypothetical question, if your Honor please, I think it is too remote to be of any value whatsoever. I object to it on the ground that it is incompetent, immaterial and irrelevant. I think it can only serve to confuse and encumber the record. It can serve no useful place in this record whatsoever.

Trial Examiner Ballinger: The objection is overruled The witness may answer.

The Witness: With respect to the first answer on page 7569 of the record, I think that that procedure is permissible, but not preferable.

I also think * * *

Mr. Hanley: (Interposing.) Well, now, just a minute. You said 7569. The answer began not there, the first answer begins on page 7570. Are you talking about the answer or the statement?

The Witness: Well, the question here was—

Mr. Hanley: May we be off the record?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.
7843 That portion of the witness' answer following "preferable" is physically stricken.

By Mr. Hanley:

Q. Please begin your answer now beginning with the answer No. 1 which appears at page 7570.

A. With respect to Answer No. 1, appearing at page 7570 of the record, I do not agree with the answer to Answer No. 1.

I do not agree with the answer to Answer No. 1 so far as it refers to procedure.

Q. Do you mean that you do not agree with the procedure in Answer No. 1?

A. That is correct. I do not agree with the procedure as set forth in Answer No. 1.

Q. Do you mean that you do not agree with the procedure set forth in Answer No. 1 in its entirety or in part?

A. Yes. I do not agree with the accountants' reasons as given as set forth in Answer No. 1.

Q. What about Answer No. 2?

A. Well, I agree with that part of the answer which reads:

"Had the directors chosen to make a lump payment of the total estimated required amount, and at the same time, gone on record that such payment was in recognition and settlement of past services rendered, then a permissible treatment would have been to charge the payment to earned surplus."

7844 That appears at the top of page 7572.

Q. Is that all of the answer No. 2 with which you agree?

A. Yes, sir.

Q. What about Answer No. 3?

A. I agree with that part of the answer that begins with:

"Thus the basis of the payments is apparently related to services rendered by the employees prior to the inception of the social security act. Having regard to this retroactive feature, it might therefore be asserted that the annual payments to be made should be charged to the earned surplus account * * * annually as to the * * *

Q. (Interposing): Just a moment.

A. I am leaving out part of it.

Q. "To be charged to the earned surplus account annually?"

A. Which one is that, Judge?

Q. Well, are you leaving out language now? Are you deliberately leaving out language, now? Are you deliberately leaving that out?

A. Yes, sir.

Q. What are you omitting?

A. I am omitting the following:

"now in an estimated lump sum or," I am, leaving that out.

Q. You are leaving out, "now in an estimated lump sum or,"?

7845 A. Yes, sir.

Q. Proceed.

A. Continuing:

"annually as the actual payments are made and not to the current and future annual income accounts; we think that procedure is permissible."

Trial Examiner Ballinger: Does the Examiner understand that you are in agreement with the provision you have read, with the portions extracted as stated by you?

The Witness: Yes, sir.

By Mr. Hanley:

Q. Proceed.

A. Now—

Trial Examiner Ballinger: You are in disagreement with the remainder of the answer?

The Witness: Well, I am to the extent that I think that the whole of the last part of Answer No. 3 of the procedure for the reason that I gave for the last part of Answer No. 3—

Trial Examiner Ballinger: I did not hear that.

Mr. Hanley: I did not hear you, Mr. Witness.

By Mr. Hanley:

Q. Please repeat your answer. You spoke so low I did not hear you.

7846 A. As to the last part of Answer No. 3, the procedure described may be permissible for the reasons given in that answer, but I do not agree that it is preferable because it is logical and in accord with an accrual system of accounting to apply such payments to the years for which the services were rendered.

Q. Well, then the fact is, Mr. Lundball, that you disagree with all of Answer No. 3 except that portion which you quoted and stated affirmatively that you agreed with?

A. Yes, sir.
Q. How about Answer No. 4?
A. I do not agree with the No. 4 answer.
Q. Very well. Please refer to Answer No. 5.
A. Well, there are three parts to that answer.
Q. They are numbered.
A. They are numbered 1, 2, 3, on page 7574.
Q. Well, do you agree with No. 1?
A. I agree with No. 1.
Q. You do?
A. Yes, sir.
Q. I did not hear.
A. I do.
Q. No. 2?
A. I do not agree with No. 2.
Q. No. 3?
A. No.

7847 Q. You have either heard or read the testimony of Mr. Warmack in connection with this same group of answers? Have you not done that, Mr. Lundball?

A. I heard him.

Q. In view of your testimony just now given, it is a fact, is it not, that you are not in agreement with him as to his views of the accounting principle set forth in Answers 1 to 5, both inclusive?

Mr. Austin: I object to that, your Honor. It is immaterial if he agrees with Mr. Warmack or not. They both have gone on the stand and given their opinions and the record will speak for itself as to whether they agree or disagree as to any part of this matter or not.

Mr. Hanley: The whole question is 'What is good accounting?

The Witness: Well, Judge Hanley, I do not recall just what Mr. Warmack said, I do not know whether I am in agreement in entirety with Mr. Warmack or not. I would have to look at the record in order to find out whether I am in complete agreement with him or in complete disagreement with him.

By Mr. Hanley:

Q. Well, perhaps we will have to rely on the record, Mr. Lundball.

A. Perhaps so, sir.

7848 Mr. Hanley: You may take your witness.

Trial Examiner Ballinger: Redirect examination.

Redirect Examination by Mr. Austin.

Q. Mr. Lundball, you were asked a question on cross examination as to whether the method of handling this expense in account 520 particularly with respect to the one hundred and eight thousand dollars plus item was in accord with Federal Income Tax regulations.

I think you answered that, perhaps, it was or that it might be. I am not sure exactly how positive your answer was in that respect.

But I wanted to ask you whether you could tell us what you understood counsel to mean by, "being in accord, with Federal Income Tax regulations," and whether it is your understanding that Federal Income Tax regulations provide any method for handling this class of expense?

A. Well, I think my answer to Judge Hanley's question, that I sufficiently qualified my answer to indicate that while I thought that generally speaking such payments were properly deductible for tax purposes, I would not know what the company situation was, because I had not studied the tax records of the company.

Trial Examiner Ballinger: Mr. Austin, is that material to this case? I refer to the income tax situation.

7849 Mr. Austin: I doubt it, but the question was asked and the answer given.

Trial Examiner Ballinger: The Income Tax Bureau determines the profit and loss of the operations. In this case we are now trying, we are ascertaining a cost differential. Are they not separate and distinct propositions?

Mr. Hanley: It is the position of the Respondent, your Honor, this, that your Honor is quite right in saying that the Government determines profit and loss, but in so doing they permit only proper expenses and costs for the period involved.

That is the whole point of whether or not it is a properly deductible cost for the period involved.

Trial Examiner Ballinger: There is no question in the world but what it is a cost?

Mr. Hanley: And for the period involved, so far as the Federal Government is concerned.

Trial Examiner Ballinger: And if determined a profit and loss of the company, it is a cost that was incurred; that is, paid in a certain year. It may very well present an entirely different proposition from the question present in this case. That is a matter, I think, of argument.

The Witness: The question of the statute of limitations may run, so that they may want to afford relief to the taxpayers.

7850 Trial Examiner Ballinger: Let us not get into the statute of limitations.

We will take a three minute recess.

(A short recess was taken.)

Trial Examiner Ballinger: Come to order. You may proceed.

By Mr. Austin:

Q. Mr. Lundball, are profits on sales of capital assets taxable under the Income Tax Laws?

Mr. Hanley: What is the question?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

Mr. Hanley: That is objected to as immaterial. I have never heard of that before in this lawsuit. I think I have heard of everything, but I have not heard of that.

Trial Examiner Ballinger: Where does that become material?

Mr. Austin: It is contended by counsel for the Respondent that if the Income Tax people charge these annuity payments or allow them as charged against income that that has some materiality.

Mr. Hanley: That has not anything to do with capital. Nobody has ever contended yet in this lawsuit that account 520 was capital.

Trial Examiner Ballinger: To save time, let the 7851 witness answer the question.

The Witness: I—

Mr. Hanley: That is objected to. I want to pursue that just a moment further. I object to that as incompetent, irrelevant, and immaterial. It has nothing to do with this case. It has never heretofore been suggested by anyone else in this lawsuit. It is improper rebuttal, for, referring to account 520, that part of the account 520 has never been referred to as a capital account, and it is not a capital account, and can have no relevancy at all with reference to any account that has so far been indicated in the case;

And further, that it is improper indirect examination, because the subject, on account 520 or any other account, was not gone into on the cross-examination of this witness.

Mr. Austin: Your Honor, the sole purpose is just this:

To show that the fact, if it be a fact, that the Internal Revenue Bureau taxes certain items of income or profit, or allows certain other things as credits, does not prove anything.

I just want to bring out, if I can, that profit and loss and/or capital loss in internal revenue income tax computations, entering into income tax pictures, do not have anything to do with the current income or expense. Of course, there may be a lot of other items. This is just an example.

7852 Trial Examiner Ballinger: The Examiner would under normal conditions sustain the objection to the question on the ground that it is utterly immaterial to the case, but he has let in a lot of other material in this record broadening the scope of the examination.

The Examiner overrules the objection and if the witness can answer, he may do so.

Read the question.

(The reporter read the question as follows:

"Q. Mr. Lundball, are profits on sales of capital assets taxable under the Income Tax Laws?")

The Witness: I understand that they are.

By Mr. Austin:

Q. Are capital losses deductible from—

A. (Interposing): I think so.

Q. —from the gross income in determining net income?

A. I think the tax concept of profit—of accounting as distinguished from—

Trial Examiner Ballinger: (Interposing): Mr. Lundball, unless you know with reasonable certainty, why, you are not in a position to answer the question. If you do know, you may answer.

Mr. Austin: Well, he did answer the question and he gave a further opinion, or was giving it.

Mr. Hanley: Have you finished your answer, Mr. 7853 Lundball?

The Witness: Well, I was going to say that the accounting for tax purposes is influenced by the statute in the collection of taxes, and to some extent, it differs from the accounting for management purposes.

By Mr. Austin:

Q. Well, are profits and losses from the sales of capital assets, in your opinion, income or expense from current operation?

Mr. Hanley: Same objection. We are just taking a flight to the moon, here, Judge.

Trial Examiner Ballinger: The objection is overruled, but the Examiner is not going to permit a continuation of this line of examination.

By Mr. Austin:

Q. I would like to amend that, to a "current marketing operation"?

A. No. I do not think so, because they are outside of the normal business operations of the company; that is, they do not result from the sale of the company's products but they result from the sale of property with which the company does business.

Mr. Austin: That is all.

Recross Examination by Mr. Hanley.

7854 Q. One question, if you know: Under the accounting procedure of the Respondent company, is account 520 a capital account?

A. No, sir.

Mr. Hanley: In view of the answer of the witness, the Respondent now moves to strike all of the redirect examination for all of the reasons indicated in the objections to the question.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

The motion is granted and the testimony is stricken.

Mr. Austin: Well, then, your Honor, I now move to strike out the question and answer of Mr. Hanley and the witness respectively, regarding whether or not Respondent's procedure in connection with account 520 was in accord with Federal Income Tax regulations.

Mr. Hanley: Well, that motion is certain resisted. That was asked on the basis of the nature of the account, which is not a capital account.

Trial Examiner Ballinger: The motion of counsel for the Commission is denied.

Mr. Austin: Then, your Honor, as I understand it, you leave in the testimony of the Respondent that is in response to questions of the Respondent's counsel in

regard to Federal income tax and you strike from the
7855 record my redirect examination on exactly the same
subject.

Trial Examiner Ballinger: No.

Mr. Austin: That is the effect of your Honor's ruling.

Mr. Hanley: That is objected to as polling the ruling of the Examiner.

Trial Examiner Ballinger: That is a question which is not presented in this case, and it is in no wise connected with account No. 520. For that reason it was excluded.

Mr. Austin: Your Honor, I would like to go into that further—

Trial Examiner Ballinger: (Interposing): The record speaks for itself. The matter is closed.

Mr. Austin: I would like to be off the record, if there is no objection.

Mr. Hanley: No objection.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: If your Honor please,—

Mr. Austin: (Interposing): If your Honor please, right at this stage of the case, I am sorry, but unless your Honor will read the testimony over, in which event I will accept your Honor's ruling, but I think that you are under
a misconception of the witness' testimony that you
7856 struck out, in that you struck out testimony which
directly relates to Respondent's questions.

Trial Examiner Ballinger: Go back and read the cross-examination by Judge Hanley.

Mr. Austin: If you will do that, I will not say another word.

Mr. Hanley: Well, first take this:

The Respondent objects to counsel for the Commission directing the Trial Examiner as to what testimony or ruling shall stand.

Trial Examiner Ballinger: It is immaterial to the Trial Examiner whether that appeal is taken from his ruling or not, but in order to clarify the record at this point, I will permit that to be read.

Mr. Hanley: Your Honor is permitting it to be reconsidered?

Trial Examiner Ballinger: In order that the Trial Examiner may satisfy himself as to the correctness of the ruling, the reporter is instructed to turn to the question of Judge Hanley, and read the question and answer.

Mr. Hanley: That was my last recross examination question, as I understand it.

Trial Examiner Ballinger: The reporter is directed to read the entire recross examination and redirect examination of this witness.

7857 Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: This procedure is objected to on the part of the Respondent as being highly prejudicial to the rights of the Respondent in that counsel for the Commission has persistently argued with the Court, and has polled the rulings of the Court after the Court has distinctly said that a ruling had been made.

Mr. Austin: I think that the Court is under a misapprehension, and if that is true, I think I am only aiding justice in asking that the matter be corrected at the time.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

The Examiner overrules counsel for the Respondent and directs the reporter to read the redirect testimony thus far given.

(The reporter read the redirect testimony of the witness thus far given.)

Trial Examiner Ballinger: The Examiner modifies his previous ruling and limits the testimony to strike that portion of the redirect commencing with the question:
7858 "Mr. Lundball, are profits on sales of capital assets taxable under the Income Tax Laws?"

The remainder of the testimony is stricken.

Any further questions of the witness?

Does either counsel desire to ask any further questions of the witness?

Mr. Hanley: No, sir.

Mr. Austin: No, sir.

Trial Examiner Ballinger: You are excused.

(Witness excused.)

Trial Examiner Ballinger: We will take a five minute recess.

(A short recess was taken.)

Trial Examiner Ballinger: Come to order.

Call your next witness.

Mr. Hanley: At this time, the Respondent moves to strike from the testimony all of the testimony of the witness Lundball for all the reasons assigned in the objections to this testimony.

Trial Examiner Ballinger: The Motion is denied.

Mr. Austin: I will call Mr. Depue as my next witness.

CARL HARMON DEPUE was thereupon called as a witness for the Commission and, having first been duly sworn, testified as follows:

7859 *Direct Examination by Mr. Austin.*

Q. Please state your name.

A. Carl Harmon Depue.

Q. Where do you reside, Mr. Depue?

A. Washington, D. C.

Q. Are you employed by the Federal Trade Commission?

A. I am.

Q. What is your position with the Federal Trade Commission?

A. Well, supervisor of investigations.

Mr. Hanley: If you will speak a little bit louder, please, Mr. Depue, I have a little difficulty in hearing you.

The Witness: I said—supervisor of investigations.

By Mr. Austin:

Q. In what capacity?

A. Examiner-in-charge.

Q. Are you concerned with accounting matters?

A. Yes. Many of them involve cost studies. Most of them do.

Q. Are you an accountant, Mr. Depue?

A. I am a certified public accountant.

Q. You are a certified public accountant?

A. Yes, sir.

Q. What state?

A. Indiana.

Trial Examiner Ballinger: What state?

7860 The Witness: Indiana.

By Mr. Austin:

Q: How long have you been in the employ of the Federal Trade Commission?

A. Thirteen years.

Q. Have your dealings involved accounting questions, and matters of accounting during all of that period?

A. Yes, sir.

Q. Will you explain a little more in detail the nature of your work with the Federal Trade Commission in connection with accounting practice, and particularly in relation to the Robinson-Patman Act matters, if you have been so concerned?

A. Well, the investigations are mostly industry-wide—

Mr. Hanley: What was that?

The Witness: Industry-wide.

Mr. Austin: Industry-wide?

The Witness: Yes.

By Mr. Austin:

Q. Continue.

A. And most of them deal with cost studies, but some of them are financial. I was responsible for consideration and review of all cost studies submitted for four or five years, submitted under the Robinson-Patman Act.

I believe, not in answer to your question, but perhaps I should state this:

7861 I have had a great many years of public practice, and also during the last war, in the War Department, in cost studies—studies of claims arising under the subject of cancelled contracts. I have been particulary concerned, to a large extent, with every aspect of accounting, more or less directly.

Q. You say you have been concerned to a certain extent with practically every aspect of accounting?

A. Yes. I have been directly concerned, I would say, to a very large extent with every aspect of accounting.

Q. What was the last part of your answer?

A. I say, I have been directly concerned, to a large extent, with every aspect of accounting.

Mr. Hanley: What was the last?

The Witness: I said, I have been concerned directly to a large extent with every aspect of accounting.

Mr. Austin: Directly concerned to a large extent with every aspect of accounting.

Trial Examiner Ballinger: How long were you a public accountant before you came with the Commission?

The Witness: Eight years.

By Mr. Austin:

Q. How many years was that?

A. Eight years.

Trial Examiner Ballinger: In Indiana?

7862 The Witness: No, Cincinnati, Ohio.

Trial Examiner Ballinger: Of what societies are you a member, if any?

The Witness: I was a member of the American Institute of Accountants;

National Association of Cost Accountants;

Indiana Society of Certified Accountants.

By Mr. Austin:

Q. Are you familiar with Mr. Warmack's testimony in this case regarding Respondent's Account No. 520, entitled "Annuities and Retirement Plan Expense"?

A. Yes, sir. I heard it.

Q. I am referring particularly to Mr. Warmack's testimony regarding the nature of the expense going into this account.

A. Yes, sir. I heard it.

Q. Have you seen the Commission's Exhibit 108, which is the booklet setting forth the Respondent's annuity and retirement plan?

A. Yes, sir.

Q. Have you read it?

A. Yes, sir.

Q. Did you hear Mr. Lundball's testimony this morning?

A. I did.

Q. The expense in the amount of $157,014.35 entered in account 520 in Respondent's Exhibit 101 has been 7863 described by Mr. Warmack and Mr. Lundball as comprising three parts, as follows:

The first item of $26,226.38, being contributions made by the company to match contributions made by employees engaged in the Detroit field.

Second: The item of $108,508.83, being a portion of the amount contributed by the Respondent company in 1940 to a trust fund set up for the purpose of covering the retirement benefits to employees for services performed to January 1, 1939.

The third item of $22,279.06, being payments made by the Respondent company for the year 1940 to employees; that is, former employees of the Respondent who retired prior to January 1, 1939.

I would like to have you take each of those three items of expense, Mr. Depue, and state whether or not in your opinion those items, or any of them, are selling costs of the Respondent company for the year 1940?

A. I—

Mr. Hanley: (Interposing): Now, just a moment, Mr. Depue. May I ask a foundational question, your Honor?

Trial Examiner Ballinger: You may.

Mr. Hanley: Have you read Respondent's Exhibit 99?

The Witness: No.

7864 Mr. Hanley: Have you read Respondent's Exhibit 100?

The Witness: No.

Mr. Hanley: Have you read and studied Respondent's Exhibit 101?

The Witness: I glanced over it.

Mr. Hanley: Why, I did not hear your answer. I am sorry.

The Witness: I glanced over it.

Trial Examiner Ballinger: He said, he glanced over it.

Mr. Hanley: Oh, thank you.

Have you read all of the testimony of Mr. Boatwright?

The Witness: I have not read any of it.

Mr. Hanley: Did you hear it?

The Witness: I heard some of it.

Mr. Hanley: Have you heard or read all of the testimony of Mr. Warmack?

The Witness: Did you say "all"?

Trial Examiner Ballinger: All.

Mr. Hanley: Have you heard or read all of the testimony of Mr. Warmack?

The Witness: No.

Mr. Hanley: Have you ever been in any office of the Respondent company?

The Witness: No.

7865 Mr. Hanley: Have you ever examined any of the records and files, data, and accounting matter of the Respondent company?

The Witness: Nothing except that which was or would pertain to account 520.

Mr. Hanley: That is to say, this booklet, Commission's Exhibit No. 108?

The Witness: Yes, sir. And the figures that were stated just now I heard.

Mr. Hanley: Is that all that you know about this matter, Mr. Depue?

The Witness: That is all that I have. I think that describes the figures referred to.

Mr. Hanley: The Respondent now objects to the witness giving any expert, critical opinion as to anything in respect of Respondent's accounting or the Respondent's case so far as it refers to the Respondent's cost study here submitted, for the reason that his affirmative testimony has demonstrated that he is legally incompetent to testify in respect of any critical, expert opinion, not having made any study of any of the matters involved to any sufficient extent to enable him or qualify him as a competent, expert witness on this particular problem.

Trial Examiner Ballinger: I will hear from counsel for the Commission.

7866 Mr. Austin: May I ask a question, please of the witness, before answering your Honor?

Trial Examiner Ballinger: You may.

By Mr. Austin:

Q. I believe I understood you to say that you were familiar with Mr. Warmack's testimony as to the description of the nature of these three various types of expense entering into account 520.

A. I did. I read it.

Q. You also stated that you heard Mr. Lundball's testimony this morning?

A. Yes, sir.

Q. In regard to the account?

A. Yes, sir.

Mr. Austin: If your Honor please, this question goes solely to whether the expense going into this account; that is, these various payments to trust funds and for annuities, and so forth, are marketing expense for the year in which they were paid.

It does not involve or require any knowledge of why or how or where the Respondent allocated these costs because you do not get to the question of allocation if they are not proper marketing costs.

So, Exhibit 99 and Exhibit 100, and any examination of the Respondent's books to determine whether the expense was actually paid, or how the amount of the 7867 payment was arrived at, is entirely beside the point.

The witness is being asked, as an expert accountant, whether these payments did or did not constitute marketing expense for the year 1940.

All that he had to know to answer the question is the nature of the expense itself and the purpose for which it was made, and when it was made. And that he does know, according to his testimony, both from having read the record on the subject, and from having listened to Mr. Lundball this morning.

Trial Examiner Ballinger: The testimony is purely cumulative? Is it not that?

Mr. Austin: It is cumulative to that of Mr. Warmack and Mr. Lundball with regard to this same account. I think his qualifications are exactly the same as those of Mr. Lundball for giving his answer.

Trial Examiner Ballinger: No, Mr. Lundball qualified himself much better than this witness.

However, as the objection, in the opinion of the Examiner, runs to the weight of the witness' evidence, rather than its admissibility, the objection is overruled and the witness may answer.

Mr. Hanley: May it be understood formally that the objection is a continuing one to the opinion evidence by this witness?

7868 Trial Examiner Ballinger: It is so understood, and in addition thereto, the right of counsel to, at the conclusion of the witness' testimony, move to strike his answer.

Read the question to the witness.

(The reporter read the question as follows:

"Q. Did you hear Mr. Lundball's testimony this morning?

"A. I did.

"Q. The expense in the amount of $157,014.35 entered in account 520 in Respondent's Exhibit 101 has been described by Mr. Warmack and Mr. Lundball as comprising three parts, as follows:

"The first item of '$26,226.38, being contributions made by the company to match contributions made by employees engaged in the Detroit field.

"Second: The item of $108,508.83, being a portion of the amount contributed by the Respondent company in 1940 to a trust fund set up for the purpose of covering the retirement benefits to employees for services performed to January 1, 1939.

"The third item of $22,279.06, being payments made by the Respondent company for the year 1940 to employees; that is, former employees of the Respondent who retired prior to January 1, 1939.

"I would like to have you take each of those three
7869 items of expense, Mr. Dupue, and state whether or
not in your opinion those items, or any of them, are selling costs of the Respondent company for the year 1940?")

The Witness: In my opinion, the item of twenty-six thousand dollars plus is a marketing expense for the year 1940.

The other two items of one hundred and eight thousand dollars plus and twenty-two thousand dollars plus properly apply against the operations of the company for the years prior to 1939—prior to 1940.

By Mr. Austin:

Q. What other reasons—what are your reasons, Mr. Depue?

A. Because of an accrual theory, which is customary with most companies, and certainly the larger ones, and has been for a great many years, it would require them to apportion their expense properly against each year's operation so that they would accrue at the end of each year anything that pertains to that year's expense which might not have been paid, and would defer at the end of the year, anything which may have been paid for but properly applied to future years, the object being to determine as exactly as you can reasonably determine, the actual cost of operation, and net profit for each calendar year, or fiscal years, and that goes even for months in many cases so far
as operating statements are concerned.

7870 Therefore, that portion of the pension or contribu-
tions to a pension which are predicated upon prior years' services should have been accrued in those years

had they followed good accounting practice, and inasmuch as they did not do so, should now be applied against earned surplus prior to 1940.

Q. Does that statement apply to both the one hundred and eight thousand dollar item and the twenty-two thousand dollar item?

A. Yes. They should both apply against earnings for prior years because they are based upon services rendered during prior years.

Mr. Austin: You may have the witness.

Mr. Hanley: The Respondent now moves to strike all of the testimony beginning with the first undertaking to express an opinion as to the accounting practices of the Respondent, or the validity of the accounting soundness of any of the procedures of the Respondent company for all of the reasons indicated in the objection to the question;

For the further reason that it is purely cumulative;

And for the additional reason that the witness, after having said that he made no study, is and has assumed to say that the Respondent company failed to pursue
7871 good accounting practices in 1939 and prior years,
when his affirmative testimony indicates that he just does not know anything about it.

Trial Examiner Ballinger: The motion to strike is denied.

Mr. Austin: Any cross-examination?

Mr. Hanley: Yes.

Cross-Examination by Mr. Hanley.

Q. Are the items of one hundred and eight thousand dollars and the twenty-two thousand dollar item marketing costs?

A. Yes.

Q. Is the force of your testimony simply that they are not applicable in any part to the year 1940?

A. That is right.

Q. If the Respondent company or any company has a plan of pensions or annuities spreading over the years of retirement of any employee or group of employees, in your judgment as an accountant, is it not proper that from year to year that company may make provision for that indefinite liability by spreading from year to year currently the cost of building up the fund to care for such liability?

Trial Examiner Ballinger: Do you understand the question?

The Witness: Can I have the question again?

7872 Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

(There was a short pause.)

Trial Examiner Ballinger: Do you understand the question?

The Witness: I think it would have been proper for them to accrue the burden determined actuarily which would apply to each of those years.

By Mr. Hanley:

Q. Do you think it improper accounting to accrue the burden of paying present employees for past services by applying the funds currently toward the trust fund to take care of that obligation, as for instance in the case of the one hundred and eight thousand dollar item?

A. There is nothing wrong about that. If I understand your question, it is as to whether or not those contributions may be made in 1939 or 1940 in contemplation of future years. If I understand the question, it goes to whether or not those contributions should be treated as current expense of this year—of each of those years in which the contribution is made.

Is that the question may I ask?

Q. The question is, Mr. Depue, that John Jones is working for the company today. In all probability he will be working for the company for some years to come. There will come a time when he will retire. He was working 7873 for the company in 1939 and prior years. In 1939, the plan of the company—if you do not know it, it is a fact—was changed in reference to annuities, but the obligation of the company in respect of the annuities of that employee were given consideration on the basis of the old plan in effect up to 1939.

Now, I am asking you if it is bad accounting on an accrual basis, or any other kind of a basis, to give consideration currently to applying to a fund as the company goes along, as a continuing cost into these various funds to ultimately take care of the obligation to pay the annuity to this hypothetical employee, John Jones?

A. There is nothing wrong about building up a fund. It is only a question of into what years the expenses are going to be put, or you are going to charge your contributions.

Q. Well, how would you do it? If you have the problem, and if you were going to build up the fund, one year along with another, just how would you do it?

A. It would be just like your twenty-six thousand dollar item was handled, so should each of the others be handled, and for the prior years the cost would apply against the operations of the prior years.

Q. That is to say that no part of any obligation of the company in reference to annuities which may be pay-
able for services performed in 1939 can be charged
7874 up from that time on forever during the operations of
this company?

A. That is right, in my opinion, it is not a charge against a subsequent period.

Q. Very well. You heard Mr. Lundball's testimony.

A. Yes.

Q. I refer you to page 7569 of the record through to the top of page 7575, which is a statement of facts testified to here by Mr. Warmack as being comparable to the practice of the Respondent company in respect of its annuity plan; also five opinions or answers denominated as Answers 1 to 5, inclusive.

I will ask you to state whether or not you agree in principle with the method of accounting there outlined in answers 1 to 5, inclusive.

A. I do not agree with Answer No. 1.

Q. How about Answer No. 2?

A. I agree with only that portion which says:

"Had the directors chosen to make a lump payment of the total estimated required amount, and at the same time, gone on record that such payment was in recognition and settlement of past services rendered, then a permissible treatment would have been to charge the payment to earned surplus."

Q. How about No. 3? By the way, Mr. Depue, are you
reading the things here from notes you prepared or
7875 that some other accountant, in part, prepared?

A. I prepared them myself.

Q. Just adverting to your last answer for the moment, before you proceed to answer No. 3, you have quoted some language with which you agree?

A. Yes, sir.

Q. What difference from an accounting standpoint does it make, if any, that the directors had gone on record as doing this, or that, or something else?

A. Well, it establishes and gives recognition to the obligation that you are dealing with, and to the charge to which it pertains.

Q. Suppose they go on record every year, currently?

A. Well, that is all right.

Q. How does that affect the one hundred and eight thousand dollar item?

A. I would make my answer this way:

That the language to which you referred helps to establish the facts which must govern and to determine what is the proper procedure and how it should be treated. Anything and everything that contributes to establishing the facts, all help in determining the practice which would be proper.

Q. Did the Standard Oil Company go on record by its management or Board of Directors—

7876 A. (Interposing): Yes.

Q. —or stockholders?

A. Yes, Exhibit 108, I think it is in the plan which you published, it is stated that the trust fund was created to pay pensions based upon past services.

Q. And the only objection you have is that they did not put it all at once into the fund, but spread it out over the future years? Is that correct?

A. From an accounting standpoint, it does not matter when they are paid. It is only a question of when the pension was earned, and when the services were rendered to the company by reason of which it is paid.

Q. Mr. Depue, when is a pension earned, if a man works twenty-five years, when is a pension earned?

A. The amount of his pension, in that case, and in most cases, depends on the length of service, so much every year, and he is earning it in a sense, the pension that he will ultimately receive and the company is receiving services of which it is going to benefit and for which it is going to pay the pension year by year.

Q. Actually. Now, will you proceed to Answer No. 3, Mr. Depue? Please, Mr. Depue.

A. Yes.

Q. You have that?

7877 A. I agree with that part of Answer No. 3, appearing at page 7572, which reads as follows:

"Thus the basis of the payments is apparently related to services rendered by the employees prior to the inception of the Social Security Act. Having regard to this retroactive feature, it might therefore be asserted that the annual payments to be made should be charged to the earned surplus account."

I disagree with the part expressed in the next few words which read as follows: "* * * now in an estimated lump sum or"—the remainder with which I do agree reads as follows:

"annually as the actual payments are made and not to the current and future annual income accounts; we think that procedure is permissible."

I do not subscribe in full to the remainder of No. 3.

Q. How much?

A. (The witness examined the remaining part of No. 3.)

The Witness: I disagree with the remainder of it. I do not agree with the remainder of it.

By Mr. Hanley:

Q. How about No. 4?

A. I disagree with No. 4.

Q. How about No. 5?

A. I agree with the first paragraph, numbered one. I do not agree with the remainder—not with the remainder.

7878 Q. Did you supply Mr. Lundvall with a copy of the memorandum which you prepared in connection with these five answers, and from which he testified this morning?

A. No.

As a matter of fact, the memorandum you refer to was prepared by both of us jointly. We went over and considered these questions and it just happened that we were in entire agreement, in our opinions, in our own opinions, and it is only a reminder to help us find what we agree with and what we do not.

Q. Did you discuss it before you agreed?

A. No. We were in agreement, because we both held the same opinions concerning the only questions involved.

Q. Mr. Depue, the first time you discussed it, did you both independently delete from answer No. 3, the words:

"now in an estimated lump sum or * * *"

Did you discuss this problem?

Mr. Austin: Your Honor, I object to that question. It is immaterial whether they did or did not discuss it before or after. The witness has testified that he and Mr. Lundvall discussed these answers to these questions together and arrived at their conclusions, and that they were in agreement.

Trial Examiner Ballinger: This is cross-examina-
7879 tion.

Mr. Austin: That is all right.

Trial Examiner Ballinger: It is permissible.

Mr. Austin: Is the objection overruled.

Trial Examiner Ballinger: The objection is overruled.

By Mr. Hanley:

Q. The Court says you may answer, Mr. Depue.

Trial Examiner Ballinger: Read the question to the witness.

(The reporter read the question as follows:

"Q. Mr. Depue, the first time you discussed it, did you both independently delete from answer No. 3, the words:

" 'now in an estimated lump sum or * * *'

"Did you discuss this problem?")

The Witness: Well, I think it would be helpful if I answered your question this way, that we had before us a copy of these various answers that were made, and one of us would read, and if there seemed to be an occasion to pause, we would, and each would express his thoughts paragraph by paragraph, or sentence by sentence as the case may be. We were in accord from beginning to end. That is all there is to it.

By Mr. Hanley:

7880 Q. Did you discuss it with Mr. Warmack?

A. No.

Q. Ever?

A. No.

Q. You are familiar with the testimony in connection with these five answers given by Mr. Warmack?

A. I have heard it, but I do not recall it. I do not believe I remember it very well.

Q. Were you in agreement with his answers?

A. I do not know because he was referring to the various lines, and I do not know to just what he was referring.

Q. Did you hear him quote various portions with which he stated he was in agreement or disagreement?

A. Yes, sir.

Q. Do you or did you agree with his answers at that time?

A. The only impression I had was that I thought I could not be specific, I do not know whether I was completely or not.

Q. Do you know whether you are in agreement with him now?

A. I do not know.

Q. Do you know whether you are now agreeing with him?

A. I do not know that either.

Mr. Hanley: Take the witness.

Redirect Examination by Mr. Austin.

Q. Mr. Depue, in your opinion, are current contributions to annuity funds for marketing services properly applicable to current marketing costs? 7881

A. Yes, sir.

Q. In your opinion, are current contributions to annuity funds for past years' services applicable to current marketing costs?

A. No.

Mr. Austin: That is all.

Mr. Hanley: That is all.

Trial Examiner Ballinger: Proceed.

Mr. Hanley: The Respondent now moves to strike the entire testimony of the witness in respect of any opinions expressed by the witness relative to the accounting of the Respondent company or its procedures, or in connection with this cost study, for all the reasons assigned in its objection to the witness' testimony, and in the motion at the close of its direct testimony;

And for the further reason that it now affirmatively appears that if the witness has heard anything about this matter, it is a matter of pure hearsay so far as this witness is concerned;

That he has made no study whatever independently of any one in connection with this matter.

Trial Examiner Ballinger: The motion to strike is denied.

7881-A Mr. Depue, you are excused.

(Witness excused)

Mr. Austin: If your Honor please, I move that we be in recess for lunch to reconvene at two o'clock p. m.

Trial Examiner Ballinger: Motion is granted.

And now, at 12:25 p. m., the hearing stands in recess until 2:00 p. m.

(Whereupon, at 12:25 p. m., a recess was taken until 2:00 p. m., this day.)

7882

Afternoon Session

2:00 p. m.

Trial Examiner Ballinger: Come to order.

The Examiner is prepared to rule on the motion of counsel for the Commission to strike Respondent's Exhibit No. 3 from the record, it being contended by counsel for the Commission that if Respondent's Exhibit No. 3 is permitted to remain in the record, then evidence based upon Moody's Industrial Manual is admissible.

The Examiner disagrees with the contention of counsel for the Commission.

Respondent's Exhibit No. 3 is based upon a publication issued by the Federal Reserve Board or Federal Reserve Bank. As the Examiner recalls, this was printed at the Government Printing Office, and is a public document.

The Examiner conceives a plain distinction between the document referred to by counsel for the Commission and the document admitted in evidence as Respondent's Exhibit No. 3.

The motion is denied.

Mr. Austin: Well, the Commission rests its case on rebuttal at this time.

Trial Examiner Ballinger: Is the Respondent ready to proceed?

7883 Mr. Hanley: I understand that means that the Commission rests its case. Am I right in that understanding, your Honor?

Trial Examiner Ballinger: That is what the Examiner understands.

Mr. Hanley: The Commission having finally rested its case, Respondent renews all of its motion for dismissal of this action in whole or in part;

Respondent reserves and renews all of its objections to evidence and motions in respect of evidence received against the Respondent and over the objection or against the motions of the Respondent for all of the reasons at the time set forth;

Respondent specifically renews its motions to strike from the record the testimony of Messrs. Warmack, Lundball, and Depue, for the reasons as set out in the objections to such testimony, and in the motions to strike.

Trial Examiner Ballinger: That portion of the motion relating to the dismissal of the proceeding is a matter over which the Examiner has no jurisdiction and should be addressed to the Commission.

All of the remaining portions of the motion are denied.

Mr. Hanley: Mr. Boatwright, will you take the stand, please?

7884 JOHN W. BOATWRIGHT was thereupon recalled as a witness for the Respondent and, having been previously duly sworn, testified further as follows:

Direct Examination by Mr. Hanley.

Q. You are Mr. J. W. Boatwright?

A. Yes.

Q. Mr. Boatwright, you have heretofore been sworn in this case, and have testified at considerable length? Is that correct?

A. Yes, sir.

Q. I direct your attention now to Commission's Exhibit 129. Does the six one-hundredths of a cent per gallon selling cost for gasoline as set forth in that exhibit provide a sound comparison with the selling cost of .079 cents, as set forth in Respondent's Exhibit 31?

After you have given your answer, please explain your reasons for that answer, Mr. Boatwright.

A. .06 cents per gallon, as indicated on Commission's Exhibit 129 is not comparable with the selling cost of .079 as presented in Respondent's Exhibit 31.

There are two reasons for this:

In the first place, the calculation, as made in Commission's Exhibit 129 is predicated upon a single salesman's territory, which is the sport case in a true sense of the word, because there is not another salesman's territory comparable therewith in either the Detroit metropolitan area, or in the Detroit field. 7885

Secondly, it is predicated upon time ratios determined and set forth for the year 1940, which have not been checked with the year 1937, and which may or may not represent the 1937 time allocations.

Incidentally, had it been desired by the accountant for the Commission to compare these, it would have been an easy matter to have checked the ratios in there, in either the Detroit office or the Chicago office.

Q. Did he make any inquiry in that regard?

A. Not to my knowledge.

Q. Referring, Mr. Boatwright, to gallonage as an allocation factor. Were you at any time requested by Mr. Warmack or by anyone on behalf of the Commission to provide any documentary evidence which would substantiate the use of gallonage as an allocation factor?

A. Not to my recollection, but if so, it would have been an easy matter to have supplemented many of the reasons given by Mr. Houghton for the use of the allocation factor.

Q. What are some of those reasons?

Mr. Austin: Objected to unless the witness knows what the reasons were as given by Mr. Houghton. It does not appear that he was in Detroit and heard or saw what Mr. Houghton said or submitted to the witness.

7886 Trial Examiner Ballinger: What have you to say to that?

Mr. Hanley: I will lay a foundation for that.

By Mr. Hanley:

Q. You heard Mr. Houghton's testimony, did you not; Mr. Boatwright?

A. I did.

Q. Now, will you please answer the question?

Mr. Austin: I still object. I do not believe Mr. Houghton's testimony set forth the reasons given by him for the use of the gallonage allocation, except as to the extent that he said that certain checks and tests were made.

Mr. Hanley: Very well, I will proceed a little further.

By Mr. Hanley:

Q. You heard Mr. Warmack's testimony?

A. Yes.

Q. As to what he and Mr. Houghton checked?

A. Yes, sir.

Q. You did?

A. Yes, sir.

Q. And his answers to the questions as to what Mr. Houghton said?

A. Yes, sir.

7887 Q. Very well. Now, will you please answer the former question.

Trial Examiner Ballinger: The question is now renewed, and the reporter will insert it at this time.

(The reporter read the question as follows:

"Q. Referring, Mr. Boatwright, to gallonage as an allocation factor, were you at any time requested by Mr. Warmack or by anyone on behalf of the Commission to provide any documentary evidence which would substantiate the use of gallonage as an allocation factor?

"A. Not to my recollection, but if so, it would have been an easy matter to have supplemented many of the reasons given by Mr. Houghton for the use of the allocation factor.

"Q. What are some of those reasons?")

Mr. Austin: I object to that question, your Honor, because I think it is based upon a conversation between Mr. Warmack and Mr. Houghton in Detroit at the time Mr. Warmack was in Detroit. And Mr. Warmack simply said that he asked for documentary support for the gallonage allocation and did not get it.

And Mr. Houghton says that, to the best of his ability, he explained to Mr. Warmack the reasons of the Respondent for using the gallonage allocations.

What these reasons are does not appear, and I do
7888 not see how Mr. Boatwright could testify that he
could have added to that unless he knows what Mr. Houghton told Mr. Warmack, and he was not present at Detroit at the time, and could not know.

Trial Examiner Ballinger: Well, if the reasons were available and could have been obtained at that time, the witness can testify to them.

Mr. Austin: Well, I am objecting to this on the ground that he says that he could have added to what Mr. Houghton told Mr. Warmack. Perhaps Mr. Warmack told Mr. Houghton what he wanted, and perhaps Mr. Houghton told

Mr. Warmack all there is to know. I do not know, and I do not see how Mr. Boatwright can know either.

If he, the witness, is simply to be asked what the Respondent had in support of a gallonage allocation, that is another thing.

By Mr. Hanley:

Q. Well, let me ask you this—

Mr. Hanley: Mr. Austin, I do not care to be technical about it. I think it is a proper question.

By Mr. Hanley:

Q. In addition to what I have asked you, Mr. Boatwright, you have heard Mr. Houghton's testimony, Mr. Warmack's testimony, and are you now in a position to and will you now state what reasons there are that substantiate the use by the Respondent company of a gallonage
7889 factor as an allocation factor?

A. Yes.

Q. Please do so.

A. May I present my answers in an outline form?

Q. You may.

A. First: The question of gallonage as an allocation factor is one of the most discussed and most studied parts of our entire accounting practice. I know that separately several different men have analyzed the use of this allocation factor. I shall enumerate the men:

(1) is Mr. C. B. Bergeson, the comptroller of the company.

(2) is Mr. Lawrence Hanna, who is a traveling representative of the auditor of the sales accounting department.

(3) and another, is Mr. George Anderson, who has been greatly interested in this problem in connection with the Respondent company;

The fourth one is W. B. Haas, the auditor of the manufacturing accounting department.

Each of these four men have attempted to find allocation factors which, in their judgment, would result in a more true reflection of costs in individual channels than might be afforded by the gallonage basis, and each individually has returned to the conclusion that the use
7890 of the gallonage factor was correct.

Second: Price-Waterhouse, who audits the books of the Respondent company, and they have been asked and have been consulted about the use of the gallonage factor as an allocation procedure on many of our accounts.

As yet they have been unable to suggest a procedure which would more accurately reflect the true costs than that currently obtained by the use of the gallonage factor.

Third: In many of the studies conducted by the sales research department results have been secured which tend to substantiate and support the use of the gallonage factor.

Fourth: There are twenty-eight sales fields in our marketing territory.

If we take the selling cost as represented by salesmen's salaries as one series of data, and if we take the direct gallonage resulting from the effort of these sales representatives, there is a mathematical relationship between the movement of the two series of data which approaches a unit.

We speak in statistics of correlation of two series of data and that more or less means a monthly concurrence of the movements of two series of data.

If the correlation is perfect, it represents a unit of one.

7891 If there is a partial correlation, it may be represented by .6 or .7 or .8.

The higher we can get as we approach unity, the more clearly there is a dependability of the inter-relationship of the movement of the two series. With the salesmen's salaries and gallonage there is a correlation factor in excess of .92.

Fifth—

Q. (Interposing.) Just a moment. Would 100 be perfect?

A. One would be perfect. .92 would be a part of one. The unit is one.

Q. That would be 92/100 of one?

A. That is correct.

Q. I see, I am sorry. Go ahead.

A. Fifth: The next that I was going to mention was office expense, salaries—accounting; another large expense item.

Again taking the series of office expense—salaries—accounting for each of the twenty-eight fields, and taking as a related series of data the gallonage sold and handled on our books in each of those fields, we can come to a very high and significant correlation factor, being in this case .94.

Now, these two are merely mentioned as representative of the high degree of relationship.

I shall continue:

7892 Sixth: The next reason is that from many studies that the sales research department has conducted, we have established as beyond a reasonable doubt, I think that purchases of petroleum products, such as gasoline, motor oil, and so forth, are made by customers each in its turn supplementing the other.

They are used concurrently. They are frequently purchased concurrently.

In the retail channel, approximately 50 per cent of the gasoline purchasers, namely, the motorists will tell us that the reason they buy a specific brand of motor oil is because it is sold at the point where they buy their gasoline. That is based upon interviews with literally tens of thousands of customers.

(a) Another thing we have done, we have taken the actual sales tickets for a full year at 150 of our stations, and placed each of those sales tickets on tabulating cards, and then studied the concurrent sales results which has established again and again that if a farmer, as a means of illustration, buys a year's supply of motor oil in the spring, that our possibilities and our actual sales complement of the Standard fuels which are represented by gasoline, Standard tractor fuel, heavier oil, truck oil, kerosene, and so forth, are much higher than is ~~the case~~ where the farmer is not a purchaser of his annual requirement of motor
7893 oil.

Now I mentioned this picture because it is important to understand that policies are determined upon the basis of customers. Policies being determined upon the basis of customers, you determine that for the various petroleum products required.

Seventh: The next point in the answer is that a large part of our decisions are of necessity predicated upon a gallonage consideration. I need to mention only a few to illustrate the point:

(a) If there is a question as to whether we should build an additional storage tank at a bulk plant, the amount of gallonage which moves through that plant is an important consideration.

(b) If we wish to check the efficiency of our fleet of trucks operating, it is predicated upon the gallonage that they move.

(c) If we wish to determine whether we should lease an outlet, gallonage is given important consideration.

(d) Or, for a leased outlet, if we wish to predicate a decision on the amount of equipment that should be alloted to that outlet, gallonage is an important factor.

(e) Or, if we wish to ascertain whether to open a new outlet, or to close an outlet, then gallonage is an important factor.

(f) In each of these, naturally other things are
7894 taken into consideration, but gallonage is an important part of our thinking.

Eighth: There yet remains a very important part of the answer.

Not only have the various heads of our accounting departments considered the question of gallonage;

Not only have many studies of the research department contributed to the support of that factor;

Not only have we asked and sought and met with outside certified public accountants;

Not only have we constantly consulted with new men that are added to our staff;

Not only that, but we have a set of checks and balances which are used which are conducive to the introduction of many new accounting efficiencies.

I think I can best illustrate that by merely outlining the method by which we check one against the other at all times.

The head of the sales accounting department is Mr. F. L. King. He is assisted by Mr. Herman Rummelhoff. These two gentlemen have their offices in Chicago. They have three traveling efficiency experts representing them in their contact with the field offices. These men are Mr. Hanna, Mr. Ness, Mr. Walters. They travel back and forth, and are constantly on the alert to ascertain:

7895 First: how the various field offices' accounting staffs are following the auditing code of accounts;

Second: to ascertain and determine any new or more efficient means of handling the various accounts, and the allocation of those accounts among the trade channels.

Ninth: In addition to that, each of these twenty-eight office managers of each of the twenty-eight sales fields, and their respective assistants and staff, are parts of what we regard as a chain system of checking as one of three office stations, shall we say, in three different fields, and in three different sections of the territory.

Now, let us assume that the office manager and staff in Kansas City feel that they have a more efficient way of handling a given cost item. It may be an allocation, or it may be a method of entering the expense item to our books. They try that new method out in their own field. After they have tried it out to the point where they become satisfied that it offers an important thing in efficiency, they write up their suggested change of method, and submit it to a second field.

Let us assume that they submit it to Peoria field, which is in an entirely different division of our company. The Peoria field would then attempt, on their records, the suggested modifications suggested by the Kansas City field. After having thoroughly tested and becoming convinced as to the workability of the plan—if Peoria did so
7896 become convinced—they would submit it to still a third field.

In this case, we will assume that it may be Grand Rapids, Michigan, which is in another section or division of our sales department. Whereupon, it would again go through the same process.

Now, if all three of the office managers and their assistants become convinced that such procedure offers a major improvement in efficiency, or a more accurate method, it would then be forwarded to the general office for the consideration of the general office accounting department for general adoption.

If, however, any one of the chain reached the conclusion which was contrary to the opinion of the first field, then they in turn would turn it rght back, after they had written up their opinion as to why it was contrary, and it would then be sent back to the field originating the proposal to ascertain whether or not the difficulty then encountered could be eliminated and make workable in all fields throughout the entire company.

Now, then, this very process of chain checking has developed a great deal of competition among the offices of the Respondent company, and we feel has thereby substantially increased the efficiency of our accounting procedures.

I think those various points are the principal ones
7897 that would support and substantiate the use of a gallonage factor.

Q. One other—

Mr. Austin: One moment, please.

Your Honor, may the reporter read back the second reason given by the witness?

Trial Examiner Ballinger: The reporter will read the second reason given by the witness.

(The reporter read the second reason given by the witness, as follows:

"Second: Price-Waterhouse, who audits the books of the Respondent company, and they have been asked and have been consulted about the use of the gallonage factor as an allocation procedure on many of our accounts.

"As yet they have been unable to suggest a procedure which would more accurately reflect the true costs than that currently obtained by the use of the gallonage factor.")

Mr. Austin: Now, I move to strike that portion of the witness' answer just read by the reporter on the ground that it is nothing more than pure hearsay on the part of the witness;

Furthermore, the witness cannot possibly know what the Price-Waterhouse people might be able to do.

Mr. Hanley: If your Honor please, it is not of-
7898 fered as a matter of the propriety of the Price-Waterhouse's judgment.

It is offered as evidence of what this Respondent company has undertaken to do to improve its accounting procedure. Maybe Price-Waterhouse is completely haywire. That is not the point. The point is that this company has made the effort.

Mr. Austin: The witness testified that Price-Waterhouse was unable to suggest better methods.

Mr. Hanley: Well, let me ask the witness a question before your Honor rules?

Trial Examiner Ballinger: You may.

By Mr. Hanley:

Q. When you said that Price-Waterhouse was unable to offer a better method, Mr. Boatwright, do you mean that Price-Waterhouse just did not offer any better method?

A. That is exactly what I meant.

Trial Examiner Ballinger: The motion to strike is denied.

Mr. Hanley: I might say this—

Trial Examiner Ballinger: (Interposing): The Examiner understands the object and purpose of the statement was to indicate what the Respondent had done, or was doing in an effort to improve its accounting system.

Mr. Hanley: Exactly.

7899 Mr. Austin: That may be, but in this case he attempted to speak for what Price-Waterhouse could do.

By Mr. Hanley:

Q. In connection with this subject, Mr. Boatwright, what is the fact as to the practice of the Respondent company in making a charge of a cost direct to a channel whenever that can be done?

A. Well, over the passage of years, account after account after account has been opened wherever it was possible to make a direct charge; that is, a charge we could make direct to a channel. Wherever this cost, which is incurred only in the tank wagon reseller and tank wagon consumer occurs, the charge is made to the three thousand series, allocated just between those two.

However, if the cost is purely of an overall nature, then it is made to the seven thousand series, and allocated on an all-gallonage basis.

Q. Referring you, Mr. Boatwright, to salesmen's salaries, of which there are several accounts on the regular accounting form 189, Respondent's Exhibit 101.

A. Yes?

Q. Are you able to state from your knowledge of what the Respondent company has done in the matter of attempting various and different methods of allocating salesmen's salaries, and what the experience of the company has been in respect of those accounting efforts.

7900 Mr. Austin: Off the record.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Read the question.

(The reporter read the question.)

The Witness: Referring to that question, Account 004 represents salaries—salesmen. There are other expense accounts which are incident to the operation of it, which are carried separately as expense classifications.

Our experience in an effort to determine an equitable and proper means of allocating this cost has been one of the most difficult problems with which we have wrestled, and our history is quite complete back through 1929, and the testimony in accounting, of the accountant that the Commission put on, which brought out—

By Mr. Hanley:

Q. Do you mean Mr. Warmack?

A. The testimony of the accountant Warmack, for the Commission, which was brought out in this record, in that testimony it was brought out that perhaps more accurate results could be obtained provided all salesmen maintained records of the past allocations of their efforts.

We tried that. We did, in fact, have that method
7901 in practice for quite a period of years. After it had
been in practice for some years, we discontinued it.
We found several things wrong with it:

First: We found a tendency on the part of salesmen, the salesman, to prepare his estimates of the time which were submitted to the office as an actual distribution of time, at the last day of the month, without maintaining records from day to day throughout the month. We found that salesmen are quite loathe to maintain detailed records.

Second: We found next a tendency on the part of salesmen to crystallize at given percentage levels in their preparation of these allocation factors whether they were or were not related to actual distribution of effort.

Third: We found that if we allocated our expense for a period of coming months according to the past records of the accomplishments, even though your salesman may have been extremely conscientious, and even though he may have maintained a careful record, it still was a very poor allocation factor, because of the highly seasonal nature of our merchandise.

Now, one of our principal sales programs and policies is predicated upon the seasonal value and flow of our merchandise. That is necessary.

To illustrate: Tires are usually sold in the month of
December. During that month even an accurate allo-
7902 cation of time predicated upon accurate records of
the salesman, if it were possible for him to make it,

would reflect a heavy proportion of his time devoted to tires. The would be improper to allocate the expense during the month of January, because your tires drive is over in December, and in January you start stocking you resellers with the needed merchandise to take care of the spring change in their motor oil.

Then, suppose we took January as accurate to the last degree. That would be improper for use in March, because during March you have your drive on for specialized products.

If your record for March were completely accurate, it would not be for April, because your reseller salesmen, during April, are devoting their time to developing and training your drive-way personnel in getting the maximum benefits for the change over of motor oil requirements of the customer.

And so on and so forth as we go throughout the year.

Now, that experience, and the analysis that was made was adequate enough to convince the Respondent company personnel that a better means could be found for allocating salesmen expense.

Our next effort was to prepare estimates in the general office with the executive of the sales department in the general office, in view of the contemplated sales plans and programs, who would establish estimates to be used
7903 by the accounting departments for the allocation of
these cost items. That plan was tried for a year or two, but it had to be stopped, because it had several pronounced weaknesses.

First there was a tendency on the part of the executives in the home office to crystallize at given levels.

Secondly, there was a definite error in our thinking because we did not provide for variations of the seasonal demand in these territories from north to south and from east to west.

The seasonal influence of the Duluth field, by way of illustrating, is decidedly different from the seasonal influence of the Wichita, Kansas field, and these variations were not reflected.

And there were weaknesses in the plan beyond that.

Third, the third weakness of the plan was that the sales campaigns in different fields are frequently varied according to the judgment and the dictates of the field managers.

You must leave your respective division managers with

a fairly high degree of initiative if you are going to secure the most satisfactory sales accomplishments. Salesmen do not work on a code of accounts. Correspondingly, one field may have a different campaign, say, a tire campaign in this month, and another field may not have its tire campaign until two months later, or a month later. And by the use of the general office allocation factor, that
7904 was just ironed out, and it was given no consideration whatsoever.

Obviously, another field may have their tire campaign in a different month, and furthermore, tires generally may require quite a different promotion of time in the different reseller territories in one as distinguished from the other, and furthermore, in a rural territory, than they do in a metropolitan territory.

The nature of the competition is quite different.

So that your reseller operation in one section would be different, for instance, your reseller operation would be quite different in North Dakota from what it would be in Chicago or St. Louis. And in the general office estimates they fail to recognize this, and accordingly we felt, after a preliminary examination, that this method was unsatisfactory.

Subsequent to that it was felt advisable that we should place the allocation factors under the direct supervision of the men who supervised the efforts of these men in the field. The instructions provided that they should maintain a memoranda of past accomplishments. This permitted only a varying degree of accuracy in the various fields; that is apparent. In some fields they did adhere to this suggestion and operation quite accurately, in others they base it on the action of certain supervised men, in others they base it on accurate time records for certain classes of salesmen.

7905 Now, let us take our last policy which was introduced in 1936, and which remains in effect today, and let us take the various analyses of various classes of salesmen and people that we apply that policy to, and see what the success of that has been.

These classes of salesmen are indicated, I believe, on Commission's Exhibit 88, 89, 102, and 103, as I recall the numbers.

Q. That is right.

A. If you start with lubricating engineers, your lubricating engineer maintains a weekly time report which he submits of the customer, the product, the time when called, which accordingly gives them time by product.

The lubricating engineers are the supervisors and are the directors of the efforts of the industrial salesmen. The industrial salesmen maintain a call record, but do not submit detailed information on time as do the lubricating engineers.

The lubricating engineers, predicated upon their own distribution of time and their knowledge of the class of men that they supervise, prepare estimates for the industrial salesmen. As a rule those two move in almost identically the same channels and methods.

Now, let us take the next class of salesmen. I may not name them in the order that they are on the
7906 exhibits, but let us take the reseller salesmen in the Detroit field.

In the Detroit field, the reseller salesmen, numbering twenty-six, are observed by four specialized salesmen. It is the duty of the four specialized salesmen to ride with the reseller salesmen, to observe their work, to observe their effort, and to help them on unusually complex and difficult problems that they may encounter.

In addition to the specialized salesmen, there is a sales promoter, who not only follows the activities of the four specialized men, but the twenty-six reseller men. He rides with them, he observes them, he attends their dealer meetings, and field meetings, and he watches them in their work. He has an assistant, who is an assistant promoter, and he does likewise.

Q. Did you mean "dealer"?

A. No. I meant that he attends their field meetings. To continue, then, the assistant field manager in charge of reseller operations, works in a similar capacity.

Accordingly, in Detroit there are seven observers watching the activities of twenty-six men. These seven observers do not maintain formal company records, but they do maintain memoranda that do maintain their records that they make, and they do maintain these checks against the distribution of effort.

7907 Now, the checks against past distribution of effort are then modified and adjusted for the future sales plans of this group.

The next class is the automotive engineer.

The activity of the automotive engineer is not subject to the same fluctuations as are the activities of the reseller salesmen. It is perfectly possible for him to thus maintain a time record of the distribution of his efforts. That is used in the allocation of his expenses.

Next, the B-Station salesmen.

In Detroit I think there are some six or seven B-Station salesmen. These men are watched and are followed by three observers; the assistant manager, wholesale; the sales promoter, wholesale; the assistance sales promoter, wholesale. These three observers in their respective turns prepare the estimates for the distribution of time of these six men which are predicated upon our observation of what the men are doing, modified as they deem necessary to reflect their future sales campaigns.

The asphalt salesman works entirely in one sales channel. His time is charged direct to that channel. His expense is charged direct, and his effort is entered in that channel directly.

The specialized salesmen, fuel oil, fuel oil salesmen work directly in the one channel, the same channel. 7908 Their time is charged directly thereto. There is no need for allocations thereof.

The white oil salesman works out of Chicago and covers several fields. His time is allocated as among the fields according to the amount—his expense is allocated against the various fields according to the time that he spends in each field; that is, that is charged to an account every month. Finally, his volume is also included in that total.

The same idea with regard to the candle salesman.

Finally, we come down to the class of agent salesman. An agent salesman is a combination man that operates a bulk plant and serves in the capacity of an agent, while part of his time is devoted to selling. He maintains a time card of the period that is spent in the operations of the plant. The residual amount of his time is charged to selling, for he is charged with the heavy responsibility of maintaining the sales by the Respondent company in the little geographical area, limited geographical area in which he operates.

His time is then allocated upon the basis of the estimates prepared by the supervisors in the district offices.

Now, this plan has been in effect since 1936.

We know of fields where they have checked the estimates after having been made to ascertain the accuracy of the estimating process.

We likewise follow and pass to a general book in the Chicago office the estimates by class of salesmen, by salesmen channel, and by products. That record is complete for 1936 to date. It permits a charting of the estimates as submitted.

Any time that a field changes an estimated allocation factor from one to another by which as much as three per cent is changed, it is a requirement that the management of that field direct a letter to the Chicago office explaining in detail exactly the reasons why that allocation factor has been changed.

In addition, each of the allocation factors is charted and is compared with similar estimates and similar division of time from time of adjacent fields.

Likewise, separate estimates are secured on the part of the salesmen as a class, and the sales promotion group as a class. This permits a comparison between the allocation factors used in the salesmen's salaries, and the sales promotional salaries, wherein we are able to compare them and to compare to see whether the allocations of the salesmen and the allocations of the effort of the promotional group tend to move concurrently.

They do so tend to move, and there is very high degree of correlation between these two.

Now, all of this information was available in the
7910 general office of the Respondent company, and could
have been examined had it been desired.

Q. Well, did Mr. Warmack ask for it?

A. Not to my knowledge.

Q. He got what he did ask for?

A. To the best of my knowledge.

Q. Did he not?

A. Yes, sir, to the best of my knowledge.

Q. Mr. Boatwright, I am going to read you a quotation beginning from the bottom of page 38 and the top of page 39 from a publication of the Federal Trade Commission directed to the 77th Congress, First Session, and denominated, "House Document No. 287," which has been marked I think heretofore as an exhibit. I think this question has heretofore been put in the record in a question to Mr. Warmack.

I would like, after I have made this quotation, to have you state to the Court whether you agree or disagree with it in principle. If you can do so without referring to all of the rest of the book, please do so.

Quoting:

"It is obviously very difficult and frequently impossible even for observers to ascertain the actual time engaged in each of these direct selling activities applicable to each commodity when the salesman handles numerous
7911 items.

"Perhaps the only basis of ascertaining the estimated time applicable to each commodity would be for the observers or the salesmen to report the approximate segregation of the interview time applicable to each commodity. The balance of the salesmen's time exclusive of the interview time would then have to be prorated to commodities on some reasonable basis according to the circumstances such as ratio to direct time.

"The portion of the salesmen's time represents time in their own office, in travel, and in waiting for customers, and other working time not actually consumed in the direct selling activities. The basis for such prorations naturally must be established in accordance with the circumstances of each particular costing problem in the light of the statistical data available for sound judgment."

A. I do agree with that.

Q. Mr. Boatwright, do you recall some testimony on the part of Mr. Warmack to the effect that he made a calculation in arriving at a ratio of 29.19 per cent in connection with salesmen's salaries as the figures were reflected on Respondent's Exhibit 101, and then made another calculation whereby he arrived at a figure of 2.67 per cent, predicated upon the amount allocated to selesmen's salaries, and placed in the direct shipment channel on Respondent's Exhibit 101?
7912 Do you remember that testimony?

A. Yes, sir, I remember the second figure of 2.67 is taken directly from Respondent's Exhibit 100. It was not calculated by Mr. Warmack.

The other figure was calculated by Mr. Warmack.

Q. I see. Do you recall the evidence of Mr. Warmack wherein he undertook to compare his calculated figure of 29.19 per cent with the percentage of 2.67 per cent derived from Respondent's Exhibit 100?

A. I do.

Q. Will you please explain what your judgment is from an accounting standpoint as to the propriety and sound accounting of that attempted comparison, and give your reasons for your conclusions?

A. Well, it is not necessarily an accounting question that gave rise to the difficulties as much as it is purely a mathematical question.

When the 2.67 per cent, which is based on one figure, was subtracted from the 29.19 per cent, which is based on a second and different figure, the subtracted percentages having different bases, then the component parts result in a mathematical absurdity.

Q. I think I have gone over this enough to understand what you mean, but just to make sure of it, and to explain fully in a homely way, Mr. Boatwright, is not the attempt
to compare the 2.67 per cent and the 29.19 per cent just
7913 like adding up tomatoes and potatoes and getting
lemons?

A. Well, I think of the little book, and the averaging of horses and apples, and then applying the result to cows, when it was done.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: I request a five minute recess.

Trial Examiner Ballinger: The request is granted. We will recess for five minutes.

(A short recess was taken.)

Trial Examiner Ballinger: Come to order.

You may proceed.

By Mr. Hanley:

Q. Now, just before leaving this question of salesmen, Mr. Boatwright. Do you recall the testimony of Mr. Warmack wherein he criticized your methods of pulling salaries out in your cost study as reflected by Respondent's Exhibits 100 and 101, amounting to a difference of approximately two thousand dollars?

A. Yes, sir. I remember that matter to which you refer.

Q. Do you know approximately what that difference would amount to on the differential in cost as claimed by
the Respondent?

7914 A. Well, I have checked Mr. Warmack's figures.

Q. What is it?

A. And the figure that he introduces for the quarter is quite representative of the year, it varies only a few dollars when multiplied by the four quarters. It was inadequate to change the adjustment that he introduced in the record by any material degree, because that, if we would regard that as proper to adopt that method of accounting, as I recall the figure, it was thirty-three ten-thousandths of a cent.

Mr. Austin: That is correct.

The Witness: And the two dollars difference did not change the ratio or that adjustment to several decimal points.

By Mr. Hanley:

Q. I take it from our accounting standpoint that we are willing to accept that thirty-three ten-thousandths of a cent?

A. Well, I do not quite gree that it should be done on that basis, however I have no objection to the thirty-three ten-thousandths of a cent.

Q. You do not agree with Mr. Warmack?

A. No. But it is all right.

Q. Even though it only adds up to thirty-three ten-thousandths of a cent?

7915 A. That is right.

Q. Now, Mr. Boatwright, do you recall that Mr. Warmack, in his testimony, criticized the policy or procedure of the Respondent company in allocating salaries on a composite basis as disclosed by the calculated estimates of time shown in Commission's Exhibits 88, 89, 102, and 103, referring to those calculated estimates of time allocations?

A. I recall that testimony.

Q. Supposing that his method of accounting salesmen ~~an allocation of time, as I recall it was his recommended~~ method that there would be an effect in respect of the following and related accounts like expense accounts, automobile expense, and things of that kind?

A. Well, I cannot say that your recollection of the testimony is exactly in accordance with mine, but I know to what you are referring.

Q. Maybe I am not right in my statement of it, Mr. Boatwright, but you recall his criticisms of those named exhibits?

A. Yes, sir. I recall the criticism based largely upon the fact that it did not give recognition to variations in salaries of the various salesmen. Specifically he mentioned the point that the man who received $400 a month received entirely the same weight as the man who received $200 a month when they added up the units of time and allocated on that basis.

7916 Q. That is right.

A. Now, it just so happens that there are only two fields in any of the territories where that would make any difference in, one being Detroit and the other being Chicago, because we have very few lubricating engineers in other fields.

In the Detroit field, it would make a slight difference. However, if we weigh the salaries then we can not use the same allocation factor for the traveling expenses of salesmen, for the maintenance of the cars, for the depreciation of cars, because—

Q. (Interposing.) Just a moment. So we will all be able to understand you, Mr. Boatwright—

A. Yes, sir.

Q. —was it not the sense of Mr. Warmack's testimony that all of these other expenses follow—

A. (Interposing.) Yes, sir.

Q. —the salary accounts?

A. Yes, sir. But if that method of allocation be used, then you must use different methods to allocate on the supporting expense accounts, because depreciation on cars does not vary in accordance with the salesman's salary paid to the man who drives one of the cars which would be involved in this matter.

Q. Do you mean by that that a four hundred dollar a month salesman could drive a car and it does not wear out any more rapidly than a two hundred dollar a month salesman?

7917 A. That is right.

Q. Proceed.

A. If his method of allocation be used, then a different method of taking care of the operation and maintenance of vehicles, traveling expense—salesmen—depreciation of salesmen's cars, all having used this method on the three accounts other than salesmen's salaries, it would tend to introduce a compensating error to the three supporting accounts, so that it would require the company, if this be accepted, that the allocation factor be set up separately on the salaries, well, they would have to have quite a different allocation factor to be used for the three other accounts unless you wanted to introduce an error in your allocation.

Q. Might not that error be compensated; that is, be a compensating one, once you figured it out?

A. It might be.

Mr. Austin: Do you know whether it is?

The Witness: I would have to figure it out.

By Mr. Hanley:

Q. Did Mr. Warmack, in his testimony, or in any conversation with you, ever tell you whether he had figured it out?

A. No. He did not. I do know this, without making any calculation, that if you weigh your salaries then you must adopt a different allocation factor for your three separate supporting accounts or you are in error.

7918 Q. Adverting to a new topic, Mr. Boatwright, namely, segregation of markets.

A. Yes.

Q. Do you recall the testimony of Mr. Warmack, wherein he stated that some time or other during or prior to your activities in developing the cost study of the Respondent company, as reflected by Respondent's Exhibit 100, he suggested to you a segregation of the commission's employees' territory outside of metropolitan Detroit area, as distinguished from the salaried drivers' area in the metropolitan Detroit area?

A. I recall that such was discussed at a meeting that I had with the counsel for the Commission, and the chief accountant, and Mr. Warmack in August—I think it was in August of 1941—although the segregation which you mentioned is not quite exactly my recollection.

Q. Just what did you understand from any suggestions which may have been set forth or made by Mr. Warmack or any one else at that time?

A. My understanding was—it was in reality a request that the Respondent give consideration to the segregation of two geographical areas, one of them representing the Detroit metropolitan area, which included part sales salary and part commission sales, as segregated and distinct from the rest of the Detroit field, likewise including some salary and some commission points.

7919 Now, that was a request that was first made. There was later on a modification as to distinguish the salary points versus the commission points, I do not recall definitely as to that, but I do recall that this subject was under discussion at the August meeting with the Federal Trade Commission's representatives. As I say, and I want it to be clear, whether or not that was modified as to distinguish the salaried points versus the commission points, I do not recall.

Q. Now, Mr. Boatwright, if you did do anything about it, I wish you would tell the Court, please, exactly what you did do, what happened, and what your conclusions were?

A. Well, we did. We did considerable about it. Throughout that conference I took rather careful notes. And upon my return to Chicago, I requested a meeting of the department heads and the accounting personnel of the company for a discussion of the results of my discussion with the Federal Trade Commission representatives.

We came to this question as to the segregation of the market between the Detroit metropolitan area as distinguished from the rest of the field.

Q. Now, did you go into that? Will you please tell the Court just what and who these people were?

A. Yes, sir.

Q. That you talked to?

7920 A. Yes, sir.

Q. Please do so.

A. At this meeting there was Mr. O. M. Perrenot, who is the assistant comptroller, Mr. F. L. King, who is the auditor of sales; Mr. Herman Rummelhoff, who is the assistant auditor of sales, accounting department; Mr. D. E. Jones, the office manager of the general office accounting department; Mr. Lawrence Hanna, traveling representative and auditor of the sales accounting department; Mr. L. W. Houghton, office manager of the sales research department; and myself; and I think you were present at a part of the discussion. But the aforementioned were present and gave consideration to all of the problems.

Q. Well, I do not count as an accountant anyhow. I was present part of the time.

A. Yes, you were there.

Q. What did you discuss at this meeting—I do not mean what was said, Mr. Boatwright, but what was the subject under consideration?

A. Well, the entire object of the meeting under discussion was in regard to a report as to the results of my conference with the Federal Trade Commission's representatives. Each of the various notations that I had taken at this conference were discussed.

We came to this question of the segregation of the
7921 market, which was one of the most difficult ones under
consideration. That was discussed for a period of some hours in which we took account by account and attempted to outline what we would have to do to comply with such a request.

Following that discussion, and with the minutes of that meeting, Mr. Houghton went to Detroit. He there examined the actual records in the field.

He returned to Chicago at a later date with a description of the nature of the records in the field, and exactly what would be required to provide us with what we would regard as a defendable or a true cost segregation. The most outstanding result of that was the conclusion that there were so many of the accounts that would have to be broken down, individual work orders, individual articles, individual pieces of dispensing equipment, and the tracing of the individual pieces of dispensing equipment—so, why, we just could not do it.

It was then considered as to whether or not we could set up a separate unit which would maintain for a period of future time the record irrespective of the fact that it would have meant the employing and the setting up of a smaller, similar duplicate office staff. This was given consideration, but we decided that one month would not do it because of the seasonal operation of our costs and the
seasonal variation of those costs, and that the only
7922 way that we could provide the Federal Trade Com-
mission with an accurate and defendable analysis of the two component parts of the sales division, would be to set up two offices for a year's full flow of business.

Q. How long was Mr. Houghton engaged in that particular survey in Detroit?

A. Well, when Mr. Houghton was in Detroit, he maintained a staff of seven people who worked with him all of the time. He called upon the regular accounting department to supply him with many breakdowns. He spent the better part of four weeks working and giving consideration to this problem, or at least wherein consideration of this problem was one of his major thoughts.

Q. What was the fact, Mr. Boatwright, in connection with the ability to get agreements on various points of procedure upon the several accounting members of the Respondent company's personnel to whom you have referred in connection with this question?

A. We could not reach an agreement on many of these accounts.

Q. Even among yourselves?

A. That is correct.

Q. It is true, is it not, that every one of those men that you have named has been for years engaged in the accounting business in the petroleum industry?

A. Yes, sir. In fact, they have been engaged for
7923 years in the accounting business of the Respondent company.

Q. Just to make sure of this, Mr. Boatwright, I think that on your direct examination—and you may recall it—you outlined some of these specific difficulties that would confront an accountant in any effort to make this kind of a segregation?

A. Yes, sir. I did so outline.

Mr. Austin: You made it on his cross-examination, did you not?

The Witness: I think it was on my cross-examination.

By Mr. Henley:

Q. Well, in your testimony—I will reframe the question to say in your testimony. I do not remember whether it was on your direct examination or not.

A. I think it was on the cross-examination. The difficulties which were outlined while on cross-examination constituted the basis of many of the difficulties for which you requested the opinion of the accountant of the Federal Trade Commission as to how he would handle it.

Q. I think that is sufficiently in the record.

You are familiar with the cross-examination of Mr. Warmack on this particular study and subject; are you not?

A. Yes, I am familiar with the cross-examination of Mr. Warmack on this particular subject.

7924 Q. You have heard the questions propounded to that witness in respect of how he would meet certain problems?

A. Yes, sir. I did.

Q. Do those problems present themselves to you as difficult ones from an accounting standpoint?

Mr. Austin: Well, just a moment. I will have to object to that question, your Honor, unless the particular problems which are referred to are stated with some particularity. The question is too broad and too indefinite.

Trial Examiner Ballinger: Yes, the question is too broad and indefinite.

Mr. Hanley: Well, perhaps that is true. I shall endeavor to shorten it, your Honor, but perhaps I tried to shorten it too much.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. Mr. Boatwright, in view of the objection of counsel, I will ask you to briefly outline what you mean by some of the paramount difficulties in making this cost segregation concerning which Mr. Warmack was questioned on and testified?

Mr. Austin: If your Honor please, I would like to know whether counsel is referring to segregation of A-station cost or B-station cost when he refers to cost segregation.

7925 Mr. Hanley: Well, counsel for the Respondent is very much in doubt as to what kind of segregation is being referred to, because the cost segregation is the conception in the mind of Mr. Warmack which varies from time to time; sometimes he talks about segregation between A-Stations and B-Stations. Sometimes he talks about segregation between commission employees other than or versus salaried employees; sometimes he talks about geographical segregation between the Detroit metropolitan area as distinguished from everything else.

Now, it does not make very much difference, your Honor, which one of the three or all three if he has them in mind. It is difficult from an accounting standpoint and they are substantially similar.

Mr. Austin: Are you referring to all three things? Is that correct?

Mr. Hanley: I am referring to all three or any one of them.

Mr. Austin: That limits it sufficiently, your Honor, I think.

Trial Examiner Ballinger: You may proceed.

The Witness: May I hear the question?

Mr. Hanley: Do not start that, now.

Trial Examiner Ballinger: Read the question.

(The reporter read the question as follows:

7926 "Q. Mr. Boatwright, in view of the objection of counsel, I will ask you to briefly outline what you mean by some of the paramount difficulties in making this cost segregation concerning which Mr. Warmack was questioned on and testified.")

The Witness: Mr. Warmack was questioned relating to several different classes of expense items. One class of expense items had to do with those accounts on Respondent's Exhibit 101 which are allocated on the basis of time records and estimates. Specific reference was made to salesmen's salaries and office expense. Salaries—accounting is more or less illustrative of the type of accounts referred to. On these particular expense items we did not have and do not have the proper means of determining what part of the time was devoted in any one of the geographical areas as distinguished from that portion of the time devoted to the second geographical area.

The second principal classification of difficulties encountered had to do with expense records incident to the employees, vehicles, dispensing equipment which might be transferred from one geographical zone to the second geographical zone, or from one customer to the second customer.

Now, to determine the cost we would not only have to trace the work order, the repairs, the item, and so-forth, to the individual vehicle, dispensing equipment, and
7927 possession, but we would have to trace the allocation of that particular piece of equipment throughout the twelve month period because it might have been transferred between the two different geographical areas.

The third difficulty that was encountered had to do with the vouchers and supporting data, and all working orders, individual plant expense, machine shop orders which we would have had to trace first to the individual plant. Then we would have had to classify those expense items according to the plant location.

Now, this class of expense would cover vouchers, work orders, machine shop orders, and so forth, under the plant maintenance account representing these bulk plant expenses. It would cover retail outlets.

It would cover rent revenues received.

It would cover miscellaneous operating expense.

It would cover station operating tools and equipment.

It would cover water, light, fuel—other than main office.

It would cover depreciation and taxes.

The fourth difficulty that we encountered had to do with
the ELA expense, with the individual piece of dispensing
equipment, where that individual piece of dispensing equip-
ment may have been painted; where it may have been
7928 repaired; where it may have been transferred be-
tween a geographical area; where it may have been
transferred between different classes of customers, and so
forth.

On that particular expense item we would have had to trace each one of the pieces of equipment and then trace the location of the dispensing equipment, by month, throughout the year.

Fifth, a still more complicated difficulty that we had was overlapping territories.

I think in your question you referred to the Royal Oak bulk plant, which is located outside of the city of Detroit, but which nevertheless, serves as a part of its regular sales territory a part of ~~the~~ City of Detroit and a part outside of the City of Detroit. It is not only at bulk plants, but also sales territories, and here salesmen may cover in part one section of the geographical area of metropolitan Detroit, and his territory may overlap. It is the truck driver, again, that is in this zone of operation, where his zone of operation may be both inside and outside of the territory. And yet, it would be a question that we would have to establish as to some rather arbitrary means of segregating and breaking down between the two geographical areas.

Now, with that in mind that those are the ones that were
covered in your questioning of Mr. Warmack when he
7929 was on the stand. I think in the main that they were
answered by the statement that the cost study would
be required—that was his answer. I agree. A detailed
and tremendous cost study would be required almost to
the effect of re-enacting the year's business.

By Mr. Hanley:

Q. And those are at least some of the problems that were considered by these accountants in striving to arrive at an aswer to the problem, and which were discussed?

A. Yes, sir. Oh, yes. And each and every one of these, plus several others, were analyzed and considered and discussed at quite some length.

Trial Examiner Ballinger: Have you any idea of the force that would be required, or that would have been required to keep such an accounting?

The Witness: We have somewhat over one hundred and twenty employees in the Detroit accounting department at the present time, I think, including all positions. To maintain a record for a calendar year, I think would have meant the addition of conservatively forty employees for a calendar year.

By Mr. Hanley:

Q. Had you done that, Mr. Boatwright, it would have meant, of course, that if it were to be used in this allocation, that everything would have to stop in this
7930 allocation for at least a year?

A. Yes, well, that is not the only thing that would happen. It would have had to stop or at least be in this state; certainly, everything would have had to stop as far as this litigation is concerned for at least a year.

Q. Well, you say that is not the only thing. That much is true, is it not?

A. Yes, that much is true that everything would have had to stop in this litigation for at least a year, but what we would have had to do would be to bring about a correction of many of these accounts or at least a segregation of many of these accounts merely to prove the basis for segregating cost incurred in the preceding year. It would be impossible to use the costs incurred with the handling of a situation of that magnitude because that introduced ratios that would tend to a distortion of our figures. But what we would have had to do would be to establish percentage figures which we could apply to the various expense items now on our Exhibit 101, on Respondent's Exhibit 101.

Q. And that whole question, Mr. Boatwright, deals with the segregation which Mr. Houghton testified about as having been reported to him by Mr. Warmack as resulting in two one-hundredths of a cent differential?

A. That is correct.

Mr. Austin: May I hear the question and answer
7931 read?

Trial Examiner Ballinger: Read the question and answer.

(The reporter read the question and answer.)

The Witness: I neither accept nor condemn the calculation of the Commission's accountant, Mr. Warmack.

By Mr. Hanley:

Q. I understand you did not do anything about it and do not know anything about what went into that or what was left out of it?

A. No, I do not.

Q. But what I am trying to ask you is this, what you would say would be necessary in the way of determining accurately, or as accurately as possible, the cost as represented by the commission employees on the one hand as distinguished from the salaried drivers on the other hand, as the set up that Mr. Houghton said was figured out by Mr. Warmack resulting in the two one-hundredths of a cent less for total marketing cost by commission employees as distinguished from salaried drivers?

Mr. Austin: I object to that question, your Honor. There is no materiality as to whether or not the thing that Mr. Houghton said Mr. Warmack said something about.

It is quite clear, or it is from previous testimony, that we are talking about the segregation of these commission costs and salary costs. There is a conflict of testi-
7932 mony regarding whether Mr. Warmack ever made
any such computation. And I do not think it adds one bit to Mr. Boatwright's testimony to say that he is talking about what Mr. Houghton referred to about Mr. Warmack having made a statement about.

In other words, the subject of Mr. Boatwright's testimony is entirely clear without that question.

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

Trial Examiner Ballinger: The objection is overruled. The witness may answer.

The Witness: These are the difficulties which would be incident to any such problem. These difficulties would be incident to a problem of the segregation of A-Stations versus B-Stations; of salaried drivers versus commission drivers; or, as of two geographical areas wherein part salary and part commission is found in each of the geographical areas.

Mr. Hanley: Well, now, can you arrive at an accurate conclusion?

The Witness: In my judgment, you could not.

By Mr. Hanley:

Q. Referring you, Mr. Boatwright, to accounts 025—truck rental; 055, maintenance of vehicle tanks; 106, depreciation—vehicle—tank; you are familiar with the testimony of Mr. Warmack on behalf of the Com-
7933 mission wherein he criticizes the Respondent's method of handling allocations of expense in respect of those named accounts? Are you not?

A. Yes, sir.

Q. Is it your understanding that this is the same, or that he has the same notion of applying a mileage basis to the allocation of these accounts?

A. Well, it is my understanding that he felt that the allocation of these accounts could be more equitably made or properly made if we tended to let the allocations follow the commission rates—the commission compensation or position which, according to his statement, contained the full effort and mileage.

Q. Now, what is wrong with his theory, if any, in your opinion?

A. I think his—I think it is just unfortunately based upon a lack of understanding of the facts in regard to commission compensation. I think that can best be clarified by just pointing out where this misunderstanding is, and what that misunderstanding, if projected, would produce.

I can do it by a very simple illustration:

If a commission driver were to deliver to a farmer gasoline he would receive five pay gallons for making that delivery;

If he delivered kerosene to this farmer he would receive five pay gallons;

7934 If he delivered tractor fuel to the same farm, he would receive four pay gallons;

If he delivered standard motor oil to this same farmer, he would receive three pay gallons;

If he delivered furnace oil to the farmer he would receive two pay gallons.

If he delivered Diesel fuel to the farmer, he would receive two pay gallons.

So, the first difficulty becomes apparent when it is recognized that the amount of compensation varies distinctly with many things other than mileage, because in each case these deliveries have been made to the identical customer; these same rates would apply to the farmer, whether the farmer lived a half a mile out of town, or ten miles out of town.

In some of our western areas, some of the farmers may be living one hundred miles out of town, and those are the commission areas that we would get for making delivery to the farmer, and after those rates that we would receive, or the driver would receive for making that delivery to the farmer.

Secondly: The man has a compensation for that employment of representing the Standard Oil Company in a restricted area. It represents the overall compensation for a certain function of warehouse maintenance; a
7935 certain function of warehouse labor; a certain function of selling cost; a certain function of delivery cost.

Now, in our particular marketing setup, our station agents are the rural salesmen. We know from time studies that have been made that a part—that a large portion of their time is spent in purely selling functions. That has to be reflected in the overall compensation.

The third part of the difficulty with the suggested allocation procedure is that the maintenance of tanks, which was one of the accounts referred to, it definitely does not follow mileage.

The principal item of cost entering into that account is painting. It is done on a time basis irrespective of the miles traveled.

The second principal unusual part of that expense item would be minor modifications or modernization of tanks. Now, that might mean the addition of one more compartment, or something like that, an expense item too small to capitalize. That has nothing to do with mileage. It would have been a simple matter, if requests had been made for me to demonstrate the failure of the proposed allocation method by showing our tank maintenance cost, field by field, from the western part of Montana, Colorado, and Wyoming, to the eastern part of our territory, and cer-

tainly the mileage traveled in the western portion are
7936 far and wide above and out of proportion to the more
concentrated territory around Detroit.

Q. That would have been in reference to the gallons delivered?

A. Yes, sir. And there just has been no relationship, it just had no relationship.

Now, the fourth part of the difficulty that this suggested allocation procedure has is that the tanks are company owned. He is correct in his statement that when one of these company owned tanks is repaired, one is taken off of a tank chassis, and another tank is put on that tank chassis, and the tank that is taken off may be moved and placed upon an entirely different type of chassis. For instance, sometimes a tank will be taken off of one of the commission trucks, and perhaps repaired or modernized, or changed in some manner or another, and the remainder of its life will be spent on a salaried truck. The tanks are interchangeable to a certain extent. I do not mean by that that our commission agents, as a rule, have 2,200 gallon tanks, but a tank which is used on a Chevrolet truck by a commission agent is equally adapted for use on a Chevrolet truck which would be used by one of the salaried stations, and certainly it could be used by that just as well.

Q. Those actually are done? Such changes as that are actually made?

A. Yes, sir. That is the reason I feel that the
7937 suggested plan is more or less projected and pred-
icated upon a lack of understanding of the compensation plan in effect by the Respondent company.

Q. Mr. Boatwright, will you please try and tell the Court that which I do not think has ever been adequately expressed heretofore; and that is, the nature of the credit card operations.

A. Yes, sir. Credit cards were introduced for several reasons.

The accountant for the Commission stated—

Q. (Interposing.) Do you mean Mr. Warmack?

A. Mr. Warmack stated it was a freezing of a customer—supplier relationship. That is true in part.

It is broader than that. On interviewing thirteen thousand customers, we found that very interesting situation prevailed, and that was this: We found that those that had credit relations established with a given supplier had the regular product used in their tanks X proportion of the time; those that did not have credit relations established had X minus about ten per cent of the regular product in their tanks. Therefore, it has a tremendous influence in reducing the shopping tendency.

Mr. Austin: Reduce what?

The Witness: Shopping tendency.

By Mr. Hanley:

7938 Q. Do you mean a fellow going around from one place to another to try to find out what he wants to buy?

A. Yes, sir. Merely because of the convenience factor due to an extension of credit led to the use of the regular product, because of the convenience being afforded to him.

Furthermore, necessarily, when a man has a line of credit established, he buys more.

That is true whether it is a department store or whether it is a petroleum company—he just buys more. So that the particular supplier of a particular product, when those conveniences are offered to the purchaser, those are among the predominant reasons for doing that.

Now, maybe, the accountant for the Commission, Mr. Warmack, intended to cover or to encompass both of those items.

Now, having established a line of credit which is a convenient factor offered to the consumer, this credit card privilege becomes affected by and with the actual transaction.

I wonder if, before I come to the sales ticket, if there is some question in your mind that your Honor has relative to the reciprocal nature of these credit cards? If so, I will be glad to explain them.

Trial Examiner Ballinger: I would like to have you fully explain it.

7939 The Witness: I shall cover that before going into the ticket aspect of the transaction.

Various petroleum companies which are primarily in distribution in given sections of the country recognize the desirability of their customers being able to exercise credit privileges outside of their geographical territories.

Accordingly, they have a credit purchase extended by other petroleum companies irrespective of whether there is an affiliation there or not.

That is, the Standard Oil Company of California will issue a credit card to a customer of theirs who might buy a car in Detroit, and wishes to utilize his credit privileges rather than carry a large sum of money in traveling, in driving that car from Detroit to California. It is a very common occurrence, prior to when we ceased to make automobiles. We merely honor his credit privileges for the California company as long as he is in our territory. When he gets out of our territory he gets into the Utah territory, and then they honor his card while he is in that territory, and then the California company comes in, when he gets to California, because then he is back in his own home area.

Extending eastward this credit card may be reciprocated with the Standard Oil Company of Ohio, as far as Philadelphia and Pittsburgh, and then the Humble Oil Company, and when we get into the Dominion of Canada, 7940 with the various oil companies in Canada.

Now, in each case the various issuing companies seek to establish and secure the benefits of the credit privileges entitling their particular customers to purchase, and which are extended to their particular customers, and they would like to know that upon the return to that territory, they will continue to receive the benefits of the credit privileges that they extended. Therefore, it is merely a convenience factor which has been extended beyond the convenience of their own geographical territory, through a reciprocal understanding with other petroleum distributors.

Is that clear?

Trial Examiner Ballinger: It is.

The Witness: All right.

Having established a line of credit, the line of credit becomes a cost to the company as the sales flow to that particular credit card account, and as the sales flowing to that particular credit card account come into the company itself.

Now, I think you can best understand our system of accounting if I explain the means established by which we undertake to handle the labor incident to each individual credit card account.

We handle them under a rather simple system. As a matter of fact, we handle the entire matter by a 7941 ticket filing system. It works something like this: A ticket comes in from a reseller, and it goes immediately to the checking department. The checking department checks the accuracy of the extension of the value. From the checking department, it goes to the filing department. The file clerks file it according to the customer's name, or code marks, because each credit card has a code designation.

Then, at the end of the month, the tickets that have been filed under John Doe's name are taken from the file and recapped. The customer is billed and the bill is attached to or has attached to it a carbon copy of each of the sales tickets so that he can check the accuracy of the figures, and a second group of tickets is retained in our file. Upon receipt of the payment of the bill, we merely take the copy; that is, our copy of the tickets and we store them in our inactive file, that is the copy of the tickets still in our active file, and we transfer those to the dead file, as having been paid.

Now, the whole set is predicated upon and is based upon the thought of the flow of tickets, and it is the tickets, and the handling of those tickets, wherein we incur our accounting cost.

Now, irrespective of control or lack of control of where the man utilizes his credit, we know it to be the fact
predicated upon an actual count of tickets that
7942 approximately 10.2 per cent of those credit card
tickets were used by the customers at outlets served by jobbers. Inasmuch as our costs are predicated upon tickets, and inasmuch as 10.2 per cent of the tickets originated with jobbers, then 10.2 per cent of our cost was incident to jobber business.

Now, there is another factor which should be given consideration and which, I fear, has not been completely understood.

And that is the tendency on the part of any individual to desire, in view of the advantages of credit privileges, to retain his credit account. Not only are our reseller jobbers or any one else of that type reluctant, if they can carry the credit load, to turn over their credit customers to the supplier, which they are, but they hold on to them as long as they can possibly finance their credit load in connection therewith.

Now, there is a tremendous difference in the financial responsibility in credit represented by the four jobbers that we serve there, and the independent tank wagon resellers in the main, or the lessees in the main.

As a consequence, there is a far smaller percentage of
the regular customers of the company to the jobbers
accounts requesting and being furnished credit cards
by the Respondent company, in spite of the fact that we
would like, because we know the advantages, to have
7943 them, because they do not want to surrender them
to us, and accordingly do not. These jobbers hold on to them as hard as they can. Therefore, there is just a simply smaller proportion of our costs incurred on the credit card accounting procedure on business through jobber outlets than it is on that gallonage represented to total gallonage moving through reseller outlets.

I think that there is one other thing that should be mentioned here. We ran a test check in which over 11,000 sales tickets were compared, as to the size of the purchase, jobber versus tank wagon, and established the dependability of the size of purchase, and so forth, and we reached a stability level that we utilize in standardizing the allocation of these tickets, in other words, determining how we shall allocate these tickets as a practice.

By Mr. Hanley:

Q. Did you—

A. (Interposing): Does that answer your question?

Q. I think it does, Mr. Boatwright. I have one thought by way of clarification.

You have indicated in your answer the fact on the reasons that you gave as to why on a gallonage basis there is not so much credit card business originating from jobber customers as from regular tank wagon reseller customers. That is right, is it not?

A. Well, I have indicated that if we divided the
7944 cost incurred on all sales tickets originating from
jobbers by their total gallonage, we get a smaller resultant cost than we do from the regular resellers.

Q. You have stated in the reverse what I intended to ask you. Mr. Boatwright. In the matter of gallons sold, there is the fact that there will not be as many credit card extended gallons sold through the jobber outlets as there will be through the regular reseller channels?

A. That is absolutely correct. That is absolutely correct in Detroit, your Honor.

Q. You have explained the reasons for that?

A. Yes, sir.

Q. So far as this cost study; so far as the costs of the

Respondent company are concerned, that does not make any difference. Does it? As I understand, you have given the effect, ticket for ticket, wherever it originated, whether it be in the jobber channel, or in the regular reseller channel?

A. That is right.

Q. So the cost to the company has been given complete consideration? Is that right?

A. Yes, sir.

Mr. Austin: May I ask a question for clarification?

Trial Examiner Ballinger: You may.

Mr. Austin: You made mention a minute ago, Mr. Boatwright, about keeping some track of the relative size of
7945 purchases of customers buying from jobbers and customers who buy from tank wagon resellers?

The Witness: Yes.

Mr. Austin: Would you mind carrying that a little further? I am not quite clear as to what you mean when you say you used the result. Just what kind of a result are you referring to? What kind of a result was it? What was it derived from? I want to know whether it has any bearing on the cost study.

The Witness: The size of the purchase would have no influence on the cost incurred. I think that is what you are getting at. That is the result about which I was referring to some extent. We counted every ticket originating from the jobber outlets, to ascertain the exact number of tickets which originated from that branch of our activities. It was our desire to know the number of tickets from every branch which originate and come in to our accounting department. We could have weighed them, or we could have counted them, or done what we did do and what was done with them. That was this, we took approximately 11,000 tickets and recapped the tickets in groups of 100. Then, the second group and the fourth group, and so on until we had established irrefutably stabilized levels. Then, knowing the total value of the tickets which originated from the jobbers, which we applied to the tickets from the total value of all sales tickets made on
7946 credit cards, rather than counting the individual credit
card tickets from each one of the tank wagon reseller outlets, we divided the group by the value factor to reach the number which was then checked by weighing the tickets to establish completely the number of tickets to the tank wagon channel.

Mr. Austin: Was that the means used to obtain the total number of tickets for the period? Was that used for obtaining this figure of 10.2 per cent?

The Witness: The 10.2 per cent is predicated upon the actual counting of every ticket.

Mr. Austin: That is what I am not clear where the other factor comes in. I am sorry.

The Witness: You see, we counted every one of those to which I have referred. Of course, you see, to count every one of those sales tickets would have meant to count literally thousands upon thousands upon thousands of little slips of paper. So, having counted all those which originated from jobbers, because as they came in from jobbers to receive credit, they are shown listed on the back of the slip which type of outlet they originate from.

Mr. Austin: Do you mean counting the total number that came in from jobbers?

The Witness: We counted them, every one of the tickets that came in from jobbers, month by month. Then we
7947 ascertained the number in total and from sources of origin other than jobbers, by dividing the volume per ticket into the same total—I mean volume in money—perhaps I should say divided the value per ticket into the sum total value to get the number of tickets in total.

Mr. Austin: I am sorry. Maybe when I sit down and read that I can get it a little better.

You say you divided the value per ticket into the total of what?

The Witness: Into the total value.

Mr. Austin: Of all credit cards?

The Witness: Of credit card sales tickets.

Mr. Austin: How did you get that total value without making a count?

The Witness: Oh. That is recorded each month.

Mr. Austin: Does that involve an assumption that the average value of the ticket of the jobber was the same? Is that the way that you arrived at it, from the 11,000?

The Witness: The first figure is the grand total.

The second figure is the total sales tickets originating from jobbers.

The third figure is the total value of the tickets originating from jobbers.

The fourth figure is the average value of sales tickets emanating from tank wagon customers which we di-

7948 vided into the difference between the grand total and the total value of the jobber sales tickets which gave us the ticket flow from the other reseller channels.

Mr. Austin: Then, this was done to give you the value of the tank wagon reseller tickets?

The Witness: Yes.

Mr. Austin: There was no test made by way of comparison of the ticket value of the tank wagon as compared to the jobber?

The Witness: It would make no difference.

Mr. Austin: That is to say, it is just the same thing from an accounting cost standpoint? A ticket selling five gallons of gasoline is just as easy to handle as a ticket selling ten gallons of gasoline? Is that the idea?

The Witness: Yes, sir. It is merely a ticket file, and any other ticket would be the same, the recapping just the same.

Mr. Austin: Did you find this, or do you remember whether there was any appreciable difference in the average value of the tickets which came from jobber outlets and those which came from tank wagon reseller outlets?

Mr. Hanley: May I inquire what you mean by "value"? You have been using this word in a few questions to the witness, and I would like to know what it means. I take it that it must mean the customer's purchases as to
7949 whether they are adequate, and represent about the same amount of purchase?

The Witness: Yes, the value of the tickets would represent the value of the purchases, as you have indicated there.

Trial Examiner Ballinger: So as to represent the value of the purchases made, you say. Or would that be to ascertain whether the purchases from the jobber outlets were larger or smaller than those which came from the retail outlets?

Mr. Austin: Was there any difference?

The Witness: There is no significant difference at all.

Mr. Austin: Thank you, your Honor.

Mr. Hanley: Shall I proceed?

Trial Examiner Ballinger: Proceed.

By Mr. Hanley:

Q. Mr. Boatwright, if there were, is it not still true that the cost to the company is on the basis of handling the ticket, irrespective of the amount of sales—

A. (Interposing): Yes.

Q. —referred to in the ticket?

A. Yes, sir.

Q. As I recall the testimony of Mr. Warmack, he made some criticism of the Respondent's method of handling bad debts.

I may be in error about this, but I assume you will 7950 recall his testimony, Mr. Boatwright.

I think he, well, in one instance, he thought it would be good accounting to charge off bad debts as an operating cost; then, in another case, he thought it would be better accounting to adjust surplus by collection of bad debts.

As I understand it, this bad debt thing is quite closely related to this credit card question, since that is usually where it arises.

What have you to say as to the consistency of those two methods, or the one or the other method of handling bad debts? Just tell us about it.

A. Well, as I understand the testimony as given by Mr. Warmack, the Commission's accountant, it is my recollection that he testified that he would lean to the theory that the bad debt should be charged as an operating cost. Subsequently in his testimony, he stated that the collection of a bad debt previously written off should, in his judgment, be handled as an adjustment to surplus, or an adjustment of reserve.

Q. Do you regard that as consistent accounting?

A. Well, I think either that bad debts should be handled on a cash and disbursement basis, where both, if your bad debts are charged off as an operating cost, then the collection of the bad debt should be entered as a credit; 7951 if your bad debt is charged to surplus, then the collection of the bad debt should be credited the same. I think that it is consistent accounting when an account is entered in that manner, that you should erase it with a similar item coming the other way.

In other words, if you charge a bad debt to a certain account, and that bad debt is collected, or some other bad debt is collected, it should be credited to that account.

Q. That is your accounting judgment as to the method of handling bad debts?

A. Yes, sir. Many firms handle them one way, many firms handle them another way, but I am not sure that my interpretation of the testimony is correct, but that is my interpretation that it is either strictly on a reserve basis, or it is strictly on a cash and disbursement basis. In other words, it should be on either one basis or the other, it cannot be, properly, from a good accounting standpoint, on both.

Mr. Hanley: Off the record.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record. Proceed.

By Mr. Hanley:

Q. Mr. Boatwright, I refer you to page 6387 of the record where there is set out in extenso a copy of a letter or a memorandum given by Mr. C. T. Bergeson of the
7952 Respondent company to Mr. Warmack when he was in Chicago.

I direct your attention particularly to the last sentence of that memorandum ~~which is as follows:~~

"The contribution is obviously not considered an expense item before the calculation is made of the net profits."

This whole memorandum from which the sentence referred to is taken has to do with account 520 on Respondent's Exhibit 101, having to do with annuities.

Will you explain what is meant, if you know by the explanation of the comptroller of the company as to the handling of this account in relation to whether it is regarded as an expense?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record. Proceed.

Mr. Austin: I object to that question. That goes to the meaning of the comptroller, and I do not know how this witness, Mr. Boatwright, could have any knowledge, and if he did have any knowledge, it would be hearsay, as to just what the comptroller meant. I doubt if there is any suggestion in this record anywhere that the comptroller ever told him anything about it.

I think if there is any question about this item,
7953 that the witness might be asked directly his opinion of it.

Mr. Hanley: I am asking as to what the practice of the company is in treating this item as an expense.

Trial Examiner Ballinger: That is what the Examiner understood the object and purpose of the question was.

Mr. Austin: Then I suggest that the question be restated.

Mr. Hanley: He may not know as much about it as Mr. Boatwright does.

Mr. Austin: Yes. He may not know as much about it as Mr. Boatwright does, but I do not think that would entitle Mr. Boatwright to attempt to speak for the operations of another man's mind.

Trial Examiner Ballinger: Do you understand the question as modified by the subsequent statement of counsel?

The Witness: I do.

Mr. Austin: Do I understand he is now to answer the question as restated and not as originally stated?

Trial Examiner Ballinger: That is right. As modified and as explained by the statement of counsel for the Respondent.

Mr. Austin: Do I understand that your Honor has ruled as to whether or not this witness may state what was in the mind of the comptroller of the company?

Trial Examiner Ballinger: It might be better for
7954 you to restate the question.

Mr. Hanley: I will withdraw the question, and restate it.

Trial Examiner Ballinger: The question is withdrawn.

By Mr. Hanley:

Q. Referring you, Mr. Boatwright, to the memorandum appearing at page 6387 referred to in the question just above asked you, and particularly referring you to the language quoted in that last sentence thereof, I will ask you now to please explain to the Court just what the practice and accounting procedure of the Respondent company is in connection with charging up the items in account 520 as expense items.

A. There are three component parts of account 520, as has been demonstrated repeatedly in the testimony:

One part of which has to do with current contributions of the company to match contributions made by employees and so charged on the books of the company as incurred.

Mr. Austin: What is that?

The Witness: And so charged on the books of the company as incurred.

The second part, representing payment of annuities to employees likewise enters the books of the company when incurred, in exactly the same manner.

7955 The third component part represents the company contributions towards a trust fund.

Our practice with respect to that particular part of account 520 is as follows:

First: We accrue monthly on our books the amount of $200,000 representing part of our anticipated contribution to the trust fund. As soon as the results of our operations for the first six months are available, we make an adjustment of the accrual that we have set up during the first six months to represent the sum which will approximate 10 per cent of the earnings of the company prior to income tax payments.

As we proceed into the second six months of the year, we continue to accrue on the basis of $200,000, and set it up on that basis. At the end of our year, or as we approach the end of December of each year, the profits before and after Federal income tax for the year are again studied and a second adjustment is made in the accrual that we have set up to meet that expense. This second adjustment being that amount which is necessary to bring the total payment of the Respondent company in keeping with the total actual cash turned over to the trustee.

The method of accrual that we follow on this is somewhat similar to the setup of accrual to meet future tax payments, that is, we take the past payments and approximate the amount that we will set up which means 7956 we then adjust our books as soon as we determine our actual tax burden, or when it becomes apparent to us.

We then allocate this expense to the various sales fields, the refineries, and so forth, on the basis of the current contributions to match contributions of the employees.

The only employees that are eligible to participate in this future annuity plan are those who are themselves participants in the plan and make some contribution to that plan. This is not a blanket annuity. It applies not to every one. As I say, it is not a blanket annuity that applies to every employee irrespective. It applies to those who are participating in the plan.

By Mr. Hanley:

Q. Mr. Boatwright, do you recall the testimony of Mr. Warmack and Messrs. Lundball and Depne criticizing the accounting methods of the Respondent in connection with the twenty-two thousand dollar plus item in account 520?

A. Yes.

Q. Do you recall that that treatment was criticized on the basis that the Respondent company had not set up a reserve to take care of the so-called twenty-two thousand dollar item?

A. It was my interpretation that was the primary objection to the handling of the account.

7957 Q. Do you recall that the so-called one hundred and eight thousand dollar group or item was also criticized?

A. Yes, sir.

Q. By these same people?

A. Yes, sir.

Q. Is it not a fact that that was criticized for the reason that it was being currently cared for and the reserve was being set up to take care of that type of payment?

A. Well, there are two shades of meaning to the testimony given as I followed the three witnesses referred to, each being an accountant for the Federal Trade Commission.

As I interpret Mr. Warmack, his testimony was that the twenty-two thousand dollar plus item was objected to because a reserve had not been established.

The one hundred and eight thousand dollar plus item which is in fact a payment and credit to reserve against future requirements, was criticized because it applied to services prior to 1939.

I think that the criticism of Mr. Lundball and Mr.—

Q. Depue?

A. —Depue, was predicated entirely as far as the one hundred and eight thousand dollars was concerned upon the thesis that this item of expense was in fulfillment of obligations which had been incurred prior to the year 1940.

7958 That was my interpretation of their criticism.

Q. In effect, is it not true that the company is setting up a reserve in so far as the one hundred and eight thousand dollar group or item is concerned?

A. Oh, yes, the payment to this trust is being spread over a period of years. The exact amount of the trust required cannot be ascertained at this date, due to the many actuarial influences which will determine the element governing the ultimate spread and amount of the trust to be set up, but it is being spread over a period of from twelve to fifteen years. It merely represents one of those annual payments.

Q. Referring, Mr. Boatwright, to page 7568 of the record in this case, and running from there through to the top of page 7575, wherein is set forth in extenso a certain question and five accounting answers in Respondent's Exhibit No. 110-A, 110-B, 110-C, 110-D, for identification, being the Journal of Accountancy for May, 1940:

First, is the question there posed comparable in a statement of facts to the method employed by the Respondent in its annuity plan?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record. Proceed.

The Witness: I would like to have that question read.

7959 Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: It is.

Mr. Austin: Your Honor, I object to that question and any further questions about this statement for all of the reasons that I stated in my objection to the same question asked Mr. Warmack, commencing on page 7597 of the record.

Trial Examiner Ballinger: Your objections as to the questions asked Mr. Warmack were overruled, were they not?

Mr. Austin: Yes, sir.

Trial Examiner Ballinger: The Examiner adopts the same course here. Objection is overruled.

Mr. Hanley: I believe the witness answered the question.

Mr. Austin: He did.

Mr. Hanley: Perhaps his answer should appear after the ruling of the Court.

Mr. Austin: I think it would be just as well to leave it.

The Witness: I repeat: It is.

By Mr. Hanley:

Q. Mr. Boatwright, I refer you to the accounting answers designated Nos. 1 to 5, both inclusive.

I will ask you if you have read them? Do you agree
7960 or disagree in principle with the accounting methods
expressed in the five answers?

A. I have read them. I have studied them carefully. Inasmuch as all five of them reach and recognize comparable principles of treatment, I agree in those principles with the five answers. Some of the answers do point out that a second method of treatment may be permissible. That is correct.

Firms do not all follow identical practices with respect to this particular problem. But it seems to me that the procedure recommended and the principles advocated by the five answers is good accounting practice.

Q. Mr. Boatwright, there has been many hours of testimony devoted to account 520 in connection with annuities. Is it your recollection of the testimony that Messrs. Lundball and Depue both said that the item of twenty-six thousand two hundred some odd dollars was a proper charge?

A. Yes, sir. They did.

Q. Is it your recollection also that Mr. Warmack reduced that amount to something in the neighborhood of
twenty-thousand one hundred and eight dollars odd, and
then made a calculation as to the effect of his treatment of
account 520 by eliminating the twenty-two thousand dollar
item and the one hundred and eight thousand dollar item,
and the sum of six thousand dollars off of the twenty-
7961 six thousand dollar item, which resulted in a certain
reduction in the differential? If you recall that testimony, please state what your recollection is as to the amount that the differential would be affected?

A. Well, I do recall the testimony.

First, with respect to the testimony of Mr. Lundball, Mr. Depue, and likewise I recall the testimony of Mr. Warmack, as well as the calculation that he made.

If my recollection serves me correctly, he arrived at an influence upon the cost differential named by the Respondent—being 1.51 cents per gallon—by reducing, by the magnitude of zero point 06 cents per gallon as a result of his adjustment of account 520.

Q. What was the per gallon reduction in cents as a result of his adjustment of this account?

A. I think it was 6/100ths of a cent.

Q. Then, it was after giving consideration to the reduction of the twenty-six thousand dollars?

A. Yes, sir. That is after giving consideration to the reduction of the twenty-six thousand dollars, or adjustment, which was, as I have indicated in the testimony of the other accountants for the Federal Trade Commission, considered in its entirety.

Q. Mr. Boatwright, I think I asked you this at the outset of your examination, but I want to be very sure that I have it on the record.

7962 A. Yes?

Q. Were you asked by Mr. Warmack for any documentary evidence, or studies in connection with allocations on a gallonage basis? It seems to me that I asked you that before.

A. You asked me that. I was not asked for documentary evidence in support of the gallonage method of allocation of the different expense items, to the best of my recollection.

Q. Do you recall the last day that Mr. Warmack was in Chicago in connection with this matter in the spring of this year?

A. Yes. I recall that.

Q. Was he in your office?

A. Yes, he either came in my office or Mr. Houghton's, or else I went into Mr. Houghton's office where the two of them were seated. I do not remember where the two of them were seated.

Q. It was the time when the three of you were together; that is, Mr. Warmack, Mr. Houghton and yourself?

A. Yes, sir. There was a time when we were together and I requested prior to Mr. Houghton's departure that he go over—pardon me, prior to Mr. Warmack's departure, that he review with me the information that he had requested and received. And there was such a review held. I think it lasted a little better than an hour.

7963 Was there any conversation at that time between the three of you gentlemen relative to whether or not Mr. Warmack had received all of the information that he desired, and if there was, please tell the Court as best you recall what it was.

A. Well,—my memory of the events in that particular time period is that Mr. Warmack reviewed information secured, data obtained, and in many cases provided me with copies of data and information secured.

The conference approached an end, and as it approached the end, I asked Mr. Warmack whether there was anything more that we could do, or any further information that we could give him. And he said "no," there had been one class of information that he had requested, that Mr. Austin had requested, that had not been furnished him, but aside from that, I think his answer covered all other parts of the information accounted for.

Q. Well, let us take up that class of information if it was discussed, and what was said about that, one way or the other.

A. Well, in the case of the information that Mr. Austin's letter referred to—it had to do with the breakdown of account 075, which he requested originally in a letter addressed to you, as counsel for the Respondent, which was
discussed on the record in the hearing at Detroit, and
7964 which at that time the difficulties of complying with
the request were pointed out.

Those difficulties remained real, and remained exactly in the same condition after Mr. Warmack came to Chicago. When he requested a breakdown of account 075, I had one of the same results in that one of our cost analysts examined and went into entries.

Q. Who was that?

A. That was Mr. Russell, who was one of our cost analysts. He examined the entries in that account and went into considerable detail, the detail originally requested by Mr. Austin's letter.

As the result of the examination, I had to tell Mr. Warmack that he was safe in assuming that corresponding ratios of the 1940 expenditures in account 075 represented consumer advertising as that account had been broken down for the year 1937, and had been introduced as an exhibit in this case.

I think Mr. Warmack testified similarly as to that account. Aside from that, I know of no information that he requested that he did not get.

Q. Did he so state?

A. Yes, sir. He so stated.

Q. In that last conversation?

A. Yes, sir. He said he knew of nothing more we
7965 could give him.

Q. Mr. Boatwright, you have been concerned with the accounting angles of this case since its inception. Have you not?

A. I have.

Q. And you either prepared or participated in the preparation of, or directed the preparation of Respondent's Exhibits 99, 100, 101? Did you not?

A. Yes, sir.

Q. You have prepared numerous other items which have been supplied to the Federal Trade Commission in connection with this case. Have you not?

A. Many of them.

Q. You have prepared many schedules of figures which have gone into this case as exhibits. Have you not?

A. Yes, sir.

Q. You have, yourself, testified at length. Have you not?

A. That is correct.

Q. You have heard all the testimony and read all of the testimony of Mr. Warmack?

A. I did not hear quite all of it. I read and studied carefully all of the testimony of Mr. Warmack, and have heard a great deal of it.

Q. You have not only read it, Mr. Boatwright, but is it not true that you have critically analyzed it?

7966 A. Yes, sir.

Q. You have heard all of the testimony of Mr. Lundball and Mr. Depue. Have you not?

A. Yes, sir. I have.

Q. Is it not true that, from an accounting standpoint, and from the standpoint of an economist, you have given serious thought over many, many months of time to the accounting features and problems involved in this litigation?

A. I have.

Q. Have you been able to conclude, and are you now able to conclude, Mr. Boatwright, in your own mind, as to when your company, your employing company, the Respondent company here, would ever be safe in granting any kind of a price differential, after your experience in this lawsuit?

Mr. Austin: That is objected to, your Honor, as incompetent, immaterial, and speculative as to what the Respondent would be safe in doing.

The Witness: I reached a conclusion.

Trial Examiner Ballinger: One moment. The witness may answer.

The Witness: I reached a conclusion.

By Mr. Hanley:

Q. What was your conclusion?

Trial Examiner Ballinger: It is of no value.

The Witness: It was just this: I can only state
7967 that after hearing all of this testimony, and after
analyzing carefully all of the testimony, and considering the accounting problem incident to a conformity with the various interpretations of the word "costs," as having been evidenced in this case, I just do not know yet how I could recommend to the management of our company whether any given price differential would be or would not be in conformity with the provisions of the law.

Mr. Hanley: You may cross-examine.

Mr. Austin: Your Honor, I would like to adjourn until 11:15 a. m., tomorrow.

I do not get my copy of this record until early in the morning, and I will not be able to prepare a review of this testimony for the purpose of cross-examination before that hour.

Mr. Hanley: I have no objection so long as it is understood that we may leave here tomorrow afternoon at three o'clock.

Trial Examiner Ballinger: The motion is granted.

(Witness temporarily excused.)

Trial Examiner Ballinger: And now, at 4:55 p. m., the hearing is adjourned to reconvene at 11:15 a. m., August 4, 1942, in Room 532, Federal Trade Commission Building, Washington, D. C.

(Whereupon, at 4:55 p. m., August 3, 1942, the hearing in the above-entitled matter was adjourned.)

7968

Room 532, Federal Trade
Commission Building,
Washington, D. C.
Tuesday, August 4, 1942.

Met, pursuant to adjournment, at 11:15 a. m.

Before:

Webster Ballinger, Trial Examiner.

Appearances:

Cyrus B. Austin, Esq., attorney for the Federal Trade Commission.

Harold R. Hanley, Esq. (910 South Michigan Avenue, Chicago, Illinois), appearing for the Respondent Standard Oil Company of Indiana.

7969

PROCEEDINGS.

Trial Examiner Ballinger: Come to order.

The hearing of Docket No. 4389, case entitled "In the Matter of Standard Oil Company (Indiana)" is reconvened pursuant to notice at 11:15 a. m., August 4, 1942, in Room 532, Federal Trade Commission Building, Washington, D. C.

The last hearing was held at this same place, August 3, 1942.

The reporter will note counsel for the Commission and Respondent present.

You may proceed.

Mr. Hanley: Mr. Austin, I have just one further question of Mr. Boatwright before turning him over on cross-examination.

JOHN W. BOATWRIGHT resumed the stand and testified further as follows:

Direct Examination (Continued) by Mr. Hanley.

Q. Mr. Boatwright, do you recall the testimony of Mr. Houghton in respect of a conversation which he had with Mr. Warmack while they were in Detroit last spring in connection with some calculations by Mr. Warmack, and told by him to Mr. Houghton, having to do with marketing costs of salaried drivers as distinguished from commission employees?

7970 A. Yes. I do recall it.

Q. Did Mr. Houghton at that time report the fact to you that there had been such a conversation?

A. He did.

Mr. Hanley: That is all. You may take the witness.

Cross-Examination—by Mr. Austin.

Q. Mr. Boatwright, I believe you are familiar with Commission's Exhibit 129?

A. Yes, sir.

Q. That exhibit is entitled "Statement showing calculation of average salesmen's cost per gallon of gasoline sold to Standard Oil stations in Detroit other than Ned's stations and served by the same salesmen who called on Ned's Stations in 1937"?

A. Yes.

Q. Do you understand that exhibit to be a computation of the reseller salesmen's expense for the sales territory in which the Ned's Auto Supply Stations were located in 1937?

A. I understand it to be the computation of the selling expense for one salesman's territory only with respect to residual amount of the time of the salesman-representative serving that territory after taking care of Ned's.

Q. Yes. And that single salesman's territory was the territory which included the four Ned's Auto Supply outlets? 7971

A. Well, it included the headquarters of the Ned's Auto Supply Company. The salesman, naturally, he calls on and conducts his business at the headquarters. Actually the geographical area outlined by that territory does not encompass all of the locations of Ned's, but all of the selling was done at the headquarters of Ned's Auto Supply Company.

Q. Were you present when Mr. Blaugh testified in Detroit?

A. Yes.

Q. Do you not recall Mr. Blaugh testifying that these salesmen called on all four of Ned's outlets from time to time?

A. No. I do not so recall.

Q. Was the territory served by Robinson, Mulenberg, and Coutchie in 1937 the territory surrounded by the red line on Commission's Exhibit 109-A?

A. I do not recall that, Mr. Austin.

Trial Examiner Ballinger: Could you tell from an examination of the exhibit?

The Witness: I think I could.

Trial Examiner Ballinger: You may examine the exhibit.

(The witness examined Commission's Exhibit 109-A.)

The Witness: After looking at the exhibit, that appears to be the territory covered by these salesmen.

By Mr. Austin:

7972 Q. In your opinion, Mr. Boatwright, does Commission's Exhibit 129 set forth the correct computation of Respondent's selling costs for that particular sales territory for 1937?

A. No.

Q. Was the same method of computation used in computing the selling cost for that territory that was used by the Respondent in computing its selling cost for Ned's Auto Supply Company in 1937 on Respondent's Exhibit 31-L?

A. Not quite.

Q. What is the difference in method?

A. You apply 1940 figures to secure a breakdown. We did not apply the 1940 figure.

Q. When you say "1940 figures"; what do you mean, Mr. Boatwright?

A. The percentage of time devoted to gasoline was taken from exhibits representing 1940.

Q. Were those percentages used as the percentages of the salesmen's time spent on gasoline taken from the quarterly distribution of time reports of the salesmen for the year 1940? Is that correct?

A. That was my understanding of the testimony.

Q. What did you use in place of those figures in arriving at the percentage of time spent at Ned's Auto Supply Company by these salesmen in 1937?

A. We used the estimates of the management.

7973 Q. When were those estimates made?

A. I do not recall the exact date. It was early in the process of these calculations—early in the process of the trial.

Q. It was not earlier than 1940, was it? As a matter of fact, was it not in 1941 that those estimates were made?

A. It is entirely possible.

Q. Is that not so?

A. Well, I am not sure whether it was in 1940 or 1941. It was either the latter part of 1940 or the early part of 1941.

Q. Do you recall when the complaint in this case was served in December 1940?

A. I will take your word on that. I do not know just when it was served.

Q. Now, have you any other objection to either the method of calculation or the accuracy of the result reached on Commission's'' Exhibit 129, other than the fact that the percentages of time ascribed to three salesmen for gasoline were taken from the 1940 quarterly distribution of time reports?

A. Yes, sir. There is one small thing here that I did not feel it worth mentioning yesterday, but if we are going to enter into detail, in that first column you have designated as "Salary," and I think that is the sum total of salary, traveling expense, car expense, including depreciation.

7974 You merely have a misnomer on the exhibit. This first column is broader than the designated heading.

Q. Yes. But that should be so, should it not, Mr. Boatwright, if we are trying to find out the selling cost?

A. It is the wording in the heading.

Q. But that is not an error in the method or in the result?

A. No.

Then, my other objection was mentioned yesterday which did not go to the calculation. It went only to the representativeness of the territory.

Q. Of course, my question now is directed as to whether this was a correct calculation for that single territory.

A. I would have no objection other than the fact as stated.

Q. Is it not true, Mr. Boatwright, that for the purposes of this calculation, all of the time of these salesmen which was spent in sales promotional work at the outlets served by other companies was included, and that none of that time which included or was included in your calculation of the cost of serving Ned's?

A. No, I do not know that that is true. In our estimates of time we made I do not know whether the time devoted to calling on competitive accounts that the salesmen desired to secure is included in any part of the estimate, or another part, whether it is in one part or another. I just do not know where it is.

7975 Q. Well, is it not a fact that on Respondent's Exhibit 31-L, the estimate of time spent at Ned's meant time spent at Ned's, and does not include the sales promotional time spent at other outlets?

A. To the best of the ability of the management, we assume that—in other words, to the best of the ability of the management to estimate that.

Q. Let me get that clear now. To the best of the ability of the management to estimate that?

A. Yes, to the best of the ability of the management to estimate that.

Q. So that if that time spent at Ned's, as is shown on Respondent's Exhibit 31-L was deducted from the total time of the salesman, does it now follow that all of the salesmen's promotional time spent at other companies' outlets is included in the residue of the time which was used in the computation for Commission's Exhibit 129?

A. That would follow.

Q. Referring to page 7885 of the record, Mr. Boatwright, I would like to show you that page, particularly the third paragraph, and ask you whether or not that represents exactly what you said.

A. Well, I do not know whether it is exactly what I said. It certainly conveys the meaning that I had in mind.

7976 Q. Well, answer it in your own way if you can.

A. Well, what do you want?

Mr. Austin: If we could be off the record. If so, I can show you the way I think it should read.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

The Witness: The sentence should read:

"Incidentally, had it been desired by the accountant for the Commission to compare these, it would have been an easy matter to have checked the ratios there, either in the Detroit office or in the Chicago office."

I think it means the same, however, as it is here.

By Mr. Austin:

Q. Do you mean by that statement, Mr. Boatwright, that the quarterly distribution of time reports for the year 1937 for the Detroit field were still on file both in Detroit and in Chicago in the winter of 1940-1941?

A. I know that they should be on file in Detroit. I know that they are on file in Chicago. I have examined them in Chicago.

Q. Well, I tried to look it up this morning, and did not have time to. I was under the impression that I had asked you a year ago in the spring of 1941 about that very point, and that you had given some testimony or 7977 stated, in fact, that it was not available?

A. I am sorry. I do not recall any testimony to that effect. If you could point the testimony out to me I would be glad to give you my opinion on it. I do not believe you will find any such testimony.

Q. ~~Mr.~~ Boatwright, * * *

Mr. Austin: Off the record.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record. You may proceed.

ByMr. Mr. Austin:

Q. Mr. Boatwright, do you recall me going into that subject with you on your cross-examination in Washington in the spring of 1941, and your expressing at least a doubt as to whether the 1937 quarterly distribution of time reports were still available?

A. No. I do not recall that specifically.

Mr. Hanley: What became of that other question which was discussed off the record?

Mr. Austin: That was stricken physically.

Mr. Hanley: Well, there was another one just prior to that. What became of it?

Mr. Austin: It is still on the record. I was just 7978 trying to pursue this a little further, in an effort to clear up this matter.

Mr. Hanley: I see.

The Witness: May I hear the question again now?

Trial Examiner Ballinger: Read the question to the witness.

(The reporter read the question as follows:

"Q. Mr. Boatwright, do you recall me going into that subject with you on your cross-examination in Washington in the spring of 1941, and your expressing at least a doubt as to whether the 1937 quarterly distribution of time reports were still available?")

The Witness: No, I do not recall that specifically. You asked for several records of 1937, Mr. Austin, but you may or may not have asked about that particular record. I do not recall.

By Mr. Austin:

Q. Well, I have not been able to check it up this morning, but I want to ask you this:

You said that the Commission's accountant could have compared the 1940 quarterly reports and the percentages shown thereon with the similar report and percentages for 1937 had he desired to do so, in the spring of 1942. Did you at any time inform him that the 1937 quarterly distribution of time reports were still in existence?

7979 A. I do not know that I did. I did not know that he was going to make this calculation.

Q. Yes. I assume that. And I am not assuming that he asked you for them. I assume that if he had, you would have given them to him.

A. Yes. I could.

Q. I am merely asking these questions subject to a check as to your former testimony regarding their availability.

In your testimony of yesterday at page 7890 of the record, you referred to studies conducted by the sales research department in which results have been secured tending to substantiate and support the use of the gallonage factor.

Can you enumerate the particular accounts regarding which such studies have been made?

A. Well, I think the criticism was directed toward gallonage applying to all accounts. I can enumerate some of them where the bearing was direct on the individual account.

Q. Where what?

A. The bearing was direct on the particular account. I think I did that yesterday, in mentioning salesmen's salaries, account 004; office expense—salaries—accounting. And—

Q. (Interposing): Neither—

A. —which has many fields, and tends to substantiate the use of the gallonage for the allocation of general
7980 office expense to the field.

Q. W~~ell,~~ account 004 is not allocated on the basis of gallonage by the Respondent in its regular accounting procedure.

A. Both of those particular accounts which, as I mentioned yesterday, tended to indicate the validity of allocation of the general office expenses to the fields on a gallonage basis; those two specific accounts I mentioned on yesterday, Mr. Austin.

Q. I do not think you specified that yesterday. How, for instance, did your study of salesmen's salaries tend to justify or support the use of a gallonage basis for general office expenses, and for these general office expenses?

A. Well, account 004 and office expense—salaries—accounting, are two of the major items of expenditure on form 189. They are, likewise, two of the larger groups of personnel.

Now, if there is a direct correlation which is quite significant between the concurrent movements of those two items of cost and the gallonage sold in a given field, then certainly there is a logical justification of the use of gallonage as an allocation factor of general office expenditures to the field.

When I refer to general office expenditures, I refer to those which are allocated to the field on a gallonage basis.

7981 Q. Now, do you mean, Mr. Boatwright, now, the allocation of general office expenditures between the various fields on a gallonage basis, or do you mean the allocation between channels on a gallonage basis after you get part of the expense to the field?

A. I mean allocation of the general office expenditures among the various 27 or 28 fields.

Q. That has nothing to do with the allocation between channels after the expense reaches the field?

A. No, but there was a blanket criticism of gallonage as a factor of allocating cost, indicating that we had merely grabbed at the chandelier. I do not think that we did that that way, or that that could be quite so, because we have done many things to test the accuracy of the allocation factor, and I merely mentioned those as two of them with which I was personally acquainted where they had been made on the basis of proper investigation and study.

Q. Now, if I understand you correctly, Mr. Boatwright, you said that your studies had shown that the expenses in account 004 and account 200 follow gallonage, or their fluctuations, if any, followed fluctuations of gallonage.

I am not quite clear on this matter of correlation. You said there was a correlation, for instance, of .92 in account 004; a correlation of .94 in the case of account 200. Is that not right?

7982 A. Yes, sir. That is correct.

Q. Now, let me ask you a specific question, and you in your answer to that can explain what I do not now understand, which I think will then be clear.

A. Yes?

Q. Does the allocation of expense in account 004 as between tank wagon reseller, tank wagon consumer, and other methods channels follow or very closely approximate the distribution of product gallonage between those channels in the Detroit field?

A. I do not know. I do not think that it does.

Q. It is a fact then, is it not, that the allocation of expense may be an allocation differing very widely from the distribution of gallonage between channels?

A. Yes, sir. It does.

Q. And the same is true of account 200?

A. Yes, sir.

Q. Now, in view of that, will you please explain this correlation of .92 and .94 to which you referred yesterday?

A. Well, I was speaking of the sum total of the accounts in a given field as compared with the sum total of the gallonage in any given field which gave me a pair of figures. It would, would it not? If you take from the bottom of the exhibit the sum total of the gallonage in the field, and then you take the sum total of the selling cost in account

7983 004, and you do that for each of the twenty-eight fields, you have twenty-seven pairs of figures.

Now, the correlation process is merely a mathematical process of measuring the degree of relationship between these two figures for each of the twenty-eight fields, and in that manner you would have twenty-eight pairs of figures. It is an averaging process. If there is a perfect movement, as I said yesterday, it would have a correlation effect of one. That is so rare that it seldom happens with ordinary business data. I say "seldom." It just does not happen to ordinary business data. And that correlation factor indicates that I have, for instance, in a certain field, a selling cost under salesmen's salaries of $150,000—that is, to just take a figure out of the air—then, of course, with a reasonably accurate degree, I can estimate the gallonage there without knowing the gallonage.

Q. Well, then, the correlation procedure in these percentages that you are referring to is a support for the allocation of and distribution of general office expense between fields on the gallonage basis, and that only? Is that correct?

A. Yes, sir. Those two illustrations were used—

Q. (interposing) Now, just taking one of these accounts merely at random from Respondent's Exhibit 101 which are allocated upon a bulk plant channel, or, rather, between the bulk plant channels on a gallonage basis—referring
7984 to account 201—perhaps a little larger one would
be better. Account 202 would be a better one. That is entitled "Office Expense—Postage." The expense in that account is allocated between bulk plant channels on a gallonage basis in the company's regular accounting procedure. Is that not correct, Mr. Boatwright?

A. I think that is correct.

Q. Has the sales research department ever conducted any study which tended to substantiate and support the use of the gallonage factor for that account?

A. No. I do not recall that any of our studies have had a bearing on that specific account.

Postage is incurred largely in the billing of your customers, or upon the handling of your transactions of that nature, and so such billing or such correspondence and mail transactions covering all of your petroleum products would follow that rather closely. However, we have made no study in an effort to substantiate that particular allocation in the sales research department.

Q. I will ask you about one other account.

Turn now to account 086—Taxes—Real Estate and Personal Property. Has the sales research department conducted any study the result of which tended to substantiate and support the use of the gallonage factor for the allocation of that account between channels?

7985 A. The nearest thing that we have come to that in connection with this account is that in one of our analyses, we were analyzing tax payments and we were analyzing investment.

We took the investment and a sample of fields in tanks used for storage of our standard fuels which again are the gasoline, kerosene, heating oil, furnace oil, and so forth. And then we took the investment in the bulk storage for motor oil. And the motor oil storage, as you probably know, or at least as the Commission's accountant, Mr. Warmack knows, is not available at all plants. It is only available in a comparatively few of them. There is a tendency for the spread of your investment to follow and represent the only comparable ratio of the gallonage in the other methods channels to the other gallonage.

That is the nearest thing.

Your taxes are placed on an overall basis, as you are well aware, and the nearest analysis that we have made to that is an analysis of the investment aspect.

Q. Is not the tax or taxes assessed on real estate improvements and buildings on the property separately on each building?

A. I do not know.

Q. I thought that was the usual procedure of taxing authorities?

7986 A. I just do not know. I just do not know.

Q. Mr. Boatwright, can you refer to any specific studies which have been made by either the sales research department or other departments of your company which were made for the purpose of substantiating and supporting the use of gallonage factors in connection with any specific account on Respondent's Exhibit 101, between the various channels in the company's regular accounting procedure?

Mr. Hanley: May we be off the record a minute, your Honor?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record. Proceed.

The Witness: May I hear the question again?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

The Witness: Well, you request that I refer to specific accounts.

I think I pointed out yesterday the number of individuals who had made analyses of the dependability of gallonage as an allocation factor. I do not think of this problem as being purely a single account problem.

Wherever a gallonage factor is used, it is what in our judgment is an overall cost.

Accordingly, if you make a study of gallonage as an
7987 allocation factor, you may direct your energy to one
or two or three parts of individual accounts. But
as a rule, you are studying a broader topic than that.

Q. Well, in applying the gallonage factor, you applied it specifically, you applied it to a particular expense, a particular account, as you have broken them down on your form 189; do you not do that, Mr. Boatwright?

A. Surely.

Q. It is also true that the nature of the expense in different accounts varies and that is why you have those different accounts?

A. That is right.

Q. Is not that the reason for having all of these one hundred-odd accounts the very reason that the company feels that the accounts vary sufficiently to justify that expense?

A. Frankly, I think we have too many accounts.

Q. At least you have them.

A. We have them.

Q. What is the theory upon which they were set up? Is not the theory that which I have just stated?

A. I presume it must have been. I do not know.

Q. Is it not true that while the use of a gallonage
factor in one account might result in approximately a cor-
rect distribution between channels of the expense in
7988 that account, that the use of the gallonage factor for
a different account might produce a result which was
quite incorrect?

A. That might be.

Mr. Hanley: One moment. I object to that question. As the ground for my objection I would like to state that- -

Mr. Austin: To save time I will strike the question and restate the question.

Trial Examiner Ballinger: The question is withdrawn. It may be stricken physically.

Mr. Hanley: Oh, I think it should stand on the record.

Trial Examiner Ballinger: Very well.

By Mr. Austin:

Q. Would it follow from that that gallonage may properly be used in allocating the expense in one account * * *

Mr. Austin: Off the record.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. Would it follow from the fact that gallonage may properly be used in allocating the expense in one account that it may be properly used and would produce as correct a result when applied to the expense in a different account?

7989 A. That would be correct. You would have to take the situation there and determine it. It could happen either way. In one instance, it might produce a correct result in one instance, and if applied to another account it might also produce a correct result, which I take to be the point in your last question.

On the other hand, it might be properly used in one account and might not be properly used in another account, as you pointed out in your previous question.

I am just summarizing my understanding of your two questions.

Q. Then, do I understand your answer to be, Mr. Boatwright, that you could not refer to any specific studies which had been made by the Respondent which tend to support and substantiate the use of a gallonage factor as a means of allocating expense in any particular account on Respondent's Exhibit 101 between the regular accounting channels?

A. I have the question but I do not believe that some of the terminology is correct. Do you mean by "accounting channels," the regular sales channels in the field?

Q. The sales channels. That is correct.

A. No. I do not. I do not know that I could go any further in the description of the contention given as to this gallonage question than I went in my direct testimony. It
is something that we have discussed many times. I
7990 do not know of an accounting problem that has re-
ceived the attention of our company that that one has.
I would say annually, at least, some one account on 189, form 189, is broken down and examined in detail to see if

we can find a better substitute than gallonage for that part which is allocated on a gallonage basis.

I recall specifically that for three years on a row, we broke down account 066, and examined it in a careful effort to determine if we could arrive at a better method of handling it.

Q. You picked a very hard one there?

A. It is one of our most difficult ones. I know that we are constantly studying, just as any group of accountants would do, in an effort to improvement upon the accuracy of our allocations. Our accounting system is just the same as with any one else, it is subject to change, it is in a constant condition of flux as we adjust it to meet changing conditions. I could not go down on this form 189 and say that we have done this with that or with the other one, so far as gallonage is concerned on this account, on that account, and on this other account.

However, I can say that we have given it continuous attention. I could not, as I said before, take this form 189, which I have before me, go down it with you and say that we have done this, we have done that, we have
7991 done the other thing. I would not attempt to make any such statement as that, Mr. Austin.

Q. Now, at page 7893 of your testimony yesterday, Mr. Boatwright, you stated there under "Seventh:" part of your statement regarding gallonage, that:

"* * * a large part of our decisions are of necessity predicated upon a gallonage consideration." Then, you proceeded to state a number of examples.

When you referred there, Mr. Boatwright, to "gallonage consideration," and as you have referred to gallonage in various examples, were you not referring to total gallonage rather than to any ratio of gallonage between sales channels?

For instance, in your first example, you stated:

"If there is a question as to whether we should build an additional storage tank at a bulk plant, the amount of gallonage which moves through that plant is an important consideration."

While that was referring to a matter of gallonage, that was in fact referring to the total gallonage moving through the plant, was it not; that did not refer to that particular portion of gallonage that may move through a particular sales channel?

A. It was referring to the gallonage of that particular product moving through that plant.

Q. That refers to all products in your example?

7992 A. In that particular case the tank would be built for one standard fuel, let us say, or again, it might be referring to the matter of heating oil.

Q. Additional storage?

A. It would be a question of the amount of heating oil sold.

Q. My point is that when you say that a large part of your decisions are of necessity predicated upon a gallonage consideration, were you or were you not referring there in those examples to methods of allocating costs between different sales channels?

A. Well, I was referring to the significance that gallonage plays in decisions which the company must render.

I was referring specifically to the allocation of cost for maintaining, let us say, this tank. We have been discussing many channels here, however, in this case I was referring to the significance in this particular case of a gallonage factor in ascertaining the course of action to be pursued at that plant.

Q. Were you not really referring to volume rather than to gallonage?

A. I do not know what the difference is between volume and gallonage. To me, they are the same.

Q. Do you—

Mr. Hanley: (Interposing) What is the difference?
7993

Mr. Austin: Well, volume is the overall.

Mr. Hanley: I would not know.

By Mr. Austin:

Q. Well, volume is quite a different thing from, in my opinion, from gallonage, as it was used here. We have been talking about gallonage as a basis for allocating between channels; whereas, as I understand your example, here you are merely referring to total volume of products moving through a particular bulk plant or retail outlet, or whatever it may be, without reference to the channel gallonage, if I may put it that way?

Trial Examiner Ballinger: Well, are not gallons used merely for the purpose of measuring volume?

Mr. Austin: They are, your Honor, the general volume of petroleum products rather than channel volume, which is the distinction that I am trying to make.

Mr. Hanley: I do not know whether there is a question pending or not.

Trial Examiner Ballinger: Read the last question and answer.

(The reporter read the last question and answer.)

Trial Examiner Ballinger: Proceed.

By Mr. Austin:

Q. All right. Mr. Boatwright, take the first ex-
7994 ample that I just mentioned, and you referred there
to the amount of gallonage which moves through
that plant.

Does that have any reference to the allocation of costs as between sales channels?

A. Your question is so broad, Mr. Austin. You say it does not have any; yes, it has considerable. It has a definite and a significant bearing on the question of depreciation.

It has a definite and significant bearing on the question of allocation of taxes. So, on some accounts it would have a bearing. On others it would not have a bearing.

That is true of so many of these.

(The witness indicates the accounts on Form 189.)

By Mr. Austin:

Q. Your question here is whether you are going to build an additional storage tank at this plant, and you say the gallonage that moves through that plant is an important consideration.

Now, let us assume that you decide to build the storage tank.

A. Yes, sir. For simplicity, let us assume that we are considering a question of whether we should or should not build an additional tank in which to store standard Red Crown gasoline which would be sold in both reseller
channels and consumer channels.
7995 Is that particular product satisfactory for pur-
poses of illustration?

Q. Surely.

A. All right. Now, the product is placed in this tank. It is co-mingled, and we have a question of the depreciation of that tank.

We have the question of maintenance of that tank. And, well, let us say that on the annual basis there is the sum total that moves through that tank of 30,000 gallons, 40,000 gallons, or anything that you may wish to assume. A part of that goes to one channel and a part of that goes to the other channel.

Now, the gallonage factor which I mentioned in my consideration had determined the construction of the tank is a significant thing and is reflected in the depreciation account, and is likewise reflected in the tax account.

Now, when the product moves through there, it is one and the same product. The gallonage unit is used for the allocation of the maintenance of that being charged up to the 3,000 series.

Therefore, that illustration has an effect on these particular accounts. You would have to test each of these illustrations there, Mr. Austin, in order to get at, to see what they would do.

Q. The method of allocation has nothing to do with
7996 your decision to build the tank?

A. Not the method of allocation, but many decisions are based on gallonage, which of necessity influences subsequent accounts which may then—

Q. (Interposing). But the same gallonage will, of course, be allocated some place?

A. Which may have been or be allocated on a gallonage basis; yes, that is true.

Q. For instance, under "(c)" you say as follows: "If we wish to determine whether we should lease an outlet, gallonage is given important consideration."

A. Yes.

Q. I suppose you mean by that that gallonage that you think can be sold or that is being sold at that outlet? It is that gallonage to which you refer?

A. That is correct.

Q. And that again is something entirely apart from what you are going to do with your costs after you make your lease? Is that not true?

A. I suppose—

Q. (Interposing). What I am trying to say, Mr. Boatwright, I want to pursue this only a little further. It seems to me that these examples represent cases where gallon-

age in the sense of total volume may influence deci-
7997 sions such as just referred to here; but it does not seem to me that those decisions are decisions which have anything to do with allocation of costs between channels.

Now, if you cannot state that I am either correct or incorrect on that, I will not pursue it any further.

A. Mr. Austin, I am afraid that this just reaches the borderland of knowledge when two authorities fail to agree.

Q. I do not believe—when you said at page 7893, in the same paragraph that I referred to as follows:

"* * * that a large part of our decisions are of necessity predicated upon a gallonage consideration."

Does the gallonage which is considered include direct shipment gallonage, or is direct shipment gallonage excluded for the purpose of this consideration?

A. Well, none of these particular illustrations that we have mentioned was included in the group that would include direct shipment gallonage. None of these would include direct shipment gallonage. I think practically all of those illustrations is either applicable or restricted to reseller illustrations.

Q. Is it not true, Mr. Boatwright, that all of the studies, considerations, and checks which you mentioned in your statement yesterday about gallonage, were made and have been made by the company in the course of its regular accounting procedure over a period of years?

7998 A. No. That is not true.

Q. Well, perhaps I can state that a little differently from that.

A. Yes?

Q. Have any of those—

Mr. Hanley: (interposing) Just a minute.

Mr. Austin, did the witness finish his answer?

The Witness: Well, yes. He would have to reframe his question because that just is not true.

By Mr. Austin:

Q. Well, have all of these various checks and considerations which you have described been made for the purpose of checking or testing or adjusting the company's regular accounting procedure? That is what I meant when I said "in connection with it"; I mean that is what they were directed to. That is what they were trying to do.

A. Many of the studies have been directed to that. Many of the studies which have resulted in findings having a bearing on that did not start off with that as the major objective. It was merely incident to the development of another study.

Q. Does the company's regular accounting procedure recognize the direct shipment business?

A. No, sir.

Q. And is direct shipment gallonage given any
7999 effect in the company's regular accounting procedure?

A. In the sales department, no.

Q. Well, the sales department is the department in which are included all of the costs in the Detroit field, as we have been concerned with them in this case?

A. Yes, it includes all of the marketing costs in the Detroit field, but there are times, and this is one of them when I am answering your question, when to answer it without a limitation, well, it will be simply not a correct statement. In other words, while it is quite correct that the sales department in the Detroit field includes all of the marketing costs, there is just this point that I said, if I were not to answer your question except with a limitation, why, it will not be a correct statement.

Q. Yes. I understood you. But I just wanted it to be clear on the record.

A. Yes.

Mr. Austin: May we take a recess for five minutes, your Honor?

Trial Examiner Ballinger: The hearing will stand in recess for five minutes.

(A short recess was taken.)

By Mr. Austin:

Q. Now, for the purpose of this cost study, Mr. Boatwright, when you were preparing your exhibits 99, 100,
and 101, was the purpose of the cost study to make a
8000 comparison of unit costs as between tank wagon re-
seller channels and jobber, naphtha and gasoline channels, as shown on Respondent's Exhibit 101?

A. Certainly.

Q. And when you made this cost study, you attempted to make and did make a separation of direct shipment costs from bulk plant costs? Is that correct?

A. Yes, sir.

Q. When you proceeded to make your computations to arrive at the amount of expense charged to the various accounts in the jobber, naphtha and gasoline channel, did you—

A. (Interposing): I am sorry, Mr. Austin, but I did not hear your question. Would you mind restating it?

Mr. Austin: I will withdraw the question.

Trial Examiner Ballinger: The question is withdrawn.

Mr. Austin: I will put it this way:

By Mr. Austin:

Q. Referring now, Mr. Boatwright, to the field expenses as distinguished from the general office expense as shown on Respondent's Exhibit 101.

A. Yes.

Q. When you made your computation to determine the amount of expense in the various accounts which you
charged in this cost study to jobber, naphtha and gas-
8001 oline, did you use an all gallonage method of alloca-
tion including direct shipment gallonage in arriving
at any of the costs, or rather, expense entered in the jobber, naphtha and gasoline column?

A. I did not with reference to the field costs.

Q. Is there not just one, and only one exception to that, that exception being road maps issued through service stations, being a part of the expense in account 075?

A. Well, I was thinking of road maps as a general office cost, because they are purchased centrally, but they are allocated out to the field, and with that exception—I do not know, it seems to me also that there is a very small part of account 066, is there not?—I am just trying to recall, but it seems to me that there was some part of account 066 that would be in that category, but I may be wrong.

Q. I will accept that as a fact.

A. I just do not know.

Q. In general, Mr. Boatwright, is it or is it not true that the expenses charged to jobber, naphtha and gasoline, on Respondent's Exhibit 101 were not reached by the usual—well, perhaps I had better not say usual—by the use of a gallonage method of allocation?

A. In general that is correct.

Q. So that where the allocation factor is used in arriv-
ing at the direct shipment expense and particularly
8002 in the jobber, naphtha and gasoline expenses as shown
on Respondent's Exhibit 101—well, let me ask you:

What were the allocation factors used in arriving at the direct shipment expense and particularly with regard to jobber, naphtha and gasoline expense, as shown on Respondent's Exhibit 101, Mr. Boatwright?

A. Wherever possible we predicated direct shipment cost upon the effort measure.

Q. That, in general, means time, does it not?

A. That is right.

Q. I believe that applies to salary expense additionally, does it not?

A. Yes, sir.

Q. As to non-salary expenses, what measure was used?

A. Well, there are so many different accounts, Mr. Austin:

The operation and maintenance of the car;

Depreciation on the car;

The traveling expense of the individual involved.

These usually follow the allocation of effort of the operator of the vehicle.

In other cases, we had to trade individual work orders, but the central theme of our thought was to allocate on the basis of the sum total of effort devoted to the jobber, naphtha and gasoline business.

8003 Q. If you had used total gallonage, Mr. Boatwright, including direct shipment gallonage as a basis of allocation, no cost differential would have resulted between tank wagon reseller and jobber, naphtha and gasoline?

A. That is correct. But it would have been an absurdity.

Q. I am not arguing that it should be done. I am just asking as to the fact.

A. That is correct.

Q. Now, in the course of your cost study and for the purposes of your cost study or at any other time, did you make any study to determine or substantiate the accuracy of the result obtained by the use of the gallonage method of allocation as between bulk plant channels for the purpose of reaching a cost in the tank wagon reseller channel for comparison with direct shipment cost obtained, as you have stated, on a basis of effort?

Mr. Hanley: Will you read that, please?

Trial Examiner Ballinger: Read the question.

(The reporter read the question.)

Mr. Hanley: I assume, Mr. Austin, that your question is pointed to this particular cost study reflected by Respondent's Exhibits 99, 100, and 101?

Mr. Austin: That is correct.

The Witness: Then your question is broader than that, as I recall it.

8004 Mr. Hanley: I do not know whether you remember the question or not.

Trial Examiner Ballinger: Read the question to the witness at this point.

(The reporter read the question as follows:

"Q. Now, in the course of your cost study and for the purposes of your cost study or at any other time, did you make any study to determine or substantiate the accuracy of the result obtained by the use of the gallonage method of allocation as between bulk plant channels for the purpose of reaching a cost in the tank wagon reseller channel for comparison with direct shipment cost obtained, as you have stated, on a basis of effort?")

The Witness: I believe that question is broader than that, after having heard it read again.

Mr. Austin: I will try to restate it.

Trial Examiner Ballinger: The question is withdrawn.

By Mr. Austin:

Q. I will restate the question to you, Mr. Boatwright.

A. Thank you.

Q. You used in many accounts as shown on Respondent's Exhibit 101 a gallonage factor for allocating the expense in those accounts between bulk plant channels.

You used exclusively or almost exclusively the effort
8005 factor, or at least not the gallonage factor in determining jobber, naphtha and gasoline, cost.

Have you made any study in any of these accounts which will support the use of the gallonage factor for arriving at tank wagon reseller costs for the purpose of comparison with the direct shipment costs arrived at by a different method—

A. (Interposing): In preparing—

Q. Just a minute—I believe that is all.

Mr. Hanley: That is objected to for the reason that the witness has been testifying two days now that studies of that exact character have been continuous in the course of the company's accounting affairs;

Further, that the exhibit speaks for itself as to the comparison that was made between a reseller channel and the jobber channel resulting in the claimed differential of 1.51 cents.

Trial Examiner Ballinger: The objection is overruled. The witness may answer the question.

The Witness: In connection with the preparation of Respondent's Exhibit 101, we did not make additional studies tending to verify or substantiate the use of the gallonage factor in the allocation of costs among the three sales channels shown under the caption, "Bulk Plant."

By Mr. Austin:

8006 Q. Is it not true, also Mr. Boatwright, that such studies and tests as the company may have made to support the use of the gallonage factor in its regular accounting procedure, were not made for the purpose of or with a view to comparing tank wagon reseller costs to jobber, naphtha and gasoline cost?

A. Yes. That is true.

Q. Now, if you will turn, please, to page 7901 of the record.

A. Yes.

Q. You were discussing, at that point, the various methods which have been applied to time records.

A. Yes.

Q. And further, you were discussing at that point, to be more particular, the accuracy of the use of time records maintained by salesmen for the purpose of allocating salesmen's salary expenses and the desirability of that method of allocating such expense.

I think that is correct, is it not, Mr. Boatwright? If you will just look at the bottom of page 7900 and the top of page 7901.

A. Yes. That is a correct statement.

Q. Now, on page 7901, you stated:

"Third: We found that if we allocated our expense for
a period of coming months according to the past rec-
8007 ords of the accomplishments, even though your sales-
man may have been extremely conscientious, and even
though he may have maintained a careful record, it still was
a very poor allocation factor, because of the highly sea-
sonal nature of our merchandise."

That simply means, does it not, Mr. Boatwright, in your opinion, that salesmen's records and memoranda of time spent as between different customers and products would not be an accurate basis for allocating his expense for the following months?

A. Certainly. That is what it means.

Q. Well, is there any reason why such a time record kept by salesmen would not be a proper basis for the allocation of his salary and expenses—well, I do not think it would apply to expenses—during the month or months for which the record was kept?

A. No. Limiting my answer now to this one component part that you just quoted for the—

Q. (Interposing). What do you mean by "component part"—salary?

A. Oh, no. But you were simply quoting one paragraph—

Q. (Interposing). Yes?

A. —out of a series of difficulties that we encountered with that allocation procedure.

Q. Yes.

8008 A. As far as that one paragraph is concerned, if you have a conscientious salesman and he does maintain reasonably good records, records of the distribution of his time between customers and between products, then that record obviously could be used to allocate his past salary for the month to which the record applied.

Q. Now, I understand, of course, that your present procedure is to use quarterly distribution of time reports for allocation of salary during the following months. It is for the following quarter?

A. Yes, sir.

Q. That is correct?

A. Yes, sir.

Q. But for the purpose of—

Mr. Hanley: May we be off the record?

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record. You may proceed.

By Mr. Austin:

Q. Is it not true time records may accurately be used, assuming that they were properly kept, for the allocation of expense for the time for which the records were kept? Is there any reason why that could not be done? In

other words, why must you assume that the time rec-
8009 ords kept by a salesman must be used for allocating following months salaries instead of past months?

A. The magnitude of the task of keeping your records and in bringing them together and making your allocations applicable to past operations would so delay your closing of your books, that it just does not strike me personally as delay that would be justified by the improved accuracy that you might obtain.

The book that we have frequently referred to here which has been marked as Commission's Exhibit for identification, a publication of the Federal Trade Commission, has in there a statement which is absolutely true, that it is difficult even for the salesman, when he is selling a line of products, and calling on a group of customers for him to ever by a time record or estimate prepare a strictly accurate allocation. It is just difficult to do.

Q. Well, assume that you might have that difficulty, and I am not urging that it be followed in the company's regular accouting procedure, but for the purpose of a cost study, such as this, Mr. Boatwright, would it not be true, in your opinion, that assuming that time records would be used, that they should apply to salaries and expense incurred during the course of the cost study; and is it not your opinion, also, that that might be done for the purpose of a cost study?

8010 A. Well, if you did that, Mr. Austin, you would have to maintain a time record for a year period. You could not maintain a time record for, say, a month, and then say, "This establishes a time allocation which we will use."

That would not be representative at all, because of the seasonal nature of our merchandise. You see, most any problem that confronts us is a problem wherein we are confronted with an annual problem as far as salesmen's efforts are concerned.

Q. Assume that you kept such time records; assume in the course of your regular accounting procedure you use them in the following month if you so chose, it would nevertheless be possible to use those same time records as a basis of allocation of past time when confronted with the problem of making a cost study for prior years, would it not?

A. I am not sure that question is just exactly clear to me. May I give my interpretation of it to see whether it agrees?

Assuming that instead of the estimates of the company, it requested of its salesmen, and they had maintained careful and conscientious time records which, in our regular accounting procedure, we had applied to future months, but for the purpose of the preparation of this study, we had reversed the application of those time records and applied them to past months.

Is that the idea?

Q. Yes.

8011 A. Now, that being a statement of the condition, a will you restate the question that you would apply to that condition?

Q. Well, I am really only wanting to find out whether, in your opinion, the following:

First, that would not be a more accurate method of allocating salesmen's time than any estimate could be;

Secondly, whether that use of the salesmen's report would not overcome the objection you stated here as the third objection on page 7901.

A. No. I do not think it would, Mr. Austin, I do not think it would be more accurate.

Q. You do not think that the salesman's time report would be more accurate than estimate for future months than you now use?

A. I do not believe it would.

Q. Even though the time report by the salesman would apply to all the time for which the report was made?

A. I do not think it would, based upon my experience.

Q. Why not?

A. Because I know salesmen. I know salesmen do not like to maintain detailed records, and they will not do it. They wait until they go to their hotel room on Saturday night, and they make up the week's reports.

Mr. Austin: Off the record.

Trial Examiner Ballinger: Off the record.

8012 (There was a discussion off the record.)

Trial Examiner Ballinger: On the record. You may proceed.

By Mr. Austin:

Q. You stated, Mr. Boatwright, that at one time you tried this practice of having salesmen keep and submit reports of the allocation of their time. Where was that done and when?

A. Well, it was done throughout our territories. It was done prior to my joining the company, and I think it was in the late 1920's that we were on that policy.

Q. When that was done, however, were the composite percentages made up from those reports used for the allocation of expense in future months or in past months?

A. I just do not know.

Q. Have you yourself or your department, since you have been in the department, made any study of the accuracy of the use of time reports by salesmen in allocation of expense for the time for which the reports were kept?

A. No. I have not made a study of that.

Q. This experience with those reports, then, is simply based upon what you have learned about the company's past procedure?

A. Review of the files, and going through the historical experience of the company on some of these different accounts, and discussion with men who were with the
8013 company and who are in charge of the accounting
activities at that time, giving me their experience first hand.

Q. At page 7916 of the record, Mr. Boatwright, you stated:

"However, if we weight the salaries then we can not use the same allocation factor for the traveling expenses of salesmen, for the maintenance of the cars, for the depreciation of cars, * * *"

In referring to the different classes of salesmen in allocating their salaries between various channels in the company's accounting procedure—and I assume also, for the purpose of this cost study—that a different allocation would have to be used for the supporting accounts; that is, for the traveling expense and the maintenance and depreciation on their cars, as I just read.

Is that correct?

A. Yes.

Q. Mr. Boatwright, those supporting accounts that you have referred to are accounts 032, 047, and account 102, are they not?

A. Yes, sir.

Q. Mr. Boatwright, the salesmen's salary account is account 004?

A. Yes.

Q. Is it not true, Mr. Boatwright, that the amount of expense in account 032, account 047, account 102 is
8014 quite small in total as compared with the expense in account 004?

A. Looking at the petroleum products channel, it represents approximately fifty-two thousand dollars as compared with approximately two hundred thousand dollars, the sum of those three.

Q. I believe your testimony was that while the difference in the average salaries paid different classes of salesmen affects to some extent the composite percentages of the quarterly distribution of time reports, or rather, would affect those percentages if salaries were weighted, that the amount of salary of the salesman has nothing to do in general, at least, with the amount of his traveling expense and the maintenance and operation and depreciation of his car?

A. Yes. That is right.

Q. Let us suppose now that in preparing the quarterly distribution of time report that instead of taking a composite percentage based upon the estimates of time for all salesmen, that a separate group of percentages for—that is, those channels were obtained for each separate class of salesmen, and then the salaries for that class of salesmen were allocated according to the time estimates for the particular class. That would be entirely possible, would it not?

A. Yes. Are you ignoring the differences of salary within the group?

8015 Q. Yes.

A. Then, you would prepare your allocation factor by groups of salesmen, and allocate all salaries of individual groups separately?

Q. Yes. That would be entirely possible—

A. (interposing) It would be possible—

Q. —on the basis of information that you would now have? Is that not true?

A. It would be possible. It would just ~~increase~~ your accounting cost.

Trial Examiner Ballinger: Have you any idea to what extent it would increase the accounting cost?

The Witness: Oh, it would not be a large factor, your Honor. Instead of making the one allocation as we do, we would then break it up into six or seven, and then you would have to re-cap that six or seven.

By Mr. Austin:

Q. Well—

Mr. Austin: I will take just a moment to look this up.

Mr. Hanley: While he is looking that up, will you tell us if there would be any benefit in doing that, that you know of?

The Witness: The only benefit that would be derived,
would be in case the salaries in one group failed to
8016 conform to the average salaries of the other groups.

Mr. Hanley: Off the record.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record. Proceed.

By Mr. Austin:

Q. There would be some benefit in it, would there not, Mr. Boatwright, for the purposes of a cost study, for the allocations considered here, if allocations of salaries for each class were made separately as to each class?

A. It depends on whether you carried that back, the effect of that, back to a very low decimal point. In other words, you would have to carry that effect back to a rather distant decimal point.

Q. My only point here is in connection with your testimony; in connection with that statement in which you stated that it would require a different method of allocation for the three separate supporting accounts, which, as I recall, are accounts 032, 047 and 102.

A. That is right. It would.

Q. Now, if the salaries of each class of salesmen were
handled as just suggested, and as you have stated is possible, it would still be possible to handle and use those percentages just as you do now, for the supporting accounts;
would it? In other words, you would still use your
8017 composite percentages for your supporting accounts,
which would not give an error in your determination
there?

A. I am not at all certain that I understand your question. You are going to allocate salaries separately. Then, you are going to allocate your supporting accounts on a composite percentage basis? Is that the idea?

Q. Yes, simply because the composite would give the same result to the supporting accounts?

A. Yes, That is possible. And that is, I think, completely in keeping with what I suggested, when I said that it would be necessary to handle these accounts differently. You could not handle the salaries except on one basis, and the supporting accounts, except on a secondary but unrelated basis, as you have indicated here. You could not handle the salaries on one basis and the supporting accounts as a secondary to that. Do I make myself clear?

If you make the allocation by individual groups of salaries as appertaining to salaries from six or seven or eight groups, you are going to have six or seven or eight allocations instead of one; then, if you recapitulate your percentages by groups to reach the composite percentages for the overall class and apply your composite percentages to your supporting accounts, that would be all right.

Q. That would not involve the burden of getting new or additional information from what you do at the
8018 present time?

A. That is correct. It would only mean that you would apply it by component parts which may represent seven groups instead of one.

Q. That may have been done for the purposes of this cost differential from the information then at hand? At least, it could have been done for the purposes of this cost study from the information which was at hand at that time?

A. It could have been done provided we had broken down the component parts of the account.

Q. And you did break down the component parts for the purpose of obtaining direct shipment costs, Mr. Boatwright; did you not?

A. Yes. We had to do that.

Q. And I now refer you to pages 7920 and 7921 of your testimony, Mr. Boatwright. This goes over into the question of the possibility of a segregation between A-Station cost and B-Station cost.

A. Yes.

Q. At the top of page 7921, you stated that you had some discussion with other officials of the Respondent company on this point, and that following the discussion, Mr. Houghton went to Detroit and examined the actual records in the field; that he then returned to Chicago at a later date with a description of the nature of the records in the field, and he described what would be required to pro-
8019 vide you with what you would regard as a defendable or a true cost segregation.

At page 7922, you stated further that Mr. Houghton was in Detroit and maintained a staff of seven people who worked with him all the time, and that he gave consideration to this problem over the better part of four weeks.

A. Yes.

Q. So, Mr. Boatwright, I will now ask you as to what were the results of Mr. Houghton's study, and by that I do not want you to go into what you recall the result to be, I am rather asking whether there was any concrete results reported, whether there were any reports submitted, or whether Mr. Houghton reached the conclusion, any conclusion, regarding comparisons, whether he made any comparisons with which you did or did not agree, and whether or not he made any study.

A. First, I will say, no, he did not make a study.

He looked into the feasibility of making a study.

He did not make a study. It would take a tremendous amount of time, Mr. Austin, to get out all of these various and sundry accounts out of the files, and out of the vaults, out of the warehouses, and examine them to see what you are going to have to do. That was more the nature of what he did.

Q. When you refer to these four weeks in Detroit, are
you referring to this whole cost study, or did he use four
weeks there with a staff of seven people studying the
8020 separation of commission agent business?

A. No. I think that my testimony is quite clear on that, if I recall it, as given. I was asked how much time he spent on it, and I said I did not know exactly. I stated the staff that we maintained there for the entire problem, for working on the question of the cost analysis, but I think I said that Mr. Houghton had devoted consideration to this problem for the better part of four weeks.

I do not know that he worked on it all the time for four weeks, or whether he worked on it for the time remaining after he had gotten the work outlined for the other six people.

In fact, I do not know just how much of the total time was devoted to this particular problem. It was considered during this four weeks' operation there.

Mr. Hanley: Just to clear this up, I think the record may be confused. This entire cost study that is represented by exhibits, Respondent took much in excess of four weeks?

The Witness: Yes, sir.

Mr. Hanley: It took some three months?

The Witness: Yes. I mean that in the time period that he went there that that was a part of his assignment, and that upon his return to Chicago, he reported not only
8021 on other parts of the cost study, but on this part of
the cost study, and a four-weeks' period of time had elapsed from the time that he was assigned to and did go to Detroit to work on it, and the time that he came back and made his report in Chicago as to the result of his examination.

By Mr. Austin:

Q. I think it is clear now. When he came back to Chicago, did he submit to you any studies or estimates indicating what the difference in the B-Station and the A-Station cost would be in any account or accounts?

A. No. What he did was this: He reviewed with this group the problems involved, and as stated yesterday, we could not reach a concurrence that if his course of procedure, as he saw it, was followed to its ultimate end—we could not reach a concurrence as to the dependability of the results.

Q. Did Mr. Houghton express his own opinion as to what the result would be?

A. I do not recall that he did.

Q. Now, you stated at the bottom of page 7921 and the top of page 7922, that you did not think that a one month study would be sufficient to establish unit costs as between commission agent business and salaried station business, "because of the seasonal operation of our costs and the seasonal variation of those costs, and that the only way we could provide the Federal Trade Commission with an accurate and dependable analysis of the two component
8022 parts of the sales division, would be to set up two
offices for a year's full flow of business."

In your opinion, Mr. Boatwright, would it not be practical to make such a study for the purpose of segregating A-Station and B-Station costs for a period of a month or two months during a part of the year most nearly representative of the year as a whole?

In other words, you have seasonal variations, but in your own experience, I should think that it would be entirely possible to pick out a portion of the year which would represent the average for the year, or perhaps pick a month at one time and a month at some other time so that you would get a period which would be reasonably representative of the year as a whole.

A. Well, I do not know whether that would be possible or not. You see, you have a seasonal variation in your consumer business quite marked and apart from the seasonal effect in your reseller; you are affected by a seasonal variation in your products moving in your products as well as in your periods of the year, on a time basis.

Again, your products moving in your handling of your merchandising, in any month, move and correspond and concur with neither of the other seasons.

What I am trying to make clear here is that you
8023 have a seasonal variation in your consumers which varies quite markedly from the seasonal variation in your reseller.

Furthermore, as I have indicated, your products moving in any month move and correspond and concur with neither of the other seasonal variations.

I have tried to state that one or two different ways, because I wish that to be quite clear on the record.

Now, then, with the movement of these three sales channels, you might strike a norm in these months, I do not know, nor do I know whether it would be possible to find a month which even for the volume flow might represent the norm, or represent the norm on the cost. I just do not know. There are too many variables there.

Mr. Hanley: You would have to run your study for a full year to find it out, would you not?

The Witness: Well, I am afraid it does not alter the problem very much.

Trial Examiner Ballinger: Well, is it not a fact that you would have to run it a year in order to determine?

The Witness: I am afraid you would. Yes, sir.

By Mr. Austin:

Q. Well, I did not know how that could be stated as a fact. I should think that when you have seasonal variations that the company must have a pretty good knowledge as to what months are borderline, and that would repre-
8024 sent an average.

A. For any one channel, or any one product, it would not be difficult, but in the aggregate it would be very difficult.

Q. Do I understand then, that you consider such a study might be made, but as far as you are able to testify now, you feel that it might be not dependable unless it were made over a period of a year?

A. That is my testimony, yes. I believe that it would not be dependable unless it were made over the period of a year.

Q. As far as seasonal variations are concerned, seasonal variations for A-Stations will change along the same lines as seasonal variations for B-Stations, will they not?

A. No.

Q. That is not so?

A. No. It is not so.

Q. You just stated that there was a difference between consumer and reseller?

A. Yes.

Q. Channels?

A. Yes.

Q. But I assume there that the channels would run through both classes of stations the same?

A. No. It varies by area as well as by product. For instance, a farmer buys his motor oil, which would be in the "other methods" channel during a month which would be
quite different from a big month of motor oil sales
8025 in the reseller channel. Therefore, your rural aspect
on your commission station would give you one season
as defined and distinguished from the season of the same product in the A-Station. It varies both as to the market, the product, and the usage to which the product is put.

Q. Well, is it not true, Mr. Boatwright, also, that there are certain accounts, in fact, a good many accounts listed on Respondent's Exhibit 101 where your experience would indicate that there would be a very slight, if any, difference in unit cost as between A-Station business and B-Station business?

A. Well, my experience would indicate the fact I could depend on my experience, if I could depend on my experience to have any value in this period.

Q. I am afraid I did not understand your answer.

A. I said that my experience would indicate that if I could depend on my experience to have any value in this field.

Q. I see. I was just asking that preliminary to asking this question as to whether or not any attempt was made to make a separation of the costs in the accounts which, in your opinion, would provide a substantial difference or measurable difference in unit cost?

A. Well, your foundation question is quite different. You said my experience would indicate certain accounts
in which there was no substantial difference in cost,
8026 as I understand it.

Q. Yes.

A. Now, you are changing it to accounts where there would be a substantial difference.

Q. That is right. In view of the difficulty which you say that you felt confronted you there in making these separations of cost, did you make any effort to make separations of costs in the accounts where there obviously would be a difference in unit cost? Now, there are other points, but will you please just answer that "yes" or "no" first?

A. Yes. I can answer that that we made no partial studies.

Q. It is true, is it not, that there is a number of accounts which you can pick out which would afford a measurable difference, and by that I mean a measurable difference between A-Station and B-Station business?

A. Well, I thought that would be true until I got into conference with these seven or eight men at the home office. I thought I could pick out some of these accounts, but they did not agree with me. There is always a situation in any of these questions of this type where you go from the quite apparent to the less apparent to the doubtful, and then to the feature of each type of account where you can turn either way.

A. I am not urging or saying that you should have
jumped at any conclusions on these accounts as to
8027 what accounts would afford a cost differential and
what accounts would not.

If you were to have said that you had, perhaps we would have attacked that. I am just asking as a matter of fact whether or not you did make any partial study or attempt to go even part of the way in that regard as to commission costs versus other costs.

A. I have answered that. We made no partial study.

Q. If you did make such a study, I want to know what results were obtained even though they were partial.

A. We made no such partial study.

Q. At page 7933 of the record, you said that: "If a commission driver were to deliver to a farmer gasoline he would receive five pay gallons for making that delivery; * * *"

A. I have the place.

Q. If a commission driver delivers a gallon of gasoline, and in that connection, Mr. Boatwright, I just notice here that the sentence that I quoted simply says "gasoline." Do you know what amount of gasoline, Mr. Boatwright, you had in mind when you said that a driver would receive five pay gallons?

A. Yes. That is the basis for one gallon delivery.

Q. Now, if a commission driver delivers a gallon of gasoline to a tank wagon reseller station in his territory, how many pay gallons does he receive for that?

8028 A. For a reseller station, if the reseller station is located in a town, I think it is one and a half pay gallons; if the reseller station is located outside of the city limits in which the plant is located, my memory is that it is two pay gallons per gallon of gasoline delivered.

Q. What is the reason for the difference in the number of pay gallons allowed for delivery to the tank wagon reseller station and for delivery to the farmer?

A. Well, there are many reasons, which I thought I explained yesterday.

In the first place, we have to depend upon the B-Station agent to do our selling for us in the rural area.

Q. Do you mean that it takes more selling to sell a gallon of gasoline to a farmer by a B-Station agent than it does for the driver to sell a gallon of gasoline to a reseller station?

A. In the first place, answering the first part of your question, the answer is yes.

Secondly, the commission agent has his own customer control records on the rural customer.

Thirdly, the agent maintains and carries his own line of credit on his farmer business.

Fourth, there is—

Q. (Interposing): Pardon me just a moment.

A. I have not completed giving my reasons.

8029 Q. Perhaps so. However, let us refer to those first two things, first, the tank wagon reseller customer, what are the things that are involved there?

A. He has to carry a line of credit? Is that what you mean?

Q. Yes.

A. Oh, no, not with the tank wagon reseller customer.

Q. But he does with the farmer? Is that the point?

A. Yes.

Q. How about your customer control?

A. He does not maintain customer control on reseller accounts. They are maintained by the salesmen.

Q. As far as selling activities are concerned, of course, he does, as you said at page 7935, spend a large portion of his time in the selling function but does not the selling function involve the use of his truck?

A. Not necessarily. A large part—

Q. (Interposing): Is it not so that when he delivers gasoline, that is when he tries to sell it?

A. Oh, yes, that is quite true, but he also frequently sells when he does not have his truck with him. You are asking for, unfortunately, just a broad generalization. I think I would answer it this way: That in the main, when he has his selling to do and when he actually sells, he has the truck with him, although there are many exceptions to that general statement. I think that is the best I can
8030 do with that.

Q. Is it not true that on the average the B-Station agent must drive his truck more miles to sell and deliver a gallon of gasoline to a farmer than he does to a reseller station?

A. Yes.

Q. Is not that reflected by the difference in pay gallonage allowed by the company on consumer sales as against reseller sales?

A. Well, I think that we are absolutely agreeable that distance is one of the factors. I think I so stated yesterday. But it is not the only factor. If you select that one and say, "Let's say that that is our allocation," it seems to me that you would have been equally logical in saying, "Well, let's select selling time," or in saying, "Well, let us select some other factor," or some other part of the many duties, and so forth, and so on. But if you select any part, I think you should check your selection against the record and see that it is proper, and it is not in this case.

Q. Is it your opinion that actual gallons as sold to tank wagon reseller is definitely a more accurate means of allocating this truck expense than by pay gallons?

A. Yes. It is better than pay gallons, but I mean—

Q. (Interposing): Why do you say it is better than pay gallons if you concede that the truck must be

8031 used more miles for the delivery of the consumer gallon than the delivery of the reseller gallon?

I think I will put it this way, Mr. Boatwright, have you made any studies to determine which gallonage ratio most accurately reflects the use of the truck in connection with that class of business?

A. I have not made that study, although quite by accident I have made the study which would ascertain the validity of the mileage factor which was advocated in connection with another analysis that we made, and that just does not represent the fact. That just does not fit.

Q. Are you referring now to the painting of trucks?

A. Yes. The painting of trucks.

It does not relate, for instance, to account 055, which is an account which takes care of the tank, to allocate that on a mileage basis would be an error, and that I know, having made comparisons of the cost of that account in the various twenty-seven fields and in the different geographical areas served by this company.

Q. Let us restrict this to account 025, truck rental expense. Would you consider that mileage would be the most accurate method of allocating that expense, assuming that you could actually check the mileage? Would you not concede that?

A. No. I would not concede that.

8032 Q. Would not the use to which the truck is put determine the allocation of the maintenance expense of the truck?

A. Yes, but Mr. Austin, are you thinking now of mileage as being comparable in the allocation of this—frankly, I am confused as to just what you do have reference to.

Q. I am thinking of allocating the truck expense which is in your cost of rental which you pay the commission agent.

A. Yes.

Q. Charging that expense to the sales channels according to the mileage devoted to the delivery of the products in one channel as against the other.

A. Well, in stating your question, frankly, I did not get that import from it.

Q. Then, let me carry it a little further. If a truck drove five miles for delivery of a certain number of gallons to a tank wagon reseller outlet and two hundred miles for delivery to a certain number of tank wagon consumer outlets, then it would seem to me that four-fifths of the time and of the expense of the truck should be charged to the tank wagon consumer and one-fifth to the tank wagon reseller. That does not involve unit cost, of course, if you know your expense you would divide that by gallonage by unit cost, but I am simply talking about dividing the expense of that truck as between the two channels.

A. Well, I understand, but that is a new theory,
8033 now. That is not the one that was advocated by Mr.
Warmack as the Commission's witness.

Q. Well, I believe it is. Mr. Warmack simply assumed that the pay gallons, from his study of how pay gallons were awarded, assumed that the pay gallons represented the ratio of mileage as between the two channels rather than actual gallonage.

A. Well, the assumption is wrong. It is not in conformity with the facts because it is not just mileage that is reflected by the pay gallons.

Q. Yes, I understand, but just what is it?

A. There are four or five other things.

Now, if you are asking me whether if each agent submitted a record of the mileage that he drove in making deliveries, and let us assume that he pulls out of a yard with a full tank of gasoline, and that he makes a stop and delivers one hundred gallons to a reseller and then drives on down a certain route and unloads gradually among six or seven of his rural customers.

Now, I think this in that connection, that the witness for the Commission, Mr. Warmack, suggested we might enter the mileage on the sales tickets.

In the first place, he, the commission agent, owns the truck and he controls his activities pretty largely and they
just—well, you would have a very difficult problem,
8034 I am sure, if we attempted to get that type of in-
formation.

Secondly, it would require and mean recapping of the mileage of each of these tickets, and then it would be assuming that the indirect mileage followed the direct mileage. And there are just hundreds of thousands of sales tickets that come in, and I do not know, I just do not know, Mr. Austin, how you could handle such a thing.

Q. I am not urging it, Mr. Boatwirght. It goes back to the original question of whether or not the larger distances driven by the truck in the delivery, as I understand it, in making delivery to the tank wagon consumer, are not reflected largely by the pay gallonage which is, in turn, reflected by the amount of commissions paid. You have conceded that—

A. I—

Q. Have you not?

A. I have never once conceded that.

Q. You have conceded that the truck drives farther in making deliveries to tank wagon consumer customers than it does in making deliveries to tank wagon reseller?

A. I have conceded that the truck drives farther, but I have never conceded that the difference in the commissions is purely a mileage factor. I want that clear.

Q. Yes, I understand that. Well, is it your opinion that there is an actual basis there; that is, that either the actual gallons or the pay gallons is an accurate measur-
8035 ing factor in dividing the expense in account 025?

A. Well, I think the actual gallons would have to receive my vote there, Mr. Austin.

Q. I am not asking that.

A. They would have to receive my vote. That is my thought.

Q. Which is the better? I am asking you whether one is better than the other. I am not asking you whether either one is an accurate method.

A. Mr. Austin, again, when you speak of accurate, when you speak in terms of allocation, you are talking about all fields?

Q. Just which one of these methods approaches more closely to accuracy? First, does either one of those methods approach accuracy?

A. I think that the better of the two, as I started to say, would be the gallonage; that is just my opinion, based on this experience I have had.

Q. Is it your opinion that a different method of allocation should be used for the tank expense on those trucks from that for the truck rental expense?

A. No. I do not think so.

Q. Mr. Boatwright, just one more question on this subject.

A. Yes.

Q. Supposing a B-Station agent starts out in the morning with a full load of Red Crown gasoline in his truck,
8036 and he drives fifty miles making deilveries of that
gasoline to various consumers. Then he comes back and in the afternoon he takes another full load and delivers that full load to a tankwagon reseller station in the town where he is located which, we will say, requires him to drive a total of two miles.

In your opinion, should as much of the expense of his truck-rental and maintenance expense be charged to the truck load delivered to the consumers as to the truck load delivered to the tank wagon reseller station?

He has the same amount of gasoline in both cases. He drove fifty miles in one case. He drove the truck two miles to deliver the tank load in the second case.

A. If that were our truck, and our operating costs, I would very readily agree with you. But this is a flat, lump sum amount to an agent. He operates his own chassis, his own truck, and he directs and plans his activities. Now, if he prepared the form 189, then I think that probably mileage should be used. But we do not prepare and handle the cost statement on his truck. The only thing we do is that we pay him an overall compensation in the form of a commission for the various functions that he performs. Then we pay him a flat rental.

Now, there may be some situation where a B-Station agent may not have but one small reseller outlet to
8037 whom he delivers gasoline. There may be another
B-Station agent who will have a larger reseller outlet for his gasoline that he handles through his B-Station.

Another and different situation may exist in the case of a third B-Station agent.

I do not know. I believe and I think that it might be desirable if he maintained a cost record, probably, for him to establish some basis like that.

Q. I just asked what your opinion was.

A. Well, I will have to just tell you as far as your hypothetical situation is concerned, that I just do not think that your assumed condition is apt in determining what the company should do in the allocation of its costs.

Q. I assumed the condition.

A. Yes, and based on your assumed condition that you mentioned, then I will just tell you that I do not know.

Q. Do you not—

Mr. Hanley (Interposing): Just a moment.

On that hypothetical question, do you understand that the question, Mr. Boatwright, has the meaning that there should be a mileage allocation on the basis of two miles and on the basis of fifty miles for this particular account? Just what account or accounts is it?

Mr. Austin: 025 and 055.

Mr. Hanley: 025 and 055, on Respondent's regular 8038 accounting form 189.

Mr. Austin: The question speaks for itself. I would like to have the reporter read it.

Mr. Hanley: Well, from the statement it is not clear on what that assumption is based.

Trial Examiner Ballinger: Read the question.

(The reporter read the question as follows:

"Q. Supposing a B-Station agent starts out in the morning with a full load of Red Crown gasoline in his truck, and he drives fifty miles making deliveries of that gasoline to various consumers. Then he comes back and in the afternoon he takes another full load and delivers that full load to a tank wagon reseller station in the town where he is located which, we will say, requires him to drive a total of two miles.

"In your opinion, should as much of the expense of his truck-rental and maintenance expense be charged to the truck load delivered to the consumers as to truck load delivered to the tank wagon reseller station?

"He has the same amount of gasoline in both cases. He drove fifty miles in one case. He drove the truck two miles to deliver the tank load in the second case.")

The Witness: I would like to hear my answer read to that.

8039 (The reporter read the witness' answer.)

Mr. Hanley: I want to be sure that that is clear in this record.

Trial Examiner Ballinger: You have heard the question read. You have also heard your answer read. Do you care to amplify your answer?

The Witness: No.

By Mr. Austin:

Q. Does truck rental expense mean what it indicates, Mr. Boatwright? By that I mean this, does the Respondent rent these trucks from the commission agent?

A. Yes.

Q. Then, the truck being driven by the B-Station agent is the Respondent's truck, is it not, being operated by a B-Station agent as an employee?

A. It is a truck on a lease.

Q. Well, that is what I mean. The Respondent leases the trucks from the commission agents. Is that right?

A. Yes, sir.

Q. In this example that I put, the Respondent would be paying the commission agent a rental for it, I assume, it would be on a time basis?

A. It is on a monthly basis.

Q. So that there would be a certain amount of rental
time, being the time that it took the truck to make
8040 this delivery which consumes fifty miles to get rid of
one load of gasoline, and this amount of rental would
be chargeable to the amount of time it took him to deliver
the second tank of gasoline to the tank wagon reseller?

A. If we had the time factors, it would be. That is not the situation. It is a flat monthly rental.

Q. On page 7936 of the record, in which you were referring to commission agents, you referred to a twenty-two hundred gallon tank and indicated that your commission agents, as a rule, do not have tanks of that size Is that correct?

A. That is correct.

Q. What is the size of the tanks used by B-Station agents in the Detroit field, if you can give any range or reasonably definite answer to that question?

A. Yes. I can give you the range. I think most of them in the Detroit field would be between five hundred gallons and seven hundred gallons. However, there may be a few that are as small as four hundred gallons. There may be a few that are as high as one thousand.

But the seven hundred gallon capacity would probably be nearer to the major group.

Q. Mr. Boatwright, how are bad debts written off and accounted for by the Respondent in its general office for the entire company?

A. I would have to look up as to how that is handled.

8041 Q. Do you set up a reserve for bad debts in the general offices of the company?

A. On the general books?

Q. Yes.

A. I think we do.

Q. Is it not true that your company charges bad debts written off against reserve and credits to your reserve any collections made of bad debts previously written off?

A. Speaking of the general office, I do not know our general office books like I know our market expense system. And we are going far afield here on general books. I would have to go into our code of accounts for that, in other words, I would have to go into another code of accounts and look into all of those things because we have discussed this at no time in this hearing prior to today, either at Detroit or any place here prior to this moment.

Q. We have discussed the bad debts situation, and as I understand it, it is handled entirely differently on the general books of accounts from what it is in the field.

A. I will just have to answer your question that I do not know the general books of the company.

Q. You made one other statement that I wish to refer to, Mr. Boatwright, and I cannot give you the exact page in the record at the moment. But in your testimony yesterday, I believe you said that one of your annuity 8042 funds was handled, or that annuity applies only to employees who are participants in the plan, and not to all employees.

Then you were referring to the trust fund which was contributed to through an item of expense of one hundred and eight thousand dollars plus, as we have referred to so many times in connection with account 520.

Is that what you were referring to in that testimony?

A. Yes.

Q. Will you explain what you meant when you said that the benefits of this plan were participated in only by employees who had—if I understood you correctly—had made some voluntary contribution to that?

A. Yes. Those who are participants in the plan. There is a part of account 520 which represents payments that the company makes matching payments that the employees make. Therefore, I certainly think that if I wish to participate in the plan, I have to have the company deduct from my check periodically payments as the case may be.

Q. Is that optional with the employees whether they participate or not in the plan?

A. It is.

Q. Is that true prior to 1939?

A. Prior to 1939 there was no annuity contribution on the part of the employees of the company at all.

8043 Q. Do you mean this became effective after that?

A. Yes.

Q. How about this trust fund set up with the Chase National Bank for the payment of annuities for periods of service prior to January 1, 1939?

A. That trust fund is available and will constitute payment of annuities of those who are currently participants in the plan.

Q. But were all employees who were in the employ of the company prior to January 1, 1939, participants?

A. A very high ratio. There may be exceptions. I do not know.

Q. In understood you to state just now that there was no contribution of salaries prior to January 1, 1939. What I am trying to understand here is whether all employees participated or why all employees would not have participated in that plan and be present participants if they did not have to make any contributions prior to January 1, 1939?

A. Prior to 1939, they would have been participants in the fund, in the then effective annuity plan of the company. The plan was changed in 1939 and based on an actuarial and insurance basis. Now, the building of this reserve is to take care of the services of those employees who are participants in the plan for such time periods as they have been in the employ of the company prior to January, 1939.

8044 Q. Well, is the participation of the particular employee in the trust fund dependent upon or affected by his participation in the insurance plan?

A. That is my understanding.

Q. But the deductions from his salary go entirely into the insurance fund, do they not?

A. Why, certainly, the deductions from his salary for insurance premiums go in the insurance fund and the annuity fund.

Q. There are no deductions from salary which go into the irrevocable trust for the time prior to 1939?

A. No. That is true. But there are deductions made from employees' salaries which go to defray the insurance premium.

Q. What I am trying to find out is whether all employees who were in the service of the company prior to

January 1, 1939, and were subject to the plan then in effect are now participants in the benefits of the trust fund which represents the one hundred and eight thousand dollar item—

A. (Interposing.) When they—

Q. —regardless of whether or not they voluntarily participate in the insurance fund in their deductions from their salaries to that fund?

A. Well, Mr. Austin, I have answered that to the best of my ability. I said it was my understanding that the participation in the present plan is a prerequisite to a future participation in the annuities which will be
8045 paid out of the current contributions plus the reserve that is being built.

Q. Well, I am sorry, but when you refer to current contributions, please, Mr. Boatwright, as I recall it, this fund that is being built, are you referring now to the insurance fund, the twenty-six thousand dollar item, or are you referring also to the one hundred and eight thousand dollar item?

A. I am assuming that participiction in the twenty-six thousand dollars is a prerequisite to future participation in the one hundred and eight thousand dollars, to the best of my understanding. In other words, the company is willing that if I decide that I do not want to take my insurance through this plan, that they have made available, I can authorize them to discontinue any subtractions from my pay check, and they would so do, but by that action I forego my anticipated annuities at the age of sixty-five if I were to stay with the company until that time, as far as this plan is concerned.

Q. Even though they had been with the company for several years? Even as to that period of service prior to January 1, 1939, I mean?

A. That is my understanding.

Trial Examiner Ballinger: Would not the employee who had been retired prior to 1939 receive a part of his retire pay out of the contributions made by the company in
8046 1940 to the fund?

The Witness: No. The payment of the annuity to the individual retired prior to 1939, on that he receives his annuity out of this amount which we have designated as twenty-two thousand dollars plus. In other words, these men have fulfilled the contractual part of their employment with the company except for agreeing to certain things when they go upon the annuity. They will continue to be paid by the company during the remaining lives of those employees. But this does not come out of either the twenty-six thousand dollars or the one hundred and eight thousand dollars.

Trial Examiner Ballinger: Frequently throughout your testimony you have referred to "pay gallonage," allowed commission salesmen.

Will you please explain just what that is?

The Witness: Yes, sir. "Pay gallonage" bears a constant rate in terms of cents per pay gallon. The various weightings given by it, one through five is merely a process whereby we weight the different actual gallons according to the pay gallons allowances which results in a different payment per actual gallon according to the point of delivery, or customer, or selling effort, or realization. All these factors go into the making up of the total weighting significance of each sale.

Trial Examiner Ballinger: Now, I believe you referred to five pay gallons being allowed a salesman
8047 for a sale to a farmer.

The Witness: Yes, sir.

Trial Examiner Ballinger: All right. Now, what does that five pay gallons mean?

The Witness: Well, let us assume that these five pay gallons' delivery that we are referring to was made by a commission agent who received four-tenths of a cent per pay gallon, that would mean that for each gallon which he delivered to that farmer, that the employee would receive five times four-tenths of a cent, or a total of two cents. It is merely a weighting factor which is applied by the company.

By Mr. Austin:

Q. Is that weighting factor used in determining the amount of commissions the B-Station agent receives from the Respondent?

A. Yes.

Mr. Hanley: Does that mean that the amount of his commission may be determined by the amount of pay gallons that he has earned?

The Witness: I do not think that either question is clear to me. Can you restate the question, Mr. Austin?

By Mr. Austin:

Q. Is not the commission which the B-Station agent receives the result of multiplying the number of pay gallons that he sells by his commission rate?

8048 A. His base rate?

Q. Yes.

A. Yes, sir. That is correct.

Q. If he sells a gallon of gasoline to a farmer, he is credited with five pay gallons?

A. Yes, sir.

Q. If he sells a gallon of gasoline to a reseller station in the town where he is located, he is credited with one and a half pay gallons?

A. Yes, sir.

Q. Then, in determining the amount of commission that he receives, is it not true that the company simply multiplies the number of pay gallons of each product by the commission rate for that product?

A. The commission rate per pay gallon is uniform for all products. In other words, one pay gallon resulting from the sale of heating oil carries exactly the same weight as one pay gallon resulting from the sale of gasoline.

Q. I did not know that.

A. So that it is actually the same, and it accumulates the same total of pay gallons for each product, to the extent that it pays the base rate per gallon; that is, per pay gallon.

Q. The charge to sales channels; that is, tank wagon reseller, tank wagon consumer, and other methods is a
direct charge, is it not, Mr. Boatwright, based upon
8049 the report of the B-Station agent himself as to the
product which he sold and the customer whom he
sold?

A. You are speaking now of the 021—commissions? That account?

Q. Yes.

A. That is correct.

Trial Examiner Ballinger: Prior to the granting of the differential to Ned's and to the other three jobbers in Detroit area, did the Respondent company make any survey, study, or investigation to determine whether the differentials to be granted fairly represented the difference in the cost of marketing gasoline to the jobbers and to the reseller outlets?

The Witness: Well, these differentials, to the best of my knowledge, your Honor, have been effective for quite an extended period of time with all of the accounts except Ned's. I think Ned's, when they were converted from tank wagon to the jobber channel, were extended the prevailing differential in that community that was already in existence to the other three jobber customers.

Trial Examiner Ballinger: My recollection of the testimony is that these differentials arose since 1935 or 1936. Is that correct?

Mr. Hanley: No, I think the differential accorded
8050 the jobber accounts has been substantially the same
ever since they became accounts of the Respondent company. Some of them—I may be wrong about these dates, Judge,—but it just runs in my mind that some of these people have been dealing since back in the 1920's.

Mr. Austin: If your Honor please, at this time I move to strike from the record Respondent's Exhibit 33-A, 33-B, 33-C, 33-D, and 33-E for all of the reasons stated at pages 4676 through 4683 of the record, and for additional reasons which I will state in a moment.

The reason for renewing this motion is that those exhibits were the first attempt at cost justification for the years 1940 and 1939, which the Respondent put in the record. And your Honor will recall that the last three or four pages of that exhibit referred to the so-called Oklahoma survey.

That exhibit for all intents and purposes, I submit, has been superseded by exhibits 99, 100, and 101 of the Respondent. I believe it may be fairly considered as abandoned, but whether the Respondent abandons it or not, it seems to me that that exhibit is no longer the best evidence of the Respondent's cost in the Detroit field, since the Respondent has since then; that is, since that exhibit was introduced in evidence, made a cost study which is reflected by Respondent's Exhibit 101.

Therefore, I believe that all of the reasons which
8051 I cited at pages 4676 to 4683 of the record are more
pertinent now than even they were then and should be reconsidered in connection with the fact that the Respondent is now relying on its Exhibits 99, 100, and 101 as set forth in this record, as setting forth its comparison of costs in the Detroit area, between tank wagon reseller on the one hand, and the jobber situation on the other hand.

I do not believe that this Exhibit 33 can fairly be said to be of any corroborative value so far as Respondent's Exhibit 101 is concerned because it shows higher costs in Oklahoma than the Respondent now claims for its justification in Detroit.

I do not have any further argument on it, but I do believe that this exhibit should be stricken from the record, and we should be relieved of any further concern with it.

Trial Examiner Ballinger: That motion runs to the three exhibits, does it?

Mr. Austin: No. It just runs to Exhibit 33-A, 33-B, 33-C, 33-D, 33-E. There were five pages of the one exhibit.

Trial Examiner Ballinger: I will hear from counsel for the Respondent.

Mr. Hanley: That motion is, of course, resisted by the
Respondent for the very same reasons that it was
8052 resisted when it was made originally.

There is no abandonment of that or any other evidence put in this record by the Respondent.

It is not regarded as superseded by the so-called Detroit cost study, but, on the contrary, it is regarded that the Detroit cost study supplements and corroborates the first testimony that this Respondent put in in justification of these costs.

Simply because the attorney for the Commission does not like it, or does not want to be bothered with it, or thinks that the Detroit study is better, maybe, may go to the question of the weight which it has, but it does not go to the competency of this testimony in this record.

Mr. Austin: If your Honor please, I request that before your Honor passes on that motion that you do re-read the reasons stated at length on the pages of the record just referred to, namely, 4676 to 4683, and with this end in view that many of those reasons, while at the time given were perhaps argumentative in not being supported by facts in the record, I believe now your Honor will find that many of those arguments in support of the motion to strike have since been supported by the actual facts put in the record in the testimony regarding the Detroit costs.

And I believe that while I thought at the time and still
think those arguments were sufficient, I believe that
8053 they should have more weight because I believe that
they have been supported additionally by testimony
put in the record since that argument was set forth.

Therefore, I think the argument now should be re-read in connection with this motion.

Trial Examiner Ballinger: If the Exhibit should be stricken, should not all of the testimony relating to the Exhibit be stricken?

Mr. Hanley: No.

Mr. Austin: Well, I do not think that that follows because a great deal of the testimony which came in under that exhibit was testimony regarding the accounting procedures and methods of operation of the company, and therefore, was not repeated, and it was not necessary therefore to repeat them in connection with the late Detroit cost study.

But of course it would be entirely possible to pick out portions of the testimony relating strictly to the Oklahoma territory which no doubt should be stricken if the Exhibit is stricken.

But I do not think it would be worth while to go over the record to try to pick out those bits of the testimony piecemeal.

Trial Examiner Ballinger: The Examiner is quite familiar with the past motion made by counsel to strike, and the reasons which actuated the Examiner at that time
8054 in denying the motion.

The Examiner is still of the same opinion, while in view of the subsequent exhibits offered by the Respondent, the exhibit referred to in the motion may have been reduced in importance, it still may have some evidentiary value, and that is for the Commission and not for the Examiner to determine.

The motion is denied.

Mr. Austin: The Commission rests.

Mr. Hanley: I have just one question, if your Honor please, that was suggested by a statement made off the record by your Honor.

Trial Examiner Ballinger: Proceed.

Redirect Examination by Mr. Hanley.

Q. Mr. Boatwright, did you and your staff give consideration to the advisability or feasibility of differentiating in cost to the Respondent of selling and marketing premium gasoline and third grade gasoline, and pulling out or attempting to separate costs on those two grades of gasoline, and distinguishing them from each other and from Red Crown?

A. It was considered.

Q. Just go ahead and state what your conclusions were, and what you found the facts to be in so far as you analyzed the facts.

8055 A. Well, consideration was given to that problem, but inasmuch as all of our costs on gasoline are set up on gasoline as a class, and not by brand, it would have been an extremely difficult, if not impossible thing, to allocate our costs according to the brand of gasoline.

The next thing that I did was to weight the differential which was allowed jobbers of one and three-quarters cents on Ethyl, one and one half cents on Red Crown, and one cent on Stanoline for the third grade, to ascertain whether in the aggregate the three grades of gasoline approach one and a half cent differential on Red Crown, which they do.

The percentages were applied to the differentials of the three grades which resulted in an average differential on the three grades of gasoline which was found to be a plus or minus of one-hundredth or two-hundredths of a cent and a half.

I do not recall the exact figures, but it was almost a cent and a half.

Q. I believe the exhibits are quite clear on it, but just to button this thing down: It is true that the gallonage involved in both the reseller channel and in the jobber channel on Respondent's Exhibit 101 of the Respondent company is overwhelmingly Red Crown gallonage?

A. Yes, sir.

8056 Mr. Hanley: Do you have any further questions on that?

Mr. Austin: No.

Mr. Hanley: That is all I have for the witness.

Mr. Austin: I have nothing further for the witness.

Trial Examiner Ballinger: You are excused.

(Witness excused.)

Mr. Hanley: Do you now rest?

Mr. Austin: I now rest.

Mr. Hanley: Respondent rests.

Both sides having rested, Respondent renews all of its motions to dismiss this action in whole and in part, from time to time;

And renews all of its objections and motions to strike testimony received over the objection of the Respondent for all of the reasons then assigned for such objections or motions, or both.

Trial Examiner Ballinger: The Examiner has no jurisdiction over the first portion of the motion which should be addressed to the Commission, namely, to dismiss the proceedings;

As to the remaining portions of the motion, they are denied.

The taking of testimony and receipt of evidence is 8057 concluded.

The record, however, will not be formally closed until opportunity is afforded counsel to submit to the Examiner any suggested corrections in the typewritten transcript they may deem important.

The Examiner requests respective counsel to furnish him at the earliest practicable date a statement in writing setting forth in concise outline their contentions as to the evidence relating to each question put in issue by the pleadings.

And now, at 2:40 p. m., August 4, 1942, the hearing is adjourned.

(Whereupon, at 2:40 p. m., August 4, 1942, the hearing in the above-entitled matter was adjourned.)

8058 UNITED STATES OF AMERICA.

Before Federal Trade Commission.

In the Matter of
Standard Oil Company. } Docket No. 4389

ORDER CLOSING TAKING OF TESTIMONY.

The taking of testimony and receipt of evidence in the above entitled proceeding having been concluded, all motions filed with the Federal Trade Commission having been acted upon, and the time allowed respective counsel by the Federal Trade Commission in which to file with the Examiner statements of facts deemed to have been proven, having expired; it is by the Examiner this 23rd day of April, 1943,

Ordered, that the record for the receipt of testimony and other evidence in the above entitled proceeding be, and the same is hereby closed as of this date.

Webster Ballinger,
Trial Examiner.

575 IN THE UNITED STATES CIRCUIT COURT OF APPEALS.

STIPULATION FOR PRINTING DESCRIPTIVE LIST OF EXHIBITS.

Subject to the approval of the Court, it is hereby stipulated and agreed by and between the undersigned counsel for Petitioner Standard Oil Company and for Respondent Federal Trade Commission that for the convenience of all concerned a descriptive list of all exhibits received in evidence before the Commission shall be printed immediately preceding the particular exhibits which have been designated for printing by the respective parties. The printing of such list, however, and of any incidental interpretation in the descriptions contained therein shall be without prejudice to the right of either party to interpret the exhibits in brief or argument otherwise than as interpreted in said list. Subject to such limitation and for purposes of reference only the following descriptive list is to be printed:

Com. Ex. No. Date Witness	Description
1-A to D 3-10-41 Raupagh	Photostatic copy of Standard Oil Lease Form 342, dated June 28, 1939, with Charles Dameron for service station owned by the company, being a two-page printed lease with a two-page rider attached containing inventory of all equipment, each page of the lease and schedule being alphabetically designated in the 1 series.
2 3-10-41 Raupagh	Photostatic copy of Standard Oil Form 461, being a Dealer's Agreement for gasoline between the company and Joseph Leerhuber dated August 31, 1938.
3-A and B 3-10-41 Raupagh	Being statements of the dealer tank wagon prices, the jobber tank car prices and the prevailing retail service station prices in effect from January 1, 1937 to March 6, 1941, in cents per gallon, exclusive of taxes, for Standard Red Crown (3-a) and the same information for Solite with Ethyl (3-B).

Com. Ex. No. Date Witness	Description
4 3-10-41 Raupagh	Statement of posted retail prices on Red Crown and Solite with Ethyl at retail service stations directly operated by the Stikeman Oil Co. from January 1, 1937 to February 14, 1938.
576	
5-A to 5-J 3-10-41 Raupagh	Prepaid freight bill and bills of lading of Elgin, Joliet and Eastern Railway Co.
6 3-10-41 Raupagh	Michigan gasoline tax data compiled and distributed in printed form by the Gasoline Tax Division of the Department of State for April, 1937, showing the total number of gallons of gasoline reported by each licensed wholesale distributor and deductions claimed by each for sales to other registered distributors and deductions to cover evaporation and losses, exempt sales to the Government and refund on gas not used for motor vehicles on the highway for each of the months, January to April, 1937, inclusive.
7 to 17, incl. 3-10-41 Raupagh	These are, respectively, reports similar to Ex. 6 for each four-month period commencing August, 1937, and including November, 1940.
18 3-10-41 Raupagh	Standard Oil printed Form No. 342, being photostatic copy of lease between the Company and Lester Goldberg, dated September 26, 1939, including a rider dated November 23, 1940.
19 3-10-41 Raupagh	Photostatic copy of Form 342 Lease between Standard Oil and Marvin Goldberg, dated December 6, 1939, with a rider dated November 23, 1940.
21 3-11-41 Raupagh	Sample copy of Standard Oil Company National Credit Identification Card.
22 3-11-41 Gershenson	Showing Ned's posted prices on Standard Red Crown for various periods from September, 1936, to November 24, 1939.
25 3-11-41 Gershenson	Sample of Ned's savings stamps and statement.

Com. Ex. No. Date Witness	Description
26 3-11-41 Gershenson	Picture of Ned's station at Grand River and Chicago showing posted ad. Statement on back of photo shows the same was taken September 6, 1939.
27 3-11-41 Gershenson	Printed envelope container of Ned's Auto Supply Company for gasoline saving stamps, with instructions printed thereon.
29 3-11-41 Gershenson	Mimeographed letter addressed to dealers under date of August 6, 1937, under signatures of James J. Bright & Son, Firestone, Ned's and Stark Hickey.
30 3-11-41 Gershenson	Newspaper ad of the four dealers signing the letter (Ex. 29).
31 3-11-41 Gershenson	Receipt of Ned's Auto Supply Company dated May 9, indicating 2 oz. Pyroil free.
32-A to C 3-11-41 Biber 577	3-page statement showing retail prices at stations operated by Citrin-Kolb Company, exclusive of 3¢ tax, during various periods.
33-A and B 3-11-41 Biber	2-page letter from Citrin-Kolb Company to Mr. Austin of FTC, dated March 8, 1941, furnishing information requested in a subpoena relative to prices charged for Red Crown to certain designated dealers during the period from 1-1-38 to 12-31-40.
34 3-11-41 Biber	Card issued by Citrin-Kolb at Jefferson and Nottingham station.
35 3-11-41 Biber	Same card for station at Linwood and D.T.R.R.
36 3-11-41 Biber	Same type of card for station at 8620 Linwood, Jack Katz, Manager.
38 3-17-41 Ferguson	Special discount card issued by Station at 9705 Dexter and Chicago Boulevard—Maurey Scholnick.

Com. Ex. No. Date Witness	Description
40 3-12-41 Biber	Invoice of Citrin-Kolb dated August 3, 1940, for sale of gasoline to Fisher and Suskin.
41 3-12-41 Biber	Invoice dated August 31, 1940, same parties and same type of transaction as Ex. 40.
42 3-12-41 Biber	Citrin-Kolb invoice dated August 6, 1940, for sale of Red Crown and Ethyl to Dexter Cortland.
43 3-12-41 Biber	Invoice August 16, 1940, to same person and showing same type of transaction as Ex. 42.
44 3-12-41 Biber	Invoice dated August 1, 1940, to Hy. Chateen showing same type of transaction as Ex. 42.
45 3-12-41 Biber	Invoice dated August 2, 1940, to same party and same type of transaction as Ex. 44.
46 3-12-41 Biber	Invoice dated August 3, 1940, to Ed. Clark showing sale of Red Crown.
47 3-12-41 Biber	Invoice dated August 13, 1940, to same party showing same type of transaction as Ex. 46.
48 3-12-41 Biber	Invoice dated August 1, 1940, to B & B Auto Supply showing sale of Red Crown at posted price.
49 3-12-41 Biber	Citrin-Kolb invoice dated August 3, 1940, to B & B showing sale of Red Crown and Ethyl at posted prices.
50 3-12-41 Chandler	Gasoline savings container envelope issued by Ned's Auto Supply Co.
578	
51 3-12-41 Chandler	Receipt from Ned's for purchase of gas Oct. 18 with 12¢ saving stamp attached.

Com. Ex. No. Date Witness	Description
52-A to F 3-12-41 Chandler	Six separate receipts from Ned's for purchases of gasoline.
54 3-12-41 Ledbetter	Statement of Wayne Oil Co. covering retail service station price on Red Crown and Ethyl at all stations directly operated by Wayne from September 8, 1939 to December 31, 1940.
55 3-13-41 Leake	Monthly gasoline sales for the years 1937 to 1940, inclusive.
56 3-13-41 Martoglio	Similar statement to Ex. 55 for Chet's Service Station at Collingwood and Hamilton.
57 3-13-41 Hawley	Same information for Hawley's Super Service at Grand River and Warwick.
58 3-13-41 Ruehle	Same type of information as previous exhibits showing monthly station gallonage.
59 3-13-41 Tanski	Monthly gallonage figures at witness' station.
60-A and B 3-14-41 Tapert	2-page statement containing monthly gallonage volume similar to preceding exhibits.
61 3-14-41 Ward	Monthly gallonage for station at Fourth and Warren similar to other exhibits.
63-A and B 3-17-41 Lefstad	Exhibit A shows daily sales during July and August, 1938, at Harold's Super Service, 13100 Livernois, and B shows monthly gallonage from October, 1936, through December, 1940.
64 3-17-41 Ferguson	Monthly gallonage of station from June, 1936, to May, 1940.
66 3-18-41	Invoice dated 3-31-39 showing shipment by rail to Wayne Oil Company at Dearborn, f.o.b. destination, one tank car shipment.

Com. Ex. No. Date Witness	Description
67 3-18-41	Invoice dated 3-25-38 to Merchants Supply Co., Detroit (Ned's) showing shipment of four tank cars of Red Crown, f.o.b. destination.
68 3-18-41	Invoice dated 3-28-38 showing shipment to Wayne Oil Company at Dearborn, f.o.b. destination, one tank car of Red Crown.
579	
69 3-18-41	Invoice dated 7-22-38 showing shipments of three tank cars Red Crown to Ned's at Michigan Terminal Warehouse, Brandt and Wyoming, f.o.b. destination.
70 3-18-41	Invoice dated 12-19-38, Wayne Oil Co., showing shipment to Brandt and Wyoming, f.o.b. destination, one tank car Red Crown.
71 3-18-41	Invoice dated 4-7-38 to Merchants Supply Co. (Ned's) to Michigan Terminal Warehouse, Brandt and Wyoming, f.o.b. destination, one tank car Ethyl.
72 3-18-41	Invoice dated 8-3-38 to Wayne Oil Co., destination c/o Allegheny Oil Co., Michigan Terminal Warehouse, Brandt and Wyoming, f.o.b. destination, one tank car Ethyl.
73 3-18-41	Invoice dated 12-19-38 to Stikeman Oil Co., f.o.b. destination, one tank car Ethyl.
74 3-18-41	Invoice dated 4-14-39 to Stikeman Oil Co., Detroit, f.o.b. destination, one tank car Ethyl.
75-A, B and C 4-8-41 Taggart	Original and duplicate of blank marketing cost survey form, and instructions for filling out the same, used by Professor Taggart in obtaining information for his survey on the cost of retailing gasoline in the vicinity of Detroit as of May, 1938, together with envelope addressed to Mr. Taggart in which to enclose said form when filled out.
76 4-9-41 Taggart	25-page mimeographed survey on gasoline retailing costs in Wayne County, Michigan, by Herbert F. Taggart, containing explanation of the survey, mechanics, coverage and numerous tables and charts.

Com. Ex. No. Date Witness	Description
77 4-9-41	Being a reprint from Michigan Business Studies, Vol. VIII, No. 3, containing a 182-page printed article by Herbert F. Taggart entitled "The Cost Principle in Minimum Price Regulation."
78-A to E 6-16-41	Being a 5-page statement entitled "Miscellaneous Expenses for 1940" and listing for each month therein the items making up such miscellaneous expenses of Citrin-Kolb Oil Company.
80 5-[illegible]41 Raupagh	Standard Oil Company Form No. 385 Equipment Loan Agreement of the Sales Department, in blank.
81 6-17-41 Boatwright	Breakdown of Account 1066 "Miscellaneous Operating Expense" of Standard Oil submitted in Respondent's Ex. 31-H.
82-A 6-18-41 Boatwright	Breakdown of Account 1004 "Salary Salesmen, Detroit Field—June 1937" and explanation of method.
82-B 6-18-41 Boatwright	Breakdown of Subaccount 7004 being salary expense, salaries of salesmen for June 1937 in the Detroit field.
580	
83 6-26-41 Boatwright	Statement of Standard Oil showing distribution of time—salesmen—method—class of product, showing hours and percentages of various types of salesmen and allocation between tank wagon reseller, tank wagon consumer, other methods, and as to the various products.
84-A to C 6-18-41 Boatwright	3-page statement on breakdown of Account 1075, advertising for the year 1937, with explanatory material as to allocation of various types of advertising costs to the various products and channels.
85 6-19-41 Boatwright	Printer's proof of Standard Oil Company newspaper advertisement.

Com. Ex. No. Date Witness	Description
86-A to R 6-20-41 Boatwright	List of all Standard Oil reseller accounts in the Detroit field for the year 1937, showing name and address of dealer and total gallonage for the year 1937, consisting of 18 pages of listings designated alphabetically in the 86 series.
87 6-23-41 Boatwright	Statement showing total gallonage for the year 1940 to tank wagon resellers, to tank wagon consumers, to the four jobbers, and all other methods; also showing sales of motor oils and grease to the four jobbers for 1940.
88 6-26-41 Boatwright	Statement showing distribution of time of the various kinds of salesmen as to method and class of products for June 1940 (same form as Commission Ex. 83, which was for the month of March 1941).
89 6-26-41 Boatwright	Same information as Ex. 88, except it shows this information for the month of September 1940.
90 6-26-41 Boatwright	Same information as Ex. 88, except this is for the month of December 1940.
91 6-27-41 Boatwright	Statement of Standard Oil types of reseller service station accounts in Detroit metropolitan area for 1937.
92-A to D 6-27-41 Boatwright	4-page photostatic copy of contract between Standard Oil Company and L. A. Smith & Co., dated May 20, 1939, for transportation from the Company's tank farms at River Rouge and Muskegon, Michigan, to its bulk storage plants.
93-A 6-27-41 Boatwright	Rider No. 2 to contract, Ex. 92, dated January 16, 1940, modifying rates in contract.
93-B to F 6-27-41 Boatwright	Photostatic copy of 4-page contract and one-page rider between Standard Oil and L. A. Smith & Co., dated November 22, 1939, superseding previous contract, providing new schedule of rates per gallon.

Com. Ex. No. Date Witness	Description
100 2-16-42 Boatwright	Statement of gasoline gallonage sold to each of the four Detroit jobbers for the years 1937 to 1940, inclusive, as to each of the three Standard grades of gas.
581	
102 2-16-42 Boatwright	Standard Oil statement of distribution of time of salesmen, same form as Ex. 88, and following, except that it is for the month of December, 1939.
103 2-16-42 Boatwright	Same as Ex. 102, except for the month of March, 1940.
104-A to C 2-17-42 Boatwright	Copy of letter from Commission's Attorney Austin to Mr. Hanley of Standard Oil Co., dated January 24, 1942, requesting production of additional documents, information and accounting breakdowns at the hearing scheduled for February 16, the same being a 3-page letter.
105 2-17-42 Boatwright	Additional letter from Mr. Austin to Mr. Hanley dated January 27, 1942, making certain of the requests in the letter, Ex. 104, more specific.
106 2-17-42 Boatwright	Standard Oil Co. mimeographed form, in blank for ascertaining distribution of time by method of delivery form designated D-106.
107 2-18-42 Boatwright	Eleven-page printed pamphlet of Standard Oil Co. entitled "Employees' Death Benefit Plan," revised September 17, 1928.
108 2-23-42 Boatwright	Standard Oil Co. 28-page printed pamphlet covering its retirement plan for employees, revised as of September 1, 1939.
109-A 2-19-42 Blough	Map of Detroit and environs with locations of stations indicated in red in sales district designated as No. 65, which territory includes Ned's and was assigned to the salesmen Robinson, Meulanberg and Coutchie.
109-B 2-19-42 Blough	Statement of account numbers, name of dealer and address, in territory covered by the aforesaid three salesmen, in District 65, Detroit, 1937.

Com. Ex. No. Date Witness	Description
110 2-19-42 Blough	Organization chart of Sales Department, Detroit field, October 23, 1941.
111 2-19-42 Blough	Organization chart of the Accounting Department, Detroit office.
112-A to D 2-20-42 Fineberg	Photostatic copy of 3-page contract, and 1-page rider, between the Ohio Oil Company and the Argo Oil Corp., for the period from March 1, 1940 to March 1, 1941, for the purchase of Marathon gasoline by the Argo Oil.
116 2-23-42 Boatwright	Breakdown of expenses, "Salaries and Commissions", in Detroit field for the year 1940 as between tank wagon, reseller, tank wagon consumer, and other methods.
117-A to D 2-23-42 Boatwright	Separate statement of Standard Oil Sales Department on "Distribution of Time Accounting—Method" in the Detroit field for the months of December, 1939; March, 1940; June 1940 and September, 1940.
582	
119 2-23-42 Boatwright	Standard Oil Company Form G. O. 189 "Comparative Statement of Expense" filled out for the year 1940.
120 2-23-42 Boatwright	Recapitulation of tank wagon reseller volume delivered by commissioned agents and drivers, Detroit field, 1940.
121-A to G 2-24-42 Boatwright	Consisting of printer's proof on 7 newspaper advertisements of Standard Oil Company with reference to Standard Oil dealers.
122-A to D 2-24-42 Boatwright	Photostatic copies of four N. Y. Central Railroad collection bills showing switching charges on tank car shipments, respectively, to Ned's, Citrin-Kolb, Stikeman Oil and Wayne Oil.
123 2-24-42 Boatwright	Map showing marketing costs at various locations for 1939 and 1940 in the tank wagon reseller channel (including income and expense on leased service stations).

Com. Ex. No. Date Witness	Description
124 2-26-42	Invoice of Ogden and Moffett to Standard Oil, dated July 16, 1940, for hauling charges to the 4 jobbers for the period from July 1 to July 15.
125 2-26-42	Same as Ex. 124, except it covers billing dated August 16, 1940, and includes some shipments in addition to the 4 jobbers.
126 2-26-42	Same as Ex. 124, except invoice dated October 4, 1940.
127 2-26-42	Same as Ex. 124, except invoice dated November 5, 1940.
128-A to B 6-30-42	Two-page letter from Mr. Haniey of Standard Oil to Mr. Austin of the Commission, dated March 18, 1942, clarifying the information in Commission's Exhibits 91 and 98 as to the number of outlets served by Standard Oil Company and the four jobbers in December, 1937, and December, 1940.
129 7-1-42 Warmack	Calculation of average salesman's cost per gallon of gasoline sold to Standard Oil stations in Detroit other than Ned's and served by same salesmen as called on Ned's stations during 1937.
130 7-2-42 Warmack	Statement showing analysis of charges to marketing expense account of losses by dismantling (other than E.L.A.) for the Detroit field for the year 1940.
131-A to C 7-4-42 Warmack	Three-page statement showing the methods of allocating salesmen's salaries and expenses.
132 7-8-42 Warmack	Tabulation of credit card expense (including coupon book expense) in Detroit field for 1940.
133 7-14-42 Warmack	Re-listing of a large number of accounts taken from Respondent's Ex. 101, purporting to show average unit or gallonage cost on all of such accounts for the tank wagon reseller channel and for the jobber channel.

Com. Ex. No. Date Witness	Description
3 4-29-41 Boatwright	Graph showing automobile production, seasonably adjusted for the years 1936 to 1941.
5 4-29-41 Boatwright	Graph showing total gasoline consumption in the State of Michigan for the years 1933 to 1940, inclusive.
6 4-21-41 Biber	Operating set-up of Citrin-Kolb Company as of 12-31-40 showing by addresses stations owned and operated—owned and leased—leased and operated—leased and subleased—dealer contracts.
7 5-5-41 Biber	Schedule of costs per gallon to Citrin-Kolb to distribute gasoline at wholesale for the years 1937-1940, inclusive.
8 5-5-41 Biber	Actual operating costs of Citrin-Kolb for distributing gas at wholesale for 1937 to 1940, inclusive, being a breakdown of costs such as advertising, discounts, insurance, etc. (a total of 15 items).
9 5-5-41 Biber	Schedule of overhead costs chargeable by Citrin-Kolb for distribution at wholesale of gasoline from 1937 to 1940, incl.
10 5-5-41 Biber	Being a further breakdown and explanation of the item "Depreciation Real Estate" appearing in Exhibit 9.
11 5-5-41 Biber	Being a further explanation and breakdown of the item "Depreciation Equipment" shown on Exhibit 9.
12 5-5-41 Biber	Being explanation and breakdown of item "Obsolescence" appearing on Exhibit 9.
13 5-5-41 Biber	Being explanation and breakdown of item "Interest on Cash Capital Invested," appearing in Exhibit 9.
14 5-5-41 Biber	Being explanation and further breakdown of item "Interest on Personal Property Invested" appearing in Exhibit 9.

Com. Ex. No. Date Witness	Description
15 5-5-41 Biber	Being explanation of further breakdown of item "Interest on Real Estate Invested" appearing in Exhibit 9.
16 4-21-41 Biber	Computation of gasoline sold from 1936 to 1940, inclusive, by Citrin-Kolb at retail and wholesale and percentages of each.
17 4-21-41 Biber	Schedule of gallonage of gasoline per pump and per station as distributed by the outlets of Citrin-Kolb for the years 1936 to 1940, inclusive, showing number of stations each year, total gallonage, rate per station, number of pumps and average per pump.
584	
18-I 5-1-41 Biber	Photostat of "Special Consideration" card given out by Hoffman & Levine (Texaco dealer) in 1936.
18-J 5-2-41 Biber	Receipt for purchases from Hoffman & Levine on 9-8-36 showing purchase under prevailing retail price.
18-K 5-2-41 Biber	Picture of station with Texaco pumps, at Davidson and Conant, showing gasoline price advertised 5-17-38.

53 5-6-41 Raupagh	Chart showing total gasoline sales volume in gallons and ratio of retail and wholesale sales to total sales of each of the four Standard Oil jobbers for the years 1936 to 1940, inclusive.
54 5-6-41 Raupagh	Chart showing volume of gasoline in gallons of the four Standard Oil Jobbers for the years 1936 to 1940 with number of retail outlets supplied by each.
55-A and B 5-6-41 Raupagh	Gasoline sales in the Detroit area of wholesale licensed jobbers and distributors of branded gasoline, being a 2-page statement for the years 1936 to 1940, inclusive, showing the name of the jobber, when he received his wholesale distributor license, his supplier and his gallonage for each of said years.
56 5-6-41 Raupagh	Standard Oil Company Michigan Road Map showing the extent of the Detroit Division marked on said map in green.
57-A and B 5-7-41 Raupagh	Two-page statement showing the gasoline sales in gallons in the Detroit area of licensed wholesale jobbers and distributors handling non-brand gas for the years 1936 to 1940. This is substantially the same type as Ex. 55-A and B, except it covers non-brand instead of branded gas and does not show the source of supply nor the year when the distributor became a licensed distributor.
58 5-7-41 Raupagh 591	Chart showing for the years 1936 to 1940, inclusive, the total sales in the Detroit area, the total Standard Oil in said area and its percentage of total sales, Standard Oil sales exclusive of jobbers and percentage, Standard Oil jobber sales and percentage, sales of licensed jobbers other than Standard Oil handling branded gas and percentage, sales of licensed jobbers handling non-brand and

Com. Ex. No. Date Witness	Description
	percentage, sales of all licensed jobbers and percentage and sales of all other companies and percentage.
59 5-7-41 Raupagh	Table showing yearly increase or decrease in gasoline sales for the years 1937 to 1940, inclusive, for the State of Michigan and the Detroit area, showing total Standard Oil sales, Standard Oil jobbers, branded jobbers, non-brand jobbers, all jobbers, and all others.
60-A to D 5-7-41 Raupagh	Four-page statement, each page marked alphabetically in the 60 series, showing continuous record from June, 1936 to November, 1940, of the retail gasoline price situation in Detroit as reflected by Standard Oil Co. surveys on the date indicated, on each of premium, house brand and third grade gasolines, showing for each the prevailing retail service station price, the dealer tank wagon price, the margin, the number of service stations selling below prevailing retail price and the average amount below the prevailing retail market price.
61 5-7-41 Raupagh	Map of Detroit area showing location of 68 Zip, Joy and Speedway stations in red, six Ned's stations in green and fifty-seven Citrin-Kolb in blue and listing each of said stations as to street address.
62 5-7-41 Raupagh	Map showing same information as Ex. 61, except in slightly different form, with blue stars showing Citrin-Kolb locations and gold stars showing Ned's locations.
63-A to C 5-8-41 Raupagh	Three-page list, each page alphabetically marked as an exhibit in the 63 series, showing the brand names for gasoline marketed in the Detroit area for premium, house brand and third grade by the various companies.
64-A to H 5-7-41 Raupagh	Eight-page issue of "Joy News" for March, 1940, put out by Charles E. Austin, each page given separate alphabetical marking in the 64 series, containing a chart, pages

Com. Ex. No. Date Witness	Description
	4 and 5, comparing purported scientific tests of the Detroit Testing Laboratory on Joy Grade No. 1 compared to Sunoco, Red Crown, Shell, Sinclair, Mobilgas, Texaco, Hi-Speed and Gulf.
65-A to H 5-7-41 Raupagh	May, 1940, issue of "Joy News" of the same general nature and containing comparable chart on pages 4 and 5 purporting to show superior quality of Joy gasoline to the major gasolines, being the same as listed in Ex. 64.
66-A to H 5-7-41 Raupagh	August, 1940, issue of "Joy News" containing on pages 4 and 5 further comparisons favorable to Joy based on further Detroit Testing Laboratory report.
67-A to H 5-7-41 Raupagh	November, 1940, issue of "Joy News" of same general nature as preceding exhibits, containing on pages 4 and 5 further charts comparing Joy favorably to quality of major brands on basis of further report from Detroit Testing Laboratory.
68 5-8-41 Raupagh 592	Bound volume of 55 pages of photographs for the year 1939, filed separately, showing photographs listed under stations by brand name, each showing a picture of the station with advertised prices visible, the address of the station, the date of the picture, the brand of gasoline, the prevailing price per gallon and the difference below the prevailing price as indicated by the advertising in the picture. This exhibit has a further F.T.C. designation "$\frac{\text{2-1}}{\text{4389-1}}$".
69 5-8-41 Raupagh	This is a separate book of photographs containing [illegible] pages giving the same information and using substantially the same setup as in Ex. 68, except that this shows the competitive conditions for the year 1940. It has also a marking "$\frac{\text{2-2}}{\text{4389-1}}$".

Com. Ex. No. Date Witness	Description
70 5-8-41 Raupagh	Separate bound volume of photographs, same form and setup as the two preceding exhibits, except that it shows the competitive situation in the early part of 1941. This volume contains 115 pages. It also includes a section on non-brand distributors and non-brand dealers. It is also marked “2-3/4389-1”.
71 5-8-41 Raupagh	This is a separately bound volume of photographs containing 56 pages. It shows competitive stations tributary to each of Ned's stations; otherwise the same type of information as in the three preceding exhibits. It covers a period from 1938 to 1941 and also has a marking “2-4/4389-1”.
76 5-8-41 Raupagh	Map of Detroit area similar to maps, Exhibits 61 and 62, showing locations of dealers selling at cut prices as per pictures in 1941 book, Ex. 70. This exhibit excludes all Joy, Zip and Speedway stations.
92 6-16-41 Boatwright	Map of Detroit and environs with special markings.
95 6-26-41 Boatwright	Standard Oil Co. Sales Department Form 474 20 M Analysis of Tank Truck Deliveries of Salaried Driver.
96-A 6-26-41 Boatwright	Modification of Ex. 31-A to exclude newspaper and billboard advertising.
96-B, C & D 6-26-41 Boatwright	A three-page explanation of this modification.
97 6-26-41 Boatwright	Standard Oil Company Sales Department blank Form 439 2500 Report of Sales to and Classification of Leased Service Station and Form 385 Gasoline Account.
98 6-26-41 Boatwright	Modification of Respondent's Ex. 33-A, excluding the influence of newspaper, billboard and radio advertising.

Com. Ex. No. Date Witness	Description
99 1-6-42 Boatwright 593	Supplement to distribution cost analysis, tank wagon reseller channel versus jobber gasoline sales, explaining regular costing procedure in the Detroit field for 1940. This exhibit contains 33 typed pages, explaining and giving examples of the company's regular accounting procedure and method of allocating costs between channels under the following 12 schedules giving account numbers and explanations as to each: 1. Salesmen and Sales Promotion Expense 2. Advertising costs 3. Delivery and Warehouse Cost 4. Income and Expense Incurred at Leased Retail Outlets Served by Tank Wagon 5. Marketing Expense Items Incurred at Privately Owned Stations Not Leased but Engaged in the Distribution of Our Products 6. Credit Information—Bad Debts and Recovery 7. Field Office and Accounting Cost 8. Supervision Cost Incurred in Sales Field 9. Losses—Taxes—Insurance and Additional Salary considerations 10. Miscellaneous Marketing Expense Items 11. Marketing Expense Items on Lubricating Oils 12. General Office Marketing Costs.
100 1-6-42 Boatwright	Distribution cost analysis, tank wagon reseller channel versus jobber gasoline sales, Detroit field, 1940. This exhibit contains 133 pages showing the actual allocations and figures in carrying out the work explained in Ex. 99 under each of the 12 schedules referred to therein, with numerous sub-schedules under each and explaining exactly what was done in each case.

Com. Ex. No. Date Witness	Description
101 1-6-42 Boatwright	Standard Oil Company Form G.O. 189 Long, being the Sales Department Comparative Statement of Expense, Detroit field, year 1940, completely filled out and reflecting the results and processes set forth in Ex. 99 and 100.
103-A to C 2-17-42 Boatwright	A 3-page letter dated February 2, 1942, from Mr. Hanley of Standard Oil to Mr. Austin of FTC.

4 motor oil baskets
50 ft. garden hose
2 galv. rag containers
1 AC sparkplug cleaner
Equipment checked

To Have And To Hold unto the Lessee for the term of 12 months, commencing on the 1st day of August 1939, and ending on the 31st day of July 1940.

The Lessee agrees to pay to the Lessor as rent for the above described premises, equipment and appliances (if any be included), a cash monthly rental, as set forth in Paragraph "A" below, plus a rental based upon gasoline gallonage, as set forth in Paragraph "B" below, and in any event Lessee agrees to pay monthly a sum equal to the minimum cash amounts set forth in Paragraph "C" below:

"A." For each month of the term a cash rental as follows:

For January	$174.97	For July	$174.97
For February	$174.97	For August	$174.97
For March	$174.97	For September	$174.97
For April	$174.97	For October	$174.97
For May	$174.97	For November	$174.97
For June	$174.97	For December	$174.97

"B." In addition to the cash monthly rental (A), the Lessee also agrees to pay to the Lessor as rent for the above described premises, equipment and appliances, a sum equal to one half cent (½¢) per gallon on all gasoline delivered to said service station for sale.

"C." In event the total amount of rent paid by Lessee under Paragraph "A" and Paragraph "B" above, or under Paragraph "B" singly if Paragraph "A" shall be inoperative in this lease, shall be less for any month of the term than the minimum amount hereinafter set forth in this Paragraph for such month, then for such month Lessee shall pay as additional cash rent any deficiency necessary to bring the total rent for said month up to said stipulated minimum amount for said month. The total rent due to be paid in any month shall never be less than the minimum herein stipulated for such month. In any month that the total amount paid under Paragraph "A" and Paragraph "B" (or under Paragraph "B" singly if Paragraph "A" be inoperative in this lease) shall equal or exceed the minimum rent for said month, as set forth herein, this Paragraph "C" shall be inoperative.

For each month of the term the minimum rental referred to in this Paragraph "C" is as follows:

For January	$235.00	For July	$235.00
For February	$235.00	For August	$235.00
For March	$235.00	For September	$235.00
For April	$235.00	For October	$235.00
For May	$235.00	For November	$235.00
For June	$235.00	For December	$235.00

All rent herein provided for shall be due and payable at the division office of Lessor at 1011 Fourth St., Detroit, on the 1st and 15th of each month. The rental provided for in Paragraph "A" shall be for one-half month in advance, and the rental provided for in Paragraph "B" shall be due at the termination of each one-half month, and each such payment shall be accompanied by Lessee's affidavit showing the date and amount of each delivery for sale of gasoline made to such service station for the preceding one-half month; Provided, however, that if gasoline delivered for sale to such service station be supplied by Lessor, then the rental provided for in Paragraph "B" shall be due as and when deliveries for sale are made to such service station and paid by Lessee to individual making such delivery.

Provided further, that if in any month there shall be a deficiency due to bring the rental up to the specified minimum as provided in Paragraph "C" above, such deficiency shall be due and payable on the last day of the month so involved.

10. That the waiver of any breach of covenant, condition or stipulation contained herein shall not be taken to be a waiver of any subsequent breach of the same or any other covenant, condition or stipulation, nor shall any failure of the Lessor to enforce rights or seek remedies upon any default of the Lessee with respect to the obligations of the Lessee hereunder, or any of them, prejudice or affect the rights or remedies of the Lessor in the event of any subsequent default of the Lessee.

11. That should the Lessee at the expiration of this lease, or in the event of the extension of the period hereof, then upon the expiration of such extension period, hold over for any reason, it is hereby agreed that in the absence of a written agreement to the contrary, the tenancy of the Lessee thereafter shall be for subsequent periods of six (6) months each, provided, however, that either party may cancel this lease at its termination of any six (6) months extension period by giving to the other party notice of his or its intention to do so at least ten (10) days prior to any such expiration.

12. That no obligation, agreement or understanding on the part of either party to be performed shall be implied from any of the terms and provisions of this lease, all obligations, agreements and understandings being expressly set forth herein.

13. Any notice provided for herein shall be considered as properly given as of the date of mailing if sent by registered mail duly addressed to either of the parties at their address as shown in Paragraph 1 of this lease.

In witness whereof, the parties hereto have caused these presents to be executed the day and year first above written.

Standard Oil Company,
By P. A. Raupagh, Manager,
Lessor.

Charles Dameron,
Lessee.

Signed in presence of:
W. Henis,
W. E. Hazel.

597 COMMISSION'S EXHIBIT NO. 1-B.

The Lessee hereby covenants and agrees as follows:

1. That Lessee has examined and knows the condition of said premises and the buildings, equipment, machinery and appliances situated thereon, acknowledges that he has received the same in good order and repair (except as otherwise specified), and that no representation as to the condition or repair thereof have been made by the Lessor.

2. That Lessee will pay all water, light and other operating expenses and will keep said premises, buildings, equipment, machinery and appliances, together with the adjoining sidewalks and entrance driveways in good order and repair; that he will keep said premises and appurtenances, including adjoining areas, alleys and sidewalks in clean, safe and healthful condition, and will comply with all Federal, State and municipal laws, rules, regulations and ordinances with regard to the use and condition of the demised premises; and that at the expiration of this lease, or upon sooner cancellation or termination thereof, Lessee will surrender the premises to the Lessor in substantially as good condition as when received, ordinary wear and tear, damage by fire, the elements or other unavoidable casualties excepted.

3. That Lessee will not carry on or permit upon the demised premises any offensive, noisy or dangerous trade, business, manufacture or occupation, or any nuisance, nor use the same nor allow the same to be used for any illegal or immoral purposes; it being contemplated that all times during the period of this lease said premises shall be devoted mainly to the operation thereon of a gasoline service station and the handling, storage and dispensing thereon and therefrom of motor fuels, motor oils and greases and other petroleum products, and such other products as are customarily handled, sold and distributed at a gasoline filling station. That Lessee will not erect, maintain nor permit any sign, insignia, or other advertising device upon or near the premises herein described which would in any wise indicate that Lessor is the owner or operator of the business conducted upon the premises herein described.

4. That Lessee will not commit or suffer waste to be committed upon the said premises and will make no perma-

nent alterations in or additions to the buildings, structures or equipment thereon without the written consent of the Lessor first had and obtained; except that, if any equipment included in this lease and used for dispensing petroleum products be used for the purpose of dispensing products supplied by someone other than Lessor, then Lessee may and hereby agrees before such use to remove from such equipment all globes, decalcomanias, or other things identifying the products and/or name of the Lessor.

5. That Lessee will not assign, mortgage or encumber this lease, or sublet the said premises, buildings, equipment, machinery and appliances or any part thereof, nor shall Lessee suffer any lien or encumbrance to be placed upon the leasehold interest hereby created or any part thereof, without the written consent of the Lessor first had and obtained.

It is further mutually covenanted and agreed as follows:

6. That none of the provisions of this lease shall be construed as reserving to the Lessor any right to exercise any control over the business or operations of the Lessee conducted upon the leased premises or to direct in any respects the manner in which any such business and operations shall be conducted, it being understood and agreed that so long as the Lessee shall use said premises in a lawful manner as herein provided, the entire control and direction of such activities shall be and remain with the Lessee.

It is further understood and agreed that Lessee shall have no authority to employ any persons as agents or employees for or on behalf of the Lessor for any purpose, and that neither the Lessee nor any other persons performing any duties or engaging in any work at the request of the Lessee upon the leased premises shall be deemed to be employees or agents of the Lessor.

7. That the Lessee may, upon the expiration of this lease or upon its sooner termination or cancellation, remove any and all equipment, tools, fixtures, containers or machinery belonging to the Lessee and placed or installed by the Lessee upon the leased premises.

8. That the Lessor may enter upon said premises at all reasonable times to examine the condition thereof, and to make such changes or repairs to any of the structures on the leased premises as the Lessor may see fit, provided that such right shall not be exercised in such manner as to

interfere unreasonably with any business of the Lessee conducted thereon.

9. That if the Lessee shall fail to pay the rent in the amounts and at the times and in the manner herein provided and/or shall fail to keep and perform or shall violate any of the covenants, conditions and stipulations of this lease on the part of the Lessee to be kept and performed, or if Lessee shall be adjudicated a bankrupt or make an assignment for the benefit of creditors, or if the interest of the Lessee under this lease, shall be levied upon and/or sold upon execution, or shall by operation of law become vested in another person, firm or corporation, or if a Receiver shall be appointed for the Lessee or for the interest of the Lessee under this lease, then, and in any such event, the Lessor at any time thereafter shall have the right, at the Lessor's election, to enter upon the premises herein demised and take possession of the same, together with all buildings, machinery, equipment and appliances situated thereon, and from the time of such entry this lease shall terminate and become void and of no effect and shall be forfeited, and the Lessor, in addition thereto, may sue for and recover all damages accrued or accruing under this lease or arising out of any violation thereof; or Lessor may so sue and recover without declaring this lease void or entering into possession of the said premises; or Lessor may pursue any other remedies for the violation of this lease or any of its covenants by the Lessee. The above enumerated remedies are concurrent and are at the option and discretion of the Lessor, and the pursuit of any one shall not amount to an election and bar the pursuit of any other additional remedies not enumerated above.

Dealers Agreement.

(Gasoline)

This Agreement, made at Detroit, Mich., on August 31, 1938, by and between Standard Oil Company, an Indiana Corporation, hereinafter styled Company and Joseph Leerhuber of 17100 E. Warren at Cadieux, Detroit, Mich.; Residence 5725 Guilford, hereinafter styled Dealer, Witnesseth:

1. The Company does hereby agree to sell and does sell to the Dealer, and the Dealer does hereby agree to purchase and does purchase from the Company all the Dealer's requirement of Solite with Ethyl, Standard Red Crown and Stanolind Gasoline, which shall be taken to mean all such gasoline used, handled and sold by Dealer, at the above place of business of the Dealer, from October 8, 1938, until October 7, 1939, inclusive, and from year to year thereafter; provided, however, that the Dealer may terminate this agreement at the date last above mentioned or any succeeding anniversary thereof by giving written notice to the Company thirty (30) days prior to the date upon which the Dealer desires such termination to become effective.

2. The Company agrees to make deliveries of Solite with Ethyl Gasoline, Standard Red Crown Gasoline, and Stanolind Gasoline by tank wagon to the above place of business of the Dealer in such amounts (not less than 50 gallons at any one time) and at such times (during business hours) as the Dealer may direct. The Company reserves the right to change the name or to discontinue the sale in Dealer's territory of any product named herein. Should the Company discontinue sale of said products or any of them, Company shall not thereafter be obligated to make deliveries hereunder of such product.

3. The Dealer agrees to pay to the Company for Solite with Ethyl Gasoline, Standard Red Crown Gasoline and Stanolind Gasoline, the Company's posted dealer price therefor.

As herein used, the words "Company's posted dealer price" mean the Company's dealer price for the product sold and delivered hereunder, as posted and displayed at

Company's bulk plant from which deliveries hereunder are made at time of delivery.

4. The Dealer agrees to pay cash at time of delivery of all such gasoline. If the Company shall extend credit to the Dealer the Company reserves the right to withdraw such credit and demand cash payments on delivery without assigning any cause for such action. The failure or refusal by the Dealer to comply with the requirements which the Company may impose hereunder as to payment shall entitle the Company to suspend deliveries pending such failure or refusal or to terminate this agreement forthwith. The suspension or termination of this agreement because of the failure of the dealer to perform any of the agreements herein contained shall not in any wise prejudice the Company's other rights hereunder.

5. All orders hereunder will be filled with reasonable promptness, but it is mutually agreed that the Company shall not be obligated to furnish goods hereunder, nor be liable in damages for failure to do so, in the events acts of God, strikes, difficulties with its workmen, lockouts, fires, foreign or domestic governmental authority, war conditions in this or any foreign country, accidents, delays by railways or other methods of transportation, or other causes beyond its control, shall render it impossible for Company so to do. This agreement shall be subject to revision should any of its provisions be found to conflict with any existing or future law, rule or regulation.

6. The Dealer agrees that Dealer will handle, distribute, and sell gasolines containing tetraethyl lead in accordance with the rules and regulations now in existence or which may be hereafter issued from time to time by the Ethyl Gasoline Corporation, or any governmental agency having jurisdiction in the premises, and that Dealer will have its employees properly instructed in respect to said rules and regulations. Company reserves the right to cancel this agreement insofar as it affects gasoline containing tetraethyl lead in the event the Dealer does not comply with all of the foregoing requirements.

7. This agreement is made upon the express condition that the Company shall have and does hereby reserve the right to cancel and terminate this agreement, or any renewal or extension thereof, at any time upon giving at least ten (10) days' prior written notice thereof to the Dealer.

8. All notices provided for herein shall be considered as properly given if delivered in writing personally or sent by mail duly addressed to the Company at 1011 W. Fourth, Detroit, Mich. or to the Dealer at the place of business herein described. The date of service of a notice served by mail shall be the date on which such notice is deposited in the Post Office of the United States Post Office Department.

Dated this 31st day of August, 1938.

641 COMMISSION'S EXHIBIT NO. 29.

August 6, 1937.

Dear Fellow Dealer:

At a joint meeting held on July 27th the undersigned dealers agreed to be the leaders in a movement to discontinue all gasoline discounts as a gesture of good faith to the industry, and in a sincere attempt to permanently eliminate the practice.

We were given definite assurance, and it was mutually agreed that by noon of the following day all dealers would be on the same program or we would be obliged to go back on the old basis.

We have now waited for Ten Days, and not only have other dealers failed to adopt this program, but competitive conditions have become so bad that it is imperative for us to follow suit.

We are writing to you as a further gesture of good faith and with the sincere promise to co-operate in the future on any program that will be Fair To All.

It has cost us a great deal to pioneer this move, and we sincerely regret that the others did not follow suit.

Yours very truly,

James J. Bright & Son

647 COMMISSION'S EXHIBIT NO. 33-A.

(Letterhead of Citrin-Kolb Oil Company,
Detroit, Michigan.)

March 8, 1941.

Cyrus B. Austin,
Attorney-at-law
Federal Trade Commission
Detroit, Michigan

Dear Mr. Austin:

In response to your request for certain information regarding the matter of Federal Trade Commission vs. Standard Oil Company, we believe the following will cover all items requested by you in the subpena duces tecum served on Mr. Citrin.

The invoice price for Red Crown gasoline to the dealers at

4200 Third
1309 W. Warren
11301 Van Dyke
Chicago & Dexter
8501 Gratiot

from January 1, 1938 to December 31, 1940, was identical and the prices were as follows:

1/1/38-3/28/38	.136
3/28/38-7/22/38	.138
7/22/38-12/9/38	.128
12/9/38-6/17/39	.116
6/17/39-10/31/39	.121
10/31/39-11/11/39	.114
11/11/39-11/18/39	.104
11/18/39-7/1/40	.121
7/1/40-12/31/40	.126 (this rise is the additional ½ cent Federal Tax)

The above schedule of prices includes State and Federal Tax.

On the above mentioned locations we gave the following rebates off of the invoice price as above shown:

4200 Third	1¢ per gallon
1309 W. Warren	1¢ per gallon
11301 Van Dyke	1¢ per gallon
Chicago & Dexter	none (see next paragraph)
8501 Gratiot	½¢ per gallon

648 COMMISSION'S EXHIBIT NO. 33-B.

Cyrus B. Austin—2

For the year 1939 the invoice price to all dealers was the same and they conformed with the above schedule except, that we gave the above-mentioned rebates.

We have no control or interest in the rentals of the above locations except the location at Chicago and Dexter. We lease this location at a rental of $235.00 per month and sublease the premises at the same rental. For the months of August, September, and October of 1939 the rent was waived for the reason that the station across the street instigated a price war against our town. Before meeting this competition our tenant filed a complaint with the Prosecutor for Wayne County and with Mr. Rankin Peck, of the Retail Gasoline Dealers Association; all of which resulted in an action before the Wayne County Circuit Court against the competitor of our town. While this was pending our tenant lost considerable ~~of~~ his business. He then had to meet the competition because the courts gave no relief. In order to keep our tenant in business after the punishment of this competition we waived three month's rent as our contribution in assisting our tenant to carry on against his competitors price cutting activity.

Our records are complete and are available to you for what information you desire.

Very truly yours,
Citrin-Kolb Oil Co.
Max Biber

Gasoline Retailing Costs In Wayne County, Michigan

by Herbert F. Taggart

* * *

Copyrighted, 1939

by Herbert F. Taggart

This is a copy number .... of an edition limited to 12 copies, prepared for private circulation and use by refiners and others interested in the retailing of gasoline.

690 Gasoline Retailing Costs In Wayne County, Michigan

by Herbert F. Taggart

This report, derived from data gathered as of May, 1938, has been prepared in a limited edition for private circulation and use by refiners of petroleum products and others with a special interest in the retail branch of gasoline marketing. It deals with the following topics: (1) the mechanics of the survey, (2) the coverage and representation of the survey, (3) the accounting procedures and methods used in the survey, (4) the results of the survey, and (5) conclusions.

1. The Mechanics of the Survey.

This survey was undertaken in an effort to comply with the requirements of Section 8 of Act 282 of the public acts of Michigan of the year 1937, commonly known as the "Fair Trade Act." This section reads as follows: "Where a particular trade or industry, in which the person complained against is engaged, has an established cost survey for the locality and vicinity in which the offense is committed, such cost survey shall be deemed competent evidence to be used in proving the cost to such person." The purpose of the survey was that of determining the "overhead expense of the distributor or vendor" which is one of the elements of cost specified in Section 5 of this Act.

It seemed necessary for practical reasons to conduct the survey by means of a questionnaire, a copy of which is attached to this report. The making of a survey by means of personal visitation to gasoline stations would have been an extremely costly and time-consuming task, and it would have resulted in no more reliable figures than the survey conducted by the questionnaire method. The questionnaire was prepared in duplicate in order that each station operator might keep a copy, if he wished, of the figures
691 which he sent in. The questionnaire blanks, together with self-addressed envelopes, were distributed in person throughout Wayne County by individuals who were familiar with the retail gasoline trade and who undertook to make sure that every gasoline station in the entire county was furnished with a copy of the questionnaire. This distribution was made to a total of 2,442 individual gasoline stations in Wayne County.

Completed returns were received covering the operations of 555 individual gasoline stations. The returns were first given serial numbers, roughly in order of their receipt, and were then carefully checked to see whether they had apparently been properly made out. All those with obvious defects such as lack of notarization, failure to answer certain vital questions, or obvious arithmetical errors were marked for field inspection and audit. Also, certain other returns were similarly marked for audit in order to obtain assurance that the returns had been carefully and conscientiously made out by the gasoline station operators in accordance with their actual operating costs. Approximately one-third of all returns received were checked in the field. In some cases it was necessary for the station operator to make out a complete new return which was duly notarized and used in place of the original return, but in most cases it was necessary only to fill in missing figures or to alter figures which were faulty. In many cases the field check showed every figure to be exactly right, and no changes were necessary.

In the course of checking the returns it was found necessary to eliminate 66 of the returns completely from the final analysis. The reasons for such elimination were as follows: inability to audit return, 41 cases; lack of notarization, 19 cases; wrong period, 6 cases. The weighted average cost of selling gasoline by those stations whose returns were not used, as well as it could be computed from the 692 inadequate and unsatisfactory figures given, was 5.3¢ per gallon. The final computations are based on satisfactory returns from 489 individual gasoline stations in Wayne County.

After the returns had been completely checked, computations were made of the cost of selling gasoline by each individual gasoline station. Extensive tabulations of these cost computations and of other figures from the returns were compiled, the results of which are given hereafter.

2. The Coverage and Representation of the Survey.

As indicated above the questionnaire was distributed to 2,442 individual gasoline stations in Wayne County. This is believed to be all of the stations in the county at the time the survey questionnaires were distributed. The 555 stations which returned completed survey blanks were found in all parts of the county. As an indication of this wide geographical representation, the county was divided arbitrarily into five sections, using Grand River Avenue, Woodward Avenue, Gratiot Avenue, and the Detroit city limits as the boundaries. In District 1, bounded by the Detroit River and Grand River Avenue, were 107 of the 489 stations used in the final tabulation. In District 2, bounded by Grand River and Woodward Avenues, were 121 of these stations. Eighty-two were in District 3, bounded by Woodward and Gratiot Avenue, and District 4, bounded by Gratiot Avenue and the Detroit River, contained 99 stations. District 5, which included all of Wayne County outside the city of Detroit, was represented by 80 stations.

The stations whose figures were used in the final computations ranged in size from 1,049 gallons sold during the month of May, 1938, to 30,844 gallons. They represented every major brand of gasoline sold in the area as well as some unbranded varieties. A tabulation of the brands represented by all stations from which returns were received

693

Table 1

Brands of Gasoline Represented in the Survey

Brand	Number of Stations
Mobilgas	102
Standard	82
Sunoco	52
Hi-Speed	42
Sinclair	40
Shell	39
Texaco	31
Gulf	29
Cities Service	9
Miscellaneous Brands	22
Brand Unreported	107
All Stations	555

is given above as Table 1.

The 489 stations whose returns were used in the final computation constituted slightly more than 20% of the 2,442 stations to which copies of the questionnaire were distributed. This percentage, although it might seem small to those unacquainted with the usual results of the questionnaire method of obtaining information, is actually a highly satisfactory numerical representation. As a matter of fact, many fewer stations would have given a result equally representative of the retail gasoline trade. This statement is thoroughly demonstrated in Table 2 below. The weighted average cost of selling gasoline in the 489 stations was found to be 4.8¢. The location of stations in the county did not appear to have any appreciable influence on cost. Table 2 shows all stations grouped according to the districts which have been described above. It will be noted that the weighted average cost in each district does not vary more than two-tenths of a cent from the general weighted average cost.

Both leased and owned stations were well represented, the 694 number of owned stations being approximately 14% of the total. The stations varied widely in the proportion of business done in fields other than gasoline, the proportion of gasoline business to total business ranging from 19.78% to 98.80%.

TABLE 2.

Analysis of Cost Data by Districts.

	Number of Stations	Total Gallonage, May, 1938	Average Gallonage	Gasoline Marketing Expense	Weighted Average Cost, Cents

District 2	121	976,328	8,069	46,563.58	4.8
District 3	82	579,679	7,069	28,881.42	5.0
District 4	99	844,496	8,530	39,809.78	4.7
District 5	80	683,921	8,549	31,669.79	4.6
All Stations	489	3,871,455	7,917	$184,088.51	4.8

Thus it is seen that the representation in the survey was very complete as to geographical distribution, size, brands of gasoline sold, number of returns, status of ownership, and character of business carried on.

3. The accounting procedures and methods used in the survey.

The thing to be aimed at in a cost survey is a figure which represents the cost of sustained operation over a substantial period. If possible, such period should be not less than a year. It is possible for costs for a shorter period to be either higher or lower than a stable cost based on a full year's operations. The obtaining of detailed cost figures from any large number of gasoline stations for a period of an entire year, however, was consid-
695 ered to be impracticable both on account of the very large expense of such an undertaking and the amount of time it would consume. The best substitute which could be divsed was the obtaining of cost information for one month only with sufficient additional information to assure that such cost information was fairly representative of the conditions under which each station operated. The month of May was chosen for this purpose for two reasons: first, because it was the most recent month for which information could be

obtained, and second, because May was considered to be a month in which the gallonage sold was at least as high as the average for the entire year. The correctness of the latter assumption is fully borne out by the fact that in the 489 stations used in the final tabulation the May gallonage was 3,871,455 gallons as compared to an average monthly gallonage for the same stations during the first five months of 1938 of 3,666,310 gallons. Thus the May gallonage was more than 5% higher than the average monthly gallonage for the first five months of the year 1938. Furthermore, from 369 returns which reported the monthly gallonage for the entire year 1937 it was ascertained that the gallonage for May of that year was 9.22% higher than the average monthly gallonage for the entire year. From this fact it may be concluded that May of 1938 was a month which from the standpoint of gallonage resulted in a conservative statement of unit costs.

The expenses included in the computation were all of the ordinary and necessary expenses of doing business and included specifically wages, rent, electricity and other utilities, advertising, supplies, social security taxes, depreciation, repairs, insurance, property taxes, licenses, bad debt losses, heating, and miscellaneous expenses. In order to recognize the fact that the station operators' own working time has a value and therefore is a cost to the business, the
station operators' hours of labor as reported on the
696 questionnaires were put into the computation at the
uniform minimum rate of 40¢ an hour. This rate was chosen because it is universally recognized as a fair minimum wage and because it roughly corresponds to the wages actually paid to those employed in gasoline stations in Wayne County. Another item of cost included in the computations was interest at the rate of five per cent per annum on any investment which the station operator reported in land, buildings, and equipment. This item was included both because interest on investment is a well-recognized factor of cost and also in order that leased stations and owned stations might be placed on a comparable cost basis.

In the questionnaire the items of wages, rent, utilities, advertising, supplies, and social security tax, together with miscellaneous expenses, were obtained on the basis of the actual amounts applicable to the month of May, 1938. The other items of expense were obtained on a yearly basis and divided by twelve in order to arrive at the amount applisable to May. In the case of bad debts, it was decided that 1/12 of the annual bad debts might not be a fair figure for the month of May, 1938, because conditions as to the granting of credit might have changed since the year 1937, for which the figure of annual bad debts was obtained; therefore, the questionnaire requested a figure of credit sales for May, 1938, and in the computations there was used as bad debts either 2% of this credit sales figure or 1/12 of the bad debts for 1937, whichever was the lower. The 2% figure is recognized by those conversant with the retail gasoline trade as being an extremely modest percentage to be applied to credit sales in order to allow for bad debts. The result of this handling of bad debts is that there is included in the costs of the 489 stations which make up the final report a total of bad debts of $2,259.28, which is approximately 1/25 of the total bad debts reported by the same stations for the year 1937.

697

Table 3.

Computation of Cost per Gallon—An Actual Typical Station.

Monthly expenses:		
1. Wages—employees		$133.39
2. Wages—owners (312 hours at 40¢)		124.80
3. Rent		100.00
4. Utilities		29.96
5. Advertising		5.00
6. Supplies		13.50
7. Social security tax		1.33
8. Miscellaneous		4.00
9. Bad debts		2.52

Yearly expenses:		
1. Depreciation on building	$200.00	
2. Depreciation on equipment	140.00	
3. Interest on cost of land, building, and equipment (5% on $5,100)	255.00	
4. Repairs	120.00	
5. Insurance	20.33	
6. Taxes	....	
7. Licenses	26.50	
8. Heating	40.00	
Total yearly expenses	$801.83	
Divided by 12		66.82
Total expenses per month		$481.32
Ratio of gasoline sales to total sales	79.33%	
Expenses applicable to gasoline		$381.83
Gallons sold in May, 1938	7,808	
Expenses per gallon		4.9¢

After total expenses were ascertained it was necessary to divide them between those which pertained to the sale of gasoline and those which pertained to other activities of the gasoline stations. For this purpose the only practicable device was the utilization of the respective dollar sales. In each case a ratio was established between the sales of gasoline and all sales and revenue of the station. This ratio was applied to total cost in order to obtain the

698

Divided by 12		20,705.13
Total expenses per month		$227,362.12
Ratio of gasoline sales to total sales	80.99%	
Expenses applicable to gasoline		$184,140.58
Gallons sold in May, 1938	3,871,455	
Expenses per gallon		4.8¢

cost applicable to the selling of gasoline. In order to get the cost per gallon this figure was in turn divided by the station's gallonage for May, 1938. A typical computation of cost for a single station is shown above as Table 3, and a composite cost calculation embracing the costs and gallonage of all 489 stations is shown as Table 4.

699 The following specific comments on each item of cost will throw additional light on the methods used and the character of the figures shown in Tables 3 and 4. In all cases it will be noted that emphasis was laid on conservatism in stating costs, so that the result is, if anything, an understatement rather than an overstatement of costs.

Employees' wages were taken as reported.

Owners' wages were computed at the rate of 40¢ per hour on the number of hours worked by the station operators. Owners of profitable stations actually draw and consider as wages a much larger amount, but it was thought best, to avoid all possibility of argument that the item of owners' wages contained an element of business profit, to put all operators on the same minimum wage level. The withdrawals by owners of cash and merchandise reported on the questionnaires were of course eliminated from the computations.

The items of rent, utilities, advertising, and supplies were used as reported on the returns.

The item of social security tax was accepted as reported if it was equal to either one or two per cent of the item of employees' wages. One per cent is of course the amount which the employer is required to pay for old age security benefits. Many employers however pay the employee's contribution as well, so that this item was often reported as two per cent of the wage item. Many returns contained no social security tax, or reported a percentage other than one or two per cent. In practically all of these cases one per cent of the employees' wage item was used in the final computation. In a few cases however no social security tax was included, and in a small number of cases where the employer reported that he was required to pay the state unemployment benefit tax a rate of four or five per cent was used.

700 Miscellaneous expenses were accepted as reported with the exception of certain cases where they appeared to be obviously too high. In some cases also the explanation of the miscellaneous expense item indicated

that it was not a proper charge against the business done in May, 1938.

The treatment of bad debts has already been fully indicated. This was a very small item in total expense as it finally turned out, and could well have been completely eliminated.

Depreciation on buildings was included only where buildings were owned. Generally speaking, the figure reported on the return or 5% of the cost of the building was used, whichever was lower. The only exceptions to this rule were in case no depreciation was reported, in which case 5% of the cost of the building was used, and those cases in which a higher rate was reported and substantiated. Such cases occurred, for example, when the building was on leased land and had to be returned to the owner of the land when the ten or fifteen year lease expired. In other instances our audit disclosed that the station operator was actually claiming and receiving credit on his income tax return for a rate of depreciation higher than 5%.

Exactly the same procedure was followed in the case of depreciation on equipment except that the standard rate here was 10% of the cost. Both the 5% rate on buildings and the 10% rate on equipment are very conservative rates. Gasoline station operators seldom claim lower rates for income tax purposes and often claim higher ones.

Interest was computed only on the cost of land, building, and equipment owned by the operator. No attempt was made to compute interest on other assets, such as accounts receivable and inventories, although such interest would have been a fully justifiable part of cost. The rate used, namely 5%, was thought to be conservative and was also very convenient for purposes of computation.

701 The items of repairs, insurance, taxes, licenses, and heating were accepted as reported on the returns. It must be remembered however that wherever there appeared to be any reason for believing that these and the other figures which were similarly accepted were unreliable, they were either eliminated from the computations entirely or were confirmed by field audit.

Thus it is seen that the costs of operation were reported conservatively by the station owners, were obtained for a month in which the gallonage was sufficiently high to make the unit cost relatively low, and were computed with the strictest regard for assurance that no unit cost would be higher than the facts warranted.

4. The Results of the Survey.

One result of the survey has already been mentioned namely, that the weighted average cost per gallon of selling gasoline was found to be 4.8¢. This weighted average cost is simply the total costs of selling gasoline divided by the total number of gallons sold. As was to be expected, individual stations showed a wide variance from this average cost. The lowest cost computed for any station was 2.3¢ per gallon. The highest cost was 22.7¢ per gallon. The cost per gallon was found to vary chiefly according to the number of gallons sold in the month. Table 5 indicates the influence of gallonage on unit costs. In this table the stations are divided into four groups according to gallonage in the month of May, 1938, the first group being that 25% of the total number of stations which had the lowest gallonage, and the fourth group being that 25% of the total number of stations which had the highest gallonage. The average gallonage of Group 1 was 3,746 gallons per station while the average gallonage of Group 4 was 13,541 gallons per station. It will be noted that the unit cost for the lowest gallonage group was 6.6¢ whereas that for the highest gallonage group was 4.3¢.

702

TABLE 5.

Relationship of Gallonage to Marketing Cost per Gallon.
(In Quartiles)

	Number of Stations	Total Gallonage, May, 1938	Average Gallonage	Gasoline Marketing Expense	Range of Unit Costs, Cents	Median Unit Cost, Cents	Weighted Average Cost, Cents
25% of Stations Having Lowest Gallonage	122	456,957	3,746	$ 29,944.09	3.6—22.7	6.45	6.6
25% of Stations Having Next to Lowest Gallonage	122	748,558	6,136	38,224.81	3.4— 8.7	5.05	5.1
25% of Stations Having Next to Highest Gallonage	122	1,000,449	8,200	45,047.06	3.0— 7.4	4.4	4.5
25% of Stations Having Highest Gallonage ..	123	1,665,491	13,541	70,872.55	2.3— 7.3	4.2	4.3
All Stations	489	3,871,455	7,917	$184,088.51	2.3—22.7	4.7	4.8

703 Table 6, in which the stations are divided into 16 groups with 2,000-gallon intervals, gives the same information in somewhat greater detail. There is included in this table a column of figures showing the cost range, that is, the highest and lowest unit costs to be found in the particular group of stations. It will be noted that the decline in costs from the very small stations to the very large

ones is not entirely steady or consistent, but is nevertheless clearly present. It is important to note that the decline in cost per gallon is very rapid between the smallest stations and those in the medium-sized classes, but the decline slows down as the stations become larger, so that a point is reached at which increased gallonage no longer appears to result in lower costs.

Chart 1 shows the gallonage and station cost per gallon for every one of the 489 stations included in the survey. The tendency toward cost reduction as the size of the station increases is clearly shown by the cost curve which has been mathematically fitted to the observed data. The slowing down of the decrease is clear, the tendency of cost per gallon to decrease being almost completely absent at about 18,000 gallons. A very slight upward trend in the curve, observable above 24,000 gallons indicates, indeed, that as stations get beyond an optimum gallonage their efficiency declines and the cost per gallon begins to rise. This tendency is very slight and should not, perhaps, be taken too seriously.

Special attention was given in the compilation of figures to those stations which exhibited the highest operating efficiency as indicated by having the lowest operating costs. Tables 7 and 8 divide the stations into four groups according to unit cost. In Table 7 the groups are based on the number of stations so that each group has the same number of stations. This table shows that the weighted

TABLE 6.

Relationship of Gallonage to Marketing Cost per Gallon.
(In 2,000-Gallon Classes)

706

TABLE 8.

Cost and Gallonage Data for Stations Grouped in Quartiles, According to Gallonage.

	Number of Stations	Total Gallonage, May, 1938	Average Gallonage	Gasoline Marketing Expense	Range of Unit Costs, Cents	Median Unit Cost, Cents	Weighte Averag Cost, Cents
25% of Gallonage Sold at Lowest Unit Cost..	89	966,934	10,864	$ 33,716.35	2.3— 3.9	3.6	3.5
25% of Gallonage Sold at Next to Lowest Unit Cost	103	967,639	9,389	40,956.88	4.0— 4.5	4.2	4.2
25% of Gallonage Sold at Next to Highest Unit Cost	120	973,711	8,114	47,445.02	4.5— 5.3	4.9	4.9
25% of Gallonage Sold at Highest Unit Cost.	177	963,771	5,445	61,970.26	5.3—22.7	6.4	6.4
All Stations	489	3,871,455	7,917	$184,088.51	2.3—22.7	4.7	4.8

707 average cost of the 25% in number of stations having the lowest unit costs was 3.6¢ per gallon. At the other end of the scale the 25% of stations having the highest unit cost averaged 7.0¢ per gallon. Table 8 deals with gallonage rather than with the number of stations so that the first group contains 89 stations which sold approximately one-fourth of the total number of gallons. From this table it can be seen that the one-fourth of total gallonage sold at the lowest unit cost was sold at an average unit cost of 3.5¢

whereas the one-fourth of total gallonage sold at the highest unit cost required an expenditure of 6.4¢ per gallon.

A special tabulation was made to compare the cost of selling gasoline by leased and owned stations. The dividing line between leased and owned stations was taken with respect to the ownership of land. A leased station was considered to be one in which the land was leased, and if the land were owned the station was considered to be an owned station. Table 9 shows that the 419 leased stations showed a weighted average cost of 4.74¢ while the 70 owned stations showed a weighted average cost of 4.85¢. This computation confirms the propriety of including interest on investment as a means of equalizing the cost computations as between leased and owned stations.

TABLE 9.

Comparison of Leased and Owned Stations.

	Number of Stations	Total Gallonage, May, 1938	Average Gallonage	Gasoline Marketing Expense	Weighted Average Cost, Cents
Leased Stations	419	3,223,783	7,694	$152,652.77	4.74
Owned Stations	70	647,672	9.252	31,435.74	4.85
All Stations	489	3,871,455	7,917	$184,088.51	4.8

708 A special study was made in order to discover the relationship, if any, between the percentage of gasoline sales to total sales and the unit cost of selling gasoline. No such relationship was found to exist. Table 10 shows all stations divided into groups with a 5% interval, the unit cost varying from a low of 4.6¢ in the third and ninth groups, in which gasoline sales constituted from 85 to 90% and 55 to 60%, respectively, of the total business done, to a high of 7.0¢ in the tenth group in which gasoline business constituted 50 to 55% of total business done. The variations in cost from group to group follow no particular pattern, apparently depending a great deal more on the average size of station in the groups than on any other one factor. This table seems to be a reasonably good confirmation of the propriety of using the relative dollar-sales method of allocating costs as between gasoline sales and other sales.

709

All Stations	489	3,871,455	7,917	$184,088.51	2.3—22.7	4.7	4.8

Special attention was directed in the course of the survey to the stations which exhibited exceptionally low costs in order to discover whether the extraordinarily low costs were typical of the station or were due to special conditions which may have existed only in May, 1938. For this purpose the total cost of selling gasoline in all stations which showed a cost of less than 3.5¢ per gallon was divided by the average gallonage for the first five months of 1938. The result was that while these 30 stations with a total gallonage of 361,042 showed an average cost of 3.1¢ per gallon when May gallonage was used as a base, they showed an average cost of 3.5¢ per gallon when their total operating costs were divided by their average monthly gallonage for the first five months of 1938. Seven of the 489 stations showed a cost of less than 3¢ per gallon. Careful study of their figures indicated that in every case the cost was as low as it was because May, 1938, produced an extraor-
710 dinary high gallonage, considering these stations' normal business. Specifically, the station which had a unit cost of 2.3¢ was found to be one in which the May gallonage was more than twice as high as its average gallonage for the year to date. Its cost based on the average gallonage was 4.7¢ per gallon. Similarly, the May gallonage of the one station which showed a cost of 2.6¢ per gallon was 22.5% higher than the average gallonage for the year to date. Its cost based on average gallonage was 3.2¢ per

gallon. The other five stations whose costs were less than 3¢ a gallon likewise sold in May very substantially greater amounts of gasoline than their averages for the year to date. Their costs on the basis of average gallonage in all except one of the five cases were 3¢ or more. In the exceptional case, the cost on such a basis was 2.9¢. From this study it may be concluded that it is almost impossible that the normal operating cost of any gasoline station, no matter how large or efficient, could be less than 3¢ per gallon.

711

TABLE 11.

Gasoline Price and Cost Data for the Average Station.

	Total	Cents Per Gallon	Percentage of Net Proceeds
Gasoline Sales (7,917 gallons)........	$1,438.12	18.16	132.4
Less Gasoline and Sales Taxes.......	351.65	4.44	32.4
Net Proceeds from Gasoline..........	$1,086.47	13.72	100.0
Cost of Gasoline Sold...............	798.92	10.09	73.5
Gross Margin on Gasoline............	$ 287.55	3.63	26.5
Station Expenses Applicable to Gasoline	376.46	4.76	34.6
Net Loss on Gasoline Sales..........	$ 88.91	1.13	8.1

Other results of the survey may best be shown by taking a look at the average station. This hypothetical station is not really representative in some senses, but a picture of its operations does throw some light on the gasoline station business in Wayne County in May, 1938. The operator of the average station owned land, buildings and equipment which cost him $3,056 and in addition paid rent of $80.63 per month for other fixed assets required. He worked 360 hours himself, or 11.6 hours per day (sometimes there were partners, of course) and employed other help to the extent of 366 hours, paying therefor $134.06, or 36.6¢ per hour. His own drawings in cash and merchandise amounted to $128.66, or 35.7¢ per hour for the time he put in. During the month he sold 7,917 gallons of gasoline for $1,438.12 and received $337.48 for other sales and services. The details of the gasoline part of his business are shown in Table 11, which indicates that if he made any money it must have come from the non-gasoline part of the business. It should be remembered, of course, that a substantial portion of his expenses did not involve immediate expenditures of cash, so that he actually did have a net cash income. The chief items of non-cash expense were owners' wages and depreciation, which amounted to $124.90 of the total expense or 1.58¢ per gallon. Deducting these items from his expenses leaves $35.99 of cash income above out-of-pocket costs, or 12.3¢ per hour for the time devoted to gasoline sales. Out of this he must pay $3.32 of interest on indebtedness, leaving $32.67 per month on which to live and out of which to save the price of new buildings and equipment when the old ones wear out. As to the rest of the business done by the station the information is not so complete. From the $337.48 of such business must be deducted $88.39 of allocated expenses, but the questionnaires did not call for the cost of goods sold, such as oil, grease, accessories, and so forth, so that the $249.09 of difference between sales and expenses cannot further be analyzed. Certainly it is not net income, and it seems most unlikely that it provides 712 the operator with enough of a surplus to enable him to earn the minimum wage and minimum interest on investment with which his gasoline operations have been charged.

Table 12 contains a miscellaneous assortment of data as reported on the questionnaires, not included in any previous table. Most of these figures are not particularly significant, but some are interesting. Substantial differences will be noted between some of the figures as reported (particularly depreciation and proprietors' wages) and the figures actually used in the cost computations. The reasons for these differences are explained heretofore.

TABLE 12.

Additional Data Obtained from Survey.

Hours Worked—Employees		178,850.25
Hours Worked—Owners		176,051.5
Owners' Drawings Reported		$ 62,913.05
Investment:		
Land (70 stations)	$512,561.84	
Buildings (98 stations)	574,318.01	
Equipment (354 stations)	407,453.88	
		$1,494,333.73
Building Depreciation Reported		34,852.65
Equipment Depreciation Reported		39,196.33
Cost of Gasoline Sold		545,530.23
Gasoline Sales in May, 1938		703,238.74
Other Sales and Income		165,030.00
Credit Sales in May, 1938		196,171.49
Bad Debts Reported for 1937		58,072.63
Interest Paid—Annual		24,076.20

5. Conclusions from the Survey.

The final conclusions to be derived from this survey of the cost of doing business by retail gasoline dealers in Wayne County may be summarized as follows: first, 713 that the average cost of selling a gallon of gasoline in Wayne County is 4.8¢; second, that the cost of selling gasoline tends to vary inversely with the number of gallons sold in a given period; third, that there seems to be a rather definite lower limit to the cost of selling gasoline per gallon, which limit is in the neighborhood of 3¢ per gallon; fourth, that the average cost of selling gasoline by the stations which are most efficient in that they fall within the lowest 25% in unit cost is 3.5¢; fifth, that factors other than gallonage sold, such as location within the county, status of ownership, and proportion of gasoline business to total business done, have no appreciable or determinable effects on the unit cost of selling gasoline.

Sales Department

Standard Oil Company

Equipment Loan Agreement

This Agreement made at .... this .... day of ...., A. D. 19...., between the Standard Oil Company, a corporation of the State of Indiana, hereinafter referred to as the Company and .... of ...., hereinafter referred to as the Dealer.

Whereas, the Dealer is now purchasing Petroleum products from the Company and has requested the Company to loan to him in equipment for the storage and distribution thereof, and

Whereas, the Company has consented to loan such equipment to the Dealer for use in the Dealer's business upon the terms and conditions hereinafter mentioned.

Now, Therefore, in consideration of the above the Company does hereby agree to loan to the Dealer the following equipment:

Serial No.	Description of Equipment	Capacity

Dealer hereby acknowledges receipt of all of the above described equipment.

It Is Expressly Understood and Agreed That: Said equipment and all the appliances connected therewith, or used in connection with the same, furnished by the Company shall at all times be and remain the property of the Company. In event Dealer should at any time store or distribute petroleum products in or through any of such equipment other than petroleum products of this Company, Dealer agrees to remove from such equipment all insignia, marks, names, brands, advertising and identifying matter owned by or which refers to this Company or its products, and a breach of this clause on the part of the Dealer shall forthwith nullify this agreement and immediately confer upon Company the right to enter upon the premises and remove all of such equipment and do such work and in such manner as shall be necessary to effect such removal.

In event Dealer shall at any time cease to use any of the items of equipment herein mentioned for the handling of petroleum products supplied by company, it is understood that Dealer shall from the date of such discontinuance pay as rental for the use of such item or items of equipment in cash monthly rental payable on the first day of each month in advance as follows:

Serial No.	Description of Equipment	Capacity	Reference	Monthly Rental Rate

In event Dealer elects to retain the equipment and pay rent as aforesaid, failure on the part of the Dealer to pay such rent as above specified shall give to Company the right to immediately terminate this agreement and remove the equipment.

And In Further Consideration of the premises, the Dealer, for himself, his heirs, executors, administrators, successors and assigns hereby agrees to indemnify and save harmless the Company, of and from any and all claims for liability for any and all loss, damage, injury or other casualty to persons or property caused or occasioned by any leakage, fire or explosion of or from said equipment or the appliances connected or used therewith, or through any imperfection in the construction, installation or operation of the same, whether due to negligence of the Company, or otherwise, and further agrees to procure and pay any and all licenses, license fees, taxes, or like charges levied or imposed during the term of this lease on any equipment of the Company, furnished under this agreement, or upon the operation and maintenance thereof.

And Also, the Dealer, for himself, his heirs, executors, administrators, successors, and assigns, does hereby expressly agree to keep the above described equipment in good order and repair.

And Also, for himself, his heirs, executors, administrators, successors and assigns, does expressly waive, relinquish, exonerate, discharge and protect the Company from any and all liability for damages which may be suffered by him or others by reason of leakage, fire, explosion or other casualty occurring through any imperfection in said equipment or the appliances connected therewith or from any other cause whatsoever.

Price Evidence	63	.2
Total	$40,143	100.0%

722 COMMISSION'S EXHIBIT NO. 82-A.

Account 1004—Salary Salesmen

Detroit Field—June 1937.

The payroll of the Standard Oil Company is divided into a number of sections—umbered from 1 through 11. Sections 5 and 6 apply directly to salesmen's salaries while the other lists have to do with accounting, clerical sales promotion, and other salary costs.

Employees spending 100% of their time calling on trade are entered on payroll No. 5 and the proportion of their time used for selling petroleum products is used to determine the proportion of expense charged to general Account 7004. In June, 1937, in the Detroit field this cost amounted to $14,757.90. In addition to these men we have another class of employees, shown on payroll # 6, who spend part of their time calling on the trade in a sales capacity, and the remainder on supervisory activities. These men keep a daily record of the time spent in sales work, and a proportion of their salary represented by time spent on sales is charged to Account 7004. In June, 1937, the amount applicable to this account was $1,221.24.

The total of Account 7004 is then allocated to the following sales channels on a distribution of time basis.

Tank Wagon—Reseller
Tank Wagon—Consumer
Other Method

As we have previously explained each salesman keeps a record of time one month out of every quarter, segregated to sales channel. An average is then obtained for all employees shown on payrolls 5 and 6 and the total amount charged into Account 7004 is allocated to the sales channels listed above, on Form 189 on a weighted average basis.

This selling expense, for June, 1937, chargeable to the tank wagon—reseller method, therefore, was 20.5% of $15,979.14, or $3,275.72. The ratios referred to together with the names of the salesmen and their salaries are shown on the attached sheet.

Total Account 1075 as submitted on Exhibit 31-O	$154,635.04

Explanatory Notes.

Product Distribution

In our accounting set-up no allocation of advertising cost to products is made. Any distribution that we might have occasion to make to a certain product would be solely for the purpose of determining the profitability of that one product regardless of the channel in which it might be sold. In our books of account our allocation of advertising expenditures is directed to an allocation by channels rather than by products within channels. Inasmuch as gasoline represents the greater proportion of the volume moving through the reseller channel, advertising charges so allocated primarily reflect the advertising charge assignable to gasoline.

Sub A. Newspaper Advertising

In 1937 each field was charged with the newspaper advertising cost originating in that field. For example, the attached advertisement was run in the newspapers in the
Detroit field, July, 1937, incurring a cost of $1,920.00.
726 Because of the unfairness to some fields in allocating
newspaper advertising costs on the basis existing in

1937, such allocations were made on a circulation basis commencing with January 1, 1938. This was particularly true of fields, such as Chicago, Kansas City, St. Louis, having a large metropolitan newspaper circulation going into adjacent field territories. Because the incoming circulation in the Detroit field was offset by the circulation going out of the field, there was less than 3% difference resulting from the different methods of allocation in the Detroit area.

Advertising expenditures are allocated to sales channels, Form 189, according to the ratio of gallons sold through each channel to the total gallons sold. For example, in July, 1937, reseller tank wagon gallons represent 78.8% of the total gallonage. Therefore, this per cent of $1,920 gives a cost item of $1,512.96 applicable to the reseller channel on Form 189 for the Detroit field in 1937.

Sub B. Billboard Advertising

Sub C. Dealer Sign Expense

As stated above, distribution to the sales channel is made on the basis of gallonage sold through that channel and, therefore, expenses incurred in advertising through these media are spread to channel on this basis.

Sub D. Radio Advertising

No expense incurred.

Sub E. Transportation Expense

Charged to Account 1075—Year 1937............$752.63

Any transportation expense incurred in the shipment
of advertising material, such as signs, printed matter,
727 etc., is charged to that media. Therefore, transportation
expense as an individual item does not appear separately on our books of account. However, an analysis of our advertising expenditures indicates that of the total charged to Account 1075, year 1937, in Detroit $752.63 was represented by transportation expense.

Sub F. Other Major Items

Other items of advertising expenditure are spread on a gallonage ratio basis to sales channels shown on Form 189, as outlined for newspape[illegible] Major items making up Account 1075 are indicated in the table at the top of page 1.

Detroit Sales Field

Year of 1940

Gasoline Tank Wagon Reseller Sales	67,829,912 gallons
Gasoline Tank Wagon Consumer Sales	12,177,709 gallons

(Letterhead of Standard Oil Company, Chicago, Ill.)

March 18, 1942.

Federal Trade Commission
Washington, D. C.

Attention: Mr. Cyrus B. Austin

Dear Mr. Austin:

Re: Standard Oil Company
Docket No. 4389

Supplementing our discussions and correspondence relative to Commission's Exhibit No. 91 and Commission's Exhibit No. 86, and the testimony of Mr. Raupagh,—all having to do with the number of reseller accounts in the area designated as Detroit, Highland Park, Hamtramck and Dearborn, served by the Standard Oil Company, the Detroit office has made an extensive check of the record and Mr. Raupagh has advised me today as follows:

Outlets served by Standard Oil Company and by the four jobbers involved in this action are tabulated below:

	December 31, 1937	December 31, 1940
Served by Respondent	358	357
Served by Jobbers	94	106
Total	452	463

It appears that there is a misleading inclusion in Commission's Exhibit No. 91 in that the total figure of 430 reseller accounts gives consideration to the jobber outlets. I think the above tabulation will entirely clarify this situation.

785 COMMISSION'S EXHIBIT NO. 128-B.

Federal Trade Commission
March 18, 1942—
p. #2

It may be that the Commission's Exhibit No. 86 will not reconcile in absolute detail even with the above tabulation. This arises out of the fact that in Exhibit 86 outlets are listed which may have been occupied by a particular operator for a month, two or three months, or some short period, and the occupancy may have changed from time to time.

I do feel able to assure you at this time that the above tabulation accurately reflects the actual number of reseller accounts being served by Standard Oil Company and by the jobbers of Standard Oil Products as of the respective dates indicated.

I trust that this will clarify the whole situation,—and I assume that this letter may be considered on the record as an amplification or explanation of the present exhibits in the record. If that does not concur with your views of propriety in making the record, I shall be very glad to prepare an affidavit form, but would, of course, dislike to require Mr. Raupagh to take the stand again simply for the purpose of expressing as a witness that which he has expressed to me and I am reflecting in this letter as the facts, as developed by his office.

In any event, I shall be glad to correct the record in any way that you think is essential, but ask your indulgence in respect of relieving us from the burden of another hearing or asking Mr. Raupagh to again take the stand, if that is possible.

With best personal regards, I am

Sincerely yours,

H. R. Hanley.

Harold R. Hanley/w

This Loss represents loss sustained on Capital Assets at Service Stations which were entirely dismantled and rebuilt into Combination Service and Greasing Stations during the Year 1940.

Standard Oil Company

Docket No. 4389

Methods of Allocating Salesmen's Salaries and Expenses

In the months of December, March, June and September of each year, the Company sets up percentage factors which are used for the allocation of salesmen's salaries and expenses by the channels of outlets, ie: Tank Wagon Reseller, Tank Wagon Consumer, Other Methods, and Automobile Supplies on the Company's Form 189 for the next three ensuing months in each instance. The percentage factors set up by the Company purport to show the percentage of time to be expended by each of the separate employees, by channels, during the three ensuing months.

The separate groups of salesmen as classified by the company and the number of salesmen in each group were shown by the records of June 1940 to be as follows:

Class of Salesmen	Number of Salesmen
Industrial Salesmen	11
Lubricating Engineers	3
Automotive Engineers	1
City Salesmen	6
Reseller Salesmen	26
B. Station Salesmen	6
Asphalt Pro. Salesmen	1
Spec. Salesmen-Reseller	4
Spec. Salesmen Htg. Oil	1
Domestic Htg. Oil Salesmen	4
Total	63

The foregoing tabulation does not include Sales Managers, Assistant Sales Managers or persons engaged in Promotional Activities.

As shown above, out of a total of 63 salesmen in the month of June, 1940, there were 26 Reseller Salesmen.

789 COMMISSION'S EXHIBIT NO. 131-B.

In setting up the percentage factors for the allocation of salaries and expenses of Reseller Salesmen, Mr. Clifford O. Bath, Utility Supervisor of the Accounts Departments, and Mr. William S. Locker, Reseller Sales Manager, of the Standard Oil Company in the Detroit field, sit together and prepare sheets showing the percentage of each man's time which is expected to be expended in sales efforts in the separate trade channels during the three ensuing months. For guidance in setting up the percentages, these gentlemen have before them the percentage allocations set up for preceding periods, together with information as to sales campaigns, etc. for the three months in which percentages are to be used as allocating factors. The percentages thus set up are then submitted to Mr. J. M. Hamer, Asst. Mgr. Reseller of the Detroit field for review and approval. In checking and reviewing the percentages, Mr. Hamer has at his disposal certain information obtained from special salesmen, whose duty it is to travel the field with the regular Reseller Salesmen. It was stated in conference with Mr. Hamer that these special salesmen occasionally make personal notes of the actual time devoted to the separate channels and products by the Reseller Salesmen on those days when they accompany the Reseller salesman.

All of the above information is said by Messrs. Bath, Locke and Hamer to serve as basis for the setting up of the percentage factors for the allocation of Reseller Salesmen's time. In case of other salesmen, the percentage factors are similarly set up giving effect to the opinion of the salesmen or the supervisors and other known pertinent facts which may have a bearing on the situation.

790 COMMISSION'S EXHIBIT NO. 131-C.

As set forth in Respondent's Exhibit 100, Page 7, salesman submit a daily call record report indicating the customer called on and the nature of the call as to outlet channel. However, these daily call reports do not show time spent on each call, or the time spent on the separate channels covered by each call and they do not serve as a basis for setting up the percentage factors.

It will be noted that the call record reports were used as an underlying basis for the assigning of a portion of this class of expense to the Direct Shipment business in the Company's recent cost survey.

FREE GASOLINE

Is To Have This Card PUNCHED EACH WEEK At Any

HI-SPEED GAS STATION

— in —

WAYNE COUNTY

Awards Made Locally Each Week by

Wilson Oil Corp. — Detroit
Highland Oil Corp. — Detroit

HOW TO WIN FREE GASOLINE

Every Motorist Has An Equal Opportunity To Win A Weekly Award Simply By Driving Carefully and Keeping This Card Punched Each Week. ANY GOOD DRIVER MAY WIN!

— RULES AND REGULATIONS —

HOW WINNERS ARE SELECTED:

Acts of good driving, such as making proper arm signals, heeding traffic signs, or other evidences of good driving, are reported daily to the "SAFETY LEGION" by official and voluntary observers throughout the territory.

Disinterested judges will make weekly selections. Judges' decisions shall be final, and they may make the award on the basis of one outstanding act of courtesy or good driving, or for a series of such acts, or for whatever in their opinion is worthy of recognition as a contribution to better driving. In case of ties, duplicate awards will be made.

HOW TO QUALIFY:

"SAFETY LEGION" awards will be made weekly by the awarding company to the motorists selected, provided such motorists have qualified to receive such award as follows:

1. By having driven into a Hi Speed Station in the participating territory and had this card punched by the attendant during the week preceding noon of the day of the award.
2. By presenting qualifying card bearing owner's license number so punched or qualified, with suitable means of identification and satisfactory evidence of ownership of the motor vehicle bearing the license number selected to the office of the awarding company within 24 hours after the selection of the award; provided, however, that if the motorist to whom license for said automobile has been issued is contacted by company representative at any time within said 24 hour period and is requested to produce qualifying card to said representative, failure to immediately present or, in the presence of company representative, to immediately locate and present this card shall terminate the right of all persons to any award hereunder. Failure to comply with all qualifications herein provided shall operate to forfeit motorist's right to any award hereunder.

The motor vehicle numbers showing selections of "SAFETY LEGION" judges shall be posted at the service stations. Awarding company may sub-divide awards at its discretion.

Employees of the awarding company or of the service stations shall not be eligible or qualified to receive any award. Decisions of the awarding company shall govern as to the interpretations of these rules and as to all matters or conflicts arising and not embraced in these rules and regulations. Acceptance of this qualifying card is your acceptance of each and all the rules and regulations herein contained.

Your rights are governed by these rules—read them carefully.

EXPLANATION OF FLOW CHART AND REMARKS CONCERNING SALE AND DISTRIBUTION OF GASOLINE

The gasoline marketing structure of the oil industry is an intricate pattern of individuals and concerns, large and small, engaged in one or more of the numerous functions of taking the product from the refiner to the consumer. There are numerous methods of distribution and numerous operations within these methods and there are distributing set-ups in which the functions overlap. Working from the refiner to the consumer, these functions, from the standpoint of the individual or concern performing the function, are as follows:

(1) REFINER Some refiners dispose of their gasoline f.o.b. the refinery, while others own and operate bulk distributing stations. Others add the operation of retail outlets to their distributing functions. Others sell their gasoline through brokers, or direct to bulk distributors. Tanker, tank car, barge, and transport truck are used in this movement.

(2) CARGO OR BULK TERMINAL OPERATOR This type of operator owns or operates only the bulk terminal and purchases in large quantities, such as cargo lots and pipe line tenders and generally resells to bulk distributors (jobbers) usually making deliveries by tank car or transport truck.

(3) BULK TERMINALS Gasoline is received at bulk terminals usually in cargo lots or through pipe line tenders. These facilities may be owned by a fully integrated company, or a semi-integrated company, or jobber. From the bulk terminal the gasoline may be loaded into tank cars, barges or transport trucks for shipment to bulk plants, jobbers, trackside service stations, or commercial consumers.

(4) JOBBER WITH BULK PLANT FACILITIES A marketer maintaining bulk storage of tank car or barge lots and purchasing gasoline in barge, tank car or transport truck quantities for resale through retail outlets and commercial consumers. This is the most widely accepted definition of Jobber (sometimes called Bona-Fide Jobber).

(5) BULK DISTRIBUTING PLANTS Gasoline is received at bulk distributing plants in tank cars, barges and transport trucks direct from the refinery or bulk terminal. These facilities may be owned by a fully integrated company, or a semi-integrated company, or a jobber. From the bulk distributing plant gasoline is usually delivered to retail outlets or commercial consumers in tank wagon lots.

(6) "JOBBER" WITHOUT BULK PLANT FACILITIES This type of jobber is a marketer purchasing gasoline in tank truck or transport truck lots from bulk distributing plants for delivery or resale to retail outlets and commercial consumers. As a usual thing, this type of jobber either owns or controls a group of retail outlets and because of the ownership of these facilities buys his gasoline on a jobber basis. He may market the gasoline under an independent brand name, or may market under the brand name of the company from whose bulk plant he is drawing his supplies, notwithstanding the fact that the supplying company is also marketing in the same locality. He may also own bulk plant facilities, while drawing his gasoline supplies from another company's bulk distributing plant. The term "Jobber Without Bulk Plant" is a contradiction in terms but is here so stated because of the prevalence of this classification with some marketers. Other marketers may class such operators as "Peddlers" (8).

(7) TRUCK DRIVER
(8) PEDDLER
(9) RETAIL OUTLET
(10) SERVICE STA TION CONSUME
(11) COMMERCIAL CONSUMER

(7) TRUCK DRIVER This function is generally carried on by the bulk plant operator or jobber and includes the delivery of gasoline direct to retail outlets and commercial consumers by salaried truck drivers and commission truck drivers. In some cases, the commission truck driver owns or controls retail outlets and in other cases he functions primarily as a peddler in rural territories.

(8) PEDDLER Usually an individual who owns his own tank trucks and purchases his gasoline requirements in truck loads from bulk distributing plants. Gasoline is resold by him (peddled) to commercial consumers and retail outlets.

(9) RETAIL OUTLET The dealer operating the retail outlet receives his gasoline usually in tank wagon lots from the bulk distributing plant; in other cases he is supplied in transport truck lots direct from the refinery or terminal and in the case of trackside outlets, gasoline is received in tank car quantities. Some retail outlets are operated on a so-called company basis, i.e., the operators are compensated by salary or commission. From the retail outlet, gasoline is delivered into automobile tanks of S/S consumers (10).

(10) SERVICE STATION CONSUMER Usually an automobilist who purchases his gasoline direct from the retail outlet. Other service station consumers are individuals or companies engaged in commercial activities and buying through retail outlets.

(11) COMMERCIAL CONSUMER Usually large commercial consumers operating fleets of auto trucks in the transportation or delivery of passengers, merchandise, freight or express and having underground storage facilities for the handling of gasoline and who purchase their requirements in tank wagon lots. There are some commercial consumers who maintain tank car storage and purchase their gasoline requirements direct from refinery in tank car or transport lots. Farmers and other individuals buying from tank wagons are also classified as commercial consumers.

BROKER: The broker is occasionally an intermediary in transactions between marketers, functioning in one or the other marketing operations. This function is the usual function of a broker — namely, to bring the buyer and seller together.

NOTE: *Many of the functions in the flow under (2), (3), (4) and (5) which are identical are repeated in full for the purpose of clarity.*

Total	.689	.160	.529

879 RESPONDENT'S EXHIBIT NO. 31-B.

Explanation and Procedure Used in Determining Differences in Marketing Cost Incurred by the Standard Oil Company of Indiana in Serving Ned's Auto Supply Units With Our Equipment—September, 1936 Through February, 1938.

I. Delivery Cost Differences

1. Coal per delivery on a full load basis.

A. Labor Cost Differences

a. Source of information: Forms 018 showing size of dump and time for delivery by trucks No. 34270 and 29525, year 1940. The cost per hour of 95.2¢ was obtained from the Detroit Division which reflects maximum under union contract.

b. Procedure: A sample of Form 018 tickets for full load deliveries on which time consumed in making the delivery could be determined accurately, was studied to measure driver's time per load. Any questionable time periods, such as those that might include a lunch period, were omitted. On this basis, the following calculations were made:

Truck Number	34270	29525	Average
Number of 018's studied	94	200	
Number of gallons	143,162	308,400	451,562
Time in minutes	6,043	14,925	20,968
Gallons per hour	1,421.4	1,239.6	1,292.4
Cost per hour—Driver's Salary	95.2¢	95.2¢	95.2¢
Cost per gallon	.0670¢	.0768¢	.074¢
Plus 3% Federal Insurance and Unemployment Tax			.002
			.076¢

RESPONDENT'S EXHIBIT NO. 31-C.

2. Cost per delivery on an average reseller dump basis.

a. Source of information: Tank truck efficiency reports maintained in the Detroit Division for the months of December, 1939 and March, June, and September, 1940. These months were used because the reports indicated above were compiled only on a quarterly basis.

b. Procedure: In order to obtain driver's salary cost per gallon for delivering gasoline to the average reseller in Detroit in the year 1940, the total delivery time of trucks used for gasoline only out of Scotten, Lycaste, and North Detroit plants was used. These plants were selected because they were the source of supply for Ned's Outlets in 1937. This time was extended by 95.2¢ per hour the prevailing wage to tank truck drivers in Detroit, and divided by the volume delivered to secure a labor cost per gallon.

	Scotten Avenue	Lycaste	North Detroit	Total
Hours (1006-2006)	4,510	2,085	1,398	7,993
Hourly cost—Driver's salary	95.2¢	95.2¢	95.2¢	95.2¢
Cost for total time	$4,293.76	$1,984.92	$1,330.90	$7,609.58
Gallons delivered	3,918,796	1,763,060	1,195,109	6,876,965
Cost per gallon	.110¢	.113¢	.111¢	.111¢
Plus 3% Federal Insurance and Unemployment Tax				.003
				.114¢
Savings in Driver's Salary Cost for Delivery to Ned's				.038¢

881 RESPONDENT'S EXHIBIT NO. 31-D.

B. Equipment Cost Differences

1. Source of information: Maintenance costs were obtained from Machine Shop records.

Depreciation rates used are those established by the Company.

Goods used—consolidated manufacturing cost, actual transportation and State and Federal taxes.

2. Procedure: The operating and maintenance costs on the same two trucks, Nos. 34270 and 29525, were compiled from the above sources for the full year 1940. Annual costs divided by hours of operations gave an equipment cost per hour. The per-hour cost of operation was divided by hourly outputs to obtain the per-gallon cost on a full dump delivery basis and the per-gallon cost while serving all resellers.

Truck Number	34270	29525
Investment—Chassis	$2,437.49	$3,007.37
Investment—Tank	738.73	550.97
Depreciation on chassis @ 12%	292.50	360.88
Depreciation on tank @ 5%	36.94	27.55
Gasoline used—1,887 gal. @ 9.84¢ per gal.	185.68	
2,589 gal. @ 9.84¢ per gal.		254.76
Motor Oil used—77 qts. @ 3.77¢ per qt.	2.90	
112 qts. @ 3.77¢ per qt.		4.22
License	139.75	152.25
Casing, Tube, and Battery repairs	37.89	40.13
Machine Shop repairs	225.04	243.21
Miscellaneous expense	20.46	39.73
Total Cost	$ 941.16	$1,122.73

RESPONDENT'S EXHIBIT NO. 31-E.

Analysis of Form 018 indicated that the time per ticket by Truck No. 34270 was 64.3 minutes on full dump deliveries and 87.8 minutes on multiple dumps. Comparable time consumed by Truck No. 29525 in making a full dump delivery was 74.6 minutes; on multiple dumps, 107.8 minutes. Calculations were as follows:

Truck Number	34270	29525	Average
Single Dumps			
Number of tickets	94	200	
Time consumed, minutes	6,043	14,925	
Time per ticket, minutes	64.3	74.6	71.3
Multiple Dumps			
Number of tickets	130	210	
Time consumed, minutes	11,412	22,654	
Time per ticket, minutes	87.8	107.8	100.2
Total Time for Deliveries			Total
Single dump			
34270—190 @ 64.3 min.	12,217		12,217
29525—618 @ 74.6 min.		46,103	46,103
Multiple dump			
34270—1172 @ 87.8 min.	102,902		102,902
29525—872 @ 107.8 min.		94,002	94,002
Total minutes	115,119	140,105	255,224
Total hours	1,919	2,335	4,254

883 RESPONDENT'S EXHIBIT NO. 31-F.

Total Equipment Cost

Truck No. 34270

$$\frac{\$\,941.16}{1{,}919} = 49.04¢ \text{ per hour.}$$

Truck No. 29525

$$\frac{\$1{,}122.73}{2{,}335} = 48.08¢ \text{ per hour.}$$

Total

$$\frac{\$2{,}063.89}{4{,}254} = 48.52¢ \text{ per hour.}$$

The average equipment cost per hour on the above trucks was divided by the average hourly output for single dump deliveries as determined from our sample analysis, which resulted in a cost per-gallon as follows:

Average Hourly Cost	48.52¢
Average Hourly Output	1,292.40 gallons
Average Cost per Gallon	.038¢

To secure the equipment cost per gallon for delivery to the rank and file of retail outlets, the annual cost for the two trucks was divided by the total annual output.

Annual Cost	$2,063.89
Total Annual Output	4,228,839 gallons
Average per Gallon Cost	.049¢

Savings in Equipment Cost for Delivery to Ned's... .011¢

RESPONDENT'S EXHIBIT NO. 31-G.

II. Marketing Expense Items Not Influenced By Ned's Auto Supply Company.

A. Sales Promotion.

Our business association with Ned's Auto Supply Company was such that this Company assumed no responsibility for sales promotion activity. Accordingly, the following expense items which are allocated to our various channels of marketing upon a distribution of time basis were taken from Form 189, "Comparative Statement of Expense," for the year 1937 and divided by tank wagon reseller gallonage, excluding volume sold to Ned's Auto Supply Company, to secure the marketing cost saving on a per gallon basis.

Account No.	Explanation	Amount
1002	Salaries—Sales Promotion	$ 6,597.25
1003	Salaries—Sales Promotion Others	3,294.42
1243 & 1244	Federal Insurance and Unemployment Insurance Taxes (3% of the above salary items)	296.75
1031	Traveling Expense—Sales Promotion	235.92
1046	Operation and Maintenance of Vehicles—Sales Promotion	161.41
1101	Depreciation Expense—Vehicles—Sales Promotion	80.00
	Total Expense	$10,665.75

Total Reseller Gallonage, excluding the volume of Ned's Auto Supply Company 66,388,527 gallons

Sales Promotion Expense Not Incurred............ .016¢

885 RESPONDENT'S EXHIBIT NO. 31-H.

B. Other.

In addition to the Sales Promotion items of expense, there are certain other marketing expense items of an overhead nature not influenced by Ned's Auto Supply business. These are:

Account No.	Explanation	Amount
1001	Salaries—Supervision—Others	$ 4,550.06
1215	Expense—Salaries—Others	8,912.32
1243 & 1244	Federal Insurance and Unemployment Insurance Taxes	403.87
1054	Operation and Maintenance of Vehicles—All Other (Other Than Office)	280.89
1066	Miscellaneous Operating Expense	40,142.68
1084	Station Safety Expense—Salaries and All Other Expenses	1,343.24
1205	Office Expense — Operation and Maintenance of Vehicles—Office Automobiles	221.63
1216	Expenses—Traveling Expenses—Others	372.22
1217	Expenses—Operation and Maintenance of Vehicles—Automobiles—Others	534.22
1220	Expenses—Employment Department—Salaries and All Other Expenses	2,231.16
1107	Depreciation Expense of Vehicles—All Other (Other Than Office)	193.86
	Total-Expense	$59,186.15

The Federal Insurance and Unemployment Insurance taxes of 3% were not applied to items 1084 and 1220 as these expenses include cost other than salary expense.

Wherever possible any of the above expense items are charged directly to the channels affected. However, the major portion of these expense items are prorated on a straight gallonage basis among channels. The tank wagon volume delivered to Ned's Auto Supply was included in the gallonage used to prorate these items to our marketing expense statement, Form 189, therefore the above items were divided by the sum total of the reseller gallonage in the Detroit field for the year 1937, or 70,629,027 gallons.

Other Marketing Expense Items Not Influenced by Ned's Auto Supply Company .... .084¢

III. Semi-Direct Expense Items Not Incurred in Handling the Volume of Ned's Auto Supply Company.

In addition to the above marketing expense items, there are others of a semi-direct nature tending to vary with gallonage which are not influenced by sales to Ned's Auto Supply Company. These expense items are charged direct wherever possible, however, in the case of sub-account #1087, 1088 and 1204 some portion is of necessity handled on a pro rata basis. For this reason these expense items are divided by total reseller gallonage of 70,629,027 gallons.

Account No.	Explanation	Amount
1087	General Supplies Used	$ 1,258.94
1088	Station Operating Tools and Equipment	6,013.23
1204	Office Expense Exchange	6,181.50
	Total	$13,453.67

Saving $13,453.67
70,629,027 .... .019¢

887 RESPONDENT'S EXHIBIT NO. 31-J.

The following items, also of a semi-direct nature, are charged direct to the various sales channels, no one of which would be influenced in its magnitude by volume sold to Ned's Auto Supply. Our divisor in this case, therefore, should be the volume of the reseller channel excluding sales to Ned's Auto Supply.

Account No.	Explanation	Amount
1510	Losses by Bad Debts	$2,782.73
1511	Expense Collecting Bad Debts—Current Year	139.69
1512	Expense Collecting Bad Debts—Prior Years	437.31
1400	Bad Debts Collected—Written Off Prior Years	*4,900.73
	Total	*$1,541.00

Saving *$1,541.00

66,388,527 .... *.002¢

Net Saving from Semi-Direct Items................ .017¢

* Denotes red figures.

IV. Selling Cost.

In order to determine the savings in selling expense incurred in serving Ned's Auto Supply Outlets, information was obtained from the Detroit Division covering the salesmen calling on Ned's Auto Supply during the year 1937, together with the expense incurred. The names of the salesmen, together with salary and traveling expense incurred while on the territory covering Ned's Outlets, were obtained from the Detroit office.

RESPONDENT'S EXHIBIT NO. 31-K.

1. Source: Salary—payroll records.

Traveling expense—Form 028, Expense Books.

Salesman	Salary Including 3% Insurance and Unemployment Tax	Traveling Expense	Total
L. L. Robinson—3½ months	$ 767.87	$ 50.75	$ 818.62
T. G. Meulenberg—4 months	1,060.90	108.25	1,169.15
Paul Coutchie—4½ months	1,017.38	139.27	1,156.65
Total	$2,846.15	$298.27	$3,144.42

This total was added to car expense, which was obtained as follows:

The investment in salesman's cars in the Detroit Division, year 1937, according to investment records, was $43,085.

Number of salesmen, W. H. Tell's records	69
Average investment per car	$624.42
Total(account #047 taken from Detroit 189, year 1937	$24,525.71
$\frac{\$24,525.71}{\$43,085.00}$ = Maintenance cost per $1.00 investment	56.92¢

Depreciation rate equals 20%, computed according to the Company depreciation rates. Therefore, maintenance cost of each car equals:

$624.42 x 20%	$124.88	Depreciation
$624.42 x 56.92¢	355.42	Operating and Maintenance
Total Operation cost per vehicle	$480.30	

889 RESPONDENT'S EXHIBIT NO. 31-L.

This amount, extended by the time for each individual, is as follows:

L. L. Robinson 3½ mo., 29.17% x $480.30	$140.10
T. G. Meulenberg 4 mo., 33.33% x $480.30	160.09
Paul Coutchie 4½ mo., 37.50% x $480.30	180.11
	$480.30

Total for each salesman:

Salesman	Salary Including 3% Insurance and Unemployment Tax	Traveling Expense	Car Expense	Total
L. L. Robinson	$ 767.87	$ 50.75	$140.10	$ 958.72
T. G. Meulenberg	1,060.90	108.25	160.09	1,329.24
Paul Coutchie	1,017.38	139.27	180.11	1,336.76
Total	$2,846.15	$298.27	$480.30	$3,624.72

However, not all the time of these individuals was spent on calling on Ned's accounts. It was estimated by Mr. Raupagh and Mr. Blough that Robinson spent 35% of his time at Ned's, of which 7% was on gasoline; Meulenberg spent 25%, of which 5% was on gasoline; Coutchie spent 25%, of which 5% was on gasoline. Using these percentage figures against expenses for each of the individual salesman's expense shown above results in a total selling expense for covering Ned's Auto Supply Outlets of $200.41. This expense, divided by Ned's gallonage of 4,240,500 gallons, equals a selling cost at Ned's Outlets amounting to .005¢ per gallon.

Selling Expense Incurred on Reseller Gallonage Other Than Ned's.

1. Source: Reseller channel Form 189, Detroit field, year 1937.

RESPONDENT'S EXHIBIT NO. 31-M.

Account No.	Explanation	Amount
1004	Salaries—Salesmen, including 3%	$42,115.74
1032	Traveling Expense—Salesmen	3,988.70
1047	Operation and Maintenance of Vehicles—Salesmen	4,740.65
1102	Depreciation Expense—Vehicles—Salesmen	1,646.00
	Total	$52,491.09

Deducting Ned's expense of $200.41 leaves a total selling expense for reseller gallonage amounting to $52,290.68. This amount, divided by tank wagon reseller gallonage other than Ned's, amounting to 66,388,527, equals .079¢ per gallon.

The saving in selling expense equals...... .079¢ per gallon
Less .005

Saving per gallon.................................. .074¢

V. Dispensing Equipment Loaned.

1. Source: (Obtained from the Detroit Office Form 16)

Total capital investment in equipment at Ned's		$2,878.60
Company depreciation rates at 4%	$115.14	
Detroit Personal Property tax rate of $3.0146 per $100	86.78	

In order to obtain the maintenance cost per dollar of investment, the depreciation expense shown on Equipment Loan Agreement equipment—Detroit Form 189—of $4,305.86 was expanded to 100% to represent the investment in E.L.A. equipment, which amounted to $107,646.50. On this investment, $17,144.69 was spent for maintenance repairs, etc. This equals 15.9¢ cost per dollar of investment. Ned's investment of $2,878.60 extended by this maintenance cost equals $457.70.

891 RESPONDENT'S EXHIBIT NO. 31-N.

These three items total $659.62, which when divided by Ned's gallonage of 4,240,500 gallons, equals . .016¢ per gal.

Average Reseller Equipment Cost.

1. Source: Form 189, Detroit Division, year 1937.

Account No.	Explanation	Amount
1070*	E.L.A. Expense	$17,144.69
1111	Depreciation Expense—E.L.A.	4,305.86
1513	Losses by Dismantling—Out of Pocket Expense—E.L.A.	672.31
	Personal Property Taxes $107,646.50 x $3.0146	3,245.11
	Total	$25,367.97
	Less Ned's	*659.62
	Net Total Expense	$24,708.35

---

* Denotes red figures.

This expense was incurred on accounts signed on agreements Nos. 461 and 385. The gallonage distributed by these outlets was secured by deducting the volume sold by Ned's Auto Supply Company, Company Owned Service Stations—Leased, and Privately Owned Service Stations—Leased from the total tank wagon sales through the reseller channel. The residual volume was 26,987,052 gallons.

Cost per gallon $\frac{\$24,708.35}{26,987,052}$ . . . . .092¢

Saving . . . . .076¢

VI. Advertising Cost.

The following expense items, taken from Form 189, tank wagon reseller channel, were divided by tank wagon reseller gallonage for the year 1937. The advertising expense incurred at Ned's Outlets, together with the gallonage sold at these outlets, were deducted from both the cost and volume figures. The results were as follows:

Account No.	Explanation	Amount
1005	Salaries—Advertising $3,637.34 plus 3%	$ 3,746.46
1033	Traveling Expense—Advertising	246.61
1048	Operation and Maintenance of Vehicles—Advertising—Passenger Cars and Trucks	360.16
1103	Depreciation Expense—Vehicles—Advertising—(Excluding Advertising Trucks)	107.90
	Total	$ 4,461.13
1075	Advertising Costs—Other Costs (Including ELA)	154,635.04
	Total	$159,096.17
	Deduct: Cost of Advertising at Ned's	1,065.42
	Net Cost	$158,030.75
	Divided by reseller gallons, excluding Ned's Auto Supply Company, 66,388,527	.238¢ per gal.

Advertising Expense Incurred at Ned's Outlets.

1. Procedure: A list of dealer signs and other advertising material was obtained from the Advertising Representative in the Detroit Division. It was considered that all the expense occasioned by this equipment was chargeable to gasoline except the 28 x 44 frames, and to some extent, therefore, our figures are over-estimated due to

the fact that some of the expense should have been charged to other products. The cost on these items was obtained from Mr. Bay in the Advertising Department. The computation is as follows:

4 Standard Service signs @ $75.00	$300.00
1 Standard Service Sign @ $50.00	50.00
2,000 maps x 4 @ 1.79¢ each	143.20

Point of sale material, according to the Advertising Department, was allotted to each field on an outlet basis. Therefore:

Banners	$15,504.95
Games	97,424.76
Displays	30,463.81
Total Field	$143,393.52

This figure, divided by the total outlets in the Company, equals $6.33 per outlet:

$6.33 x 4		$ 25.32 applicable to Ned's
$750.00 sign, period 19 months, 12/19 x $750.00		473.68
Jewel Globes		
3 pumps at 3 outlets	9	
5 pumps at 1 outlet	5	
	14 @ $5.23 per globe	73.22
Total Advertising Expense at Ned's		$1,065.42

Divided by Ned's gallonage of 4,240,500 equals .... .025¢ per gal.

Saving on Advertising Expense.................... .213¢

RESPONDENT'S EXHIBIT NO. 31-Q.

VII. Schedule of Marketing Expense Items Incurred on Both Ned's Auto Supply Volume and Regular Reseller Channel But to a Lesser Extent on Ned's Volume Than on Regular Tank Wagon Reseller Business.

No exact allocation of these items can be made. It is our opinion, based on knowledge of the functions for which these items of expenditure were incurred, that our regular reseller business is responsible for a greater portion of this cost than would be represented by the proportion of gallonage done through these regular outlets. They are enumerated separately to show the conservative nature of the cost comparison set forth in Exhibit "A".

Account Number	Explanation of Expense	Amount
1000	Salaries—Supervision	$ 33,760.06
1008	Salaries—Warehouse Labor	21,913.36
1030	Traveling Expense—Supervision	3,154.13
1040	Misc. Expense—Agents and Drivers	1,394.17
1045	Oper. and Maint. of Vehicles—Supervision	2,582.96
1060	Plant Maintenance	14,658.41
1062	Water, Light, Fuel (Other than Main Office)	15,298.57
1082	Personal Injury Expense—Company Employees	808.31
1200	Office Expense—Salaries Accounting	81,481.10
1201	Office Expense—Stationery and Office Supplies	6,469.24
1202	Office Expense—Postage	9,329.83
1203	Office Expense—Telephone and Telegraph	7,116.15
1206	Office Expense—All Other—Water, Light, Fuel, Rent, etc.	5,601.61
1208	Credit Information Expense	2,505.05
1225	Expense—Salaries—Sub-Station Auditors	4,723.97
1226	Expense—Trav. Exp.—Sub-Station Auditors	616.28
1227	Expense—Oper. & Maint. of Vehicles—Sub-Station Auditors	867.15
1100	Depr. Exp.—Vehicles—Supervision	1,134.64
1228	Depr. Exp.—Vehicles—Office and Sub-Station Auditors	910.46
1110	Depr. Exp.—Plant (Bldg., Mach., Equip., Furn. & Fixt.)	67,176.09
1112	Depr. Exp.—Real Estate Improvements	4,367.09
1530	Employees Stock Purchasing Plan—Co. 50% Deposit	9,962.51
	Total	$295,831.14

$$\frac{\$295{,}831.14}{70{,}629{,}027 \text{ gals.}} = .42¢ \text{ per gal.}$$

896 RESPONDENT'S EXHIBIT NO. 33-A.

Schedule "B".

Cost Justification of a Jobber Differential Price 1.5¢ Below Tank Wagon Dealer Price Detroit.

		Cost per Gallon 1940	Cost per Gallon 1939

3. Differential Cost		1.47¢	1.56¢

897 RESPONDENT'S EXHIBIT NO. 33-B.

Schedule "B"—Cost Justification of a Jobber Differential Price 1.5¢ Below Price to Dealers.

Schedule "B" is set up on the basis of Form 189 costs, tank wagon reseller channel, for the year 1940. It represents distribution costs incurred in the entire Detroit field at both salaried and commission points.

1. Tank Wagon Reseller Marketing Cost Year 1940	1.72¢ per gal.

Source: Form 189, Detroit Field, 1940
Form 439, Year 1940

Procedure: The total reseller tank wagon expense for the year 1940 amounted to $1,145,399.13. To this amount the direct leased service station expense applicable to tank wagon reseller gallons was added. This expense was obtained as follows:

Total Leased Service Station Gallons	54,255,291
Leased service station tank wagon gallons (excluding motor oil and grease gallonage) Form 439	53,406,269
Per cent to total	98.44%

The leased service station expense for the year 1940 amounting to $48,506.44 times 98.44% = $47,749.74 expense applicable to the tank wagon reseller channel.

Total expense:

Reseller tank wagon	$1,145,399.13
Leased service station	47,749.74
Total	$1,193,148.87

This amount divided by total reseller tank wagon gallons of 69,301,586 results in a cost per gallon amounting to 1.72¢.

2. Jobber Marketing Costs

At the termination of the year 1939, this department was given an assignment of determining the profitability of jobber operation in the State of Oklahoma. To the best of our knowledge there is no other time and cost analysis of doing business through jobber outlets. Inasmuch as our accounting, selling, and other marketing procedures are comparable among the various fields, we see no reason why expenses of distributing through Oklahoma jobbers do not result in a fair evaluation of costs of doing business through this type of account.

This study was based on actual time spent with various jobbers on the part of managers, assistant managers, special representatives, and other members of the supervisory staff as reported on expense statements, Form 028. Accounting costs were determined on the basis of estimates by various accounting department heads of time required in handling the sales tickets representing this volume.

a. Accounting Costs

Total accounting cost in the Kansas City and Wichita fields for the year 1939, according to a separate analysis of sales tickets and time estimates by department heads, equalled $2,226.32. This expense was divided by 2,166,168 gallons, the volume moving through these accounts, resulting in an accounting cost per gallon of .10¢.

b. Credit Cost

Credit cost was handled in much the same manner. Actual cost of securing credit reports for the various accounts, time spent by the Credit Department in analyzing

899 RESPONDENT'S EXHIBIT NO. 33-D.

the credit risks of the various jobbers, collection costs, etc., totalled for the Kansas City and Wichita fields $604.45. This amount was again divided by the volume of 2,166,168 gallons for a resultant cost per gallon of .03¢.

c. Supervision and Selling Cost

Actual time expended by management, expenses as shown on Form 028 plus salesmen's salaries, car and traveling expenses were secured from the Kansas City and Wichita fields. This total expense was allocated according to the field's estimate of time devoted to each product to secure the cost of this marketing function. Total product cost for gasoline and refined oil was then divided by these gallons sold to obtain a cost per gallon.

		Supervision and Selling Cost Gasoline and Refined Oil	
	Total	%	Cost
Kansas City	$4,922.38	[illegible]5	$ 738.36
Wichita	5,822.62	32	1,863.24
Total			$2,601.60
Total Refined Oil and Gasoline Sales Volume			4,206,686
$\frac{\$2,601.60}{4,206,686} = .06¢$ Cost per Gallon			.06¢

d. General Office Expense

Cost for the Sales Promotion—Tank Car Sales—Refined Oil and Gasoline Department of the General Office was available for the first six months of 1939 after which time it was combined with the Refined Oil, Tractor Fuel, and Gasoline Price Department. The costs for the first six months, therefore, were doubled and divided by the annual sales volume of Refined Oils, Tractor Fuel, Gasoline and Naphthas to secure a per gallon cost.

Cost for first 6 months, 1939	$ 9,223.08
Cost for full year	18,446.16
Volume of sales for year	190,845,750
Cost per gallon	.01¢

e. Point of Sale Advertising

An itemization of all advertising signs, jewel globes, and maps used was supplied by the General Office and fields' Advertising Departments. The calculations were:

	Kansas City	Wichita	Total
Signs, Jewel Globes, etc.	$ 851.15	$ 583.35	$1,434.50
Maps	247.33	329.09	576.42
	$1,098.48	$ 912.44	$2,010.92
Sales of Gasoline and Refined Oil	2,520,543	1,686,143	4,206,686
Cost per Gallon			.05¢

World's Largest Independent Firestone Dealer
Ned's Auto Supply Company
Office 905 Hudson Avenue

Madison 4114 Detroit, Michigan

August 27, 1936

Standard Oil Co.
Detroit, Michgan

Attention: Mr. P. A. Raupagh

Dear Sir:

This is to advise you that a competitive major oil company recently submitted to us a gasoline contract carrying a substantially larger margin of profit that we now enjoy from your company.

It is our present intention to act upon this offer and accept same.

Cordially yours,
Wm. Gershenson
for Ned's Auto Supply Co.

WMG:O

955 RESPONDENT'S EXHIBIT NO. 46.

February 14, 1938.

Standard Oil Company
1011 Fourth Avenue
Detroit, Michigan

Gentlemen: For some time past, ~~we have~~ felt that our volume entitled us to tank car prices. Our ideas on the subject were given added impetus and confirmation when, as you remember, we were approached in August, 1936, by representatives of the Red Indian Oil Company with tank car prices, at truck delivery, and Shell Petroleum with a better deal; both with a view to changing to their respective brands. Because of our long association, we naturally advised you of the situation and the ensuing discussions resulted in our letter agreement of August 27, 1936, and your promise to give consideration to our receiving tank car prices at an early date.

Present plans for expansion, when consummated, will result in a substantial increase in our volume, and we feel that in view thereof, to expect us to continue on the present basis, involves an unreasonable sacrifice on our part.

We, therefore, request that you give immediate consideration to the desirability of continuing as our gasoline supplier, but at tank car prices. Otherwise, we shall be compelled to re-open negotiations with other suppliers.

Very truly yours,
Ned's Auto Supply Company
Wm. Gershenson.

956 RESPONDENT'S EXHIBIT NO. 47.

Red Indian Oil Company, Inc.
12401 Cloverdale Avenue
Detroit, Michigan

April 30, 1941.

Neds Auto Supply,
9465 Grand River,
Detroit, Mich.

Atten: Mr. Getterman

Gentlemen:

Confirming our conversation, we had discussed the matter of supplying you with gasoline with our source of supply, and we were authorized to offer you the following jobbers proposition on Fleet Wing gasoline last fall.

The tank wagon price on Fleet Wing, Golden Motor, Regular, was then .081 per gallon. Off this tank wagon price we were to allow you jobbers discount of .017, which would bring your price to .06225 per gallon.

In addition thereto, we would allow you .001 per gallon to haul gasoline out of our pipe line terminal and also an advertising allowance of .25 points per gallon on all regular and Ethyl gasoline purchased from us. Our Ethyl gasoline is shipped from Toledo refinery, and if you wish to haul that product from Toledo the hauling allowance would be .004 per gallon.

Very truly yours,
Red Indian Oil Company
I. B. Dworman.

Dear Sir:

This is to confirm the oral information I gave you this morning:

That, as of today (December 23), we received a quotation from the Gulf Refining Company, on tank car prices, of their brand name gasoline of 6.6¢ per gallon, delivered at our bulk plant.

Very truly yours,
C. H. Gershenson
Ned's Auto Supply Co.

14340 Michigan Ave. at Schlaff, Dearborn, Mich.

Dear Friend:

Its an old saying "That a penny saved is a penny earned" we are going one better—here's (two pennies) and its just what you save every time you get a gallon of gasoline at our station.

Yes sir, 2¢ off the price of every gallon of gasoline and a big discount on all other items, if you display the red sticker on your windshield. Trusting to see you soon, we are,

Sincerely yours,
Langers.

Total	.557¢	.160¢	.397¢

993 RESPONDENT'S EXHIBIT NO. 96-B.

Respondent's Exhibit 31 "A" Modified to Exclude the Influence of Newspaper and Billboard Advertising

It is our contention that advertising in the form of newspapers and billboards should be regarded as a direct charge against regular tank wagon re-seller gallonage, no part of which should be allocated against business which might be secured in a given community through wholesale distributors such as Ned's Auto Supply Company because:

(a) Ned's Auto Supply Company does its own newspaper advertising from which our products receive a direct benefit. Actually, Ned's Auto Supply Company does derive a benefit from our newspaper insertion. However, we derive a reciprocal benefit from their emphasis of our merchandise.

(b) A study of the allocation of our advertising expenditures among the various fields indicates that our expenditures in the Detroit area bears a lower relationship to potential than any other field.

(c) Because Ned's Auto Supply Company outlets are large and popular distributors of many other lines of merchandise calling for and resulting in a heavy traffic across their driveways, the presence of our merchandise on those driveways results in a derived advertising benefit to both our gasolines and motor oil in the Detroit area.

(d) Our advertising expenditures are to convince customers in the merits of our products and services. Custom-

994 RESPONDENT'S EXHIBIT NO. 96-C.

ers are associated with a company and brands. An outlet allocation is a practical impossibility.

(e) To the best of my knowledge we have never, either by newspaper or billboards, advertised to acquire wholesale outlets.

(f) Expenditures for newspaper and outdoor advertising were not increased with the acquisition of this account nor would they be reduced with the loss of this account. The loss would be more likely to result in an increase of expenditures than a decrease.

If, however, in the opinion of the Commission it be necessary to take out of advertising cost figures all expenditures through newspapers and outdoor billboards, the cost per gallon of point-of-sale type advertising in the regular tank wagon re-seller channel would be modified as follows:

Newspapers	$76,120.84
Posters	11,256[illegible]9
Total	$87,377.33

If this cost were removed from the net cost of advertising as shown on Respondent's Exhibit 31 "O" equalling $158,031.75 the residual amount of $70,653.42 would be chargeable to the tank wagon reseller volume of 66,388,527. The cost of advertising for the regular tank wagon reseller business, therefore (excluding newspaper and billboards) would be .106¢.

Advertising cost incurred at Ned's Auto Supply Company .025.

Distribution Cost Analysis

Tank Wagon Reseller Channel Versus Jobber Gasoline Sales

Explaining Regular Costing Procedure
Detroit Field—1940

1001 Explanation of Allocation of Marketing Expenses to Channels Shown on Comparative Statement of Expense Form 189.

Schedule #1.

Salesmen and Sales Promotion Expense

Salesmen

Account 004—Salaries—Salesmen
Account 032—Traveling Expense—Salesmen
Account 047—Operation and Maintenance of Vehicles—Salesmen
Account 102—Depreciation Expense—Vehicles—Salesmen

A memorandum is maintained by each salesman showing the amount of time spent in selling products applicable to each channel of distribution during the last month of each quarter. This time record is reviewed and approved by the Sales Manager, Assistant Field Manager, or Field Manager. Upon approval, it is used in allocating field expenses to the various sales channels on our Comparative Statement of Expense, Form 189, for the succeeding three-month period. Review by supervisory personnel is to insure that distribution of effort is properly reflected in costs assessed. General Office salesmen expense applicable to salesmen carried on General Office payroll is allocated to each field based on the number of days worked in the field and is distributed directly to channel applicable.

All accounts listed on Schedule #1 were allocated to the various channels on the above basis. For example: Percentages taken from the December, 1939, and the June, 1940, distribution of time reports used to distribute salesmen's salaries to channels for the following quarterly periods were:

1002	December, 1939	June, 1940
Tank Wagon Reseller	29.7%	27.8%
Tank Wagon Consumer	14.5	16.2
Other Method	51.0	51.9
Automobile Supplies	4.8	4.1
Total	100.0%	100.0%

Total salaries paid to salesmen in the months of January and July were distributed to the various channels as follows:

	January		July	
Field Expense	% of Effort	Costs Allocated	% of Effort	Costs Allocated
Tank Wagon Reseller	29.7%	$ 4,799.83	27.8%	$ 4,955.43
Tank Wagon Consumer	14.5	2,343.35	16.2	2,887.70
Other Method	51.0	8,242.13	51.9	9,251.33
Automobile Supplies	4.8	775.73	4.1	730.84
Sub Total	100.0%	$16,161.04	100.0%	$17,825.30
General Office		365.50		348.58
Total		$16,526.54		$18,173.88

Sales Promotion

Account 002—Salaries—Sales Promotion
Account 031—Traveling Expense—Sales Promotion
Account 046—Operation and maintenance of Vehicles —Sales Promotion
Account 101—Depreciation Expense—Vehicles—Sales Promotion

The allocation of sales promotion expense is handled in the same manner as that applicable to salesmen, no expense

being charged to the fields by General Office. This means
that a distribution of time report is made up for sales
1003 promotion employees at the same time and on the
same basis as salesmen's distribution of time report
is made.

Example: Total salaries paid to sales promotion employees for the months of January and July were distributed to channel in accordance with the following:

	January		July	
	% of Effort	Costs Allocated	% of Effort	Costs Allocated
Tank Wagon Reseller	24.6%	$ 714.63	16.3%	$ 310.92
Tank Wagon Consumer	28.8	836.64	33.4	637.11
Other Method	44.3	1,286.92	48.4	923.23
Automobile Supplies	2.3	66.81	1.9	36.24
Total	100.0%	$2,905.00	100.0%	$1,907.50

Account 003—Salaries—Sales Promotion—Others

The distribution of expense applicable to this account was made in exactly the same manner as that applied to salesmen and sales promotion costs, no expense being charged to the fields by General Office. An example showing a breakdown of total salaries paid employees classified as Sales Promotion—Others—for the months of January and July is as follows:

	January		July	
	% of Effort	Costs Allocated	% of Effort	Costs Allocated
Tank Wagon Reseller	17.3%	$ 281.89	24.1%	$ 482.01
Tank Wagon Consumer	51.0	831.00	30.7	614.01
Other Method	20.0	325.88	35.5	710.01
Automobile Supplies	11.7	190.64	9.7	194.00
Total	100.0%	$1,629.41	100.0%	$2,000.03

Schedule #2

Advertising Costs

Account 005—Salaries—Advertising
Account 033—Traveling Expense—Advertising
Account 048—Operation and Maintenance of Vehicles—Advertising—Passenger Cars and Trucks
Account 103—Depreciation Expense—Vehicles—Advertising
Account 240—Donations

All charges to the above accounts, excluding charges directly applicable to automobile supplies, were allocated to channels shown on Comparative Statement of Expense, Form 189, according to the ratio of gallons sold by each channel to total gallons sold by all channels (excluding direct shipments) during the month in which the expense was charged.

Example: Any work done by advertising painters on advertising pertaining solely to the automotive line was charged direct to the automobile supplies channel on Form 189. Such individuals maintain a daily time card from which such direct costs are determined. Other painting expense and other advertising salaries not directly chargeable to the automobile supplies channel are prorated to tank wagon reseller, tank wagon consumer, and other methods on a gallonage basis.

An example of the procedure used in prorating advertising expenditures applicable to the above accounts is as follows: Total advertising salaries for the months of January and July were $473.18 and $771.34, respectively.

1005

	January		July	
	% of Gallons	Costs Allocated	% of Gallons	Costs Allocated
Tank Wagon Reseller	53.4%	$252.68	76.4%	$589.30
Tank Wagon Consumer	40.1	189.74	19.3	148.87
Other Method	6.5	30.76	4.3	33.17
Total	100.0%	$473.18	100.0%	$771.34

Account 075—Advertising—Other Costs (Including ELA)

When allocating charges to Account 075, distribution is made directly to each channel when possible.

Example: Costs involved in installing Jewel Globes on gasoline pumps at a reseller outlet and costs of advertising signs installed at reseller outlets which refer to a particular brand of gasoline are charged directly to tank wagon reseller channel (1075). Similarly, advertising signs installed at reseller outlets which refer to motor oils are charged directly to other method channel (4075).

When a direct charge to a particular channel cannot be made, but the expense affects the tank-wagon channel as a whole, distribution is made on the ratio of reseller and of consumer tank wagon gallons sold to total tank wagon sales.

Example: Red Crown decalcomania transfers affixed to tank trucks and gasoline handout folders affect both the tank wagon reseller and tank wagon consumer channels.

Similarly, when allocation to a particular channel cannot be made and the item of expense affects all channels, other than automobile supplies, allocation is made on an all gallonage basis, excluding direct shipments.

1006 Example: Handling charges involving Standard Service signs, highway approach signs, and cost of display floats used in parades.

If an item of expense of a general nature affects all channels, including automobile supplies, allocation to automobile supplies and to petroleum products is made on the basis of sales realization for the current month. Allocation of expense charged to petroleum products is then allocated to the various channels applicable on a gallonage basis.

Example: Newspaper advertising relative to services offered at reseller outlets and radio program—Auction Quiz.

1007

Schedule #3

Delivery and Warehouse Cost

Salaried Drivers

Account 006—Salaries—Drivers

Each salaried driver maintains a daily time card showing the distribution of his effort. Allocation of salaries is made direct to each channel based on these time cards.

Account 053—Operation and Maintenance of Vehicles—Trucks, Motor and Horse-drawn (excluding Advertising)

Account 106—Depreciation Expense — Vehicles — Trucks, Motor and Horse-drawn (Including Vehicle Tanks and excluding Advertising Trucks

When possible, distribution of charges to these accounts is made directly to each channel. In all other instances, allocation is based on the ratio of gallons sold by each channel to total gallons sold by all channels,

Example: Repairs to a fuel oil truck are charged to tank wagon consumer channel on Account 053, while repairs on a truck delivering gasoline to reseller outlets only would be charged to the tank wagon reseller and expenses for stake trucks are charged to other methods.

When direct allocation cannot be made but expense affects both the tank wagon reseller and consumer channels, distribution is made on a gallonage basis.

Example: Repairs to tank truck used to make deliveries to both reseller and consumers.

1008 In the same manner, when a particular item of expense affects all channels, other than automobile supplies, allocation to all channels is based on the ratio of gallons sold by each channel to total gallons sold by all channels.

Example: Repairs to construction man's truck.

Commission Drivers

Account 021—Commissions

Allocation of expense incurred in the payment of commissions for the sales of products is made directly to each channel affected, based on classification of sales reported by commission agents and drivers.

Account 024—Expense of Transferring Standard Fuels Due to Lack of Storage

Account 025—Truck Rental Expense

Account 055—Vehicle Tank Expense—Other Than Mounted on Company Chassis

Allocation of this type of expense is based on the ratio of reseller and of consumer tank wagon gallons sold on commission to total tank wagon sales on commission.

Bulk Plant Cost

Account 008—Salaries—Warehouse Labor
Account 060—Plant Maintenance
Account 062—Water, Light, Fuel (Other Than Main Office)
Account 087—General Supplies Used
Account 088—Station Operating Tools and Equipment

When possible, distribution of charges to Accounts 008, 060, 087, and 088 are made directly to each channel. In all
other instances, when this type of expense is applica-
1009 ble to tank wagon channel, allocation to reseller and
consumer channels is made on the ratio of reseller
and consumer tank wagon gallons sold to total tank wagon
sales. However, if this type of expense cannot be allocated
to tank wagon channel, distribution is made to all channels
on the ratio of gallons sold by each channel to total gallons
sold by all channels.

Example:

	Direct Charge		Tank Wagon Pro Rata	General Pro Rata
	Channel	**Item**		
008 (based on daily time record)	**Other Method**	**Unloading box cars**	**Loading tank trucks**	**Servicing Company cars with gasolines and motor oils**
060	**Tank Wagon Consumer**	**Repair to furnace oil storage tank**	**Repair overhead loading apparatus at bulk station**	**Painting bulk station**
062			**Water, light and fuel expense at bulk stations stocking only tank wagon products**	**Water, light and fuel expense at bulk stations stocking all products**
087	**Tank Wagon Consumer**	**General Supplies used in connection with fuel oil truck making only consumer deliveries**	**General Supplies used at bulk plant stocking only tank wagon products**	**General Supplies used at bulk station stocking all products, suc as rags, soap, etc**
088	**Other Method**	**Expense in connection with pump and dolly outfit, milk cans,etc.**	**Hose installed on tank trucks making deliveries to both reseller and consumer channels**	**Shovels, rakes, etc., disbursed to construction men**

1010

Account 061—Rental Expense

Account 063—Telephone and Telegraph (Other Than Main Office)

Account 110—Depreciation Expense—Plant (Building, Machinery, Equipment, Furniture and Fixtures)

Account 112—Depreciation Expense—Real Estate Improvements

Account 086—Taxes—Real Estate and Personal Property

This type of expense is allocated to channel on a gallonage basis, excluding direct shipments

1011

Schedule #4

Income and Expense Incurred at Leased Retail Outlets Served by Tank Wagon

Account 060A—Plant Maintenance (Service Station Owned Properties Complete)

Account 060B—Plant Maintenance (Service Station Owned Buildings on Leased Ground)

Account 060C—Plant Maintenance (P. O. S. S. L. Properties Leased Out)

Account 061B—Rental Expense (Leased Ground Used for Owned Service Station Buildings)

Account 061C—Rental Expense —(P. O. S. S. L. Properties Leased Out)

Account 065A—Rent Revenue (Service Station Owned Properties Complete)

Account 065B—Rent Revenue (Service Station Owned Buildings on Leased Ground)

Account 065C—Rent Revenue (P. O. S. S. L. Properties Leased Out)

Account 066A—Miscellaneous Operating Expense (Service Station Owned Properties Complete)

Account 066B—Miscellaneous Operating Expense (Service Station Owned Buildings on Leased Ground)

Account 066C—Miscellaneous Operating Expense (P. O. S. S. L. Properties Leased Out)

Account 088A—Station Operating Tools and Equipment (Service Station Owned Properties Complete)

Account 088B—Station Operating Tools and Equipment (Service Station Owned Buildings on Leased Ground)

Account 088C—Station Operating Tools and Equipment (P. O. S. S. L. Properties Leased Out)

Account 110A—Depreciation Expense—Plant (Building, Machinery, and Equipment, Furniture and Fixtures) (Service Station Owned Properties Complete)

Account 110B—Depreciation Expense—Plant (Building, Machinery, and Equipment, Furniture and Fixtures) (Service Station Owned Buildings on Leased Ground)

Account 110C—Depreciation Expense — Plant (Building, Machinery, and Equipment, Furniture and Fixtures) (P. O. S. S. L. Properties Leased Out)

Account 086A—Taxes (Service Station Owned Properties Complete)

Account 086B—Taxes (Service Station Owned Buildings on Leased Ground)

Account 086C—Taxes (P. O. S. S. L. Properties Leased Out)

Account 112A—Depreciation Expense—Real Estate Improvements (Service Station Owned Properties Complete)

1012 This type of income and expense by class of station, exclusive of that applicable to automobile supplies, was allocated to tank wagon reseller and other method channels on the basis of current month reseller gallonage.

Example: The total expense charged to Account 060A for the month of January represented $2,945.71, and was allocated to channel as follows:

	Sales Gallons	Percentages	Allocation
Reseller Tank Wagon	3,056,456	95.84%	$2,823.17
Other Methods	132,793	4.16	122.54
Total	3,189,249	100.00%	$2,945.71

Similarly, the total expense charged to Account 060B for the month of January amounted to $49.34 and was allocated to channel as indicated below:

	Sales Gallons	Percentages	Allocation
Reseller tank Wagon	80,866	91.1%	$47.42
Other Method	3,282	3.9	1.92
Total	84,148	100.0%	$49.34

In the same manner, total expense charged to Account 060C for the month of January amounted to $252.70 and was allocated to channel as below:

	Sales Gallons	Percentages	Allocation
Reseller Tank Wagon	909,106	96.76%	$244.51
Other Method	30,431	3.24	8.19
Total	939,537	100.00%	$252.70

1013

Schedule #5

Marketing Expense Items Incurred at Privately Owned Stations Not Leased but Engaged in the Distribution of Our Products.

Account 570—ELA Expense

Equipment Loan Agreement expense is charged directly to the channel to which the cost is applicable. An example of such expense would be the repairing of a gasoline pump at one of our dealer outlets, the charge going direct to the tank wagon reseller channel.

Again, if repair work was required on a grease pump loaned to one of our small dealer accounts, such expense would be chargeable to the other method channel of distribution. Because no general pro rata account is provided for this type of expense, no proration is made at the end of the month. For this reason all expenses charged to the tank wagon reseller channel are actual expenses incurred.

Account III—Depreciation Expense—Plant ELA

The depreciation cost on Equipment Loan Agreement items is set up on the value of the equipment involved. This amount is charged to a general pro rata account and allocated to the three petroleum product channels each month on a gallonage basis, excluding direct shipments.

Example: 7 Hi-boys	@ 4.97 each	$ 34.79
4 60-Gallon Lubsters	@16.65 each	66.60
7 Bennett Lubsters	@12.77 each	89.39
1 Computing Pump—Gasoline		181.02
		$371.80

$371.80 x .333% (monthly rate) = $1.24—monthly charge.

1014

	January %	$
Tank Wagon Reseller	53.4%	$ .66
Tank Wagon Consumer	40.1	.50
Other Method	6.5	.08
Total	100.0%	$1.24

Account 513—Losses by Dismantling—Out of Pocket Expense—ELA.

Charges to this account are made direct to channel, no segregation being made for a general pro rata grouping.

1015

Schedule #6

Credit Information—Bad Debts and Recovery

Account 431—Budget Plan and Income and Expense

Items of income and expense in this account affect only the automobile supplies channel.

Account 510—Losses by Bad Debts

Account 511—Expense Collecting Bad Debts—Current Year

Account 512—Expense Collecting Bad Debts—Prior Years

When possible, distribution of charges to these accounts is made directly to the channel involved. When direct distribution is not possible, and charges involve tank wagon channel as a whole, allocation to channels applicable is made on the ratio of reseller and of consumer tank wagon gallons sold to total tank wagon sales. In the same manner, when allocation to a particular channel cannot be made and the expense affects all channels, other than automobile supplies, distribution to all channels is based on the ratio of gallons sold by each channel to total gallons sold—all channels.

Example:

	Direct Charge		Tank Wagon	General
	Channel	Item	Pro Rata	Pro Rata
510	Other Method	Motor Oil account charged to bad debts	Gasoline account charged to bad debts. (Gasoline purchased both for resale and consumption by customer)	Coupon book account charged to bad debts.
511 and 512	Tank Wagon Consumer	Expense collecting fuel oil account	Expense collecting above account	Expense colle ing mixed account containing gasoli and motor oil charges

1016 **Account 208—Credit Information Expense**

Expense incurred to obtain credit information is allocated to the various channels, on an all gallonage basis, excluding direct shipments.

Account 400—Bad Debts Collected—Written Off Prior Years

Recoveries on bad debts written off in prior years are allocated directly to the channel originally charged with the bad debt expense. Thus, if tank wagon reseller channel was charged in prior years with a bad debt amounting to $100, any recoveries thereon would be credited to tank wagon reseller channel.

1017

Schedule #7

Field Office and Accounting Cost

Account 200—Office Expense—Salaries Accounting

Account 205—Office Expense—Operation and Maintenance of Vehicles—Office Automobiles

Account 206—Office Expense—All other—Water, Light, Fuel, Rent, etc.

This expense is distributed to the various channels shown on Form 189 on the basis of a distribution of time report which is prepared for all accounting employees. Information for preparation of distribution of time report is prepared for accounting employees by summarizing individual memorandum records of work actually performed by such employees. Memorandum records are reviewed and approved by administrative employees, such as, the Office Manager, the Assistant Office Manager, etc., prior to the preparation of report. Distribution of time report is prepared for the third month of each quarter, and is used in allocating expenses applicable for the succeeding three-month period. Expense for casual help, when possible, is charged directly to channel affected, based on daily record of time maintained by such casual help.

Example: Account 200—$20,019.36—January.

	Tank Wagon Reseller	Tank Wagon Consumer	Other Method	Automobile Supplies	Total
% of Time Spent.....	29.9%	21.8%	38.4%	9.9%	100.0%
Field Office	$5,475.26	$3,992.00	$7,031.78	$1,812.88	$18,311.92
General Office	375.16	273.46	481.38	—	1,130.00
Casual Help	194.13	140.51	242.80	—	577.44
Total..............	$6,044.55	$4,405.97	$7,755.96	$1,812.88	$20,019.36

1018

Account 201—Office Expense—Stationery and Office Supplies

Account 202—Office Expense—Postage

Account 203—Office Expense—Telephone and Telegraph

Account 204—Office Expense—Exchange

This type of expense is distributed to the various channels, other than automobile supplies on the basis of total gallons sold during the current month.

Example: Account 202—$1,570.03—January

	%	Cost
Tank Wagon Reseller	53.4%	$ 838.40
Tank Wagon Consumer	40.1	629.58
Other Method	6.5	102.05
Total	100.0%	$1,570.03

1019

Schedule #8

Supervision Cost Incurred in Sales Field

Account 000—Salaries—Supervision

Account 030—Traveling Expense—Supervision

Account 045—Operation and Maintenance of Vehicles—Supervision

Account 100—Depreciation Expense—Vehicles—Supervision

The above accounts cover costs incurred by individuals acting in a supervisory capacity. As such, these costs are general in nature and cannot be changed directly to a particular channel. For this reason these costs are prorated on a gallonage basis each month to the three petroleum product channels.

Example: Employees whose expenses are allocated in this manner are

Field Manager
Assistant Field Manager
Maintenance Superintendent
Plant Agent

The only exception to the above rule is tank wagon superintendent, whose costs are charged to Account 3000. This expense is then prorated each month by the ratio of tank wagon reseller gallons to total tank wagon gallons.

Account 001—Salaries—Supervision—Others

Salaries charged to this account are those paid to employees acting as secretaries or stenographers for those individuals in a supervisory capacity. These costs are prorated to channel on a gallonage basis at the end of each month.

1020 Schedule #9

Losses—Taxes—Insurance and Additional Salary Considerations

Account 500—Losses by Accident—Property and Other Than Company Employees

Account 501—Losses by Property Damage—Company and Other Than Company Property

Account 502—Losses by Fire

Account 503—Losses by Storm and Flood

Account 507—Losses—Miscellaneous

The titles of these accounts explain the nature of the expenses charged thereto. Such expenses are charged direct to the channel applicable if possible. Some charges are made to tank wagon pro rata, 3000 series, and distributed to tank wagon reseller and tank wagon consumer on the basis of total tank wagon gallons while those charges of a general nature are charged to general pro rata, 7000 series, and distributed on the basis of all gallons, excluding direct shipments. These expenses are incurred in the field and allocations on field reports.

Example: An accident involving a tank wagon, resulting in the loss of refined oils, tractor fuels, naphthas, and gasoline, would bring about a charge to tank wagon pro rata. Likewise, the loss of motor oil or grease would cause a charge to other methods. Repairs to a construction man's truck caused by an accident would represent a charge to general pro rata.

Account 243—Taxes—Federal Insurance Contributions
Account 244—Unemployment Insurance
Account 520—Annuities and Retirement Plan Expense

The charges to these accounts, representing additional salary consideration, is allocated to channel on the basis of all salaries and commissions in each channel to total all salaries and commission for the corresponding month. For the month of January these percentages by channel were:

1021	Tank Wagon Reseller	29.3%
	Tank Wagon Consumer	37.8
	Other Method	32.9

Account 245—Taxes—All Other

This expense represents the Detroit field's proportion of
State of Michigan Sales Tax
Michigan Consumers Use Tax
Michigan Privilege Fee
Federal Capital Stock Tax

These taxes are paid by the General Office and the amounts of the first two charged to Detroit result from business in the Detroit field. The distribution to channel is made on the basis of all gallons, excluding direct shipments.

The Michigan Privilege Fee is charged to the fields operating in the state of Michigan on the basis of the value of assets held in each field. The distribution to channel is made on a gallonage basis, excluding direct shipments.

The Federal Capital Stock Tax is allocated among fields on the basis of the value of assets held in each field and distributed to channel on a gallonage basis, excluding direct shipments.

Account 235—Insurance

Account 525—Death Benefits

Account 506—Losses by Dismantling—Abnormal—Other than ELA

Account 514—Losses by Dismantling—Out of Pocket Expense—Other than ELA

These expenses do not apply directly to any channel and accordingly, are charged to the general pro-rata sub account. The allocation to channel of sale is made on the basis of all gallons, excluding direct shipments.

1022

Schedule #10

Miscellaneous Marketing Expense Items.

Account 054—Operation and Maintenance of Vehicles—All Other (Other Than Office)

Account 107—Depreciation Expense—Vehicles—All Other (Other Than Office)

Expenses in the above accounts are allocated to tank wagon reseller, tank wagon consumer, and other methods channels on a gallonage basis (excluding direct shipments). Thus, during January the operation and maintenance of the car furnished the Superintendent of Construction amounted to $12.63, which when allocated to channels resulted in the following charges:

Tank Wagon Reseller	$6.75
Tank Wagon Consumer	5.06
Other Methods	.82

Account 107 included a total charge on this vehicle of $9.68 for January, which was allocated in the same manner.

Account 065—Rent Revenue

Rent revenue usually arises from surplus property. Such marketing expense credit is allocated among channels on an all gallonage basis (excluding direct shipments). The total rent revenue of $22.71 is shown allocated on Schedule #10, page 99.

Account 081—Demurrage and Railroad Storage

Any demurrage charge on shipments of automobile supplies is charged direct to this channel while similar expense incurred on barreled merchandise would be charged to other methods. Where such expense is incurred
1023 on tank cars of gasoline or refined oils, it is allocated
between tank wagon reseller and consumer channels on a gallonage basis.

Account 082—Personal Injury Expense—Company Employees

These costs are either allocated between tank wagon reseller and consumer channels on a gallonage basis or are allocated among the tank wagon reseller, consumer, and other methods channels on an all gallonage basis, excluding direct shipments. The individual expense item determines the method of treatment. Thus, accident No. 2944 occurred on January 22, resulting in an expense of $7.00. The employee responsible was the janitor of the main office. This cost was allocated to the reseller, consumer, and other methods channels on a gallonage basis. On the other hand an accident caused by a tank wagon driver would be allocated only to the reseller and consumer channels on a gallonage basis.

Account 083—Samples

Practically all samples are of products included in the other methods or automobile supplies channels. These are charged direct to these channels. In some few cases samples may be given away, which is difficult to charge to a given channel and is prorated among all channels on an all gallonage basis, excluding direct shipments.

Account 066—Miscellaneous Operating Expense

These miscellaneous expense items are either charged direct to tank wagon reseller, consumer, other methods, or automobile supplies; or are allocated between tank wagon reseller and tank wagon consumer channels on
1024 a gallonage basis; or are allocated to tank wagon reseller, consumer, and other methods channels on an all gallonage basis, excluding direct shipments. The nature of the expense determines the method of treatment.

To illustrate: Representative types of expenditure included in this account are:

Charged Direct

Tank Wagon Reseller Channel

a. Paint for Dealer Gasoline Price Signs
b. Color for Dealer Gasoline Price Signs
c. Lumber for Crating Pumps

Tank Wagon Consumer Channel

a. Cleaning Fuel Oil Tanks
b. Oil Burner Mechanic
c. Traveling Expense—Oil Burner Mechanic

Other Methods Channel

a. Prizes to Tank Wagon Drivers for Motor Oil Sales
b. Freight on Lubricating Oil
c. Freight on Hi-boys (Motor Oil Containers)

Automobile Supplies Channel

a. Dealers' Tire School

Allocated Between Tank Wagon Reseller and Consumer Channels on Gallonage Basis

a. Tank Wagon Faucet Tags
b. Calibrating Tanks
c. Freight on Pumps
d. Paint for Truck Chassis
e. Freight on Tanks—Transfer
f. Tank Wagon Faucet Holders
g. Decals for Tank Wagons
h. Product Tags
i. Tank Wagon Faucet Clips

1025 Allocated Among Tank Wagon Reseller, Consumer and Other Methods on an All Gallonage Basis, Excluding Direct Shipments

a. Subscription to Chicago Journal of Commerce
b. General Supplies costing less than 5¢
c. Blue Prints
d. Salesmen's Portfolios
e. Insurance Manager's Car
f. Club Dues
g. Product Tags for Plants
h. Lead Warning Signs
i. General Supplies Junked
j. Cleaning at Bulk Plant
k. Appraisal of Property
l. Medical Examination
m. Octane Test of Gasoline
n. Reseller Sales Meeting Expense
o. Meals—Dealer Conference
p. Orchestra—Dealer Conference

Account 084—Safety Expense—Salaries and All Other Expense

Typical expenses included in this account are safety signs, salaries, traveling expense, car expense, and clerical assistance in the Safety Department. These charges are allocated among the tank wagon reseller, consumer, and other method channels on an all gallonage basis, excluding direct shipments.

Account 215—Expense—Salaries—Others
Account 216—Expense—Traveling Expense—Others
Account 217—Expense—Operation and Maintenance of Vehicles—Automobiles—Others

All of the above expense items are allocated among the tank wagon reseller, consumer, and other method channels on an all gallonage basis, excluding direct shipments. These costs are incurred for salaries of individuals doing real estate, tax work; their cars and traveling expenses.

1026 Account 220—Expense—Employment Department—Salaries and All Other Expense

Total charges incident to the operation of an employment department, including salaries, traveling expense, and car expense, are charged to this account and allocated among the tank wagon reseller, consumer, and other method channels on an all gallonage basis.

Account 225—Expense—Salaries—Sub-Station Auditors
Account 226—Expense—Traveling Expense—Sub-Station Auditors
Account 227—Expense—Operation and Maintenance of Vehicles—Sub-Station Auditors
Account 228—Depreciation Expense—Vehicles—Office—Others—and Sub-Station Auditors

An audit of books at each bulk plant is made at regular intervals. This requires a staff of auditors, each furnished with automobiles and each incurring certain traveling expense. All products move through our bulk stations and hence, the above expense is allocated among the tank wagon reseller, consumer, and other method channels on an all gallonage basis, excluding direct shipments.

Account 207—Outside Collection Expense

The credit to this account was found to be an error of classification of income or expense by the Accounting Department for the month of December, 1940. Normally, such costs as are paid to Brinks Express are included under this account and are allocated among the tank wagon reseller, consumer, and other method channels on an all gallonage basis. The charges which should have gone to this account were made to 066, Miscellaneous Operating Expense, and were then allocated to channels on the correct basis.

1027

Schedule #11

Marketing Expense Items on Lubricating Oils (Shown Only for Reconciliation of Total Marketing Expense)

Account 076—Barrel Expense
Account 077—Freight on Empty Steel Barrels and Containers
Account 078—Losses on Containers—Lost
Account 079—Losses on Containers—Junked
Account 115—Depreciation Expense — Equipment Steel Barrels
Account 410—Profit and Loss on Resale Barrels

None of the above expense items are vital to this complaint and were included in our Distribution Cost Analysis—Tank Wagon Reseller versus Jobber Gasoline Sales—Detroit Field—1940—only for reconciliation purposes. They are all direct charges to the other method channel of marketing.

1028

Schedule #12

General Office Marketing Costs

The expense of each General Office department represents the sum total of salaries, traveling expense, miscellaneous department expense, federal insurance contribution, state unemployment insurance contribution, company annuity and retirement plan expense and the proportionate share of the expense incurred in the operation and maintenance of the General Office building locating at 910 South Michigan Avenue.

Account 250—Accounting Department

This department represents the total expenses of the General Office Credit and Collection and Accounting Departments. The functions of these departments include the handling of all final monthly reports from each field office as well as the preparation of monthly statements and reports submitted to the General Accounting Department for the preparation of company statements. The total monthly expense of these departments is charged to General Pro Rata, sub account 7250. This total is allocated to fields on the basis of total gallons, excluding direct shipments, and in turn is distributed to the tank wagon channels on the same basis.

For example: Detroit expense of the combined departments for the month of January and July, 1940, and the allocation to channels was as follows:
1029

	January		July	
	% of Effort	Costs Allocated	% of Effort	Costs Allocated
Tank Wagon Reseller	53.4%	$1,411.07	76.4%	$1,412.18
Tank Wagon Consumer	40.1	1,059.62	19.3	356.74
Other Method	6.5	171.76	4.3	79.48
Automobile Supplies	—	—	—	—
Total	100.0%	$2,642.45	100.0%	$1,848.40

Account 255—General Manager's Department

The allocation of expense of the General Manager's Department is handled on a departmental basis.

	Detroit Field Cost Year 1940
Supervision	$16,679.29
Sales Research	6,172.79
Statistical and Personnel	3,828.19
Real Estate	1,918.52
Operating	7,987.29

The total cost of these departments is allocated to fields on an all gallonage basis, excluding direct shipments, and is in turn allocated among channels within a field on the same basis.

Gasoline and Refined Oil Department

The expense of this department is first split between the Manufacturing and Sales Departments on a 25-75 ratio, respectively. The 25% is charged to the Manufacturing Department for the time and effort consumed in the disposal of various products not credited to the Sales Department such as casinghead gasoline, coke, railroad fuel oil, and various spot sales, or exchanges of gasolines and refined oils with other refineries.

1030 The proportion charged to the Sales Department is first allocated to the tank wagon reseller, tank wagon consumer, and other method channels on the basis of total sales in gallons, excluding direct shipments, of refined oils, tractor fuels, naphthas and gasoline, in each channel. The allocation of the channel expense to fields is based on the proportion of sales of these products by fields in each channel to total channel sales. The Detroit field's proportion of the Sales Department charge was $3,924.53 for the year 1940.

Sales Promotion—Wholesale—1940 Detroit Cost, $4,448.11.

The expense of this department is first allocated between the tank wagon consumer and the other method channels on the basis of semi-annual time studies. Ratios so determined are used to allocate expenses to these channels by months for the following six months. Expenses in the tank wagon consumer and other method channels are then allocated direct to these channels by field on the basis of the gallonage in each channel to the total channel sales for all fields. The gallonage for each channel is the sales volume, excluding direct shipments, of those products to which time is devoted as reported on the distribution of time reports.

Sales Promotion—Reseller—1940 Detroit Charge, $3,020.15.

The expense of this department is first allocated among tank wagon reseller, other method, and automobile supply channels on the basis of semi-annual time analyses.
1031 The average proportion of the charges to tank wagon reseller was 47.3%, other method 35.4%, and automobile supplies 17.3% for the year 1940. Having first spread the total department expense to the channels of sale, the total channel cost is then allocated to the same channel in the fields on the basis of the ratio of gallons in that channel to the total channel gallons for all fields. The gallonage for each channel is the sales volume, excluding direct shipments, of those products to which time is devoted as reported on the distribution of time reports.

Sales Promotion—Specialties

This expense was charged entirely to the other method channel. The allocation to fields is based on the sales of those products, excluding direct shipments, to which time is devoted as reported on the semi-annual distribution of time reports.

Sales Promotion—Automobile Supplies

This expense was charged entirely to the automobile supply channel. The allocation to fields is based on sales value of automobile supplies.

Account 260—Advertising Department

The expense of this department is allocated to fields on the basis of the preceding months' to date net charges to sub accounts 005, 033, 048, 075, and 103. The distribution to channels is on the basis of total sales gallons, excluding direct shipments.

1032 Account 265—Lubricating Department

This cost represents the total of the Lubricating, Technical, New York Office, and Railway Sales Departments. Of these the first three are handled in an identical manner.

	Other Method	General Pro Rata
Lubricating Department	$7,839.19	$3,789.83
Technical Department	7,182.21	4,271.73
New York Office	309.71	878.54

The expenses of these departments are allocated to the other method and general pro rata expenses on the basis of semi-annual distribution of time reports. The charge to general pro rata is distributed to tank wagon reseller, tank wagon consumer, and other method channels on the basis of total sales, excluding direct shipments, for the preceding six months' period. The allocation of this channel expense to the individual fields is made on the basis of gallonage, excluding direct shipments, of the products in each channel to which effort was devoted as reported on the distribution of time reports.

Railway Sales

The expense of this department is charged entirely to the other method sales channel and is allocated to fields on the basis of sales, including direct shipments, of those products reported in the semi-annual distribution of time reports.

Account 270—Asphalt and Fuel Oil Department

The Expense of this department is charged directly to the other method channel of distribution and is allocated to fields on the basis of sales, excluding direct shipments, of those products reported in the semi-annual distribution of time reports.

1033 Account 280—Construction and Maintenance Department

Account 290—Pro Rata General Administrative

Account 515—Experimental, Development and Research Expense

All expense in the above departments is charged to general pro rata and allocated among fields on the basis of all gallons, excluding direct shipments, and allocated among channels within a field upon the same basis.

Account 295—Law Expense

Law expense is either charged direct to a field or is charged to general pro rata. All law expense charged direct is prorated among channels within a field on an all gallonage basis, excluding direct shipments. All law expense charged to general pro rata is allocated among fields on the basis of all gallonage, excluding direct shipments, and is then allocated to channels within a field on the same basis.

1034 RESPONDENT'S EXHIBIT 100.

1038 Standard Oil Company (Indiana).

Analysis of Distribution Costs
Detroit, Michigan—Sales Division.

The Federal Trade Commission charges the Standard Oil Company (Indiana), Docket No. 4389, with following discriminatory price practices under the Robinson-Patman Act, because it makes tank car sales of gasoline to jobbers in the City of Detroit at a price 1.5¢ per gallon below the price for the same product when delivered by tank wagon to reseller accounts for resale to the consumer. One of the justifications for this action by the respondent is that its marketing costs for jobber sales of gasoline are below its marketing costs on tank wagon reseller sales by an amount equal to this price differential.

Expenses hereinafter set forth by sales channel do not represent a continuous coating process employed by the respondent. The entire cost analysis is predicated on the necessary time and cost study required to modify present accounting procedures to conform with the sales channels cited in the complaint. This detailed analysis was made in the Detroit Sales Office during the period August 11 to October 31, 1941. The analysis covers operations for the year 1940 which was the period agreed to by the Federal Trade Commission and the respondent.

Company Distribution System.

The Standard Oil Company (Indiana) markets petroleum products in fourteen midwestern states. The total territory is divided among twenty-seven local field offices, the boundaries of which are determined on the basis of economic interest and similarity of marketing problems. Within each local sales field there are bulk stations operated by commission employees, and others operated by salaried employees. Each division office directs sales to
the various classes of customers in its sales territory.
1039 In turn, the operation of each of the local offices is
directed from a central office located in Chicago, Illinois.

The primary objective of preparing a "Comparative Statement of Expense" (Form 189) monthly, for each of the 27 local sales fields is to provide information for proper expense controls. The needs of the company in this respect are adequately fulfilled by maintaining costs according to channels of distribution. Channels regularly recognized in the distribution of expenses are:

Tank Wagon Reseller

Marketing expenses shown under this channel apply to sales of gasolines, naphthas, and refined oils delivered by tank wagon method to reseller customers for resale.

Tank Wagon Consumer

Marketing expenses shown under this channel represent the cost of distribution by tank wagon to consuming customers. These costs are incurred on the marketing of gasolines, naphthas, kerosenes, heating oils, diesel flues, and tractor fuels.

Income and Expense—Leased Service Stations

Marketing expenses and income amounts in this channel represent those items directly and wholly applicable to sales of all petroleum products through company owned and leased service stations arising out of real property income and expense.

Other Method Sales

Marketing expense incident to distributing petroleum products other than those delivered by tank wagon are included under this channel. These expenses are incurred largely on motor oils, lubricating oils, greases, specialty products, and asphalts.

1040 Automobile Supplies

Marketing expenses incident to the distribution of this line of merchandise are maintained separately and charged direct to sales of these products.

The above classifications of sales channels and corresponding expenses are considered adequate to meet our needs for proper current expense controls. It has not been deemed advisable to maintain a separate allocation of costs on sales of gasolines to jobbers, sales of other products to jobbers, or expenses incident to direct shipments from our supply terminals to customers buying in carload quantities.

A separate classification [illegible] expenses to these added channels has been considered unnecessary because of the small amount of expense applicable to sales to these classes of customers. Accordingly, any expense chargeable to these classes of customers will be found scattered throughout the various channels on our "Comparative Statement of Expense—(Form 189) Detroit Field—Year 1940." The expense of isolating each marketing cost accurately to these additional classes of customers would be prohibitive in terms of benefits received, and would load our sales with excessive accounting costs.

In answer to this particular complaint, the various marketing expense items incident to distribution in the Detroit area have been re-allocated, giving recognition to the following channels:

Tank Wagon Reseller

Expenses included hereunder represent costs incurred on tank wagon sales of gasolines, naphthas, and refined oils to reseller customers for resale purposes.

Tank Wagon Consumer

Expenses hereunder set forth are incurred upon tank wagon sales direct to consumers of gasolines, naph-
1041 thas, kerosene, heating oils, diesel fuels, and tractor fuels.

Other Method Sales

Expenses under this channel represent those costs incurred in marketing petroleum products not delivered by tank wagon or direct shipment method. They represent expenses incident to the distribution of motor oils, industrial oils, greases, and specialty products through our field bulk plants and are delivered by stake truck method of delivery or from the side-rack of our tank wagons.

Jobber—Gasolines and Refined Oils

Expenses entered hereunder are those applying directly to sales of gasolines to jobber accounts in the Detroit field.

Jobber—Other Products

Expenses under this caption represent those chargeable to the sale of petroleum products other than gasolines and refined oils to jobbers located in the Detroit field.

Other Direct Shipment Customers

Expenses allocated to this channel represent the cost of marketing all petroleum products to consumers buying in quantities adequate to receive direct shipments from our terminal supply point to destination.

Automobile Supplies

Expenses incident to distribution of this line of products have been maintained separately in our accounting procedure and apply only to such merchandise.

All income or expense items shown under the column
Income and Expense—Leased Service Stations, have been
allocated on a gallonage basis between the Tank Wagon
Reseller channel and the Other Method channel of distri-
bution on the revised Form 189. These items of in-
1042 come and expense are solely applicable to the Tank
Wagon Reseller channel and as such, are a part of
our tank wagon reseller costs of distribution.

It will be shown hereinafter how the amounts of expense chargeable to each of these channels of distribution were secured by classification of functions of our system of distribution. A brief explanation of each Sub-Account will be given following each schedule of expenses.

Respondent's Exhibit No. 100.

SCHEDULE #1.

Salesmen and Sales Promotion Expense
Detroit Field—1940

	Distribution Through Company Bulk Plants			Direct Shipment Customers					
	Tank Wagon			Jobbers					
Account No.	Reseller	Consumer	Other Method	Naph. & Gaso.	Other Prod.	Other Customers	Total Petroleum Products	Auto. Supplies	Total Petroleum Products and Auto. Supplies
Salesmen									
004—Salaries—Salesmen	$60,181.54	$32,115.95	$101,518.50	$210.68	$115.80	$13,312.69	$207,455.16	$13,371.55	$220,826.71
032—Traveling Expense — Salesmen	7,987.80	4,303.64	12,919.13	16.31	19.09	2,353.31	27,599.28	1,902.51	29,501.79
047—Operation and Maintenance of Vehicles—Salesmen	6,034.31	3,234.77	10,291.80	16.60	12.97	1,327.33	20,917.78	1,163.33	22,081.11

Total	$86,463.70	$59,238.74	$145,254.91	$787.26	$348.12	$20,677.36	$312,770.09	$20,195.39	$332,965.48

1044 Explanation of Schedule #1

Salesmen and Sales Promotion Expense
Detroit Field—1940

Salesmen's Costs

Account 004—Salaries—Salesmen
Account 032—Traveling Expense—Salesmen
Account 047—Operation and Maintenance of Vehicles—Salesmen
Account 102—Depreciation Expense—Vehicles—Salesmen

Most of our salesmen submit a daily call record report indicating the consumer called upon and the object of the call. A complete analysis of all such calls was made to determine the proportion of selling effort devoted to direct shipment customers, jobbers and regular tank wagon reseller business. Details of over 50,000 salesmen's calls were examined in determining the allocation of effort of this class of employees.

In addition to the daily call report, an estimate of time devoted to each product is prepared quarterly by classes of salesmen to be used in allocating costs among various products. These quarterly estimates of time for the year 1940 were used to allocate the expense to individual products.

Expenses incident to all types of salesmen are grouped together in our marketing cost statement. The classifications of these employees and the method of segregating expenses incident to jobbers and other direct shipment customers are explained in the following paragraphs. Complete data on the breakdown of expenses by class of salesman are presented in Sub-Schedule #1-A, supporting Schedule #1, page 6.

1045 1. Lubricating Engineers

The Lubricating Engineer is charged with the responsibility of giving engineering service to our customers and analyzing operations of prospective customers in an effort to reduce operating costs. The Lubricating Engineer does not contact jobber accounts but does some work with other direct shipment customers.

Each day the engineer submits a report (Form 264), listing the name of the customers called on, the products involved, and the time consumed in making the call. These reports were recapitulated by individual engineer by months for the year 1940 to determine the amount of time spent on direct shipment customers by products. Ratios thus determined were applied to salaries and other expense charges incident to their employment to segregate the cost of direct shipment volume. The monthly ratios of time thus determined were applied to costs of each engineer on the payroll.

2. Industrial Salesmen

These individuals call upon various manufacturing, processing, and servicing accounts and are charged with the responsibility of selling petroleum products to these consumers. This class of employee does not call on jobbers and has no responsibility for this type of outlet.

Reports submitted by this group of employees are not in sufficient detail to permit an isolation of time spent on direct shipment customers. For this reason a record of time so spent was maintained daily during the month of August, 1941, to establish a ratio of direct shipment
1046 time to total time. Ratios of effort so determined
were applied to the monthly salaries and expenses of each salesman in this classification.

3. Reseller Salesman

The Reseller Salesman is assigned a territory covering a number of retail outlets served by this Company as well as those served by competitive oil companies. He is required to sell our entire line of merchandise to these accounts in addition to giving as much merchandising assistance as possible to our dealers. Some few make calls on jobber accounts headquartering in their territory but do not call on industrial consuming accounts.

This class of salesman makes out a daily report giving the total calls made, the name of the customer called on, and the product on which sales emphasis was placed. It was first determined that a call on a jobber was approximately equal in point of time with calls made on tank wagon reseller accounts. When selling on jobber and tank wagon accounts the average was 8.6 calls per day, as compared with 8.5 calls per day when calling on tank wagon reseller accounts only. These calls were recapped for a 12-month period and the percentage of calls on jobber accounts to the total calls was used to allocate salaries and other expense to determine the cost chargeable to jobber sales.

1047 4. "B" Station Salesmen.

The "B" Station Salesman supervises "B" Station agents and directs his selling efforts among consumer accounts. For this reason this class of salesman is only slightly affected by direct shipment customers but does not call on jobber accounts.

The "B" Station Salesman also submits a Form 029 daily call record listing calls made and object of call. These daily reports were analyzed for the first seven months of 1941 (reports for 1940 were not available), and all calls on direct shipment customers were tabulated as well as total calls for all customers. From this analysis a ratio of direct shipment customers' calls to total calls was determined, which was applied to the salesman's salary and monthly expenses to determine a direct shipment cost.

5. City Salesmen

City Salesmen are charged with the sale of petroleum products to consumer and reseller accounts and operate almost exclusively in the larger metropolitan areas.

These salesmen make out a daily report of calls (Form 029), and the procedure used in obtaining their direct shipment cost was the same as that outlined above for "B" Station Salesmen.

6. Automotive Engineer

The Automotive Engineer calls on automotive fleet accounts and is charged with the responsibility of handling complaints, doing educational work, and selling our line of gasoline, motor oils, and greases. A small part of his time was spent with jobber accounts.

1048 This individual makes out a daily activity report showing the customers called on, time consumed, and the product involved. An analysis of these reports for the year 1940 gave the account of time devoted to jobbers and other direct shipment customers. The ratio of this time to total was applied to his salary and monthly expense to determine the allocation among channels and products.

7. Asphalt Products Salesman

The Asphalt Salesman is charged with the responsibility of making sales of road oils and all asphalts to large private consuming accounts or governmental agencies. These sales are almost invariably in large amounts due to the nature of the product involved, and for this reason the entire time was charged to direct shipment—other customers.

8. Special General Office Salesmen

These individuals spend only a part of their time in the Detroit field as they work out of the General Office in Chicago. Their duties are concerned with the sale of candles, tree spray oils, and other similar specialty products. As such, their time is charged 100% to direct shipment customers—other accounts.

9. Agent Salesmen

The Agent Salesman is responsible for sales in metropolitan areas which are not sufficiently large to support a City Salesman but which require the entire time of one individual. This individual spends his time calling on reseller, consumer, and jobber customers.

1049 Each day a report is made showing the customers called on and the time consumed in making the call, together with the product involved. These calls were tabulated for the first seven months of 1941 and the ratio was used to distribute the monthly expenses.

Sales Promotion Costs

Account 002—Salaries—Sales Promotion
Account 003—Salaries—Sales Promotion—Others

Account 046—Operation and Maintenance of Vehicles—Sales Promotion
Account 101—Depreciation Expense—Vehicles—Sales Promotion

Our sales promotional effort is classified along similar lines as are the salesmen. Again it was necessary to break this total classification down into subdivisions for proper allocation.

1. Sales Promotion—Industrial

The Sales Promoter—Industrial—and the Assistant Sales Promoter are responsible for handling sales promotion check-ups on individuals that have been called on by the Industrial Salesmen, complaints, and handling of quotations, bids, and specifications on product to both regular and prospective customers. The Sales Promoter is more directly connected with the handling of correspondence and direct contacts with industrial concerns; therefore, a separate time card was maintained on this position for August, 1941, from which the ratio of expense chargeable to direct customer business was determined.

Inasmuch as the assistant handles the routine reports and other material submitted by salesmen, his monthly expense was spread on the ratio of the aggregate time spent by industrial salesmen on direct shipment customers to total time for the year 1941.

1050 2. Sales Promotion—Wholesale

The Sales Promoter and Assistant Sales Promoter—Wholesale—are charged with the responsibility of seeing that the salesmen under their supervision spend their time in the most efficient manner in which to increase sales. The monthly expense of salesmen was charged to direct shipment business according to the proportion of calls made. The total effort of the salesmen provided the allocation factor for the Sales Promotion—Wholesale—expense.

3. Sales Promotion—Reseller

The duties of the Sales Promoter—Reseller—are twofold. He is charged with the responsibility of calling on jobber customers for their requirements of motor oil, and with the supervision of the salesman calling on reseller trade. During the first eight months of 1941 the Sales Promoter—Reseller—made 22 calls requiring 44 hours, or 3.255% of his total time for direct sales of motor oil to jobbers. The ratio so obtained was applied against his 1940 expense which gave the cost chargeable to direct selling effort. This was deducted from total. His remaining monthly expense, together with that of the Assistant Sales Promoter—Reseller, was charged to direct shipment business on the basis of the distribution of effort of the salesmen under his supervision.

051 Sales Promotion—Others

The group of people who are carried under the classiication, "Sales Promotion—Others," are those individals who assist the sales promotion group in maintaining records, carrying on correspondence, and in general, doing he detail work necessary for the promoting of sales. Generally, these individuals are assigned separately to the hree major sales promotion groups, Industrial, Wholesale, r Reseller. Where their time has not been specifically at he disposal of a certain individual, time cards were mainained during August, 1941, which record was used as a asis to allocate monthly expenses to direct shipment cusomers and products. In instances where an individual's ime, such as a stenographer, was directly at the disposal f a Sales Promoter, then the monthly expense chargeable o direct shipment customers was made on the same basis s the individual's under whom worked.

Sub-Schedule #1-B

Illustrating Adjustment of Comparative Statement of Expense (Supporting Schedule #1, page 6)

The preceding explanation and schedule gave in detail the processes of determining direct shipment charges included in our Comparative Statement of Expense (Form 189) for the year 1940, Detroit field. As previously brought out by testimony, amounts shown on Sub-Schedule 1-A are found in varying amounts throughout the different channels in our marketing expense statement.

These amounts were allocated to the various channels according to distribution of effort determined quarterly for each class of employee. Each quarterly estimate forms the basis of cost allocation for the subsequent three-month period. Accordingly, adjustment was made to the 189 of these amounts on a monthly basis, which, when recapitulated, gave the annual adjustment in dollars by channel. The total direct shipment charge by sub account and the annual proportion by which this amount was removed from the original channel allocation on the Comparative Statement of Expense and the amount to be deducted from each channel is shown in Sub-Schedule 1-B.

SUB-SCHEDULE #1-B.

1061 Schedule #2

Advertising Costs

Account 005—Salaries—Advertising
Account 033—Traveling Expense—Advertising
Account 048—Operation and Maintenance of Vehicles—Advertising—Passenger Cars and Trucks
Account 103—Depreciation Expense—Vehicles—Advertising

In a sales field such as Detroit the Standard Oil Company maintains an advertising representative with the necessary clerical assistance to secure a proper distribution of our advertising effort and to insure that advertising is properly merchandised to our various sales representatives. This individual is furnished with a company owned car, while an advertising truck for the installation of signs, repairs and other purposes is maintained. All expense items above are incident to field merchandising of our advertising effort.

Proper allocation of these expenses among channels must reflect either the allocation of effort of the advertising representative or work orders issued by the advertising representative calling for the utilization of the advertising truck. Accordingly, a complete review of the files of the advertising representative on his various duties and activities during 1940 was made to secure the proportion of his time devoted to direct shipment customers.

No time of the advertising personnel in the Detroit field in 1940 was devoted to direct shipment—other customers. An examination of the records indicated, however, that a small proportion of the effort of the advertising personnel should logically be charged against jobber business, either naphtha and gasoline or other products. Most of such time was found to be incident to sign installations or permits or preparing for dealer meetings which were attended in part by jobber representation.

1062 Advertising Representative

An analysis of the files of the advertising representative revealed a total of 53 hours devoted to jobber naphtha and gasoline or 3.076%, and 44 hours or 2.148% of his total time was chargeable to jobber other products. These same ratios were used to allocate salaries of clerical or stenographic time charged to the Advertising Department. Annual cost for this individual is shown on Sub-Schedule #2-A.

Advertising Painters

Two painters in the Detroit field spend a portion of their time on advertising work. Such time chargeable to advertising is based upon time cards maintained by the employees.

A review of work records of the painters indicated a few cases where signs had been painted at jobber outlets. Such time amounted to 3.93% of their total time chargeable to advertising painting. The number of hours worked each month on signs at jobber outlets was extended by the average hourly rate to secure the salary cost chargeable to jobber naphtha and gasoline, amounting to $103.95. Details are shown on Sub-Schedule #2-A.

Account 240—Donations
Account 075—Advertising—Other Costs (Including E.L.A.)

Donations are made by the field office to various worthy causes in the name of the Standard Oil Company and are designed to improve the good-will toward this organization. It is a cost which is purely assignable to our various tank wagon channels of distribution.

Account 075 represents advertising expenditures made in the Detroit field for consumer advertising and point of sale merchandising. A part of the charges to this account result from costs incurred by construction men making repairs on advertising signs at retail outlets or sign
1063 installations. The first step in breaking this account
down required a review of all work orders, Form 0133, for the year 1940 to indicate the work done at all jobber outlets, the materials used, and the time involved on the part of construction employees. From the nature of the work, most of the charges could be made direct either to jobber naphtha and gasoline or jobber other products. Where the work was on signs having an institutional character and not incident to a specific product, it was allocated among products on the basis of gallonage. The number of hours thus determined times the hourly rate plus cost of materials used resulted in charges by channel to jobber

product classifications as is shown on Sub-Schedule #2-A, amounting to $270.01 naphtha and gasoline, and $30.77 jobber other products.

During the year 1940 the following specific expenditures were made at point of sale in the Detroit field:

Photos given away	$ 344.13
24 x 44 Cards	988.03
Station Banners	2,095.73
Display Cards—Window Stickers	103.24
Decalcomanias for Pumps	775.07
Booklets, leaflets, etc.	1,326.39
Miscellaneous printed matter	140.88
Average Cost per Outlet	5.44

Extending the cost per outlet by the number of jobber outlets results in the charge to jobbers of $636.48.

The above types of expenditures can most logically be allocated on an outlet basis.

1064 **Road Maps** $5,578.45

There is a tendency for this type of advertising material to follow gasoline volume. Therefore, 18.4% of the total reseller gasoline moved through jobber channels. This proportion of the charge was assessed against jobber naphtha and gasoline, amounting to $1,026.43.

It is our practice to charge off all signs installed during the year in which the installation occurred. Records of date of installation are maintained only on Standard Service signs. For the residual signs that may be installed at jobber outlets, the total number of signs or jewel globes installed was amortized on the basis of estimated life. This resulted in the following:

18	Standard Service Signs installed during 1940	$1,068.30
8	Standard Oil Product Signs—estimated life 22½ years—annual charge 25¢ per sign Total	2.00
8	Iso-Vis Signs—estimated life 12½ years—annual charge 24¢ per sign—Total	1.92
12	28 x 44 Frames—estimated life 4½ years—annual charge $1.34 each—Total	16.08

249	Red Crown and Stanolind Jewel Globes—estimated life 6 years—annual charge 87¢ Total	216.63
119	Solite Jewel Globes—estimated life 6 years—annual charge 45¢—Total	53.55
	Total—Advertising Signs at Jobber Outlets	$1,358.48

1065 Jobber Costs Detroit 1940

Dealer Point of Sale Material	$ 636.48
Station Signs	1,358.48
Road Maps	1,026.43
Total	$3,021.39

Allocating the above charge on a gallonage basis between gasoline and other products, we find that 99.465% of the gallonage sold to jobber accounts is gasoline. Therefore, jobber naphtha and gasoline advertising cost is $3,005.23, and jobber other products advertising cost is $16.16.

The allocation of depreciation expense on vehicles used by the Advertising Department to jobber naphtha and gasoline and other products was predicated upon the ratios of effort used for the allocation of salaries.

Sub-Schedule #2-C

Final Adjustment of Comparative Statement of Expense (Supporting Schedule #2, page 23)

This Sub-Schedule reflects the final adjustment of expense items shown on our Comparative Statement of Expense, Detroit Field 1940, Form 189. Advertising costs incident to direct shipment are first removed from previous charges and are allocated among the direct shipment channels. The final line under each sub account on this Sub-Schedule #2-C will be found on Schedule #2, page 23.

1071 Reciprocal Advertising Benefits

In the foregoing analysis of advertising costs directed to determining the charge against direct shipment business, all consumer advertising has remained wholly as a charge against tank wagon and other method business. No part of this should be considered as a charge against jobber or other direct shipment business. The respondent contends that this is the only logical position that can be taken on such charges for the following reasons:

The respondent supplying company secures a reciprocal advertising advantage from jobber distribution which it does not and cannot secure from tank wagon reseller outlets. During 1940 the four Detroit jobbers spent the following quantities on advertising:

	Wayne Oil Co.	Citrin-Kolb Oil.Co.	Ned's Auto Supply	Stikeman Oil Co.	Grand Total
Direct Mail	$ 443.54	$ —	$ —	—	$ 443.52
Newspapers	932.38	395.40	77,486.94	—	78,814.72
Posters	8.24	1,290.00	5,580.00	—	6,878.24
Radio	90.00	—	16,280.00	—	16,370.00
Signs	408.80	1,359.63	617.73	—	2,386.16
Hand Bills	521.65	43.25	15,903.59	—	16,468.49
Novelties	903.84	325.61	—	—	1,229.45
Donations, etc.	96.02	547.50	1,269.00	—	1,912.52
Paint	459.90	—	—	—	459.90
Miscellaneous	552.84	—	1,263.31	—	1,816.15
Grand Total	$4,417.19	$3,961.39	$118,400.57	—	$126,779.15
Gasoline					
% Realization	70.1%	81.06%	19.3%	—	
Cost	$3,096.45	$3,211.10	$ 22,851.31	—	$ 29,158.86
Gallons	2,340,671	5,221,996	4,310,465	—	13,640,303
¢ Gal.	.13¢	.06¢	.53¢	—	.21¢

1072 The grand total advertising expenditure for each jobber was extended by the proportion of gasoline realization, excluding tax, or total sales. This resulted in an allocation of advertising expenditure to gasoline of $29,158.86 which, when divided by total gasoline volume, results in a per gallon expenditure of .21¢.

During this same period total advertising expenditures in the Detroit field tank wagon reseller channel by the Standard Oil Company, including sub accounts:

005—Salaries—Advertising
033—Traveling Expense—Advertising
048—Operation and Maintenance of Vehicles—Advertising
075—Advertising—Other Costs

103—Depreciation Expense—Vehicles—Advertising amounted to $131,641.88, or .19¢ per gallon. The per gallon advertising expenditures on the part of the jobbers, therefore, are almost identical with advertising expenditures by the respondent company, and whereas it is obvious that jobbers receive a benefit from our expenditures, we in turn receive a compensating benefit from expenditures by jobbers. This same reciprocal relationship does not exist between the supplying company and the tank wagon reseller outlets.

What advertising expenditures would be required in Detroit if it were not for the benefit of this reciprocal advertising on the part of jobbers, of course, is a matter 1073 that would have to be decided by management. That an increase would be necessary is quite likely as is indicated by the following chart showing the relationship between advertising expenditures during 1940 and the potential market in each of our various sales fields. Notice that according to the potential Detroit and Denver are the fields most under-expended of our entire group of sales divisions. Because of jobber expenditure and representation in these two fields it is unnecessary for the Standard Oil Company to make the advertising expenditure which otherwise would be required in this market.

The Standard Oil Company does not make any advertising allowance to its jobbers. Many other large suppliers recognize the advertising value of such distributors by defraying a part of the distributor's advertising expenditures. This is not done by the Standard Oil Company although an advertising value is recognized.

The amounts of money spent by jobbers advertising is not a matter of contract as the Standard Oil Company exercises no influence over such expenditures. Such expenditures are incurred in the daily conduct of their business.

Schedule #3

Delivery and Warehouse Cost

Salaried Drivers

Account 006—Salaries—Drivers
Account 053—Operation & Maintenance of Vehicles—Trucks
Account 106—Depreciation Expense—Vehicles—Motor and Horse-drawn

Deliveries in all of the major metropolitan markets to tank wagon reseller and consumer accounts are made largely by salaried drivers operating company owned trucks. Such employees maintain a time card which is used in the distribution of their salaries among channels. The expenses incident to trucks operated follow the distribution of effort of the drivers except for the minor exceptions noted below. The salaried driver makes no delivery of a direct shipment nature either to jobbers or other direct shipment customers as such accounts are served from terminals in carload quantities.

Sub Accounts 053 and 106 show a small charge against jobber and direct shipment customers for the operation, maintenance, and depreciation of trucks utilized by company employees. These small charges were incurred on truck operation employed in part in the maintenance of dispensing equipment loaned to jobbers and direct shipment customers. The proportion so charged was predicated upon the actual time in which each construction man's truck was utilized on maintaining equipment loaned to these customers during the year.

The total cost for the operation and maintenance of construction men's trucks for 1940 was divided by the construction men's hours of work to secure a truck cost per hour amounting to 18.43¢. The actual time of the construction men employed on equipment loaned to jobbers was taken from Form 0133 which showed the hours devoted to each maintenance job by each construction man. This
indicated a total of seven hours of the construction
1077 men's time was utilized for maintaining gasoline
equipment loaned to jobbers during 1940. This was extended by the 18.43 cents per hour, resulting in a cost of $1.29.

Depreciation costs on our books are determined by applying a rate agreed upon with the Department of Internal Revenue. Procedure followed for spreading this cost was the same as that for operations.

Commission Drivers

Account 021—Commissions
Account 024—Expense of Transferring Standard Fuels Due to Lack of Storage
Account 025—Truck Rental Expense
Account 055—Vehicle Tank Expense—Other than Mounted on Company Chassis

These marketing expenses are incurred in the distribution of our products by employees compensated on a commission basis. Expense of transferring Standard Fuels due to lack of storage, truck rental, and vehicle tank expense—other than mounted on company chassis—are each allocated between the tank wagon reseller and the tank wagon consumer channel on the basis of commission tank wagon gallonage in these two channels. Inasmuch as commission employees make no deliveries to jobbers or other direct shipment customers, this expense is solely chargeable to tank wagon business.

Bulk Plant Cost

Account 008—Salaries—Warehouse Labor
Account 069—Plant Maintenance
Account 061—Rental Expense
Account 062—Water, Light, Fuel (Other than Main Office)
Account 063—Telephone and Telegraph (Other than Main Office)
Account 087—General Supplies Used
Account 088—Station Operating Tools and Equipment
Account 110—Depreciation Expense—Plant (Building, Machinery, Equipment, Furniture, & Fixtures)
Account 112—Depreciation Expense—Real Estate Improvements
Account 086—Taxes—Real Estate & Personal Property

In the main, all of the above items of expense are incurred at bulk plants used in the regular conduct of serv-
ing tank wagon reseller, tank wagon consumer, and
1078 method sales channels. All such items of expense
incurred solely at the bulk plant are in no manner

affected by direct shipment customers or jobbers. As such, the expenses thus incurred are chargeable solely to tank wagon business. The exceptions to the above general treatment of expenses are indicated in Accounts 110, 112, and 086, resulting from the field office being included as a part of these expense classifications.

The depreciation expense on the Main Office, the real estate improvements incident to the Main Office and taxes were allocated to direct shipment channels on the ratio of the man hours devoted to direct shipments in the Main Office to total man hours of the Main Office. Thus, the depreciation on investment other than real estate improvements amounted to $7,901.15 for the year. Total Main Office employees" time devoted to jobber gasoline sales equalled 1.22% of the total man hours worked by all employees in the office. Applying this ratio to the depreciation costs results in a charge for this product and channel equal to $96.63.

Depreciation on real estate improvements and taxes were handled in exactly the same manner.

Sub-Schedule 3-A given annual charges to direct shipment business by channel and the unit cost per hour or the annual percentage of such charge to the total marketing expense item. Only those items influenced by direct shipments are detailed on Sub-Schedule 3-A. Costs shown on the last line are found on Schedule #3 under direct shipment customers.

Sub-Schedule #3-C

Illustrating Final Adjustment of Comparative Statement of Expense Supporting Schedule #3

This Sub-Schedule reflects the final adjustment of expense items shown on our Comparative Statement of Expense Detroit Field 1940, Form 189, for the sub accounts affected by direct shipment business shown on Schedule #3. The indicated necessary adjustment taken from Sub-Schedule #3 is deducted from the original channel cost entry to secure a new cost for tank wagon reseller, tank wagon consumer, and other methods channels, and redistributed to direct shipment channels according to Sub-Schedule #3-A. In each case the revised allocation to channel is balanced out against the original charges to the individual sub account.

Account 112A—Depr. Exp.—Real Estate Improvements (S. S. Owned Props. Comp.)

All of the above items of marketing expense are incurred in maintaining retail outlets served by the tank wagon method of distribution. As such the expense and income is entirely a charge or credit against tank wagon business. None of this expense is applicable to, or influenced by, jobber or other direct shipment customers.

The expenses and income incident to automobile supplies at all such outlets are isolated and charged direct to this merchandise. The residual amount repre-
1086 senting income and expense incident to the distribution of petroleum products through these outlets is allocated between the tank wagon reseller and the other methods channel of distribution on a gallonage basis.

In the course of our regular treatment of these expenses and income items any surplus of rent income over expenses is handled as a credit against other marketing expenses, and for any field having a surplus of expense over an income, these items are regarded as a part of our marketing expense through the tank wagon reseller channel in that particular field.

Schedule #5

Marketing Expense Items Incurred at Privately Owned Stations Not Leased But Engaged in the Distribution of Our Products

Account 070—E. L. A. Expense
Account 111—Depreciation Expense—Plant—E. L. A.

Property records indicated the exact pieces of dispensing equipment loaned to jobbers and other direct shipment customers. An analysis of Forms 0133, being a record of time of construction men devoted to each individual maintenance job for the year 1940, gave the time spent repairing equipment loaned to jobbers and direct shipment customers. No repair materials or installation costs were incurred on any such equipment loaned to jobbers during 1940. The construction men spent a total of seven hours repairing our gasoline dispensing equipment loaned to jobbers, which was extended by the hourly rate resulting in a cost of $8.95. This item and others similarly calculated are shown on Sub-Schedule No. 5-A.

The record of our equipment at direct shipment customers' locations was taken from our books together with the value of each piece of equipment. Thus the value of equipment loaned to jobbers for dispensing naphtha, gasoline, and refined oil amounted to $414.49. This was depreciated at four per cent (4%), giving a total depreciation figure chargeable to jobber gasoline of $16.56 (See Sub-Schedule No. 5-A).

513—Losses by Dismantling—Out-of-pocket Expense—E. L. A.

No such item of expense was incurred during the year 1940 on any jobber or other direct shipment customer.

All supporting Sub-Schedules 5-A, 5-B, and 5-C, showing the necessary adjustments of our channel marketing costs, follow.

1089

1093 **Explanation of Schedule #6**

Credit Information—Bad Debts and Recovery
Detroit Field—1940

Account 208—Credit Information Expense

Sub-Schedule #6-A shows the procedure followed in allocating various types of credit information expense to direct shipment customers. Actual costs applicable to each class of direct shipment customer were taken from the accounting records. In addition to this, amounts chargeable to credit card customers were prorated to the jobber channel on the basis of the number of credit card tickets handled.

For example: The credit card information expense in 1940 amounted to $11,960.97. During the year the proportion of total credit card tickets received from jobbers was applied monthly to the credit information expense incurred. By applying these ratios a charge to jobber accounts of $1,203.90 was obtained, to which $5.26 was added, representing direct jobber report expense. The total of these two was then spread to product on a realization basis, i. e., 90.148%, or $1,090.04, was charged to jobber—naphtha and gasoline; and 9.852%, or $119.12, to jobber—other products.

Costs incurred by direct shipment customers—others—were obtained by extending the number of reports (36) secured during the year by 87.5¢, the average cost per report. This charge amounted to $31.54.

1094 **Account 400—Bad Debts Collected—Written Off Prior Years**

Account 510—Losses by Bad Debts

Each entry to the above sub accounts made during 1940 was analyzed to determine the proper means of entering these expense credits or debits by channel, by product. A review of the individual items of bad debts collected showed both the customer and the product on which the bad debt had been incurred. As indicated on Sub-Schedule #6-A, $1,343.96 was credited to direct shipment customers—other—as a result of this review.

The jobber portion of this account was made up entirely of bad debt collections on credit card accounts, some part of which may have represented original sales by jobbers. To allocate a part of this cost to jobber channels a proportion of tickets received from this source was again used. The ratio of dollar value of realization of gasoline (excluding tax) to total value of jobber sales to credit card accounts was used to prorate the jobber channel expense to product. This channel cost amounted to $7.81, of which $7.04 was spread to naphtha and gasoline, and 77¢ to other products.

No losses by bad debts were incurred on direct shipment customers—others—during the year 1940. The expense charged to the jobber channel and product was made up of bad debt losses occasioned by credit card accounts which were allocated on a ticket and realization basis as in Account 400.

1095 Account 511—Expense—Collecting Bad Debts—Current Year

Account 512—Expense—Collecting Bad Debts—Prior Year

The total amount of Account 511 was $1.50 in 1940, made up entirely of credit card customer expense. Again tickets and realization were used as a basis of allocation, resulting in a charge to jobber—naphtha and gasoline of 16¢ and to jobber—other products—of 2¢.

Account 512 amounting to $2.50 was handled in exactly the same manner as Account 511, the jobber charge in this case amounting to 32¢ on gasoline and 4¢ on other products.

The residual amount of expense incurred in any of these accounts was charged direct to tank wagon reseller and consumer, and other methods sales channels; or, was allocated between tank wagon reseller and consumer channels; or, was allocated among tank wagon reseller, tank wagon consumer, and other methods channels on an all gallonage basis (excluding direct shipment sales).

SUB-SCHEDULE #6-A

(Supporting Schedule #6, page 55)

1097

Sub-Schedule #6-B

Illustrating Adjustment of Comparative Statement of Expense (Supporting Schedule #6, page 55)

In adjusting the channels shown on Form 189 for the year 1940 each individual expense item incident to:

208—Credit Information Expense
400—Bad Debts Collected—Written Off Prior Years
510—Losses by Bad Debts
511—Expense Collecting Bad Debts—Current Year
512—Expense Collecting Bad Debts—Prior Years

was traced to the books to see how it was originally charged and removed from the channel on the basis of its original treatment.

To illustrate: Charges resulting from credit information expense had originally been charged to the various channels on a gallonage basis. Therefore, the proportion of these charges incident to direct shipment business was removed from the original channel allocation on Form 189 on a gallonage basis.

Sub-Schedule #6-C shows the adjustment made to the marketing channels shown on Form 189.

SUB-SCHEDULE #6-B

1101 Explanation of Schedule #7

Field Office and Accounting Cost
Detroit Field—1940

Account 200—Office Expense—Salaries Accounting

In our regular costing procedure no effort is made to segregate time and expense incident to direct shipment sales. The accounting work necessary is absorbed by the regular personnel. In this analysis it was necessary to isolate the time required in maintaining such records and charge direct shipments accordingly. Such expenses were segregated to channels and products according to various standards to be explained under each outline of procedure.

1. Time Study in Direct Shipment Tickets

From August 11 through September 10, each member of the Accounting Department having any association with direct shipment sales maintained a time card showing his time devoted to direct shipment business segregated as to jobber naphtha, gasoline and refined oil; jobber other products; and other direct shipment customers. This record was posted daily by each employee. A full month was used to establish such time standards as the flow of work does not remain constant in all departments each day of the month. A record of direct shipment tickets handled during this period also was maintained. The record of time devoted to direct shipment business for each position was divided by the number of direct shipment sales tickets handled to secure a time per 100 tickets.

A count of all direct shipment tickets was taken from Form 27 by months for the year 1940. The number of direct shipment tickets by month was as follows:

1102	January	350	July	334
	February	294	August	449
	March	281	September	722
	April	339	October	846
	May	349	November	425
	June	368	December	427

The number of tickets was extended by the time required for each position, giving monthly effort in minutes, which was extended by the compensation per minute to secure the total cost of direct shipment business for that position for each month of the year.

This total direct shipment cost for each position by month was then allocated between jobber, naphtha, gasoline and refined oil; jobber, other products; and other direct shipment customers, on the basis of the time split found to exist during the month the time study was conducted.

All individuals in the following departments having any activity touching upon direct shipment business were handled on this basis:

Federal and State Tax Clerk
Check Record Department
Accounts Receivable (Other than dealer assigned sales)
Order and Price Department
Billing Department
Credit Department (Other than dealer assigned sales)
General Accounts Department
Stock Department

In addition to the regular employees of these various departments, there were four utility clerks whose time was divided among the various departments. Accordingly, their salary was allocated on the ratio of direct shipment time to the total time worked of all of the departments combined in which they worked.

1103 2. Mailing Department

It was necessary to handle the mail room costs on a slightly different basis. The individual time sheets maintained by employees showed time spent mailing statements to credit card accounts, and time spent preparing and mailing stationery to jobbers. They also maintained a record of statements mailed which, when divided by the number of sales tickets, gave a cost for handling per 100 sales tickets. The total number of dealer assigned sales tickets originating from jobbers, by months for 1940, was extended by this cost per 100 to secure a mailing cost incident to the operation of the mail room.

The time spent preparing and mailing stationery to jobbers during the month in which the time card was maintained was charged each month of 1940.

Time in minutes thus determined was extended by the cost per minute to secure a cost incident to salaries of mail room operation, which was then allocated between jobber naphtha and gasoline and other products on the basis of value of sales tickets involved.

3. Time Study Based on Number of Invoices

General file clerks have as a part of their duties the filing of all invoices of sales. Accordingly, they were requested to maintain a record of that part of their time devoted to filing invoices and the number of invoices filed covering sales to jobber and other direct shipment customers. Such sales are reported on Form 82-D. The time divided by number of invoices equals rate per invoice. Thus, a full time file clerk filed 824 invoices in 352 minutes, or an average time per ticket of .427 minutes. Each sale made
1104 to a direct shipment customer results in an invoice.

Therefore, this time was extended times the number of invoices issued by month for 1940 for total time in this department. This time in minutes was extended by the date per minute to secure total cost of filing direct shipment invoices, which was then split between jobber naphtha and gasoline and other customers on the basis of number of invoices issued.

4. Time Study and Number of Sales to Credit Card Accounts

Certain file clerks spend all their time filing sales tickets (Form 090-D) resulting from sales on credit card accounts. Some such sales originate with jobber outlets and throughout this analysis have received a proportionate share of expense incident to handling such sales. These individual file clerks maintained a time sheet showing the number of hours spent filing and the number of sales tickets filed. The record of time and the number of tickets results in establishing a standard for filing per 100 tickets. This time standard per 100 tickets was applied to the number of jobber sales to credit card accounts to secure a cost for this function. The charge was allocated to product on a realization basis.

5. Time Allocation of Remittance Clerks

Remittance clerks handle remittances received from all classes of customers and coupons redeemed from coupon books. These individuals maintained time sheets showing the time spent on total remittance, number of remittances handled, and time spent handling jobber coupons redeemed. Total time recorded for handling remittances was split according to the number of remittances received from credit card accounts, other direct shipment customer remittances, and total jobber direct remittances.

1105 The charge for handling direct shipment business of remittance clerks is made up of the total of the following three items:

(a) The proportion of remittances received from credit card accounts, reflecting the proportion of sales made by jobber outlets split between jobber naphtha, gasoline and refined oil, and other products according to the ratio of the value of the sales tickets, plus

(b) Time spent in handling jobber direct remittances, split according to the value of sales, plus

(c) The time spent handling coupons redeemed, again split according to the percentage of value of sales as reflected by credit card sales.

6. Study of Effort of Creditmen, Junior Creditmen, and Clerks Handling Credit Card Business

The time of all these individuals is devoted 100% to credit card accounts. The total time was reduced to a ticket basis and applied to the number of credit card sales tickets originating from jobber outlets. Time so determined was extended by the rate per minute to secure cost for each position for each month of 1940. This was then split between jobber naphtha and gasoline and jobber other products channels on the basis of value as shown by the tickets.

7. Direct Shipment Time of Cashier

The cashier maintained a time record showing time spent writing customers checks, number of checks written, and time spent handling direct remittances. That portion of his time handling direct remittances was treated in the same manner as were the remittance clerks. Time
1106 incident to writing checks was handled on a per check
basis, which was extended by the number of checks issued to jobbers and other direct shipment customers by months, which was then allocated to channel on a value basis based upon purchases made during the month of August 1941.

8. Allocation of Effort of Index Clerk.

The index clerk sorts all invoices for credit sales, except regular credit card account sales, and sales tickets on credit card accounts where interfield billing is necessitated. This sorting is to prepare tickets for machine bookkeeping. The time spent sorting Form 082 invoices was divided by the number of invoices handled to arrive at a rate per minute. This rate was then applied against the number of jobber and other direct shipment customer invoices by month and the resulting minutes times the salary rate per minute gave a direct shipment cost for this function. The product split of the jobber portion of this time was based on the product distribution shown on time sheets prepared by machine bookkeepers.

The time spent handling sales tickets resulting from credit card accounts was allocated on the basis of time per ticket applied to the number of jobber credit card sales tickets by months for the year 1940. This resulted in total time chargeable to jobber credit card sales, which was then allocated between channels on the percentage of value as reflected by the tickets.

9. Check Operator—Other

This employee maintained a record showing the number of direct shipment sales tickets and the time required 1107 for handling. The time and number of tickets was used to establish a cost per ticket which was applied to the number of tickets handled each month during 1940. This was then split according to the ratio of time, by product, of machine bookkeepers.

10. Miscellaneous Accounting Employees

The following individuals' allocation of time between tank wagon and direct shipment business was predicated upon analyses of individuals dealt with in the above subclassifications:

(a) Accounts Receivable Supervisor—Time of this individual was allocated to direct shipment channel and product according to the ratio of direct shipment time of employees supervised to their total time worked.

(b) Check and Record Department Supervisor—Assistant Check and Record Department Supervisor—The time of these employees was allocated to direct shipment channel and product on the basis of distribution of effort secured from the time sheets of the employees whom they supervised.

(c) Payroll Clerks—Distribution of the salaries of these employees to direct shipment channel and product was made on the basis of the proportion of man hours applicable to direct shipment customers to the total man hours for all field employees.

(d) Telephone Operators—The salaries incurred for telephone operators were allocated on the basis of direct shipment man hours to total man hours of all employees in the field office. The distribution to product was based
1108 on the effort proportions for total direct shipment charges of all main office employees.

(e) Stenographic Department—The distribution of salaries of the Stenographic Department serving the Accounting Department was based on the ratios of direct shipment salary cost to total salary cost of the accounting payroll.

(f) Utility Supervisor—Salary of this individual was allocated on the basis of the sum total distribution of effort in the various departments supervised, including order, price, billing, tank car, traffic, mail and stationery.

(g) Assistant to Office Manager—The salary of this individual was allocated to direct shipments on the basis of the distribution of effort of all individuals working in the various departments supervised, including check and record, stenographic, utility clerks, and file clerks.

(h) Assistant Office Manager—The salary of this individual was allocated to direct shipments on the basis of the distribution of effort of all individuals in the various departments working under his supervision, including general accounts, accounts receivable, stenographic, payroll, construction, real estate and tax.

(i) Office Manager—The salary of this individual was allocated on the basis of the distribution of effort of all employees in departments supervised, including the total accounting and credit departments.

The net influence of the distribution of costs of the Accounting Department as above outlined are shown on Sub-Schedule #7-A.

1109 Account 201—Office Expense—Stationery and Office Supplies

A study was made of all stationery forms used by items for a twelve-month period. The quantity of each item so determined was extended by the cost to secure an annual charge. By this process we were able to isolate $13,213.25 out of a total of $13,556.56, the difference representing miscellaneous stationery items. All forms were then classified as to those not affecting direct shipment business; those affecting direct shipment business only; and those affecting both tank wagon and direct shipment sales. Cost of individual items included in the last classification was reclassified according to—

(a) Cost incurred on stationery affecting both tank wagon and direct shipment business in general	$ 962.52
(b) Cost of stationery used in maintaining records on credit card sales	3,747.03
(c) Cost of stationery used affecting lubricating business whether handled on a direct shipment basis or through our bulk plants	107.10

Procedures used in allocating these expenses to direct shipment business by channels were as follows:

(a) Affecting Both Types of Business Generally

Stationery and forms are used by individuals maintaining records of sales accomplishments by the Standard Oil Company. All forms included in this classification should be chargeable to direct shipments on the basis of distribution of effort of individuals working on these forms. It seemed, therefore, that the most logical means of allocation
1110 would be to use the ratio of the distribution of total field effort for the allocation of that part incident to direct shipment business.

(b) Forms Used for Credit Card Sales

This expense item was first allocated between tank wagon and jobber business on the basis of number of sales made through each respective classification of outlet. Thus, 10.22% was charged to jobber business. This was allocated between gasoline and other products on the basis of the realization as shown by the tickets.

(c) Forms Used on Lubricating Sales

The allocation of the expense of these forms to product and channel of direct shipment business was predicated upon a distribution of effort of the sales promoter in charge of industrial salesmen.

In addition to the above three means of allocating expense for stationery, direct charge was made to other direct shipment customers for forms used on such accounts only, amounting to $5.42. Detail on all of the above items is to be found on an annual basis on Sub-Schedule #7-A.

Account 202—Office Expense—Postage

A large part of this expenditure is incurred in handling correspondence with credit card accounts. Such postage is maintained separately on Form 421-A by months throughout the year. This total postage expense was multiplied by the proportion of the sales to credit card accounts made by jobber outlets to secure a cost per month, which was then allocated to jobber naphtha and gasoline and other products on the ratio of the realization shown by such sales.

1111 In addition to the jobber cost thus calculated, the number of invoices, number of statements and the number of letters written to jobbers and other direct shipment customers during the year 1940 was counted from our files. Each of these mailings was assessed a uniform postage cost of 2 cents. Total direct shipment cost, therefore, is made up of the sum total postage expense as above prepared. The amount on an annual basis is shown on Sub-Schedule #7-A.

Account 203—Office Expense—Telephone and Telegraph

Total cost for this function was taken from Form 189 by months for the year 1940 and was split to direct shipments on the basis of total hours devoted to direct shipment business by all employees in the Main Office as a proportion of total hours of all employees in the Main Office. This calculation was carried through on a monthly basis.

Account 204—Office Expense—Exchange

A record of all remittances received from each class of customer was kept during the month of August 1941. From this record it was found that 64.293% of the remittances were from credit card customers, .985% from jobbers, and 2.453% from other direct shipment customers.

The remittances received each month in 1940 were counted, numbering 101,755 for the year, together with the checks issued to jobbers and other direct shipment customers, amounting to 244 and 38 respectively. The average exchange cost was obtained for each unit of the year.

The credit card cost was determined by applying 64.923% to the total number of remittances, 101,753, and extending by the cost per unit, 1.293 cents. This result was then spread to the jobber channel on the basis of the number of sales tickets received and to products according to realization returned.

1112 Direct shipment costs were obtained by applying .985% and 2.453% to the total number of remittances and extending by the cost per unit. The jobber cost was again spread on a realization basis according to the products sold to the jobbers.

The number of checks to jobber and other direct shipment customers were counted for the year and extended by the exchange rate, allocation of jobber costs to product being made again on a realization basis.

Account 205—Office Expense—Operation and Maintenance of Vehicles—Office Automobiles

A company owned car is furnished the Office Manager in each of our sales divisions. This car is used wholly by the Office Manager and accordingly was allocated to product and channel of marketing on the basis of the distribution of the sum total effort of the Accounting Department.

Account 206—Office Expense—All Other—Water, Light, Fuel, Rent, Etc.

All man hours spent on jobber and direct shipment business in the field office were recapitulated and expressed as a proportion of the total man hours worked in the field office. In all of our previous calculations a distribution of effort was carried through by channels; therefore, the recapitulation of the effort of the individual employee resulted in an effort factor for each direct shipment product or sales channel. These ratios were applied direct to this expense item to secure an allocation.

Sub-Schedules #7-B and #7-C, supporting Schedule #7 and illustrating adjustments made to previous charges on our Comparative Statement of Expense Form 189, Detroit field, 1940, follow.

1119 Explanation of Schedule #8

Supervision Cost Incurred in the Field Office

Account 000—Salaries—Supervision
Account 030—Traveling Expense—Supervision
Account 045—Operation and Maintenance of Vehicles—Supervision
Account 100—Depreciation Expense—Vehicles—Supervision

Expenses entering into these accounts are the salaries and expenses incident to the position of manager, two assistant field managers, superintendent of construction, assistant superintendent of construction, superintendent of equipment, superintendent of maintenance, superintendent of tank wagon, and plant supervisors. In the allocation of this expense it was necessary to study the distribution of effort of each of the individuals involved.

A review of the field manager's file and expense book throughout the entire year 1940 revealed the number of contacts and direct selling time put in by the field manager. This was regarded as direct selling time against jobber operations and was calculated for each month during the year and deducted from the total salary of the field manager. The residual amount of the salary was allocated among the various channels of distribution according to the ratio of the sum total of hourly effort devoted to direct shipment customers to the total field hourly effort put in by all individuals working under the manager's supervision.

The same procedure outlined above was used in allocating the ratio of effort of each of the assistant field managers among the various channels of sales in each case based on the supervision ratio of the distribution of effort of individuals supervised.

1120 The superintendent of construction and the assistant superintendent of construction spent practically no time on jobber accounts. A complete review of each sketch of any plant layout or project undertaken by the construction department in 1940 did indicate, however, that the superintendent of construction had spent a small amount of time in a consulting capacity with jobbers on some of their proposed modernization of outlets or new outlets. The complete record on each project exists in the construction department from which it was possible to determine the proportion of effort devoted to this class of business. Effort so measured was used to determine the allocation ratios among the various channels of distribution.

The superintendent of equipment is in charge of our machine shop and maintains our automotive equipment. The cost of the machine shop expense was calculated upon an individual vehicle basis and then allocated according to the distribution of effort of the individual to whom the car was furnished. This cost was then expressed as a proportion of the total machine shop cost per month and the ratio thus determined used to allocate the salary of the superintendent of equipment to the respective sales channels.

The superintendent of maintenance is in charge of maintaining our distributive equipment. A complete analysis of all work orders maintained on Form 0133 (time record) numbering several thousand, revealed the amount of work on equipment at jobber accounts. Time of the various employees spent on jobber and direct shipment customers so determined was expressed as a percentage of total for this class of employees, and the salary of the superintendent of maintenance was spread on the basis of the allocation of effort of men working under his supervision.

1121 The superintendent of tank wagon has charge of tank wagon distribution out of our various bulk plants. Inasmuch as all jobbers secured their supplies of gasoline on a tank car basis, no change from our present method of distribution of this expense was made. This expense is incurred only on tank wagon operation. This is likewise true of the bulk plant superintendent.

The above outline by individual positions presents in complete detail procedure followed without revealing individual ratios, salaries, etc. Expenses incident to supervision had to be handled on an individual position basis. If the explanation of this account were given in similar detail to that of other sub accounts, it would necessitate making part of public record individual salaries and other expenses incident to individual employees. The respondent is reluctant to do this.

Ratios of time devoted to direct shipment business for each individual whose salary and expense are included under supervision costs, determined according to the above outline, were as follows:

Position	Jobber Naph. & Gaso.	Jobber Other Products	Other Direct Shipment Customers
Field Manager	1.73%	.06%	1.23%
Asst. Manager Wholesale	.41	.04	1.36
Asst. Manager Reseller	.59	.06	.31
Construction Superintendent	.25	.02	.02
Equipment Superintendent	.03	.01	.57

The above ratios represent the annual proportion of expense chargeable to direct shipment business, which amount had previously been determined by the application of monthly ratios to monthly costs. The application of such
ratios to salaries and expenses of the individuals in
1122 this classification resulted in a reallocation of these
expense items as is shown on Sub-Schedule #8-A.

Account 001—Salaries—Supervision—Others

Salaries shown under this classification of expense represent the stenographic and clerical assistance afforded to the men working in a supervisory capacity. In each case the allocation of time of the individual for whom they work was used to allocate the time of their stenographic and clerical assistants.

The usual sub-schedules #8-B and #8-C illustrating the method of removal of direct shipment costs from regular channels of expense on our Comparative Statement of Expense, Form 189, Detroit Field 1940 follow.

1127 Explanation of Schedule #9

Losses—Taxes—Insurance and Additional Salary Considerations
Detroit Field—1940

Account 500—Losses by Accident—Property & Other Than Company Employees
Account 501—Losses by Property Damage—Company & Other Than Company Property
Account 502—Losses by Fire
Account 507—Losses—Miscellaneous

All individual losses in the above accounts and full information thereon was taken from the files to determine the proper allocation of each individual expense item. Where the cost was incident to the activity of one of our employees, the allocation among channels was based upon the distribution of that employee's efforts. Thus total charges to Account 500 amounted to $2,276.05. An examination of the individual losses revealed that $927.59 was associated with individuals having a connection with jobber and other direct shipment customers. Individual charges, therefore, were split according to the ratio of the effort of the individual involved, as reflected in Sub-Schedule #9-A.

Under Account 501 an expense item of $108.89 was found to be incident to the activities of an industrial salesman and the proportion of his effort was applied to this loss, resulting in a charge to direct shipment—other customers—to the extent of $19.24.

No loss by fire was incurred on any business other than tank wagon in the Detroit field in 1940. Our losses—Miscellaneous, representing a net income through the tank wagon reseller, consumer, and other method channels resulted from realization upon losses previously written
1128 off. The small charges indicated under this account as expense against jobber business resulted from small monthly charges to Account 1308, being minor adjustments incident to lack of balance of credit card sales against book entry. This minor expense was allocated on the basis of jobber sales to credit card accounts as a ratio of total sales to credit card accounts and then allocated to product on the basis of gasoline value (excluding taxes) as a percentage of total value of jobber sales to credit card accounts.

Account 503—Losses by Storm and Flood

This is a direct field charge resulting from either dismantling, repairs, or product losses incurred in the field due to either storm or flood. Inasmuch as no such loss was incurred on the field main office, there would be no charge against direct shipment customers. This charge is incident only to tank wagon operation and is either a direct charge to channel or is allocated among channels either on the basis of tank wagon gallonage or all gallonage basis excluding direct shipments

Account 243—Taxes—Old Age Benefits
Account 244—Taxes—Unemployment Insurance
Account 520—Annuities and Retirement Plan Expense

The entire analysis of the distribution of effort of individuals on the payroll was conducted on an individual person or position basis. For all such expenses as those covered by the above items they were handled in exactly the same manner as we handled the salaries of the individual positions. Such payments are, in fact, a part of the salary
consideration of employees in the company.
1129 Under Account 243 the rate applicable was applied
only to the first $3,000 annual income for any position. Thus, total salary charges to jobber—gasoline and refined oil—amounted to $3,635.34. The application of the one per cent to the monthly accumulation of all such minor charges by individual positions resulted in a total charge of $37.45, averaging 1.03% against total salary charges.

Under Account 244 the rate established in the state of Michigan for the year 1940 for 3.03%, which was applicable to the entire earnings of each individual. Again this rate was applied to the monthly charges to direct shipment by channel for each individual for each month of the year, resulting in an annual charge to jobber—gasoline and refined oil—of $121.56.

Under Account 520 the rate of 2% is applicable to the first $250 per month salary and 5% is applicable to any income over that amount. The rates were applied to individual salaries on this basis and allocated among channels according to the distribution of effort used in allocating salaries of the individuals involved. This resulted in a charge of $88.99 shown on Sub-Schedule #9-A under jobber—gasoline. This charge represented .34% of the total field cost of $26,226.38. Therefore, this ratio was applied to the General Office payment of past annuities and accumulation for future reserves, amounting to $130,787.89, resulting in an additional charge to jobber—gasoline—of $444.68, which when added to the direct charge of $88.99 resulted in a total charge of $533.67.

1130 Account 506—Losses by Dismantling—Abnormal—Other than ELA
Account 514—Losses by Dismantling—Out-of-Pocket Expense—Other than ELA

Individual Dismantling charges under these two sub accounts were analyzed and no dismantling expense was incurred at any jobber or direct shipment business entering into these accounts. They are, accordingly, charges direct to tank wagon reseller, tank wagon consumer, and other method sales channels, and are allocated among these channels on a gallonage basis.

Account 245—Taxes—All Other

The charge to this account represents the total of all taxes not specifically enumerated and handled in previous accounts. The total is the sum of differences between amounts collected from customers and payments to the state of Michigan for the State of Michigan General Sales Tax; the Michigan use Tax; the Michigan Privilege Fee; and the proportion of the Federal Capital Stock Tax paid by this company allocated to the Detroit field.

Collections and payments for the Michigan General Sales Tax resulted in a small credit balance of $75.38. We do not serve as a collecting agent on jobber sales; therefore, any credit or debit from this source would not apply to their volume.

The Michigan Use Tax law does not apply to any business with direct shipment customers, but is applicable to materials used in the conduct of our regular tank wagon business. This amounted to $3905.29 and is allocated among channels on an all gallonage basis excluding direct shipments.

The Michigan Privilege Fee represents the charge to this company for doing business in the state of Michigan and is based on the assets held in the state of Michigan, which basis also provided the means for allocation to the 1131 Sales Department and fields operating in the state. The Detroit charge amounted to $22,331.62. The charge to direct shipment customers for this tax was based on the amount of investment at the field main office to total investment in the Detroit field, representing 2.061%. This was then allocated among channels and product on the basis of proportion of effort devoted to direct shipments by all employees assigned to the Detroit main office.

The Federal Capital Stock Tax charged to this Detroit field was allocated to classes of customers and product on the basis of total sales of all products for the year 1940. This particular expense was not regarded as providing any basis for a differential in price among customers.

Account 235—Insurance

The expense charged to this account represents losses from defalcations arising from making sales from our bulk plants and as such, has no relation to direct shipment business.

Account 525—Death Benefits

This company makes payments to beneficiaries of active employees and employees who have been retired on annuity at the time of death of the employee. The nature of this expense is similar to the company contribution to the Employees' Annuity Plan. For this reason the distribution of expense to class of direct shipment customer and product was made on the same basis that company contributions to the retirement plan on salaries applicable to direct shipment business bear to total contributions on total all salaries.

1132 Sub-~~Schedules~~ #9-B and #9-C, supporting Schedule #9 and illustrating adjustments made to previous charges on our Comparative Statement of Expense Form 189, Detroit field, 1940, follow.

Miscellaneous Marketing Expense Items

Account 054—Operation and Maintenance of Vehicles—All Other (Other than Office)

Account 107—Depreciation Expense—Vehicles—All Other —(Other than Office)

Expenses incident to the operation of vehicle furnished to, and operated by the superintendent maintenance are shown under these expense items. The allocation of these costs among the various channels of distribution was predicated upon the distribution of effort of the employee to whom the vehicle was assigned. The distribution of effort used in this allocation was the same as that used in allocating salary under Account 000—Salaries—Supervision. The charge by products and channel to direct shipment business and the proportion on an annual basis are to be found in supporting Sub-Schedule #10-A.

Account 065—Rent Revenue

There was no rent income from properties rented to jobbers or other direct shipment customers. The income shown under this account was from surplus property which came into our possession because of tank wagon business and hence, is a credit against expense in the tank wagon and other method channels.

Account 081—Demurrage and Railway Storage

The Standard Oil Company does not pay charges of this nature incurred on shipments to jobbers or other direct shipment customers. Expenses shown under this account were incurred on deliveries to our bulk plants and are shown under the various channels of distribution after being allocated on a gallonage basis, except as charged direct against automobile supplies.

1138 **Account 082—Personal Injury Expense**

During the year 1940 only three minor accidents occurred in the Detroit field to individuals having any association with direct shipment business. These three injuries resulted to the manager's chauffeur, the janitor at the Main Office, and a construction man, amounting in total to $16.50 for the three. Each of these three individual expense items was allocated among channels and product according to the distribution of effort of the individuals involved, the expense incurred on the manager's chauffeur being allocated on the basis of the distribution of total effort of the entire Detroit field. Sub-Schedule #10-A gives the detail on the calculation.

Account 083—Samples

All samples given away are shown on Form 091, "Report of Goods Used." Records for 1940 were reviewed and an accumulation made of all products by brand and quantity given to direct shipment customers. No samples were given to jobber customers. Samples given to direct shipment customers amounting to $97.75 were charged direct to this channel. The residual amount of expense was either:

(a) charged direct to other method channel provided the sample was of a product included in this channel or

(b) allocated among tank wagon reseller, tank wagon consumer, and other method channels on an all gallonage basis, excluding direct shipments.

Account 066—Miscellaneous Operating Expense

The name of this account is descriptive of its content. It is a collection of miscellaneous expense items too small to carry under separate classifications. To determine
1139 that part of these expense items which were influenced by direct shipments either to jobbers or other customers required an examination of each individual expenditure. This could only be done by pulling the expense vouchers from the file securing a description of the expenditure, and then determining the method that that particular expense item had been treated with in our regular costing procedure. Because of the tremendous volume of work involved in tracing literally thousands of expense vouchers, it was essential that the work be done on some sampling basis.

All expense vouchers of $5.00 or more included under this marketing expense classification during 1940 were taken from the files and work sheets prepared showing the voucher number a description of the expense the amount of the expense, and supporting data incident to the expense item. By dealing with all vouchers of $5.00 or more our sample represented $36,275.49 out of a total charge of $42,698.18, or 84.958% of all of the expense in this sub account. A sample of this magnitude provides an accurate basis for allocation of the entire amount. The sample was first allocated and then expanded to equal the whole.

Our first step was to classify the vouchers and then reclassify some portions thereof so that allocation procedures entirely consistent with the nature of the expense could be adopted.

Classification #1—Miscellaneous Operating Expense Not Influenced by Direct Shipment Business

In this classification were placed all expenses not influenced in any way by direct shipment customers. The greater portion of these items were found to be incurred
at our tank wagon bulk plants. Expenditures in this
1140 classification totaled $21,472.92 of our sample of $36,-
275.49, or 57.74%. Therefore, 57.74% of the original charges to this account are uninfluenced by direct shipment business.

These items had originally been charged direct to tank wagon reseller, tank wagon consumer, or other methods channels, or were prorated among tank wagon reseller and tank wagon consumer channels; or were prorated among tank wagon reseller, tank wagon consumer, and other methods channels on an all gallonage basis (excluding direct shipments). The nature of the individual item determined the allocation used. Inasmuch as all of these expense items had been properly allocated in our original costing procedure, no change was made.

Classification #2—Expenses Applicable to Jobber Sales

Two expense items were found which affected jobber business only. One was for a meeting place and the other was for meals at a jobber dealer meeting. Total expenses thus incurred during 1940 were $139.70, or .38% of our sample. These two expense items were expanded to 100% and charged direct to jobber naphtha, gasoline and refined oil costs.

Classification #3—Expenses Applicable to Other Direct Shipment Customers

Several small expenditures were found entirely due
1141 to other direct shipment customers. For the year
1940 these amounted to $389.48, or 1.07% of the total sample. This amount was expanded and charged direct to direct shipment other customers sales channel.

Classification #4—Expenses Applicable to Both Tank Wagon and Direct Shipment Business

The second largest classification of expense items applied to both types of sales, tank wagon and tank car, amounting to $14,802.57, or 40.81% of the sample which had to be allocated before expanding to 100%. The proper allocation of these expenses presented several difficulties. No one method of allocation seemed appropriate for the entire list as some expenditures had to do with over-all field operations, some with individuals, some with credit cards, etc. All expenses in this classification, therefore, were re-grouped so as to permit a selection of the most logical allocation among products and channels.

1142 Group A

Expenses of an Over-All Nature

All miscellaneous operating expense incident to supervision such as subscription to magazine, service pins, insurance on manager's car, club dues, annual sales meetings, etc. were included in this group. Total expense items included in our sample so grouped amounted to $2597.11.

The sum total distribution of effort of all employees in the Detroit field as recapitulated from the record of distribution of effort of individual employees established the allocation ratios used for this group of expenditures.

Group B

Expenses Incident to National Credit Cards

All miscellaneous operating expense incident to national credit card costs and coupon book sales were included in this group. The annual amount as reflected by our sample was $740.83.

The jobber portion of this expense was segregated on the basis of jobber sales to credit card accounts to total sales to credit card accounts. The allocation to product was based on gasoline value (excluding tax) to total value of sales as shown by jobber sales tickets to these accounts.

Group C

Lubricating Department

All miscellaneous operating expense incident to the Lubricating Department such as sales meetings, educational work, etc. was isolated under this group. The total amount thereof included in our sample was $6090.01.

The allocation of these expenses among products and channels was predicated upon the distribution of effort of the industrial sales promoter.

1143

Group D

Dealer Meeting Expense

All miscellaneous operating expenses incident to preparing and holding spring and fall dealer meetings were included in this group. The total amount of such expenditures during 1940 as reflected by our sample was $3065.95.

A review of registration of individuals attending the meetings revealed that operators of some outlets served by jobbers were in attendance. These expenses were first split between tank wagon and jobber on the basis of the number of jobber employees attending to total attendance at the meetings. Inasmuch as practically all of our sales to jobbers are gasoline and refined oil, this entire portion of this expense was charged to jobber naphtha and gasoline sales channel. The residual amount is allocated among tank wagon and other methods channels of distribution according to our regular accounting instructions.

1144

Group E

Reseller Salesmen's Meetings

All miscellaneous operating expense incident to holding periodical meetings of the reseller salesmen were included in this classification. The annual expenditures thus incurred as reflected by our sample amounted to $858.55.

The allocation of this group of expenditures among products and channels was predicated upon the recapitulation of the distribution of time of all reseller salesmen predicated upon number of calls. The allocation to product of the amount incident to jobber operations was also based on an analysis of calls made.

Group F

Wholesale Salesmen's Meeting Costs

All miscellaneous operating expenses incurred in holding periodical meetings of wholesale salesmen were included in this group. Annual expenditures for such purposes as revealed by our sample amounted to $137.06.

The allocation of these expenses to product and channels was predicated upon the distribution of effort of all wholesale consumer salesmen as based upon the distribution of their calls.

Group G

Expenses Incident to Individual Employees

All miscellaneous operating expenses such as moving expenses of individual employees were included under this group. The annual amount included in our sample for such expense items amounted to $1089.88.

Such expenses were allocated to product and channel according to the distribution of effort of the individual involved as had previously been determined and used in the allocation of salaries and other expense items incident to that particular position.

1145

Group H

Stationery Expense

All miscellaneous operating expense items that are incurred in Chicago for warehouse space and handling charges against stationery items were included in this group. This cost is first allocated to fields on the basis of all gallonage sales, excluding direct shipments. The Detroit proportion of this cost included in our sample analysis under this grouping amounted to $223.18.

This expense was allocated among the various sales channels on the basis of rates established in allocating sub account 201, "Stationery and Office Supplies," which was predicated upon actual cost of forms used for sales in the various channels.

1146 Account 084—Safety Expense—Salaries and All Other Expense

The files of the Safety Department were reviewed carefully and no operation of this department touched upon or was concerned with jobber or other direct shipment business during the year 1940 on any product other than gasoline. It is the responsibility of the manager of this department during the course of a year to ascertain that a lead content sign is on each pump marketing leaded gasoline. This responsibility applies to outlets served by tank wagons and outlets served by jobbers. Special trips into the sales territory are not made to secure this information, but each time a safety representative passes one of these outlets he pulls over to the curb and ascertains the desired information and continues on his trip. In the course of a year two hours of the time of the manager of the safety department was consumed in such brief inspections. This was expressed as a ratio of his total time, equalling .351% which was used for allocation of his salary and the stenographic time, the operation, the maintenance, and the depreciation of the safety supervisor's automobile. Total cost thus determined of $4.09 was made direct to Jobber Naphtha and Gasoline volume.

Account 215—Expense—Salaries—Others

Account 216—Expense—Traveling Expense—Others

Account 217—Expense—Operation and Maintenance of Vehicles—Automobiles—Others

A complete review of all files covering real estate transactions affecting jobber and direct shipment business was made with the head of the Real Estate and Tax Department. As a result of this analysis time applicable to direct shipment type of accounts was obtained separately for jobber business and other direct shipment customers. Time so determined was found to be 90 minutes for jobbers and 810 minutes for other direct shipment customers, which were expressed as ratios of the total hours of the individual in charge of this department, amounting to .073% and .659% respectively. These ratios were applied to total expenses
represented by the above accounts and applied direct
1147 to jobber gasoline and other direct shipment customers.

In addition, a part of the Safety Supervisor's time is included in Account 215. Time spent investigating accidents was determined and allocated to channels on the basis of the split of effort of the individual involved in the accident. This resulted in an allocation of 83 minutes to direct shipment business which when extended by the rate per minute, was allocated to channel and product. Charges resulting from safety expense were as follows:

Jobber—Naphtha and Gasoline	$ .10
Jobber—Other Products	.02
Other Direct Shipment Customers	2.18

Account 220—Expense—Employment Department—Salaries and Other Expense

The expense of this department is allocated on the basis of the direct shipment hours for the field expressed as a proportion of the total man hours of all employees in the field by months.

1148 Account 225—Expense—Salaries—Sub Station Auditors

Account 226—Expense—Traveling Expense—Sub Station Auditors

Account 227—Expense—Operation & Maintenance of Vehicles—Sub Sta. Auditors

The responsibility of sub station auditors is to audit company records at bulk plants owned and operated by the Standard Oil Company. Such activity does not touch upon or have any relation to jobber and direct shipment business, and, therefore, remains entirely a charge against Tank Wagon Reseller, Tank Wagon Consumer, and Other Method sales and is allocated to these three channels on an all gallonage basis. The minor charge of eight cents to direct shipment business under Account 227 resulted from the temporary loan of a sub station auditor's car to a member of the credit department and accordingly the cost incurred was allocated on this individual's direct shipment time ratio. Although the cost remains in this sub account, it was incurred to this extent on direct shipment business.

Account 228—Depreciation Expense—Vehicles—Office—Others—Sub Station Auditors

All depreciation charges against these individual vehicles were obtained and allocated among the various channels according to the distribution of effort of the individuals to whom the cars were assigned.

Account 207—Outside Collection Expense

The credit appearing to this account on Form 189 for the year 1940 was found to be an error of classification of income or expense by the field Accounting Department for the month of December 1940. This particular amount of $22 was found to be an income due to a refund from a previous overcharge which should have been credited to Account 208. Such refund was entirely applicable to tank wagon business and accordingly should be allocated among the channels of Tank Wagon Reseller, Tank Wagon Consumer and Other Method sales on all gallonage basis, which it now is.

1149 Sub-Schedules #10-B and #10-C, supporting Schedule #10 and illustrating adjustments made to previous charges on our Comparative Statement of Expense Form 189, Detroit field, 1940, follow.

Schedule #11

Marketing Expense Items on Lubricating Oils (Shown Only for Reconciliation of Total Marketing Expense)

The above marketing expense items have to do with packaging cost of motor oils and lubricating products and accordingly, are not vital to the complaint. This schedule is presented only so that the total marketing expense for the Detroit field can be reconciled with information furnished on Form 189 in previous testimony. None of this expense was applicable to tank wagon reseller or jobber gasoline and refined oil sales, and accordingly, no charge is shown under either of these channels of distribution.

Schedule #12

General Office Marketing Costs

General Office marketing costs are first allocated among the various fields on the basis of total gallonage excluding direct shipments. The Detroit field for 1940 received 7.16% of the total general office charges as a result of this procedure. Had the allocation been made on the basis of all gallonage including direct shipment, the ratio chargeable to Detroit would have been 7.25%. We believe the practice followed in apportioning general office expenditures to the fields is more acceptable from sound accounting cost procedure than would result from using all gallonage including direct shipments. This position, we believe to be justified because:

(a) Direct shipment business is responsible for a relatively small proportion of effort, although it is responsible for a larger proportion of volume. General office expenses follow distribution of effort rather than gallons.

(b) Effort required for tank wagon distribution through Reseller, Consumer, and Other Method sales channels is uniform among the various sales divisions. The Sales Department setup working procedure, reports, and accounting procedure are uniform for all fields.

(c) If direct shipment gallonage were included in the allocation factor the Chicago field in particular would receive an abnormal portion of general office expenditure because of the large quantity of direct shipment business moving through our Chicago sales field office. The proportion of General Office expenditures thus allocated would be out of all reasonable relationship with costs actually incurred. 1159

For these reasons we have accepted the allocation of the General Office expenditure to the Detroit field as being the best cost applicable to sales made in that division.

Account 250—Accounting Department

The expense charged to this function represents the cost of the General Office Credit and Accounting Departments. Since these departments supervise the activity of similar departments operating in the field offices and handle reports submitted by the field offices, it was considered logical to allocate this expense to classes of direct shipment customer and product on the same ratios as used for field expense of these departments. Accordingly, Schedule #12-A shows the ratios of direct shipment time by these two departments together with the amount of money chargeable to jobber—naphtha, gasoline, and jobber—other products, together with that allocated to other direct shipment customers.

Account 255—General Manager's Department

This expense is the sum of several departments working under the supervision of the General Manager. The activities of each department were analyzed to determine the basis on which charges should be made to direct shipment customers.

Supervision
Sales Research
Statistical and Personnel

The allocation to classes of direct shipment customer and product was based on ratios representing the effort in the Detroit field chargeable to jobbers by product and to other direct shipment customers.

1160 Real Estate Department
Operating Department

The activities of these departments are confined wholly to the operation of our bulk plants and tank wagon distribution. Therefore, no part of this expense should be charged to direct shipment customers.

Gasoline and Refined Oil Department.

This department handles all work in connection with bulk station prices and sales to customers buying in large quantities for shipment direct from our terminals. The allocation of expense to classes of direct shipment customers and product was based on ratios representing the combined selling efforts of the Detroit field, excluding any charges on jobber—other products. Inasmuch as this department has no connection with products other than gasoline and refined oil, no charge should be placed against any product other than these two. The reason for charging the direct shipment customer—others channel with a portion of this expense is because a large part of this direct shipment gallonage is made up of gasoline and refined oils.

Sales Promotion—Wholesale

This department handles the promotion of sales to consuming customers and as such has no activity chargeable to jobber accounts. The proportion chargeable to other direct shipment customers was based on the ratios representing efforts of the Wholesale Department in the Detroit field.

Sales Promotion—Reseller

This department supervises all sales promotion activity through reseller accounts. The proportion of expense chargeable to jobber distribution by the Reseller Department in the Detroit field was used to allocate a portion of this expense to jobber business.

1161 Sales Promotion—Specialties

All of the expense of this department is chargeable to sales other than jobbers. The total expense is charged to the Other Method channel of distribution.

Sales Promotion—Automobile Supplies

The total expense of this department is charged to the Automobile Supplies channel of sale. Therefore, no part of this expense is applicable to jobber distribution.

Account 260—Advertising Department

The General Office Advertising Department supervises the distribution and merchandising of all advertising material. The expense of this department applicable to jobber was obtained by applying the ratio of jobber costs in Account 075 to total advertising expense in Account 075. The allocation between jobber gasoline and jobber other products was made on the basis of sales volume to these accounts.

Account 265—Lubricating Department

This cost represents the total of the Lubricating, Technical, New York Office, and Railway Sales Departments, whose activities largely represent sales effort to large industrial and consuming accounts. A large part of the expense of these departments is charged direct to the Other Method channel on Form 189 because their efforts are, to a large extent, confined to this channel. For this reason, such charges were not considered as being applicable to any jobber gasoline or refined oil costs. In making the allocation of expense for these departments, therefore, only those costs classified as pro rata were distributed to the direct shipment channels of marketing.

1162 Lubricating Department

Most of the expense of this department is charged direct to the Other Method channel of distribution, representing effort on sales made for Other Method delivery. The allocation to classes of direct shipment customer and product was based on ratios covering sales activity of the Lubricating Sales Department in the Detroit field.

Technical Department
New York Office

The work of these departments relates to all classes of customers to a somewhat greater degree than other departments in this group. Therefore, the distribution of expense to classes of direct shipment customer and product was based on the combined selling efforts of the Detroit field.

Railway Sales

This department handles the promotion of sales to railroad accounts, and therefore no portion of the expense should be considered applicable to jobber distribution.

Account 270—Asphalt and Fuel Oil Department

The entire amount of expense for this department is applicable to consumer accounts and is charged directly to the Other Method channel of distribution. Therefore, no part of the expense of this department is applicable to jobber distribution. A charge to other direct shipment customers was made on a gallonage basis.

Account 280—Construction and Maintenance Department

This General Office Department supervises the activities of the field Construction Department and furnishes information on construction work to the Detroit field. The allocation of expense to classes of direct shipment customer and product was based on the ratios applicable to activities of the Detroit field Construction Department.

1163 Account 290—Pro-Rata General Administrative
Account 295—Law Expense
Account 515—Experimental, Development and Research Expense

The cost of these departments is considered general and not applicable to any particular department or function of marketing. The expense applicable to each class of direct shipment customer and product was distributed on a gallonage basis.

1170 Conclusion

Throughout the entire conduct of the study every possible precaution was taken to insure the highest degree of accuracy possible to attain. Procedures adopted have been conditioned by cooperative consultation with examiners of the Federal Trade Commission as well as by all printed material made available by that governmental body.

Wherever any portion of the cost was predicated upon a sample analysis, the proportion of total represented by our sample was carried to an extent far beyond that which is necessary to establish stability levels. Thus, 85% of all expense included under the classification 066—Miscellaneous Operating Expense—was analyzed by individual vouchers. In determining the comparability of calls upon jobbers and upon tank wagon reseller accounts every call for a full year period by certain salesmen having jobber accounts within their territory was used.

In determining ratio of gasoline value (excluding taxes) to total dollar value of credit and card sales tickets, a sample in excess of 11,000 tickets was used. The accounting time necessary to handle 1000 sales tickets was checked by weeks, and whereas almost identical ratios were secured for the first two weeks this examination was carried for two full additional weeks to ascertain that our standard thus established was beyond possible controversy. In each of these cases stability levels were reached with samples of less than one-half those actually used. It is the respondent's position, therefore, that costs presented in this portion of its defense are as accurate as it is possible to obtain short of a complete reenactment of every event in the Detroit field during the year 1940. This is an obvious impossibility.

1172 RESPONDENT'S EXHIBIT NO. 103-A.

Federal Trade Commission February 2, 1942.
Washington, D. C.

Attention: Mr. Cyrus B. Austin, Trial Attorney.

Dear Mr. Austin:

Re: Standard Oil Company
Docket No. 4389

I am sorry to be so long delayed in answering your letter of January 21, 1942, responding to mine of January 19, 1942.

While you indicated in your letter that February 22nd fell on a Monday, it in fact falls on a Sunday. I assume that makes no difference in your conclusions as to the desire to start on February 16th. In view of your letter, I do not want to press the matter of starting on Tuesday, as distinguished from Monday. It is not a matter of first importance anyway, but rather one of convenience, and we shall plan to be in Detroit and ready to resume the hearing on February 16th, in accordance with your plan and Judge Ballinger's notice.

I also have for acknowledgement your letter of January 24, and your letter supplementing that one under date January 27, 1942. Again, I am sorry I have been so long delayed in answering, but I have necessarily been much out of the office on problems arising out of the war disturbance and have not had an earlier opportunity.

So that the accountants' efforts on these letters might be as little delayed as possible, I did send a copy of your letter of January 24 to Detroit and to Mr. Boatwright's

1173 RESPONDENT'S EXHIBIT NO. 103-B.

office, and have since supplied Mr. Boatwright with a copy of your letter of January 27, and am today doing likewise for Detroit.

In connection with these two last letters, I was frankly astounded at the volume and extent of your requests.

It occurs to me that some of the information which you have requested is either already in evidence, or has been heretofore supplied to the Commission.

Conformably to the position which the Respondent has consistently taken and has repeatedly stated, we will make available to you and your accountants any records of this company which may be at all pertinent to your inquiry,—

irrespective of where such records may be. Insofar as your additional requests involve just that, we will, of course, arrange to make the records available to you. Indeed, I surmise that they have always been available to Mr. Warmack during the weeks he has been spending in Detroit, insofar as such records are in Detroit.

I am sure you will appreciate that we cannot undertake to make any calculations or break-downs or build-ups involving any discretion on the part of our accounting staff. Some of your requests are of this latter character.

It was my understanding that anything of that character that was desired by the Commission would be undertaken by Mr. Warmack and his assistants and, as above stated, the records from which he might make any calculations desired by him or by you are available to him.

No doubt Mr. Warmack has acquired a very considerable familiarity with the records with which he has been now working so long, but we are sure that some of your requests would take us many weeks with many accountants to build up, and I assume that while Mr. Warmack might accomplish the task in an equally short time he would not be able to shorten it greatly.

In such time as I have had to discuss the matter with our accounting personnel, I understand from them that certain of the requests in your letter of January 24 needed considerable clarification, even in connection with having existing records available. I apprehend that some of such requests will be clarified in the minds of our people by your explanatory letter of January 27.

So that there may be no misunderstanding of this letter, and our position on the matter,—I reiterate that, insofar as your requests deal with existing records, they are either now available to you and to Mr. Warmack, who is on the ground, or will be made so, as you suggest. However, we are not undertaking anything involving the build-up, breakdown calculations of or discretionary treatment of figures wherever such is involved in the requests.

For his information, I am sending a copy of this letter to Judge Ballinger.

With best personal regards, I am

Sincerely yours,

Harold R. Hanley/w

423 In the matter of Standard Oil Company. } Docket 4389.

TRIAL EXAMINER'S REPORT AND EXCEPTIONS.

(Seal)

(Filed Nov. 7, 1946, Kenneth J. Carrick, Clerk.)

427 UNITED STATES OF AMERICA

BEFORE FEDERAL TRADE COMMISSION.

In the Matter of Standard Oil Company (Indiana). } Docket No. 4389.

TRIAL EXAMINER'S REPORT UPON THE EVIDENCE.

Preliminary Statement.

Pursuant to the provisions of an Act of Congress, entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", approved October 15, 1914, (the Clayton Act), as amended by an Act of Congress approved June 19, 1936, (the Robinson-Patman Act), the Federal Trades Commission, alleging its reason to believe that the respondent named therein had violated said Act, did on the 29th day of November, 1940, issue its complaint in this proceeding, amendments to which were later allowed by order dated April 23, 1941.

Issues Deduced From the Pleadings.

(a) Synopsis of Amended Complaint:

The amended complaint charges, in substance, that:

Respondent, Standard Oil Company, a corporation, organized under the laws of the State of Indiana, is now, and has been since June 19, 1936, engaged in the business of refining, selling and distributing gasoline with its principal office in Chicago, Illinois, and its refinery at Whiting, Indiana.

During the period mentioned respondent has sold, and does now sell and deliver its different brands of gasoline to about 450 retail gasoline dealers operating stations located in the Detroit area in Michigan, under contracts obligating respondent to furnish each of said dealers, 428 during the period named in each contract, a sufficient quantity of each of the brands of gasoline made by it to meet his requirements.

In making delivery respondent has, and does ship its gasoline from its refinery at Whiting, Indiana, to a terminal maintained by it at River Rouge, Michigan, from which point the gasoline is transported to said customers in tank-cars or tank-wagons, thereby causing a continuous stream of trade and commerce in its gasoline between Whiting, Indiana, and the retail dealers purchasing the same in the Detroit area in Michigan.

Among respondent's said customers were and are four dealers, to-wit, Citrin-Kolb Oil Company, Stikeman Oil Company, Inc., Wayne Oil Company and Ned's Auto Supply Company, to whom respondent has, since June 19, 1936, sold, and does now sell its gasoline of the same grade and quality, at prices substantially lower, to-wit, from ½¢ to 1¾¢ per gallon, than the prices charged its other customers operating retail stations in the same area. Each of said four dealers has, since June 19, 1936, owned or operated, in the Detroit area, one or more gasoline stations where a part of said gasoline has been resold, and with the exception of the Stikeman Oil Company, Inc., is now resold at retail to consumers thereof, in competition with other retail gasoline stations supplied by respondent or other manufacturers. Three of said dealers—Citrin-Kolb Oil Company, Stikeman Oil Company, Inc., and Wayne Oil Company—are also engaged in the business of reselling at wholesale, a large part of the gasoline purchased from respondent, to dealers in the Detroit area who are likewise engaged in the resale thereof at retail, and have knowingly received the benefits in their retail operations of said lower prices.

The effect of said discrimination in price, "*has been, and may be, to injure, destroy and prevent competition with* *each of said four dealers * * *, and with their respective customers, in the resale of gasoline".* (Italics Examiners)

Service being made, respondent in seasonable time answered.

(b) Synopsis of Answer:

Respondent's answer

Admits

(1) its corporate entity; (2) the business in which
429 it was and is engaged; (3) the locations of its principal office, refinery, terminal and theater of its operations; (4) the sale of its gasoline to operators of retail service stations in the Detroit area, in Michigan, with some of whom—but not all—it had and has contracts; (5) the sale of the different grades of gasoline to the four dealers at the reduced prices and its resale by them; and (6) competition;

Denies

all other material averments, and set up the following affirmative and alternative defenses, alleging with particularity, the factual basis for each:

Affirmative Defense

(1) Claimed Absence of Jurisdiction—Interstate Commerce:

That its gasoline made at its Whiting, Indiana, refinery is transported to its terminal at River Rouge, Michigan, where it is unloaded into storage tanks, comes to rest in the State of Michigan and is commingled and becomes a part of respondent's general chattel property within said state and as such becomes and is subject to the jurisdiction and laws of the State of Michigan and amenable to levy and subject to payment of state and local property taxation therein; that the sale and delivery thereafter of said gasoline, in the usual, ordinary and customary conduct of its said business, to the retail gasoline service stations and wholesale operators in the Detroit area in Michigan, were, and are, initiated and fully consummated within the State of Michigan; were and are strictly intrastate in character, and over which the Federal Trade Commission has no jurisdiction; that if there has been at any time since June 19,

1936, any interstate transaction between respondent and any of its gasoline customers in the Detroit area in Michigan (which does not now exist) such transaction or
430 transactions were isolated instances and independent and apart from the usual, ordinary and customary intrastate course of commerce between the parties and constitute no basis for assumption of jurisdiction of this proceeding by the Commission. (Ans. Pars. 2-10, inc.)

(2) Alternative Affirmative Defenses:

That if the Federal Trade Commission has jurisdiction over respondent and the subject matter of the complaint, then respondent's acts and practices (Clayton Act, Sec. 2) were and are lawful:

(a) In that in the exercise of its lawful right to select its own customers, it selected the four dealers referred to in the complaint, each of whom has, and does purchase large quantities of gasoline from respondent—from two to five million gallons each per annum—take delivery in tank car lots, have and maintain their own bulk storage and distribution facilities and each are entitled to and are properly classified by respondent as "wholesalers" or "jobbers", as distinguished from the "retail reseller" or "service station operator" who buys and takes delivery in smaller quantities; that such distinction has for many years been universally recognized by the oil and other industries in Michigan and throughout the United States;

(b) In that with but one exception (a price differential of ½¢ per gallon accorded Ned's Auto Supply Company from September, 1936, through February, 1938, made necessary to meet unusually low or lower prices being offered this customer by competing gasoline suppliers), respondent has, and does now sell its different brands of gasoline of the same grade and quality to said four wholesale dealers at a uniform lesser price than the price charged its retail station customers, which it has a lawful right to do, (Ans. Pars. 12-18, inc.) as;

431 (aa) The difference in the prices charged the said four dealers and the prices charged the retail gasoline service station operators, for the same grade and quality of gasoline, was, and is the difference in the cost of sale and delivery resulting from the differing quantities in which

the gasoline was, and is sold and delivered (Ans. Pars. 19-25, inc.);

(bb) All of the lower prices granted the four dealers since June 19, 1936, were made to them in every instance in good faith to meet an equally low or lower price and equally or more favorable sales arrangements in respect of services, facilities or benefits made or furnished by a gasoline supplier or suppliers which were, and are competitors of respondent (Ans. Pars. 26-33, inc.). And,

(3) Neither the price differentials accorded, and the extent and use made thereof by said four dealers, or any of them, has, or may hereafter have *the effect of injuring, destroying, or preventing competition with each of the said four dealers and with their respective custom*[illegible] *in the resale of gasoline.* (Ans. Pars. 37-45, inc.) ([illegible]ics Examiners)

Thereafter and by order dated February 25, 1941, Webster Ballinger, a duly commissioned Examiner, was appointed with instructions to hold hearings for the receipt of testimony and other evidence in this proceeding. Hearings were thereafter held at which testimony and other evidence was introduced by Cyrus B. Austin, Esq., Attorney at Law, on behalf of the Commission, and by Harold R. Hanley, Esq., Attorney at Law, Chicago, Illinois, and Arthur J. Abbott, Esq., Attorney at Law, Detroit, Michigan, on behalf of the respondent.

The testimony has been reduced to writing and filed in the office of the Commission together with all exhibits received in evidence.

432 The record was closed April 23, 1943. In view of the importance of the case, your Examiner requested Counsel for the Commission and respondent to submit statements in writing setting forth their respective contentions as to the facts proved, which were received and duly considered, copies being filed in the Secretary's Office, and your Examiner now submits the following

Report Upon the Evidence

I

Definitions

As hereinafter used with reference to the Detroit Metropolitan area in Michigan, the terms:

"Tank-Wagon" means a "motor vehicle having a maximum tank gasoline capacity of from 600 to 1500 gallons" (R. 4033), ordinarily 1500 gallons (R. 5177, 5721).

(Note: Subsequent to July 7, 1941, and after the amended complaint issued, the maximum tank-wagon capacity was increased to 3,000 gallons (R. 5177).

"Tank-Car" means a railroad car, and

"Transport Truck" means a motor truck, operated as a common carrier, having maximum gasoline tankage capacity of from 6,500 to 12,000 gallons (R. 45, 511, 3228-9; Resp. Exs. 50, 51).

"Posted Tank-Wagon Price" means the tank-wagon sale price fixed by the principal office in Chicago, Ill. (R. 37) and daily posted at the bulk plants and in the office of the supplying company in Michigan on tank-wagon deliveries of full or partial loads (R. 37, 59-60).

"Tank-Car or Transport Truck Prices" means a differential in the amount stated under the posted tank-wagon price.

II

What the Evidence Consists of

Description of Evidence. The evidence may be described
as "factual" and "conclusory". The factual is re-
433 markably free from conflict—a tribute to the intellec-
tual standard and honesty of all witnesses called by
both the Commission and respondent. The conclusory is
confined to opinions of experts—all concededly well qualified
by education and experience in their respective fields to
give expert opinions deserving careful consideration—
drawn from the factual, relates largely to cost of sale and
distribution, and is in sharp conflict.

The Commission called 36 witnesses (R. 2, 204, 294, 342, 363, 386, 441, 462, 492, 543, 560, 583, 624, 637, 651, 673, 724, 728, 750, 765, 778, 802, 847, 859, 900, 992, 1329, 5117, 5202, 5276, 5325, 5335, 5434, 5755, 7810, 7859) and offered, which were received in evidence, 117 documentary exhibits, (1 thru 19, 21-22, 25-27, 29-36, 38, 40 thru 52, 54 thru 61, 63, 64, 66 thru 78, 80 thru 93, 100, 102 thru 112, 116, 117, 119 thru 127, 133, and subletters).

Of the 36 witnesses called by the Commission 4—

Carl Hamon Depue, for 21 years a Certified Public Accountant, employed by the Federal Trade Commission for the past 13 years, specializing in cost accounting under the Robinson-Patman Act since its enactment, and now Supervisor of Investigations for the Commission (R. 7859-62);

Arthur E. Lundvall, Certified Public Accountant and Chief Accountant for the Federal Trade Commission, whose qualifications were conceded by counsel for respondent (R. 7810-11);

Herbert F. Taggart, Professor of Accounting at the University of Michigan who had specialized in and taught cost accounting at universities for 21 years, and was the author of two treatises on cost accounting, one of which was published by the Department of Commerce (R. 9992-6); and

William J. Warmack, a college graduate, a Certified Public Accountant since 1933, an employee of the Federal Trade Commission since 1929, engaged largely in cost accounting work for the Commission under the Robinson-Patman Act since 1935, investigating some of the important cases that have since been prosecuted under said Act, and who was familiar with Respondent's Exhibits 31-A thru Q, 99, 100, and 101, having examined said exhibits, heard substantially all the testimony relating thereto, and made a personal investigation of many, but not all, of the 434 foundational records upon which the exhibits rest and the accounting methods employed in compiling them (R. 5755-73)—

all experts in their respective professional lines, gave the principal opinion or conclusory testimony offered on behalf of the Commission.

The respondent called 17 witnesses (R. 934, 1425, 1472, 1570, 1617, 1712, 2058, 2280, 2671, 2694, 2702, 2760, 3072, 3221, 3225, 4801, 7776) and offered, which were received in evidence, 77 documentary exhibits, (3, 5 thru 20, 23 thru 71, 76, 92, 95 thru 101, 103, 111, and subletters).

Of the 17 witnesses called by the respondent 3—

John W. Boatwright, college and university graduate, receiving his LL. D. degree from the Northwestern University in 1932, lecturer on Economics at the Northwestern

University from 1929 to September 6, 1932, experienced in Economic Research, a part of which he acquired while connected with the Economic Division of the Federal Trade Commission, and for more than four years before he testified, in charge of respondent's Budget and Sales Research Department comprising several hundred technically trained economists and accountants (R. 2280);

Frederick Emerson Clark, Professor of Economics and Marketing, Chairman of the Department of Marketing and Director of the Graduate Division of the School of Commerce at the Northwestern University, received the degrees of Bachelor of Arts from Albion College in 1912, Doctor of Philosophy in Economics in 1916 and Master of Arts in Economics in 1930, both from the University of Illinois, author of "The Principles of Marketing" published in 1922 and revised in 1932, rather widely used among teachers; also author of two other books on marketing and co-editor with L. D. H. Well of the book entitled "Marketing Agricultural Products in the United States" published in 1932, very widely used as a text and reference book; author of articles written for scientific magazines on marketing, and possessing other distinctive qualifications (R. 1617-23);

Leonard W. Houghton, a graduate of the School of Business of the University of Wisconsin where he took a course in Accounting, employed by the respondent company for the past 12 years, his work involving the accounting business of the company (R. 7776-8)—all experts in their
435 respective professional lines, gave the principal opinion or conclusory testimony offered on behalf of the respondent.

III

Questions for Decision and Related Matters

A. Questions for decision.

Six major questions are presented for decision by respondent's answer, viz.:

1. Were the transactions complained of in interstate commerce?

2. Did the .5¢ per gallon differential respondent accorded Ned's Auto Supply Company from September 1, 1936 to March 1, 1938 on tank wagon deliveries of gasoline, under the price it charged its other retail reseller tank-

wagon customers for gasoline of like grade and quality, make only due allowance for differences in costs of sale and delivery resulting from differing methods or quantities in which the gasoline was sold and delivered to Ned's Auto Supply Company and to respondent's other tank-wagon customers in the Detroit Metropolitan area in Michigan?

3. Did the differentials of 1¢ per gallon on Stanolind, 1.5¢ on Red Crown and 1.75¢ on Solite with Ethyl gasolines, accorded the four dealers, recognized by respondent as jobbers, or tank-car, or transport truck customers, under respondent's posted tank-wagon prices charged its retail reseller customers for gasoline of like grade and quality, make only due allowances for differences in cost of sale and delivery resulting from differing methods or quantities in which the gasoline was sold and delivered to respondent's jobber or tank-car customers and to its retail reseller or tank-wagon customers in the Detroit Metropolitan area in Michigan?

4. Was the .5¢ per gallon differential respondent granted Ned's Auto Supply Company from September 1, 1936 to March 1, 1938 on tank-wagon deliveries, under the prices it charged its other retail reseller tank-wagon customers
436 in the Detroit Metropolitan area in Michigan, for gasoline of like grade and quality, granted in good faith to meet an equally low price of competitor? If so, did it constitute price dscrimination, the effect of which was, is, or may be, substantially to lessen competition, or tend to injure, destroy or prevent competition between Ned's Auto Supply Company's retail gasoline service stations and those operated by customers of respondent?

5. Was the selection by respondent of the four dealers and their recognition by respondent as jobbers bona fide and not in restraint of trade?

6. Were the differentials in price accorded the four dealers, recognized by respondent as jobbers, made in good faith to meet equally low prices of competitors, or the services or facilities furnished by competitors?

7. Do the differentials in price accorded the four dealers constitute price discrimination, the effect of which is, or may be, substantially to lessen competition, or tend to injure, destroy, or prevent competition with said four dealers, or with the customers of either respondent or the said four dealers?

B. Separate and related questions.

Questions 1, 2 and 3 are independent. If the 1st question is answered in the negative, dismissal of the complaint necessarily follows; if answered in the affirmative, consideration of questions 2 and 3 become necessary.

If questions 2 and 3 are answered in the affirmative the differentials granted were lawful and the remaining questions become immaterial.

If question 2 is answered in the negative it will be necessary to consider both questions 4 and 7.

If question 3 is answered in the negative it will be necessary to consider questions 5, 6 and 7.

Questions 4, 5 and 6 are each interrelated with question 7, and the answer to each depends in part on the answer to question 7.

437 C. Only cost of sale or delivery to be considered.

Respondent makes no claim of any difference in cost of manufacture. Its cost differential defenses are based solely on claimed difference in costs of both sale and delivery.

D. Grade and quality of gasoline.

That the quality of all of respondent's three grades (brands) of gasoline—Stanolind, Red Crown and Solite with Ethyl—sold to all customers were identical, is conceded.

IV.

Factual Matters Not in Dispute.

Factual matters, not in dispute, will be first reviewed, mere reference to which, when necessary, will be made later in this report to avoid unnecessary repetition.

(a) Corporate Entity: Respondent, Standard Oil Company (Indiana) is a corporation organized, existing and doing business under and by virtue of the laws of the State of Indiana.

(b) Business Engaged in: Respondent is now, and has been at all times since June 19, 1936, engaged in the business of refining, selling and distributing three standard brands of gasoline—"Red Crown", "Solite with Ethyl", and "Stanolind" (R. 35-6—the bulk of its sales (approximately 90 per cent) being of its popular brand, "Red Crown" (R. 108), about 7 per cent Ethyl, and 3 per cent Stanolind. To meet seasonal demands respondent makes four volatile grades of each brand (R. 160).

(c) Location of Principal Office, Refinery and Terminal: Respondent's principal office and place of business is located at 910 South Michigan Avenue, Chicago, Illinois; its refinery (the only one here material) at Whiting, Indiana, and its marine terminal (for use in supplying its trade in Michigan) at River Rouge, Michigan (Comp. & Ans. Pars. 1 and 2; R. 4-5).

(d) Theater of Operations: Respondent's theater of operations embraces fourteen states located chiefly in the Middle West (R. 4-5, 1714-15), which territory is divided into "divisions" or "districts" with a branch office in charge of a manager or superintendent in each division. One division, designated and known as the "Detroit Division" embraces all or a part of thirteen counties situated on the Southern Peninsula of Michigan (R. 4, 3301-5, Resp. Ex. 56). Within this division is the area referred to in
438 the complaint as the "Detroit Area"—the situs of the
acts and practices complained of—which is co-extensive with the exterior boundaries of the City of Detroit and the adjoining towns of Hamtramck, Dearborn and Highland Park, in Wayne County, Michigan (R. 9-10, Resp. Ex. 56), and is frequently referred to in the record as the "Detroit Metropolitan Area."

(e) Respondent's Customers, and Contractual Relations Therewith, in Detroit Metropolitan Area: Prior to September 10, 1936, respondent operated all retail service stations owned or leased by it in the Detroit Metropolitan Area, but on that date it discontinued all retail operations and leased or sub-let all stations owned or leased by it to independent operators.

During the period mentioned in the complaint, respondent regularly supplied gasoline to approximately 358 retail service stations; and to four dealers, recognized by it (one since March 7, 1938) as jobbers who supplied from 94 (in 1937) to 106 (in 1940) retail service stations (Com. Ex. 128-A, R. 29). Of the 358 stations directly served by respondent, approximately 200 (less than 60%) were and are owned, and 8 leased, by it (R. 10-11) all, or substantially all of which were and are equipped with driveways, buildings, storage tanks, pumps, fixtures, machinery and other appliances for the receipt and sale of gasoline (Com. Exs.

1-A-C-D). These 208 stations were and are leased or sublet to tenant operators, each lease being on a standard form (Com. Exs. 1-A-B-C-D), in use since 1936 (R. 197). The leases usually run for one, but in some cases for as much as three years (R. 15). Leases were and are automatically extended for a period of six months when the lessee remains in possession beyond the lease period (Com. Ex. 1-B). The leases require payment of a certain sum monthly plus "a sum equal to" (usually one-half cent) "per gallon on all gasoline delivered to said service station for sale," with a further provision that the minimum rental for any one month should not be less than a stated sum. The rental charged is based upon natural considerations such as investment, location, sales volume and financial responsibility of the lessees (R. 116-17). While not required by the terms of the lease to so do, all of the lessees have regularly purchased all gasoline from respondent resold by them during the term of the lease (R. 3591).

With the remaining approximately 150 retail stations, serviced directly by it (R. 114), respondent had and now has contracts for stated terms (usually [illegible] one year, R. 16), each being on a standard form in use since 1936 (R. 197), known as "Form 461" (Com. Ex. 2), and containing the following provision:

"The Company does hereby agree to sell and does sell to the Dealer, and the Dealer does hereby agree to purchase and does purchase from the Company all the Dealer's requirement of Solite with Ethyl, Standard Red Crown
439 and Stanolind gasoline, which shall be taken to mean all such gasoline used, handled and sold by Dealer, at the above place of business" to be paid for at "the company's posted dealer price" in "cash at the time of delivery."

All deliveries of gasoline to the leased and contract service stations were made by tank-wagon, payment being made at the "posted tank-wagon price" in cash or its equivalent on delivery (R. 165-A-6), with one exception—from September 1, 1936 to March 1, 1938 Ned's Auto Supply Company received a price of one-half cent per gallon less than the posted tank-wagon price (R. 52).

Respondent has no contract or agreement with any of the four dealers (R. 33, 3760). They constitute respondent's only tank-car or transport truck customers in this area (R. 28). Each maintains its own bulk plant, orders and takes delivery in full tank-car loads (R. 33) and maintains its own equipment for distribution. Tank-car sales are made on credit and a discount of one per cent for payment within ten days is allowed (R. 108-9).

(f) Retail Stations Supplied, and Those Operated by Each of the Four Dealers and Percentage of Gasoline Marketed Through the Respective Channels: The number of service stations supplied and operated by each of the four dealers, recognized by respondent, and licensed by the State of Michigan as jobbers, during the period referred to in the complaint, and the percentages of gasoline marketed through each of the two channels, were as follows:

Ned's Auto Supply Company: Recognized as a jobber March 7, 1938, (R. 4852-3; Resp. Ex. 37-C); thereafter purchased from respondent more than 4,200,000 gallons per annum (R. 3082, Resp. Ex. 54), substantially all of which it resold at retail through four, in 1936, increased to 6, in 1937, retail gasoline service stations owned and operated by it. It made no sales to other retail stations (R. 213-15).

Wayne Oil Company: Stations supplied: This company was recognized by respondent as a jobber in 1935 (Resp. Ex. 37-A); during the following years it annually supplied gasoline purchased from respondent to the following number of retail outlets: 1936, 15; 1937, 19; 1938, 21; 1939, 24; 1940, 24; (R. 503-4), a part of which it leased to the operators (Resp. Ex. 20).

Stations operated: Between June 19, 1936, and September 8, 1939, the company operated no retail outlets.
440 Subsequent to September 8, 1939, some of the stations owned or controlled by it became vacant and the company temporarily operated 7 retail stations previously leased by it to independent operators until suitable tenants could be found, the number of stations operated by the company and the period each station was so operated, being as follows:

From September 8, 1939 to date, 1; from September 8, 1939 to May 1, 1940, 1; from November 1, 1939 to October 1, 1940, 1; from November 15, 1939 to July 1, 1940, 1; from December 1, 1939 to April 1, 1940, 1; from June 4, 1940 to the present time, 1; for about two weeks prior to September 9, 1939; and from December 1, 1939 to April 1, 1940, 1 (Resp. Ex. 20; R. 508-9).

The volume of gasoline sold direct and through stations operated by company: In 1936, 1937 and 1938 the company purchased from respondent between 1,348,000 and 1,825,-

000 gallons of gasoline (Resp. Ex. 53); in 1939 it purchased 2,226,177 and in 1940, 2,541,394 gallons. In 1936, 1937 and 1938 all gasoline purchased was sold at wholesale; in 1939, 7.6 per cent and in 1940, 14.2 per cent of the total gasoline purchased was sold at retail (Resp. Ex. 53).

Citrin-Kolb Oil Company: This company began retail operations in 1922 (R. 295). In 1929 it was recognized by respondent as a jobber (Resp. Ex. 37-A), and thereafter engaged largely in the wholesale business.

Stations supplied: As of January 1 of each of the calendar years 1936 to and including 1940 it supplied gasoline to the following number of retail gasoline stations: 1936, 29; 1937, 51; 1938, 57; 1939, 66; 1940, 52 (R. 296), a part of which it owned and leased, or leased and sub-let (Resp. Ex. 6) to independent operators, and which in 1940 numbered 20 (Resp. Ex. 6, R. 304).

Stations operated: When stations owned or controlled by
it and leased to tenant operators became vacant they
441 were temporarily operated by the company until suit-
able tenants could be found, the number so operated by
it and the period of operation of each being as follows:

From January 1, 1937 until sometime in the month of February 1938, 1 station; from January 1, 1937 to October 6, 1937, 1; from January 1, 1937 to October 1938, 1; from December 15, 1937 to January 21, 1938, 1; from January 1, 1938 to the present time, 1; from March 8, 1939 to December 22, 1940, 1; from June 2, 1939 to the present time, 1; from July 27, 1939 to December 29, 1940, 1; from August 17, 1939 to February 27, 1941, 1; from July 1, 1940 to the present time, 1; from September 27, 1940 to the present time, 1; from October 15, 1940 to the present time, 1; (R. 299-300).

Gallonage sold direct and through stations operated by company: Since the calendar year 1936 the company has annually purchased from respondent in excess of 5,000,000 gallons of gasoline (R. 296, Resp. Ex. 54, R. 8-9) which it resold at wholesale and retail, the percentage sold at retail being as follows: in 1937, 15.4%; in 1938, 7.3%; in 1939, 10.1%, in 1940, 6.5% (Resp. Ex. 53).

Stikeman Oil Company, Inc.: This company was organized in 1931, acquired bulk storage and was recognized by respondent as a jobber in 1932 (Resp. Ex. 37-C). In 1935 the company decided to discontinue retail operations and did completely withdraw from the same on February 15, 1938, since which time it has purchased approximately

2,000,000 gallons annually of respondent's branded gasolines, all of which it has sold at wholesale (Com. Ex. 4, Resp. Ex. 54; Ans. pp. 9, 10).

(g) Percentage of all gasoline marketed in the Detroit metropolitan area supplied by respondent, and percentage marketed by all major companies: Respondent markets in this area the greatest volume of gasoline of any one
442 company (R. 3655). During the years 1936 to and including 1940, respondent supplied in 1936, 17.1; in 1937, 17.1; in 1938, 16.4; in 1939, 17.4; and in 1940, 16.2 per cent of all branded and non-branded gasoline sold in the "Detroit Area", its sales in 1936 aggregating 62,198,750 and in 1940, 74,627,712 gallons (R. 3315-16; Resp. Ex. 58). Approximately 87 per cent of all gasoline marketed in this area was made by the major companies and sold under their brands (R. 417; for list of all companies see Resp. Exs. 63-A-B-C; for list of major and non-major companies see R. 3251-5).

(h) Amount of gasoline marketed by respondent in the Detroit metropolitan area sold to the 4 "jobbers": Of the 74,627,712 gallons of gasoline marketed by respondent in the Detroit area in 1940, 13,661,107 gallons, or more than 18 per cent, were purchased by the four dealers (Resp. Ex. 58).

(i) Price differentials accorded the four "jobbers" on tank-car or transport truck deliveries: To the four dealers who took delivery by tank-car or transport truck, and who were recognized by it as "jobbers", respondent has, since June 19, 1936, on its different brands of gasoline purchased by them, accorded price differentials under the prices charged its retail tank-wagon customers as follows:

To Ned's Auto Supply Company, at all times subsequent to March 7, 1938; on Red Crown 1½¢, on Solite with Ethyl 1¾¢ (Resp. Ans. pp. 11-12, 32-47; R. 35, 52);

To Citrin-Kolb Oil Company, at all times subsequent to June 19, 1936: on Red Crown 1½¢, on Solite with Ethyl 1¾¢, and on Stanolind 1¢ (R. 299, 296, 3247, 35-6);

To Wayne Oil Company, at all times subsequent to June 19, 1936; on Red Crown 1½¢ on Solite with Ethyl 1¾¢ (R. 1934, 498, 3247, 35-6);

To Stikeman Oil Company, at all times subsequent to June 19, 1936: on Red Crown 1½¢, on Solite with Ethyl 1¾¢ (Resp. Ans. p. 19; R. 35-6, 42-3, 3247, Com. Ex. 4).

443 (j) Cost of marketing each of the three grades of gasoline: The cost of marketing each of the three

brands per gallon is substantially the same, and was considered and treated as identical (R. 2561-2, 8054-5).

(k) Competition: Within the Detroit Metropolitan area there are from 3,000 to 4,000 retail gasoline service stations (R. 353, 371, 409). Respondent in its answer represents that competition in the sale of gasoline at retail in this Detroit Metropolitan Area "has been, and is extremely keen, vigorous and aggressive" (Resp. Ans. Par. 2), and admits, as alleged in the complaint, (Comp. Par. 3) that the gasoline sold by it to the four jobbers was resold by them largely at wholesale (Resp. Ans. Pars. 13-A-B-C-D, pp. 7-13) to retail service station operators, and the remainder (Resp. Ans. 13-A-B-C-D, pp. 7-13) through retail service stations owned or controlled, and, from time to time, operated by them, which, when operating, as well as the stations supplied by the four jobbers, were and are in competition with other retail stations in the Detroit Metropolitan area supplied by respondent and other producers or distributors of gasoline (Resp. Ans. Par. 13, 42), all of which the record abundantly confirms (R. 3255).

V.

First Question.

Were the transactions complained of in interstate commerce?

This question presents largely one of law, there being but slight, if any, controversy as to the facts.

The related evidence:

The gasoline supplied its customers in the Detroit Metropolitan area (Resp. Ex. 58), as well as in the entire Detroit Division—the greater portion of which was in fulfilment of its contracts with the service station operators and to meet the requirements of its lessees both hereinbefore referred to in sub-paragraphs (e) of Section IV—was and is made from crude oil produced in the mid-continent fields—Kansas, Oklahoma, Texas and Wyoming—and transported by pipe line to Whiting, Indiana, on the south short of Lake Michigan, where it is refined in respondent's refinery, and then transported in tankers through Lake Michigan, Lake Huron, St. Clair River, Lake St. Clair and Detroit 444 River, to a terminal maintained by respondent at River Rouge, on the Rouge River in Michigan, about six miles southwest of the City of Detroit, where it is pumped into terminal storage tanks maintained by respondent having a maximum capacity of 1,500,000 barrels of 42 gallons each (R. 153-55). Prior to the close of each navigable season, and to provide a supply of gasoline during the winter months for the Detroit District, the River Rouge terminal bulk storage tanks are filled to capacity (R. 155).

Within the Detroit Division respondent maintains two branch offices: one, in Detroit, with a superintendent in charge, who was and is directly under and responsible to the "Sales Department" of the Chicago office (R. 162), and who has, and does act for respondent generally in all matters pertaining to the marketing of the products of the respondent in his district, without first submitting them to the Chicago office, including such matters as the negotiation and execution, in respondent's name and as its agent, on standard forms approved by the Chicago office, of leases of service stations owned or leased and released by respondent (R. 10-11, 195-6; Com. Exs. 1-A-D) and contracts for the sale of gasoline (R. 163; Com. Ex. 2) at prices fixed by the Chicago office (R. 36-7, 122-3); and the other at River Rouge, with a superintendent in charge who is directly under and responsible to respondent's "Manufacturing Department", and whose duties are largely ministerial, consisting principally of the receipt of gasoline at the Marine Terminal and the delivery of same to tank-wagons, transport trucks and tank-cars upon orders from the Superintendent of the Detroit office (R. 5171-4, 5720).

Throughout the Detroit District respondent maintains additional bulk storage plants, strategically located for the convenient and expeditious servicing of its retail trade, six such plants being maintained within the Detroit Metropolitan area (R. 152; Com. Exs. 92-A-B, for location see R. 24). The storage tanks located in the entire Detroit District were and are filled and replenished as occasion requires from gasoline stored in the terminal tanks at River Rouge (R. 1515).

From the River Rouge or Marine Terminal storage the gasoline was, and is distributed in the Detroit Metropolitan area as follows:

To the six bulk storage plants, the four jobbers and to
some consumer customers by tank-car or transport truck
(Common carrier) (R. 21, 30, 33, 51, 71; Com. Exs. 92-
445 A-D, 93 A-E); and from 10 to 15% prior to 1941, and
approximately 35 to 40% thereafter, by tank-wagons,

owned and operated by respondent, to the retail stations and consumer customers (R. 23, 152, 5720).

From the six bulk storage plants the gasoline was and is transported by tank-wagon, owned and operated by respondent, to the retail stations supplied by it and to other consumer customers (R. 154).

Prior to April 1940 and during the winter months when navigation was closed, emergency requests were infrequently received for gasoline of a particular volatile grade or grades, not in stock at the River Rouge terminal, and the orders were filled by direct shipment by rail from the refinery at Whiting, Indiana, to customers in Michigan in tank-car lots (R. 33). In 1938 and 1939 such shipments were made to each of the four jobbers in the Detroit Metropolitan area (R. 180, 964; Com. Exs. 5-A-J; 66, 67, 68, 69, 70, 71, 72, 73, 74). No such direct shipment has been made since April 1940 (R. 180-1).

The price of all gasoline marketed by respondent in the Detroit District was and is fixed at the Chicago office (R. 36-7). All contracts with common carriers for the removal of gasoline from the River Rouge terminal storage plant were, and are signed by the officials of the company in the Chicago office (R. 46-7; Com. Exs. 92-A-D, 93-A-E).

The money received from the sale of gasoline and other products in the Detroit District was, and is deposited in a national bank in Detroit, Michigan, and withdrawn on the check of the manager of the Detroit Division (R. 166). All original contracts, together with all records of sales and collections in the Detroit District, are kept in the Detroit office, and the greater portion of the salaries of the employees in the Detroit District are paid from the Detroit office (R. 168), a limited number only being paid from the Chicago office, such as the superintendent of the Detroit Division, his two assistant superintendents (R. 4946), and the salary of the superintendent in charge of the Marine terminal.

A personal property tax is levied by the State of Michigan, and paid by respondent, on the inventories of
446 gasoline in the terminal and bulk storage plants (R.
170-1). All other property, personal and real, of respondent situated in the State of Michigan, is subject to taxation by the state, and is so taxed (R. 170).

Conclusion of Fact:

The gasoline was refined in respondent's refinery at Whiting, Indiana, was shipped by respondent to River Rouge, Michigan, where it was placed in storage tanks owned and operated by respondent, and was withdrawn as needed to supply the requirements of respondent's customers in the Detroit Division, which embraced the Detroit Metropolitan area in Michigan, and in fulfilment of respondent's contracts with many of said customers. From the time of manufacture at Whiting, Indiana, until delivered to the purchasers thereof in the Detroit Metropolitan area in Michigan, the gasoline was, and remained, the exclusive property of respondent, and every contract touching the same was made in its name by its officers and agents, acting within the scope of their delegated authority.

Conclusion of Law:

The transactions complained of were in interstate commerce, *Midland Oil Company* v. *Wallace*, 41 F. Supp. 436; *Alabama Independent Service Station Assn., Inc.*, v. *Shell Petroleum Corporation*, 28 F. Supp. 386; *Stafford* v. *Wallace*, 258 U. S. 495.

The answer to the first question is "Yes".

VI.

Second Question.

Did the .5¢ per gallon differential respondent granted Ned's Auto Supply Company from September 1, 1936, to March 1, 1938, on tank-wagon deliveries of gasoline under the price it charged its other retail reseller tank-wagon customers, make only due allowance for differences in cost of sale and delivery resulting from differing methods or quantities in which the gasoline was sold and delivered to Ned's Auto Supply Company and to respondent's other tank-wagon customers in the Detroit Metropolitan area in Michigan?

Preliminary to a review of the related evidence attention is invited to a procedural situation requiring consideration. While the record conclusively establishes that the one-half cent differential accorded Ned's commenced September 1,

1936 (R. 4852-3) and was permanently discontinued March 1, 1938 (R. 3742-3), 3745-6, 3748), respondent asserts in its answer, and offered evidence which it claims establishes that the granting of the differential was not only not prohibited,, but was expressly sanctioned by the
447 statute, thus putting squarely in issue and apparently requiring decision of the Second Question (*Sears, Roebuck & Co.* v. *Federal Trade Commission*, 258 Fed. 307, 310).

The related evidence: The record affirmatively discloses that no attempt was made by respondent to determine at, or prior to September 1, 1936—the date when the differential was granted—or at any subsequent time prior to the issuance of the complaint, what relation the one-half cent differential bore to the actual difference in the cost of marketing gasoline to Ned's and to its other tank-wagon retail customers, either individually or collectively in the Detroit Metropolitan area.

Subsequent to the issuance of the complaint and during the hearings in March, 1941 (R. 2446), respondent decided to have a survey made to determine the cost differential. The work was assigned to its economist, then, and for more than four years theretofore in charge of its Budget and Sales Research Department (R. 2280-85, 2446) and was rendered difficult by the absence of records of what had transpired more than three years theretofore. The economist made recourse to all available sources of information, sought and obtained the assistance of the heads and members of the various departments of the respondent company (R. 2446-7), caused a survey to be made to determine certain items of cost (R. 2455-7), and after diligent effort completed and submitted a marketing cost statement or account for the calendar year 1937 embodying his conclusions, based upon the information he obtained, as to the approximate cost differential during that year in selling and delivering gasoline to Ned's and the average cost of selling and delivering gasoline to all of respondent's other tank-wagon reseller customers in the "Detroit Division" (R. 2449), which statement was offered, admitted in evidence (R. 2440; Resp. Ex. 31-A), and is here reproduced:

448 Differences in Certain Marketing Expense Items Incurred by Distributing Through Regular Reseller Outlets Versus Distributing Through Ned's Auto Supply Company—1937

	Regular Reseller Business	Ned's Auto Supply Company	Difference of Marketing Costs
	¢/Gal.	¢/Gal.	¢/Gal.
1. Delivery Cost			
(a) Salaries—Drivers	.114¢	.076¢	.038¢
(b) Equipment	.049	.038	.011
2. Marketing Expense Items Not Influenced by Ned's Auto Supply Company			
(a) Sales Promotion	.016	—	.016
(b) Other	.084	—	.084
3. Semi-Direct Expense Items Not Incurred in Handling the Volume of Ned's Auto Supply Company	.017	—	.017
4. Selling Cost	.079	.005	.074
5. Dispensing Equipment Loaned	.092	.016	.076
6. Advertising Cost	.238	.025	.213
Total	.689	.160	.529

This marketing cost account was accompanied by an explanation of each item appearing thereon wherein the factual basis used, and the accounting methods employed, were fairly set forth (Resp. Exs. 31-B thru Q), and explained in greater detail and with commendable frankness in oral testimony (Direct 2446-2640; Cross, 3720-4254).

Respondent's claimed justification for granting the differential is pivoted upon its Exhibit 31-A, which was admitted in evidence by your examiner, as this is a pioneer case, to enable the Commission in the light of all related evidence to determine its evidentiary character.

449 Analysis of Items Making Up Respondent's Cost Account

Respondent's cost account (Resp. Ex. 31-A) is made up of six classified cost items—(1) "delivery cost" divided into (a) "salaries—drivers", (b) "equipment"; (2) "marketing expense items not influenced by Ned's Auto Supply Company", divided into (a), "sales promotion", (b) "other"; (3) "semi-direct expense items not incurred in handling the volume of Ned's Auto Supply Company"; (4) "selling cost"; (5) "dispensing equipment loaned"; (6) "advertising cost".

The correctness of the mathematical computations are not questioned, but the basis adopted for determining the difference in the cost of sale and delivery (a) to Ned's; and (b) to respondent's other tank-wagon customers, resulting from differing methods or quantities in which the gasoline was sold and delivered; and (c) the factors used and accounting methods employed, are challenged by counsel for the Commission, particularly with reference to items (1) "delivery costs"; (2) "marketing expense items not influenced by Ned's"; and (6) "advertising costs", consideration of which in the order named follows: "1. Delivery Costs."

The differential claimed on this item is .049¢ per gallon (Resp. Ex. 31-A).

Basis used for determining costs of deliveries to Ned's and that used for determining costs of deliveries to respondent's other tank-wagon customers. Full tank-wagon loads, or dumps, was adopted and used as a basis for determining the costs of deliveries to Ned's (Com. Ex. 31-B). The average cost of making multiple dump deliveries to all of respondent's other tank-wagon customers was adopted and used for determining the costs of deliveries to them (Com. Ex. 31-B thru F). The two results obtained were then compared and the difference is the amount claimed.

Ned's was one of respondent's 358 tank-wagon reseller customers in the Detroit Metropolitan area, a part of whom (R. 4181, 5176, 4042, 5181, 5190) including Ned's

(R. 3108, 4019-20, 4048, 3780) took a part of all deliveries of gasoline in full tank-wagon loads. All were supplied from the same bulk plants and by the same equipment. No records of deliveries to any single station made during the period from September 1, 1936 to March 1, 1938 were in existence when Respondent's Exhibit (31-A) was prepared (R. 4021). The testimony with reference to the deliveries to Ned's and to respondent's other tank-wagon customers is here summarized:

450 Deliveries to Ned's. Respondent's claim that all deliveries to Ned's were in full tank-wagon loads stems from a verbal contract (R. 3108, 5072, 4019-20, 4048) which provided for full or partial tank-wagon loads, whichever was most convenient to respondent, the presumption that the terms of the contract were adhered to, supplemented by the testimony of respondent's economist that, based upon his knowledge gained from an analysis of the business, and information obtained from superintendents and drivers who made deliveries (R. 4042), all deliveries to Ned's were full dumps, except where a partial dump was made on a return trip rather than bring the gasoline back to the yard (R. 4019-20) but the witness frankly admitted that he did not know of his own knowledge or knowledge gained from records, either the number or percentage of full and partial dump deliveries made to Ned's during the year 1937 (R. 3817).

Deliveries to other tank-wagon reseller customers. The record fairly establishes that in 1937 full dumps to a part of the other 357 tank-wagon customers in the Detroit Metropolitan area were not uncommon. Most of the stations served had storage for more than 1500 gallons, particularly the stations leased to tenants by respondent, and the quantity delivered in a single load depended upon the amount of gasoline in the tanks when delivery was made (R. 5181-4, 1937-8, 2502). Those stations having sufficient tankage to take full dump deliveries (R. 4118-20) were urged by respondent to do so (R. 5176, 4042) and many of them did (R. 5181, 5190), it being the policy of respondent when orders for full tank-wagon dumps were received to deliver the amount in one load (R. 5182), certain of its trucks (tank-wagons) making only full, and others only multiple dump deliveries. The tank-wagon then in use ranged from 600 to 1500 gallon capacity (R. 4033) and the majority of the deliveries averaged between 700 and 800 gallons (R. 26-7), or more than the capacity of the smaller tank-wagon. Whether any of the other 357 customers took all or substantially all of the deliveries in full tank-wagon loads, and if so, how many, is not shown by the record, but that a substantial part of the deliveries made to a part of them were made in full dumps is fairly established.

Delivery costs based on survey made in 1940. There being no records available for the period, September 1, 1936, to March 1, 1938, from which any difference in cost of deliveries to Ned's and to respondent's other tank-wagon customers resulting from differing methods or quantities could be determined, and proceeding upon the assumption that all deliveries to Ned's were of full, and all other deliveries were of partial dump deliveries, respondent's economist used records of deliveries of 451 two trucks (tank-wagons) made in 1940 (Resp. Ex. 31-B; R. 2461), one making 94 full, and the other 200 multiple dump deliveries (R. 2455-6; Resp. Ex. 31-B thru F). In 1940, Ned's had ceased to be a tank-wagon customer, but it was testified that the type of full, and of multiple dump deliveries made in 1940 were typical of the deliveries of full dumps to Ned's and of multiple dumps to other tank-wagon customers in 1937 (R. 2461) and that all costs pertaining to investment, operation, maintenance, insurance and taxation, including depreciation of the two tank-wagons were substantially the same in 1937 and 1940 (R. 2456-72). From the record of the operation of the two trucks (tank-wagons) the per gallonage cost of salaried drivers and equipment used in making full, and multiple dump deliveries was computed (for procedure see R. 2464-72; Resp. Exs. 31-B thru F), and the conclusion reached that the delivery cost of salaried drivers and equipment in the Detroit Metropolitan area of making full load deliveries to Ned's was .049¢ per gallon less than the average cost of making multiple dump deliveries to other tank-wagon customers (Resp. Ex. 31-A).

Cost of full dump deliveries to Ned's and of like dumps to other retail customers, identical. There is no evidence establishing or tending to establish that it cost less to make a full dump delivery to any of Ned's stations than to make like delivery to the stations of any one of the other 357 customers. The method of delivery was identical. No reduction in price was offered or allowed any of the other 357 tank-wagon customers on full dump deliveries (R. 5184).

Costs of Sale.

All remaining costs are costs of sale.

"2. Marketing Expense Items-Not Influenced by Ned's."

(a) Sales Promotion—Costs of Sale. The differential claimed on costs of sale is .016 and the justification for the item appears on Respondent's Exhibit 31-G. The item of sales promotion cost totaling $10,665.75 is taken from respondent's accounting form 189 for the entire "Detroit Division" (Resp. Ex. 32) and which it is claimed were not influenced by Ned's business. No part of this cost is charged to Ned's. All is charged to the remaining reseller stations in the entire Detroit Division on a gallonage
452 basis, and the average gallonage for all stations used as a basis for determining the cost of each station.

Respondent's reseller business in Detroit in 1937 was in charge of F. McK. Blough, at that time Assistant Manager-Reseller in the Detroit Division. Mr. Blough testified that the time spent by salesmen at reseller service stations (of which Ned's was one) in 1937 was spent largely on sales promotional work. Once a gasoline account was established but little or no time was thereafter consumed in soliciting further sales (R. 5140). While no sales promotional work, or work in connection with the sale of gasoline at the respective stations, was done at Ned's, the reason was that Ned's did not desire such service (R. 5145). If it had, this same service afforded other service stations would have been available to Ned's (R. 5148). Ned's was not the only reseller outlet supplied by respondent that did not avail itself of this service, there being others (R. 5145). The reason why Ned's did not receive this service was not because of any different method of sale or quantity of delivery, but because Ned's like other service stations, did not desire the sales promotional assistance provided by respondent (R. 5180).

(b) "Sales Promotion". "Other". Under this heading (Resp. Ex. 31-H) are listed certain other marketing expense items "of an overhead nature", and the differential claimed is .084¢ per gallon.

The first item of $4,550 was taken from respondent's regular accounting form 189, for the entire Detroit Division, item 1001 "Salaries—Supervision—others" (See Resp. Ex. 32). This account was made up chiefly of salaries of clerks and stenographers to the supervisory officials whose salaries were entered in respondent's regular accounting form 189, item 000. No part of this cost is charged to Ned's. The allocation of the salaries of these employees between customers and products followed the allocation of the salaries of the officials for whom they worked (Resp. Ex. 99, p. 19). These officials supervised sales to Ned's in 1937 as well as sales to other tank-wagon customers, all of such customers being served from the same bulk plants. These costs are general in their nature and cannot be charged directly to a particular channel of distribution (Resp. Ex. 99, p. 19). Witness Warmack, Commission's accountant, testified that this item of expense could not be segregated between customers (R. 5791).

453 The two largest remaining items (Resp. Ex. 31-H) are

Acct. 1215, Expense—Salaries—Others	$ 8,912.32
Acct. 1066, Miscellaneous Operating Expense	40,142.68

These two items totaling more than $49,000 are made up in large part of expenses incurred by respondent in connection with the operation of its leased service station properties (R. 3891, 5846). In 1940 more than two-thirds of respondent's miscellaneous operating expense in the Detroit field were leased service station expenses (Com. Ex. 119). The leased stations numbered 208 and the non-leased stations numbered 150, supra (Sec. IV-"e"). Most of this leased service station expense is recouped by respondent in the form of rentals collected from lessees. No effect is here given to these rentals in reducing the net costs in these accounts. The leased service station expense entering into these two accounts is not chargeable to the cost of selling gasoline to non-lessee stations. No attempt was made to separate the selling cost of leased and of non-leased stations. If these expenses are to be applied in reaching an average per gallon cost for all retail stations the leased service station expense, in the opinion of witness Warmack, Commission's accountant, should have been eliminated or reduced in proportion to the relation of total rentals to total expense of that nature (R. 5794-6, 5848).

"6. Advertising Cost."

The differential claimed under this item is .213¢ per gallon, or nearly one-half of the total differential of .529 per gallon claimed by respondent (Resp. Ex. 31-A). Respondent's justification for this item is set forth in its Exhibits 31-O-P.

With the exception of "point of sale advertising"—meaning advertising at the point of sale (service station) such as banners, games, globes and displays—which aggregated a small sum (the exact amount not being shown by the record), all advertising expense in the Detroit Division was charged against the service stations other than Ned's (Resp. Exs. 31-O-P).

The first item, totaling $4,550.06 (Resp. Ex. 31-O), was taken from respondent's accounting Form 189 for the entire Detroit District, supra (Sec. IV-"d") and represented agents' salaries, traveling expense, operation and maintenance of vehicles used and vehicle depreciation expense, all in connection with advertising. No part of this expense was charged to Ned's. The advertising manager's responsibility was the same for Ned's as for all the other service station outlets (R. 5018-21). He had charge of installation and maintenance of all point of sale ad-
454 vertising at all Standard Oil outlets, including those supplied by jobbers (R. 5019-20) and in the opinion of Mr. Warmack, Commission's accountant, some part of this expense should have been charged to Ned's (R. 5901-2).

All of the second item of $154,635.04 (Resp. Ex. 31-O—broken down in Com. Ex. 84-A, R. 4199-4200) with the exception of $2,920.89 and some part of $26,558.31 (not shown by the record) representing the cost of point of sale advertising, was charged to service stations other than Ned's in the Detroit Division (Resp. Exs. 31-O-P). The kind of advertising and cost of each, no part of the expense of which was charged to Ned's, consisted of newspaper advertising, $76,120.34; printed matter and direct mail, $18,937.87; motion pictures, $12,371.72; outdoor posters, $11,256.99; dealer trade papers and magazines, $6,468.72; and a substantial part of "miscellaneous items too small to show separate classifications", $26,558.31 (Com. Ex. 48-A), the purpose of which was to create consumer acceptance and increase the sale of gasoline at all Standard Oil stations (R. 4222, 4333, 4335). No dealers were mentioned by name in such advertising (R. 4219), and Ned's Company received the benefit thereof with all other retail stations selling respondent's gasoline.

Mr. Boatwright testified that the reasons why no part of the items—newspaper, $76,120.34 and outdoor posters—

were charged to Ned's were: (a) Ned's Company does its own newspaper advertising from which respondent's products receive a direct benefit, and while Ned's Company undoubtedly derived a benefit from respondent's advertising, respondent received a reciprocal benefit from Ned's emphasis of respondent's merchandise; (b) that a study of the allocation of respondent's advertising expenditures among the various fields indicated that respondent's expenditures in the Detroit area bears a lower relationship to potential expenditures than any other field; (c) that Ned's Company outlets are large and popular distributors of many other lines of merchandise calling for and resulting in a heavy traffic across their driveways and the presence of respondent's merchandise on those driveways results in a direct advertising benefit to both respondent's gasoline and motor oil in the Detroit area; (d) that respondent's advertising expenditures are to convince customers of the merits of respondent's products and services, that customers are associated with a company and brands, and an outlet cost of advertising allocation is practically impossible; (e) that to the best of his knowledge respondent had never, either by newspaper or billboards, advertised to acquire wholesale outlets; and that expenditures for 455 newspaper and outdoor advertising were not increased with the acquisition of Ned's account, nor would they be reduced with the loss of that account, and that the loss of the account would be more likely to result in an increase in expenditures than a decrease (R. 4550-5; Resp. Ex. 96-B-C).

Mr. Warmack, Commission's accountant, testified that there is no sound method by which such costs can be allocated between different service stations selling Standard Oil products except on the basis of gallonage (corroborated by Boatwright, supra. (d)), which would afford no cost differential (R. 5906).

Mr. Boatwright further testified that if the Commission concluded it was necessary to charge a proportionate part of the newspaper and billboard advertising cost to Ned's on a per gallonage basis it would reduce the advertising cost differential shown in Respondent's Exhibit 31-A from .213 to .081 of a cent per gallon and reduce the total differential from .529¢ to .397¢ per gallon, substantially less than the .5¢ differential accorded Ned's (R. 4550-5; Resp. Ex. 96-A-C-D). If the entire item of $154,635.04, except such part as related to point of sale advertising, were distributed on a per gallonage basis between Ned's and the other reseller outlets, the claimed advertising cost differential would be reduced to a negligible amount.

Conclusions of Fact:

1. Respondent's claim that there was a difference of .529¢ per gallon, or of .5¢ per gallon—the differential allowed—in the cost of sale and delivery of gasoline to Ned's Auto Supply Company and to respondent's other tank-wagon customers in the Detroit Metropolitan area in Michigan, resulting from differing methods or quantities in which the gasoline was sold and delivered, lacks evidentiary support.

2. The basis adopted and used for determining the costs of sale and delivery in the Detroit Metropolitan area, to Ned's Auto Supply Company—all full dump deliveries—and that adopted and used for determining costs of sale and delivery to respondent's other tank-wagon customers—all partial dump deliveries—had no factual foundation, and the comparison of the results neither establishes nor tends to establish any differential in the cost of sale and delivery of gasoline to Ned's Auto Supply Company and to respondent's other tank-wagon customers in that area.

456 3. The evidence conclusively establishes that a part of respondent's tank-wagon customers took a part of the gasoline delivered to them in full loads or dumps. There is no evidence of any difference in cost of sale or delivery in full tank-wagon loads to them and of sale and delivery in full tank-wagon loads to Ned's, resulting from differing methods or quantities in which the gasoline was sold and delivered. The methods of sale and quantities delivered were identical.

Conclusion of Law.

The differential of .5¢ per gallon respondent allowed Ned's Auto Supply Company from September 1, 1936, to March 1, 1938, on sales and deliveries of gasoline by tank-wagon, under the prices it charged its other tank-wagon customers, did not represent the true difference, if any difference in fact existed, in cost of sale and delivery resulting from differing methods or quantities in which the gasoline was sold and delivered to Ned's Auto Supply Company and to respondent's other tank-wagon customers in the Detroit Metropolitan area in Michigan.

The answer to the second question is "No".

VII.

Third Question.

Did the differentials of 1.¢ per gallon on Stanolind, 1.5¢ on Red Crown and 1.75¢ on Solite with Ethyl gasolines accorded the four dealers recognized by respondent as jobbers, or tank-car or transport truck customers, under respondent's posted tank-wagon prices charged its retail reseller customers for gasoline of like grade and quality, make only due allowance for differences in cost of sale and delivery resulting from differing methods or quantities in which the gasoline was sold and delivered to respondent's jobber or tank-car customers and to its retail reseller, or tank-wagon customers, in the Detroit Metropolitan area in Michigan?

Differential of 1.75¢ per gallon on Ethyl gasoline admittedly not justified. The per gallonage cost of sale and delivery of respondent's three brands of gasoline—Red Crown, Solite with Ethyl and Stanolind—is the same, supra (Sec. IV-"i"). The per gallonage marketing cost differential claimed by respondent is 1.51¢ (Resp. Ex. 457 101). No attempt was made to justify the differential of 1.75¢ per gallon allowed each of the four dealers on Solite with Ethyl gasoline, supra (Sec. IV-"h") on the ground that it represented the difference in the cost of sale and delivery of this brand to its retail reseller, and to its jobber customers. Of the total volume of gasoline marketed by respondent in the Detroit Metropolitan area in Michigan only approximately 7 per cent is Solite with Ethyl gasoline, supra (Sec. IV-"b").

Differential allowed on Stanolind gasoline. There is no evidence specifically relating to the cost of marketing Stanolind gasoline. It is conceded by counsel that the per gallonage cost of sale and delivery of each of the three kinds or brands of gasoline was the same, supra (Sec. IV-"j"). Stanolind gasoline represented only 3 per cent of respondent's total volume of gasoline sold in Michigan, supra

(Sec. IV-"b"). If a difference in cost of sale and delivery of as much as 1.¢ per gallon is established the differential granted on Stanolind was lawful.

The related evidence:

Respondent made no attempt to ascertain and determine cost differentials until nearly four years after the approval of the Robinson-Patman Act. It was not until four years after the effective date of the Robinson-Patman Amendment to the Clayton Act that respondent made any effort to determine the jobber cost differential. Its first move in that direction was in 1940 (R. 2662) (shortly before the complaint issued in this proceeding) when respondent caused a survey to be made to determine the "profitability of jobber operations". The survey was made in 1940, was based on respondent's records for the year 1939, was confined largely to the Oklahoma part of its Kansas-Oklahoma Division (Resp. Ex. 33-C)—the only field in which respondent's operations were exclusively by tank-car or transport truck (R. 4359)—was made for respondent's information and had no relation to any pending or threatened litigation (R. 2669). The factual basis for, and accounting methods employed in this survey are set forth in Respondent's Exhibits 31-C-D-E, and the per gallonage cost of sale and delivery of gasoline by tank-car or transport truck to the Kansas-Oklahoma jobbers as therein computed was ¼ of a cent.

Survey made to determine sale and delivery cost by tank-wagon. Early in 1941, and after the complaint in this proceeding issued, respondent made a cost accounting study to determine the per gallonage cost of sale and delivery of gasoline by tank-wagon in the entire Detroit Division, for the years 1939 and 1940, the result of which is set forth in Respondent's Exhibit 33-A, and the conclusion reached that the per gallonage cost by tank-wagon delivery for the year 1939 was 1.81¢, and for the year 1940 was 1.72¢ (Resp. Exs. 31-A-B).

458 Results of surveys used for comparison. The .25¢ per gallon, determined to be the cost of sale and delivery of gasoline by tank-car in the Kansas-Oklahoma Division, and the 1.81¢ and 1.72¢ per gallon determined to be the cost of sale and delivery by tank-wagon in the entire Detroit Division, supra (Sec. IV-"d") for the years 1939 and 1940, were adopted as establishing the cost of sale and

delivery of gasoline to the four dealers by tank-car and to respondent's retail tank-wagon customers in the Detroit Metropolitan area, the results compared and a differential of 1.47¢ for 1940 and 1.56¢ for 1939, claimed to have been established in the cost of sale and delivery to the four dealers by tank-car and to respondent's retail customers by tank-wagon in the Detroit Metropolitan area (Resp. Exs. 33-A thru E).

The correctness of the mathematical computations (Resp. Exs. 33-A thru E) is not questioned, but the basis adopted, factors used and accounting methods employed for determining the cost of sale and delivery to (a) the four dealers; and (b) to respondent's retail tank-wagon customers, are challenged.

Factual basis used for surveys. For the purpose of determining per gallonage tank-wagon delivery costs for the Detroit Metropolitan area, the tank-wagon marketing cost records of the respondent company kept in the regular course of its business on its Form 189 for the entire Detroit Division were used (Resp. Ex. 33-B), the average cost of sale and delivery to all retail tank-wagon customers in the entire Detroit Division computed, and the result adopted as establishing the average gallonage cost of sale and delivery to those stations in the Detroit Metropolitan area. Only a small part of the territory in the Detroit Division is embraced in the Detroit Metropolitan area, the remainder being rural supra (Sec. IV-"d"). In populous areas (such as the Detroit Metropolitan area) the cost of marketing gasoline is usually less on a per gallonage basis than in rural sections (R. 1516). Rural territory is generally a contributing factor to high cost of sales but there are exceptions (Boatwright, R. 5657; Com. Ex. 123).

For the purpose of determining the per gallonage tank-car delivery cost for the Detroit Metropolitan area the results shown by the Kansas-Oklahoma survey were used. This survey was limited to jobbers operating in the Oklahoma portion of the field (Resp. Ex. 33-C) and the factual basis used and results arrived at were as follows:

Accounting costs (first item) were computed from estimates made by department heads of time spent with various jobbers in Oklahoma by officials and employees of
459 respondent, reduced to a gallonage basis (Resp. Ex.
33-C); the accounting cost of two of the jobbers—Gibson Oil Company and Kramer Oil Company (R. 4410-11,

4439)—whose business was unprofitable (R. 4388-9) but who handled nearly one-half the gallonage sold by respondent in the Oklahoma field (R. 4428-30) was eliminated and the gallonage of the remaining jobbers—2,166,168 gallons—used for determining the gallonage cost which was computed as .10¢ (Resp. Ex. 33-C).

Credit costs (second item) were computed in the same manner and the per gallonage cost for this item computed as .03¢ (Resp. Ex. 33-C).

Supervising and selling costs (third item) were computed in the same manner except that the total gallonage—4,206,686 gallons—which included the gallonage of the Gibson and Kramer Companies, was used for determining the per gallonage cost which for this item, was computed as .06¢ (Resp. Ex. 33-D; R. 4429-30).

General office expense (fourth item) was determined by taking the estimated cost in dollars and cents, as shown by respondent's records, for the first six months of the year 1939, and doubling that cost so as to get an approximate cost for the full year and then determining the per gallonage cost based on the total gallonage—4,206,686 gallons—for the Oklahoma field, which for this item was computed as .01¢.

Point of sale advertising (fifth item) was determined by taking the cost of signs, jewel globes, maps, etc., supplied the Oklahoma stations, including Gibson and Kramer, and determining the per gallonage cost therefrom, using the total gallonage—4,206,686—sold in Oklahoma as the basis therefor, which, for this item was computed as .05¢ (Resp. Ex. 33-E).

The total of the five items is .25¢ per gallon (Com. Ex. 33-A), the amount claimed by respondent as the cost of marketing gasoline by tank-car in Oklahoma.

The total gallonage used in determining a part of the costs in this survey—2,166,168 (Resp. Ex. 33-C) was slightly more than 2/5 of the gallonage sold Citrin-Kolb and slightly more than one-half of the gallonage sold Ned's Auto Supply Company (two of the Detroit dealers) the same year, and the gallonage delivered to at least one during the entire year was only 5,108 gallons (Resp. Ex. 54).

460 Costs of sale and delivery incurred by Citrin-Kolb Company. As tending to support its claim that the cost of sale and delivery by tank-wagon in the Detroit Metropolitan area was 1.5¢ per gallon, respondent introduced

evidence designed to show the cost of sale and delivery by the Citrin-Kolb Company, one of the four dealers. This consisted of the testimony of Max Biber which will be found in the record at pages 1330-78, 3034-66 and Respondent's Exhibits 7 thru 17. This witness was not an expert accountant, but an attorney at law, and General Manager for the Citrin-Kolb Company (R. 294) and as such he supervised the keeping of the records of that company. His testimony is in substance that from his computation the approximate cost was 1.5¢ per gallon (R. 1357). This computation—(Resp. Exs. 7 thru 17) contains many items of expense relating solely to the service stations owned and operated by the company (R. 2977-3022, 3035-6; for service stations so operated see, supra Sec. IV-"f"). The record conclusively shows that this company, during 1938, 1939 and 1940, annually sold more than a million gallons of gasoline purchased from respondent at .5¢ per gallon above the purchase price, making delivery by tank-wagon to five retail stations owned and operated by Langer and Cohen (R. 3218-19, 1387) and made "money" (R. 3218-19).

No factual basis established by the evidence for Respondent's Exhibits 33-A thru E. The record contains no factual evidence based upon any cost study or investigation that the costs of sale and delivery of gasoline by tank-car in the Kansas-Oklahoma field were the same or substantially the same as, or have any relation to, the costs of sale and delivery of gasoline by tank-car in the Detroit Metropolitan area in Michigan.

The testimony relating to Respondent's Exhibits 33-A thru E is extensive and will be found in the record, Direct pp. 2461-80, Cross pp. 3212-4490, Redirect pp. 4557-4617, Recross 4617-75. Your Examiner has only called attention to what he considers inherent defects in the comparative basis adopted and used for this cost study and rendering it of no evidentiary value. To review them at length would unduly extend this report, and reference is here made, for additional reasons, to the motion of counsel for the Commission to strike the exhibits appearing in the record of pages 2676-83.

These exhibits were admitted in evidence subject to motion to strike (R. 2640-1). Thereafter counsel for the
Commission twice moved to strike them stating with
461 particularity the underlying reasons therefor (R. 2676-
83, 8051-4), which motions were denied by the Ex-

aminer who, realizing that this is a pioneer case, and that the exhibits represented respondent's only evidence in support of the claimed differential, believed the Commission should be afforded opportunity to pass upon the question with the complete record before it (R. 4685).

Upon denial of the motion to strike, counsel for the Commission gave notice, in view of a previous statement of respondent's counsel, that respondent would rely upon its Exhibits 33-A thru E as justification for the differential granted the four dealers, he (counsel for the Commission) intended to take the position before the Commission, and before the Courts, if necessary, that respondent had not sustained its burden of proof (R. 4685-6). Counsel for respondent thereupon requested opportunity to determine whether to rest respondent's case, and after consideration decided to have a detailed cost survey made and requested time in which to make the study. The request was granted and on June 27, 1941, the hearings were arrested to afford respondent opportunity to make the survey (R. 4701).

Preliminary to commencing work on the survey, Mr. Boatwright, respondent's economist, conferred with counsel for the Commission and with the Commission's Chief Accountant and his assistant, Mr. Warmack, and it was agreed that the year 1940 should be used for the purpose of the survey (R. 4714-15).

Respondent's Exhibits 99, 100, 101.

Hearings were reconvened November 17, 1941, (R. 4702) and the results of the survey made by, or under the direction of respondent's economist, were portrayed in a document entitled "Comparative Statement of Expense—Detroit Field—Year 1940" which was, after explanation, offered, marked Respondent's Exhibit 101, and admitted in evidence (R. 4731). Two other documents, one entitled "Explanation of Allocation of Marketing Expense to Channels Shown on Comparative Statement of Expense Form 189" (containing 33 pages), and the other entitled "Standard Oil Company (Indiana) Analysis of Distribution Costs Detroit, Michigan—Sales Division" (containing 133 pages) were, after explanation, offered and received in evidence as Respondent's Exhibits 99 (R. 4767) and 100 (R. 4849). Thereafter on motion of counsel for the Commission (R. 5703) that portion of Respondent's Exhibit 100, commenc-

ing on page 34 with the paragraph beginning with the words: "The Respondent's supplying Company", all the remainder of page 34, all of page 35, all of page 36, and all of page 37 down to and including the first paragraph thereof, was stricken. Exhibits 99 and 100 are explanatory of
the factual basis used and accounting methods em-
462 ployed in determining items of cost appearing in Ex-
hibit 101, and which items were further explained in detail, and with commendable frankness by Mr. Boatwright in oral testimony (R. 4714-85, 4848-5113, 5434-5661).

Thorough investigation made by Mr. Warmack, Commission's accountant. Prior to the cross-examination of respondent's economist and before offering rebuttal evidence, Mr. Warmack, Commission's accountant, made a thorough examination and study of Respondent's Exhibits 99, 100 and 101 (R. 5766) and went to Detroit and Chicago where he examined and studied respondent's records and data used as a basis for the survey, the factors used and the methods employed in the separation of costs as set forth in Respondent's Exhibit 100, and reviewed all evidence relating thereto appearing in the record (R. 5767).

Basis of Survey and Factors Used are Challenged.

The differential shown in Respondent's Exhibit 101 and that claimed is 1.51¢ per gallon. The correctness of the mathematical computations made are not questioned, but, as in the cost accounts hereinbefore referred to, the basis adopted for computing the sale and delivery cost (a) to the four dealers by tank-car; (b) to respondent's retail customers by tank-wagon; and (c) the factors used and accounting methods employed, are challenged.

Basis used for survey. Respondent's cost survey is not restricted to the costs of sale and delivery of gasoline to respondent's customers in the Detroit Metropolitan area, but embraces the entire Detroit Division (Resp. Ex. 101), which includes not only the Detroit Metropolitan area, but a large rural territory, supra (Sec. IV-"d"). No factual cost study or investigation to determine the relation of sale and delivery costs in the entire Detroit Division to those in the restricted Detroit Metropolitan area was made (R. 5958-60). The uncontradicted record evidence is that the rural section of the Detroit Division is served by respondent through 178 small bulk plants operated by commission agents (R. 3726-7) and known as "B Stations", as distinguished from the large bulk plants used to serve the Metropolitan area operated by salaried employees, and known as "A Stations" (R. 3739, 3798). The average territory of a reseller salesman operating in areas served by B stations is roughly 1600 square miles (R. 5133). Much of the time of the B Station commission agent is spent in calling on farmers and other customers (R. 3739, 3798).

The normal capacity of B Station trucks is 300 to 500 463 gallons (R. 1793), as compared with 600 to 1500 (usually 1500) gallon trucks, used in the Metropolitan area. In the Detroit Metropolitan area the salesman calls on approximately the same number of outlets in a much smaller area (R. 5133), and deliveries consume less time and expense. Rural territory is generally a contributing factor to higher cost of sale but there are exceptions (R. 5657; Com. Ex. 123). In populous areas the cost of marketing is usually less on a per gallonage basis (R. 1516). The lowest cost per gallon in the 27 territorial divisions in which respondent operates is in the Chicago and Detroit fields (Com. Ex. 123) which embrace the largest metropolitan areas.

Analysis of respondent's cost study. If respondent's cost study affords any evidentiary basis for determining costs of sale and delivery in the Detroit Metropolitan area, then the only questions for decision are whether the costs charged to the tank-wagon reseller and to the jobber, naphtha and gasoline channels, respectively, as depicted on Respondent's Exhibit 101, fairly reflect the cost properly allocable to each of those two channels.

Respondent's marketing costs for the year 1940 for the Detroit Division as shown on Commission's Exhibit 119 were used as a basis for the survey. The sale and delivery costs of marketing all petroleum products in the Detroit Division are included therein (except the costs of maintaining the River Rouge terminal and the transportation of the gasoline by tank-car from the River Rouge terminal to respondent's bulk plants and to the bulk plants of the four dealers), and distributed through five channels under the following headings: (1) Tank-wagon Reseller, (2) Tank-wagon Consumer, (3) Income and Expense—leased Service Stations, (4) Other Method, and (5) Automobile Supplies. No account was kept of the cost of marketing any single product (Resp. Ex. 100, p. 3).

The general marketing expense for 1940, and shown on Commission's Exhibit 119, is not questioned—only the allocation to the tank-wagon reseller and to the jobber channels is questioned.

To isolate from the various channels all costs of sale and delivery properly chargeable to marketing naphtha and gasoline to (1) the tank-wagon reseller, and (2) the jobber trade, and thereby establish basic costs for each to be used for comparison was the purpose of the survey.
464 The methods by which this was accomplished are set forth in Respondent's Exhibit 100, and the results portrayed on Respondent's Exhibit 101.

The accounting form on which is portrayed the total petroleum marketing cost for the Detroit Division (Com. Ex. 119) distributes the cost of marketing between three channels — 'Tank-wagon Reseller'', ''Tank-wagon Consumer'' and ''Other Method''. The ''Other Method'' includes sales of gasoline to jobbers, sales of other products to jobbers and expenses incident to direct shipments from respondent's supply terminals to customers buying in carload quantities (Resp. Ex. 100, p. 3). It became desirable in the cost study to segregate from the ''Other Method'' channel (Com. Ex. 119) all expenses therein chargeable to direct shipment customers, and then segregate therefrom all expenses chargeable to the sale and delivery of gasoline to the four jobbers. To effectuate this, three additional channels were added to Respondent's Exhibit 101 under the general heading ''Direct Shipment Customers'' and broken down into three channels headed respectively, ''Jobbers Naphtha and Gasoline'', ''Jobbers Other Products'' and ''Other Customers'', showing the computed naphtha and gasoline sale and delivery cost of each.

The result of the cost accounting was to increase the total cost of sale and delivery of 69,301,586 gallons of naphtha and gasoline to the tank-wagon reseller customers from $1,145,399.13 as shown in its regular account on Form 189 (Com. Ex. 119) to $1,155,379.06, or an increase of $9,989.93 (Compare Com. Ex. 119 with Resp. Ex. 101), and to determine the cost of sale and delivery of 15,296,828 gallons of naphtha and gasoline to the four jobbers as $24,389.05 (Resp. Ex. 101). These costs reduced to a gallonage basis are computed respectively as 1.67¢ per gallon to the tank-wagon reseller customers and .16¢ per gallon to its jobber customers, resulting in a claimed differential of 1.51¢ per gallon (Resp. Ex. 101).

Items in cost account not disputed and those disputed. Without conceding the proper allocation and accuracy of 44 of the items listed on Respondent's Exhibit 101, but for the purposes of this proceeding only, counsel for the Commission makes no objection to the expense allocation of 44 of the 118 items enumerated on Respondent's Exhibit 101 (R. 4460-78, Com. Ex. 133). The items thus conceded bear the following account numbers on Respondent's Exhibit 101:

The allocation of the expense of the remaining 74 items listed on Respondent's Exhibit 101 are challenged on the following grounds: (a) incorrect and improper factors used or accounting methods employed; (b) insufficiency of investigation to justify the conclusions reached; and (c) no investigation (R. 5958-6494, 6674-6844). The related evidence which is voluminous is confined almost entirely to the testimony of respondent's economist, Dr. Boatwright, and to the Commission's accountant, Mr. Warmack, and will be found in the record: Boatwright, Direct 4714-85, Cross 4848-5113, 5434-5661, Redirect 5376-97, 5661-2, Recross 5388-97; Warmack, Direct 5671-89, 5923-6493, Cross 5690-1, 6500, 6995, Redirect 7697-7808.

To review the record evidence relating to each of the 74 items would unnecessarily encumber this report, and only the more important items will be hereinafter considered.

Cost of transporting gasoline from River Rouge terminal to bulk plants of the four dealers omitted while identical costs are charged to the tank-wagon trade. The cost of delivering gasoline commences at the River Rouge terminal. The cost of maintaining the River Rouge terminal is defrayed by respondent's Manufacturing Department, supra (Sec. V, R. 4283), no part of which appears in Respondent's Exhibit 101. The transportation of the

gasoline from the River Rouge terminal to the bulk plants of the four dealers is by common carrier, supra, (Sec. V), no part of which appears in Respondent's Exhibit 101. Prior to January 1941 substantially all deliveries to the bulk plants of the four dealers was by tank-car (R. 4311-12) for which respondent paid a local shipping charge to the railroads. The capacity of the average tank car was 10,000 gallons. The charge per car on these shipments as shown on freight bills for separate shipments in 1939 to Ned's Auto Supply Company was $24.20; to Citrin-Kolb Oil Company, $26.40; to Stikeman Oil Company, $17.60; to Wayne Oil Company, $24.20 per car, which resulted in a cost of delivery to Ned's of approximately .242¢, to Citrin-
466 Kolb of approximately .264¢, to Wayne Oil Company
of approximately .242¢, and to the Stikeman Oil Company of approximately .176¢ per gallon (Com. Ex. 122). This cost was paid by respondent (R. 4312) but no part was included in computing the cost of marketing gasoline to the four jobbers (Resp. Ex. 101). Subsequent to January 1941, delivery to the four jobbers was by transport truck, the cost of which was paid by respondent (R. 4311-12) and was approximately .155¢ per gallon (Com. Ex. 93), no part of which was included in computing the costs of marketing gasoline to the four jobbers (Resp. Ex. 101).

The transportation of naphtha and gasoline to respondent's tank-wagon reseller customers was by tank-wagons owned and operated by it, supra (Sec. V), and all items of cost, except the cost of transporting gasoline from the River Rouge terminal to the six bulk plants in the Detroit area, were paid by the Detroit office and are included in the costs of marketing gasoline on Form 189 for the Detroit Division, supra (Sec. V). Prior to July 7, 1941, approximately 10 to 15 per cent (R. 5719) and thereafter approximately 35 to 40 per cent (R. 5720) of the gasoline served the tank-wagon trade was delivered direct from the River Rouge terminal by tank-wagon to the Service Stations, supra (Sec. V). The 85 to 90 per cent delivered prior to 1941 and the 60 to 65 per cent thereafter delivered was from respondent's bulk plants in the Detroit Metropolitan area. In Respondent's Exhibit 101 the tank-wagon trade is charged with all costs of delivery from both the six bulk plants and from the River Rouge terminal to the Service Stations. In 1942 three of the six bulk plants theretofore maintained by respondent in the Detroit area were dismantled (R. 7131).

Income and Expense—Leased Service Stations. The third column on Commission's Exhibit 119 is entitled "Income and Expense—Leased Service Stations", which reflects all expenses incurred by respondent in connection with the maintenance and leasing of approximately 208 service stations it owns and leases, or leases and sublets, supra (Sec. IV-"e"), and all revenue received therefrom (R. 4327-9). This column is omitted from Respondent's Exhibit 101. (Compare Exhibits) In 1940, the charges to this column exceeded credits by $48,506.44 (Com. Ex. 119; R. 4329) In the allocation of this expense, respondent's economist charged all of the $48,049.10 to the sale and delivery of naphtha and gasoline to all of the 358 stations served by respondent, supra (Sec. IV-"e") and the small remainder to the "Other Method" column. (Compare Item 060A on Com. Ex. 119 and Resp. Ex. 101, and see Resp. Ex. 99, p. 12.) Of the total gallonage sold to 467 the respondent's tank-wagon reseller customers a substantial part was sold to the 150 non-leased and independently owned service stations, supra (Sec. IV-"e") for which they were charged their proportionate share of this cost (R. 600-3).

In the opinion of witness Warmack, Commission's accountant, no part of this cost should have been charged to the cost of marketing naphtha and gasoline to the 150 non-leased and privately owned stations (R. 5996, 6003, 6782, 6787).

Cost of Marketing Kerosene and Tractor Fuels Charged in Tank-wagon Reseller Channel. Costs of marketing kerosene and tractor fuels sold to the tank-wagon trade were included in the cost of marketing naphtha and gasoline to the tank-wagon reseller customers (R. 257), and appear in the tank-wagon reseller column in the cost account (Resp. Ex. 101). These costs, concededly improperly charged to the tank-wagon reseller channel, amount to about 1 per cent of the total volume shown in that channel (R. 4257).

Different methods of computing tank-wagon reseller and jobber costs. Respondent's direct shipment business in the Detroit Division in 1940 amounted to approximately 46,000,000 out of a total of approximately 152,000,000 gallons for all petroleum products (R. 4314). In its regular accounting procedure respondent does not recognize direct shipment gallonage and where expenses are allocated between classes of customers or products on a gallonage basis, direct shipment gallonage is not included in the gallonage used for that purpose (R. 7998-9, 4306). In its cost study the expenses of marketing to jobbers were not determined by the use of a gallonage method of allocation, but all direct shipment costs, including the costs to jobbers, were determined on the basis of effort of employees devoted to that class of business (R. 8001-02). The allocation on the basis of effort was not carried through to the tank-wagon reseller column except in accounts where the allocation is made on the basis of effort in respondent's regular accounting procedure (R. 5949). As a result in many accounts appearing on Respondent's Exhibit 101 expense charged is allocated between the three tank-wagon channels on a per gallonage basis, and between the three direct shipment channels on an effort basis. This is true of the following accounts:

(R. 6024, 6185-6, 6676, 6690, 6718, 6771, 6794, 6801, 6805, 6819, 6822, 6825-7, 6829-34, 6836, 6840).

Before adopting the gallonage factor in the allocation of costs among the three bulk plant channels shown on Respondent's Exhibit 101, respondent's economist made no study "tending to verify or substantiate the use of the gallonage factor in the allocation of costs among the three sales channels" (Boatwright, R. 8005), and theretofore no study or tests had been made to support the use of the gallonage factor with a view to comparing the cost of sale and delivery of naphtha and gasoline to respondent's tank-wagon reseller and its jobber customers (Boatwright, R. 8006).

Witness Warmack, Commission's accountant, testified that he was told by respondent's accountant that no study had been made to support the gallonage method of allocation or the accuracy of the figures obtained by using this method. He spent six weeks in Detroit reviewing the factual basis for Respondent's Exhibits 100 and 101, and while there he requested that he be furnished any information which would support the use of gallonage used in respondent's cost study as a measuring factor, and was told that respondent had no such information (R. 4934, 5941).

A comparison of the total gallonage figures on Respondent's Exhibit 101 with the salary figures on Commission's Exhibit 116 discloses that the percentage of effort of respondent's employees devoted to tank-wagon reseller business is not nearly as large as the percentage of total gallonage accounted for by that branch of the business (Compare Resp. Ex. 101 and Com. Ex. 116). If the gallonage factor had been used in determining respondent's costs of sale and delivery of naphtha and gasoline to its tank-wagon reseller and its jobber customers, there would have been no differential (Boatwright, R. 8003).

Advertising—Other Costs. The largest single item of expense appearing on Respondent's Exhibit 101 is the expense listed opposite Account 075,—"Advertising—Other Costs", in the amount of $211,374.32. Of this amount $3,322.17 is charged to the Direct Shipment channels of which $3,275.24 is charged to the jobber channel, and the balance of $208,052.15 is distributed among the three company bulk plant channels. The $3,275.24 charged to 469 the jobber channel represents point of sale advertising at the four jobber stations and is concededly properly charged to the jobber channel. The balance of the $208,052.15, with the exception of $43.93 charged to the Other Products Direct Shipment channel, is distributed among the three bulk plant channels as follows: $126,225.04 to the Tank-Wagon Reseller channel; $57,949.09 to the Consumer channel and $12,331.58 to the Other Method channel (Resp. Ex. 101).

An explanation of the allocation of advertising costs to the different channels is set out in Respondent's Exhibit 100, pp. 24-38. The major portion of the expense in this account was commonly known as Consumer Advertising, such as newspapers and billboard advertising (See Com. Ex. 84, listing advertising expense for 1937; R. 6221-2). Counsel for the Commission requested an itemization of the expense entered in this account for 1940 (Com. Ex. 104-C) but the request was overlooked and not complied with. The advertising charges were mainly for newspaper and billboard advertising (Com. Ex. 121 A-G) and did not contain the name of any service station, the products therein advertised being sold at all Standard Oil stations including those operated by the jobbers and those supplied by the jobbers.

Witness Warmack, Commission's accountant, testified that consumer advertising costs cannot properly be separated between gasoline sold through jobber supplied and jobber operated retail stations and gasoline sold through other retail stations supplied by respondent except on a gallonage basis, which, if used, would afford no cost differential (R. 6221-2, 6810).

Annuities and Retirement Plan Expense. Account No. 540 on Respondent's Exhibit 101, headed "Annuities and Retirement Plan Expense" for the year 1940 is in the sum of $157,014.35, of which $52,651.27 is charged to tank-wagon reseller business and $533.67 to jobber gasoline business.

Of the total, $157,014.27, the sum of $26,226.38 represents contributions made by respondent to match contributions made by employees to the Retirement Plan (R. 6379) described in Commission's Exhibit 108; $108,508.83 represents the portion of respondent's contribution to a trust fund for the retirement of employees, covering services of such employees prior to July 1, 1939 (R. 6380), also described in Commission's Exhibit 108; the remaining portion, $22,279.06, represents annuities paid by respondent to employees who had retired prior to January 1, 1939 (R. 6380). Mr. Warmack, Commission's accountant, testified that the item of $25,226.38 should be considered as additional compensation to the employees and treated as a current
470 marketing expense of the company during the year
1940 (R. 6380); and Witness Warmack (R. 6380-88), Lundvall, Commission's Chief Accountant (R. 7815-18) and Depue, Commission's Supervisor of Investigations (R. 7869-70) testified that the item of $108,508.83 assigned to the Detroit field as a portion of the trust fund contributed by the company for the retirement of employees in the Detroit field to cover services of such employees prior to January 1, 1939, was not a current marketing expense; and that the item of $22,279.06, representing annuities paid to retired employees in the Detroit field for the year 1940, was not in the nature of a marketing expense.

Conclusions of Fact:

1. The average costs of sale and delivery of gasoline by tank-wagon to respondent's retail reseller customers in the entire Detroit Division, as depicted in Respondent's Exhibit 33-A, of 1.72¢ per gallon, for the year 1940, and 1.81¢ per gallon for the year 1939, are not shown by the evidence to have been the average costs of sale and delivery by tank-wagon to respondent's retail reseller customers in the Detroit Metropolitan area in Michigan in either year, 1939 or 1940. The costs of sale and delivery of gasoline by tank-car to respondent's jobber customers in the Kansas-Oklahoma field, as depicted in Respondent's Exhibit 33-A of .25¢ per gallon for either the years 1939 or 1940, are not shown by the evidence to have been the average costs of sale and delivery by tank-car to the four dealers or jobbers in the Detroit Metropolitan area in Michigan in either the year 1939, or 1940.

2. The average costs of sale and delivery of gasoline by tank-wagon to respondent's retail reseller customers in the Detroit Division in Michigan in the year 1940 as depicted in Respondent's Exhibit 101 of 1.67¢ per gallon are not shown by the evidence to have been the average costs of sale and delivery by tank-wagon to respondent's retail reseller customers in the Detroit Metropolitan area in Michigan in 1940.

3. The record affirmatively shows that certain items of cost (specifically hereinbefore referred to in the review of "The Evidence") appearing in Respondent's Exhibit 101, are charged in their entirety to the tank-wagon reseller channel, whereas a part thereof (specifically hereinbefore referred to in the review of "The Evidence") should have been charged to the tank-car, or jobber channel, with the result that costs in the tank-wagon reseller channel are over-weighted and those in the tank-car, or jobber channel are under-weighted; further that items of cost properly chargeable to the costs of sale and delivery to the jobbers (specifically hereinbefore referred to in the review of "The Evidence") were omitted, and that correction of the account in the items referred to would reduce the differential to less than 1.¢ per gallon.

471 Conclusions of Law:

1. The difference in the average costs of sale and delivery of gasoline by tank-wagon to respondent's retail reseller customers in the Detroit Division, and the average costs of sale and delivery of gasoline by tank-car to respondent's jobber customers in the Kansas-Oklahoma field, as depicted in Respondent's Exhibit 33-A, did not represent the difference in costs of sale and delivery to the two classes of customers in the Detroit Metropolitan area in Michigan, and provided no factual basis for determining such costs.

2. The average costs of sale and delivery of gasoline by tank-wagon to respondent's tank-wagon reseller customers in the Detroit Division, as depicted in Respondent's Exhibit 101, provided no factual basis for determining the average of like costs in the Detroit Metropolitan area in Michigan.

3. The over-weighting of the sale and delivery costs in the tank-wagon reseller channel, and the under-weighting of the costs in the tank-car or jobber channel, in Respondent's Exhibit 101, and the omission of items of cost properly chargeable to the costs of sale and delivery to the four dealers of jobbers, precludes the use of the per gallonage costs therein shown for each cost channel as a basis for determining the per gallonage difference in costs of sale and delivery through the two channels shown in Respondent's Exhibit 101, and claimed by respondent.

4. Respondent has failed to establish its claim that the differentials it granted Ned's Auto Supply Company, since March 7, 1938, and the Wayne Oil Company, Citrin-Kolb Oil Company and Stikeman Oil Company, since June 19, 1936, of 1.¢ per gallon on Stanolind, 1.5¢ per gallon on Red Crown, and 1.75¢ per gallon on Solite with Ethyl gasolines, under the prices respondent charged its tank-wagon reseller customers in the Detroit Metropolitan area in Michigan for gasolines of like grade and quality, were not in excess of the true differences in the costs of sale and delivery of the three brands of gasoline resulting from differing methods or quantities in which the gasolines were sold and delivered to respondent's jobber (four dealer) or tank-car customers, and to its tank-wagon retail reseller customers in said area.

5. The answer to the third question is "No".

472

VIII.

Fourth Question.

Was the .5¢ per gallon differential respondent granted Ned's Auto Supply Company from September 1, 1936, to March 1, 1938, on tank-wagon deliveries under the prices it charged its other reseller tank-wagon customers in the Detroit Metropolitan area in Michigan for gasoline of like grade and quality granted in good faith to meet an equally low price of a competitor? If so, did it constitute price discrimination, the effect of which was, is, or may be, substantially to lessen competition, or tend to injure, destroy, or prevent competition between Ned's Auto Supply Company's retail gasoline service stations and those operated by customers of respondent?

This question requires two separate findings, the first part being here considered.

The related evidence:

The business in which Ned's Auto Supply Company is now engaged was established by Ned Gershenson in 1918 (R. 213, 3073). On his death it passed to his widow and children, and on the widow's death to their five children (R. 204-5), who continued its operation as co-partners under the trade name, Ned's Auto Supply Company, until September 1, 1938, when it was incorporated under the trade name theretofore in use and the five children thereafter remained the exclusive owners. From the inception of the business the Gershenson family had continuously purchased gasoline from respondent and resold it through retail gasoline stations owned and operated by them (R. 37-8, 3075-9). By 1936 Ned's had become respondent's most valuable tank-wagon customer, its gasoline purchases that year aggregating approximately 2,400,000 gallons (R. 3081-3). Prior to September 1, 1936, all deliveries of gasoline to Ned's were under respondent's standard form contract, Form 461, supra (Sec. IV-"e") which provided for tank-wagon deliveries of "not less than 50 gallons at any one time" to be paid for at "the company's dealer price" (posted price) in "cash at the time of delivery" (Com. Ex. 2).

From 1930 to 1936 Ned's had received offers from responsible companies handling branded gasolines comparable in quality to those furnished by respondent at substantially lower prices—one cent per gallon less by tank-wagon 473 (R. 3089, 3091), and from two (R. 3100) to five cents per gallon (R. 3094-6) less by tank-car than the price respondent was charging Ned's. Some of these offers were communicated to respondent's District Manager with the request that Ned's be accorded a lower price (R. 3094, 3097) but respondent's District Manager refused to allow an increased margin (R. 3099). Each time Ned's requested respondent to accord it a lower price respondent's District Manager would stress the long private and public association of Ned's with respondent and its branded gasolines which had acquired wide public acceptance, and the volume of business developed; that a change to another competitive brand would result in loss of customers and decrease in volume, which would off-set in profits the difference in the cost of the gasoline. Charles H. Gershenson, President of Ned's Company, testified that he appreciated the force of the argument advanced by respondent's District Manager and that in addition thereto his company did not want to change its supplier of gasoline for sentimental reasons—his father started with the Standard Oil Company; his father had passed away, and the family entertained "a superstition that the last thing we wanted to do was change from the Standard Oil Company" (R. 3098-9).

As a final effort to obtain a lower price from respondent, Ned's Company by letter dated August 27, 1936 (Resp. Ex. 45) advised respondent's District Manager that it had received an offer from a competitive major oil company to supply it gasoline at a lower price than it was then receiving from respondent and it was then its intention to accept the offer. This was followed by a conference between Charles H. Gershenson, President of Ned's and P. A. Raupagh, respondent's District Manager, at which Gershenson informed Raupagh that the letter dated August 27 was an ultimatum and that Ned's Company had definitely decided to accept the lower offer from the competing company unless it "got a better deal from the Standard Oil Company" (R. 3105-6). Gershenson further insisted that unless Raupagh was prepared to give Ned's a better price, he be accorded the privilege of going to Chicago and conferring with the Standard Oil officials before the final break occurred (R. 3106).

As a result of this interview it was arranged that Gershenson should go to Chicago and confer with Mr. Lewis

(an official of the respondent company) at its general offices in that city (R. 3106). A few days later Gershenson went to Chicago and conferred with Mr. Lewis. At this in-
474 terview Gershenson told Lewis that if respondent did not grant Ned's a better price, either a better tank-wagon price or a tank-car price, that Ned's was going to stop doing business with Standard (R. 3107). At that interview Gershenson requested a reduction of one cent a gallon off the tank-wagon price which he claimed was the price available from other suppliers of gasoline (R. 3107). The day following Gershenson's return home from Chicago he was advised by Raupagh that Ned's would be accorded a one-half cent margin off the tank-wagon price.

Raupagh testified that based upon Gershenson's representations he came to the definite conclusion that respondent would lose Ned's business unless respondent met, at least part way, the offers of competitors (R. 3408-14).

The one-half cent per gallon differential was granted by oral agreement (R. 3108, 5072) which became effective about September 1, 1936, whereby respondent agreed to furnish Ned's Company its branded gasolines at

1. A price differential of one-half cent per gallon less than its posted tank-wagon price (R. 3108);
2. A monthly credit, settlement to be made when monthly bills were submitted, delivery to be made by tank-wagon (R. 4020, 4048); but in full or partial loads, whichever was most convenient to respondent (R. 3780, 4019-20, 4048).

It is clear from the evidence that the monthly credit extended Ned's Company was not given or intended as conferring upon that company any financial benefit, but was in the interest of respondent. Ned's Company was financially responsible—an exceptionally good credit risk (R. 4056-7)—and the credit given provided a more convenient and economical method of collection (R. 4020).

This verbal arrangement continued in full force and effect from September 1, 1936, to March 1, 1938, (R. 4852-3) when it was permanently discontinued (R. 2643, 3742-3, 3745-6, 3748). Six days later, and on March 7, 1938, respondent recognized Ned's Company as a jobber and the company commenced, and has ever since taken delivery by tank-car or transport truck (R. 4852-3; Resp. Ans. Pars. 13-D, f6).

475 Ned's was respondent's only tank-wagon customer allowed or afforded an opportunity to obtain a one-half cent per gallon differential below the tank-wagon

posted price and a monthly credit, all others being required to pay cash for the gasoline as and when delivered at the posted tank-wagon price (R. 52, 4048).

Conclusion of Fact:

The differential of .5c per gallon on Red Crown gasoline respondent granted Ned's Auto Supply Company on tank-wagon deliveries from September 1, 1936, to March 1, 1938, was made to meet an equally low or lower price of a competitor or competitors for branded gasolines of comparable grade and quality and to retain Ned's Company's business.

Conclusion of Law:

Unless the granting of the .5c per gallon differential to Ned's Auto Supply Company constituted price discrimination, the effect of which was, is, or may be substantially to lessen competition between Ned's Auto Supply Company's retail gasoline service stations and those operated by customers of respondent, its granting was lawful. The evidence relating to this question, to avoid repetition, is reviewed in connection with the effect of the granting of differentials to the four dealers, infra (Sec. XI), to which reference is here made.

IX.

Fifth Question.

Was the selection of the four dealers and their recognition by respondent as jobbers bona fide and not in restraint of trade?

The related evidence:

Long prior to the effective date (June 19, 1936) of the law under which this proceeding was instituted, the jobber system of distribution was widely employed in the oil industry, and the term "jobber" was generally understood to mean one who was engaged in the purchase and sale of petroleum products (and particularly with reference to gasoline), who had sufficient storage to take delivery in tank-car quantity and resold a substantial part to resellers and the remainder direct to the public through retail service stations operated by him (R. 1484-5, 1623-5).

As early as June 12, 1931, and while Section 2 of the Clayton Act (38 Stat. 730) was in effect, the Federal Trade Commission approved a National Code of Practice for Marketing Refined Petroleum Products wherein the 476 term "jobber" was defined as "One who carries a stock of petroleum products to sell to retail dealers or others for resale, but who may sell direct to consumers" (R. 1480-1). Respondent, as did some other suppliers of gasoline, adopted its own standard which required a greater showing of financial stability but dispensed with any showing as to the manner or method of resale (R. 40), its requirements being that the applicant (1) owned or leased its own exclusive bulk plant of sufficient capacity to take delivery in maximum tank-car quantity; (2) had facilities for distribution to its customers; (3) had an established business sufficient to insure purchase of from one to two million gallons per annum; and (4) that it had credit responsibility justifying the risk of delivery of large quantities of gasoline in a single month.

Respondent, like other producers of gasoline, does not police the activities of any of its jobber customers (R. 173). Its customers have no contracts for continuous supply but buy upon order at the then tank-car price. When any of them orders a tank-car or transport truck load of gasoline, they take absolute title to it upon delivery. The price which the jobbers fix for the resale of gasoline is a matter entirely within the control and discretion of the individual jobber (R. 173-5).

Three of the four dealers were recognized by respondent, and registered with the Gasoline Department of the State of Michigan as jobbers, prior to the effective date (June 19, 1936) of the law under which this proceeding was instituted—Citrin-Kolb Oil Company in 1929, Stikeman Oil Company in 1932, and the Wayne Oil Company in 1935, supra (Sec. IV-"f"). Each, at the time of recognition and at all times thereafter, possessed all the qualifications for classification as a jobber exacted by (1) the generally understood meaning in the oil industry of the term "jobber"; (2) the definition of the term "Approved by the Federal Trade Commission"; and (3) respondent's own standard, supra (Sec. IV-"f"). Following the enactment of the amendment to the Clayton Act under which this proceeding was instituted, their recognition as jobbers was continued without inquiry into the question of any possible infraction of the law (R. 8049).

The fourth dealer—Ned's Auto Supply Company—received recognition as a jobber nearly two years after the effective date of the law, at which time it conformed in all respects to respondent's requirements for recognition, but not with the requirements generally recognized in the oil industry and those of the National Code of Practice for Marketing Refined Petroleum Products in one respect,
477 namely, it resold almost exclusively (Resp. Ex. 53) through retail stations operated by it, supra (Sec. IV-"f"). For twenty years prior to its recognition by respondent as a jobber, Ned's had been one of respondent's tank-wagon customers, supra (Sec. IV-"f") and its recognition on or about March 1, 1938, by respondent as a jobber was a forced recognition rendered necessary in order to retain its business which had reached large volume, infra (Sec. X, Q. 6).

The uncontradicted opinion testimony of those familiar with the oil industry is that each of the four dealers were at the time of their recognition, ever since have been, and are now, under industry practice and contemplation, bona fide jobbers (R. 1722).

Conclusions of Fact.

1. The selection and recognition by respondent of the Citrin-Kolb Oil Company, the Stikeman Oil Company and the Wayne Oil Company as jobbers or wholesalers, made and given prior to the effective date of the statute under which this proceeding was instituted, and continued at all times since the statute has been in force, were and are in conformity with industry practice, were made, given and ever since continued in transactions between respondent and said three companies, believed by them at all times to be bona fide in all respects, and which was never questioned until this proceeding was instituted.

2. The recognition by respondent of Ned's Auto Supply Company as a jobber or wholesaler, was a forced recognition given to retain that company's business. Ned's Company at the time of recognition, and ever since, has possessed all qualifications required by respondent for recognition as a jobber and the recognition was given and has ever since been continued in transactions between the

parties, believed by them to be bona fide in all respects, and which was never questioned until this proceeding was instituted.

Conclusion of Law.

Unless the effect of the recognition by respondent of Ned's Auto Supply Company, at all times subsequent to March 7, 1938, and the Citrin-Kolb Oil Company, the Wayne Oil Company, and the Stikeman Oil Company, at all times subsequent to June 19, 1936, as jobbers, and the granting to each of them during said periods, as a result of said recognition, of jobber differentials of 1.c per gal-
lon on Stanolind; 1.5c per gallon on Red Crown; and
478 1.75c per gallon on Solite with Ethyl was, is, or may
be, substantially to lessen competition, or tend to injure, destroy, or prevent competition with said four dealers or with the customers of either respondent or said four dealers, their selection and recognition by respondent as jobbers were lawful. The answer to this question is dependent upon the answer to Question 7, and to avoid repetition, reference is here made to Section XI of this report.

X.

Sixth Question.

Were the differentials in price accorded the four dealers, recognized by respondent as jobbers, made in good faith to meet equally low prices of competitors, or the services or facilities furnished by competitors?

The related evidence:

Ned's Auto Supply Company: During the period this company received the .5c differential its gallonage increased from approximately 2,400,000 to approximately 4,800,000 gallons (R. 3082). It was not satisfied with the .5c differential it obtained September 1, 1936, supra (Sec. VIII) and under date of February 14, 1938, Charles Gershenson, President of Ned's Company, dictated a letter to the Standard Oil Company which was signed by his brother William (R. 3112) (Resp. Ex. 46), the body of which was as follows:

"For some time past, we have felt that our volume entitled us to tank car prices. Our ideas on the subject were given added impetus and confirmation when, as you remember, we were approached in August, 1936, by representatives of the Red Indian Oil Company with tank car prices, at truck delivery, and Shell Petroleum with a better deal; both with a view of changing to their respective brands. Because of our long association, we naturally advised you of the situation and the ensuing discussions resulted in our later agreement of August 27, 1936, and your promise to give consideration to our receiving tank car prices at an early date.

"Present plans for expansion, when consummated, will result in a substantial increase in our volume, and we feel that in view thereof, to expect us to continue on the present basis, involves an unreasonable sacrifice on our part.

479 "We, therefore, request that you give immediate consideration to the desirability of continuing as our gasoline supplier, but at tank car prices. Otherwise, we shall be compelled to re-open negotiations with other suppliers."

This letter was received by the respondent company and forwarded to its Detroit District Manager, Mr. Raupagh, which resulted in several conferences between Charles Gershenson and Raupagh (R. 3113). At these conferences Gershenson informed Raupagh that the available offer from the Red Indian Company quoted a price ⅜ of a cent lower on tank-car deliveries than respondent's price, and had an additional advantage in that it would be unnecessary for Ned's to have and maintain its own bulk plant (R. 3114-17); that the price quoted by the Shell Oil Company was .5c lower than respondent's tank-car price (R. 3120); and that the offer from the Texas Company (R. 3122-3) was 2.5c lower on the house brand and 3.25c lower on Ethyl gasoline (R. 3094). At their last conference held prior to March 7, 1938, (R. 3124), Gershenson stated that his letter dated February 14, 1938 was an ultimatum (R. 3113) and that unless respondent granted Ned's a tank-car price Ned's would accept one of the three offers (R. 3113).

Some time prior to March 7, 1938, Ned's acquired by lease a bulk plant (R. 3119) and entered into a contract with Benzol Stations, Inc., to haul the gasoline from its bulk plant to its six retail service stations at .45c per gallon (R. 3125).

On March 7, 1938, respondent acceded to Ned's demands and granted Ned's Company its regular tank-car differentials on its house and Ethyl brands (R. 3124), supra (Sec. IV-"i").

Respondent's Detroit District Manager, Mr. Raupagh, testified that, prior to March 1938, Ned's Company, through William and Charles Gershenson, informed him that unless respondent met, at least part-way, the competitive offers of the Shell, Red Indian and Texas Companies, which offers were of differentials as much as 2c per gallon, Ned's would quit purchasing from respondent and accept a competitive offer (R. 3419-21); that he, Raupagh, was convinced that if respondent did not meet, or approximate, such competitive offers, Ned's would be lost as a customer (R. 3421); that knowing the market, as he did, he was of the definite opinion that the threats made by Charles and William Gershenson were made in earnest and would be acted upon unless respondent placed Ned's on a competitive basis (R. 3422).

480 Wayne Oil Company: Respondent recognized this company as a jobber and accorded it tank-car prices in 1935, supra, (Sec. IV-"f").

For three or four years prior to 1940, the Aurora Gasoline Company solicited the gasoline business of this company a half dozen times (R. 1908). On December 10, 1940 (twelve days after the complaint issued), the Wayne Company received an offer from the Aurora Company to supply it by transport truck 80 octane gasoline at a price .5c per gallon less than respondent was charging for Red Crown (R. 1885; 3450). The Aurora Company is a local (Detroit) company operating refineries at Detroit and Elsie, Michigan (R. 1886), and in 1940 had a gallonage capacity of from forty to fifty million gallons of gasoline (R. 3450). It is not recognized as one of the first group of twelve major oil companies (R. 3251-2, 3255), but comes within the list of second major companies (R. 3274). Eighty octane gasoline is, however, recognized as comparable if not superior, to respondent's house brand gasoline, Red Crown (R. 1883).

On December 13, 1940 (fifteen days after the complaint issued), the Wayne Company received an offer from the National Refining Company (R. 1888) operating in a large part of the United States and in Canada (R. 1889-90), and which furnishes a considerable quantity of gasoline sold in the Detroit area (R. 1891), to supply its branded gasoline "White Rose" (R. 1905) which it represented as of better quality than Standard Red Crown (R. 1907) at a price more than .5 cent per gallon less than respondent was charging for Red Crown (R. 1892). For several months theretofore the National Refining Company had been attempting to get the business of Wayne Company (R. 1910).

Citrin-Kolb Oil Company. Respondent recognized this company as a jobber and accorded it tank-car prices in 1929 (R. 2083). supra. (Sec. IV-"f"). At that time other jobbers were receiving larger differentials from other suppliers (R. 2085) but the company continued to purchase gasoline from respondent thereafter even though its tank-car price differential was not as favorable as that of other supplying companies (R. 2086).

Offers received by the company from other suppliers were as follows:

From the Hickok Oil Company of Toledo, Ohio, to sell its "Hi-Speed" (a major company) gasoline at 6½ cents below the retail price, conditioned upon the formation
481 of a corporation in which the Hickok Oil Company was to receive 51 per cent of the stock (R. 2090-8, 3437-8).

Shortly thereafter from the Shell Oil Company to give Citrin-Kolb and the Middleton Oil Company (a second major company) an exclusive sales agency for all of Wayne County, Michigan, for its branded gasoline "Silver Flash" at a margin between .5c and .75c under the price respondent was charging (R. 2104-7). At the time, Middleton Oil Company was a jobber of Standard Oil Company gasoline in the Detroit area. The Citrin-Kolb Company communicated the Shell offer to Mr. Raupagh, respondent's Detroit manager, with the request that the differential then accorded it by respondent be increased, but Mr. Raupagh refused (R. 2110-12, 3439). The Middleton Oil Company accepted the Shell offer and ceased to be a jobber for the Standard Oil Company (R. 2108-9).

In 1936 from the Gulf Refining Company (a major company) offering to furnish its gasoline at the regular tank-car price, which was the same price Citrin-Kolb was paying respondent, but offered the following additional advantages—to allow Citrin-Kolb to use its bulk plant thereby eliminating the expense of operating their own bulk plants, and to furnish pumps and other station equipment, including repairs to pumps, painting the dealer stations, and equipment used in connection therewith, all without cost (R. 2118-23). The Gulf offer was presented to Mr. Raupagh, respondent's manager of the Detroit Division, with the request that he meet it, but Mr. Raupagh refused saying that it was impossible for respondent either to change the method of delivery so as to eliminate bulk plant expense, or to furnish, maintain and repair pumps and other station equipment (R. 2144, 34-9).

From the Texas Oil Company in 1936, to furnish its gasoline by tank-car delivery at .5¢ less than respondent was charging, and to also furnish advertising, paint and globes (R. 2126-32), a contract was drawn up and executed. Before Citrin-Kolb delivered the contract to the Texas Company it exhibited the contract to Raupagh, respondent's Detroit manager, so as to afford respondent an opportunity to meet its terms. Raupagh stated it was a good deal,
482 but the Standard wouldn't meet it. Raupagh pointed out that Citrin-Kolb had established its business with Standard Oil products and that a change to Texas would result in the loss of some business. The executed contract was never delivered by the Citrin-Kolb Company to the Texas Company (R. 2132-7, 3141-2).

December 10, 1940, from the Aurora Gasoline Company (a second major company) to furnish its gasoline in tank-car quantity at 1.5¢ per gallon less than the differential respondent allowed. This offer was submitted to Mr. Raupagh, respondent's District Manager, with a request that Standard meet it, which Raupagh declined (R. 3451-2). This offer was still under consideration by the Citrin-Kolb Company when the testimony was taken, not having been recalled or rejected (R. 2164-77).

Stikeman Oil Company: Respondent recognized this company as a jobber and accorded it tank-wagon prices in 1932, supra (Sec. IV-"f").

No representative of this company was called as a witness. Mr. Raupagh, respondent's District Manager, testified that Mr. Stikeman had discussed with him two attractive offers the company had received from competing companies, offering a greater margin than that accorded by the respondent company (R. 3450).

Mr. Raupagh further testified with reference to the general condition existing in the Detroit Metropolitan area in substance: That the jobber customer market is subject to intense competition and frequent attempts by Standard

Oil Company's competitors to proselyte accounts by offering more advantageous terms and service. All jobbers of respondent buy on a day to day basis and on identically the same terms (R. 3454). They have no contracts and the continuation of their patronage is subject to competition from day to day. Being under no obligation to buy, any one of them could quit tomorrow or the next minute (R. 3455). He was asked the following question and made the following answer:

"Q. Suppose that for any reason the Standard Oil Company ceased to sell to the four jobbers involved in this case on a tank-car basis; what is your judgment as to whether these four jobbers could purchase gasoline of comparable quality on equally good or better terms than they are now purchasing from the Standard Oil Company?

483 A. They could purchase from many other sources, immediately, a gasoline of comparable quality and at a better price than they are paying at the present time. By better price, I mean a lower price." (R. 3243-4).

Mr. Raupagh further testified that all of the many jobbers or distributors operating in the Detroit Metropolitan area and listed on Respondent's Exhibit 55-A and B, and 57-A and B are comparable in their operations to the operation of one or more of the four jobbers of respondent; and that all of them purchase their gasoline requirements substantially below the prevailing tank-wagon price, and, as a matter of fact, that many of them purchase even below the prevailing tank-car price. In addition many of them are not required to maintain their own bulk storage and their own trucks to receive the benefit of such lower prices. Standard Oil Company, he stated, is in competition with all the companies listed in both of said exhibits (R. 3373).

Conclusion of Fact:

The differentials on its branded gasolines respondent granted Ned's Auto Supply Company, at all times subsequent to March 7, 1938, and Stikeman Oil Company, Citrin-Kolb Oil Company and the Wayne Company, at all times subsequent to June 19, 1936, were granted to meet equally low prices offered by competitors on branded gasolines of comparable grade and quality.

Conclusion of Law:

Unless the differentials granted the four dealers, above-named, constitute price discrimination, the effect of which was, is or may be, substantially to lessen competition, or tend to injure, destroy, or prevent competition with said four dealers, or with the customers of either respondent or said four dealers, the granting of the differentials was lawful. The answer to this question is found in Section XI, to which reference is here made.

XI.

Seventh Question.

Do the differentials in price accorded the four jobbers constitute price discrimination, the effect of which is, or may be, substantially to lessen competition, or tend to injure, destroy, or prevent competition with said four dealers, or with the customers of either respondent or the said four dealers?

484 The review of the evidence relating to this question will include a review of the evidence relating to the last part of Question 4, supra (Sec. VIII) and the final answers to Questions 5, supra (Sec. IX), and 6, supra (Sec. X).

The injury to competition claimed to have resulted from the granting of the differentials relates to the resale of Red Crown gasoline purchased from respondent, by Ned's Auto Supply Company, following the granting of the .5¢ per gallon differential, through the retail service stations operated by it, at less than the prevailing retail price in competition with the retail service stations supplied by respondent and by three of the four dealers at the posted tank-wagon price; to the sale by one of the dealers of said gasoline to service stations at less than the posted tank-wagon price, and to the resale of said gasoline by the service stations receiving the differential, at retail at less than the prevailing retail price; and to the resale through retail service stations operated by two of the four dealers at less than the prevailing retail price, in competition with more than 400 retail service station customers of respondent, and of three of the four dealers, supra (Sec. IV-"f"), purchasing gasoline at the posted tank-wagon price.

The Related Evidence:

Solite with Ethyl and Stanolind gasoline: There is but slight evidence in the record relating to the underselling by any of the four dealers at either wholesale or at retail, or by their retail reseller customers, of Solite with Ethyl, or Stanolind gasolines; the volume of Solite with Ethyl being approximately 7 per cent and of Stanolind approximately 3 per cent of the total volume of gasoline sold by respondent in the Detroit Metropolitan area (R. 108). Substantially all the evidence relates to the underselling of Red Crown and other competitive house brand gasolines, Red Crown representing approximately 90 per cent of the gasoline marketed by respondent in this area.

1. Kinds of gasoline marketed and competitive situation. In the Detroit Metropolitan area, as elsewhere, there are two distinct kinds of gasoline marketed, (1) gasoline made by the major companies, nationally known, and sold under their separate brands, and (2) gasoline made by secondary companies, some of which is sold under local brands, and which is commonly known as off-brand gasolines (R. 402). The gasolines sold by the four dealers were branded gasolines made by respondent.

(a) Major Oil Companies. Nine oil companies, conceded by all witnesses to be major oil companies (R. 403, 519, 3251-2), of which the respondent company is the largest, market their naphtha and gasoline products in the Detroit Metropolitan area. These nine companies are as 485 follows: Standard Oil Company (Indiana), Sun, Shell, Sinclair, Socony-Vacuum, Texas, Gulf, City Service and Pure Oil (Hi-Speed).

(b) Doubtful Major Companies. Three additional companies were listed by respondent's Detroit District Manager as major companies (R. 3251-2). As they were not listed as major companies by other witnesses (R. 403, 519) they are herein clased as doubtful major companies. These three are: Mid-Continent Petroleum, Ohio Oil Company, and Standard Oil Company of Ohio.

Six of the major companies—Texas (R. 3556-7); Gulf (R. 3558); Sinclair (R. 3560); Shell (R. 3563); Pure Oil (Hi-Speed) (R. 3346); and respondent—sell branded gasolines to retail outlets at tank-wagon prices, and to buyers in tank-car quantity and at tank-car prices who resell to the public, as does Ned's and are in direct competition with the retail reseller stations selling branded gasolines who take delivery by tank-wagon and pay the posted tank-wagon price which is usually 1.5¢ or more above the tank-car price (R. 389).

Eighty-seven per cent of the total volume of gasoline marketed in the Detroit Metropolitan area is sold by major oil companies under their own brands (R. 417). The house brands of all are of substantially the same quality in the public mind (R. 400). The posted tank-wagon price of the house brands of all is generally, but not always the same (R. 52-3). The products of all the other major companies are in immediate and direct competition with those of respondent (R. 3339).

(c) Secondary Oil Companies. At least ten other oil companies, conceded by all witnesses as not coming within the major group (R. 3151-2; 403; 519), and generally classified as second major companies, operate in the Detroit Metropolitan area. These ten companies are as follows: Charles E. Austin, Inc., Puritan Stations, Sunny Service Oil Company, Speedway Petroleum, Globe, Duro, Keystone, Aurora, Leonard, and Roosevelt (R. 3251-2).

The volume of gasoline of this group, together with the third grade gasoline sold by all the major and doubtful major companies, in the Detroit Metropolitan area is between 12 and 13 per cent of all gasoline marketed in that area (R. 405; 421).

The sale of gasoline in the Detroit Metropolitan area
by the doubtful major and by the second major group to
tank-car customers at or below the prevailing tank-car
price (R. 3374) who resell a part or all direct to the
486 public, is a common practice (R. 3346-47, 3350-51, 3353,
3354, 3355, 3356, 3358, 3360-1, 3369; Resp. Ex. 38-A
thru E) and the tank-car customers are almost always price
cutters (R. 3296).

The gasoline products of the secondary group are known as off-brand gasolines; some of it is sold under local brands (R. 402). Off brand gasoline is a term denoting a gasoline other than that sold under the brand name of a major oil company (R. 402) and generally sells at a lower price than major brands in the Detroit Metropolitan area (R. 519), at times as much as 6¢ per gallon (R. 3296). Major brands have a better public acceptance (R. 4520). While Mr. Raupagh, respondent's Detroit District Manager, testified that each of the non-brand companies was in competition with the respondent company (R. 3374), your examiner assumes that he meant, as the evidence clearly indicates, that under normal conditions and when the price differential between gasolines of the major and non-major companies was not more than 2¢ per gallon, there was but little or no competition (R. 404) but that a competitive situation arose when the normal difference in price between the branded and non-branded gasolines rose above 2¢ per gallon, grew more intense as the spread increased, and practically disappeared when the normal difference in price was restored.

(d) Prevailing tank-car dealer price and retail price for branded gasolines. At and prior to February, 1937, the normal posted tank-wagon price paid by the retail service stations for house brand gasolines of the major companies was 9.6c per gallon and the prevailing retail price posted at the service stations was 13.6c per gallon, which gave the station operators a margin of profit of .4c per gallon exclusive of all taxes. The tank-car differential was usually 1.5c below the tank-wagon price, infra (See table this Section).

2. What the Four Dealers did:

(a) Stikeman Company. There is no evidence connecting or tending to connect the Stikeman Oil Company with the sale at any time of gasoline either to service stations or at retail through its own stations at prices below the posted tank-wagon price and the prevailing retail price. There is no testimony in the record as to the prices charged resellers, or the prices at which the Stikeman Company sold at retail through the few stations it temporarily operated prior to February 15, 1938, since which time it has sold strictly at wholesale, supra (Section IV-"f").

487 (b) Wayne Oil Company. There is testimony that this company has never sold gasoline to resellers at a price lower than the posted tank-wagon price at the time of sale (R. 1859, 1894-5); and no testimony to the contrary; and there is no evidence that this company sold any gasoline at retail through stations temporarily operated by it, supra (Section IV-"f") at less than the prevailing retail price.

(c) Citrin-Kolb Oil Company. This company annually sold at retail from 6.5 per cent to 29.4 per cent of the gasoline purchased from respondent through gasoline stations operated by it, during the years 1936-1940 (Resp. Ex. 53). There is conclusive evidence that the Citrin-Kolb Oil Company in 1938 or 1939 gave discount cards to purchasers of gasoline at one of the stations it temporarily operated, supra (Section IV-"f"), entitling the holder to discount of 2 cents a gallon on Standard Red Crown and Ethyl gasoline (R. 312, Comm. Ex. 34). These cards were given to anyone and distributed in parked automobiles for a period of about three weeks (R. 314). Two stations supplied by Citrin-Kolb also issued like discount cards to their customers during 1938 or 1939 (R. 316, 317; Comm. Exs. 35, 36).

There is also conclusive evidence that this company sold to one customer (Langer & Cohen) from January 1, 1938 to December 31, 1940, a million gallons of gasoline per annum at 1 cent per gallon less than the posted tank-wagon price, and during all or the greater portion of that time made delivery to five retail stations operated by the purchaser, and made "money" hauling the gasoline at .5c per gallon (R. 3218-19; Comm. Ex. 33-A). To another retail service station during the years 1938, 1939 and 1940 it gave a discount of ½c per gallon (Comm. Ex. 33-A; R. 302-3); and to another retail service station the rent was waived for the months of August, September and October, 1939 (R. 302-3; Comm. Ex. 33-B) for the reason that a station operating immediately opposite and across the street cut its price and the rent was waived during the pendency of a proceeding instituted by the service station owner, under a state law, to prevent his competitor from selling at cut-rate prices (Comm. Ex. 33-B).

(d) Ned's Auto Supply Company. The operations of this company were and are very different from the operations of the Stikeman, Citrin-Kolb and Wayne companies in that two of these companies—Citrin-Kolb and Wayne—sell the bulk of their gasoline at wholesale and the other—Stikeman—entirely at wholesale, to retail reseller service stations, supra (Section IV-"f"); whereas Ned's Com-
488 pany sells none of its gasoline to retail reseller stations but markets substantially all direct to the public, supra (Section IV-"f").

Next to Citrin-Kolb, Ned's is respondent's largest tank-car customer, purchasing in excess of 4,000,000 gallons per annum (Resp. Ex. 54), substantially all of which it sells through six retail service stations (owned and operated by it) strategically located throughout the Detroit Metropolitan area (for location, see R. 213-4, and map, Resp. Ex. 76). Its retail gasoline stations are operated in connection with a mercantile business confined largely to the sale at retail of mechanical household appliances, sporting goods, and automobile accessories conducted at each of the six locations (R. 3080).

That Ned's Company, following the granting to it by respondent of the .5c differential, on September 1, 1936, reduced its price on Red Crown gasoline to the public, at its retail stations, below the prevailing retail market price, and following the granting of the 1.5c differential made a further reduction, is conclusively shown by the record.

The following table shows respondent's posted tank-wagon price, its jobber tank-car price, the prevailing retail service station price, and Ned's posted price, for Red Crown gasoline, on each of the various dates from 1937-1940, inclusive. This table is compiled from Commission's Exhibits 3 and 22, and testimony at pages 240-42. Prices shown are cents per gallon exclusive of all taxes. Taxes amounting to 4.4c per gallon (R. 65-7) are deducted from Ned's prices which include taxes of approximately that amount.

489

Date	Dealer Tank-wagon Price	Jobber Tank-car Price	Prevailing Retail Serv. Sta. Price	Ned's Posted Price
Feb. 1, 1937	9.6¢	8.1¢	13.6¢	11.6¢
Aug. 1937	9.9	8.4	14.1	12.1
Jan. 1938	9.6	8.1	14.1	12.1
April 1938	9.8	8.3	14.3	12.1
June 1, 1938	9.8	8.3	13.8	12.3
July 1, 1938	9.8	8.3	12.3	12.3
Aug. 1938	8.8	7.3	12.3	10.9
Oct. 1938	8.8	7.3	12.1	10.6
Nov. 29, 1938	8.8	7.3	12.1	9.9
Jan. 1939	7.6	6.35	10.0	9.9
March 1939	7.6	6.35	10.7	9.9
May 1939	7.6	6.1	10.7	9.9
July 1939	8.1	6.6	11.4	11.4
Nov. 1, 1939	7.4	6.15	9.3	9.1
November 15, 1939	6.4	5.4	9.3	8.1
Dec. 1939	8.1	6.6	11.4	11.3
July 1940	8.1	6.6	11.4	11.3

(Federal Tax increased from 1¢ to 1½¢ per gallon July 1, 1940.)

During the periods in late 1939 and in 1940 when Ned's posted price was approximately the same as the prevailing retail price, Ned's gave various "under cover" discounts and premiums. Ned's has from time to time given "commercial discounts" varying from 1¢ to 2¢ per gallon to so-called commercial customers. These discounts were off the posted price. The classification as to who was regarded a commercial customer varied from time to time depending upon the competitive situation. Ned's definition of a commercial buyer was very broad at times (R. 254-57). People getting commercial discounts at Ned's did not have to have an identification card (R. 260).

During August to November 1939 Ned's issued trading stamps (Comm. Ex. 25). Every purchaser of gasoline was given one of these stamps (2¢ face value) for every gallon of gasoline purchased, which were redeemable in merchandise at Ned's stores. These stamps were later redeemable in gasoline (R. 262). Trading stamp envelopes served to identify the holder as a person buying at a commercial discount (R. 266). This was off the posted price.

Premiums were given by Ned's to all customers at the opening of a new store or on an anniversary (R. 276).

490 It has been Ned's practice for several years to give a newspaper to every customer (R. 277).

During 1938, 1939 and 1940 Ned's gave a 2-ounce bottle of Pyroil to gasoline buyers. The Pyroil was put in the gasoline tank free. Ned's bought the Pyroil in barrel lots (R. 279-81, 345).

Receipts were given in 1940 for gasoline purchased at Ned's with a notation stamped on the back "sold for commercial use." Such receipts were given on purchases of 6 gallons of gasoline and when presented entitled the holder to a "commercial discount" of 2¢ per gallon (R. 285). This was off the posted price.

Price cutting at Ned's stations has been almost continuous. This has been true over a long period. "If Ned's stopped one scheme they started another" (R. 707, 748). Most retail price cutting in major brand gasoline in Detroit over a period of years has been started by Ned's (R. 729, 722, 476, 480, 483). See also corroborative testimony of five salesmen for Sun Oil Company (R. 342-62; 363-85; 441-51; 452-61; 462-89) and ten service station operators (R. 543-59; 560-81; 583-623; 624-36; 651-68; 673-723; 728-49; 778-99; 947-58; 859-77).

Ned's Company claims price cutting was necessary to meet competition. The President of Ned's Company testified that before it went on a tank-car basis in 1938 it sold gasoline to commercial customers on a commercial discount basis (R. 3152), and that after it went on a tank-car basis it offered no greater concessions to the public (R. 3154); that commercial discounts were available at other stations when Ned's first went into business, and Ned's merely met that competition (R. 3152).

With reference to the competitive situation surrounding each of the company's six retail stations, its President testified in substance as follows: that in competition with each of the six stations there were, in 1938 and 1939, stations selling off-brand gasoline at from 4 to 5½ cents below the prevailing retail price of the branded gasolines of the major companies, and there were also stations selling branded gasolines of the major companies (all purchasers in tank-car quantities) at from 1.5 cents to 2.6 cents below the prevailing retail branded gasoline price (R. 3152-491 3193). The witness named the competitive stations, gave their locations, and the prices at which he testified they were selling.

This witness further testified that Ned's Company had never been able to meet the prices of its competitors (R. 3183); that at the present time (1941) Ned's Company allowed no price concession to the public from the sale of gasoline except commercial discounts for commercial vehicles (R. 3193), and it has allowed no other concessions since the gas war in 1938 and 1939 (R. 3193).

3. Competitive Sale Inducements:

Volume of gasoline sold through service stations dependent upon automobile consumption. The volume of gasoline business in Detroit through retail gasoline stations depends almost entirely upon the number of automobiles in use. The volume of this retail gasoline business is more or less constant, such fluctuations as occur being chiefly due to a variation in the number of cars in use from year to year.

Principal factors that attract customers. The principal factors that attract automobile owners to a service station to purchase gasoline are the elements that go to make up public acceptance, and include advertising, the personality of the operator of the station, the type of service given, the appearance of the station, and confidence in the quality of the gasoline that the dealer is selling. On the basis of comparable quality, price is a very important factor.

Price is a potent factor in inducing purchase. Price is the most potent factor in gaining and regaining customers at a service station (R. 423). A lower price at one service station than at another is a very important factor in the purchasing public's mind. A difference in price of 2¢ per gallon between two stations selling major brands of gasoline would be very important and very potent in influencing the flow of business. It is not as potent in the case of non-major and third-grade brands as it is between major brands (pp. 415-16).

The buying public became very price conscious during the years prior to 1941. A general fluctuation in the price of gasoline, below 2¢ per gallon either way, has little, if any, effect upon public demand; but a 2¢ a gallon differential in price as between two stations selling gasoline of comparable quality has a tremendous influence upon purchasers (R. 401-2).

Competition intense. Detroit is a highly competitive market as far as the oil industry is concerned (R. 3255).

492 4. Underselling culminates in price war and its effect upon competition:

(a) Cause of price war. In the latter part of 1936 and early in 1937 five tank-car customers of the major oil companies operating in the Detroit Metropolitan area—Ned's Auto Supply Company, supplied by respondent; Langers, supplied by the Texas Company (R. 749); Brights, supplied by the Sinclair Company (R. 3560-1); Hickeys, supplied by the Shell Company (R. 3563, 512-14); and Firestone Auto Supply and Service Stores, supplied by the Gulf Oil Company (R. 3357; Comm. Exs. 29, 30)—and some smaller customers, were selling through their retail stations house brand gasolines of major companies below the then prevailing retail market price (R. 512-14; Comm. Exs. 29, 30). Of these five Ned's was the only Standard Oil station. The underselling by these five stations continued during 1937 and 1938 (R. 512-14; Com. Exs. 29, 30). Price cutting by other stations followed and increased progressively throughout the entire area during 1937, 1938 and into January 1939 (R. 515-17), when it subsided. Later in 1939 price cutting by retailers evidently was resumed for it extended to the major oil companies. Commencing in August 1938 the respondent company (presumably with others) reduced its price to its tank-wagon customers and gave further reductions in January, May and November 1939 (Comm. Ex. 3-A). On August 27, 1939, after a study of the competitive situation throughout the Detroit Metropolitan area, it was established to the satisfaction of the officials of the Sun Oil Company that their dealers were being forced to sell at a point which did not allow them a 2¢ gross profit, which, in the opinion of the company, was necessary to enable them to survive, and in response to an appeal from its retail customers it allowed them a 2¢ differential below their selling price. This was granted to all retail purchasers of Sun gasoline (R. 456). This move on the part of the Sun Oil Company evidently changed the course of the major companies, for within six weeks thereafter and on November 18, 1939, the tank-wagon prices of the Sun and of the respondent companies, on their house brand gasolines (and presumably those of the other major companies) were brought back to substantially normal (R. 406; Comm. Ex. 3-A), and open price cutting among the retail resellers of branded gasoline practically ceased.

(b) Effect of underselling by Ned's Auto Supply Company and the Citrin-Kolb Company on service stations supplied by respondent and those supplied by two of the four tank-car dealers purchasing from respondent. The
record evidence conclusively establishes that the effect
493 of the underselling by Ned's and by the Citrin-Kolb
Company was to divert trade from retail service stations supplied by respondent and by two—Stikeman and Wayne—of the tank-car customers supplied by respondent, to those retail stations operated by Ned's and Citrin-Kolb, and those supplied by the latter, until those stations from which trade had been diverted were forced to meet the cut-rate prices which resulted in increasing their volume but not their profits.

Fifteen retail station operators were called by counsel for the Commission and testified. Eight of them purchased direct from the respondent company (R. 544-60; 560-81; 637-50; 651-68; 750-63; 765-78; 779-99; 878-89); three from the Wayne Oil Company (one of the four dealers) (R. 583-622; 847-59; 859-77); one from the Stikeman Oil Company (one of the four dealers) (R. 624-36); one from the Highland Oil Company (R. 673-723), a tank-car purchaser of

Hi-Speed gasoline (R. 3545); one from the Wilson Company (R. 724-28), a tank-car purchaser of Hi-Speed gasoline (R. 3545); and one from the Socony-Vacuum Company (R. 729-49). Twelve of these witnesse testified that they lost customers, some many customers, who told them that they were buying their gasoline at Ned's because Ned's was giving them a discount of 2¢ per gallon (R. 548-52; 566; 588-92; 644-5; 683-5; 725-6; 743-4; 781-2; 783-4; 854-6; 866-8; 882-3):

Four of the fifteen witnesses testified that they lost customers who told them they were buying their gasoline at Citrin-Kolb stations, (stations operated and stations supplied by Citrin-Kolb) where they were getting it for 2¢ less per gallon (R. ~~683-5; 755~~; 772; 781-2).

5. Differentials Were in Excess of Costs of Sale and Delivery. The Citrin-Kolb Oil Company maintains two bulk plants and has purchased all of its gasoline from respondent since 1936 (R. 298). It maintains its own trucks. It has, since 1937, old a million gallons of Red Crown gasoline annually to Langer and Cohen, making delivery by tank-wagon at 1.¢ per gallon below respondent's posted tank-wagon price. Its margin of profit on sales to this customer is .5¢ per gallon, out of which it pays all cost of sale and of hauling the gasoline from its bulk plants to the five Langer & Cohen stations, and makes money (R. 306, 3219).

Prior to March 1938 Ned's purchased gasoline from respondent by tank-wagon delivery, the gasoline being delivered at Ned's stations in respondent's tank trucks
494 (wagons) at a price ½¢ per gallon below the tank-wagon
price charged other retail stations. Ned's requested respondent that it be placed on a tank-car basis because it felt that by buying at tank-car prices it could, with its large volume, operate a bulk plant and make its own deliveries and still make an additional profit (R. 220-22). During March and April 1938, Ned's employed Benzol Stations, Inc., to transport their gasoline from their bulk plant to their stations for .45¢ per gallon (R. 903). Thereafter Ned's acquired its own trucks and did its own hauling (R. 229).

The cost to the Sun Oil Company of delivering gasoline from its bulk plants to its service stations in the Detroit area including the cost of operating the bulk plants, is less than ½¢ a gallon. This includes all costs of operating the bulk plant, including ordinary evaporation and spillage losses, labor, operation of the warehouse, personnel, cost of truck operations, the accounting going along with the operation and a cost element for the amount of capital invested in the plant (R. 437).

If a retailer who has been getting delivery by tank-wagon changes over to tank-car delivery, his natural objective is to make more profit or to gain more personal advantage. The natural assumption is that the tank-car buyer who sells at retail would not be purchasing in tank-car quantities unless there was more profit in that than in buying by tank-wagon. Otherwise, there would be no reason for his going to the expense of maintaining bulk storage and making his own deliveries (R. 1834-35).

Note: Reference to the claimed costs of sale and delivery by Citrin-Kolb (Resp. Exs. 7 thru 17, R. 1330-70, 1334-66) is omitted for the reasons hereinbefore stated, supra (Sec. VII, sub-par. headed "Costs of sale and delivery incurred by Citrin-Kolb").

6. Effects of Differentials, When Utilized, to Increase Trade Volume.

(a) Ned's Company's gasoline volume during years 1936-1940. In 1936 Ned's had four retail stations, and its gasoline volume was 2,401,000 gallons (Resp. Ex. 53). September 1, 1936, Ned's Company was granted a differential of .5¢ per gallon. In 1937 it opened two additional service stations (R. 213-15), and that year, and during the price war, its gasoline volume increased to 4,440,500 gallons (Resp. Ex. 53). March 7, 1938, respondent extended to Ned's Company its customary tank-car differential of 1.5¢ per gallon. In 1938 the gasoline war had reached its peak, a general business depression existed, causing a demoralized retail situation (R. 3262), but that year
495 Ned's gasoline volume increased to 4,880,600 gallons
(Resp. Ex. 53). In 1939, when Ned's openly ceased selling below the prevailing posted retail price, its gallonage decreased to 4,336,308 and in 1940 it further decreased to 4,320,672 gallons (Resp. Ex. 54).

(b) Citrin-Kolb Company's gasoline volume during years 1936-1940. This company was recognized by respondent as a jobber in 1930, and thereafter purchased and took delivery by tank-car and received the regular tank-car differential, supra (Sec. IV-"f"). In 1936 the gasoline volume of the Citrin-Kolb Company was 2,091,024 (Resp. Ex. 53). In 1937 and during the gasoline war, it rose to 5,501,000 gallons (Resp. Ex. 53). In 1938 it sold gasoline both at wholesale and at retail below the prevailing prices, and notwithstanding the fact that the gasoline war was at its height and a general business depression existed, it increased its gasoline volume to 5,959,000 gallons (Resp. Ex. 53). In 1939 its gasoline volume decreased to 5,144,675, and in 1940 it increased to 5,226,138 gallons (Resp. Ex. 54).

(c). Volume of gasoline sold by the Stikeman and by the Wayne Oil companies during years 1936-1940. Neither the Stikeman nor the Wayne Oil Company participated in any price cutting. Their gasoline volume during the years 1936-1940 (Resp. Ex. 54) was as follows:

Stikeman Company—1936—2,255,000 gallons,
1937—2,451,000 gallons,
1938—2,290,000 gallons,
1939—1,822,960 gallons,
1940—1,772,911 gallons.

Wayne Oil Company—1936—1,348,448 gallons,
1937—1,686,637 gallons,
1938—1,825,938 gallons,
1939—2,226,177 gallons,
1940—2,541,394 gallons.

7. Retail marketing costs: A survey of retail gasoline marketing costs in Detroit made in 1938 by Prof. Herbert F. Taggart, Professor of Accounting at the University of Michigan, shows that there is a rather definite lower limit to the cost of selling gasoline at retail, which limit is in the neighborhood of 3¢; that the average cost of sale by the 25 per cent of retail stations in Detroit, selling at the lowest unit cost, was 3.5¢ per gallon (R. 1021; Comm. Ex. 76).

496 8. Preferential Prices Lead to Underselling and Price Cutting: The Western Regional Manager of the Sun Oil Company, whose district embraces 18 states, including the State of Michigan, and who had been in the oil business for 20 years, was called as a witness by counsel for the Commission. This witness evidenced an intimate knowledge of the marketing conditions in Detroit. His testimony will be found in the Record at pages 386-439. Extracts from his testimony, summarized, follow:

The practice of the suppliers of gasoline of selling to tank-car buyers gasoline at tank-car prices who resell all or part through their own retail stations, and of selling to independent retail service stations at tank-wagon prices, creates a very difficult competitive condition and usually leads to retail price cutting by the stations receiving the preferential price, either openly or through some method of "undercover" discounting (R. 391-93).

Such price cutting forces the other dealers who are paying the posted tank-wagon price to lower their retail price, either by direct price posting or other means of discounting, in order to meet the competition established for them in their respective trade areas. The tank-car buyer who resells at retail has a wider margin of profit than the ordinary dealer who buys at the tank-wagon price, and consequently, if the latter reduces his retail price to meet the price set by the former, his gross return is less than that of the tank-car operator. If the tank-wagon buyer does not reduce his price he will lose volume, and the trade in his neighborhood will flow away from the station to another station where the price is lower, to an extent depending upon the proximity of the competition (R. 396-8).

Price cutting orgies in Detroit in nearly all cases are attributable to the fact that some marketeer is able to buy at a wider differential between his cost price and the current prevailing retail price than most retailers and so has a wider margin of profit, and being anxious to expand and desiring to get more gallonage, he reduces his price to the public. That is always the start of the price cutting orgies which occur periodically (R. 431).

If all the major oil companies were prevented from selling to retail operators at tank-car prices in the Detroit area it would improve the competitive situation in Detroit (R. 435).

497 Mr. Raupagh, respondent's Detroit manager testified that:

When certain stations start to cut prices, that spreads among other stations and a general price cutting situation ensues (R. 3652).

Professor Clark, Chairman of the Department of Marketing, and Director of the Graduate Division of the School of Commerce of Northwestern University, was called as a witness by respondent (R. 1617). He displayed an intimate knowledge of marketing conditions generally and had given consideration to the marketing of petroleum products (R. 1623). His testimony will be found in the Record, pages 1617-1712, a few relevant portions of which are here partly set out verbatim and partly summarized:

The use of the jobber (referring to jobbers generally R. 1682), brings into the marketing picture a competitive factor which leads away from monopoly—certainly not toward it. "Without the jobber you would have a very much smaller number of competitors in the field" (R. 1642).

Witness was shown Resp. Ex. 19, which he had previously examined and testified that it fairly depicted the flow of gasoline from the refineries to the consumers by the different methods of marketing now in use (R. 1644). Among the various methods depicted are those of sale by the producer to the jobber who sells both at wholesale and at retail, and by the same producer to retail outlets. If the channels of distribution were so fixed that a producer of gasoline could not sell in a given territory to different types of buyers at different prices, it would, in the opinion of the witness "very likely lead to higher costs of marketing". It would also, in the opinion of the witness, be very unfortunate because it is through selling to different types of buyers that competition is continued and methods of marketing are improved (R. 1645).

The differential accorded the four dealers on Red Crown gasoline purchased in tank-car quantities below the tank-wagon prices charged the retail outlets; the storage and distribution equipment maintained by the four dealers, the sale of gasoline annually handled by them, were explained to the witness (R. 1646-7), and his opinion requested as
to whether "there is anything economically unsound in
498 that set-up and system of distribution". The witness
answered: "Well, the set-up seems entirely sound to me. All of these organizations, as you enumerate them are performing what we call the wholesale function, and would be justified—in fact they would have to obtain a functional discount on that basis because of the expense of operation, and it is quite possible also that they might be justified in some or all of that lower price because of the quantities in which they purchase" (R. 1647). The witness was then asked his opinion as to whether there was anything in the set-up of the four dealers as outlined that "tends to create a monopoly, tends to restrict or injure

competition, or tends to lessen competition, or restrain trade in any particular, or injure competitors" (R. 1648), and answered: that there was nothing in the set-up of the four dealers that tended to restrict competition; that it had a tendency to increase competition. Whether it resulted in injury to their competitors depends on what is meant by the word "injure"; that if a company distributes more effectively than a competitor distributing in the same way, it will outsell its competitors on the market. He could not, however, see anything in the set-up of the four dealers that could be construed as unfair (R. 1648).

The jobber who sells both at wholesale and at retail, performs a dual function (R. 1657), frequently combined in one operation (R. 1658-9). The normal function of a jobber is to resell to retailers (R. 1660). When the jobber sells at retail he is performing a retail function which commences when the goods reach the retail store, (R. 1661) and are charged to the store (R. 1678).

A functional discount is one given to a middleman because of his position in a channel, upon the assumption that he performs certain operations "and the discount is for the purpose of covering his expense of doing that thing" (R. 1663), and has no relation to his retail functions (R. 1665-6). Benefit to the public from a jobbers' operation of retail stores flows from more efficient and economical operation (R. 1680-1).

A jobber who buys gasoline in tank-car quantities, taking delivery at his bulk plant at a differential of 1.5¢ per gallon under the price paid by his competitor who takes delivery by tank-wagon at his retail service station, and delivers the gasoline at his expense from his bulk plant to his retail service stations, if the cost of distribution is less
499 than 1.5¢ per gallon, profits to the extent of the difference, even though he is not a more efficient retail service station operator, and to that extent has a competitive advantage which results in injury to his tank-wagon competitor. Any benefit to the public flows from efficiency, producing reduced costs in operation (R. 1683-97).

Conclusions of Fact:

1. At all times subsequent to June 19, 1936, respondent has made three brands of gasoline—Stanolind, Red Crown and Solite with Ethyl. During said period, respondent has annually marketed from 61,198,750 gallons in 1936 to

74,627,712 gallons in 1940 of said branded gasolines in the Detroit Metropolitan area of Michigan, which embraces all of the area within the limits of the cities of Detroit, Hamtramck, Dearborn and Highland Park in the State of Michigan. Respondent is the largest producer and distributor of gasolines operating in said area. Of the branded gasolines sold by respondent in said area, approximately 3 per cent was Stanolind; 7 per cent Solite with Ethyl; and 90 per cent Red Crown.

2. During all the time mentioned in paragraph 1, respondent has sold all of said branded gasolines, to be by the purchasers resold, to two classes of customers in said area known as (1) tank-wagon reseller, and (2) tank-car customers. The tank-wagon reseller customers, operators of retail service stations, took delivery by tank-wagon, and, with but one exception, paid respondent's posted tank-wagon prices and resold said gasolines at retail through their stations. Before purchase of said gasolines for resale could be made in tank-car quantity the applicant had to possess certain qualifications prescribed by respondent as entitling him to recognition as a "jobber" or "wholesaler", and then selected and recognized by respondent as a jobber or wholesaler, was granted more favorable terms of purchase, usually 1.¢ per gallon on Stanolind, 1.5¢ per gallon on Red Crown, and 1.75¢ per gallon on Solite with Ethyl, below respondent's posted tank-wagon prices for said gasolines, delivery being made at the bulk or storage plant of the jobber; said price differentials being no larger than differentials granted by other competitive oil companies, operating in said area, to their customers selected and recognized by them as "jobbers" or "wholesalers" for gasolines of like grade and quality similarly delivered. The jobber or wholesaler was at liberty to resell said gasoline either at wholesale or at retail at prices to be fixed by him.

3. Between September 1, 1936, and March 1, 1938, respondent, to meet an equally low or lower price, 500 offered by a competitor for gasolines of comparable grades and qualities and to retain the business of a valuable customer, granted one of its tank-wagon customers—Ned's Auto Supply Company—on tank-wagon deliveries at its retail stations, a price of .5¢ per gallon on its branded gasolines, Red Crown and Solite with Ethyl, below its posted tank-wagon prices for said gasolines.

4. Prior to June 19, 1936, respondent recognized three dealers as jobbers—the Stikeman Oil Company, the Wayne Oil Company and the Citrin-Kolb Oil Company—and on March 7, 1938, respondent recognized Ned's Auto Supply Company as a jobber, and ever since their said recognition as jobbers, to meet equally low or lower grade and quality similarly delivered, and to retain their business, has accorded said companies its usual jobber differentials on its branded gasolines.

5. Ned's Auto Supply Company has resold none of said gasolines purchased from respondent at the differentials referred to in paragraphs 2 and 3, to retail service stations, but has resold substantially all at retail through service stations operated by it, the volume of gasoline so resold being, in 1936, 2,401,600; in 1937, 4,240,500; in 1938 4,880,500; in 1939, 4,336,508; and in 1940, 4,290,965 gallons. The volume of branded gasolines annually purchased by the Stikeman, Wayne and Citrin-Kolb companies during the years 1936 to and including 1940, and the amount resold at retail through service stations operated by each of them was as follows:

Company	Year	Total Amount Purchased	Amount Sold at Retail
Wayne Oil Co.	1936	1,348,345	None
" " "	1937	1,686,637	None
" " "	1938	1,825,038	None
" " "	1939	2,226,177	169,189
" " "	1940	2,541,394	332,478
Stikeman Oil Co.	1936	2,255,000	626,890
" " "	1937	2,451,000	223,041
" " "	1938	2,290,000	6,870
" " "	1939	1,822,960	None
" " "	1940	1,772,911	None
Citrin-Kolb Oil Co.	1936	2,091,024	614,761
" " "	1937	5,501,000	847,154
" " "	1938	5,959,000	435,007
" " "	1939	5,144,675	519,612
" " "	1940	5,226,150	339,698

501 6. All of the branded gasolines purchased from respondent by the Wayne Oil Company and the Stikeman Oil Company and resold at retail service stations, was resold at respondent's posted tank-wagon prices. A part

of the Red Crown gasoline purchased from respondent by the Citrin-Kolb Oil Company was resold to service stations at prices of .5¢ to 1.¢ per gallon less than respondent's posted tank-wagon prices, and in 1938 and 1939 said sales exceeded one million gallons per annum; a part of which was resold by those stations, receiving lower price, at less than the prevailing retail price. A large part of the Red Crown gasoline purchased from respondent by Ned's Auto Supply Company, and a part of that purchased by the Citrin-Kolb Company, was resold by said companies through retail stations operated by them at 2.¢ per gallon or more under the prevailing retail price for said gasoline.

7. All of the retail service stations supplied by respondent and those operated and those supplied by the four dealers within said area, are in competition with each other.

8. The average operating margin—difference between cost, and sale, prices—of the retail service stations handling Red Crown gasoline and paying the posted tank-wagon price in said area is, and has been, during all the period referred to in the complaint, approximately 4.¢ per gallon. During the period from September 1, 1936, to March 1, 1938, the operating margin of Ned's Company was approximately 4.5¢ per gallon which gave it a marginal advantage of .5¢ per gallon in the resale of Red Crown gasoline over its competitors purchasing at the posted tank-wagon price. The Stikeman, Wayne and Citrin-Kolb companies, during all the time mentioned in the complaint, and Ned's Auto Supply Company at all times subsequent to March 7, 1938, on all Red Crown gasoline purchased from respondent and resold through retail stations operated by each of them, had an operating margin of 5.5¢ per gallon, less the cost of maintaining their bulk or storage plants and transporting the gasoline therefrom to their retail service stations, which was approximately .5¢ per gallon, leaving them an operating margin to cover costs of sale of approximately 5.¢ per gallon, and giving each of them a marginal sales advantage of approximately 1.¢ per gallon over their competitors purchasing at the posted tank-wagon price.

9. The differentials respondent granted Ned's Auto Supply Company on its branded gasoline, Red Crown, conferred upon that company competitive price advantages

which were used by that company to greatly enlarge the volume of its retail gasoline business, by offering for sale at retail, and selling said gasoline at a price of 2.¢ or more per gallon below the prevailing retail price at which competitive retail service stations, purchasing Red Crown gasoline at respondent's posted tank-wagon price, were offering said gasoline for sale, which diverted gasoline trade in substantial volume from the retail service stations of its competitors to its own stations.

10. The differential respondent granted the Citrin-Kolb Company on its branded gasoline, Red Crown, conferred upon that company competitive price advantages which were used by that company to greatly enlarge the 502 volume of its gasoline business by (a) offering for sale and selling and delivering to certain of the retail service stations supplied by it, said gasoline at from .5¢ to 1.¢ per gallon below the posted tank-wagon price; a part of which was resold through the stations receiving the differentials at less than the prevailing retail price at which their competitors, purchasing their gasoline at the posted tank-wagon price, were offering and selling said gasoline, with the result that a substantial volume of gasoline business was diverted to their stations from the stations of their competitors; and, (b) offering for sale and selling, a part of said gasoline through retail service stations operated by it at 2¢ per gallon less than the prevailing retail price at which those stations, paying the posted tank-wagon price for said gasoline, were offering the same for sale, with the result that a substantial volume of gasoline business was diverted to Citrin-Kolb stations from the stations of its competitors.

11. To regain the business of their gasoline customers in whole or in part it was necessary for the competitors of Ned's, Citrin-Kolb and stations supplied by Citrin-Kolb to correspondingly reduce their prices on Red Crown gasoline which reduced their operating margin to approximately 2¢ or less per gallon,—an amount insufficient to enable them to continue in business unless each increased its sales volume of gasoline, while the beneficiaries of said price advantages could operate with a profit on the margin they had established without increasing their business.

Conclusion of law:

1. The effect of the granting by respondent to Ned's Auto Supply Company of .5¢ per gallon on tank-wagon deliveries below its posted tank-wagon price for its branded gasoline, Red Crown, from September 1, 1936, to March 1, 1938, was to substantially lessen competition and tended to injure, destroy or prevent competition with the retail service stations operated by Ned's Auto Supply Company by those retail service stations purchasing Red Crown gasoline at the posted tank-wagon price from respondent, the Stikeman Oil Company, the Wayne Oil Company and the Citrin-Kolb Oil Company; and the granting of said differential was in violation of Section 2 of the Clayton Act as amended.

2. The effect of the granting by respondent to Ned's Auto Supply Company, and to the Citrin-Kolb Oil Company, following their selection and recognition by respondent as jobbers, of a differential of 1.5¢ per gallon on its branded gasoline, Red Crown, below its posted tank-wagon price for said gasoline, was, is or may be, substantially to lessen competition or tend to injure, destroy or prevent competition with the retail service
503 stations operated by Ned's Auto Supply Company,
those operated by the Citrin-Kolb Oil Company and a part of those stations supplied by the Citrin-Kolb Oil Company, by those service stations purchasing Red Crown gasoline from respondent, the Wayne Oil Company, the Stikeman Oil Company and the Citrin-Kolb Oil Company at respondent's posted tank-wagon price; and the granting of said differential was in violation of Section 2 of the Clayton Act as amended.

3. The effect of the granting by respondent to the Stikeman Oil Company and the Wayne Oil Company, following their selection and recognition by respondent as jobbers, of a differential of 1.5¢ per gallon on its branded gasoline, Red Crown, below the price respondent charged its tank-wagon customers was and is to give those companies competitive advantages in the resale of said Red Crown gasoline through the retail service stations operated, or that may be operated, by them and each of them, over those service stations purchasing Red Crown gasoline from respondent and the Citrin-Kolb Oil Company by tank-wagon at respondent's posted tank-wagon price, and may

result in substantially lessening competition or tending to injure, destroy or prevent competition with those stations now, or that may be, operated by them, or either of them, by those service stations purchasing Red Crown gasoline by tank-wagon and paying the posted tank-wagon price therefor; and the granting of said differential was in violation of Section 2 of the Clayton Act as amended.

4. The effect of the granting by respondent to Ned's Auto Supply Company, the Stikeman Oil Company, the Wayne Oil Company and the Citrin-Kolb Oil Company, or either of them, following their selection and recognition by respondent as jobbers, of differentials of 1.¢ per gallon on Stanolind and 1.75¢ per gallon on Solite with Ethyl, below the posted tank-wagon prices respondent charged its tank-wagon customers for said gasolines, was to confer upon each of said companies competitive advantages in the sale of said gasoline through service stations operated by them, or either of them, over those service stations purchasing the same brands of gasolines at respondent's posted tank-wagon prices, which may result in substantially lessening competition, or tending to injure, destroy or prevent competition with each of the stations operated by each of said four companies, by those service stations purchasing said gasoline at respondent's posted tank-wagon prices; and the granting of said differentials was in violation of Section 2 of the Clayton Act as amended.

XII.

Informative Evidence.

The record contains a large amount of testimony and some exhibits, which have no bearing upon any question of fact alleged in the complaint and which constitute no
504 legal nor equitable defense to this proceeding. It is,
however, informative as to marketing conditions generally existing in the oil industry throughout the United States and was admitted in evidence for the information of the Commission. This evidence is designed to show that the acts and practices of the respondent, against which the complaint is levelled, have been for years and are now sanctioned and approved by a large part of the oil industry and generally recognized as proper and lawful. It indicates with reasonable certainty that certain of the major oil companies do not sell to jobbers in fields in which they

sell direct to the retail trade; while other major oil companies, like respondent, sell to both jobbers and to retailers in the same field, granting their jobber customers the usual jobber differential, which in rural sections is as high as 3¢ or more per gallon. Some of the jobbers resell entirely at wholesale, while others resell both at wholesale and at retail, and some entirely at retail, in competition with the retail trade purchasing at higher prices and supplied by the same oil company (See Resp. Exs. 23, 19, and testimony of Marshall, R. 1712-1840, Dyer, R. 1472-1567; 2760-77). With the non-major oil companies such is a common practice.

XIII.

Recommendation as to Form of Order.

Your examiner recommends that an order issue directing the respondent to cease and desist from—

(a) Selling its gasolines to any of its retailer tank-wagon customers in the Detroit Metropolitan area in Michigan, at a price less than its regular posted tank-wagon price, unless the difference in price makes only due allowance for differences in cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which the gasoline is to such purchaser sold or delivered; and where any preferential price terms are granted any one customer by reason of differing methods or quantities in which the gasoline is to such customer sold or delivered, like terms shall be granted to any of respondent's other tank-wagon customers who may purchase and take delivery by the same methods and in like quantities.

(b) Granting any dealer, jobber, or wholesaler, who resells at retail through service stations operated by said dealer in competition with retail service stations purchasing respondent's branded gasolines at its posted tank-wagon price, and within the Detroit Metropolitan area in Michigan, any differential on any of its branded gasolines to be by said dealer, jobber or wholesaler resold at retail through its service stations, unless the
505 difference in the price makes only due allowance for differences in cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which the gasoline is to such purchaser sold and delivered.

(c) Granting any dealer, jobber or wholesaler who resells to retail service stations in the Detroit Metropolitan area in Michigan, any differential on its branded gasolines, under the posted tank-wagon price, to be resold by said dealer, jobber or wholesaler to retail service stations at less than the posted tank-wagon price, unless the difference in price makes only due allowance for differences in cost of manufacture, sale or delivery resulting from the differing methods or quantities in which the gasoline is to such purchaser sold and delivered.

Respectfully submitted,
Webster Ballinger,
Trial Examiner.

June 25, 1943.

Note: The Trial Examiner's report is not a report or finding of the Commission. Such report is advisory only, and is not binding upon the Commission.

506 BEFORE FEDERAL TRADE COMMISSION.

* * (Caption—4389) * *

EXCEPTION TO TRIAL EXAMINER'S REPORT UPON THE EVIDENCE.

The undersigned, attorney for the Federal Trade Commission in the above-entitled matter, hereby excepts to the Trial Examiner's report upon the evidence herein, filed July 2, 1943, in the following respects:

I.

Exception is taken to the statement appearing at pages 44 and 45 of the Examiner's report, as follows:

"From 1930 to 1936 Ned's had received offers from responsible companies handling branded gasoline comparable in quality to those furnished by respondent at substantially lower prices—one cent per gallon less by tank-wagon (R. 3089, 3091), and from two (R. 3100) to five cents per gallon (R. 3094-6), less by tank-car than the price respondent was charging Ned's."

There is no evidence that any major oil company was offering to sell Ned's gasoline at a price lower than the prevailing tank-wagon price in 1936, at or prior to the time when respondent began to give Ned's a ½c differential on tank-wagon deliveries. There is no evidence that the one offer to sell to Ned's at less than the tank-wagon price which was effective in 1936 related to a gasoline "comparable in equality" to Red Crown gasoline, and it is affirmatively established that the one brand so offered was not a major brand and did not have the public acceptance of Red Crown.

The first so-called "offer" testified to by the witness Gershenson, president of Ned's Auto Supply Company, is said to have been made about 1930 by the Argo Oil Company. (It was agreed between counsel that the word "offer" when used in questions and answers on this subject 507 was used without legal significance and not as supporting a conclusion that any conversation or negotiation so referred to amounted to an offer in the legal sense.) This offer related to Dixie gasoline (not a major brand). Argo was then just starting to sell gasoline, and there is no evidence that it was a "responsible" company at that time. Mr. Gershenson told Argo "that we weren't interested in that offer and that died right there" (R. 3089).

The next offer referred to is one from the Red Indian Oil Company, which the witness said "has continued right up to today." That was also in 1930 (R. 3090). Red Indian at that time was selling Phillips 66 (R. 3091). However, in 1934 or 1935 the Red Indian Oil Company discontinued Phillips 66 and took on Fleetwing gasoline (R. 5337), and the subsequent testimony of Mr. Gershenson shows that the "continuing offer" from Red Indian thereafter referred to Fleetwing. Fleetwing was not a major brand, and did not have the public acceptance of respondent's gasoline in Detroit (R. 5345). There is no evidence that Fleetwing was "comparable in quality" to Red Crown.

Mr. Gershenson next testified regarding a conversation with a Mr. Dodge, representing the Texas Company, at Akron, Ohio in 1933 (R. 3094). There is testimony (purely hearsay) that Texas was then selling house brand gasoline to the Firestone Tire and Rubber Company in Detroit in tank-car quantities under a contract at 4c off tank-wagon price. Mr. Gershenson asked Mr. Dodge if Ned's could get the same kind of a contract. Ned's did not have a bulk plant at that time, and Mr. Gershenson returned to Detroit to see whether he could obtain bulk plant facilities, and he told Mr. Dodge that he would communicate with him further. Mr. Gershenson thereafter told Mr. Raupagh, respondent's Detroit manager, that "We wanted to buy and we were negotiating to buy gasoline from Texas on the same type of contract that Firestone had" (R. 3097). There is no evidence that Texas ever offered to sell to Ned's at ½c off tank-wagon price, or at any other price. All that appears is that Ned's had some negotiations with Texas with regard to buying in tank-car quantities. Ned's had no bulk plant at that time, and did not obtain one until February 1938 (R. 3120). Mr. Gershenson admitted that he had no offer in writing or any letter submitting any definite proposition from Texas (R. 3098).

The next offer described by Mr. Gershenson was from Shell Oil Company in 1933 or 1934. Shell was looking for a single jobber in Detroit, and according to Mr. Gershenson a representative of the Shell Oil Company told
508 him that Shell would sell to Ned's as a tank car jobber
at 2c less than the prevailing tank-wagon price, but "it might have been only a cent and a quarter" (R. 3100-01). The Shell representative said that if Ned's didn't accept the offer they would get somebody else and it wouldn't be available; later Gershenson was told that Shell had made the deal with Stark Hickey (R. 3101), and that the offer was no longer open (R. 3198). Mr. Gershenson said further that "Jack Reed kept me posted on what they were doing, and he said they had signed up somebody else, and I told him not to feel badly. We didn't intend to change from Standard Oil Company" (R. 3104).

Mr. Gershenson didn't recall whether or not he specifically mentioned the Shell Oil Company in communicating with Mr. Raupagh (R. 3104), and that "I didn't disclose the company" (R. 3105).

While the authority of Jack Reed to represent the Shell Company in this capacity does not appear, it is clearly evident that such an offer, if made, expired shortly thereafter, and that Mr. Gershenson knew that no such offer was in effect in 1936.

Regarding Mr. Gershenson's conferences with respondent's representatives in Detroit and Chicago just prior to the time Ned's was given the ½c differential, Mr. Gershenson, was asked by respondent's counsel whether he told respondent from whom he could get a lower price at that time. Mr. Gershenson replied, "I don't recall anything then. It is contrary to our practice to name a competitive price, as to whom it comes from; the supplier, because a competitive thing—there are too many arguments directly, and too many things to spoil them" (R. 3109). He said further that the only "offer" which he specifically had in mind at that time was the one from the Red Indian Oil Company (R. 3107, 3110).

The record is devoid of any evidence that any supplier of a major brand of gasoline was offering to sell to Ned's Auto Supply Company in 1936 at a lower price than the prevailing major tank-wagon price at which Ned's was then buying from respondent. Furthermore, it was Ned's "sincere business judgment" that the loss of volume which would result from a change from Standard to some other competitive brand would more than offset the additional margin that Ned's might make on the other brand, so that
it would be a stand-off (R. 3099). Ned's was merely
509 trying to get a lower price from respondent so that
they could make more profit (R. 3099), and we have Mr. Gershenson's direct admission that at this time (1936) he did not consider any change that he could make to another brand to be more favorable to his company than the continued purchase of respondent's brands at tank-wagon prices.

II.

Exception is taken to the following "Conclusion of Fact" at page 47 of the Examiner's report:

"The differential of .5c per gallon on Red Crown gasoline respondent granted Ned's Auto Supply Company on tank-wagon deliveries from September 1, 1936 to March 1, 1938 was made to meet an equally low or lower price of a competitor or competitors for branded gasolines of comparable grade and quality."

There is no evidence that any major competitor of respondent was offering Ned's an equally low or lower price on branded gasoline in 1936. There is evidence of an offer from Red Indian Oil Company to sell Fleetwing gasoline to Ned's at a price lower than respondent's price for Red Crown, but Fleetwing was not a major brand and there is no evidence that Fleetwing was a gasoline comparable in grade and quality with Red Crown. (See discussion under Exception I, supra.)

III.

Exception is taken to the "Conclusion of Fact" appearing at page 55 of the Examiner's report, as follows:

"The differentials on its branded gasolines respondent granted Ned's Auto Supply Company, at all times subsequent to March 7, 1938, and Stikeman Oil Company, * * * and the Wayne Company, at all times subsequent to June 19, 1936, were granted to meet equally low prices offered by competitors on branded gasolines of comparable grade and quality."

a. Ned's Auto Supply Company.

There is no evidence that any major oil company was offering to sell gasoline to Ned's at tank-car prices in February or March of 1938, or in fact at any other time prior to the issuance of the complaint in this case.

510 Within a month prior to March 7, 1938, Mr. Gershenson had confirmed the fact that Ned's could buy gasoline from the Red Indian Oil Company on a tank-car basis (R. 3115-6). Ned's then made arrangement to acquire bulk plant facilities (R. 3119-20), and Mr. Gershenson told Mr. Raupagh that unless respondent would sell to Ned's on a tank-car basis, Ned's would buy from someone else (R. 3113, 3121). Mr. Gershenson mentioned three companies—Shell, Texas and Red Indian—to Mr. Raupagh as available sources of supply (R. 3113).

Mr. Gershenson well knew that he could not purchase gasoline from Shell and at that time, the 1934 offer having long since expired (R. 3104, 3198). It does not appear that Ned's ever received an offer from the Texas Company to sell Texaco gasoline at tank-car prices (page 2, supra). Evidently, the names Shell and Texas were merely used by Mr. Gershenson for added weight in his attempt to persuade respondent to give Ned's a tank-car deal. Actually the only offer which Ned's had and relied upon at that time was from the Red Indian Oil Company, sellers of Fleetwing gasoline, a non-major brand in Detroit (R. 5345).

In November or December of 1940, "in anticipation of being called to testify," Mr. Gershenson contacted five companies in an effort to obtain evidence or competing offers for the respondent's use (R. 3140). Aside from Red Indian, he was able to testify to an offer to sell at tank-car prices by only one company—Gulf. Gulf's price at this time, according to Mr. Gershenson, was the same as respondent's price (R. 3141). Respondent did not call as a witness anyone representing Gulf or any other supplier, to confirm any alleged competitive offer.

b. Wayne Oil Company.

There is no evidence in the record that any competitor of respondent, major or non-major, offered to sell gasoline to Wayne Oil Company at tank-car prices prior to the issuance of the complaint herein. There is no evidence that any major company offered tank car prices to Wayne at any time.

Mr. Ledbetter, president of Wayne Oil Company, testified regarding two alleged offers made to his company in December, 1940, after the issuance of the Commission's complaint against respondent. He stated that on December 10, 1940, a salesman representing the Aurora Gasoline Company offered to sell Wayne 80 octane gasoline delivered by transport truck at 6.1c per gallon. Aurora is a Michigan refiner (R. 5276); its gasoline is unbranded and it does no advertising (R. 5278). Its president testified that Aurora makes no long term contracts on gasoline and will not quote a price for a period longer than thirty
511 days (R. 5279-80). An Aurora salesman could not bind the company for the sale of any large quantity of gasoline over a longer period of time (R. 5284); Aurora does not make any sales at a fixed margin below the major tank-wagon price (R. 5303).

It conclusively appears, therefore, that if any such "offer" as testified to by Mr. Ledbetter was made by the Aurora salesman, the salesman had no authority to make such an offer and the price quoted was not the price of, and was not binding upon, the Aurora Gasoline Company. Furthermore, unbranded gasoline regularly sells at a lower price than major brands in Detroit, retail competition from non-major brands at 2c per gallon less than the major price not being considered very severe (R. 404, 520).

Mr. Ledbetter also testified to an "offer" made by the National Refining Company in December, 1940. This offer was a joint offer made to Wayne Oil Company and Stikeman Oil Company, and was not available for acceptance by either company alone (R. 1912). National Refining Company was not selling gasoline in Detroit at this time (R. 1906), and had no distribution in the Detroit area (R. 1890). Its "White Rose" brand was not a major brand.

There is no evidence that Wayne considered accepting either of these offers. Mr. Ledbetter communicated them to respondent only because respondent told him, after the complaint herein was served, that they wanted to know about any competitive offers that had been made to him (R. 1886, 1903). The trial examiner struck from the record all of the testimony regarding these alleged offers, but it was reinstated by the Commission upon motion of the respondent after hearings were closed.

c. Stikeman Oil Company.

There is no evidence that any competitor of respondent offered to sell to Stikeman at tank-car prices, except the testimony of Mr. Ledbetter, just above referred to, that a joint offer was made to Stikeman and Wayne in December, 1940, by National Refining Company involving a non-major brand having no distribution in the Detroit area. There is no evidence that Stikeman could have purchased at tank-car prices from any major company other than respondent on June 19, 1936, or at any time thereafter.

IV.

Exception is taken to the statement of the examiner at page 54 of his report that Citrin-Kolb Oil Company received an offer from Aurora Gasoline Company on December 10, 1940, to furnish gasoline in tank-car quantities
512 at 1.5c per gallon less than respondent's price.

Testimony to that effect was given by Mr. Citrin. The date referred to was after the issuance of the complaint herein. According to Mr. Citrin's testimony, the offer was made by a Mr. MacGready, a salesman of Aurora Gasoline Company.

As above pointed out under Exception III-b, the president of Aurora testified that Aurora never makes any long term contracts on gasoline, never agrees to maintain a price for more than thirty days, and does not make any sales at a fixed margin below the prevailing major price (R. 5279-80, 5303). Mr. MacGready was called as a witness by the Commission, and he directly contradicted Mr. Citrin's testimony. He stated that at Mr. Citrin's request that he quoted to Mr. Citrin Aurora's then current price, but did not tell Mr. Citrin that Aurora would sell him gasoline at a fixed margin below the prevailing major price (R. 5326-29). While there is a conflict of testimony between Mr. MacGready and Mr. Citrin, the testimony of Mr.

Slaughter, president of Aurora, is uncontroverted to the effect that Mr. MacGready had no authority to make any such offer as described by Mr. Citrin, and that the records of the company indicate that no such deal was ever presented for consideration (R. 5283-6).

It will be recalled that about this time respondent asked its jobber customers to supply it with evidence of offers by respondent's competitors (R. 1886, 1903, 3140).

Respectfully submitted,

Cyrus B. Austin,
Trial Attorney.

July 12, 1943.
CBA:lva.

515 **Before Federal Trade Commission.**

* * (Caption—4389) * *

EXCEPTIONS TO TRIAL EXAMINER'S REPORT.

(Figures in parentheses, unless otherwise explained, refer to pages of the official record.)

* * * * *

Now comes Standard Oil Company, an Indiana corporation, Respondent herein, appearing by Arthur J. Abbott, of the law firm of MacMahon, Abbott and Roberts, and excepts to the report upon the facts of Honorable Webster Ballinger, Trial Examiner of Federal Trade Commission, filed with the Commission on the 2nd day of July, 1943, and served upon Respondent on the 6th day of July, 1943,* in the following particulars, to-wit:

516 I.

To Paragraph V, on Page 15 to 18 (inclusive) of said Report, wherein it is stated that the transactions complained of were in interstate commerce.

Respondent further specifically excepts to said Paragraph V on the following grounds:

(The following specific exceptions are not inclusive nor substantial of the foregoing general exception to said Paragraph V).

(a) To the references, on Pages 15 and 16 thereof, to

---

* An order of the Commission was subsequently made, extending the time to file the within Exceptions to and including August 5, 1943.

the execution of written contracts for the furnishing of gasoline by Respondent, which references are irrelevant and redundant; likewise, to the references therein relative to the maintenance, in the Detroit area, of six bulk storage plants; inasmuch as such contracts and facilities relate solely to transactions wherein gasoline is sold by Respondent to customers other than the four jobber customers involved in this case, and are wholly separate and distinct therefrom, having no bearing whatsoever on the
517 question as to whether the transactions complained
of were in interstate commerce; and, furthermore, inasmuch as there never were and are not now any written contracts between Respondent and said four jobber customers, covering tank car shipments of gasoline (34).

(b) To the reference on Page 17 of said Paragraph V, relative to certain cases of emergency jobber shipments made in interstate commerce, which have no bearing on the question of whether the transactions complained of were in interstate commerce; inasmuch as such shipments were atypical and constituted isolated and unusual transactions (182) due to emergencies occurring in the years 1938 and 1939, and one instance in April 1940, when Respondent, being out of stock of a particular grade of gasoline at River Rouge, Michigan, shipped the same by railroad direct from Whiting, Indiana,—it appearing from the testimony that in the closed lake navigation period Respondent sometimes ran short of gasoline at River Rouge and ordered cars from the refinery at Whiting to supply its jobbers, but that no such instance has occurred
518 since April 1940 (180).

(c) To the failure of the Trial Examiner to report that the storage tanks of Respondent at the River Rouge, Michigan, marine terminal are filled to their maximum capacity of one million five hundred thousand barrels of gasoline during the summer open lake navigation season, and that the gasoline stored therein comes to rest, often for several months (192), before being shipped wholly in Michigan to Respondent's jobber customers (155); and that none of such gasoline so stored is earmarked, when stored, to be sold to any of such jobbers (156),—the latter being supplied solely on day to day orders, all executed wholly in Michigan, without any contract whatsoever; and that none of such gasoline so stored and later sold to such jobbers is withdrawn from storage in fulfillment of any contract with any jobber customer involved in this proceeding; and that all of such transactions happen wholly within the State of Michigan (165-167); and that when the tank car shipment of gasoline from the River Rouge, Michigan, marine terminal of Respondent is delivered to the bulk plants of the jobbers (all situated in the State of Michigan), that terminates 519 the transaction, insofar as the physical handling of the gasoline is concerned; and that thereafter the jobber pays the Detroit Office of Respondent for the shipment (167).

(d) To the conclusion of law stated on Page 18 of said Report, and to the answer "yes" made by the Trial Examiner to the question as to whether the transactions complained of were in interstate commerce; which conclusion and answer Respondent contends are incorrect, as a matter of law.

520 II.

To Paragraph VI, on Pages 18 to 28 (inclusive) of said Report, wherein it is stated that the .5¢ per gallon differential which Respondent granted Ned's Auto Supply Company, from September 1, 1936 to March 1, 1938, on tank wagon deliveries of gasoline under the price charged other retail reseller tank wagon customers did not make due allowance only for differences in cost of sale and delivery resulting from different method and quantity in which said gasoline was sold and delivered, as between Ned's Auto Supply Company and Respondent's other tank wagon customers in the Detroit metropolitan area in the State of Michigan.

Respondent further specifically excepts to said Paragraph VI on the following grounds:

(The following specific objections are not inclusive nor substantial of the foregoing general exception of said Paragraph VI).

(a) That the issue presented by said Paragraph VI is moot, and should have been so reported by the 521 Examiner; the practice complained of having been permanently* discontinued as of March 1, 1938 (3742-3) (3745-6-8).

---

* In view of the express finding that the practice was permanently discontinued on March 1, 1938, it is submitted that *Sears Roebuck & Co.* v. *F. T. C.*, 258 Fed. 307, 310, is not applicable.

(b) That the statement by the Trial Examiner to the effect that Respondent's witness, John W. Boatwright, "frankly admitted that he did not know, of his own knowledge or knowledge gained from records, either the number or percentage of full and partial dump deliveries made to Ned's during the year 1937" (Report, p. 22, 1st Paragraph) is contrary to the testimony of said witness,—he having testified that:

"I know that most of them were on full load basis, except as when it became necessary for our truck to operate out of our plants to make deliveries to stations in the nearby neighborhood, they were privileged at any time, upon report to the plant, to dump one or two compartments in Ned's tanks. That responsibility of keeping the tanks filled enabled us to operate our trucks on a full load basis to a greater extent than they could have been operated in serving other retailer accounts, had it not been for the Ned's outlets". (3818)

522 (c) That the statement by the Trial Examiner to the effect that "whether any of the other 357 customers took all or substantially all of the deliveries in full tank wagon loads, and, if so, how many, is not shown by the record, but that a substantial part of the deliveries made to a part of them were made in full dumps is fairly established", is contrary to the testimony, and constitutes an incorrect conclusion of fact therefrom. (3817-8) (5181)

(d) That in rejecting Respondent's testimony relative to sales promotion expenses claimed by Respondent as not chargeable to Ned's Auto Supply Company, the Trial Examiner (Report, pp. 23-25) unjustifiably adopts the opinion of the Commission's Accountant, William J. Warmack, to the general effect that such items of expense could not be allocated as between different classes of customers (5791); which opinion is contrary to the weight of the testimony (2651-2) (4331) (5140-5)

(e) That in rejecting Respondent's testimony relative to advertising costs claimed by Respondent as not chargeable to Ned's Auto Supply Company, the Trial Ex-
523 aminer (Report, pp. 25-27) again adopts the opinion of the Commission's Accountant, William J. Warmack, and states:

"In the opinion of Mr. Warmack, Commission's Accountant, some part of this expense should have been charged to Ned's". (5901-2) (Report, p. 26).

"Mr. Warmack, Commission's Accountant, testified that there is no sound method by which such costs can be allocated between different service stations selling Standard Oil products, except on the basis of gallonage corroborated by Boatwright (supra) (d), which would afford no cost differential". (Report, p. 27).

There is no factual basis in the record for stating that Mr. Warmack's opinion, as stated, was "corroborated by Boatwright".

As for the opinion of Commission's Accountant, which was permitted by the Trial Examiner to prevail over all of Respondent's testimony as to costs not attribatable to gasoline sold and delivered to Ned's Auto Supply Company, the record shows that Mr. Warmack admitted on the record that he had no conception of what constitutes proper cost
accounting procedure under the Robinson-Patman
524 Act,—his testimony being as follows:

Q. "As far as you know, Mr. Warmack, has there been, either by great degree or otherwise, any norm or yardstick established as to what is the proper cost accounting procedure under the Robinson-Patman Act?"

A. "I do not know if there has been, Judge Hanley."

Q. "If there has been, you don't know about it; is that what you mean to say?"

A. "I do not know about it." (6526).

It further appears from the record that the Trial Examiner, in allowing the testimony of Commission's account to prevail over all of Respondent's testimony justifying the one-half cent differential granted to Ned's Auto Supply Company, ignored testimony establishing that Mr. Warmack did not examine the work sheets of, or accounting procedure followed by, Respondent in its study of the costs applicable to this differential (5779) (6617) (7784).

(f) That the Conclusions of Fact and Conclusion of
Law arrived at by the Trial Examiner in relation to the
525 one-half cent differential accorded Ned's Auto Supply
Company, from September 1, 1936 to March 1, 1938, on tank wagon sales of gasoline (Report, pp. 27-28) are erroneous; particularly insofar as the Trial Examiner concludes that the testimony "neither establishes nor tends to establish any differential in the cost of sale and delivery of gasoline to Ned's Auto Supply Company and to Respondent's other tank wagon customers in that area"—which

conclusion of the Trial Examiner disregards both facts and economics, and is contrary to the great weight of the testimony.

526 III.

To Paragraph VII, on Pages 28 to 43, (inclusive) of said Report, wherein it is stated that the answer is "no" to the question:

"Did the differentials of 1¢ per gallon on Stanolind, 1.5¢ on Red Crown and 1.75¢ on Solite with Ethyl gasolines, accorded the four dealers recognized by Respondent as jobbers, or tank car or transport truck customers, under Respondent's tank wagon prices charged its retail reseller customers for gasoline of like grade and quality, make only due allowance for differences in cost of sale and delivery resulting from differing methods or quantities in which the gasoline was sold and delivered to Respondent's jobber, or tank car, customers, and to its retail reseller, or tank wagon, customers, in the Detroit metropolitan area in Michigan?"

Respondent further specifically excepts to said Paragraph VII on the following grounds:

(The following specific exceptions are not inclusive nor substitutional of the foregoing general exception to said Paragraph VII.)

(a) To the statement made in the last paragraph on Page 28 of said Report to the effect that the differential
527 of 1.75¢ per gallon on Ethyl Gasoline is admittedly not justified.

The impossibility of the segregation of marketing costs as between the different brands of gasoline is discussed twice in the record (2501-2) (8054-5). A calculation was made between counsel which showed that the average differential based on brand ratios and discount allowance of 1.75¢ per gallon on Solite with Ethyl, 1.50¢ per gallon on Standard Red Crown, and 1.0¢ per gallon on Stanolind, revealed a weighted average differential on the three grades of gasoline of approximately 1.5¢ per gallon. This calculation was referred to in the closing of the taking of testimony (8055), and had been used in conferences between attorneys for Respondent and the Commission, which resulted in a gentlemen's agreement, whereby it was stipulated and understood that the issue should be decided on the basis of the differentials of 1.5¢ per gallon allowed on Standard Red Crown gasoline, which represents approximately 90% of the gasoline gallonage involved in the proceeding. The existence of this gentlemen's agreement will, no doubt, be confirmed by Cyrus B. Austin, Attorney for the Commission.

528 (b) To the statement of the Trial Examiner, made in the last paragraph on Page 29 of the Report, and repeated several times thereafter, to the effect that the jobber price differential justification was based on operations in the entire Detroit Division, instead of on operations in the so-called Detroit metropolitan area; and that, according to the testimony, populous areas show a lower marketing cost than rural sections (Report, p. 30).

The citations to the record on p. 30 of the Report do not substantiate the Trial Examiner's conclusion that the marketing cost in the Detroit Division is, or may be, less than in the Detroit metropolitan area, so-called. The testimony of Mr. Boatwright, alluded to by the Examiner, only pointed out that the fields of Minneapolis, Kansas City and St. Louis contained metropolitan areas and reported high costs. (5657-8). The testimony of Mr. Dyer, of Sinclair, alluded to by the Trial Examiner, does not substantiate the conclusion that the cost of marketing
529 gasoline is usually less on a per gallonage basis in populous areas than in outlying sections. (1516).

Mr. Warmack, Commission's Accountant, stated that he made no objective factual study of costs in the Detroit metropolitan area, as distinguished from the rest of the Detroit field (5958).

In this case, Respondent used as the basis for its cost analysis the smallest geographical area for which records had been maintained and within which the complaint was lodged. Nothing more was humanly possible.

The testimony referred to by the Trial Examiner has reference only to general distribution costs incurred from serving all types of customers. The testimony of Respondent's witness, Dyer, contains no statement to the effect that it relates directly to the reseller volume.

(c) To the statement of the Trial Examiner (Report, p. 32) to the effect that there is no factual basis established for Respondent's Exhibit 33-A to E (inclusive).

530 This conclusion is not justified by the record. The testimony of Mr. Boatwright shows clearly that ac-

counting costs reflected by said Exhibit was comparable, and even identical, as between the Kansas-Oklahoma field and the Detroit field; accounting, selling and marketing procedures being exactly the same (2663-4).

(d) To the statement of the Trial Examiner (Report, p. 34), to the effect that Mr. Warmack, Accountant for the Commission, made a thorough examination and study of Respondent's Exhibits 99, 100 and 101, and reviewed all the testimony relating thereto in the record.

The testimony shows that Mr. Warmack had never previously made any study or investigation relative to distribution cost accounting involving the sale and distribution of petroleum products (5774); and as to the thoroughness of his examination and study of these exhibits, and of Respondent's Exhibits 31 and 33-A to E (inclusive), and of the records underlying them, we refer to the record,
which falls far short of substantiating the Trial Exam-
531 iner's statement (5756) (5776-7) (5779) (6510) (6617).

(e) To the statement of the Trial Examiner on p. 36 of the Trial Examiner's Report, to the effect that "The 'other method' includes sales of gasoline to jobbers, sales of other products to jobbers, and expenses incident to direct shipments from Respondent's supply terminals to customers buying in carload quantities."

This statement is erroneous,—conflicting directly with the quotation on p. 3 of Respondent's Exhibit 100, which is as follows:

"It has not been deemed advisable to maintain a separate allocation of costs on sales of gasoline to jobbers, sales of other products to jobbers, or expenses incident to direct shipments from our supply terminals to customers buying in carload quantities. A separate classification of expense to these added channels has been considered unnecessary because of the small amount of expense applicable to sales to these classes of customers. Accordingly, any expense applicable to these classes of customers will be found scattered throughout the various channels on our 'Comparative Statement of Expense—Form 189, Detroit Field—Year 1940'. The expense of isolating each marketing cost accurately to these additional classes of cus-
532 tomers would be prohibitive in terms of benefits re-
ceived, and would load our sales with excessive accounting costs." (Resp. Ex. 100, p. 3)

There was no testimony to the contrary.

(f) To the statement of the Trial Examiner (Report, p. 37) to the effect that the cost of transporting gasoline from the River Rouge terminal of the four dealers was omitted from the cost analysis, while identical costs were charged to the tank wagon trade.

This involves an infinitesimal factor. Respondent's contention throughout the trial was that transportation costs from the River Rouge Terminal to jobbers' bulk plants should not be computed as a part of the cost differential. However, in order to forestall objection to this position by the Attorney for the Commission, a study was made of the difference in differential which would have been caused by including transportation costs to Respondent's bulk plants and transportation costs to jobbers' bulk plants,
and it was shown by uncontradicted evidence (4607)
533 that the differential would be reduced thereby by only
8/1000 of a cent (.008 of a cent); so that the differential for 1940, as shown by Respondent's Exhibit 83-A, would be reduced only from 1.47 cents to 1.462 cents (4607).

(g) To the statements of the Trial Examiner, on p. 39 of the Trial Examiner's Report; wherein:

(1) He adopts the opinion of the witness Warmack and rejects that of Respondent's Economist, Boatwright, and his corps of assistants, who make a business of cost accounting in relation to the merchandising of petroleum products exclusively; whereas the witness Warmack never previously made any study or investigation relative to cost accounting involving the sale and distribution of petroleum products (5774).

(2) He states that the costs of marketing kerosene and tractor fuels sold to the tank wagon trade are "concededly improperly charged" to the tank wagon reseller channel,
and amount to about 1 percent of the total volume
534 shown in that channel. (Citing Record, p. 4257).

The reference cited (4257) is not a concession on the part of Respondent that any costs are improperly included in the channel distribution of costs on Form 189 (Resp. Ex. 101).

(h) To the statement of the Trial Examiner (Report, p. 40) to the effect that "Before adopting the gallonage factor in the allocation of costs among the three bulk plant channels shown on Respondent's Exhibit 101, Respondent's economists made *no study* 'tending to verify or substantiate the use of the gallonage factor in the allocation of costs among the three sales channels * * *" (Boatwright, R. 8005), and therefore *no study* or tests had been made to support the use of the gallonage factor with a view to comparing the cost of sale and delivery of naphtha and gasoline to Respondent's tank wagon reseller and its jobber customers." (Italics ours.)

The record does not show that "no study" was made, as stated by the Trial Examiner.

The question of the use of a gallonage as an allo-
535 cation factor is dealt with at great length throughout
the testimony. On page 8005 of the record, the witness Boatwright stated only that "we did not make additional studies to verify or substantiate the use of the gallonage factor in the allocation of costs among the three sales channels * * *." (8005)

This is far different from testifying that no study was made.

The great detail to which Respondent's Economist and staff have gone in analyzing the use of gallonage as an allocation factor is fully explained in the record. (7889-7897.) In the testimony referred to, Mr. Boatwright states that not only himself and staff, but the Comptroller of Respondent Company, C. T. Bergeson, and many of its other technical experts, and also Price, Waterhouse & Company, its Auditors, have given this problem long and close study, with the result that the use of the gallonage factor is substantiated without question. Mr. Boatwright's testimony on this point is clear and convincing.

536 (i) To the statement of the Trial Examiner (Report, p. 40) to the effect that "Witness Warmack, Commission's Accountant, testified that he was told by Respondent's Accountant that no study had been made to support the gallonage method of allocation or the accuracy of the figures obtained by using this method. He spent six weeks in Detroit, reviewing the factual basis for Resp[illegible]ent's Exhibits 100 and 101, and while there he requested that he be furnished any information which would support the use of gallonage used in Respondent's cost study as a measuring factor, and was told that Respondent had no such information." (R. 4934-5941.)

Mr. Warmack's testimony, when closely examined (5941), shows that he did not testify that the gallonage basis of alplocation is inadequate, or that any other or better method exists.

"Q. That being true, Mr. Warmack, does it follow that in connection with some accounts and expenses that the gallonage basis may not be the best available method of allocation?

537 "A. It may not be.

"Q. It may not be.

"A. It may not be, or it may be." (5941)

"A. * * * It may be the very allocation that you can arrive at regardless of how many studies you may make." (5942)

(The above questions were propounded by the Attorney for the Commission.)

As to Mr. Warmack's claim that he asked for and received from Respondent no information which would support the gallonage measuring factor, the record amply shows, both from the testimony of Leonard W. Houghton, Accountant for Respondent, (7788-7792), and of John W. Boatwright, Economist for Respondent, (7885), that such information could have been supplied but was never asked for by Mr. Warmack, and that Mr. Warmack advised both Houghton and Boatwright that "I have got everything I want". (7792—bottom.)

There is no testimony to the effect that Mr. War-

538 mack was told by Respondent's accountants that no study had been made by Respondent to support the gallonage method of allocation or the accuracy of the figures obtained by this method. On the other hand, the evidence amply establishes the long and exhaustive study given by Respondent to substantiate the gallonage method. (7889-7897)

539 (j) To the statement of the Trial Examiner (Report, p. 40) to the effect that:

"If the gallonage factor had been used in determining Respondent's costs of sale and delivery of naphtha and gasoline to the tank wagon resellers and its jobber customers, there would have been no differential." (Boatwright, R. 8003.)

The testimony referred to by the Trial Examiner is as follows:

"Q. If you had used total gallonage, Mr. Boatwright, including direct shipment gallonage, as a basis of allocation, no cost differential would have resulted between tank wagon reseller and jobber, naphtha and gasoline?

"A. That is correct. But it would have been an absurdity." (8003.)

The "absurdity" referred to is revealed by the testimony on the preceding two pages, wherein it appears that in Respondent's Exhibit 101, the expenses charged to jobber naphtha and gasoline were arrived at not by the gallonage method of allocation, but were predicated upon the
effort measure; the allocation being based upon "the
540 sum total of effort devoted to the jobber, naphtha and
gasoline, business." (8001-2.)

(k) To the statements of the Trial Examiner (Report, pp. 40-42), relative to the propriety of allocation of (1) advertising costs and (2) annuities and Retirement Plan expense, as between tank wagon resellers and jobber channels of gasoline distribution.

These items concern allocations made by Respondent's Economist and accountants, which the Trial Examiner rejects in favor of the opinions of the Commission's experts (Report, p. 42). Substantiation of these allocations is amply supported by the record. (5381) (5445-59) (7568) (7960) (7961) (Resp. Exhibit No. 101, pp. 24-36) (Resp. Exhibit No. 101, pp. 90-99). It is respectfully submitted that it is improper to adopt the opinions of accountants employed by the Commission, when their opinions are at variance not only with Respondent's experts, but also with practices followed by the Internal Revenue Department
in calculating income tax, and by other non-interested
541 experts. The advertising costs reflected in these items
are substantial, and are primarily and almost exclusively attributable to operations other than those affecting the jobber channels.

The claim (Report, p. 42) that Annuities and Retirement Plan expenses do not properly constitute marketing expense, is, it is respectfully submitted, not supported by the record.

The record shows that wherever an allocation of costs was found to be necessary, Respondent's experts accepted what they regarded as the most logical method of cost allocation. To quote Respondent's Economist, John W. Boatwright:

"In any detailed cost study, you go down to certain points where it is a matter of judgment. In the exercise of this judgment, we have attempted to adopt procedures which would throw all possible costs against the jobber." (4773.)

(1) To the Conclusion of Fact of the Trial Examiner (Report, p. 42), and particularly to subdivision 3 thereof, wherein it is stated that:

542 (1) Costs in the tank wagon reseller channel are over-weighted and those in the jobber channel are under-weighted; and,

(2) Items of cost properly chargeable to the costs of sale and delivery to the jobbers were omitted; and

(3) Correction of the account in the items referred to would reduce the cost differential to less than 1¢ per gallon.

It is mathematically impossible to take the accounts discussed by the Trial Examiner, trace his steps by calculation, and arrive at a differential of less than one cent per gallon—even assuming that the opinions expressed by witnesses for the Commission be accepted in their entirety, insofar as they conflict with the expert opinions of Respondent's witnesses.

In this connection, the record shows, without contradiction, that the differential accorded by this Respondent to tank car customers is the lowest in the entire petroleum industry. (1515-16.) This fact lends additional credence to the rejected testimony of Respondent's expert witnesses.

543 As to the claim of the Trial Examiner that costs in the jobber channel are over-weighted, it is submitted that this conclusion is contrary to the great weight of the testimony. John W. Boatwright, Respondent's Economist, definitely testified that, in the interest of conservatism, his cost study "added a burden of cost to the jobber gallon to which it is not entitled" (4775), and that:

"Q. Is it definitely your judgment that the method you have used overburden the jobber gallon as contrasted with the reseller channel gallon?

"A. That is true." (4776).

The claim of the Trial Examiner that "costs * * * in the jobber channel are under-weighted" is answered by Dr. Boatwright in the following testimony:

"Q. Basing your answer on your knowledge of the Respondent's business, on your training and knowledge as an economist and accountant, do you believe that it actually costs the Respondent as much as 16/100 of a cent a gallon to sell gasoline to the Detroit jobbers?

"A. I know that is the outside top figure." (4778-9).

544 (m) To the Conclusions of Law of the Trial Examiner (Report, p. 43) in their entirety.

It appears to Respondent that, if it has not justified the differential in question, there never can be a case of this kind in which a differential justification can be established. This is for the reason that the justification depends, to a large extent, upon expert opinion testimony as to the propriety of allocation of costs as between various channels of distribution. It is a matter of common experience that experts often disagree. The Robinson-Patman Act requires only that price differentials make due allowance for differences in cost of sale and delivery—but if a Respondent is held to mathematical exactness, his analysis of costs is invariably subject to a variance of expert opinion, which fact renders the justification of a price differential onerous. (7967). It is, therefore, respectfully submitted that a reasonable administration of the Robinson-Patman Act suggests in this case that the Commission should carefully review the question of the propriety 545 of the rejection by the Trial Examiner of the economic views and opinions of Respondent's expert witness, which, as the record shows, were arrived at only after many months of investigation and study. (7922) (7966).

546

IV.

This question is presented by Paragraph VIII of the Trial Examiner's Report, on Jages 44 to 47 (inclusive) thereof. It involves the inquiry as to whether the .5¢ per gallon differential granted Ned's Auto Supply Company, from September 1, 1936 to March 1, 1938, on tank wagon deliveries of gasoline, under the price charged other reseller tank wagon customers in the Detroit area for gasoline of like grade and quality, was granted in good faith to meet an equally low (or lower) price of a competitor of Respondent.

Respondent takes no general exception to the Report of the Trial Examiner, as stated upon this question, nor to the Conclusion of Fact included on Page 47 of said Report; but makes specific exceptions thereto as follows:

(a) That the question presented by said Paragraph VIII is moot, and should have been so reported by the Trial Examiner.

547 (b) That the statement by the Trial Examiner on Page 44, to the effect that this question requires the separate findings, is erroneous, as a matter of law.

(c) That the Trial Examiner, in the Conclusion of Fact, reported on page 47, should have included, in addition to the finding reported therein, that the differential in question was granted in good faith by Respondent.

(Respondent notes, in this connection, that the Trial Examiner, under the heading "Conclusion of Law" (Report, p. 47) finds (with the qualification noted in the following paragraph) that the granting of such differential "was lawful", which finding doubtless implies that it was "granted in good faith by Respondent", as a matter of law).

(d) Respondent specifically excepts to that part of the Conclusion of Law, on Page 47 of said Report, insofar as it incorporates the proviso "Unless the granting of the .5¢ per gallon differential to Ned's Auto Supply Company constituted price discrimination, the effect of which was, is or may be substantially to lessen competition be-
548 tween Ned's Auto Supply Company's retail gasoline service stations and those operated by (other) customers of Respondent * * *". This specific exception is taken by Respondent upon the ground that, the Trial Examiner having expressly found that said differential "was made to meet an equally low or lower price of a competitor or competitors (of Respondent), for branded gasolines of comparable grade and quality, and to retain Ned's (Auto Supply) Company's business", as a matter of law, the question appended by the Trial Examiner as the last paragraph of "Fourth Question" (Page 44 of Report) is redundant and immaterial.

549

V.

To Paragraph IX. on Pages 47 to 50 (inclusive) of said Report, Respondent takes no general exception, insofar as the Trial Examiner reports that the selection of the four dealers (Ned's Auto Supply Company, Citrin-Kolb Oil Company, Wayne Oil Company, and Stikeman Oil Company), and their recognition by Respondent as jobbers, were lawful.

Respondent does, however, specifically except to certain portions of said Paragraph IX, in the following respects and on the following grounds:

(a) To the statements incorporated in said Paragraph IX on Page 48 of said Report, to the effect Respondent disregarded the Federal Trade Commission definition of the term "jobber" and "adopted its own standard, which required a greater showing of financial stability but dispensed with any showing as to the manner or method of resale * * *"; also to the reference in the second paragraph on Page 48 of said Report, wherein it is
550 stated that Respondent's definition of a "joboer" is different than that promulgated by Federal Trade Commission.

Respondent contends that there is no testimony in the record to substantiate these findings.

(b) To the statements twice occurring in the Report of the Trial Examiner, on Page 49 thereof, to the effect that the recognition by Respondent of Ned's Auto Supply Company as a jobber was a "forced recognition". (In taking this specific exception, Respondent does not in any respect waive its claim that the recognition of Ned's Auto Supply Company as a jobber was done to meet competition; but Respondent excepts only to the finding that said recognition was "forced" or the result of coercion.)

There is no testimony in the record to substantiate such a finding.

(c) To the conclusion of law, on Page 49 of said Report, insofar only as it purports to qualify the finding that the selection by Respondent of the four jobber dealers in question, and their recognition by Respondent as job-
551 bers was bona fide; Respondent submitting, in that regard, that the qualification of the Trial Examiner's finding, as stated in said Conclusion of Law, is unwarranted and improper.

(d) That the Trial Examiner failed specifically to answer the Fifth Question, as to whether the selection of the four jobber dealers in question and their recognition by Respondent as jobbers was bona fide; the answer being that "their selection and recognition by Respondent as jobbers was lawful"; which conclusion doubtless implies, however, as a matter of law, that their selection and recognition by Respondent as jobbers was "bona fide."

552

VI.

To Paragraph X on Pages 50 to 55 (inclusive) of said Report, Respondent takes no general exception, insofar as the Trial Examiner answers "yes" to the Sixth Question, to-wit:

"Were the differentials in price accorded the four dealers, recognized by Respondent as jobbers, made in good faith to meet equally low prices of competitors, or the services or facilities furnished by competitors."

Respondent does, however, specifically except to certain portions of said Paragraph X, in the following respects and on the following grounds:

(a) To the statement on Page 50 of the Report, to the effect that during the period in which Ned's Auto Supply Company received the .5¢ differential, its gallonage increased from approximately 2,400,000 to approximately 4,800,000 gallons; the record showing that its gallonage of gasoline was as follows: 1936,—2,400,000; 1937,—4,240,000; 1938,—4,800,000; 1939,—4,200,000; 1940,—4,200,000 (3082); and that after it went on the tank car delivery basis its gallonage decreased.

553

(b) To the failure of the Trial Examiner to report that, according to the uncontroverted testimony of the Respondent's witness, James E. Dyer, of Sinclair Refining Company, the universal practice of the oil industry throughout the United States is to grant a differential margin in price as between tank wagon and tank car deliveries of gasoline ranging from 1½¢ minimum to 3¢ maximum, with an average of more than 2¢,—the amount depending upon location, and population density, and that a differential of 1½¢ is about as low as the differential ever becomes. (Record,—pp. 1515-16).

(c) To the failure of the Trial Examiner to report that the competitive offers of National Refining Company made to Wayne Oil Company were also made to Stikeman Oil Company (1888) (1892); which competitive offer was to furnish its branded gasoline (1905) which it represented as of better quality than Standard Red Crown (1907) at a price more than .5¢ less per gallon than Respondent was charging for tank car deliveries (1892).

554 (d) To the failure of the Examiner to report that in 1935, Wayne Oil Company, while receiving gasoline from Respondent on a tank wagon delivery basis at regular

tank wagon prices, operated one station in Detroit,—at the corner of Vinewood Avenue and Grand Boulevard,—at which gasoline was furnished by Highland Oil Company, distributors of Hi-Speed Gasoline, a major brand gasoline, by tank wagon delivery, at a price of one cent lower than Standard Oil Company's price (1893).

(e) To the Conclusion of Law, on Page 55 of said Report, insofar only as the same contains the proviso to the effect that:

"Unless the differentials granted the four dealers, above named, constitute price discriminations, the effect of which was, is or may be, substantially to lessen competition, or tend to injure, destroy, or prevent competition with said four dealers, or with the customers of either Respondent or said four dealers * * *;"

(f) To the failure of the Trial Examiner, in the Conclusion of Fact on Page 55 of said Report, specifically
to answer in the affirmative, or at all, the question as to
555 Respondent's good faith, as propounded in the Sixth
Question on Page 50 of said Report:

(Respondent notes, in this connection, that the Trial Examiner, under the heading "Conclusion of Law", on Page 55 of said Report, finds that "the granting of the differentials was lawful", which finding doubtless implies as a matter of law, that the differentials were "made in good faith".)

556 VII.

To Paragraph XI on Page 55 to 71 (inclusive) of said Report, wherein the Trial Examiner answers "yes" to the question identified as Seventh Question and appearing on Page 55 of said Report, in form as follows:

"Do the differentials in price accorded the four jobbers constitute price discrimination, the effect of which is, or may be, substantially to lessen competition, or tend to injure, destroy or prevent competition with said four dealers, or with the customers of either Respondent or the said four dealers."

Respondent further specifically excepts to said Paragraph XI of said Report on the following grounds:

(The following specific exceptions are not inclusive nor substitutional of the foregoing general exceptions to said Paragraph XI).

(a) That consideration of and answer to said Seventh

Question are unwarranted and improper, in view of the Trial Examiner's answers to the Fourth, Fifth and Sixth Questions.

557 (b) That in view of the Trial Examiner's report relative to Wayne Oil Company and Stikeman Oil Company (Report, pp. 58 and 59), Respondent is entitled to a forthwith dismissal of the complaint, insofar as it concerns said two jobbers.

(c) To the failure of the Examiner to report the uncontroverted testimony as to the reasons why Citrin-Kolb Oil Company, and certain of its reseller customers, gave discounts of 2¢ per gallon on gasoline in 1938 or 1939, as referred to on Page 59 of the Report; also as to the reasons why it (Citrin-Kolb Oil Company) was able to "make money" on the Langer & Cohen contract, referred to on Page 59 of the Report; also as to the reasons why Citrin-Kolb Oil Company gave price and rent concessions to certain of its reseller customers in 1938, 1939 and 1940. (Reasons appear in the undisputed testimony of Max Biber, —record, pp. 3218),—(1384-1425).

(d) To the statement of the Trial Examiner in Paragraph 2, Page 60 of the Report, to the effect that Ned's Auto Supply Company, following granting by Respondent of both the .5¢ differential on September 1, 1936, and
558 the 1.5¢ differential on March 7, 1938, reduced its price on Red Crown gasoline to the public (Record, p. 240-2 and Commission's Exhibits 3 and 22).

(e) To the statement of the Trial Examiner, on Pages 61, 62 and 63 of the Report, to the effect that in 1938, 1939 and 1940, Ned's Auto Supply Company granted discounts and premiums on retail sales of gasoline, without stating with particularity the competitive conditions in the Detroit area which made such concessions necessary if Ned's Auto Supply Company was to maintain even a semblance of competition with nearby retail gasoline competitors (Record, pp. 3153-3189); also without stating the uncontroverted testimony that no other or different price concessions on retail sales were made by Ned's Auto Supply Company after it went on a tank car delivery and price basis than existed, or were made, before it went on said basis. (Record, p. 3154).

(f) To the statement of the Trial Examiner, on Page 64 of said Report, to the effect that the retail gasoline price war of 1937-8-9 was caused and contributed to by

Ned's Auto Supply Company, Langer's, Bright's,
559 Hickey's, and Firestone; without reporting the testi-
mony of Paul A. Raupagh, Manager of the Detroit
Division of Respondent, wherein, at great length, an analysis of the causes of the Detroit price war of 1937-1939 were discussed and analyzed, and whereby it was established that Ned's Auto Supply Company and Citrin-Kolb Oil Company were, neither one of them, even a contributing factor in such "price war",—which was the result of fundamental economic conditions prevailing in the entire industry (Record, pp. 3262-3274); and that in 1939 economic conditions in the gasoline industry became stabilized (Record, p. 3274).

(g) To the statement of the Trial Examiner in the Report to the effect that the price differentials accorded Citrin-Kolb Oil Company were in excess of its cost of sale and delivery (Paragraph 5, on p. 65, of Report); without, however, reporting that a detailed cost analysis of Citrin-Kolb Oil Company's sale and delivery costs showed a per gallon cost on gasoline sold and delivered at wholesale, as follows:

560 1937—1.30 cents per gallon
1938—1.41 cents per gallon
1939—1.69 cents per gallon
1940—1.53 cents per gallon

Average—1937-1940 (inclusive) 1.4825 cents per gallon. (Record, p. 3031).

And, whereas, in the case of Wayne Oil Company, the comparable cost figures, based on wholesale operations only (Record, p. 2042, 2046), were as follows:

1938—1.501 cents per gallon
1939—1.451 cents per gallon
1940—1.489 cents per gallon

Average—1938-1940 (inclusive) 1.480 cents per gallon. (Record, p. 2010.)

(Note: It should be stated that this testimony as to
Wayne Oil Company was stricken by the Trial Examiner
(2049). A motion made by Respondent to the Commis-
sion was denied on December 28, 1942. In view of
561 statements of the Trial Examiner, made in the Report,
to the effect that the differentials accorded jobbers
were in excess of cost of sale and delivery when con-

sidered from the standpoint of the jobbers' operations, it is respectfully submitted that this data as to sale and delivery costs of Wayne Oil Company should now be considered by the Commission, as well as the corresponding data as to the sale and delivery costs of Citrin-Kolb Oil Company).

(h) To the statement of the Trial Examiner in the Report, to the effect that "price cutting at Ned's stations has been almost continuous. It has been true over a long period", (Report, p. 62); whereas the testimony abundantly shows that Ned's Auto Supply Company was and is not a price-cutting marketer of gasoline (Record, p. 3472) (Record, p. 3187-93) (Record, p. 3217).

(i) To the statement of the Trial Examiner in the Report to the effect that "the cost to the Sun Oil Company of delivering gasoline from its bulk plants to its service stations in the Detroit area, including the cost of operating the bulk plants, is less than ½ a gallon (Report, p. 66, Paragraph 2); whereas, the Trial Examiner omits to
562 report the testimony to the effect that Sun Oil Company delivers only one grade of gasoline, instead of three grades, as in the case of Respondent (1381); that Sun Oil Company's figure included no administrative costs for executives' services (1382); that Sun's deliveries are made on route schedule (1382); that Sun's trucks operate 18 hours a day (1382); that Sun delivers a minimum of 2000 gallons of gasoline to a customer (1382), whereas Citrin-Kolb Oil Company's minimum is 250 to 400 gallons (1382) and Respondent's minimum by tank wagon is 200 gallons (26).

(The testimony of P. H. Harrison, of Sun Oil Company, relied upon by the Trial Examiner as the basis for the above statement, covers only hauling costs and not the additional costs of selling gasoline by the tank wagon method—whereas, the cost differential established by Respondent reflects the difference in the cost of both sale and delivery.)

(j) To the statement of the Trial Examiner (Record, p. 67), quoting with approval the testimony of Professor Herbert F. Taggart, relative to the average cost of sale of gasoline at retail in Detroit; which testimony, as the record discloses (Record, p. 1021; Comm. Ex. 76)
563 is unreliable,—being based upon a so-called "cost survey", compiled upon hearsay, and reflecting widely varying reported sales costs of retail station operators.

(k) To the statements of the Trial Examiner in the Report, (p. 68 thereof), to the effect that the practice of selling on a tank car delivery and price basis to jobbers who are also retailers causes a "difficult competitive condition" in the Detroit area, which ultimately forces other dealers to lower their price to the public; which statement indicates that the Trial Examiner erroneously bases his report and recommendations on the basis of injury to competitors, as distinguished from injury to competition. (Vide testimony of Professor Fred Emerson Clark, of the School of Commerce of Northwestern University,—wherein he distinguishes between "injury to competitors" and "injury to competition".) (Record, p. 1647-8).

The theory of the Trial Examiner is reflected in the testimony of Professor Clark, as follows:

564 "Q. Is there anything in that set-up as it has been outlined in the preceding question, which, in your judgment as an Economist, tends to create a monopoly, tends to restrict or injure competition, or tends to lessen competition or restrain trade in any particular?"

Trial Examiner Ballinger: *"or injure a competitor?"*

"A. Why, the answer to the first part of the question is definitely 'no'. That tends to increase competition, having these various methods of selling. Now, as to injuring a competitor, it depends upon what you mean by 'injure'. If a company in this way distributes more effectively than a competitor that distributes in some other way, probably they will outsell him on the market." (Record, p. 1648). (Italics ours.)

565

VIII.

Respondent excepts to the Conclusions of Fact (Report, pp. 71 to 74 inclusive), insofar only as Subdivisions 6, 8, 9, 10 and 11 thereof are concerned, upon the ground that the same are not substantiated by the testimony, and upon the further ground that there is no evidence in the entire record to show that competition was injured, destroyed or prevented as the result of the granting by Respondent of the differentials in price here complained of; there being no testimony that a single one of the competitors of Ned's Auto Supply Company or Citrin-Kolb Oil Company was forced to discontinue business, but only that they were, in some instances, required to reduce their prices to the public so as to be competitive, and thereby foster and increase competition in the public interest, without in any manner promoting or creating monopoly (396-8).

"It leads away from monopoly,—certainly not toward it". (Record, p. 1642).

This exception to the Trial Examiner's Report is
566 based upon consideration of the meaning of the word
"competition", as used in the Robinson-Patman Act.
Injury to "competitors", we submit, is one concept; injury to "competition" is another and wholly different concept. Testimony relied upon by the Trial Examiner to sustain the above Conclusion of Fact relates wholly to claimed injuries to competitors of Respondent's four jobber customers in the Detroit area.

Yet the Trial Examiner, at Pages 54-55 of his report, finds as a matter of absolute fact (which is uncontradicted upon the record) that the four jobbers "*could purchase from many other sources, immediately, a gasoline of comparable quality and at a better (lower) price than they are paying at the present time.*" (Italics ours.)

The Trial Examiner also finds that the jobber customer market is subject to intense competition (Report, p. 54); that Respondent's jobber customers have no contracts and the continuance of their patronage is subject to competition from day to day. (Report, p. 54).

The Trial Examiner also quotes with approval (and
567 finds accordingly) that "all of the many jobbers or
distributors operating in the Detroit Metropolitan Area and listed in Respondent's Exhibit 55-A and B, and 57-A and B, are comparable in their operations to the operations of one or more of the four jobbers of Respondent; and that all of them purchase their gasoline requirements substantially below the prevailing tank wagon price, and, *as a matter of fact, that many of them purchase even below the prevailing tank car price.* In addition, many of them are not required to maintain their own bulk storage and their own trucks to receive the benefit of such lower prices * * *". (3373) (Italics ours.)

The Trial Examiner also finds that Respondent is in competition with all the suppliers listed in Respondent's Exhibits 55-A and B and 57-A and B, quoting with approval the testimony to that effect of Paul A. Raupagh, Manager of Respondent's Detroit Division (3373).

It thus appears that the Trial Examiner's Conclusions of Fact as to injury to competition are effectually rebutted by his own findings. For, if Respondent should, for any reason, discontinue selling gasoline to its four jobber 568 customers in the Detroit area, according to the findings of fact above mentioned, such jobbers could and would immediately purchase comparable gasoline from the suppliers mentioned in said exhibits at a price either equal to or lower than they (the said jobbers) are paying to Respondent.

The evidence is uncontradicted in this proceeding that there are literally thousands of situations in the middle west, and in the entire United States, comparable to the operations of the four jobbers of Respondent in Detroit (1723). It is also established by the record (1764) that the system of price differentials in the gasoline industry is economically sound and fundamentally essential in the conduct of the business. If, in this proceeding, a cease and desist order were issued against Respondent, restraining it from selling gasoline by the tank car method and at regular tank car prices to the four Detroit jobbers, or any of them, the testimony is uncontradicted that they could and would secure their requirements of gasoline in tank cars (or transport trucks) at as favorable or possibly a more favorable price than they are securing today (1776). Respondent would, in that case, be pro-569 hibited from selling on the same basis and to the same classes of trade as its competitors were permitted to do (1778). This would result in a restraint of competition (1782). It would result in bringing about a less economical system of distribution than now exists (1783).

Respondent, therefore, specifically excepts to the Conclusion of Fact, insofar as the Trial Examiner finds that, notwithstanding the lower prices offered by Respondent's competitors, its trade practices tend to injure, destroy or prevent competition. By the standard applied by the Trial Examiner, the alternate suppliers of gasoline mentioned in Exhibits 55-A and B and 57-A and B are the ones which are creating the conditions complained of by competitors of Respondent's jobber customers.

570

IX.

To the failure of the Trial Examiner to report on the following questions necessary to the decision of this case, to wit:

(a) Is the trade practice complained of in these proceedings one which is widespread throughout the whole oil trade or industry in the United States, as well as in the Detroit, Michigan, area?

This exception is made upon the ground that testimony was introduced to show that in the oil industry (1504, 1717, 1723, 2766, 2768, 2771), and in industry generally (1651), the dual type of merchandising operation here complained of is universal throughout the United States; thereby indicating the propriety of a Trade Practice Conference, in lieu of this proceeding.

(b) Is this proceeding prosecuted in the public interest?

This exception is made upon the grounds that Respondent contends this proceeding is not prosecuted in the public interest.

All of Respondent's Exhibits for Identification (Exhibits 77, 78, 79, 80, 87, 88, 89, 90 and 91 for Identification), relating to this issue, were ordered excluded by the Trial Examiner, with the statement that "The Federal
571 Trade Commission acts only in the public interest" (3542), and "The Commission acts only in the interest of the public" (3623), and "The Examiner is of the opinion, and so rules, that the documents tendered are not relevant to this proceeding or any matter in issue herein * * *" (3681).

Respondent renews its motion that all of these Exhibits for Identification offered in evidence by Respondent and excluded by the Trial Examiner, be received in evidence and considered by the Commission upon submission of this case upon the merits; to the end that the Commission may be definitely advised as to the truth and validity of Respondent's contention that this proceeding is not prosecuted in the public interest, but is diametrically opposed to the public interest.

572

X.

To the statement of the Trial Examiner in Paragraph XII, Page 75 of the Report, wherein it is averred that a large amount of testimony and some exhibits were included in the record, upon being offered by defendant, which are, however, classified as "Informative Evidence," which "have no bearing upon any question of fact alleged in the complaint and which constitute no legal nor equitable defense to this proceeding". As to the balance of said Paragraph, Respondent takes no exception, inasmuch as it answers the question propounded in Subdivision (9) (a), supra.

573

XI.

To Paragraph XIII, on Pages 76 and 77 of the Report, which paragraph is headed "Recommendation as to Form of Order", and to Subdivision (a), (b) and (c) thereof, in their entirety.

This exception is made upon the grounds that:

Subdivision (a) of said Paragraph XIII proposes that the Commission legislate upon matters involving Respondent's trade practices, and that Respondent be deprived, without warrant of any existing law, of the right to select and classify its customers.

Subdivision (b) of said Paragraph XIII proposes that the Commission impose upon Respondent, without warrant of any existing law, the duty of policing its products after the same are sold to jobber customers, so as to restrict the manner in which the same shall be resold,—thereby, in effect, recommending that Respondent be deprived, without warrant of law, of its right to sell gasoline at competitive tank car prices to any jobber customer who may resell the same at retail direct to the public; there being no
574 existing law imposing such last mentioned restriction.

Subdivision (c) of said Paragraph XIII proposes that the Commission impose upon Respondent, without warrant of any existing law, the duty of policing its products, after the same are sold to jobber customers who are not retailers, so as unlawfully to control the price at which the same shall be sold by said jobber to its reseller customers.

Respondent respectfully requests that oral argument be permitted in support of the foregoing exceptions.

Respectfully submitted,
Standard Oil Company,
an Indiana corporation.
By Arthur J. Abbott,
Its Attorney.
Business Address:
2230 Buhl Building,
Detroit, Michigan.

219 UNITED STATES OF AMERICA.

BEFORE FEDERAL TRADE COMMISSION.

At a regular session of the Federal Trade Commission, held at its office in the City of Washington, D. C., on the 9th day of October, A. D. 1945.

Commissioners:
Ewin L. Davis, Chairman,
Garland S. Ferguson,
William A. Ayres,
Robert E. Freer.

FINDINGS AS TO THE FACTS AND CONCLUSION.

Pursuant to the provisions of an Act of Congress entitled, "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914 (Clayton Act), as amended by an Act of Congress approved June 19, 1936 (Robinson-Patman Act), the Federal Trade Commission on November 29, 1940, issued and subsequently served its complaint in this proceeding upon the respondent, Standard Oil Company, a corporation, charging it with violation of the provisions of subsection (a) of Section 2 of the said Clayton Act as amended. After the issuance of said complaint, the filing of respondent's answer thereto, and the taking of partial testimony and other evidence in support of the com-

plaint, the Commission, on April 23, 1941, issued and subsequently served upon the respondent an order amending said complaint, which order further provided that the testimony and other evidence heretofore taken be adopted and considered as having been taken in support of the allegations of the complaint as amended and that the answer
220 of the respondent filed to the original complaint be adopted as respondent's answer to the complaint as amended. Thereafter, testimony and other evidence in support of and in opposition to the allegations of said complaint as amended were introduced before a trial examiner of the Commission theretofore duly designated by it, and said testimony and other evidence were duly recorded and filed in the office of the Commission. Thereafter, this proceeding regularly came on for final hearing before the Commission upon said complaint as amended, answer thereto, testimony and other evidence, report of the trial examiner upon the evidence and exceptions filed thereto, briefs filed in support of and in opposition to the complaint, and oral argument of counsel; and the Commission, having duly considered the matter and being now fully advised in the premises, makes this its findings as to the facts and its conclusion drawn therefrom:

Findings as to the Facts.

Paragraph One: The respondent, Standard Oil Company, is a corporation organized, existing, and doing business under and by virtue of the laws of the State of Indiana, with its principal office and place of business located at 910 South Michigan Avenue, Chicago, Illinois.

Paragraph Two: The respondent is engaged in the business of refining and distributing gasoline and other petroleum products among and between the various states of the United States. Respondent sells three brands of gasoline—"Solite with Ethyl," "Red Crown," and "Stanolind." Red Crown is respondent's regular house-brand gasoline and constitutes approximately 90 percent of its sales in the Detroit metropolitan area, while Solite with Ethyl constitutes 7 to 10 percent and Stanolind, 3 or 4 percent. Respondent has several refineries, one of which is located in Whiting, Indiana. Crude oil to supply its refineries is derived from various sources but principally from the so-called Mid-Continent fields in Kansas, Okla-

homa, Texas and Wyoming. Respondent sells its products throughout a territory consisting of 14 states, principally located in the Middle West. This territory is divided into 27 divisions or fields; with a branch office in each
221 field in charge of a manager or superintendent.

One of such divisions or fields is known as the "Detroit Field," which embraces all or part of thirteen counties in southern Michigan, including the Cities of Detroit, Lansing, Pontiac, Jackson, and Ann Arbor. The "Detroit Area,"as distinguished from the "Detroit Field," includes only the City of Detroit and its suburbs, Hamtramck, Dearborn, and Highland Park in Wayne County, which is also referred to as the "Detroit Metropolitan Area."

The respondent has no refinery in the State of Michigan. Gasoline and other petroleum products sold and distributed by the respondent in the Detroit Field are transported from its refinery at Whiting, Indiana, by tankers through the Great Lakes to respondent's marine terminal at River Rouge in the outskirts of Detroit. This marine terminal has a storage capacity of about 1,500,000 barrels of 42 gallons each. During the summer months, deliveries are made from the Whiting refinery every week and sometimes twice a week. In the fall sufficient gasoline is delivered and stored to take care of estimated requirements during the winter months when navigation through the Great Lakes is closed.

During the years from 1936 to and including 1940 respondent supplied from 16.2 percent to 17.4 percent of all the branded and unbranded gasoline sold in the Detroit Metropolitan Area. The total sales made by respondent in said area during that period amounted to 62,198,750 gallons in 1936, 70,015,200 gallons in 1937, 60,448,200 gallons in 1938, 70,279,818 gallons in 1939, and 74,627,712 gallons in 1940.

During the periods of time herein mentioned respondent operated six bulk plants in the Detroit Metropolitan Area. Delivery of gasoline to these bulk plants was made from the River Rouge marine terminal by tank car or transport truck. Tank-car delivery by railroad was for the most part discontinued about February 1, 1940. Transportation of gasoline by transport truck was accomplished by transportation companies employed by the respondent. The capacity of a transport truck is approximately the same as a tank car. In some instances the respondent has shipped gasoline and other petroleum products from its refinery at Whiting, Indiana, directly to purchasers thereof located in the Detroit Metropolitan Area. Respondent maintains, and at all times mentioned herein has maintained, a course of trade in said products in commerce among and between the various states of the United States.

222 Paragraph Three: Prior to September 10, 1936, respondent operated all retail service stations owned or leased by it in the Detroit metropolitan area, but on that date it discontinued all retail operations and leased or sublet all stations owned or leased by it to independent operators.

In the course and conduct of its business in the Detroit metropolitan area, the respondent, since September 10, 1936, has regularly supplied gasoline to approximately 358 retail service stations. Respondent owned approximately 200 and leased 8 of these stations. The remaining 150 stations which were supplied directly by the respondent were owned or operated by independent operators, with whom the respondent entered into written agreements known as "Dealer's Agreement, Form 461," by which agreements respondent agreed to sell, and the dealers agreed to purchase, all of their requirements of Solite with Ethyl, Standard Red Crown, and Stanolind gasoline for the period of time specified in said agreements. These latter stations were known as contract service stations as distinguished from the leased service stations hereinabove described.

Deliveries of gasoline to the leased and contract service stations in the Detroit metropolitan area were made from respondent's bulk plants by tank trucks owned by respondent and operated by its salaried employees. This method of delivery is known as "tank-wagon" delivery. The price at which respondent sold its gasoline to said leased and contract service stations was its "posted tank-wagon price," which was fixed from time to time by the general office of the respondent in Chicago.

In addition, the respondent also supplied gasoline to four dealers in the Detroit metropolitan area—Citrin-Kolb Oil Company, Stikeman Oil Company, Inc., Wayne Oil Company, and Ned's Auto Supply Company, which were classified by respondent as jobbers and which, with the exception of Ned's Auto Supply Company, supplied respondent's gasoline to from 94 to 106 retail service sta-

tions. Deliveries to these dealers were generally made by tank car, and after February 1, 1940, by transport truck, direct from respondent's River Rouge terminal.
223 During the periods of time hereinafter described, the Citrin-Kolb Oil Company, Stikeman Oil Company, Inc., and Wayne Oil Company sold a substantial portion of the gasoline purchased by them from the respondent direct to the public through retail service stations owned and operated by them. Ned's Auto Supply Company was engaged entirely in the retail sale of gasoline to the public through its own stations.

A third class of customer in the Detroit Metropolitan area to whom the respondent supplied gasoline was large commercial users of gasoline, who were usually sold on contracts made by the general office of the respondent in Chicago. The gasoline so purchased was usually delivered either direct from the Whiting refinery or the River Rouge terminal by tank car or transport truck.

Paragraph Four: In the course and conduct of its business, since June 19, 1936, respondent has discriminated in price by selling its gasoline for resale direct to the purchasing public to Citrin-Kolb Oil Company, Stikeman Oil Company, Inc., and Wayne Oil Company, and subsequent to March 7, 1938, to Ned's Auto Supply Company, at prices which were substantially lower than the prices charged by respondent to its other retailer-purchasers in the Detroit metropolitan area for gasoline of the same grade and quality. Each of the aforesaid purchasers has, since said date, owned or operated in the Detroit metropolitan area one or more gasoline stations where said respondent's gasoline so purchased has been resold at retail to consumers thereof in competition with other retailers of gasoline purchasing the same from the respondent or from other manufacturers. The respondent sold its largest selling brand, Red Crown gasoline, to said four jobbers at its tank-car price, which was 1½ cents per gallon lower than the prices charged by it for the same gasoline to its other retail dealers in the Detroit metropolitan area.

Paragraph Five: In allowing jobber classification in the Detroit metropolitan area to the four jobbers hereinbefore named, the respondent required only that said jobbers purchase substantial quantities of gasoline, own or control bulk plants where gasoline in large quantities

224 could be delivered, and have sufficient financial standing or credit rating to warrant the extension of credit. There was no requirement that said jobbers should sell only at wholesale.

The Citrin-Kolb Oil Company, although selling the respondent's gasoline direct to the consuming public, was nevertheless classified by the respondent as a jobber in 1928 or 1929 and since that it has been allowed the tank-car price on gasoline purchased from respondent. It operated from 1 to 5 retail stations from 1936 to 1939, from 5 to 8 stations in 1940 and 1941, and is operating 5 retail service stations at the present time. During this time it purchased from the respondent in excess of 5,000,000 gallons of gasoline annually. The percentage of gasoline so purchased which was sold at retail by Citrin-Kolb Oil Company through its retail service stations was 29.4 percent in 1936, 15.4 percent in 1937, 7.3 percent in 1938, 10.1 percent in 1939, and 6.5 percent in 1940. During the period from January 1, 1938, to December 31, 1940, Citrin-Kolb Oil Company sold a million gallons of gasoline annually to Langer and Cohn, retail service station operators, at 1 cent per gallon off tank-wagon price and in addition sold another retail service station operator at ½ cent per gallon off tank-wagon price. For a short period of time Citrin-Kolb Oil Company issued "Special Savings Cards," which entitled the holders to a 2-cents-per-gallon discount on the purchase of gasoline from one of the retail service stations operated by it.

The Wayne Oil Company, although selling the respondent's gasoline direct to the consuming public, was nevertheless classified by respondent as a jobber in 1935 and since that time it has been allowed the tank-car price on all gasoline purchased from respondent. Prior to September 8, 1939, the Wayne Oil Company operated no retail service stations but subsequent thereto has operated from 2 to 6 stations and is operating 2 stations at the present time. During this period its annual purchases of gasoline from respondent have ranged from 1,348,348 gallons in 1936, to 2,341,394 gallons in 1940. The percentage of gasoline so purchased which was sold at retail by the Wayne Oil Company through its retail service stations was 7.6 percent in 1939 and 14.2 percent in 1940. There is no evidence that the Wayne Oil Company ever sold gasoline to resellers at

a price lower than the posted tank-wagon price charged
225 by respondent to its dealers or that any discount was
allowed to purchasers by any retail service station operated by it.

The Stikeman Oil Company, Inc., although selling the respondent's gasoline direct to the consuming public was nevertheless classified by respondent as a jobber in 1932 and since that time it has been allowed the tank-car price on all gasoline purchased from respondent. In 1938 the Stikeman Oil Company, Inc., discontinued the operation of retail service stations. Since 1936 its annual purchases of gasoline from the respondent have ranged from 2,255,000 gallons in 1936 to 1,772,911 gallons in 1940. The percentage of gasoline so purchased which was sold at retail by the Stikeman Oil Company, Inc., through retail service stations operated by it was 27.8 percent in 1936, 9.1 percent in 1937, and 0.3 percent in 1938. There is no evidence that this company ever sold gasoline to resellers at a price lower than posted tank-wagon price charged by respondent to its dealers or that any discount was allowed to purchasers by any retail service station operated by it.

Ned's Auto Supply Company was classified by respondent as a jobber on March 7, 1938, and since that time it has been allowed the tank-car price on all gasoline purchased from the respondent. Ned's Auto Supply Company does not sell other resellers of gasoline but has at all times sold the gasoline purchased from the respondent to the public through its own service stations. In 1938 Ned's Auto Supply Company operated 5 retail service stations, which was increased to 6 in 1940. In addition, Ned's Auto Supply Company operates a station known as "Charley's Service Station," which is owned by Ned's Auto Supply Company and operated by an individual on a salary-and-commission basis. At all times since March 7, 1938, it has been the practice of Ned's Auto Supply Company to sell its gasoline below the prevailing retail service-station price or to give premium and discounts from its posted price.

Paragraph Six: In addition to the discriminations in price hereinabove described, the respondent, in the course and conduct of its business during the period from September 1, 1936, to March 7, 1938, sold its gasoline to Ned's
226 Auto Supply Company at 5 cents per gallon less than
the price that it was charging for the same gasoline to its other retail dealers in the Detroit metropolitan area.

Since 1918 Ned's Auto Supply Company has been a customer of respondent and until March 7, 1938, received its gasoline from respondent by regular tank-wagon delivery. In 1936 Ned's Auto Supply Company purchased 2,401,600 gallons of gasoline from the respondent, which it resold to the public through its four retail outlets or service stations. On September 1, 1936, respondent allowed Ned's Auto Supply Company a price of .5 cents off regular tank-wagon price, which was allowed on all gasoline purchased from September 1, 1936, until March 7, 1938. When respondent allowed this price differential, it made no change in its form of delivery of gasoline to Ned's Auto Supply Company but continued to sell it on the regular tank-wagon basis, making delivery from respondent's bulk plants direct to Ned's Auto Supply Company service stations.

Paragraph Seven: Citrin-Kolb Oil Company, Wayne Oil Company and Stikeman Oil Company, Inc., sell the respondent's gasoline at both wholesale ~~and retail~~. Citrin-Kolb Oil Company, Wayne Oil Company and Stikeman Oil Company, Inc., although selling a substantial portion of respondent's gasoline direct to the consuming public were nevertheless arbitrarily classified by the respondent as jobbers and ~~as~~ such received from the respondent a lower price on gasoline than the respondent charged its other retail customers in the metropolitan Detroit area who purchased gasoline of like grade and quality direct from the respondent.

Ned's Auto Supply Company, although selling all of its gasoline purchased from the respondent at retail direct to the consuming public was nevertheless arbitrarily classified by the respondent as a jobber and as such received from the respondent a lower price on gasoline than the respondent charged its other retail customers in the metropolitan Detroit area who purchased gasoline of like grade and quality direct from the respondent.

Paragraph Eight: The volume of gasoline sold in the Detroit metropolitan area through retail gasoline stations is more or less constant, and fluctuations that occur are chiefly due to variation in the number of cars in use from year to year. A lower price at one service station than at another is an important factor in the purchasing public's mind, particularly when the difference in price occurs in the major brands of gasoline. Any difference in price between two stations selling the same gasoline or major brands of gasoline is very important in influencing the flow of business.

227 The margin of profit of the retail service-station operator between the tank-wagon price which he pays and the prevailing retail service-station price on the regular brand of gasoline of major companies is small. The retailer's margin between respondent's posted tank-wagon price and prevailing retail selling price on its Red Crown gasoline has been only 3.3 cents a gallon in the metropolitan area of Detroit since November 19, 1939. Consequently, any reduction allowed to a retail service-station operator below the regular tank-wagon price gives such operator a material advantage over other retail operators who pay the full tank-wagon price.

In 1936 Ned's Auto Supply Company had four retail stations and its gasoline volume was 2,401,000 gallons. On September 1, 1936, respondent began to sell gasoline to Ned's Auto Supply Company at .5 cents per gallon below posted tank-wagon price by tank-wagon delivery. In 1937 Ned's Auto Supply Company was openly advertising cut prices, and its volume increased to 4,240,500 gallons.

On March 7, 1938, Ned's Auto Supply Company began to purchase from respondent in tank-car quantities at tank-car prices. Although the total volume of gasoline sold in the Detroit metropolitan area during the year 1938 was 10 percent less than the volume sold in 1937, the volume of gasoline sold by Ned's Auto Supply Company increased from 4,240,500 gallons in 1937 to 4,880,500 gallons in 1938.

In 1937 Ned's Auto Supply Company was selling respondent's Red Crown gasoline to the public at approximately 2 cents per gallon below the prevailing retail service-station price, which continued, with variations, until the latter part of 1939. In 1939 and 1940, when Ned's Auto Supply Company's posted price was approximately the same as the prevailing retail price, it gave various undercover discounts and premiums. It has from time to time given commercial discounts varying from 1 to 2 cents per gallon off the posted price. The classification as to who was regarded a commercial customer varied from time to time, depending upon the competitive situation. During August to November 1939 Ned's Auto Supply Company issued trading stamps of a value of 2 cents for each gallon purchased, which were redeemable in merchandise or in gasoline at Ned's Auto Supply Company's stores. Price cutting at Ned's Auto Supply Company's stations has been almost continuous, and this company has been responsible in starting most of the retail price cutting in major-brand gasoline in Detroit over a period of several years. This practice on the part of Ned's Auto Supply Company has caused substantial damage to other retail service-station operators selling respondent's Red Crown gasoline and also to retail service-station operators 228 selling other brands of gasoline, and the ability of Ned's Auto Supply Company to continue the price-cutting practice was greatly enhanced through the discriminations in price allowed it by the respondent while at the same time limiting other retailer-customers to a margin of profit of approximately 3.3 cents per gallon.

The Citrin-Kolb Oil Company annually sold at retail from 6.5 percent to 29.4 percent of the gasoline purchased from respondent through service stations operated by it during the years 1936 to 1940. In 1938 or 1939 the Citrin-Kolb Oil Company gave discount cards to purchasers of gasoline at one of the stations operated by it entitling the holder to a discount of 2 cents a gallon on respondent's Red Crown gasoline.

The Commission finds that the price discriminations granted by the respondent to Ned's Auto Supply Company, both prior to March 7, 1938, and subsequent thereto, and the price discriminations granted to Citrin-Kolb Oil Company, Wayne Oil Company and Stikeman Oil Company, Inc., on gasoline sold by them at retail have given a substantial competitive advantage to these favored dealers in their retail operations over other retailers of gasoline, including retailer-customers of the respondent. This competitive advantage is capable of being used, and by Ned's Auto Supply Company and to some extent by Citrin-Kolb Oil Company has been used, to divert large amounts of business from other retailers of gasoline, including customers of the respondent, with resultant injury to them and to their ability to continue in business and successfully compete with said dealers in the retailing of gasoline.

The Commission further finds that the discriminations in price allowed to Citrin-Kolb Oil Company permitted this dealer to sell a million gallons of gasoline annually to one retailer-customer—Langer and Cohn—from January 1, 1938, to December 31, 1940, at a delivered price of one cent per gallon less than posted tank-wagon price and to sell another customer at a discount of one-half cent per gallon. The Citrin-Kolb Oil Company, by passing on in part to Langer and Cohn the benefits of the discriminatory prices allowed by respondent, enabled said Langer and 229 Cohn to sell said gasoline to the consuming public at discounts of as much as two cents per gallon, which not only gave said Langer and Cohn a competitive advantage over other retailers of gasoline, including retailer-customers of the respondent, but also had the effect of diverting business from such retailers to said Langer and Cohn and of substantially lessening competition and injuring, destroying, and preventing competition between said Langer and Cohn and other retailers of gasoline, including retailer-customers of the respondent.

The Commission further finds that the effect of the discriminations in price allowed by the respondent to the four dealers as herein described has been, and may be, substantially to lessen competition and to injure, destroy, and prevent competition with each of said four dealers and with their respective customers in the resale of gasoline.

Paragraph Nine: As a defense to this proceeding the respondent introduced a series of exhibits (Respondent's Exhibits 31-A to Q), with supporting testimony, to show cost justification for the price differentials allowed Ned's Auto Supply Company for the period from September 1, 1936, to March 7, 1938.

The Commission finds that the evidence submitted by the respondent fails to establish that the price differential allowed by respondent to Ned's Auto Supply Company of .5 cents per gallon during the period from September 1, 1936, to March 7, 1938, made only due allowance for differences in respondent's cost of sale and delivery resulting from the differing methods and quantities in which it sold its gasoline to Ned's Auto Supply Company during the period involved. The following are a few of the features of respondent's cost justification which warrant its complete rejection as defense in the proceeding:

a. Respondent has attempted to make a comparison between the cost of doing business with Ned's Auto Supply Company and the cost of doing business with all of its other reseller-customers as a group. This fails to take into consideration the fact that the respondent's reseller-customers fall into several groups, such as service stations owned by respondent and leased to operators, stations leased by respondent and sublet to operators, 230 and independently owned stations to which respondent supplied gasoline. The costs of doing business would vary between these various groups. Furthermore, there were independent stations, transactions of which with respondent were comparable to those of Ned's Auto Supply Company, and comparison of the costs of these stations and Ned's Auto Supply Company would necessarily show a different result than that shown through respondent's having combined all kinds and types of its reseller stations.

b. Respondent has attempted to make a comparison between the costs of single-dump and multiple-dump deliveries. This is based upon the assumption that all deliveries made to Ned's Auto Supply Company were by single-dump delivery and all deliveries to respondent's other reseller customers by multiple-dump delivery. However, the respondent did not make full-load or single-dump deliveries in all cases to Ned's Auto Supply Company during the period involved but, instead, made both single-and-multiple-dump deliveries. There were also a substantial number of retail service stations located in the Detroit metropolitan area with tank capacity sufficient to take single-load deliveries, and a substantial number of single-load deliveries were made to such stations at respondent's regular tank-wagon price during the period involved.

c. Respondent attempted to segregate certain items of sales expense as not being influenced by Ned's Auto Supply Company and allocated them among all of respondent's other reseller-customers, with no charge being made against Ned's Auto Supply Company; for example, it was contended that when an account, such as Ned's Auto Supply Company, has been established, no further promotional sales work is necessary and should not be charged to such account. Among such items which respondent did not charge to Ned's Auto Supply Company were certain sales promotional services, such as driveway training, which is furnished to reseller-customers but which was not desired by, or furnished to, Ned's Auto Supply Company.

In addition to the fact that certain promotional advertising should be charged to Ned's Auto Supply Company, it
further appears from the evidence that there are other
231 reseller-customers of the respondent whose accounts
have been established and who do not require driveway training.

d. Respondent attempted to segregate certain items of expense of an overhead nature as not being influenced by Ned's Auto Supply Company, on the theory that such expenses would not be appreciably influenced by the acquisition or loss of a single account, such as Ned's Auto Supply Company, and, consequently, that it is proper to charge no part of these expenses to the business of Ned's Auto Supply Company. The reason for not charging any of such items to the business of Ned's Auto Supply Company would apply equally to the business of any other single retail service station.

e. There were certain other items of cost on which it was claimed by respondent that no exact allocation could be made, and, as to such items, the respondent apportioned them among its retail customers, exclusive of Ned's Auto Supply Company, instead of allocating these costs on the basis of gallonage, which would have afforded no cost differential.

f. Respondent has included in its cost items certain items of expense in connection with stations owned or leased by the respondent which were leased or sublet to the station operator. Many of these costs apply directly to the landlord activities of the respondent and are not properly chargeable to, or considered as, costs of sale or delivery.

g. In allocating the sales expense of certain salesmen who called on Ned's Auto Supply Company and other retail service stations, respondent attempted to estimate the time spent at Ned's Auto Supply Company and compare the costs so determined as against all salesmen's costs, including salesmen who did not confine their activities solely to the Detroit metropolitan area. Furthermore, in estimating the time of the particular salesmen who called on Ned's Auto Supply Company, no consideration was given to the time which such salesmen spent in calling on service stations which were not customers of the respondent.

h. The respondent allocated advertising expense in
232 such a manner as to show an alleged savings of .213
cents per gallon, or better than 40 percent of the price differential. In doing this, the respondent allocated the

items of point-of-sale advertising which were supplied to Ned's Auto Supply Company, such as service signs, globes, banners, games, and displays, by charging the cost of some directly and assigning others on the basis of outlets and arrived at the cost per gallon of these particular items by relating it to gallonage sold at Ned's Auto Supply Company. All other advertising costs were allocated to the gallonage of all reseller-customers, exclusive of Ned's Auto Supply Company. The advertising so charged consisted principally of advertising issued by the respondent for the purpose of creating consumer acceptance and increasing the sale of gasoline at all Standard stations, such as newspaper advertising, printed and direct-mail advertising, motion pictures, and outdoor signs. Such advertising was for the benefit of Ned's Auto Supply Company, as well as all other customers, and should accordingly have been allocated to Ned's Auto Supply Company, as well as to other customers, on a gallonage basis, in which event there would have been no cost differential to such items.

Paragraph Ten: As a further defense to this proceeding, respondent contended that the differential between the price of 1½c per gallon off tank-wagon price charged Citrin-Kolb Oil Company, Stikeman Oil Company, Inc., Wayne Oil Company, and Ned's Auto Supply Company and the tank-wagon price charged respondent's other retail dealers made only due allowance for differences in respondent's costs of sale and delivery resulting from the differing methods and quantities in which gasoline was sold and delivered to said jobbers.

Respondent first attempted to show justification of differential of 1½ cents per gallon between the tank-car and tank-wagon price by introducing evidence as to a survey made in the Kansas-Oklahoma field to show cost of selling jobbers, the results of which were compared with the cost of sale and delivery of gasoline by tank-wagon in the entire Detroit division. There is no evidence that the costs of sale and delivery by tank car to jobbers in the Kansas-Oklahoma field were the same or were substantially the same as, or have any relation to, the costs of sale and delivery of gasoline by tank car to jobbers in the De-
233 troit metropolitan area. In fact, the evidence indicates
that the costs of the jobber operations in the Kansas-Oklahoma field were not comparable with the jobber operations in the Detroit field. The volume sold was not comparable with the Detroit sales and the total annual sales to

jobbers in the Kansas-Oklahoma field were less than the annual sale to one jobber, Citrin-Kolb Company, in Detroit, and several of these jobbers purchased less gasoline annually than is sold at an average service station in Detroit. The tabulation of jobber expense in the Kansas-Oklahoma field includes no items of consumer acceptance advertising expense charged to such jobber operations, which is substantial in the Detroit metropolitan area. Furthermore, the cost computations for the Kansas-Oklahoma field do not reflect the true conditions or give a factual result since the gallonage sold to two jobbers, Gibson Oil Company and Kramer Oil Company, that handled nearly one half the gallonage sold in that field, was excluded in computing accounting and credit costs and included in computing supervision and selling costs.

In determining the costs of tank-wagon deliveries in the Detroit metropolitan area for the purpose of comparison with jobber costs in Kansas and Oklahoma, respondent used the total marketing costs for the entire Detroit field which were allocated to the reseller channel and leased service stations in its "Comparative Statement of Expense," known as "Form 189." Respondent divided the total marketing costs so allocated by the total reseller gallonage to arrive at the cost per gallon of sale and delivery in tank-wagon deliveries. This Comparative Statement of Expense is an expense record for the Detroit field prepared from time to time in respondent's regular course of business. Said form represents a breakdown of marketing expense between the channels of distribution, which are reseller channel, consumer channel, leased service stations, and other methods. The consumer channel is also known as the "direct-shipment channel" and includes deliveries to large industrial users of gasoline made either direct from the Whiting refinery or the River Rouge terminal. Such shipments usually originate with sales contracts made by the general office of the respondent on a bid basis. Shipments to jobbers were included in the consumer or direct-shipment channel in respondent's usual ac-
234 counting procedure. The respondent did not consider it necessary for its purpose to isolate the cost of the direct-shipment channel, which included sales to jobbers. Consequently, none of the expense allocations made on Form 189 are charged to either the direct-shipment channel or to the business done with jobbers, but, instead, such expense is distributed or scattered over the various chan-

nels appearing on said form. While this Comparative Statement of Expense may be considered by the respondent as sufficient to reflect company operations, the figures taken therefrom cannot properly reflect the cost of tank-wagon sales as compared with jobber sales. There are numerous items of cost which have been allocated to the reseller channel, a substantial portion of which should have been charged to jobber gallonage and, if so charged, would have substantially reduced the cost of reseller operation and in turn reduced the differential in cost between tank-wagon and jobber costs.

The Commission find that the attempted comparison between cost of jobber operations in the Kansas-Oklahoma field with cost of sale and delivery to dealers in the Detroit field taken from its Comparative Statement of Expense has no probative value in determining the cost differential between tank-car sales to jobbers and tank-wagon sales to dealers in the Detroit metropolitan area.

Paragraph Eleven: In a further effort to show cost justification for the price differential of 1½ cents off tank-wagon price allowed to Citrin-Kolb Oil Company, Stikeman Oil Company, Inc., Wayne Oil Company, and Ned's Auto Supply Company, the respondent attempted to segregate the cost appearing on its Comparative Statement of Expense and to reallocate such costs to the reseller and jobber channels. For this purpose respondent prepared a modified form of its regular Comparative Statement of Expense showing costs allocated to jobbers, as well as to tank-wagon resellers, which was introduced into evidence as Respondent's Exhibit 101, together with explanation as to methods used, which was introduced as Respondent's Exhibits 99 and 100.

After consideration of the modified form of re-
235 spondent's Comparative Statement of Expense and
other exhibits and testimony submitted in connection therewith, the Commission finds that the evidence submitted by the respondent fails to establish that the price differential allowed by respondent to the above-named jobbers of 1½ cents per gallon off tank-wagon price made due allowance for differences in respondent's costs of sale and delivery resulting from differing methods and quantities in which it sold its gasoline to said jobbers. The following are a few of the features of respondent's cost justification which warrants its complete rejection as a defense in this proceeding:

a. In making this cost study the respondent did not limit its survey to cost differences which resulted from differing methods or quantities in which gasoline was sold or delivered to the two classes of customers nor was it limited to determining savings, if any, which accrued by reason of tank-car or transport-truck delivery as compared with tank-wagon delivery, but, instead, the respondent attempted to compare the cost of doing business with the one class as compared with the other by arbitrarily allocating all of respondent's costs of every nature which could be charged to the expense of doing business in the Detroit field, including Chicago general office costs allocated to that field.

b. Respondent has compared the cost of marketing to the four jobbers located in the Detroit metropolitan area, whose business was confined to that area, with the cost of marketing gasoline to all its other dealers in the Detroit field. The Detroit metropolitan area includes the City of Detroit and the suburbs of Dearborn, Hamtramck, and Highland Park. The Detroit field includes the rural section located outside the Detroit metropolitan area, including Lansing, Pontiac, and Ann Arbor, where different methods of delivery are involved since the rural section is supplied by small bulk plants operated by commission agents known as "B" stations as distinguished from the large bulk plants used to serve the Detroit metropolitan area operated by salaried employees and known as "A" stations. No factual costs study or investigation was made to determine the relation of sale and delivery costs in the entire 236 Detroit metropolitan field to those in the restricted Detroit metropolitan area. In fact, there is substantial evidence indicating that respondent's cost of marketing gasoline to service stations in the rural areas of the Detroit field through commission agents is higher than its cost of marketing through it large bulk plants to service stations in the Detroit metropolitan area.

c. In allocating cost items to the tank-wagon reseller channel and the jobber channel, the respondent charged to the tank-wagon reseller channel a number of items which should not have been charged to that particular channel and failed to charge to the jobber channel cost items properly chargeable to that channel.

d. For the purpose of this cost study, respondent has determined the expense on leased service stations which involve landlord operations only and has carried such expense, after deducting income from rentals, into the general tank-wagon delivery expense allocated to the tank-wagon reseller channel. In fact, the landlord expense incident to the operation of respondent's leased service stations was carried separately in respondent's regular accounting procedure, as this expense has no bearing on the cost of marketing gasoline through the regular reseller channel but represented cost of maintenance, taxes, etc., on company-owned or leased service stations less revenue received, without consideration of the sale of gasoline or the expenses incident thereto.

e. It further appears from respondent's cost study that direct-shipment expense has been allocated for the most part on the basis of effort, while the allocation to the tank-wagon reseller channel has been made for the most part on the basis of gallonage except in accounts where allocation was made on the basis of effort in respondent's regular accounting procedure. The use of these two methods of allocation appears to be inconsistent, and the comparative results obtained do not properly reflect the difference in cost of sale and delivery between the tank-wagon and jobber channel.

f. While advertising comprises the largest single item of expense, only a small proportion, consisting of point-of-sale advertising, has been allocated between the tank-
237 wagon and jobber channel. The remaining advertising expense, commonly known as "consumer advertising," such as newspaper and billboard advertising, was improperly allocated to the tank-wagon channel alone and no part charged to the jobber channel. Consumer advertising costs cannot properly be separated between gasoline resold through jobber-operated retail stations and gasoline sold through other retail stations except upon the basis of gallonage, which, if used, would afford no cost differential.

Paragraph Twelve: As a further defense the respondent contends that the differential of ½¢ off tank wagon price allowed Ned's Auto Supply Company from September 1, 1936, to March 7, 1938, and the differential of 1½¢ off tank wagon price allowed Citrin-Kolb Oil Company, Wayne Oil Company and Stikeman Oil Company since June 19, 1936, and the differential of 1½¢ off tank wagon price allowed Ned's Auto Supply Company from March 7, 1938, were all made in good faith to meet equally low or lower prices of competitors.

In support of this defense the respondent introduced evidence of competitive offers received by the four dealers from distributors of both major and minor brands of gasoline. Some of these offers were made prior to June 19, 1936, and some were made subsequent to June 19, 1936. Of those offers made subsequent to June 19, 1936, some were made after the filing of the complaint herein. In further support of this defense the respondent contended that the lower prices allowed the four dealers were made in good faith to meet an equally low price of a competitor for the reason that said four dealers could at any time herein involved have purchased gasoline of grade and quality comparable to that sold by the respondent at equally low or lower prices from other suppliers in Detroit.

Based on the record in this case the Commission concludes as a matter of law that it is not material whether 23 the discrimination in price granted by the respondent to the said four dealers were made to meet equally low prices of competitors. The Commission further concludes as a matter of law that it is unnecessary for the Commission to determine whether the alleged competitive prices were in fact available or involved gasoline of like grade or quality or of equal public acceptance. Accordingly the Commission does not attempt to find the facts regarding those matters because, even though the lower prices in question may have been made by respondent in good faith to meet the lower prices of competitors, this does not constitute a defense in the face of affirmative proof that the effect of the discrimination was to injure, destroy and prevent competition with the retail stations operated by the said named dealers and with stations operated by their retailer-customers.

Prior to June 19, 1936, the effective date of the Robinson-Patman amendment, Section 2 of the Clayton Act declared discriminations in price to be unlawful when the effect of such discriminations may be substantially to lessen competition or create a monopoly, with provisos permitting, among other things, discriminations in price "in the same or different communities made in good faith to meet competition". Under that proviso a discrimination in price made in good faith to meet competition might under proper circumstances have been a complete defense to a charge of unlawful price discrimination.

In framing the Robinson-Patman Act Congress recog-

nized that the provision in Section 2 of the Clayton Act permitting discriminations in good faith to meet competition was indefinite and uncertain and had the effect of weakening Section 2. Consequently Congress discarded the proviso in Section 2 which made the meeting of competition in good faith a complete or absolute justification and made price differences due to differences in cost, market changes and marketability of the goods the only absolute justifications now available to a respondent charged with unlawful price discrimination. Section 2 (a) of the Clayton Act as amended by the Robinson-Patman Act contains no reference to lower prices made in good faith to meet competition. That matter was covered by Congress
through a proviso in Section 2 (b), and such proviso
239 was "intended to operate only as a rule of evidence
in a proceeding before the Federal Trade Commission".[*]

A prima facie case of violation of Section 2(a) may be established by providing (1) jurisdiction, (2) goods of like grade and quality, and (3) discrimination in price. Discrimination in price here was shown by proving a difference in the prices charged competing customers. Based upon the prima facie case thus shown the Commission may draw from such prima facie case a rebuttable presumption that the effect of such discrimination may be to substantially lessen competition or tend to create a monopoly or to injure, destroy or prevent competition. The burden then shifts to the respondent.

In rebuttal of the prima facie case the respondent under Section 2(b) may show that the respondent's lower price was made in good faith to meet an equally low price of a competitor. However, such a showing is not an absolute defense to a charge of unlawful discrimination and proof of meeting a competitor's equally low price can be availed of only to the extent it may rebut the prima facie case. The meeting of an equally low price of a competitor in good faith is not a defense to a charge of price discrimination where competitive injury is affirmatively shown and so replaces the rebuttable presumption of the prima facie case. This results from the difference between such a case and the prima facie case referred to in Section 2(b). Section 2(b) defines a prima facie case as "* * * proof * * * that there has been discrimination in price * * *".

---

[*] Congressional Record, June 8, 1936, p. 9410.

This definition must be compared with the prohibitions of Section 2(a) which makes such a discrimination unlawful only in the event it injuriously affects competition. If proof of good faith in meeting an equally low price of a competitor is made, then Commission could no longer rely upon its prima facie case, but must show additional and affirmative evidence that the effect of the discrimination may be to substantially lessen competition or tend to create a monopoly or to injure, destroy or prevent competition between respondent and its competitors or between customers of the respondent or with the customers of such customers. Where such injurious effect on competition is affirmatively proved, the proof made as to meeting an equally low price of a competitor under the proviso of Section 2(b) does not constitute a substantive justification or defense.

The respondent may also introduce evidence in support of its affirmative defense tending to establish that the effect of the differential in price is not to substantially
240 lessen competition or tend to create a monopoly or to
injure, destroy or prevent competition with customers of the person granting the discrimination or competition with persons knowingly receiving the benefit thereof. The respondent may also show in support of its justifications (1) that the differential proved makes only due allowances for differences in cost resulting from the differing methods or quantities sold or delivered; (2) that the differentials were the result of price changes in response to changing conditions affecting the market for or the marketability of the goods concerned. The establishment of any such contentions would preclude any conclusion that the law had been violated.

The provision for a showing of good faith to meet an equally low price of a competitor cannot be construed as a carte blanche exemption to a respondent to engage in discriminations in price which have the adverse effects on competition proscribed under Section 2(a). Such a construction would constitute recognition of the soundness of the principle that one competitor's violation of law justifies its violation by another. It would also justify discrimination by a chain organization to meet the equally low price of a single unit competitors who had not discriminated at all as well as discrimination to meet the price of any competitor whose discrimination is lawful because justified by cost differences. It would defeat the substantive purposes and requirements of Section 2(a) in such situations as well as in the present case, where discrimination to meet the equally low prices of a competitor has produced the adverse effects on competition which it was the main purpose of the section and of the Act to prevent.

Paragraph Thirteen: Since the record in this case affirmatively shows that the discriminations in price in favor of the named jobbers and in favor of Ned's Auto Supply Company as a tank-wagon purchaser from September 1, 1936, to March 7, 1938, and as a tank-wagon purchaser thereafter, have resulted in injuring, destroying, and preventing competition between said favored dealers and retail dealers in respondent's gasoline and other major brands of gasoline, the Commission is of the opinion, and so finds, that the defense of meeting an equally low price of a competitor as provided by subsection (b) of Section 2 of the Clayton Act is not available to the respondent on the basis of the present record.

Conclusion.

The aforesaid discriminations in price by the respondent, as herein found, constitute violations of subsection (a)
of Section 2 of an Act of Congress entitled, "An Act
241 to supplement existing laws against unlawful restraints
and monopolies, and for other purposes" approved
October 15, 1914 (Clayton Act), as amended by an Act of
Congress approved June 19, 1936 (Robinson-Patman Act).

ORDER TO CEASE AND DESIST.

This proceeding having been heard by the Federal Trade Commission upon the complaint of the Commission as amended, answer of the respondent, testimony and other evidence in support of the allegations of said complaint as amended and in opposition thereto taken before a trial examiner of the Commission theretofore duly designated by it, report of the trial examiner upon the evidence and exceptions filed thereto, briefs in support of the complaint and in opposition thereto, and oral argument of counsel; and the Commission having made its findings as to the facts and its conclusion that respondent has violated the provisions of subsection (a) of Section 2 of an Act of Congress entitled, "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914 (Clayton Act), as amended by Act approved June 19, 1936 (Robinson-Patman Act);

It Is Ordered that the respondent, Standard Oil Company, a corporation, and its officers, representatives, agents, and employees, directly or through any corporate or other device in connection with the sale of gasoline in commerce as "commerce" is defined in the aforesaid Clayton Act, do forthwith cease and desist from discriminating, directly or indirectly, in the price of such gasoline of like grade and quality as among purchasers:

243 1. By selling such gasoline of like grade and quality

to competing purchasers at different prices in the manner and under the circumstances found in Paragraph Four of the aforesaid findings as to the facts and conclusion.

2. By continuing or resuming the discriminations in price referred to and described in Paragraph Four of the Commission's findings as to the facts herein.

3. By otherwise discriminating in price between purchasers of gasoline of like grade and quality in a manner and degree substantially similar to the manner and degree of the discriminations referred to in Paragraph Four of the Commission's findings as to the facts herein, and in any other manner resulting in price discriminations substantially equal in amount to such discriminations.

4. By selling such gasoline to some retailers thereof at prices different from the prices charged other retailers who in fact compete in the sale and distribution of such gasoline; provided, however, that this shall not prevent price differences of less than .5 cents per gallon which do not tend to lessen, injure, or destroy competition among such retailers.

5. By allowing a lower price to any dealer, jobber, or wholesaler on gasoline sold by such dealer, jobber, or wholesaler at retail, than the price which respondent charges its retailer-customers who in fact compete in the sale and distribution of such gasoline with such dealers, jobbers, or wholesalers in their retailing activity; provided, however, that this shall not prevent price differences of less than .5 cents per gallon which do not tend to lessen, injure, or destroy competition with such dealers, jobbers, or wholesalers in the sale of gasoline direct to the consuming public.

6. By selling such gasoline to any dealer, jobber, or wholesaler at a price lower than the price which respondent charges its retailer-customers who in fact compete in the sale and distribution of such gasoline with the retailer-
244 customers of such dealers, jobbers, or wholesalers,
where such dealers, jobbers or wholesalers resell such gasoline to any of its said retailer-customers at less than respondent's posted tank-wagon price or who directly or indirectly grant to any such retailer-customer any discounts, rebates, allowances, services or facilities having the net effect of a reduction in price to the retailer.

For the purpose of comparison the term "price" as used in this order takes into account discounts, rebates, allowances, and other terms and conditions of sale.

It Is Further Ordered that the respondent shall, within sixty (60) days after service upon it of this order, file with the Commission a report in writing, setting forth in detail the manner and form in which it has complied with this order.

By the Commission.

MOTION TO MODIFY ORDER TO CEASE AND DESIST.

Come Now W. T. Kelley, Chief Counsel, and Walter B. Wooden, Assistant Chief Counsel, of the Federal Trade Commission, and move that the order to cease and desist entered herein by the Commission on October 9, 1945 be modified so that it would read as follows:

This proceeding having been heard by the Federal Trade Commission upon the complaint of the Commission as amended, answer of the respondent, testimony and other evidence in support of the allegations of said complaint as amended and in opposition thereto taken before a trial examiner of the Commission theretofore duly designated by it, report of the trial examiner upon the evidence and exceptions filed thereto, briefs in support of the complaint and in opposition thereto, and oral argument of counsel; and the Commission having made its findings as to the facts and its conclusion that respondent has violated the provisions of subsection (a) of Section 2 of an Act of Congress entitled, "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914 (Clayton Act), as amended by Act approved June 19, 1936 (Robinson-Patman Act);

It Is Ordered that the respondent, Standard Oil Company (Indiana), a corporation, and its officers, representatives, agents, and employees, directly or through any corporate or other device in connection with the sale of

gasoline in commerce as "commerce" is defined in the
249 aforesaid Clayton Act, do forthwith cease and desist
from discriminating, directly or indirectly, in the price
of branded gasoline of like grade and quality as among
purchasers:

1. By selling such gasoline to competing purchasers at different prices in the manner and under the circumstances stated in the findings as to the facts herein.

2. By continuing or resuming the discriminations in price of such gasoline referred to and described in the Commission's findings as to the facts herein.

3. By otherwise discriminating in price between purchasers of such gasoline in a manner and degree substantially similar to the manner and degree of the discriminations referred to and described in the Commission's findings as to the facts herein.

4. By selling such gasoline to some retailers thereof at prices different from the prices charged other retailers who in fact compete in the sale and distribution of such gasoline; provided, however, that this shall not prevent price differentials which make only allowance for differences in the cost of manufacture, sale or delivery resulting from the differing methods or quantities in which such gasoline is to such purchasers sold or delivered, and which do not tend to lessen, injure, or destroy competition among such retailers.

5. By allowing a price to any dealers, jobber, or wholesaler on such gasoline sold by such dealer, jobber, or wholesaler at retail lower than the price which respondent charges its retailer-customers who in fact compete in the sale and distribution of such gasoline with such dealers, jobbers, or wholesalers in their retailing capacity; provided, however, that this shall not prevent price differentials which make only due allowances for differences in the cost of manufacture, sale or delivery resulting from
the differing methods or quantities in which such gaso-
250 line is to such purchasers sold or delivered and which
do not tend to lessen, injure or destroy competition
with such dealers, jobbers, or wholesalers in the sale of
gasoline direct to the consuming public.

6. By selling such gasoline to any jobber or wholesaler at a price lower than the price which respondent charges its retailer-customers who in fact compete in the sale and distribution of such gasoline with the retailer-

customers of such jobbers or wholesalers, where such jobber or wholesaler resells such gasoline to any of its said retailer-customers at less than respondent's posted tank-wagon price or directly or indirectly grants to any such retailer-customer any discounts, rebates, allowances, services or facilities having the net effect of a reduction in price to the retailer; provided, however, that nothing in this paragraph shall be construed as prohibiting differentials which make only due allowance for differences in the cost of manufacture, sale or delivery resulting from the differing methods or quantities in which such gasoline is to such purchasers sold or delivered.

For the purpose of comparison the term "price" as used in this order includes discounts, rebates, allowances and other terms and conditions of sale.

It Is Further Ordered that the respondent shall, within sixty (60) days after service upon it of this order, file with the Commission a report in writing, setting forth in detail the manner and form in which it has complied with this order.

Counsel for the Commission further move that the Commission issue an order on respondent to show cause, if any it has, by written brief to be filed with the Commission on or before February 11, 1946, why said motion should not be granted, and that a copy of this motion, together with a copy of the proposed order to show cause be served upon the attorneys of record for the respondent by registered mail.

W. T. Kelley,
Chief Counsel,

ORDER TO SHOW CAUSE.

W. T. Kelley, Chief Counsel, and Walter B. Wooden, Assistant Chief Counsel, of the Federal Trade Commission, having filed with the Commission a motion that the order to cease and desist entered herein on October 9, 1945 be modified in manner and form as fully set out in said motion, and that notice of such motion be given respondent by serving a copy thereof and a copy of this order to show cause by registered mail addressed to attorneys of record for respondent, and the Commission having duly considered the matter and being now fully advised in the premises,

It Is Ordered that a copy of said motion to modify the order to cease and desist herein, together with a copy of this order to show cause, be served by registered mail upon attorneys of record for the respondent.

It Is Further Ordered that respondent show cause, if any it has, by written brief to be filed with the Commission on or before February 11, 1946, why said motion should not be granted.

By the Commission.

Otis B. Johnson,
Secretary.

MOTION FOR REHEARING AND FOR RECONSIDERATION OF ORDER TO CEASE AND DESIST.

The Standard Oil Company, respondent herein, respectfully submits that the Cease and Desist Order heretofore entered in this cause on October 9, 1945 is not in the public interest; that while the Order may temporarily bolster retail prices of certain gasolines in Detroit and hence be of brief aid to a small group of service station operators, it will overall eliminate competition, seriously disturb jobber operations, cause many jobbers to go out of business, and result in higher prices to the public. Respondent respectfully asks the Commission to reconsider the effect of this Order on all aspects of the petroleum business, the changes and developements in the industry since 1940, and the findings of fact upon which the Order is predicated. In support of this motion for rehearing and for reconsideration of the Order, respondent respectfully submits the following:

254 (Figures in parentheses refer to pages of the Record unless otherwise indicated.)

I. Far-Reaching Effect of Order.

Application of the principles enunciated in the Order throughout the Industry will lead to economic changes probably far beyond those envisaged by the Federal Trade Commission. It will result in higher prices to the consumer, it will hurt the jobber and others in the Industry, and it will restrain competition. The Order is not in the public interest.

The Order, as we understand it,

1. prohibits a supplier from allowing more than .499¢ per gallon off the suppliers' posted tank wagon price on gasoline sold "in commerce" to a "dealer, jobber or wholesaler" who resells such gasoline at retail, regardless of whether the jobber, wholesaler or dealer who resells at retail buys in tank car lots, stores in its own bulk storage facilities, delivers by tank wagon, and otherwise performs the jobber function, and

2. prohibits a supplier from selling gasoline "in commerce" to a "dealer, jobber or wholesaler" at less than

supplier's tank wagon price unless the "dealer, jobber
255 or wholesaler" resells such gasoline to the "retailer-
customers" at not less than the supplier's tank wagon
price.

The Commission has, we believe, overlooked the far-reaching effect of this Order upon individuals and businesses other than the fifteen or more service station operators in Detroit who complained of the competition of respondent's tank car customers and their resellers. The consumer, the jobber, many retailers, and the supplier will all be seriously affected if this Order stands and becomes the pattern for the petroleum industry.

Effect On Consumer.

The Trial Examiner, whose recommendations the Commission has largely followed in this case, frankly stated in his report that the vice of the Detroit situation lay in the fact that the price differential complained of forced other dealers (competitors of respondent's customers and their customers) "to lower their price to the public." (Trial Examiner's Report, p. 68.)

The Order proposes to change this situation by compelling respondent's tank car customers to pay a much
higher price for gasoline sold through their
256 own service stations and to charge their reseller
customers not less than respondent's tank wagon
price.

Thus, the Order's objective is higher service station prices, and there is no doubt that this objective will be achieved with resultant injury to customers. As we understand it, this objective is contrary to the announced policy of the Commission hereafter quoted and to the purpose of the Clayton Act, as amended.

Recently the Commission filed its Annual Report to Congress, in which it condemned the Miller Tydings Act and urged its repeal, and stated its understanding of our competitive system to be that

"The consumer is not only entitled to competition between rival products but to competition between dealers of a single product."

It is hard to reconcile any part of the Order, and particularly subparagraph 6 which requires the jobber to resell at the supplier's tank wagon price, with this statement of

the Commission's views on resale price maintenance and our competitive system. Seemingly, the Order and these views and policies are in direct conflict with each other, and those subject to the jurisdiction of the Commis-
257 sion are obviously entitled to a restatement of such views and policies, or respondent is entitled to the vacation of this Order and a dismissal of the complaint herein.

These policies and views of the Commission cannot be effectuated unless the consumer obtains (a) the lowest possible price on every commodity in order that he may have the greatest purchasing power obtainable from a given income, and (b) the maximum of choice in the selection of goods either as to quality or quantity.

The Order does not assure the lowest possible price on gasoline. In fact, the Commission is admittedly striving to bring about a relative increaes in the price of gasoline moving through the tank car channel as compared with the tank wagon channel and thus increase the price to consumers. This is to be achieved by the following methods:

(1) By requiring suppliers to impose resale price maintenance upon jobbers, which will prohibit added economies achieved by jobbers from being passed on to dealers and by them to consumers. Thus, the average price to be paid by consumers will be raised.

(2) By depriving jobbers of the benefits of integra-
258 tion and mass merchandising. The inevitable tendancy in petroleum distribution is to integrate operations, whether the distributor be a jobber or an original supplier. This action is taken to protect and insure economies incident to this course of action accruing to the distributor which are then frequently passed on to the consumer in the form of low prices to build increased volume. Both the mass merchandiser, representing various degrees of integration, and the unit neighborhood service station are desirable. Favoring one type against the other will injure a large segment of the consuming public and will force consumers to pay a higher price for gasoline.

Further, the Order fosters uneconomic methods of distribution which will ultimately increase prices to the public. This is so because:

(1) The jobber's intimate familiarity with (a) the people of his community and their wants and habits, (b)

the retail dealers, their methods of operation and their credit standing, and (c) a multitude of economic conditions which affect cost of distribution, such as real estate values, wages, and rent conditions, make him in many instances a low cost distributor. To eliminate or handicap this efficient distributor by arbitrary price disabilities will 259 introduce higher costs and hence higher prices.

(2) A strongly competitive system encourages improvements and technological advances in production and distribution. Where margins are low, as in the petroleum industry, every seller tries to improve his profits by reducing cost. In the long run, however, the new advances are disseminated throughout the industry and reduce costs to all operators. Obviously, an all round reduction in costs would tend to lower prices to the consumer. The guarantee of high margins by resale price maintenance reduces considerably the incentive and necessity for introduction of each possible economy and increased efficiency. The long run result of such a policy is low productivity of resources compared with that under unrestricted competition price-wise.

(3) Every method of distribution is always on trial. In the long run one method may prove more efficient than another under one set of circumstances while less efficient under different conditions. Every supplier must be given the full range of possibilities of distribution in order to insure the best mode of adaptation to changing conditions.

The Order of the Commission would result in stratifi-260 cation of the market into a stratum of suppliers selling through jobbers and another stratum selling direct to dealers. This element of rigidity in the operation of every supplier would limit severely the possibilities of a trial-and-error search for low cost methods of distribution and would result in higher prices to the consumer.

The Order will not only result in higher prices to the consumer but it also fails to provide freedom of choice by the consumer in the selection of quality of goods to be purchased. An unrestricted competitive system tends to operate according to the dictates of consumer's choice. At present, many jobbers sell well-established brands of gasoline because they know that the free choice of their customers runs in that direction. However, the Order of the Commission will so restrict the jobber in the handling of well-established brands of gasoline as to make the

present marketing policies of many of them unprofitable and force them to sell other brands. The customers of these jobbers would then be forced to buy gasoline which
is less satisfactory to them than the gasoline they are
261 now purchasing. Those who would transfer their
patronage to continue to buy the gasoline of their
choice, would do so at a sacrifice of convenience or price.

It is obvious that if a jobber can buy and handle gasoline in a manner which permits or encourages him to reduce the price to the public, the public is thereby benefited. If a dealer has the ambition to expand, grow, and eventually invest his capital in a bulk storage plant and delivery equipment and thereafter supply his own service stations from that bulk plant by means of his own equipment at a reduced price, is not the public entitled to the benefits flowing from that lower price? Some people are price buyers while others are willing to pay a little more for service and attention, either real or imaginary. Both groups are entitled to the best bargain they can obtain. If the man who has a bulk plant and delivery equipment can buy at tank car prices and does so buy and as a result sells at a cheaper price to the public, has the public in any sense been injured? We think not.

It is no answer to say that such a buyer can procure supplies from some refiner that is not engaged in market-
ing directly to dealers in the Detroit area and thus con-
262 tinue selling at low prices to the public because, in
addition to buying at the lowest price, the public is
entitled to buy the kind or brand of product which it desires.

We can see no escape from the conclusion that the Order of the Commission is not in the public interest, is the result of a private dispute redressable in the courts, and will result in injury to the consumer in the form of higher prices and inability to secure the product of his choice.

Effect on Jobbers.

The future of thousands of petroleum jobbers throughout the United States will be jeopardized by this Order. Jobbers do not know or have any control over costs incurred by any supplier in distributing gasoline. Yet this Order imposes margins on the jobber which are determined by the cost and pricing policy of the suppliers in selling directly to retail outlets. The Commission has, we believe, overlooked many pertinent facts regarding the jobber's operations:

(a) A jobber may have so reduced his cost as to be in position to sell to his retail outlets at a cost which is less than the corresponding wholesale costs incurred by his supplier.

263 (b) The jobber may be willing to accept a lower margin for performing the wholesale function than is his supplier, preferring a narrow margin and increased sales to smaller sales at a higher margin.

(c) The jobber may be willing to sell at near cost, at cost, or even at less than cost in order to use gasoline as a leader, attracting consumers to his place of business for sale of other lines of merchandise.

(d) The jobber may be compelled to sell at prices which are lower than the tank wagon price of his supplier if he is to meet the competition of other outlets distributing products of other suppliers and of other jobbers. Even as there are traffic hubs in a large city, there are variations of intensity of competition in different sections of the city which may require recognition in prices adopted or the jobber may be forced to close his outlet.

(e) There is a tremendous difference in marketing costs in different geographical areas of the United States. Every state and urban and rural section within that state presents a myriad of variations in the methods and costs of distribution of individual companies or of the same company. The adherence to the policies set forth in
264 the Order of the Commission would, of necessity, require an inordinately large number of studies to fix and police literally thousands and thousands of prices in different communities.

(f) Even assuming that the Commission might be gifted with infallibility in determining costs for each of the different suppliers in each of the different communities, and thus impose "correct" margins for each jobber, its Order is bound to bring detrimental consequences in the long run. The jobbers in this country are operating in a dynamic economy which is changing continuously. Costs of distribution are also changing with volume of sales and changes of many other economic conditions, such as wages, transportation rates, real estate prices, and other similar factors bearing on cost of supplying the consumer. It is

folly to try to fix prices on the basis of a base year in past experience to be applicable to any future extended period of time, especially when there has been a whole war and five years' time intervene. The concept of a price fixation predicated upon a "1940 parity" is thoroughly repugnant to and completely nonrepresentative of present marketing costs and conditions. Such fixed margins are
265 likely to be even less representative of future conditions beclouded with many changes resulting from increased volume (due to an expected increase in total consumption) and a possible decline in unit cost of distribution.

Some light may be thrown on the situation created by the Order with respect to its restraining effect on competition and trade if consideration is given to the circumstances under which the ordinary jobber became a jobber. Generally, he is one who started with a service station. He acquired one or more additional service stations either by lease or purchase. When he had arrived at the point where his total gasoline purchases for all stations justified an investment in bulk plant facilities and tank wagons, in order to secure the economies of integrated operations, he made the investment and acquired the necessary facilities. Having done so, he was in a position to bid for the business of other dealers, which he did by meeting the price of his competitor jobbers. His own retail outlets remained, however, as an assured outlet for a minimum quantity of gasoline. As his business grew with the acquisition of
266 dealer accounts, he began to lease out his own retail outlets to others. As and when a turnover in lessees of his retail outlets occurred, he took over the operation of them until new lessees could be secured.

Such has been the experience of many jobbers in the past. What will be the situation in the future under the present Order of the Commission? There is nothing in the Order which will prevent an individual from acquiring one or more service stations. But when that individual has acquired a sufficient gallonage to justify an investment in bulk plant and delivery facilities in order to secure the economies of integrated operations, he is met with the proposition that even though he is willing and ready to undertake the jobber function with respect to his own retail outlets and those of others, he may not purchase gasoline at the jobber or tank car price on gasoline which he retails, but must continue to pay the tank wagon price less

a discount of not to exceed .499 cents per gallon. He is fully aware that such a narrow margin will not permit him to liquidate the investment required to engage in the jobber function and make a reasonable profit thereon.
Consequently, he refrains from expanding further in
267 the direction of the transition from a retailer to a
jobber.

But suppose he is willing to enter the jobber business on a margin of less than .5 cents per gallon on his retail business, in order to fully utilize his jobbing facilities he must acquire or normally would acquire other dealer accounts. This he can do in only one way. He must meet the price of his competitor jobber, who may be unrestricted under this Order. But he is faced with the necessity of agreeing with his supplier (if such supplier is one having dual distribution) that he will not resell to such other dealers at any price below the supplier's posted tank wagon price. Consequently, he is further discouraged in his desire to expand and either remains what he was in the beginning,—a retailer who must, regardless of the fact that he has become a mass merchandiser, pay the wholesale or posted tank wagon price and cannot take advantage of the economies in operation under the integrated jobber-dealer method of operation,—or seeks a supplier not having direct distribution in his area of operation, which would automatically exempt his operations from the price limitations imposed by this Order. Surely
this is discrimination of the rankest sort against cer-
268 tain suppliers and consumers who desire to purchase
their products, and any order or regulation imposing such a discrimination ought not to be permitted to stand.

The same situation faces the individual who is not a retailer and who has a desire to become a jobber marketing gasoline supplied by a refiner having direct distribution. In order to perform the jobber function, he must first make an investment in bulk storage and delivery equipment. If he is to utilize his facilities to the fullest extent, he must not only secure dealer accounts to which he will resell on a wholesale basis, but he will undoubtedly wish to secure some retail outlets of his own to assure for himself a core of outlets through which he can dispose of a minimum gallonage which will insure a profitable operation on a tank car price basis. While the Order will not prevent him from securing his own retail outlets by purchase or lease, he cannot perform his jobber function with relation to those outlets on the narrow margin of less than .5 cents per gallon fixed by the Order. Further, the Order will prevent him from securing any dealer accounts, since he cannot be competitive, i. e., he cannot offer to resell at less than his supplier's posted tank 269 wagon price, while a jobber who is supplied by a refiner not having direct distribution will be in a position to underbid him for such business.

Presently, jobbers bargain among the various suppliers in any given market for the best purchase price considering brand preference. Under past conditions, the bargaining was conducted with those having direct distribution and those desiring to penertate a new market via distribution through jobbers. Under the present Order, the potential suppliers are limited actually to those having no direct distribution, which tends to create monopolistic bargaining power on behalf of this class of privileged suppliers.

Thus, the Order not only has the avowed purpose of raising the retail price of gasoline to the consumer and of protecting existing dealers from the effect of competition, as pointed out elsewhere herein, but it is clear that the Order is in restraint of competition and trade because (1) it limits the ability of a retailer to expand and become a jobber and (2) it limits the ability of any individual who is not a retailer to enter the jobbing business.

Another fact which must not be overlooked in de- 270 termining the effect of the Order is that there are communities which are served only by suppliers having direct distribution as well as jobber distribution. In such cases, the jobber of a well-advertised brand must either retain his present supplier or accept an equally unsatisfactory arrangement with some other direct marketer or sell an unbranded gasoline. If he stays with his present supplier, he will be subject to resale price maintenance in spite of the Commission's public condemnation of such practice.

If a dealer can no longer invest in a bulk plant and delivery equipment and himself perform the jobber function and pass a part of all of such savings on to the public, or if a dealer or jobber cannot himself determine the price at which he will sell merchandise he has bought and paid for, then it is clear that the public, the jobber, and competition generally are adversely affected and to a very marked degree.

271 Effect on Suppliers.

Finally, we believe the Commission overlooked the fact that the Order would adversely effect the supplier in a way not intended by the Commission, because:

(1) The Order is vague, indefinite, and lacks clarity;—a fact apparently conceded by the Commission if news releases are to be believed,—and consequently the supplier remains in doubt as to whether any particular business practice or policy with respect to distribution of gasoline in a given market does or does not conform with the Order and the law. There is no standard in the Order by which a supplier can determine the propriety of his conduct. If the Order had been based on findings that price differentials had forced so many dealers out of business as to unreasonably restrain competition, it might have furnished an understandable criterion, but the Commission could make no such finding since not even a single dealer was forced out of business by the alleged discrimination. Hence the supplier has no means of ascertaining from the Order what practices the Commission would consider proper and what practices it condemns.

272 (2) The Findings and the Order criticize the accounting procedure of respondent but do not contain any formula or method which has the approval of the Commission. Thus, the supplier does not know which expense items are regarded by the Commission as contributing to a legitimate cost differential. He does not know the accounting procedure which would be acceptable in the treatment of the various items of expense, nor does he know what costs of distribution would be acceptable as contributing to a differential. Further, the supplier is uncertain about the frequency with which a cost justification should be prepared and an adjustment of price differentials introduced with varying changes of the differential. This imposes a tremendous burden of cost accounting on the supplier, introduces significant uncertainties concerning volume to be distributed, and utilization of terminal and marketing facilities. Price policies are subject to the vagaries of cost accounting, which in turn are dependent upon the volume of sales moving through the supplier's various facilities.

(3) Subparagraph 6 of the Order imposes on the supplier the obligation of policing resale prices of its jobbers.

This raises the following questions: (a) To what extent 273 will the supplier be obligated to follow and determine the practices of each of its jobbers? (b) Would there be any justifiable exception to the resale price maintenance provision when a jobber attempts to preserve and protect his distribution through a given outlet located in a highly competitive area? (c) When would the furnishing of "services" or "facilities" have the net effect of a reduction in price to the dealer? (d) How can the supplier insure resale price maintenance in states that have no Fair Trade law or the law in effect does not apply to a product like motor fuel, where agreements to maintain the resale price violate the Sherman Act?

(4) It limits diversification of selling methods by the supplier. Suppliers generally have carried the principle of diversification into their marketing activities. They endeavor to sell gasoline through several different channels, knowing that they cannot forecast accurately all future legal, economic and technological factors bearing on the profitability of the gasoline market. The exact portion of sales through the different channels is changing through time with the change of many economic conditions. It 274 is very likely that the future will require many additional adaptations to the changing circumstances which will manifest themselves in the varying importance of different distribution channels. It is obvious that diversified activities help a concern to cushion the brunt of most adverse change by orienting the concern to activities favored or unaffected by the change. The supplier will be put in a straight packet by the rigid distribution pattern imposed by this Order.

The Commission's recent Order is premised upon margins to jobbers and practices in effect five years ago and which have been continued in effect since then. If the margins and practices of which the Commission complains were adversely affecting competition, it would seem that long before now such adverse effect would be clearly apparent. A monopoly of some sort would be well on its way. The facts prove the opposite. Competition in Detroit among retailers of petroleum is as active and aggressive as ever. Ned's Auto Supply Company, which purchased at an allegedly discriminatory price, as referred to in the Findings and Order of the Commission, is actually selling far less gasoline today than it did in 1940.

275 Shortly before this Order was issued, the Commission revised its "Statement of Policy" in which it declared that

"It is the policy of the Commission not to institute proceedings against alleged unfair methods of competition or unfair or decepticve acts or practices where the alleged violation of law is a private controversy redressable in the courts; except where said practices tend to affect the public. In cases where the alleged injury is one to a competitor only and is redressable in the courts by an action by the aggrieved competitor and the interest of the public is not involved, the proceeding will not be entertained."

In other words, it is the adopted and publicized policy of the Commission not to act or institute proceedings except where they are in the public interest and also that the Commission will not lend its offices to the settlement of competitive disputes unless the public is adversely affected. These are eminently sound policies, but it is difficult to place the Complaint in this proceeding and the Order of the Commission within these boundaries.

The Commission further asserts that it refrains from publishing or divulging the identity of the complaining parties, if any, who set in motion the Commission's
276 proceedings. This is also sound policy, but in this particular proceeding (if press releases are to be believed), the complaining party or parties desire no secrecy. The local secretary of an association purporting to represent certain gasoline service station dealers in 1939 or 1940 is quoted therein as stating that he and his associates made the complaint and "prosecuted the case." It was done, he is quoted as saying, "to protect the dealers against cut prices." We have yet to find one word in the Detroit press, in the Findings of the Commission, or elsewhere, which would indicate that any consumer—much less the public—had any complaint or actually did make or file any complaint that he was adversely affected by the gasoline prices established or methods of distribution employed by respondent and all other suppliers in Detroit between 1936 and 1940 or at any later date. We submit that insuring higher prices and greater profits for these service station dealers while injuring motorists, jobbers, suppliers, and others, is not in the public interest, and therefore the Order should be vacated and the Complaint herein dismissed.

277 II. Jobber Function.

Whoever performs the jobber function is entitled to be classified as a jobber and buy at the jobber price; and no jobber should be restricted in the price at which he resells to his customers.

The Clayton Act, as amended by the Robinson-Patman Act, does not forbid the classification of customers according to their functions and does not forbid a lower price to jobbers than to retailers. Indeed, the Order in this case confirms this, since it places no restriction on the price which the supplier may charge a jobber and places a limitation only on the price which the jobber may charge its "retailer-customers". The jobber is not the agent of his supplier and frequently competes with his supplier for the business of service stations operators and other retailers. If the jobber is required to resell at not less than his supplier's tank wagon price (as stipulated in subparagraph 6 of the Order), the jobber will be unable to meet the competition of refiners, jobbers, dealers and others who are unrestricted in the price at which they may resell. Hence subparagraph 6 of the Order will not effectuate the purposes of the Clayton Act, but on the contrary will defeat those purposes and restrain competition.

278 Every gasoline jobber has a substantial investment in his bulk storage plant, tank wagons, and other equipment. He maintains a sales force, advertises, and runs all the risks that every other independent merchant runs. For these investments, expenses and risks in performing the jobber function, he must be compensated; otherwise he cannot continue in business.

Many jobbers operate no retail stations. They buy at the regular jobber price and through efficient operations are able to resell at less than their own and other suppliers' tank wagon prices. It is not only unjust and discriminatory to penalize these jobbers by restricting their resale prices, but it will restrain competition, resulting in higher prices to the service station operator and the consumer.

Jobbers who operate retail stations act in a dual capacity. This was recognized by the Federal Trade Commission itself when on June 19, 1931 it approved the following definition in the National Code of Practices for Marketing Refined Petroleum Products:

"C. Jobber, Distributor or Wholesaler. One who
279 carries a stock of petroleum products to sell to retail

dealers or others for resale, but who may sell direct to consumers."

Such jobbers carry on the jobber function in receiving and storing the gasoline in their bulk plants and delivering it in their own equipment to service stations, whether operated by themselves or others. They carry on the retailer function in receiving and storing the gasoline in their service stations and vending it at the service station to the consuming public. Such jobbers have the same investment, incur the same risks and render the same economic service to society in carrying on the jobber function as all other jobbers. Hence they should be accorded the same treatment and should not be required to pay a higher price for their gasoline. The differential of less than one-half cent per gallon which the Commission has arbitrarily fixed by this Order is wholly inadequate to pay for performance of the jobber function. It is doubtful whether this differential will even pay the cost of delivery from the bulk station to the service station and clearly will not compensate the jobber for his investment, the expense of maintenance of his bulk station plant, his other expenses, and the risks he incurs in performing the jobber function.

280 III. The Order of the Commission Is, As A Matter of Law, Not Warranted by the Provisions of the Clayton Act, As Amended.

We respectfully submit that the Order of the Commission should be vacated and the Complaint dismissed for the following reasons:

(a) The Order of the Commission is not confined to the issues raised by the pleadings herein, and includes matters not regulated by the Clayton Act, as amended, and not within the jurisdiction of the Commission.

There is no allegation in the Amended Complaint which either directly or by implication charges any violation of the Clayton Act, as amended, arising out of or in connection with the resale of gasoline by the four customers of respondent named in the Complaint, or any other of its customers. Thus, to the extent that the Order prohibits the resale of such gasoline at other than respondent's posted tank wagon price, it is without the scope of the issues raised by the pleadings.

Subparagraph 6 of the Order provides that respondent cease and desist from discriminating, directly or in-
281 directly, in connection with the sale of gasoline "in commerce" in the price of such gasoline of like grade and quality as among purchasers:

"6. By selling such gasoline to any dealer, jobber or wholesaler at a price lower than the price which respondent charges its retailer-customers who in fact compete in the sale and distribution of such gasoline with the retailer-customers of such dealers, jobbers, or wholesalers, where such dealers, jobbers, or wholesalers resell such gasoline to any of its said retailer-customers at less than respondent's posted tank wagon price, or who directly or indirectly grant to any such retailer-customer any discounts, rebates, allowances, services or facilities having the net effect of a reduction in price to the retailer."

This part of the Order is subject to the following objections, to-wit:

(1) It relates to a matter not regulated by the statute, and therefore wholly outside the jurisdiction of the Commission.

(2) It relates to transactions between jobbers and their own reseller customers, which are, admittedly, not transactions in interstate commerce, and, therefore, wholly outside of the power of the Commission to control.

(3) It relates to transactions consummated after respondent has sold such gasoline to its jobber customers, between the latter and their own reseller customers, as to which respondent has no privity nor control.

282 Cyrus Austin, attorney for the Commission, at the time of oral argument of this cause, in commenting upon the effect and implications of the case of *Daly* v. *Citrin-Kolb Oil Company*, 53 F. Supp. 876, admitted that transactions between Citrin-Kolb Oil Company and its own vendees were and are not "in commerce".

The Commission by its Order now purports to regulate such transactions by compelling respondent to require its jobber-customers to maintain a minimum resale price at the level of respondent's posted tank wagon price or to discontinue business with them.

In the event such jobbers sell under such minimum or grant to their own customers any discounts, rebates, allowances, services or facilities having the net effect of a reduction in price to the retailer, then respondent is required to discontinue selling to such jobber at a price lower than the price which it charges its own retailer-customers.

This part of the Order is wholly unjustified either by the Complaint or by the statute; and it clearly relates to incidental matters admittedly not constituting interstate commerce. The Commission, therefore, in including
283 subparagraph 6 in its Order, acted without jurisdiction. It is, of course, unlawful for the Commission to make any order in relation to any matter not within the purview of the statute.

(b) The Order of the Commission disregards the provisions of the Clayton Act, as amended, relative to the requirement that injury to "competition" must be established in order to justify the issuance of a cease and desist directive; said Order being unsupported by any testimony in the record relative to any deleterious effect of the practices complained of upon "competition" as such.

There is no evidence in this record to support the claim made in the Complaint that the effect of the price differential allowed respondent's jobber-customers, is or may be substantially to lessen competition or tend to create a monopoly or to injure, destroy or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them.

The use of the words "may be" in the Clayton Act, as amended, was not intended by Congress to prohibit
284 the mere possibility of the consequences mentioned, but to prevent such practices as would probably lessen, injure, destroy or prevent competition.

> *Corn Products Refining Co.* v. *F. T. C.*, 89 Law Ed. 977.

The testimony adduced by the Commission on the subject of effect on competition of the practices complained of is fully analyzed at pp. 128-134 of respondent's brief. We do not repeat that analysis here, but refer to the printed brief, at the pages indicated. As we said there, however, we repeat here—that there is not a scintilla of testimony even tending to establish any probability of deleterious effect on competition attributable to the differential in price accorded to respondent's tank car customers. As a matter of law, the record does not support the Findings and Order of the Commission; and the Order should, therefore, be vacated and the complaint dismissed.

Respondent contends, and its contention is supported by the expert testimony of Professor Fred Emerson Clark of Northwestern University, that proof of injury to "competitors" of respondent's vendees is not tantamount to
285 proving injury to "competition", as that word is used in the statute. (Record pp. 1647-8) His testimony establishes the inescapable conclusion that the practices complained of, and their effect, as proved by the testimony of the Commission's witnesses, actually foster and promote competition; and that their discontinuance would have the effect of preventing and stifling competition, and thereby cause the public to pay higher retail prices for gasoline in the Detroit area. In fact, the Trial Examiner's Report, which the Commission has generally adopted in its Findings of Fact, in several places refers to the fact that the practices complained of operate to lower the price charged the public for gasoline, which is erroneously cited as a result which the statute was intended to prevent. The Trial Examiner's Report and the Commission's Order, therefore, are apparently based on testimony bearing on alleged injuries to the competitors of respondent's jobber customers who either sell at retail or to resellers at less than the tank wagon price. Such testimony as was adduced to this effect is analyzed in respondent's brief at pages 131-132.

"Competition" cannot be regarded as "one or more competitors", but must be considered as a social and
286 economic institution—the state or condition of striving, in which a competitor seeks to furnish merchandise or render service better or less expensively than his rivals. Incidental injury to competitors is a usual and necessary element of competition (1655).

It is difficult to conceive that injury to "competition", as such, resulted from the alleged discriminatory prices, during the years under consideration, when one considers that there continued to exist such a substantial growth of new and rebuilt gasoline filling stations in the Detroit metropolitan area. The records of the Department of Buildings and Safety Engineering of the City of Detroit show, for the years 1936 to 1941, inclusive, that permits for the following number of new service stations and additions and alterations to existing stations were issued.

Year	New Service Station Permits	Alterations and Additions
1936	47	87
1937	76	77
1938	45	47
1939	67	55
1940	134	60
1941	78	68

287 The improvement of old outlets and construction of new competitive outlets does not indicate a development of monopolistic tendencies during the period covered by this litigation, or the first year thereafter, when construction was still permitted. The building of new service stations was stopped the latter part of the year 1941, because of the war.

Nor does the marked increase in gasoline gallonage sold by Ned's Auto Supply Company after it went on a tank car delivery and price basis (as referred to in the Commission's Findings of Facts) prove or tend to show "injury to competition". The records of respondent's Detroit Division show that many gasoline service stations, purchasing their supplies at regular tank wagon prices from respondent, and selling at their own retail prices, achieved an even greater increase of sales volume. This is illustrated by statistics of the following service stations:

288

Service Station Respondent's Dealer Account Number	Volume in Gallons 1936	1940	Percent Increase
43	30,760	65,512	112.6
92	34,703	84,090	142.3
5102	67,390	271,828	303.3
257	28,324	59,196	108.9
274	75,272	186,781	148.1
284	67,205	192,045	185.7
603	53,611	116,514	117.3
619	52,778	108,550	105.6
621	29,395	124,125	322.2

7

The above figures demonstrate that, during the years covered by the Complaint, the tank wagon purchaser's gallonage increased, as well as that of the jobber retailer who purchased on the tank car delivery and price basis.

To recapitulate, there is no evidence in this record to show that the public as a whole was injured, or was or is likely to be injured, by the practices complained of in the proceeding. On the contrary, the record shows that the effect of such practices was and is to enable the consumer to secure gasoline for a lower price. Absolutely the only testimony adduced by the Commission on this point
289 was to the effect that about fifteen so-called independent
gasoline retailers, some of whom were reseller customers of respondent, found it necessary to reduce their gasoline prices to meet competition. (543, 560, 583, 624, 637, 651, 673, 724, 728, 750, 765, 778, 847, 859, and 878.)

As a matter of law, we respectfully maintain, therefore, that such testimony fails to establish any adverse effect on "competition", as that term is employed in the Clayton Act, as amended. It is, therefore, submitted that the Order of the Commission is unsupportable and should be reconsidered and vacated.

(c) The Order of the Commission is unwarranted in that it refuses to give effect to respondent's right to rebut a prima facie case by showing that its lower prices to its jobber customers were made in good faith to meet equally low or lower prices of its competitors.

The Commission, in its Order, holds that where an injurious effect on competition is affirmatively proved, then proof of meeting competition is immaterial; that the provision of the law allowing a respondent to show good faith in meeting equally low or lower prices of competitors
290 would recognize the principle "that one competitor's
violation of law justifies its violation by another." This holding is based upon the unsound premise that the competitors in question are actually violating the law in offering such low or lower prices to respondent's jobber customers, which premise is valid only if such competitor is proved to be a law violator. It is entirely conceivable that such competitor's costs of sale and delivery would actually justify the competitive price differential offered by them to jobbers; and the law does not permit the Commission to presume otherwise in determining the rights and liabilities of respondent.

The Report of the Trial Examiner recites that:

"The differentials on its branded gasolines respondent granted Ned's Auto Supply Company, at all times subsequent to March 7, 1938, and Stikeman Oil Company, Citrin-Kolb Oil Company and the Wayne Oil Company, at all times subsequent to June 19, 1936, were granted to meet equally low prices offered by competitors on branded gasolines of comparable grade and quality."

The Trial Examiner, at pp. 54-55 of his Report, finds as a matter of fact, uncontradicted upon the record, that the four jobbers "could purchase from many other sources,
immediately, a gasoline of comparable quality, and at a
291 better (lower) price than they are paying at the pres-
ent time"; also that the jobber customer market is subject to intense competition; and that respondent's jobber customers have no contracts, and the continuance of their patronage is subject to competition from day to day.

Notwithstanding these findings of the Trial Examiner, the Commission holds that they are immaterial, saying:

"Based on the record in this case, the Commission concludes as a matter of law that it is not material whether the discriminations in price granted by the respondent to the said four dealers were made to meet equally low prices of competitors." (14)

The Commission bases this conclusion on two principal grounds:

(1) Because the Commission believed injurious effect on competition was affirmatively proved.

(2) Because the Commission believed the construction of the law claimed by respondent would constitute recognition of the scoundness of the principle that one competitor's violation of law justifies its violation by another.

The first of the above mentioned grounds represents an
attempt on the part of the Commission to add a pro-
292 viso to Section 2 (b) of the statute. Does the justifi-
cation accorded respondent by said section, depend upon whether, by respondent's act, competition was destroyed, injured or prevented? The statutes does not say so, and it is submitted that it constitutes a strained and unreasonable construction to so interpret the words of the statute. Moreover, as heretofore pointed out, there is no substantial evidence in the record establishing any injury to competition as such, by reason of any act of respondent.

The Commission assumes, as the basis for the second ground mentioned, that the other oil companies which of-

ferred respondent's jobber customers price differentials equal to or greater than those offered by respondent are, themselves, violators of the statute. This conclusion constitutes an invalid and unsupported presumption. For, every one of such competitors, as to which competitive price offers were proved, might conceivably be able to show that its price differential, so offered, is justified by its own savings in sales and delivery costs as between the tank car and tank wagon methods of delivery of gasoline, or that
the customer to which the offer was made was its only
293 actual or prospective customer in the area and hence
the offer could not be discriminatory.

The meeting of an equally low price of a competitor in good faith is available to respondent in rebutting any prima facie case established by the Commission, and, when such fact is established by uncontroverted evidence as in this case, it becomes a justification under the Act. In *F. T. C.* v. *A. E. Staley Mfg. Co.,* 89 L. Ed. 989, at page 991, the United States Supreme Court said:

"The principal question for decision is whether respondents, who adopted the discriminatory price system of their competitors, including the Corn Products Refining Company, have sustained the burden of justifying their price system under Section 2 (b) of the Clayton Act, as amended, by showing that their prices were made 'in good faith' to meet the equally low prices of competitors."

In deciding this question, the Court said, at page 997:

"Section 2 (b) does not require the seller to justify price discriminations by showing that in fact they met a competitive price. But it does place on the seller the burden of showing that the price was made in good faith to meet a competitor's. The good faith of the discrimination must be
shown in the face of the fact that the seller is aware
294 that his discrimination is unlawful, unless good faith
is shown, and in circumstances which are peculiarly favorable to price discrimination abuses. We agree with the Commission that the statute at least requires the seller, who has knowingly discriminated in price, to show the existence of facts which would lead a reasonable and prudent person to believe that the granting of a lower price would in fact meet the equally low price of a competitor."

In the cited case, the Supreme Court sustained the Commission's finding that respondent, Staley Mfg. Co., had not met and satisfied this burden because it never in fact had a higher price than its competitor's. But the undisputed evidence in the instant case is that respondent did have higher prices than its competitors were offering, and further that its prices were established in the face of bona fide offers to said customers by respondent's competitors to sell them at lower prices.

In the Staley case, the Supreme Court also held that:

"Congress has left to the Commission the *determination of fact in each case* whether the person, charged with making discriminatory prices, acted in good faith to meet a competitor's equally low prices. The determination of this fact from the evidence *is for the Commission.*" (Italics ours.) (Opinion p. 926.)

295 In the case at bar the Report of the Trial Examiner, as heretofore noted, expressly recites that the differentials in question were granted by respondent to its jobber customers "to meet equally low prices offered by competitors on branded gasolines of comparable grade and quality."

The Commission, however, in its Findings of Fact, at page 14 thereof, concludes as a matter of law that "it is not material whether the discriminations in price granted by the respondent to the said four dealers were made to meet equally low prices of competitors"; and the Commission, therefore, makes no finding of fact on the question of meeting competition and of respondent's good faith in doing so, saying that "the Commission does not attempt to find the facts regarding those matters, because even though the lower prices in question may have been made by respondent in good faith to meet the lower prices of competitors, this does not constitute a defense, in the face of affirmative proof that the effect of the discrimination was to injure, destroy and prevent competition with the retail stations operated by the said named dealers and with the stations operated by their retailer-customers."

296 (d) The Order of the Commission, in reducing the allowable differential on sales of gasoline to jobbers who engage in retail operations (to the extent of the gasoline so sold at retail) to less than one-half cent per gallon and basing such reduction wholly upon allowance for difference in respondent's cost of delivery, as between the tank car (or transport truck) and tank wagon delivery methods, wholly disregards Section 2 (a) of the Clayton Act, as amended, which recognizes a further allowable differential reflecting differences in the cost of sale as between such methods of marketing.

The difference in respondent's sales costs, as between said two methods of marketing, was wholly ignored by the Commission's Order, although many items thereof, as established by the testimony, were not even contested or drawn in question by the attorney for the Commission.

The Robinson-Patman amendment to the Clayton Act permits a respondent to justify differentials in price by showing that they "made only due allowance for differences in the cost of manufacture, sale or delivery resulting from the differing methods or quantities in which such commodities are to such purchasers sold or delivered." (Sec. 2 (a).)

297 The less than one-half cent differential is apparently based upon testimony adduced by the Commission to the effect that the gasoline supplier saves one-half cent per gallon, by the tank car method of delivery, being the testimony of the witness Paul Harrison to the effect that it cost that amount per gallon to haul gasoline from a bulk plant to a gasoline filling station within the Detroit area. (Record pp. 915, 923, 924.)

That Mr. Harrison's testimony related solely to savings in cost of delivery, without reference to saving in cost of sale, is shown by the fact that the Trial Examiner limited the cross-examination of Mr. Harrison in the following words:

"I don't understand that during the direct examination there was any testimony adduced running to the cost of sale, and the testimony related solely to the cost of delivery. Therefore, the examiner rules that your cross-examination will be limited to the cost of delivery." (Record p. 931.)

Accordingly, the entire differential permitted by the Order of the Commission is based upon evidence adduced by the Commission as to the cost of hauling gasoline from bulk plant to retail outlet; no additional allowance having been made for the difference in selling cost as between the tank car and tank wagon method of distribution. This constitutes manifest error.

The Trial Examiner recognized in his Report on the evidence that there had been substantial proof of saving in selling cost as between such varying methods of marketing; the Report reciting that the allowable jobber differential per gallon proven was "less than one (1¢) cent." (Trial Examiner's Report, p. 42.)

And it is particularly significant that the 1.51c differential testified to by Dr. John W. Boatwright, respondent's expert on costs, was not disproved nor controverted by Mr. Warmack, the Commission's expert, who testified on cross-examination as follows:

"Q. Are you just unable to say whether 1.51 cents is a correct figure or whether any other figure is a correct figure?

A. I am unable to say."

(Record p. 6518.)

Respondent respectfully submits that the Commission's Findings of Fact and Order not only disregard the overwhelming weight of the evidence on the subject of
299 differential justification, but also misinterpret the legislative intent of Congress in the use of the words "due allowance" in Section 2 (a) of the Clayton Act, as amended, by the Robinson-Patman Act.

It certainly was not the intent of Congress to require such justification to be made with that mathematical exactitude which the Commission requires, as evidenced by said Findings of Fact. If so, then no respondent will ever succeed in establishing a cost differential justification. For example, the Commission on page 12 of its Findings of Fact apparently rejects respondent's entire cost study on the ground that it is based on costs in the Detroit Division instead of those in the Detroit metropolitan area. To that criticism we say that respondent used as the basis for its cost analysis the smallest geographical area for which records had been regularly kept, and within which the complaint was lodged; and that nothing more was humanly possible. Moreover, there was testimony adduced as to comparison of costs in the Detroit Division outside the Detroit metropolitan area compared to those inside said area, indicating that the difference did not exceed 2/100 of a cent per gallon, this being the difference in mar-
300 keting costs between gallonage handled by respondent's commission employees in rural areas of the Detroit Division, on the one hand, and that handled by its salaried drivers in the Detroit metropolitan area, on the other.

In other respects, the criticisms directed at respondent's cost differential justification were shown by the testimony of Dr. John W. Boatwright, respondent's expert, to involve infinitesimal changes in the allowable differential. These criticisms are analyzed at length in respondent's brief at pages 92 to 108, inclusive, and the analysis will not be repeated here.

Writers on the subject of oil economics recognize that a differential or "spread" of approximately two cents per gallon between the tank car and tank wagon prices on gasoline is ordinarily necessary to enable a gasoline jobber to meet his cost of operation and realize a reasonable profit.

Ball on The Oil Business, p. 266.

The evidence in this case shows that respondent accords its tank car customers the smallest differential in price, as between the tank car and tank wagon method of sale
301 and delivery of gasoline, allowed in the entire oil industry; the minimum differential being one and one-half (1½¢) cents. (Record p. 1515-16.)

The average differential allowed by the entire industry is two (2¢) cents; and the maximum differential is three (3¢) cents. (Record p. 1516.) The generally prevailing differential allowed along the Atlantic Seaboard is two and one-quarter (2¼¢) cents. (Record p. 1516.) This was established by the uncontroverted testimony of John E. Dyer, of New York City, general sales manager of Sinclair Refining Company, who is so well recognized as a spokesman for the oil idustry that he had charge of the administration of codes for said industry under N. R. A. for the New York Division. (Record p. 1474.)

302 IV. The Interstate Commerce Question.

The Order of the Commission, and the Findings of Fact upon which the same is based, do not show that the transactions complained of were committed by respondent "in the course of commerce," or that either or any of the purchases involved in the alleged discriminations were "in commerce", as prescribed in the Clayton Act, as amended by the Robinson-Patman Act.

The statute, in Section 2 (a)* thereof, prescribes three criteria relative to the interstate character of a respondent's operations, and to the character of the transactions involved. These are:

---

*The following is the text of Section 2 (a), insofar as it relates hereto:

> "Sect. 2. (a) That is shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade or quality, where either or any of the purchases involved in such discrimination are in commerce * * *"

(a) That the respondent shall be "engaged in commerce". This is admitted by this respondent and is supported by the record.

(b) That the transactions complained of shall be
303 committed "in the course of such commerce". This is
denied by respondent, and there is no finding thereon in said Order, nor would such a finding, if made, be supported by the record.

(c) That the transactions complained of and involved in the alleged discriminations are "in commerce". This is denied by respondent, and there is no finding thereon in said Order, nor would such a finding, if made, be supported by the record.

The Findings of Fact of the Commission in this case fall far short of showing that the transactions complained of were committed in the course of interstate commerce, and that the transactions involved in the alleged discriminations are or were "in commerce". In Paragraph Two of said Findings of Fact the Commission determines only that respondent was, at the times complained of, engaged in interstate commerce.

Further than as above indicated, however, there is no finding on the commerce issue which can be said to support the Order of the Commission; and if there were such a finding, it would not be supported by any substantial evidence in the record.

The facts as supported by the record establish that
304 the case at bar presents the same factual and legal
situation as was presented in *Lewis* v. *Shell Oil Company*, 50 F. Supp. 547, decided in 1943 by the District Court of the United States for the Northern District of Illinois. At the time of the argument of this case, Cyrus Austin, the attorney who presented the case on behalf of the Commission, frankly stated that if the Lewis case was correctly decided, then the respondent herein was entitled to an order of dismissal.

In the case of *Daly* v. *Citrin-Kolb Oil Company*, 53 F. Supp. 876, decided by the United States District Court for the Eastern District of Michigan, subsequent to the decision in the Lewis case, it was held that transactions involving the sale of gasoline by this respondent to Citrin-Kolb Oil Company (being one of the jobbers in the case at bar) and by the latter to its reseller and retail customers did not constitute interstate commerce, so as to bring such transactions within the purview of the Federal Fair Labor Standards Act (29 U. S. C. A., Secs. 206-207.)

In respondent's brief to the Commission, pages 75-87, there are cited and discussed other cases from which, we submit, it is perfectly clear that the "commerce" involved in respondent's transactions with its jobber customers
305 in Detroit is not "commerce" as defined in the Clayton Act, as amended. For reerence purposes, those cases are as follows:

Schechter Corp. v. *U. S.*, 295 U. S. 495, 79 L. Ed. 1570, 55 Sup. Ct. 837.

Atlantic Coast Line Ry. v. *Standard Oil Company of Kentucky*, 275 U. S. 257, 72 L. Ed. 270, 48 Sup. Ct. 107.

Higgins v. *Carr Brothers Co.*, 317 U. S. 572, 87 L. Ed. 468, 63 Sup. Ct. 337.

Walling v. *Sanders*, 48 F. Supp. 9.

Loftler v. *First National Bank of Chicago*, 48 F. Supp. 692.

Ling v. *Currier Lumber Company* (Michigan), 50 F. Supp. 204.

Ouendag v. *Gibson* (Michigan), 49 F. Supp. 379.

Cron v. *Goodyear Tire Company*, 49 F. Supp. 1013.

Walling v. *Goldblatt Brothers*, 128 F. 2d 778.

Jewel Tea Company v. *Williams*, 118 F. 2d 202.

Gerdert v. *Certified Poultry & Egg Co.*, 38 F. Supp. 964.

Chicago, M. & St. P. Ry. Co. v. *Iowa*, 233 U. S. 334, 34 Sup. Ct. 592, 58 L. Ed. 988.

Lipson v. *Socony-Vacuum Oil Corporation*, 87 F. 2d 265, 267.

Quincy Oil Co. v. *Sylvester, et al.*, 238 Mass. 95, 130 N. E. 217, 14 A. L. R. 111.

306 *Walling* v. *Jacksonville Paper Company*, 317 U. S. 564, 87 L. Ed. 460, 63 Sup. Ct. 332.

To the same effect we cite a most recent case, decided since the filing of respondent's brief:

Kantar v. *Carchell* (1945), 150 F. 2d 47.

The fact that there were some isolated transactions in which emergency carload lot shipments of gasoline were shipped by rail from Whiting direct to jobbers in 1938 and 1939, but not subsequent to April, 1940 (Record pp. 180-181), is not, of itself, sufficient to satisfy the statute. They do not change the basic nature of the dealings with jobbers involved in these proceedings, because they are governed by the maxim "de minimis non curat lex." (*Gold-*

berg v. *Worman*, 37 F. Supp. 778; *Spier* v. *Gulf Coast Beverages, Inc.*, 50 F. Supp. 653; *Daly* v. *Citrin-Kolb Oil Company*, supra.)

Respondent submits that the findings here in do not meet the requirements of the statute and are wholly insufficient to support the Order of the Commission; also that the evidence contained in the record herein (Record pp. 1-173) fails to present any substantial showing which would support any such findings, if they had been made by the Commission.

307 Conflict with Office of Price Administration.

The Order of the Commission cannot be complied with in connection with sales made by respondent to Ned's Auto Supply Company, Stikeman Oil Company, Citrin-Kolb Oil Company, and Wayne Oil Company, without at the same time violating the provisions of Maximum Price Regulation 88 issued by the Office of Price Administration, thereby subjecting respondent to the penalties imposed by the Emergency Price Control Act of 1942, as amended.

The Office of Price Administration issued Revised Price Schedule 88 on February 2, 1942, and reissued and redesignated the same as Maximum Price Regulation 88 on February 14, 1944. At all times subsequent to the original issuance of said Regulation on February 2, 1942, there was included therein a provision under which respondent's maximum prices for gasoline sold in the Lower Peninsula of Michigan by tank car and truck transport, were not permitted to exceed the price charged at a given shipping or delivery point by respondent on the last sale of the same product to a purchaser of the same class made by respondent within sixty (60) days prior to October 15, 1941 said provision being designated in the present Regulation (Maximum Price Regulation 88) as Section 5.2 (c).

308 Respondent's maximum prices in tank car and truck transport lots delivered at destinations in Detroit to each of the four customers above named, established pursuant to said Regulation, are 8.4 cents per gallon for Standard Red Crown Gasoline, and 9.65 cents per gallon for Standard White Crown Gasoline (Solite with Ethyl). Respondent is not permitted to exceed either of said prices on sales to any of said four customers regardless of whether or not any of the gasoline so sold by respondent is resold by said customers at their own service stations or is resold by them by tank wagon to other service station operators (dealers).

Respondent's present posted tank wagon price to dealers in the Detroit metropolitan area, exclusive of taxes, is 9.6 cents per gallon for Standard Red Crown Gasoline, and 11.1 cents per gallon for Standard White Crown Gasoline (Solite with Ethyl). If respondent should comply with the Order of the Commission, and charge its said four customers the posted tank wagon price for gasoline sold to said customers in tank car and truck transport quantities, it would thereby exceed its permitted Office of Price Administration ceiling price on Standard Red Crown Gasoline
309 by the sum of 0.8 cents per gallon, and on Standard White Crown Gasoline (Solite with Ethyl) by the sum of 1.45 cents per gallon.

The Office of Price Administration has recognized, through its issuance of Maximum Price Regulation 88, the various customer classifications of respondent and of others similarly engaged in the sale of petroleum products. Section 5.2 (c) of said Regulation defines the term "purchaser of the same class" and reads as follows:

"'Purchaser of the same class', as used in sections 5.2 and 5.3, refers to the practice adopted by the seller in setting different prices for a commodity for sales to purchasers performing different functions (for example, refiner; jobber, distributor; commercial, industrial or private consumer; service station tank car dealer; divided or undivided tank wagon dealer; etc.), or for purchasers performing the same function but located in different area or buying in different quantities or grades or under different conditions of sale. Price is prima facie evidence but not conclusive evidence to be considered in determining if a purchaser belongs to a particular class; however, a lower price to a particular purchaser which was to meet competition and otherwise was inconsistent with the seller's practice in setting the same price to the particular purchaser and one or more other purchasers, shall neither result in placing the particular purchaser in a lower price class nor be considered in determining a seller's maximum price."

310 The Office of Price Administration has further recognized the propriety of respondent's classification of its four customers in the Detroit Metropolitan Area by making provision in Section 6.5 (c) of said regulation for prices on delivered-at-destination sales "at the tank car level" to certain tank wagon or service station resellers, including Citrin-Kolb Oil Company, Stikeman Oil Com-

pany, Wayne Oil Company, and Ned's Auto Supply Company.

While the regulations of the Office of Price Administration permit respondent to file an application for adjustment in price in a case of this kind, the Office of Price Administration has uniformly held, in passing upon applications for price adjustment, that, unless the applicant shows that continuance of his existing maximum price would result in an overall loss in all of the seller's business, the application would be denied. If the Office of Price Administration would apply the same ruling to respondent it would be obliged to deny any application respondent might file on account of the Commission's order in this case.

311 VI. Change in Economic Conditions.

Economic conditions, since the time of the filing of the complaint herein and since the taking of the testimony, have so changed that the Order of the Commission does not accord with the presently existing situation.

(a) Since the filing of the Complaint, five (5) years have intervened, during which the United States has commenced and finished its participation in World War II, which war has caused economic repercussions and in particular, influenced the cost of doing business, of which the Commission will take judicial notice. The great increase in wages, in costs of material, and in other items, has caused a marked increase in the cost of sale and distribution of all kinds of merchandise, including gasoline, and a widening of the cost differential as between the tank car and tank wagon channels of distribution of gasoline.

It is, therefore, respectfully submitted that respondent should be permitted to adduce further evidence upon the question of the reasonableness and legality of the price differential, as between said differing methods of sale and delivery.

312 (b) It is the contention of the Commission herein that the effect of the price differential complained of in the proceeding (i.e., during the years 1936 to 1940) *might in the future be* to lessen, injure, destroy or prevent competition or tend to create a monopoly. After the lapse of five years, it is now possible to show by testimony, in retrospect, that *this has not been the result* of the price differential accorded respondent's jobber customers. For exam-

ple, the evidence would disclose that no service station, dealer or other retailer of gasoline in the City of Detroit has been forced out of business as a result of the discriminations complained of in this proceeding; that Ned's Auto Supply Company's sales have substantially decreased in the years since the conclusion of the hearings in this proceeding, during which period respondent has continued to supply gasoline to it at the tank car price, so that today Ned's Auto Supply Company is selling far less gasoline than during the years 1936 to 1940 referred to in the Findings; that competition in the City of Detroit is today so aggressive that a substantial portion of the gasoline sold in the City of Detroit is sold at prices below the ceilings fixed therefor by the Office of Price Administration.

313 Section 11 of the Clayton Act provides that the Circuit Courts of Appeal have authority to order additional evidence to be taken "if either party shall apply to the Court for leave to adduce additional evidence and shall show to the satisfaction of the Court that such additional evidence is material, and that there were reasonable grounds for the failure to adduce such evidence in the proceeding before the Commission," etc.

It would appear, therefore, to be reasonable for respondent to make this application to the Commission, for the purpose of showing changes in the factual situation which have occurred during the past five years, and also for the purpose of showing, in retrospect, that the price differential in question has not caused an injurious effect on competition or created monopolistic tendencies.

314 VII. Request for Clarification.

The Findings of Fact and Order to Cease and Desist issued by the Commission are, in many respects, ambiguous and uncertain and require clarification and revision by the Commission so as to render it possible for respondent, and others similarly situated, to understand the meaning and requirements thereof.

The following are the principal items which require such clarification and amendment:

(a) As to whether said Order applies to all transactions in which sales of gasoline are made to jobbers, or only to deliveries to jobbers across state lines, as mentioned in Paragraph Two of said Findings of Fact.

(b) As to whether said Order applies only to respondent's "Detroit area" marketing operations or to its operations, as well, in other areas and states in which it transacts business.

(c) As to whether said Order applies only to the sale of branded gasoline (i.e., gasoline marketed under the supplier's trade mark), or to all grades and types of gasoline —branded and unbranded.

(d) As to whether said Order establishes a pattern for the petroleum industry.

315 (e) As to whether said Order permits the granting of price differentials, without limitation as to amount, in the case of sales to jobbers who do not engage in retail operations, and who do not sell to resellers at less than respondent's posted tank wagon price.

(f) As to whether the less than one-half cent per gallon allowable differential mentioned in subparagraphs 4 and 5 of said Order applies to the sales mentioned in subparagraph 6 of said Order.

316 VIII. Conclusion—Relief.

(a) Respondent, for all the reasons stated, respectfully submits that the Order to Cease and Desist dated October 9, 1945, should be vacated, and an order be issued dismissing the Complaint.

(b) Respondent further moves in the event said Order is not vacated, that it be modified (1) by deleting subparagraph 6 of the Order, and (2) by amending subparagraphs 1, 2, 3, 4 and 5 of the Order to exclude therefrom those who perform the jobber function, i. e., maintain and operate their own bulk station facilities and deliver from such facilities by tank wagon to service stations, whether operated by themselves or by others.

(c) Respondent further moves, in the event the foregoing relief should be denied, that this proceeding be reopened for the taking of additional testimony and evidence.

(d) Respondent further moves, in the event none of the relief requested above is granted, that an order be entered by the Commission allowing respondent a reasonable additional period, but not less than sixty (60) days, after denial of such relief, within which to file with the Commission its written report concerning compliance with the Order 317 to Cease and Desist herein, as required by the final paragraph of said Order.

Respectfully submitted,
MacMahon, Abbott & Roberts,

ANSWER AND BRIEF ON ORDER TO SHOW CAUSE.

(Stamped: Federal Trade Commission—Received Sept. 25, 1946—Secretary.)

Comes now Standard Oil Company (Indiana), respondent herein, and, in accordance with the Order to Show Cause issued by Federal Trade Commission on January 23, 1946, submits the following as its answer and brief in reference to the Motion to Modify the original Order to Cease and Desist dated October 9, 1945:

324 I.

The Commission filed its Complaint in this proceeding on November 30, 1940. The introduction of testimony and other evidence before the Trial Examiner was concluded April 23, 1943, and the Order to Cease and Desist was entered October 9, 1945 and served upon respondent on October 26, 1945. Upon respondent's motion, the Commission granted respondent until January 26, 1946 to file a motion for rehearing and reconsideration of the Cease and Desist Order and until February 23, 1946 to file a report of compliance. On January 21, 1946, counsel for the Commission filed a Motion to Modify the Cease and Desist Order of October 9, 1945, and on January 23, 1946 an order was entered to show cause by February 11, 1946 why said motion should not be granted, such time being later extended to February 25, 1946. Respondent on January 25, 1946 filed its Motion for Rehearing and for Reconsideration of the Cease and Desist Order.

Thus, the status of the proceeding is that respondent's request for vacation of the original Cease and Desist Order or for the reopening of the proceeding for the taking
325 of additional testimony and evidence, and the Commission's counsel's motion to substitute a modified Order for the original Order are pending simultaneously.

With this preface, respondent hereby renews its objections to the original Cease and Desist Order for the reasons set forth in respondent's Motion for Rehearing and for Reconsideration of said Order. The relief sought and the points and arguments urged in said Motion are applicable to the proposed modified Order, and to avoid unnecessary repetition they are hereby urged with respect to said proposed modified Order as if repeated at length herein.

326 II.

Additionally, respondent respectfully maintains that the proposed modified Order to Cease and Desist, as submitted by counsel for the Commission under date of January 21, 1946, should not be adopted as the Order of the Commission herein, for the following reasons, to-wit:

(a) Neither the proposed modified Order nor the original Order is expressly limited as to its area of applicability. Since any order entered by the Commission must be based on the Findings of Fact, which Findings are based on and relate solely to evidence of respondent's transactions in the Detroit metropolitan area, it is submitted that such order should state expressly that it is limited to transactions of respondent in that area.

(b) Neither the proposed modified Order nor the original Order is expressly limited to the four customers of respondent named in the Complaint. For example,
327 subparagraphs 1 and 3 of the proposed modified Order

prohibit respondent from discriminating in the price of branded gasoline by selling such gasoline "to competing purchasers" at different prices in the manner and under the circumstances stated in the Findings of Fact or by otherwise discriminating in price "between purchasers" of such gasoline in a manner and degree substantially similar to the manner and degree of the discriminations referred to and described in the Findings of Fact. Subparagraphs 4, 5 and 6 refer to "some retailers", "any dealer, jobber, or wholesaler", and "any jobber or wholesaler", respectively, and prohibit the sale by respondent to them in the manner described therein. Failure to limit the Order to the four customers named in the Complaint, is, respondent submits, erroneous and objectionable since the only transactions complained of in the Complaint, the evidence or the Findings were sales by respondent to these four customers. The Commission has no authority to issue a blanket order requiring respondent to obey the law. The Commission's jurisdiction and authority in cases of this kind is founded solely upon Section 11 of the Clayton Act, as amended, which gives to the Commission, if it shall be of the
328 opinion that any of the provisions of the Act have been
or are being violated, authority to issue an order "requiring such person to cease and desist from such violations." Hence, the Commission is limited in its jurisdiction to the finding of specific violations and to the prohibition of such specific violations. It is not authorized to include in its order to cease and desist a prohibition of other violations as to which there has been no evidence submitted to it, nor to include in its order to cease and desist an injunction against any violation of the Act.

Thus, the proposed modified Order is objectionable and constitutes reversible error in that it attempts to prohibit respondent from selling to other customers in the Detroit metropolitan area than those named in the Complaint as to which the evidence in this case was taken. There is no finding that respondent discriminated in sales to any other customers than the four customers named in the Complaint. Hence, any order of the Commission in this case must be limited in its applicability to the four customers named in the Complaint.

329 The proposed modified Order is further objectionable since it is couched in the language of the Clayton Act, as amended, and purports to prohibit respondent from violating the Act as well as the Order. For example, sub-

paragraph 3 of the proposed modified Order prohibits discriminations "in a manner and degree substantially similar to the manner and degree of the discriminations referred to and described in the Commission's findings as to the facts herein." No respondent should be subjected to this type of order. In the language of Justice Holmes, "the words quoted are a sweeping injunction to obey the law" and are open to the objection in cases of this kind that the respondent ought to be informed as accurately as the case permits as to what it is forbidden to do.

Swift & Co. v. *United States,* 196 U. S. 375, 49 L. Ed. 518.

The Commission is bound by the same rules as those laid down by the United States Supreme Court for guidance of lower courts in the entry of injunctions. In *National Labor Relations Board* v. *Express Publishing Co.,* 85 L. Ed. 937, at page 937, the Court said:

330 "But the mere fact that a court has found that a defendant has committed an act in violation of a statute does not justify an injunction broadly to obey the statute and thus subject the defendant to contempt proceedings if he shall at any time in the future commit some new violation unlike and unrelated to that with which he was originally charged." Citing,

New York, N. H. & H. R. Co. v. *Interstate Commerce Commission,* 200 U. S. 361, 404, 50 L. Ed. 515, 526.

National Labor Relations Board v. *Swift & Co.,* (CCA 7th) 108 F. 2d 988.

In *New York, N. H. & H. R. Co.* v. *Interstate Commerce Commission, supra,* the United States Supreme Court disposed of this issue in the following unequivocal language:

"The contention, therefore, is that whenever a carrier has been adjudged to have violated the act to regulate commerce in any particular, it is the duty of the court, not only to enjoin the carrier from further like violations of the act, but to command it in general terms not to violate the act in the future in any particular. In other words, the proposition is that by the effect of a judgment against a carrier concerning a specific violation of the act, the carrier 331 ceases to be under the protection of the law of the land and must thereafter conduct all its business under the jeopardy of punishment for contempt for violating a general injunction. To state the proposition is, we think, to answer it. *Swift & Company* v. *United States,* 196 U. S. 375. The contention that the cited case is inapposite because it did not concern the act to regulate commerce, but involved a violation of the anti-trust act, we think is also answered by the mere statement of the proposition. The requirement of the act to regulate commerce that a court shall enforce an observance of the statute against a carrier who has been adjudged to have violated its provisions, in no way gives countenance to the assumption that Congress intended that a court should issue an injunction of such a general character as would be violative of the most elementary principles of justice. The injunction which was granted in the case of *In re Debs,* 158 U. S. 564, was not open to such an objection as its terms were no broader than the conspiracy which it was the purpose of the proceeding to restrain. To accede to the doctrine relied upon would compel us, under the guise of protecting freedom of commerce, to announce a rule which would be destructive of the fundamental liberties of the citizen."

See also,

Federal Trade Commission v. *Beechnut Packing Co.,* 257 U. S. 440, 66 L. Ed. 307.

332. We submit that no order of the Commission should include any language which is subject to the construction that it constitutes a prohibition against any violation of the Act or against anything other than the specific violations found by the Commission in its Findings of Fact.

(c) Subparagraphs 1 and 3 of said proposed modified Order do not inform respondent, and others similarly situated, with reasonable definiteness and accuracy, what specific acts are prohibited. Said paragraphs all refer to the "circumstances" and "discriminations" stated, referred to, and described in the Findings of Fact, which Findings consists of 16 typewritten pages. Subparagraph 3 forbids discrimination "in a manner and degree substantially similar to the manner and degree of the discriminations referred to and described in the Commission's findings."

These two paragraphs are so vague and uncertain as to fail to afford an ascertainable standard or basis of conduct.

Similar language used by the Commission in its order
333 to cease and desist *in re Milk and Ice Cream Can Institute,* Docket No. 4551, was stricken by the circuit

court of appeals on a petition to review the order. (........ F. 2d ...., January 7, 1946.)

(d) Subparagraphs 1, 2 and 3 of the proposed modified Order are inconsistent with subparagraphs 4, 5 and 6 thereof, in that subparagraphs 1, 2 and 3 do not incorporate the provisos which are annexed to subparagraphs 4, 5 and 6, which provisos (if properly revised, as hereinafter pointer out) are necessary in order to bring such directives within the purview of the Clayton Act, as amended.

(e) If we understand subparagraph 1 and the law correctly, it can relate only to retail activities of the four customers of respondent named in the Complaint. The "competing purchasers" there referred to are apparently the jobbers who have retail activities, the retailer customers of such jobbers, and the retailer customers of respondent in Detroit. The Commission found as a fact that respondent allowed a different price to its jobber customers in
334 Detroit who had retail activities than it did to its own
retailer customers. The Commission found as a fact that these differing prices were discriminatory in that they had or might have the effect of substantially lessening, injuring or destroying competition between said retailer customers. Based on such findings, subparagraph 1 commands respondent to cease selling at different prices to such jobbers for resale at retail than it sells to its own retailer customers.

This subparagraph goes beyond the Clayton Act, as amended, as does subparagraph 1 of the original Order, in that it prohibits different prices without reference to their effect upon competition, without reference to the possibility that such differing prices may be justified on the basis of differences in the cost of sale or delivery to such purchasers, and without reference to the possibility that such differing prices may be made in good faith to meet equally low or lower prices offered to such purchasers by competitors of respondent. Differing prices are not unlawful per se, but they become so only when they have the effect on competition prohibited by the Clayton Act, as amended, and
335 then only when they cannot be justified on the basis of
differences in cost of sale or delivery to different purchasers or on the basis of a bona fide meeting of competition.

(f) Subparagraph 2 of the proposed modified Order directs respondent to cease and desist from "continuing or resuming the discriminations * * * referred to and de-

scribed in the Commission's Findings." This language is vague and indefinite and does not sufficiently advise respondent what it may do or may not do under the Order. The Findings, for example, state that the Stikeman Oil Company, Inc., one of the four jobber customers of respondent involved in this proceeding, has carried on no retail activities since 1938 and that "there is no evidence that the company (Stikeman) ever sold gasoline to resellers at a price lower than the posted tank wagon price charged by respondent to its dealers." Hence, respondent's sales to Stikeman could not have constituted a violation of the Clayton Act, as amended, since it was impossible for those sales or Stikeman's resales to have had the adverse effect on com-
petition that is a necessary element of any discrimina-
336 tion under said Act. However, it cannot be determined
from the language of subparagraph 2 whether respondent may continue to sell the Stikeman Oil Company, Inc. in tank car lots at the tank car price or whether the proposed order prohibits such sales.

Similarly, the Findings state that there is no evidence that the Wayne Oil Company, another of the four jobber customers of respondent involved in this proceeding, "ever sold gasoline to resellers at a price lower than the posted tank wagon price charged by respondent to its dealers." The Wayne Oil Company is today carrying on no retail operations. Yet, it cannot be determined from the language of subparagraph 2 whether the proposed modified Order is designed to prohibit respondent from selling the Wayne Oil Company in tank car lots at the tank car price, or whether under the Order respondent may continue to make such sales.

The Findings also state that the Citrin-Kolb Oil Company, the third of the four jobber customers of respondent involved in this proceeding, sold, during the two-year period
ending December 31, 1940, less than 20% of its gaso-
337 line to its retail service station dealer customers at
prices below respondent's posted tank wagon price, and during this period operated a few service stations. Today, the Citrin-Kolb Oil Company operates no service stations, carries on no retail activities, and resells only at respondent's posted tank wagon price. Again, it cannot be determined from the language of subparagraph 2 whether the proposed modified Order, if entered, will prohibit respondent from continuing to sell the Citrin-Kolb Oil Company in tank car lots at the tank car price.

Ned's Auto Supply Company is the only one of the four customers of respondent involved in this proceeding which, according to the Findings, resold gasoline exclusively or principally through its own service stations. If the proposed modified Order is designed to prohibit respondent from continuing to sell Ned's in tank car lots at tank car prices, but as we assume, is not intended to prohibit such sales to Stikeman and the other jobbers who carry on no retail activities, then respondent submits that sales to Stikeman and other jobbers who carry on no retail activi-
338 ties should be expressly excepted from subparagraph
2 of the proposed modified Order so that respondent will know it may continue to make such sales without violating the Order.

(g) Not only should any Cease and Desist Order entered in this proceeding contain appropriate language permitting respondent to sell to its jobber customers in tank car lots at the tank car price, as set forth in the preceding subparagraph (f) of this brief, but such Order should, respondent submits, include Ned's Auto Supply Company in the category of jobber customers and permit respondent to sell Ned's in like manner at such price. As pointed out by the United States Supreme Court in *Phillips* v. *Walling*, 89 L. Ed. Adv. Opinions 705, businesses such as Ned's "possess the essential characteristics of both the retailer and wholesaler. Their wholesale functions, which are integrated with but are physically distinct from their retail functions, are performed through their warehouses and central offices. That fact is the essential key to the problem presented by the case." Applying Justice Murphy's language in the above case, Ned's "is composed of
339 (six) retail establishments and a single wholesale
establishment." Deliveries to Ned's bulk plant, its "wholesale establishment," are in exactly the same category as deliveries to the bulk plant of any other jobber customer of respondent, and respondent should not be prohibited from making such deliveries at the same price as to its other jobber customers, viz., in tank car lots at the tank car price.

(h) The provisos with respect to allowable differentials based on cost differences in subparagraphs 4 and 5 are qualified in the proposed modified Order by language making them inapplicable where such allowable differentials adversely affect competition. It is submitted that differentials based on cost differences are permitted by the law even though they may have an adverse effect on competition.

Both subparagraphs 4 and 5 prohibit differences in the selling price to competing purchasers without reference to the effect of such differing prices on competition, whereas as a matter of law such differing prices are not unlawful per se but become so only when they have the adverse effect upon competition prohibited by the Clayton Act,
340 as amended.

(i) Subparagraph 6 of the proposed modified Order does not give effect to the provisions of the statute which make unlawful only differences in price having the effect upon competition prohibited by the statute. Further, it is not clear from the language of the proviso whether the differences in cost there referred to are those of the supplier or of the jobber.

(j) Subparagraph 6 is further objectionable because it would impose an extra-legal obligation upon respondent. Under it, respondent may legally sell to a jobber who has no retail activities, in tank car quantities at the tank car price. If, after such wholly legal sale is consummated, the purchaser, having complete title to and possession of the product sold, undertakes to resell it at a price which the Commission conceives to be harmful to competition, the original legal sale in retrospect becomes unlawful and respondent is charged with liability therefor as a violation of the Commission's Order and is subjected to the penalty for such violation. It is submitted that there
341 is nothing in the Clayton Act, as amended, or in the pleadings, that affords a legal basis for such a provision in any order of the Commission.

(k) Respondent further states that the above objections to such proposed modified Order to Cease and Desist are made for the consideration of the Commission, without in any manner conceding that any order should be issued, except as outlined and stated at page 64 of its Motion for Rehearing and for Reconsideration heretofore filed.

342

III.

Respondent believes it has demonstrated in its Motion for Rehearing and for Reconsideration of the Cease and Desist Order of October 9, 1945 that said Order should be vacated and the Complaint dismissed; that neither said Order of October 9, 1945 nor the proposed modified

Order is in the public interest; that under either Order competition would be restrained, lessened and injured, jobbers would be forced out of business, motorists and other consumers would pay more for gasoline; that neither Order is based on transactions in interstate commerce; that neither Order is supported by the pleadings or the evidence in this case. Respondent trusts, therefore, that the Commission will enter an order of dismissal.

If, however, the Commission will not dismiss the Complaint, respondent respectfully urges that it is the duty of the Commission to reopen the proceedings for the introduction of up-to-date evidence. As set forth in *United Corporation* v. *Federal Trade Commission,* 110 F. 2d 473, orders of the Federal Trade Commission, like decrees in equity, should be based on the situation that exists when the Order is entered, not on a situation that existed
343 when the complaint was filed or at some other date.

But the only evidence in this case depicts the situation that existed in 1936 to 1940, inclusive. For example, the Findings, which are dated October 9, 1945, state that the Citrin-Kolb Oil Company "is operating five retail service stations at the present time," that the Wayne Oil Company "is operating two services stations at the present time," that "Citrin-Kolb Oil Company, Wayne Oil Company and Stikeman Oil Company, Inc. sell the respondent's gasoline at both wholesale and retail." These may have been the facts in 1940, but they are not the facts today, nor were they the facts on October 9, 1945, the date of the Findings. Ten years have elapsed since the first of the transactions shown in evidence, more than five years since the last. A world war has since intervened, prices and costs have risen in an inflationary spiral. It is now necessary to conjecture whether the alleged discriminations might or might not have the detrimental effect on competition that is a prerequisite to a cease and desist order under the Clayton Act, as amended; sufficient time has elapsed so that the facts with respect to the effect on competition
344 of the practices complained of are now readily ascertainable. We submit that the evidence is too stale to support a cease and desist order in this proceeding.

345

IV.

It is, therefore, respectfully submitted by respondent that:

(1) The original Order to Cease and Desist herein should be vacated, and, in lieu thereof, an order should be issued by the Commission dismissing the Complaint.

(2) The proposed modified Order to Cease and Desist should not be issued by the Commission, but in lieu thereof an order should be entered dismissing the Complaint.

(3) In the event the relief asked for in (1) and (2) above should not be granted, the original Order to Cease and Desist or the proposed modified Order, if substituted for said original Order, should be modified by deleting subparagraph 6 thereof and by amending subparagraphs 1, 2, 3, 4 and 5 thereof so as to exclude from the operation thereof all those who perform the jobber function, i. e., who maintain and operate their own bulk station facilities and deliver gasoline from such facilities by tank wagon to service stations, whether operated by themselves or by others.

346 (4) In the event the relief prayed for in (1), (2) and (3) should not be granted, this proceeding should be reopened for the taking of additional and supplemental testimony and evidence.

(5) In the event none of the relief requested above is granted, an order should be entered by the Commission allowing respondent a reasonable additional period, but not less than sixty (60) days, after denial of such relief, within which to file with the Commission its written report concerning compliance with the Order to Cease and Desist heretofore entered herein or any modification thereof.

Chicago, Illinois, February 14, 1946.

Respectfully submitted,
MacMahon, Abbott & Roberts,

349 BEFORE FEDERAL TRADE COMMISSION.

* * (Caption—4389) * *

RESPONDENT'S ANSWER AND BRIEF IN OPPOSITION TO SECOND PROPOSED MODIFICATION OF ORDER TO CEASE AND DESIST.

Comes now Standard Oil Company (Indiana), respondent herein, and submits the following as its Answer and Brief in opposition to the second proposed modification of the Order to Cease and Desist dated October 9, 1945, as set forth in the letter of Counsel for the Commission dated February 15, 1946:

350 I.

The Commission filed its Complaint in this proceeding on November 30, 1940. The introduction of testimony and other evidence before the Trial Examiner was concluded April 23, 1943. An Order to Cease and Desist was entered October 9, 1945 and served upon respondent October 26, 1945. Since then three motions have been filed, all of which are now pending:

(1) Motion of respondent for rehearing and reconsideration of the Cease and Desist Order or for the reopening of the proceeding for the taking of additional evidence. This motion was filed by respondent January 25, 1946.

(2) Motion filed by Counsel for the Commission on January 21, 1946 to modify the Cease and Desist Order. Respondent filed its Answer and Brief in opposition to said motion, under date of February 14, 1946.

(3) Motion proposing a further modification of said Order to Cease and Desist as set forth in a letter from Counsel for the Commission dated February 15, 1946. By stipulation, the Commission on February 25, 1946 entered an Order providing that "respondent may have to and 351 including April 1, 1946 within which to prepare and file its Answer and Brief in response to the proposed modification of Order to Cease and Desist as submitted to respondent by letter of February 15, 1946, * * * and that all further proceedings herein be stayed until April 1, 1946." This Answer and Brief is submitted in accordance with the foregoing order.

Thus, the status of the proceeding is that respondent's request for a vacation of the original Cease and Desist Order, or for the reopening of the proceeding for the taking of additional evidence, and the two motions to substitute a modified order for the original Cease and Desist Order are pending simultaneously.

Inasmuch as respondent filed (1) its Motion for rehearing and for reconsideration of the Cease and Desist Order on January 25, 1946 and (2) its Answer and Brief in reference to the Motion to modify the original Order to Cease and Desist under date of February 14, 1946, and set forth at length in these documents its objections to the original Order to Cease and Desist and to the first proposed modification thereof, respondent (in order to avoid repetition) has set forth herein only additional objections to the
352 second proposed modification of the Commission's Order, but again renews its objections (a) to the original Cease and Desist Order for the reasons set forth in respondent's motion for rehearing and reconsideration of said Order, and (b) to the first proposed modification thereof for the reasons set forth in respondent's Answer and Brief in reference thereto and urges the points and arguments urged in said Motion and said Answer and Brief as if set forth at length herein.

353

II.

In addition to the reasons set forth in respondent's Answer and Brief in reference to the first proposed modification of the original Cease and Desist Order, respondent objects to the second proposed modification of the said Order, as set forth in the letter of Counsel for the Commission dated February 15, 1946, for the following reasons:

(a) The original Order to Cease and Desist entered October 9, 1945, by its terms, applied to the sales by respondent of "gasoline of like grade and quality." The first proposed modification of that Order, as set forth in the Motion to Modify filed by Counsel for the Commission, by its terms, applied only to the sale by respondent of "branded gasoline." The second proposed modification of that Order, as set forth in said letter of February 15, 1946, purports to apply to the sale by respondent of "gasoline of like grade and quality," as did the original Order. We assume that the addition of the word "branded" by Counsel for the Commission in their first proposed modification of the

Order, as set forth in their Motion to Modify, was made
354 for the reason that the evidence taken in this proceeding dealt only with "branded" gasoline, and that accordingly Counsel for the Commission felt compelled to make any proposed modification of the Order conform with the evidence and the Findings of Fact. We are at a loss, therefore, to understand why, in the second proposed modification of the Order, Counsel for the Commission has seen fit to eliminate the word "branded" in describing the gasoline to which the Order shall apply.

Section 11 of the Clayton Act, as amended, vests the Commission only with authority to issue an order requiring a respondent to cease and desist from the violations included in the Complaint, covered by the evidence, and incorporated in the Findings of Fact. The only gasolines referred to therein are respondent's "branded" gasolines, known as "Solite with Ethyl", "Red Crown", and "Stanolind". (Findings of Fact, p. 2)

The Trial Examiner in his report on the evidence recognized that the only kinds of gasoline involved in the case are "branded" gasolines. For example, on the question of meeting competition, the Trial Examiner found as follows:

"The differentials on its branded gasolines respond-
355 ent granted Ned's Auto Supply Company, at all times subsequent to March 7, 1938, and Stikeman Oil Company, Citrin-Kolb Oil Company and the Wayne Oil Company, at all times subsequent to June 19, 1936, were granted to meet equally low prices offered by competitors on branded gasolines of comparable grade and quality." (underlining ours) (Trial Examiner's Report, p. 55)

Many other examples could be cited to show that only branded gasolines are involved in this case.

Therefore, it is respectfully submitted by respondent that any Order to Cease and Desist issued or permitted to remain in effect in this proceeding should be expressly limited to "branded" gasolines marketed by respondent.

(b) As indicated in respondent's Brief in answer to the first proposed modification of the Cease and Desist Order, if up-to-date evidence were taken by the Commission it would show that three of the four customers named in the Complaint are not now engaged in retail activities and that none of them resell to their dealers at less than respondent's posted tank wagon price. It was there pointed out that one of said customers had, according to the evidence

and Findings of Fact, discontinued its retail activities
356 in 1938; that "there is no evidence that the company (Stikeman Oil Company, Inc.) ever sold gasoline to resellers at a price lower than the posted tank wagon price charged by respondent to its dealers" (Findings, p. 5); that as to the second of said customers, there is no evidence that the company (Wayne Oil Company) never sold gasoline to resellers at a price lower than the posted tank wagon price charged by respondent to its dealers" (Findings, p. 5); and that the third of said customers (Citrin-Kolb Oil Company) resells only at respondent's posted tank wagon price. Under these circumstances, it would be impossible for respondent's sales to these customers to result in discriminations under the Clayton Act, as amended.

In other words, the Commission could not have produced evidence valid as of the date of said Order or as of today which would support any order affecting respondent's transactions with Stikeman Oil Company, Inc., Wayne Oil Company, or Citrin-Kolb Oil Company.

We repeat what was said in our Answer and Brief on Order to Show Cause: An order of the Federal Trade Commission, like decrees in equity, should be based on evidence with respect to the situation which exists when the order is entered, not on evidence of a situation which existed some five years prior thereto.

357 *United Corporation* v. *F. T. C.*, 110 F. 2d 473.

We respectfully submit, therefore, that as of October 9, 1945, or as of today, the Commission is not authorized to enter any order affecting respondent's transactions with Stikeman Oil Company, Inc., Wayne Oil Company, or Citrin-Kolb Oil Company. Hencce, any Cease and Desist Order issued or permitted to remain in effect herein should expressly exclude from the prohibitions thereof transactions of respondent with said three customers.

(c) Stripped of everything but their essentials, subparagraphs 5 and 6 of the original Order and of the proposed modifications thereof are price-fixing in nature and result. Their effect is to fix directly the price at which respondent's jobber-customers who have no retail activities may resell to their dealer accounts, and to fix indirectly the price at which the retailer-customers of such jobbers may sell to the public.

The question arises as to whether it is within the power of the Commission so to do. It has been held that the

Commission "has no general authority to compel competitors to a common level, to interfere with ordinary
358 business methods, or to prescribe arbitrary standards for those engaged in the conflict for advantage called competition." The purpose of both the Federal Trade Commission Act and the Clayton Act, as amended, "was to advance the public interest by securing fair opportunity for the play of the contending forces ordinarily engendered by an honest desire for gain. And to this end, it is essential that those who adventure their time, skill and capital should have large freedom of action in the conduct of their own affairs." *F. T. C.* v. *Sinclair Refining Co.*, (1923), 261 U. S. 463, 67 L. Ed. 746.

Congress did not intend the Federal Trade Commission to control or impede competition, "to judge what is too fast a pace for some and to compel others to slow up. * * * It is not illegal for one competitor to do that which is beyond the financial power of the other; nor do we find anything that authorized the Federal Trade Commission to regulate competition for that reason." *Sinclair Refining Co.* v. *F. T. C.*, 276 F. 686.

Since the right to fix prices was never given to the Federal Trade Commission, subparagraphs 5 and 6 of the original Order and of the proposed modifications thereof, which are admittedly designed to fix respondent's jobber-customers' resale price and to stabilize the retail
359 price of gasoline, are not only economically unsound for the reasons set forth in respondent's Answer and Motion heretofore filed, but are an attempt to exercise a power not granted to the Commission by Congress.

Subparagraph 6 is further without the scope of the authority of the Commission, because:

(1) It is not based upon any allegation of the Complaint.

(2) There is nothing in the Clayton Act, as amended, which authorizes the Federal Trade Commission to make a supplier liable for the acts of its customers.

(3) It requires respondent to police sales made by its jobber-customers, which sales are admittedly in interstate commerce.

(4) It would operate to compel a supplier to inspect the books and records of its jobber-customers and to supervise the operations of the jobber.

Respondent submits, therefore, that said subparagraphs

5 and 6 should be eliminated from any order entered by the Commission.

360 (d) If we understand the second proposed modification of the Commission's Order correctly, proviso (a) thereof limits the applicability of the prohibitions of the Order to transactions between respondent and its four customers named in the Complaint in this proceeding. If such is not the correct construction of said proviso (a), then we submit that any Order issued or permitted to remain in effect by the Commission in this proceeding should be expressly so limited in its application, inasmuch as there is nothing in the Complaint, the evidence, or the Findings that refers in any way to discriminatory prices allowed by respondent to other customers in the Detroit metropolitan area, or any other area, nor is there anything in the Complaint, the evidence, or the Findings from which an inference of the allowance of any such discriminatory prices could be drawn.

(e) There is no allegation in the Complaint with respect to jobbers who have no retail activities, and proviso (c) may have been included in the second proposed modification for the purpose of excluding sales to such jobbers from the prohibitions of the Cease and Desist Order
361 and thereby making the Order conform to the allegations of the Complaint. Yet, standing alone, proviso (c) seems to express the theory that respondent may not sell to a jobber at any different price than to a retailer, except where such differing price makes only due allowance for respondent's differences in cost of manufacture, sale or delivery resulting from the differing methods or quantities in which gasoline is to such purchasers sold or delivered. Other provisions of said proposed modification do not prohibit a different price to jobbers, as such, than to retailers. Indeed, all of the various Orders entered or proposed clearly contemplate the classification of customers by respondent and the establishment of prices to such customers based on quantity and method of delivery and on the function being performed by them. The statute contains no prohibition against such practice, which is universally followed in all trades and businesses in the country. So far as we know, there has never been any contrary contention advanced heretofore.

As indicated below; the constant demand of jobbers is that the margin between tank car and tank wagon prices be widened. These demands are based upon the increased costs of the jobber and have no relationship to the costs 362 of the supplier. While the Commission did not indicate what an appropriate method of cost accounting would be, it did criticize respondent's regular and customary methods. No matter what method of accounting is used, in order for the jobber to operate at a profit there must be an element of profit in the computation of the jobber price in addition to his costs, which costs have a tendency to be the same as the supplier's. Thus, assuming the supplier's and jobber's actual costs of sale and delivery by tank wagon to be the same, the differential allowable to jobbers on tank car sales under the Commission's theory would be measured by the difference between such costs and the supplier's costs of sale and delivery by tank car. This obviously eliminates any element of profit to the jobber. Indeed, in this proceeding, the Commission found that respondent's allocation of a return on its investment in facilities to the tank wagon cost of operation was not allowable, thus further restricting the allowable margin to jobbers. Certainly under the theory of Counsel for the Commission, as expressed in proviso (c), it would be impossible for any supplier to grant a wider margin to jobbers as demanded in the resolution of the Illinois Petroleum Marketers Association, to which reference is hereinafter made.

363 Respondent would not be so concerned about proviso (c) if it were not for the fact that proviso (b) covers the same ground without the specification of the classes of customers to which it applies. Such a proviso, in general terms, followed by the same proviso in specific terms designating the particular classes of customers to which it applies, impresses the latter with considerably more significance than would otherwise accrue to the general proviso standing alone.

We cannot escape the conclusion that Counsel for the Commission is expressing the theory that a supplier may not classify his customers on the basis of the quantity sold and the method of delivery to them and establish a price differential allowable to such customers based on such factors plus the function performed by them, that all purchasers, whether or not they are in competition with each other in the resale of the product purchased, must have the same price except for differentials justified solely by differences in supplier's costs of sale and delivery. If that is the theory of Counsel for the Commission in incorpo-

rating proviso (c) in the second proposed modification of the Order, it would seem that, in all fairness, before it is adopted by the Commission, trade generally should be advised by a wide publicity of the theory, so that it may
364 properly and promptly express its opposition thereto,
if any. It is obvious, of course, that the imposition by enforcement proceedings of such a theory on trade generally in this country would put the jobber out of business and cause an upheaval in business practices.

Neither the Clayton Act, nor the Robinson-Patman amendment thereto, has changed the rule that a supplier of merchandise may classify his customers. Thus, in *Mennen* v. *Federal Trade Commission,* 288 F. 774 (certiorari denied, 67 L. Ed. 1219), it was held that the supplier was under no obligation to sell to retailers at the same price as it sold to wholesalers, the Court saying:

> "It did not discriminate as between retailers, but sold to all retailers on one and the same scale of prices. There is nothing unfair in declining to sell to retailers on the same scale of prices that it sold to wholesalers, even though the retailers bought, or sought to buy, the same quantity the wholesalers bought. * * * Whether a buyer is a wholesaler or not does not depend upon the quantity he buys. It is not the character of his buying, but the character of his selling, which marks him as a wholesaler, as the court pointed out in *Great Atlantic and Pacific Tea Company* v. *Cream of Wheat Company, supra.*" (227 F. 46)

We submit that the legality of a differential between
365 jobbers' and retailers' purchasing prices is not affected
at all by the Clayton Act, as amended, and that, therefore, if any Order to Cease and Desist is issued or permitted to remain in effect in this proceeding, it should expressly exclude from the prohibition thereof all sales to jobbers who have no retail activities.

(f) Proviso (d) of the second proposed modification of the Order is unwarranted by the provisions of the statute. It states:

> "That none of the provisions of the order shall be taken as inhibiting any price differentials by respondent that reflect differences in the grades and qualities of such gasoline." (underlining ours)

The Robinson-Patman Act forbids, in Section 2 (a), that any person engaged in commerce, in the course of such commerce, shall "discriminate in price between different purchasers of commodities of like grade and quality * * *." The statute does not provide that price differential shall be allowable if they "reflect differences" in the grades and qualities of such commodities.

There is, therefore, no warrant for the language used
366 in proviso (d). If respondent desired to do so, it might conceivably sell gasoline of superior grade and quality for a lesser price than that charged for gasoline of lower grade and quality, so long as there existed no discrimination as between purchasers of gasoline of the same grade and quality. The proviso, however, purports to require that gasoline be priced in proportion to its grade and quality; that gasoline of a superior grade and quality be priced proportionately higher than that of a lower grade and quality, regardless of the fact that, as between purchasers of the same grade and quality, no discrimination in price, as against the purchaser, is made by the supplier.

It is, therefore, respectfully submitted that this proviso is technically incorrect and does not effectuate its apparent purpose; and that it should be drafted so as to state that the order is not to be taken as prohibiting price differentials by respondent, as between gasolines of different grades and qualities.

367 (g) The second proposed modification of the Commission's Order, by the addition of provisos (a), (b), (c) and (d), purports to give effect to those provisions of the statute permitting differences in price to different purchasers when such different prices have no tendency to substantially lessen, injure or destroy competition, or when they can be justified on the basis of differences in cost, or when different grades or qualities of gasoline are involved. Counsel for the Commission failed to include in said provisos any recognition of the right of respondent in good faith to meet competition. Such failure completely overlooks the effect of the decision of the United States Supreme Court in *Fairmont Creamery Co.* v. *Minnesota*, 274 U. S. 1, 71 L. Ed. 893, in which it was held that a state statute prohibiting the purchase of products at a higher price in one locality than in another was unconstitutional and void because it failed to preserve the right in good faith to meet competition.

Congress saved the Clayton Act and the Robinson-Patman Act from the stigma of unconstitutionality by expressly providing that the meeting of a competitor's lower

price in good faith constituted a defense to a charge of discriminatory conduct. Accordingly, any order entered
368 by the Commission herein should include a proviso expressly permitting respondent to establish prices in good faith to meet lower prices offered by its competitors.

There have been some important decisions rendered since this case was submitted to the Commission which indicate that respondent is entitled to the incorporation of such a proviso. In fact, these decisions, in our opinion, require that the Complaint be dismissed, in view of the recommendations of the Trial Examiner, who expressly found:

"The differentials on its branded gasolines respondent granted Ned's Auto Supply Company, at all times subsequent to March 7, 1938, and Stikeman Oil Company, Citrin-Kolb Oil Company and the Wayne Oil Company, at all times subsequent to June 19, 1936, were granted to meet equally low prices offered by competitors on branded gasolines of comparable grade and quality." (underlining ours) (Trial Examiner's Report, p. 55)

The Commission, in its Findings of Fact, took the position that these facts were immaterial. It is now respectfully maintained that this position of the Commission is untenable, in view of the decision in the Moss case, in which the Supreme Court of the United States denied certiorari on October 8, 1945, one day prior to the issuance of the Commission's original Order to Cease and Desist herein.

369 In substantiation of this point, we present the following comments on and quotations from the Moss case, and also from other cases decided since the instant case was submitted to the Commission.

In *Moss v. Federal Trade Commission*, 148 F. 2d 378, 90 L. Ed. 41, 66 S. Ct. 44 (certiorari denied, October, 8, 1945), the Second Circuit Court of Appeals, in a per curiam opinion held:

"* * * Section 2 (a) makes price discrimination unlawful only in case it lessens, or tends to prevent, competition with the merchant who engaged in the practice; and that, no doubt, means that the lower price must prevent, or tend to prevent, competitors from taking business away from the merchant which they might have got, had the merchant not lowered his price below what he was charging elsewhere. * * * Congress adopted the common device in such cases of shifting the burden of proof to anyone who

sets two prices, and who probably knows why he has done so, and what has been the result? If he can prove that the lower price did not prevent or tend to prevent anyone from taking away the business he will succeed, for the accuser will not then have brought him within the statute at all. Nevertheless, he may succeed even though he fails to establish such a negative; for, although it will then appear that he has lessened, or prevented, competition, the proviso of Sect. 2 (b) will still excuse him, if he can show that his lower price did not undercut his competitors, but merely
'met' their 'equally low price.' In short, that is a
370 defense to the violation of Sect. 2 (a). * * *

The Commission appears to believe that, in order to prove the affirmative defense, anyone who sells at two prices must prove that he knew what was his competitor's price, must mean not to undercut it, and must offer to sell at what he knows to be no lower than his competitor's price. We agree that he must not undercut his competitor's price; but whether it is a condition upon the defense that he must know what that price is, is another question which we reserve. If in fact he does not undercut his competitor's price, he may escape, even though he does not know what the price is, though it is only by chance that he has not undercut it. That is to say, we need not now decide whether the phrase, 'in good faith', means more than that the offer shall be made with actual intent to sell at the price named. That question does not arise here, for the petitioner did not prove that in any of the instances its price was no lower than that of its competitors. For these reasons, we hold that the findings were supported by the evidence." (underlining ours)

In the instant case, the uncontroverted testimony shows that respondent, in order to meet the competitive offers made by other suppliers of branded gasoline of like grade and quality to the four jobbers named in the Complaint, granted to said four jobbers a price differential of one and one-half cents per gallon for tank car deliveries to the jobbers' own bulk storage plants; and that this price
371 allowance is the smallest differential allowed in the
Detroit metropolitan area, the customary price differential being two cents. It was testified by James E. Dyer, General Sales Manager of Sinclair Refining Company, of New York City, that gasoline jobbers throughout the United

States purchase gasoline by tank car delivery at price differentials ranging from one and one-half cents to two and one-half cents off the tank wagon price, the former differential being the minimum (1515-16).

Therefore, to use the language of the court in the Moss case, supra, respondent, in allowing the one and one-half cent differential to it four named jobber-customers, did not "undercut" its competitors' price, but merely "met" the minimum differential; and several large oil suppliers sold (and now sell) comparable gasolines in the Detroit metropolitan area to tank car customers at a margin or differential more than one and one-half cents off their posted tank wagon price. (53-4)

The Court held, in *Federal Trade Commission* v. *Staley Manufacturing Co.*, 89 L. Ed. 989, that Congress has left to the Federal Trade Commission the determination of fact in each case whether the person charged with making discriminatory prices acted in good faith to meet a competitor's
372 equally low prices. The determination of this fact from the evidence is for the Commission, and it was held that a respondent is entitled, as a matter of right, to a finding of the Commission as to the fact.

Citing:

Federal Trade Comm. v. *Pacific States Paper Trade Assoc.*, 273 U. S. 52, 71 L. Ed. 534, 47 S. Ct. 255.

Federal Trade Comm. v. *Algoma Lumber Co.*, 291 U. S. 67, 78 L. Ed. 655, 54 S. Ct. 315.

Quoting further from the Staley case, supra, the Court said:

"The Commission's conclusion seems inescapable that respondent's discriminations, such as those between purchasers in Chicago and Decatur, were established not to meet equally low Chicago prices of competitors there, but in order to establish elsewhere the artificially high prices whose discriminatory effect permeates respondent's entire pricing system. The systematic adoption of a competitor's prices by including unearned freight in respondent's delivery price, or, what amounts to the same thing, the maintenance of a discriminatory and artificially high F. O. B. factory price in order to take advantage of the correspondingly high prices of a competitor, based on its higher costs of delivery, is not sufficient to justify the discrimination, for respondent fails to show, as the statute requires, the establishment of a 'lower price' made in good faith to meet the equally low price of a competitor." (underlining ours)

373 In the case of *Corn Products Refining Co.* v. *Federal Trade Commission,* 89 L. Ed. 977, the Commission charged violation of Section 2 (a) of the Robinson-Patman Act, in that, inter alia, petitioners favored certain tank wagon customers by permitting them to book orders at the lower prices charged for tank car deliveries, and to take deliveries by tank wagon over extended periods of time. The Commission found, upon evidence held by the Supreme Court to be ample, that these discriminations were in fact made by petitioners.

Petitioners contended that these sales to favored customers were made to meet the competition of other sellers of glucose and were, therefore, excepted from the prohibition of Section 2 (a) by the proviso of subsection (b) of Section 2 of the Clayton Act, as amended, which provides:

"Provided, however, that nothing herein contained shall prevent a seller rebutting the prima-facie case thus made by showing that his lower price * * * was made in good faith to meet an equally low price of a competitor."

Said the Supreme Court:

"The only evidence said to rebut the prima facie case made by proof of the price discriminations was given by witnesses who had no personal knowledge of the transactions, and was limited to statements of each wit-
374 ness's, assumption or conclusion that the price discriminations were justified by competition. Examination of the testimony satisfies us, as it did the court below, that it was insufficient to sustain a finding that the lower prices sustain a finding that the lower prices allowed to favored customers were in fact made to meet competition. Hence, petitioners failed to sustain the burden of showing that the price discriminations were granted for the purpose of meeting competition." (987) (underlining ours)

Moreover, it is respondent's claim that the right to meet the lower prices offered by its competitors is an inherent right which exists even independent of express statute. In other words, the right of self-defense is in the category of inherent, inalienable rights, and protected against deprivation by the Constitution of the United States.

To this point we cite *Fairmont Creamery Co.* v. *Minnesota,* supra, in which the Supreme Court of the United

States held that a denial by state statute of the right to meet competition was unconstitutional, by reason of the provisions of he Fourteenth Amendment. The same principle would apply to acts of Congress, in view of analogous provisions of the Fifth Amendment.

If, therefore, the amendment to the Clayton Act has (as the Commission's Findings of Fact herein state) rendered respondent's proof immaterial upon the question of 375 meeting the tank car gasoline prices of competitors, it is submitted that the amendment, in that respect, is invalid. However, the decision in the Moss case indicates that the 1936 amendment to the Clayton Act has not had that effect.

(h) All of the evidence taken in this proceeding and the Findings of Fact support the conclusion that the regular course of respondent's business in the Detroit metropolitan area involved only deliveries from its marine terminal at River Rouge, Michigan, where such gasoline has come to rest at the end of its interstate shipment, to its four jobber-customers in Detroit; that "in some instances the respondent has shipped gasoline and other petroleum products from its refinery at Whiting, Indiana, directly to purchasers thereof located in the Detroit Metropolitan Area." (Findings of Fact, p. 3) With respect to these incidental shipments across state lines to purchasers in Detroit, respondent has consistently asserted the applicability of the maxim of "de minimis non curat lex."

In addition to the cases cited on this point in respondent's Motion and Answer heretofore filed, reference to which is made, the United States Supreme Court, in the 376 case of *Mabee v. White Plains Publishing Co.*, 90 L. Ed. Adv. Op. 455, involving a construction and application of the Fair Labor Standards Act (an "in commerce" statute), held on February 11, 1946 that the trial court's application of the "de minimis" maxim to the facts in that case was error. It there appeared that one-half of one per cent of the newspapers printed by respondent were regularly shipped in interstate commerce. That Act prohibited the shipment in commerce of "any goods" in the production of which any employee was employed in violation of the the Act.

Justice Douglas, speaking for the Court, said:

"Though we may assume that sporadic or occasional shipments of insubstantial amounts of goods were not intended to be included in that prohibition, there is no warrant for assuming that regular shipments in commerce are to be included or excluded dependent on their size." (underlining ours)

Again, relying upon the authorities cited herein and in respondent's Motion and Answer heretofore filed, we assert the inescapable conclusion that the original Order of the Commission should be vacated and an order should be entered dismissing the Complaint, for the reason that there is no evidence and no Finding of Fact in this proceeding that the transactions complained of were "in commerce" as defined in the Clayton Act, as amended, which will support any Order to Cease and Desist.

377 (i) The Findings of Fact and the Commission's Order and the proposed modifications thereof in this proceeding are purportedly premised on the conclusion that with respect to the period from 1936-1940 respondent could not justify its difference in prices to its tank car and tank wagon customers in Detroit of one and one-half cents on its house brand gasoline on the basis of its differences in cost of sale and delivery. We have heretofore asserted that the jobbers' margin ought not to be fixed or regulated on the basis of their supplier's costs. Evidence of the conflict which arises when any such attempt is made is to be found in a resolution recently adopted by the Illinois Petroleum Marketers Association—a jobber organization—which reads, in part, as follows:

"Be it further resolved that this association again reaffirms its support of the 'small business man' who has been such a tremendously large factor in making petroleum products readily available at every cross roads in the United States and has demonstrated most clearly his economic essentiality. The Association asserts its readiness and desire to submit facts and figures supporting its contention that the normal operating margin between tank car and tank wagon market be increased from 2 to 2.5c per gallon." (See: National Petroleum News, Feb. 20, 1946, p. 16.)

378 This action on the part of a jobber organization is also supportive of respondent's request for a reopening of this proceeding to admit up-to-date evidence of costs and competitive conditions. It will be noted that the jobbers are asking for an increased margin between the tank car and tank wagon prices, undoubtedly due to increases in

their cost of operation which have occurred since the taking of evidence in this proceeding. It may be stated without fear of successful contradiction that similar increases in costs have been imposed upon or incurred by suppliers generally, so that present differentials allowed as between these two methods of distribution may be fully justified on the basis of evidence relating to the situation as it exists today as opposed to evidence upon which the Cease and Desist Order dated October 9, 1945 was based, namely, evidence relating to a situation which purportedly existed between 1936-1940.

379

III.

Respondent has heretofore pointed out that the Cease and Desist Order of October 9, 1945 and the proposed modifications of it are not in the public interest; that, on the contrary, the effect of any such order would be to restrain, lessen and injure competition, force jobbers out of business, and compel motorists and other consumers to pay higher prices for gasoline; that any such order would not be based on transactions in interstate commerce; that any such order cannot be supported by the pleadings or the evidence in this proceeding. Hence, the Commission should enter an order of dismissal in this case.

Respondent has also pointed out that if the Commission will not dismiss the Complaint, it is the duty of the Commission to reopen the proceedings for the introduction of up-to-date evidence, in view of the many changes in conditions that have occurred since the years 1936-1940, to which the evidence alone relates, and the rule of law that orders of the Federal Trade Commission, like decrees in equity, should be based on the situation that exists when the order is entered.

Hence, for the reasons stated in respondent's Motion
380 for rehearing and reconsideration of the Cease and Desist Order, in respondent's Answer and Brief in opposition to the first proposed modification of said Order, and in this Answer and Brief, it is respectfully submitted by respondent that:

(1) The original Order to Cease and Desist herein should be vacated, and, in lieu thereof, an order should be entered by the Commission dismissing the Complaint.

(2) The first proposed modification of said Cease and

Desist Order should not be entered by the Commission, but, in lieu thereof, an order should be entered dismissing the Complaint.

(3) The second proposed modification of said Cease and Desist Order, as set forth in said letter of February 15, 1946, should not be entered by the Commission, but, in lieu thereof, an order should be entered dismissing the Complaint.

(4) In the event the relief asked for in (1), (2) and (3) above should not be granted, then the original Order to Cease and Desist, or either of the proposed modifications thereof, if substituted for said original Order, should be modified by deleting subparagraph 6 thereof and by amending subparagraphs 1, 2, 3, 4 and 5 thereof so as to ex-
381 clude from the operation thereof all those who perform
the jobber function, i. e., who maintain and operate their own bulk station facilities and deliver gasoline from such facilities by tank wagon to service stations, whether operated by themselves or others.

(5) In the event the relief prayed for in (1), (2), (3) and (4) should not be granted, then this proceeding should be reopened for the taking of additional and supplemental testimony and evidence.

(6) In the event none of the relief requested is granted, then an order should be entered by the Commission allowing respondent a reasonable additional period, but not less than sixty (60) days, after denial of such relief, within which to file with the Commission its written report concerning compliance with the Order to Cease and Desist heretofore entered herein or any modification thereof.

Dated March 27, 1946.

Respectfully submitted,
MacMahon, Abbott & Roberts,

382 BEFORE FEDERAL TRADE COMMISSION:

(Caption—4389)

(Stamped: Federal Trade Commission—Received Apr. 8, 1946—Secretary.)

PETITION OF THE NATIONAL COUNCIL OF INDEPENDENT PETROLEUM ASSOCIATIONS FOR LEAVE TO INTERVENE.

Comes now your Petitioner, an unincorporated association consisting of duly elected officers of the various state organizations of independent petroleum jobbers throughout the United States who, in turn, represent a large majority of the individuals and companies engaged in the wholesale distribution of refined petroleum products in the United States, and states that it and those whom it represents, and for whom it is authorized to speak, have a substantial interest in the matters at issue in the above entitled proceeding and asks Leave to Intervene therein and, in support of its Petition, says:

I.

That approximately twelve thousand individuals and companies in the United States are engaged in the business of purchasing gasoline and other refined petroleum products from refiners thereof and jobbing or selling such products at wholesale to independent dealers and operators of
383 service stations and other retail outlets at which such
products are purchased by consumers; that, in addition thereto, many such jobbers or wholesalers, whom your Petitioner represents, and other jobbers or wholesalers of such products similarly situated, own, or lease, numerous service stations and similar outlets at which they sell at retail to consumers thereof gasoline and other refined petroleum products purchased by them from refiners.

II.

That in the above entitled proceeding the Federal Trade Commission has had under consideration the prices at which a large refiner of petroleum products may lawfully sell gasoline to jobbers or wholesalers thereof in the city of

Detroit, Michigan, who, in addition to selling such gasoline to retailers, also operate service stations at which they sell gasoline at retail to consumers in competition with retailers thereof who purchase gasoline of like grade and quality from the refiner from whom such jobbers or wholesalers also purchase their supplies of gasoline.

III.

That jobbers or wholesalers of gasoline customarily operate bulk storage facilities and plants to which gasoline is delivered by means of tank cars or similar transportation agencies from the refineries of those from whom such gasoline is purchased and that such jobbers customarily sell and deliver such gasoline in smaller quantities by tank wagon from such bulk storage tanks to the service stations operated by retailers who purchase supplies from such jobbers and also to service stations owned, or leased,
384 and operated by such jobbers; that such jobbers, in
addition to performing the function of making tank wagon deliveries of such gasoline to such retail outlets of both classes or types, perform various other services of recognized value to the retail outlets thus supplied by them, all of which services are furnished and rendered at a material cost to such jobbers.

IV.

That it has long been the recognized and accepted practice in the petroleum industry for refiners to sell gasoline to jobbers at tank car prices; and for both refiners who sell direct to retailers and for jobbers to sell and deliver gasoline to retailers thereof operating service stations at tank wagon prices, such tank wagon prices being from one and one-half to two and one-half cents per gallon above the current tank car price, the amount depending upon operating conditions; and that no distinction has been made in the price charged by refiners to jobbers for gasoline sold and delivered by tank cars, or other transportation agencies, at the jobbers' bulk plants dependent upon whether such gasoline is to be resold to retailers operating service stations or is to be resold through service stations operated by such jobbers, since it has been recognized in the petroleum industry that the functions performed by the jobber, and the cost thereof to the jobber, are the same in each instance.

V.

That under the terms of the Cease and Desist Order entered by the Federal Trade Commission on the 9th day of October, 1945, in the above entitled proceeding, the 385 respondent therein is prohibited from selling to jobbers at tank car prices any gasoline to be sold by the jobber at service stations owned and operated by him and said respondent is directed to cease selling to jobbers at less than tank wagon prices any gasoline to be sold by such jobbers at their own service stations in competition with the proprietors of service stations in the same marketing area to whom the respondent sells and delivers gasoline of like grade and quality at tank wagon prices, all in spite of the functions performed and the expenses incurred by the jobber in connection with supplying service stations owned or operated by him. That, furthermore, under the terms of such Cease and Desist Order, the respondent is required to guarantee that the jobber to whom gasoline is sold at tank car prices shall not resell any such gasoline to retailers thereof at less than the respondent's current tank wagon price at which gasoline of like grade and quality is sold by respondent to other retailers thereof competing in the same marketing area.

VI.

That counsel for the Federal Trade Commission has filed a motion with the Commission asking that said Cease and Desist Order entered herein on October 9th, 1945, be modified in certain respects, but that said modification, if granted, does not in any material respect alter the provisions of said original Cease and Desist Order with reference to the matters above outlined.

VII.

That although the Cease and Desist Order of the Commission entered in this proceeding relates only to the operations of the respondent herein and relates only to those 386 operations in the marketing area of Detroit, Michigan, the fact is that unquestionably whatever order may be finally entered in this proceeding may become the guide and pattern which will govern the marketing relations between refiners and jobbers of petroleum products throughout the United States in all areas where such jobbers resell to retailers who compete with other retailers to whom such refiners sell gasoline of like grade and quality, to the great and irreparable injury of thousands of established jobbers of petroleum products in whose behalf your Petitioner is authorized to present this petition.

Wherefore, your Petitioner, the National Council of Independent Petroleum Association, respectfully requests that it be permitted to intervene in the within proceeding; that oral argument be granted upon the motion of counsel for the Commission for modification of the aforesaid Cease and Desist Order of October 9, 1945, and that this Petitioner be permitted to participate by counsel of its selection in such oral argument.

Your Petitioner further respectfully requests the Commission to set aside the aforesaid Cease and Desist Order hereinbefore entered on October 9, 1945, and order the within proceeding reopened for further hearings and the taking of further testimony, including testimony as to jobbers' operations and costs, and that at such further hearing or hearings this Petitioner be permitted to present witnesses and testimony material to the issues raised in this proceeding and, by counsel, to cross-examine witnesses
387 presented by the Commission and by the respondent
and that it further be permitted, by counsel, to file appropriate briefs and exceptions and to participate in oral argument thereon.

Dated at Chattanooga, Tennessee, this 5th day of April, 1946.

The National Council of Independent
Petroleum Associations,
By H. L. Thatcher,
Chairman.

Hubert B. Fuller,
602 Union Commerce Building,
Cleveland 14, Ohio,
Attorney for Petitioners.

ORDER MODIFYING ORDER TO CEASE AND DESIST ISSUED OCTOBER 9, 1945, AND DENYING CERTAIN OTHER MOTIONS.

This matter coming on to be heard upon motion of counsel for the Commission dated January 21, 1946, and supplemental motion dated February 15, 1946, to modify the order to cease and desist entered herein by the Commission on October 9, 1945, and answers and briefs of the respondent in opposition thereto; motion of the respondent filed January 28, 1946, for rehearing and reconsideration of the order to cease and desist; petition of the National Council of Independent Petroleum Associations for leave to intervene and to set aside the order to cease and desist and reopen the proceeding for further hearings and the taking of further testimony; and upon oral argument of counsel in support of and in opposition to said motions; and the Commission having duly considered the various motions, answers, briefs, and oral argument of counsel and the record herein and being now fully advised in the premises:

It Is Ordered that the motion of respondent for rehearing and reconsideration of the order to cease and desist be, and the same hereby is, denied;

398 D. 4389

It Is Further Ordered that the petition of National Council of Independent Petroleum Associations for leave to intervene and to set aside the order to cease and desist and reopen the proceeding for further hearings and the taking of further testimony be, and the same hereby is, denied.

It Is Further Ordered that the motions of counsel for the Commission dated January 21, 1946, and February 15, 1946, to modify the order to cease and desist issued October 9, 1945, be, and the same hereby are, granted, and that said order to cease and desist be modified substantially in the manner and to the extent as set out in the supplemental motion of counsel for the Commission dated February 15, 1946;

It Is Further Ordered that a modified order to cease and desist incorporating the modifications provided for in the supplemental motion of counsel for the Commission be issued and served upon the respondent.

By the Commission.

Otis B. Johnson, *Secretary.*

399 UNITED STATES OF AMERICA.

MODIFIED ORDER TO CEASE AND DESIST.

This proceeding having been heard by the Federal Trade Commission upon the complaint of the Commission as amended, answer of the respondent, testimony and other evidence in support of the allegations of said complaint as amended and in opposition thereto taken before a trial examiner of the Commission theretofore duly designated by it, report of the trial examiner upon the evidence and exceptions filed thereto, briefs in support of the complaint and in opposition thereto, and oral argument of counsel; and the Commission having made and entered its findings as to the facts and its conclusion that respondent has violated the provisions of subsection (a) of Section 2 of an Act of Congress entitled, "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914 (Clayton Act), as amended by Act approved June 19, 1936, (Robinson-Patman Act) issued its order to cease and desist on October 9, 1945. Thereafter, this matter came on for hearing before the Commission upon motion and supplemental motion by counsel for the Commission, to modify said order to cease and desist issued on October 9, 1945, 400 answers and bri[illegible] of respondent in opposition thereto, motion of respo[illegible]ent for rehearing and reconsideration of said order and motion of National Council of Independent Petroleum Associations for leave to intervene and to set aside said order to cease and desist and reopen the proceedings for further hearings and the taking of further testimony, and the Commission having considered said motions, answers, briefs, and oral argument of counsel and the record herein, and being of the opinion that a modified order to cease and desist should be issued in this cause, and having entered its order modifying said order to cease and desist to the extent set out in said supplemental motion of counsel for the Commission, issues this its modified order to cease and desist:

It Is Ordered that the respondent, Standard Oil Company (Indiana), a corporation, and its officers, representatives, agents, and employees, directly or through any corporate or other device in connection with the sale of gasoline in commerce, as "commerce" is defined in the aforesaid Clayton Act, do forthwith cease and desist from discriminating, directly or indirectly, in the price of such gasoline of like grade and quality as among purchasers:

1. By selling such gasoline to competing purchasers at different prices in the manner and under the circumstances stated in the findings as to the facts herein.
2. By continuing or resuming the discrimination in price of such gasoline referred to and described in the Commission's findings as to the facts herein.

3. By otherwise discriminating in price between purchasers of such gasoline in a manner and degree substantially similar to the manner and degree of the discriminations referred to and described in the Commission's findings as to the facts herein.

401 4. By selling such gasoline to some retailers thereof at prices lower than the prices charged other retailers who in fact compete with them in the sale and distribution of such gasoline.

5. By allowing a price to any dealer, jobber or wholesaler on such gasoline sold by such dealer, jobber or wholesaler at retail lower than the price which respondent charges its retailer-customers who in fact compete in the sale and distribution of such gasoline with such dealers, jobbers, or wholesalers in their retailing capacity.

6. By selling such gasoline to any jobber or wholesaler at a price lower than the price which respondent charges its retailer-customers who in fact compete in the sale and distribution of such gasoline with the retailer-customers of such jobbers or wholesalers, where such jobber or wholesaler resells such gasoline to any of its said retailer-customers at less than respondent's posted tank-wagon price or directly or indirectly grants to any such retailer-customer any discounts, rebates, allowances, services or facilities having the net effect of a reduction in price to the retailer.

For the purpose of comparison the term "price" as used in this order includes discounts, rebates, allowances and other terms and conditions of sale.

The above specified requirements of this order are subject, however, to the following provisos:

(a) That none of the prohibitions of the order shall be taken as inhibiting any price differentials by respondent that were not found under the facts herein to have a tendency to injure, destroy or prevent competition with respondent's customers receiving the benefit of such differentials or with their customers.

402 (b) That none of the prohibitions of the order shall be taken as preventing any price differentials by respondent which make only due allowance for differences in respondent's cost of manufacture, sale or delivery resulting from the differing methods or quantities in which such gasoline is to such purchasers sold or delivered.

(c) That none of the prohibitions of the order shall be taken as inhibiting a lower price to jobbers than to retailers where respondent thereby makes only due allowance for its differences in cost of manufacture, sale or delivery resulting from the differing methods or quantities in which such gasoline is to such purchasers sold or delivered.

(d) That none of the provisions of the order shall be taken as inhibiting any price differentials by respondent that reflect differences in the grades and qualities of such gasoline.

It Is Further Ordered that the respondent shall, within sixty (60) days after service upon it of this order, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with this order.

By the Commission.

Otis B. Johnson, *Secretary.*

A dissenting opinion by Commissioner Mason is attached.

* * (Caption—4389) * *

DISSENTING OPINION OF COMMISSIONER LOWELL B. MASON TO MODIFIED ORDER TO CEASE AND DESIST.

There are four reasons for this dissent:

1. The modified order is too indefinite and obscure to be followed;
2. The failure of the Commission to consider the evidence offered under the proviso of Section 2 (b) of the Robinson-Patman Act;
3. The failure to prove injury to competition; and
4. The failure to establish jurisdiction.

First, in my judgment, the order is too indefinite and obscure to be followed. The first half merely says, "Look at what Standard did and don't do that." I refer specifically to those portions of the order which state that the respondent is ordered to cease and desist from discriminating

"1. By selling such gasoline * * * in the manner * * * stated in the findings * * *.

"2. By continuing or resuming the discriminations * * * described in the Commission's findings * * *.

404 "3. By otherwise discriminating * * * in a manner * * * similar to * * * the discriminations * * * referred to * * * in the Commission's fiindings * * *."

An order is a command to do or refrain from doing certain things, and thus should interpret the Robinson-Patman Act ideals into completely understandable, explicit directions.

To rely on the finding of facts to determine the command of an order is bad. How can business men determine the standard at which they must aim if the Commission will not set down in words and figures in the order what is illegal?

The order of the Commission, being of a negative quality, that is to say, an order to cease and desist, should ban specific acts and thus by a series of quasi-judicial exclusions, direct all men of enterprise toward the best practices of their trade.

The last half of the order is a paraphrasing of the general terms of the statute and thus in effect commands nothing specifically but counsels perfection generally.

I believe the primary burden rests on the Commission to present an understandable order so it can be obeyed. Otherwise, first the business man must guess what the law requires him to do, and then he must guess what the Commission requires he must do, to obey its order entered because he guessed wrong the first time.

405 In my opinion, the Federal Trade Commission should not swell that area of the law which cannot be known until litigated. A law that cannot be applied with certainty to the current affairs of everyday business is ex post facto in effect.

It simply means, instead of living in a country where a king declares today that what a citizen did yesterday should be a crime, the Federal Trade Commission declares what the business man did five years ago is interpreted as a violation of law today.

We have made a fetish out of "litigation to determine the law." And by obscure and unintelligible orders which rely on extraneous references to indicate their meaning, we will make a fetish out of "litigation to determine the litigation."

This may not be such a fault that our superior courts feel empowered to interdict. If so, there lies all the more reason for our diligence in protecting against it.

There is a parallel in Gulliver's Travels between the directions the tailors of Laputa use to measure Gulliver for a suit of clothes and the directions given by the Commission for the defendant to clothe itself with legality in this case.

Gulliver's tailors, immersed in the abstractions of life, used quadrants, angles and complicated formulae to determine a simple sleeve length. The result was a most ill-fitting suit.

Gulliver took some comfort out of the fact that at
406 least everyone else was as poorly dressed. But even
this satisfaction is denied the defendant in this case, for here, only the defendant is subject to the obscurities of higher dialectics whilst his competitors roam the fields of competition secure in the knowledge that they don't have to guess how to carry out the order because it does not apply to them.

I shall exemplify what I consider the law and facts on the second and third points by illustrations, using fictitious characters and episodes.

This method is at odds with common legalistic austerity, but it suits the purpose of those who would care to know why there is a dissent in this case.

The case is about one distributor getting gas for less than another distributor.

There are many kinds of distributors—brokers, wholesalers, jobbers, retailers, etc., but in the gas business, two are most common:

The retailer who operates the corner filling station—the essential tools of his trade consist of a gas pump, rest-rooms, air for tires, and water for radiators.

The jobber—ordinarily has a railroad siding or delivery trucks that carry as much as a tank car, big storage tanks, a fat credit and enough retail distributors as customers to make the use of these facilities profitable.

These two types of distributors pay different prices
for the gas they sell. The jobber—a cent and a half
407 less. It is easier to sell jobbers—they buy millions of
gallons. The corner station buys thousands. The credit risks, the delivery costs, the storage costs, the sales costs are either less or entirely absent when selling to a jobber. Besides the saving of money, there are many other valid reasons which invite a producer to dispose of his

stock at a lesser price to a jobber than to a retailer. In fine, it seems there is no quarrel over this generally accepted economic fact.

It is true the statute makes no references to classes of purchasers.[1] It bans any discrimination between purchasers without regard to class or function, provided competition is or tends to be injured. The point is, that competition is non-existent between different functions. The respondent claims that there is nothing in the Robinson-Patman Act to prevent different price scales based on the different functions of distributors. This claim is sound only because the function of a jobber is not in competition with the function of a retailer. To hold otherwise would be to ordain that the profit motive could no longer be legal in the distribution field except at two points, distribu-
408 tion by the manufacturer and distribution by the
retailer. All other intermediaries would be out of business unless they were willing to operate sans profit. If they should be out of business, that's up to Congress, not the Federal Trade Commission.

The trouble comes when the retailer function and the jobber function become joined—then we have a controversy such as in this instant case.

For the purpose of illustrating this point, let us assume:

You are a producer of gasoline. You sell gas to Jerry. Jerry pumps it out to the folks who drive up and say, "Fill 'er up.". Jerry does a nice retail business. You sell him gas at the same price you sell all the other retailers in town. You are obeying the Robinson-Patman Act which says you mustn't give a cheaper price to one than another.

You also sell gas to Harold. Folks can't drive up to Harold's place and get five gallons. Harold won't mess around with the public—wiping windshields, putting water in radiators, etc. He buys from you in big batches and then resells it in smaller lots to retailers who have corner filling stations just like Jerry. Harold is a jobber. You sell him your gas at the same price you sell all the other jobbers in town, and that's O.K., too. Naturally, Harold's price is less than what you charge Jerry. In fact, it is one

---

[1] The Senate and House bills originally contained references to classes of distribution. These were struck out before passage. See Senate Report 1502, page 5, 74th Cong., 2nd Session; see also House Report 2287, 74th Cong., 2nd Session.

and a half cents less, because Harold takes the job of
409 distributing your gasoline off your hands. This is
worth something besides just the money you save.

Now nobody is in hot water yet because each person is being treated "Even Stephen" according to the line of work he is in. But take a look at Bill across the street. Bill has a retail gas station. Folks drive up and use Bill's washroom while he puts five gallons in their tank. That makes Bill a retailer. So you tell Bill you'll let him have your gas at your retailer's price.

Bill says, "Come with me."

He takes you around back and, lo and behold, Bill owns a side track for tank cars, delivery trucks for gas, and gigantic storage tanks. Then Bill takes you into his office. He shows you his books. Bill has plenty of money. He buys a million—two million gallons a year, not in little truck wagon loads, but in big batches. Bill can do this because he sells to a lot of other retail stations besides using some himself.

Then there is Martin. Martin has just as big a layout as Bill but he doesn't even bother to sell to other retailers. Martin has so many retail outlets of his own that he operates a wholesale establishment just for his own filling stations.

Are Bill and Martin retailers or wholesalers?

To tell the truth, they are like Pooh Bah in Gilbert and Sullivan's opera, the Mikado. It all depends on whether you look at them front or back.

But, being a big gasoline company, you can't afford
410 to take any chances on Uncle Sam suing you for price
discrimination.

So you say, "Bill and Martin, I'm sorry, old fellows, but you look like retailers to me. I'm going to have to charge you a cent and a half higher price than what I charge Harold, the jobber, who doesn't do any retail business of his own."

Bill and Martin, being vigorous American business men, resent this very much: Bill and Martin buy just as much as Harold buys. Their equipment is just as good. They take as much work off your hands as Harold does, and their money looks just as good as Harold's any day. They want the same treatment.

Now some folks think that because you are a big gasoline company, you can tell Bill and Martin to "take it or leave it." That's the way it used to be in the old days.

You used to be the big frog in the puddle. Nowadays the puddle is bigger, the frogs are bigger, and there are lots more of them.

Tell Bill he is a retailer and entitled only to a retailer's discount, and five seconds later all the other frogs put on their glasses and say, "Why, Bill, you look exactly like a jobber to me. We'll give you the jobber price!"

So you lose Bill to a competitor whose price you wouldn't meet, and maybe you lose a couple of more customers for the same reasons, about the same time.

This all makes life very complicated.

Million gallons customers don't grow on trees, and tomorrow Martin is going to be around to see you about
411 his cent and a half discount. Treat Martin like a
retailer, you're out of business (at least, as far as Martin is concerned). Treat Martin as a jobber, Uncle Sam will sue you as a price discriminator (just as the Federal Trade Commission has done in this case).

When passing the Robinson-Patman Act, Congress had just such a dilemma in mind. So it added a proviso to the law (in Sec. 2 [b], Robinson-Patman Act) which said in effect: "If somebody else is offering Martin or Bill gas for a cent and a half less, then you can, too, and show as a defense in a suit by the Federal Trade Commission that you were only meeting your competitor's price."

That's what Congress says, and on the 26th day of February of this year, the Federal Trade Commission agreed with Congress.[1]

But that's not what the Commission says in the instant case.

Now the Commission says you can't offer such a defense, regardless of the statute, and if by chance such a defense is admitted into the testimony, and if by chance it is proven by a greater weight of the evidence, and if in fact no testimony is offered in opposition, still the Commission will
disregard such a defense.

412 If you apply the order in this instant case to the
example I have just given, you will have to give Martin and Bill the lower jobber's price on all gas that they sell to other retail stations, but charge them the higher retailer's price on all gas they use in their own stations. In

---

[1] In the Ferro case, Docket 5155, the Commission provided that the order to cease and desist "shall not prevent the respondent manufacturers from showing that any lower price to any purchaser was made in good faith to meet an equally low price of a competitor."

other words, they pay two different prices for the same gas in the same barrel, depending on what they use the stuff for.

That is what is known as "determining price by use."

This is foreign to the free enterprise system observed in our country. For the Commission to administer prices by determining which users shall be required to pay higher prices for a commodity than other users, tends to divide the distributive functions of our economy into hostile groups, each striving for government favoritism rather than for consumer acceptance.

It is time we moved the area of competition back into the open marts of trade where service and price to the consumer are the arbiters of success.

It is of interest to note that the social economic ideology of "determining price by use" embodied in the Commission's order was once considered and flatly rejected by Congress. "Pricing by use" was included in the House Committee (Judiciary) Report 2287 of March 31, 1936, 74th Cong. 2nd Session. This is what it said:

> "For the purpose of such classification of customers as wholesalers or jobbers or retailers, the character of the
> 413 selling of the purchasers and not the buying shall determine the classification, and any purchaser who * * * does both a wholesale and retail business shall, irrespective of quantity purchased, be classified as a wholesaler on purchases for sale to retailers only * * * and as a retailer on purchases for sale to consumers."

This ideology Congress refused to adopt and before final passage of the Robinson-Patman Act, all such language was stricken from the bill.

There are those who feel this country requires such a channeling of a business man's field of activity. This is strong medicine for a free economy to swallow. If needed, it is up to Congress and not this Commission to write the prescription. As yet, Congress has not seen fit to pass such bills that have been introduced to accomplish this end. Nor has Congress enacted any law preventing one from meeting his competitor's price. The competitive system still contemplates that the seller will get as much as he can and that the buyer will pay no more than he has to.

I cannot subscribe to an order that embraces what Congress specifically rejected.

Not only did Congress reject the ideology of "pricing by use," but obviously contemplating just such a situation as the instant case presents, embodied in the Act a proviso in Section 2 (b) as follows:[1]

> "Provided, however, That nothing herein contained shall prevent a seller rebutting the prima facie
414 case thus made by showing that his lower price * * * to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor * * *."

These words cannot be denied, and it is difficult to see how they can be ignored, but the decision in this case waives them aside, and the findings of facts and order have completely evaded any discussion of what the respondent proved by greater weight of the evidence (in fact, I find the testimony uncontroverted). The respondent proved that it had granted a lower price in good faith to meet a competitor's price. The trial examiner who heard the case so held, and I as a Commissioner would so find.

The Commission concludes as a matter of law that it is unnecessary for it to determine this fact. In my opinion, this is not sound. So far as the Federal Trade Commission is concerned, I believe deliberate and intentional matching of a competitor's lower price is legitimate as long as the proviso on Section 2 (b) of the Clayton Act stays on the statute books.

It is lawful for a seller to meet a competitor's price, unless there is a showing that the meeting and matching is a planned, common course of action, resulting in a conspiracy in restraint of trade.

In the instant case, the respondent, having lost two customers because it would not meet the prices of its competitors, made up its corporate mind to hang on to what business it had left, and in good faith, and what appears to me only ordinary common sense, lowered its price to that of its competitors.

In my opinion, the rejection of this defense by the Commission is fatal to the validity of the order.

So much for the second point.

Let us next consider the findings of the Commission that "the effect of the discrimination * * * has been * * * substantially to lessen competition and to injure, destroy and prevent competition * * * in the resale of gasoline."

I take it, an injury to a competitor must be illegal before it can be banned. We mouth the phrase "injury to competition" so often that we confuse it with "injury to a competitor."

---

[1] 49 Stat. 1526 (1936); 15 U. S. C. A. 13.

When you meet your competitor's lower price so as to keep a customer he sought to take away from you, he feels he has been injured. Of course he has, but that does not mean that competition has been injured. On the contrary, it may have improved.

In theory, it would be nice if one could do business without having people come along and meet his price. But in a free economy people are always trying to do that very thing; inveigling customers away by better services or cheaper prices. That's the customers' protection. The well established companies refer to these people as "chiselers." Those who are not well established, and who are trying to secure a foothold in the market place, refer to the well established companies who meet their lower
416 prices as "monopolists" or "price discriminators."
It all depends on which foot the shoe is on.

The man who sells a customer something for less is entitled to his patronage, but he must not expect a monopoly on that patronage. As long as the proviso in Section 2 (b) stands, others are free to come in and take a shot at the goose, too.

In my opinion, the testimony showing injury to competitors in this case is in reality a demonstration of the existence of competition.

There is another phase of this order bearing on the question of competition which warrants scrutiny.

As long as a buyer can get goods of like grade and quality at the same price or even less, he cannot claim competition has been injured because you refuse to sell him your goods at the price he wants to pay. This prohibition against discrimination is specifically limited by the statute to the grade and quality of the products sold, and has nothing to do with the popularity of the merchant or his brand, or the public acceptance of trade names.

The Act makes no mention of "major brands" or "off brand" commodities. Its sole criterion, so far as the words of the statute are concerned, has to do with the physical properties of the commodity. The reason for this is obvious. Congress realized the impracticality of weighing the mercurial popularities of name acceptance in
417 determining discrimination. Hence, it set the standard of discrimination on a factual rather than on a beauty contest basis.

Grade and quality are stable things, determinable with mathematical certainty. There is no danger in empowering a commission to ascertain grade or quality—but “public acceptance!” How are we to determine what is a major or a minor brand, and how much differential shall be justified from one to the other? When Congress gives us that power, there will be time enough to worry about the many possibilities of abuses which can grow out of such authority.

As the law now stands, a discriminatory price is lower than what others have to pay to obtain goods of “like grade and quality.” It has nothing to do with the relative popularity of brand names.

To illustrate: Let's suppose you are producing a gasoline that is sold on name acceptance but which is of the same grade and quality as many other gasolines which have no trade names. The unbranded gas sells for from two to six cents under what you sell your branded gas for.

You call your product Kelley's Kreem Gas (fictitious name, of course). It is accepted everywhere; everybody knows the name. You sell it for twelve cents to Bill. That is one and a half cents under the retailer price Jerry pays.

Jerry runs to the Federal Trade Commission and complains he is being discriminated against.

“Does it hurt?” asks the Commission.

418 “Of course it hurts,” says Jerry. “I want Kelley's Kreem Gas at the same price Bill, the jobber, pays.”

The Federal Trade Commission looks at the law. “It doesn't say anything here in the statute about Kelley's Kreem Gas. In fact, the statute doesn't even mention brand names; it just says that discrimination in price of goods of ‘like grade and quality,’ if it tends to prevent competition, shall be unlawful.

“Now, can you get gas just as good in grade and quality as Kelley's Kreem from other folks for a lot less?”

“Sure,” says Jerry. “There is plenty of competition willing to sell me gas of like grade and quality for even less than Kelley sells to Bill. But I want Kelley Kreem Gas.”

“All right, all right,” says the Federal Trade Commission. “Congress used the words, ‘of like grade and quality.’ I'll interpret it to read, ‘of like grade, quality or brands.’

“Then I'll enter an order against Kelley's Kreem saying he mustn't sell such gas at different prices. This will let everybody else sell unbranded, but just as good, gas for any price you want."

Let us take a careful look at the order in the instant case to see if I have paralleled my example with the facts at hand.

The report of the Federal Trade Commission trial
419 examiner in the instant case lists nine "major" companies in the Detroit area. He lists three companies as "doubtful," using as his yardstick the fact that some witness did not list them as "major" and then he describes ten other companies as secondary. This cataloging has nothing to do with the quality of the gas sold but relates to the relative importance of the companies.

These secondary companies who merchandise relatively unknown brands, plus the unbranded gas sold by the "doubtful" major companies, amount to about twelve per cent of the total Detroit business. This gas is sold for as much as six cents off the branded price and always at least two cents off.

The sole difference, so far as the record indicates, is that 88 per cent of the gasoline sold in the Detroit area carries a brand name, while twelve per cent is unbranded. There is no distinction as to quality or grade. This would indicate that at no time were there any competitors shut out from buying gasoline of like grade and quality at prices ranging from two to six cents less than they were paying, and at a price always less than the respondent's so-called discriminatory price.

As long as the other gas of like grade and quality was offered for sale at a lower price, where could there be injury to competition except on a plane that was not contemplated by Congress, namely, on a plane between names and not qualities or grades?

420 In the Corn Products case,[1] the discriminations were in "feed and meal," not in "Joe Blow's Feed" or "Blue Plate Meal." In the Corn Products case there was no effort to add words to the statute so that the Commission could hold a popularity contest on public acceptance. There the determination only had to be that the feed and meal were of the same grade and quality. In the instant case, the facts are that at all times there were plenty of competitors offering gas of as good a grade and quality as

---

[1] 65 Sup. Ct. 961.

the respondent at prices lower than respondent's so-called discriminatory prices.

I point this out because in the case under consideration, neither the respondent nor the trial attorney has seen fit to stress the point. Perhaps the respondent doesn't like to admit there is unbranded gas of the same grade and quality as its own product, and the trial attorney would find it difficult to prove injury to competition in like grades and qualities if it were shown that there was plenty of gas of like grade and quality available at much less than the alleged discriminatory price of the respondent.

The instant case has important public aspects and the Commission is entitled to consider all the facts involved before entering an order. There were two orders entered in this case, an original, entered prior to my membership on the Commission, and a modified order being considered. Let us look at them.

421 The original order referred to gasoline "of like grade and quality." This was subsequently changed so as to refer to only the gas described in the findings, namely, three brands—"Solite with Ethyl," "Red Crown" and "Stanolind," and all reference to the statutory language "of like grade and quality" was stricken.

There might be a moral if not a legal justification for this tinkering with an act of Congress if one considers that without such an amendment the unknown producers would be at a great disadvantage, but perhaps the reason for the change lies deeper. If the order were left in the words of the statute, it would be impossible to deny that there was plenty of gas of like grade and quality available at much less than the alleged discriminatory price of Standard. This being true, the charge of injury, or even potential injury, flies out the window—for no one was injured by being shut out from buying gas of like grade and quality.

Now let us consider the fourth reason for this dissent.

The findings do not disclose facts sufficient to warrant the Commission assuming jurisdiction. If the Commission felt the evidence supported a conclusion that the purchases involving discriminatory prices were in interstate commerce, it should have so found. The Commission did not so find. It found that the respondent was engaged in interstate commerce. It avoided any reference to the
422 actual purchases which under the statute I believe must
be shown to have been in interstate commerce. This is

not enough. The statute is explicit that the "purchases involved, in such discriminations" must be in interstate commerce.

The inhibition does not include every action by a company engaged in interstate commerce, but is limited to those acts which themselves are in interstate commerce.

In my opinion, the Commission in this case has dealt with the facts and the law just as Procrustes dealt with the unfortunate guests who slept in his bed. The Commission has cut off the facts of the case that do not fit in with the order, and it has stretched out the statute until it is no longer the law Congress passed, but becomes the law that the Commission would like to enforce. It requires private policing of one man's business by another. It freezes the avenues of the trade to set patterns. It eliminates the profit for one type of distributor and guarantees the profit to another. It subjects branded goods to restrictions not applied to unbranded goods. It attempts to settle a private struggle between enterprisers by opening a Pandora's box of governmental directives on a minutia of accounting and distributing practices that bear scant relation to what Congress sought to inhibit.

I am against it.

Lowell B. Mason,
Commissioner.

August 9, 1946.

IN THE UNITED STATES CIRCUIT COURT OF APPEALS

For the Seventh Circuit.

Standard Oil Company,
Petitioner,
vs.
Federal Trade Commission,
Respondent.
No. 9215.

PETITION TO REVIEW AND SET ASIDE MODIFIED ORDER OF FEDERAL TRADE COMMISSION TO CEASE AND DESIST ENTERED AUGUST 9, 1946, AND STATEMENT OF POINTS.

(Filed Oct. 4, 1946. Kenneth J. Carrick, Clerk.)

To the Honorable Judges of the United States Circuit Court of Appeals, Seventh Circuit:

Your petitioner, Standard Oil Company, brings this action under the provisions of Section 11 of the Clayton Act (15 U. S. C. A. Section 21) to review and set aside the order of the Federal Trade Commission and respectfully shows:

I.

The petitioner is a corporation, organized, existing and doing business under and by virtue of the laws of the State of Indiana, with its principal office and place of business located at 910 South Michigan Avenue, Chicago, Illinois. The petitioner is engaged, among other things, in the business of refining and distributing gasoline and other petroleum products, among and within various states, and intrastate distribution of such products within the Detroit, Michigan, metropolitan area.

II.

The respondent, Federal Trade Commission, is a federal administrative tribunal created by Act of Congress.

III.

This action is brought by the petitioner under the aforesaid Section 11 of the Clayton Act, as amended, and venue is based upon the provision of said statute permitting any person required by the order of the Federal Trade Commission to cease and desist from an alleged violation of said Act, to obtain a review of said Commission's order by filing a written petition, praying that the order of the Commission be set aside, with the Circuit Court of Appeals within the Circuit wherein such person resides or carries on business, or within the Circuit wherein the alleged violation is claimed to have been or is being committed. The petitioner's corporate domicile and its principal business office are both within the jurisdiction of the Circuit Court of Appeals, Seventh Circuit, and it carries on business within said Circuit.

IV.

On November 29, 1940, the Federal Trade Commission in a proceeding entitled "In the Matter of: Standard Oil Company, Docket 4389", issued its complaint charging that it had reason to believe that the petition has violated and is violating the provisions of Section 2 (a) of the Clayton Act, as amended by the Robinson-Patman Act (15 U. S. C. A. Section 13). Thereafter said complaint was amended and as amended charged in paragraph three, in effect, that since June 19, 1936, the petitioner sold and is selling its gasoline to four Detroit jobbers (referred to in the complaint as dealers), which paragraph reads as follows:

> "Paragraph Three: Since June 19, 1936, in the course and conduct of its business above described, respondent has sold, and now sells, its gasoline to four Detroit dealers engaged in reselling said gasoline at retail, at prices substantially lower than the prices charged by respondent to its other Detroit retailer purchasers for gasoline of the same grade and quality. Said four dealers are: Citrin-Kolb Oil Company; Stikeman Oil Company, Inc.; Wayne Oil Company; and Ned's Auto Supply Company. Each of said dealers has, since said date, owned or operated in the Detroit area one or more gasoline stations where said gas-

> oline so purchased has been resold (and, except as to Stikeman Oil Company, Inc., is now resold) at retail to consumers thereof, in competition with other retailers of gasoline purchasing the same from respondent or from other manufacturers. Citrin-Kolb Oil Company, Stikeman Oil Company, Inc., and Wayne Oil Company, respectively, are also engaged in the business of reselling at wholesale, a large part of the gasoline so purchased by them from respondent, to other gasoline dealers in the Detroit area who are likewise competitively engaged in the resale thereof at retail. Said three named wholesalers have knowingly received the benefit of said lower prices. The prices at which respondent has sold its gasoline to the four dealers above named, from time to time since June 19, 1936, have ranged from one-half cent to one and three-quarters cents per gallon lower than the prices charged by it to other Detroit retailers for the same gasoline. Under normal merchandising conditions, during the greater part of that period, respondent's price to said four dealers for its 'Red Crown' gasoline (its largest selling brand) has been one and one-half cents below its price therefor to other retailers." (as amended)

Said complaint further charged in paragraph four:

> "Paragraph Four: The effect of the discrimination in price described in the preceding paragraph hereof has been and may be to injure, destroy and prevent competition with each of the four dealers named in said Paragraph, and with their respective customers, in the resale of gasoline." (as amended)

V.

Thereafter the petitioner, on January 14, 1941, filed its answer to said complaint denying any violation of the aforesaid Act or statutes, denying the jurisdiction of the Federal Trade Commission and setting forth its defenses to said alleged violations. Thereafter, upon the amendment of said complaint, this answer was allowed to stand as the petitioner's answer to the amended complaint.

VI.

Thereafter (from March 10, 1941 to August 4, 1942) Federal Trade Commission hearings were held before Webster Ballinger, the Trial Examiner appointed by said Commission in said proceedings, and evidence introduced by both parties is recorded and on file in the Commission's office. On September 22, 1942, the petitioner filed its separate motions before the Commission to dismiss the complaint, to strike portions of the record and to amplify the record. On June 25, 1943, said Trial Examiner issued his report upon the evidence, a copy of which was served upon petitioner, to which exceptions were filed by petitioner.

VII.

Thereafter briefs were filed by both parties with the Commission, oral argument was had on January 19, 1944, and on October 9, 1945, said Commission issued its "Findings as to the Facts and Conclusion" and also issued, under the same date, its original Order to Cease and Desist.

VIII.

Thereafter this matter came on for further hearing before the Commission upon motion and supplemental motion by the Commission's counsel to modify said Order to Cease and Desist issued on October 9, 1945, answers and briefs of petitioner in opposition thereto and motion of petitioner for rehearing and reconsideration and for leave to adduce additional testimony. Said Commission, without in any manner changing its Findings as to the Facts and Conclusion, denied the petitioner's motion and issued on August 9, 1946, its Modified Order to Cease and Desist, which modified order provides in part as follows:

> It Is Ordered that the respondent, Standard Oil Company (Indiana) a corporation, and its officers, representatives, agents, and employees, directly or through any corporate or other device in connection with the sale of gasoline in commerce, as "commerce" is defined in the aforesaid Clayton Act, do forthwith cease and desist from discriminating, directly or indirectly, in the price of such gasoline of like grade and quality as among purchasers:
>
> 1. By selling such gasoline to competing pur-

chasers at different prices in the manner and under the circumstances stated in the findings as to the facts herein.

2. By continuing or resuming the discriminations in price of such gasoline referred to and described in the Commission's findings as to the facts herein.

3. By otherwise discriminating in price between purchasers of such gasoline in a manner and degree substantially similar to the manner and degree of the discriminations referred to and described in the Commission's findings as to the facts herein.

4. By selling such gasoline to some retailers thereof at prices lower than the prices charged other retailers who in fact compete with them in the sale and distribution of such gasoline.

5. By allowing a price to any dealer, jobber, or wholesaler on such gasoline sold by such dealer, jobber or wholesaler at retail lower than the price which respondent charges its retailer-customers who in fact compete in the sale and distribution of such gasoline with such dealers, jobbers, or wholesalers in their retailing capacity.

6. By selling such gasoline to any jobber or wholesaler at a price lower than the price which respondent charges its retailer-customers who in fact compete in the sale and distribution of such gasoline with the retailer-customers of such jobbers or wholesalers, where such jobber or wholesaler resells such gasoline to any of its said retailer customers at less than respondent's posted tank-wagon price or directly or indirectly grants to any such retailer-customer any discounts, rebates, allowances, services or facilities having the net effect of a reduction in price to the retailer.

For the purpose of comparison the term "price" as used in this order includes discounts, rebates, allowances and other terms and conditions of sale.

The above specified requirements of this order are subject, however, to the following provisos:

(a) That none of the prohibitions of the order shall be taken as inhibiting any price differentials by respondent that were not found under the facts herein to have a tendency to injure, destroy or prevent competition with respondent's customers receiving the benefit of such differentials or with their customers.

(b) That none of the prohibitions of the order shall be taken as preventing any price differentials by respondent which make only due allowance for differences in respondent's cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such gasoline is to such purchasers sold or delivered.

(c) That none of the prohibitions of the order shall be taken as inhibiting a lower price to jobbers than to retailers where respondent thereby makes only due allowance for its differences in cost of manufacture, sale or delivery resulting from the differing methods or quantities in which such gasoline is to such purchasers sold or delivered.

(d) That none of the provisions of the order shall be taken as inhibiting any price differentials by respondent that reflect differences in the grades and qualities of such gasoline.

Said modified order further provides that the petitioner shall, within sixty days after service of said order, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with said order. No statement of compliance has been filed by this petitioner.

IX.

The said "Findings as to the Facts and Conclusion" of said Commission are, in material and controlling respects, without substantial support in the evidence received by said Commission in said proceeding, but are contrary to such evidence; that said "Conclusion" of said Commission in said proceeding is not supported by the findings nor by the evidence received by said Commission; that the order entitled "Modified Order to Cease and Desist", so made by the said Commission against your petitioner, is not supported by the record before said Commission in said proceeding and is beyond the authority and jurisdiction of said Commission.

X.

The said Commission erred in taking or purporting to take jurisdiction over your petitioner by the issuance of its complaint and that the said "Modified Order to Cease and Desist" is erroneous, contrary to law, and wholly void, all as is more particularly set forth in the following Statement of Points:

Statement of Points.

The Commission erred in the following respects:

1. In taking or purporting to take jurisdiction over petitioner by the service and filing of its complaint and by the issuance of its Modified Order to Cease and Desist in said proceeding, because
   (a) no finding was made by said Commission that any of the transactions complained of were "in commerce" as defined in the Clayton Act, as amended, and
   (b) there is no evidence in the record, nor was any evidence available, to support any such finding, if one had been made.

2. In failing to make a finding that the prices alleged in the complaint to be discriminatory were in fact made by petitioner in good faith to meet lower prices offered to its customers by competitors of petitioner, notwithstanding the fact that the Trial Examiner so found on uncontroverted evidence.

3. In erroneously concluding, as a matter of law, that uncontroverted proof of "the meeting of an equally low price of a competitor in good faith is not a defense to a charge of price discrimination where competitive injury is affirmatively shown."

4. In that the Commission's construction of Section 2 (b) of the Clayton Act, as amended, if upheld, would constitute an arbitrary and unreasonable infringement of petitioner's inherent and inalienable rights guaranteed by the Federal Constitution and would deprive it of liberty of contract and property in violation of the Fifth Amendment of the Constitution of the United States. Furthermore, if contrary to the petitioner's contention, the transactions complained of are held to be "in commerce" as defined in said Clayton Act, then said Commission's construction of Section 2 (b), if upheld, further creates an

unreasonable and discriminatory burden upon interstate commerce in violation of Article I, Section 8, Clause 3, of the Constitution of the United States.

5. In finding, without any substantial evidence in the record to support such finding, that the effect of the transactions complained of "has been, and may be, substantially to lessen competition and to injure, destroy, and prevent competition with each of said four dealers" (jobbers) "and with their respective customers in the resale of gasoline."

6. In failing to confine its Modified Order to Cease and Desist to the issues joined by the complaint and answer in said proceeding, i. e., by attempting to regulate and control the prices at which petitioner's jobber customers, to whom petitioner sells and delivers branded gasolines, s[illegible] resell such gasolines.

7. In finding, without any substantial evidence in the record to support such finding, that petitioner "arbitrarily classified" its said customers in Detroit as jobbers for the purpose of allowing them the usual and customary functional discount allowed to jobbers in the industry and trade, and in failing to find upon the uncontroverted evidence in said record that "each of the four dealers were at the time of their recognition, ever since have been, and are now, under industry practice and contemplation, bona fide jobbers," which was the finding of the Trial Examiner upon such uncontroverted evidence.

8. In finding that "the evidence submitted by the respondent" (petitioner herein) "fails to establish that the price differential allowed by respondent to the above-named jobbers of 1½ cents per gallon off tank-wagon price made due allowance for differences in respondent's costs of sale and delivery resulting from differing methods and quantities in which it sold its gasoline to said jobbers" and in completely rejecting petitioner's evidence of cost justification.

9. In requiring petitioner, by its Modified Order to Cease and Desist, to regulate, police and control the prices at which its jobber customers shall resell gasoline (a) to retailer purchasers, and (b) at retail through their own retail outlets.

10. In failing expressly to limit the applicability of its Modified Order to Cease and Desist to

(a) sales by petitioner to its jobber customers in Detroit of its branded gasolines, there being no issue joined in the pleadings in said proceeding and no evidence in the record with respect to any sales of other grades or qualities of gasoline by petitioner, and

(b) sales by petitioner to the four jobbers named in the complaint, there being no issue joined in the pleadings in said proceeding with respect to any alleged discriminations in connection with petitioner's sales of gasoline to any other jobbers in Detroit or elsewhere.

11. In attempting, by its Modified Order to Cease and Desist, to maintain high and non-competitive retail prices for the sale of branded gasolines, contrary to the public interest.

12. In attempting, by its Modified Order to Cease and Desist, to regulate and control the terms and conditions of purely intrastate sales, to-wit, sales of branded gasolines by jobbers located and doing business wholly and exclusively within the State of Michigan to retailer-purchasers (service station dealers) located and doing business wholly and exclusively within the State of Michigan.

13. In denying petitioner's motion for rehearing and reconsideration and for the taking of supplemental testimony herein, upon the several grounds stated in said motion.

14. In that said Modified Order to Cease and Desist is not based upon facts existing at the time of the issuance thereof, but upon a finding of facts which related to a period of time approximately five years prior thereto.

15. In that said Modified Order to Cease and Desist is vague, indefinite and uncertain in the following particulars:

(a) It is couched in the language of the statute, and, without any specificity, purports to prohibit petitioner from violating the law.

(b) It purports to prohibit discriminations "in a manner and degree substantially similar to the manner and degree of the discriminations referred to and described in the Commission's findings as to the facts herein".

(c) It fails to inform petitioner, and others similarly situated, with reasonable certainty as to what specific act or acts are prohibited and, therefore, does not conform to the legal requirement of affording an ascertainable standard or basis of conduct.

(d) Proviso (d) of said order purports to require that price differentials shall "reflect" differences in grade and qualities of commodities sold.

Wherefore the petitioner prays that the court exercise its jurisdiction over the parties and subject matter herein and that the court review the aforesaid Findings as to Facts and Conclusion and the Commission's Modified Order to Cease and Desist and enter a decree setting aside said Modified Order of the Commission issued August 9, 1946, and dismissing the complaint against the petitioner and that such other and further decrees be made by this court as may be deemed just.

Dated: October 3rd, 1946.

CROSS PETITION OF FEDERAL TRADE COMMISSION.

To the Honorable United States Circuit Court of Appeals for the Seventh Circuit:

Comes now the Federal Trade Commission, respondent, and files this its cross petition against Standard Oil Company, petitioner, and respectfully shows unto the Court that:

1. On October 4, 1946, petitioner filed herein its petition praying this Court to review and set aside a certain modified order to cease and desist issued by respondent on August [illegible], 1946, in the matter of Standard Oil Company, Federal Trade Commission Docket No. 4389. Said order required petitioner to cease and desist from engaging in certain conduct and practices, therein specified, found by respondent to be in violation of the provisions of Section 2(a) of the Clayton Act as amended by the Robinson-Patman Act (49 Stat. 1526; 15 U. S. C. A. Section 13(a)).

2. Said modified order to cease and desist was duly served upon petitioner on August 12, 1946, and since said date has been and now is in full force and effect.

3. Respondent has certified and filed with the Court herein a transcript of the entire record of the proceeding in which said modified order to cease and desist was entered. Such proceeding was had in compliance with and in due conformity to all provisions of the law, and the findings as to the facts and conclusion and modified order to cease and desist made and entered therein by respondent are valid.

4. By virtue of the provisions of Section 11 of the Clayton Act (38 Stat. 734, 735-736; 15 U. S. C. A. Sec. 21), this Court has jurisdiction and power to make and enter upon the pleadings, testimony and proceedings herein a decree affirming said modified order to cease and desist and commanding petitioner to obey the same and comply therewith.

Wherefore, the Federal Trade Commission, respondent, prays that petitioner's petition to review be dismissed, and that the Court do make and enter herein a decree affirming the respondent's order to cease and desist and commanding Standard Oil Company, petitioner, to obey the same and comply therewith.

Respectfully submitted,
Federal Trade Commission,
By Walter B. Wooden,
Associate General Counsel,
Attorney for Federal Trade
Commission.

Endorsed: In the United States Circuit Court of Appeals. * * (Caption—9215) * *. Cross Petition of Federal Trade Commission. Filed Nov. 18, 1946. Kenneth J. Carrick, Clerk.

2. It Is Further Stipulated And Agreed that the following pleadings contained in Part 1, Pleadings (11-29-40 to 10-9-45), and in Part 2, Pleadings (10-10-45 to 8-9-46), of the transcript, filed by the Secretary of the Federal Trade Commission with the court herein, are not material to the consideration of this cause and that the same may be omitted from the printed record:

(1) Order extending time for filing answer, dated December 26, 1940, Part 1, page 52.

(2) Letter of H. R. Hanley dated April 14, 1941, Part 1, pages 56 to 58.

(3) Order for further hearing dated May 23, 1941, Part 1, page 59.

(4) Order fixing time and place for taking testimony, dated September 18, 1941, Part 1, page 60.

(5) Order setting further hearings dated January 17, 1942, Part 1, page 61.

(6) Order resetting case for hearing, dated March 21, 1942, Part 1, page 62.

(7) Motion of Respondent for suspension of proceedings, dated March 23, 1942, Part 1, pages 63 to 65.

(8) Affidavit of H. R. Hanley in support of Respondent's motion for suspension of proceedings, dated March 23, 1942, Part 1, pages 66 to 69.

(9) Affidavit of C. T. Bergeson in support of Respondent's motion for suspension of proceedings dated March 23, 1942, Part 1, pages 70 to 95.

(10) Supplemental affidavit of C. T. Bergeson on motion for suspension of proceedings, dated April 3, 1942, Part 1, pages 96 to 107.

(11) Order cancelling hearing dated April 17, 1942, Part 1, page 109.

(12) Order denying motion dated June 17, 1942, Part 1, page 110.

(13) Order setting case for further hearings, dated June 22, 1942, Part 1, page 111.

(14) Respondent's motion for time within which to submit statement of facts, dated September 22, 1942, Part 1, pages 185 to 187.

(15) Affidavit of H. R. Hanley in support of motion for time to submit statement of facts, Part 1, pages 188 to 192.

(16) Order providing for argument of interlocutory motions dated October 10, 1942, Part 1, page 195.

(17) Order extending time within which to file statement of facts, dated December 28, 1942, Part 1, page 200.

(18) Order further extending time within which to file statement of facts dated February 20, 1943, Part 1, page 201.

(19) Order extending time for filing Trial Examiner's report upon the evidence, dated May 8, 1943, Part 1, page 205.

(20) Order further extending time for filing Trial Examiner's report upon the evidence, dated June 9, 1943, Part 1, page 206.

(21) Order further extending time for filing Trial Examiner's report upon the evidence, dated June 30, 1943, Part 1, page 207.

(22) Order extending Respondent's time for filing exceptions to Trial Examiner's report, dated July 17, 1943, Part 1, page 2[illegible]

(23) Order extending time for filing brief in support of the complaint, dated July 17, 1943, Part 1, page 209.

(24) Motion for extension of time to file Respondent's brief, dated September 28, 1943, Part 1, pages 210 and 211.

(25) Affidavit of Arthur J. Abbott in support of motion dated September 30, 1943, Part 1, pages 212 to 214.

(26) Order extending time for filing Respondent's brief, dated October 9, 1943, Part 1, page 215.

(27) Order further extending time for filing Respondent's brief, dated November 22, 1943, Part 1, page 216.

(28) Notices re final argument dated December 17, 1943, Part 1, pages 217 and 218.

(29) Order extending time for filing Respondent's brief, etc., dated December 23, 1943, Part 1, page 219.

(30) Motion for extension of time, dated November 29, 1945, Part 2, pages 220 and 221.

(31) Order extending time for filing report of compliance dated December 11, 1945, Part 2, page 222.

(32) Stipulation for extension of time to answer order to show cause, dated February 4, 1946, Part 2, page 292.

(33) Order granting extension of time to answer order to show cause, dated February 7, 1946, Part 2, page 293.

(34) Stipulation dated February 19, 1946, Part 2, pages 294 to 296.

(35) Order extending time for further proceedings, dated February 25, 1946, Part 2, page 321.

(36) Order granting oral argument on motions dated April 8, 1946, Part 2, pages 361 and 362.

(37) Notices of change of time dated April 11, 1946, Part 2, pages 363 to 368.

(38) Order deferring decision on petition for leave to intervene, dated April 11, 1946, Part 2, page 369.

All portions of Part 1 and Part 2, designated Pleadings, and filed by the Secretary of the Federal Trade Commission as a part of the transcript in these proceedings, other than those specifically set forth above, shall be included within the printed record.

Dated December 27th, 1946.

IN THE UNITED STATES CIRCUIT COURT OF APPEALS.

* * (Caption—9215) * *

DESIGNATION OF STANDARD OIL COMPANY, PETITIONER, OF PORTIONS OF THE TRANSCRIPT TO BE CONTAINED IN THE PRINTED RECORD.

Standard Oil Company, petitioner herein, designates the following portions of the transcript, filed by the Secretary of the Federal Trade Commission in this cause, to be contained in the printed record to be printed by the Clerk of this court pursuant to Rule 14 (c) of this court:

1. Certificate of Otis B. Johnson, Secretary of the Federal Trade Commission, concerning the transcript of proceedings had before the Federal Trade Commission, said certificate being dated November 5, 1946.

2. Complaint dated November 29, 1940.

3. Answer of Standard Oil Company dated January 14, 1941.

4. Order appointing Trial Examiner dated February 25, 1941.

5. Motion to amend complaint dated April 9, 1941.

6. Order amending complaint dated April 23, 1941.

7. Motion to dismiss complaint dated September 22, 1942.

8. Motion to Federal Trade Commission to strike portions of the record dated September 22, 1942.

9. Motion of Standard Oil Company to Federal Trade Commission to amplify record, dated September 22, 1942, with the exhibits attached thereto.

10. Order denying motion to dismiss complaint, dated October 10, 1942.

11. Order denying motion to strike portions of the record, dated December 28, 1942.

12. Order denying in part and granting in part Respondent's motion to amplify the record, dated December 28, 1942.

13. Order directing inclusion of certain documents in the record dated March 17, 1943.

(Evidence & Exhibits go here.)

14. Trial Examiner's report dated June 25, 1943.

15. Exceptions to Trial Examiner's report dated August 3, 1943.

16. Findings as to the facts and conclusion dated October 9, 1945.

17. Order to cease and desist dated October 9, 1945.

18. Motion to modify order to cease and desist dated January 21, 1946.

19. Order to show cause dated January 23, 1946.

20. Motion for rehearing and reconsideration of order to cease and desist filed January 28, 1946.

21. Answer and brief on order to show cause, dated February 14, 1946.

22. Respondent's answer and brief in opposition to second proposed modification of order to cease and desist, dated March 27, 1946.

23. Petition of the National Council of Independent Petroleum Associations for leave to intervene, dated April 5, 1946.

24. Order modifying order to cease and desist and denying certain other motions, dated August 9, 1946.

25. Modified order to cease and desist dated August 9, 1946.

26. Dissenting opinion of Commissioner Lowell B. Mason to modified order to cease and desist, dated August 9, 1946.

27. All of the transcript of the oral testimony, being pages 1 to 8,057, inclusive, contained in Parts 3 to 11, inclusive, of the transcript filed by the Secretary of the Federal Trade Commission.

28. The following numbered Commission exhibits contained in Part 12 of the aforesaid transcript:

1-A, B, C and D, 2, 3-A and B, 29, 30, 54, 87, 128-A and B.

29. The following numbered Respondent exhibits contained in Part 13 of the aforesaid transcript:

3, 5, 6, 7 to 17, inclusive, 18-A, 18-I, 18-J, 18-L, 18-O, 18-Q, 18-R, 18-U, 18-Z-1, 18-Z-3, 18-Z-4, 18-Z-5, 18-Z-10, 18-Z-11, 18-Z-17, 18-Z-21, 18-Z-27, 18-Z-30, 19, 20, 23, 24, 25-A and B, 27, 28, 29-A, B and C, 30, 31-A to Q, inclusive, 33-A to E, inclusive, 36-B, C and D, 37-A to D, inclusive, 38-A to E, inclusive, 45, 46, 47, 48, 49-A and B, 52-B, 53, 54, 55-A and B, 57-A and B, 58, 59, 60-A to D, inclusive, 63-A, B and C, 98, 99, 100, 101, 103-A, B and C.

Petitioner further designates the following documents to be contained in the aforesaid printed record:

30. Petition to review and set aside modified order of Federal Trade Commission to cease and desist and statement of points, dated October 3, 1946.

31. Cross petition of Federal Trade Commission, filed November 18, 1946.

32. Stipulation dated December 27th, 1946.

33. This designation.

34. Any order entered on Stipulation referred to in No. 32 above.

Dated: December 27th, 1946.

Standard Oil Company,
Petitioner,
By Weymouth Kirkland,
Howard Ellis,
W. H. Van Oosterhout,
Arthur J. Abbott,
Its Attorneys.

UNITED STATES COURT OF APPEALS

For the Seventh Circuit.

I, Kenneth J. Carrick, Clerk of the United States Court of Appeals for the Seventh Circuit, do hereby certify that the foregoing printed pages contain a true copy of Volume VII of the printed transcript of the record, filed in this office on July 12, 1948, in:

Cause No. 9215.

Standard Oil Company,
Petitioner,
vs.
Federal Trade Commission,
Respondent,

as the same remains upon the files and records of the United States Court of Appeals for the Seventh Circuit.

In Testimony Whereof I hereunto subscribe my name and affix the seal of said United States Court of Appeals for the Seventh Circuit, at the City of Chicago, this 25th day of May, A. D. 1949.

Kenneth J. Carrick,
Clerk of the United States Court of Appeals for the Seventh Circuit.

(Seal)

At a regular term of the United States Circuit Court of Appeals for the Seventh Circuit, held in the City of Chicago, and begun on the first day of October, in the year of our Lord one thousand, nine hundred and forty-six and of our Independence the one hundred-seventy-first.

Standard Oil Company, *Petitioner,* No. 9215 *vs.* Federal Trade Commission, *Respondent.*	Petition for Review of an Order of the Federal Trade Commission.

And afterwards, to-wit, on the twenty-eighth day of January, 1949, the following further proceedings were had and entered of record, to-wit:

UNITED STATES COURT OF APPEALS

For the Seventh Circuit

Chicago 10, Illinois.

January 28, 1949.

Before:

Hon. J. Earl Major, Circuit Judge.

Standard Oil Company, *Petitioner,* No. 9215 *vs.* Federal Trade Commission, *Respondent.*	Petition for Review of an Order of the Federal Trade Commission.

On application of counsel for the Retail Gasoline Dealers Association of Michigan, Inc., it is ordered that leave be, and the same is hereby, granted to the Retail Gasoline Dealers Association of Michigan, Inc. to file a brief in this proceeding as amicus curiae.

And afterward, to-wit, on the sixteenth day of February, 1949, the following further proceedings were had and entered of record, to-wit:

UNITED STATES COURT OF APPEALS

For the Seventh Circuit,

Chicago 10, Illinois.

February 16, 1949.

Before:

Hon. Otto Kerner, Circuit Judge.
Hon. Sherman Minton, Circuit Judge.
Hon. F. Ryan Duffy, Circuit Judge.

Standard Oil Company,
Petitioner,
No. 9215 *vs.*
Federal Trade Commission,
Respondent.

Petition for Review of an Order of the Federal Trade Commission.

Now this day come the parties by their counsel, and this cause comes on to be heard on the transcript of the record and the briefs of counsel and on oral argument by Mr. Howard Ellis, counsel for the petitioner, and by Mr. James W. Cassedy, counsel for the respondent, and by Mr. Cyrus Austin, counsel for the amicus curiae, and the Court takes this matter under advisement.

And afterward, to-wit, on the eleventh day of March, 1949, there was filed in the office of the Clerk of this Court the opinion of the Court, which said opinion is in the words and figures following, to-wit:

IN THE UNITED STATES COURT OF APPEALS

For the Seventh Circuit.

No. 9215. October Term, 1948, January Session, 1949.

Standard Oil Company, *Petitioner*, *vs.* Federal Trade Commission, *Respondent*.	Petition for Review of Order of the Federal Trade Commission.

March 11, 1949.

Before KERNER, MINTON, and DUFFY, *Circuit Judges.*

MINTON, *Circuit Judge.* The petitioner seeks to review a cease and desist order issued by the respondent ordering it to cease and desist from discriminating in the price of gasoline of the same grade and quality among its customers in violation of Section 2(a) of the Clayton Act, as amended by the Robinson-Patman Act (15 U. S. C. Sec. 13). The Commission asks the enforcement of its order.

The petitioner contends that the order should not be enforced because, first, the Commission failed to find and could not have found under the undisputed evidence in this case, that either or any of the purchases involved in such discrimination was in commerce; secondly, that the Commission treated as immaterial the petitioner's conclusive showing that the discrimination made in price was in good faith to meet an equally low price of a competitor, which showing the petitioner asserts is a complete defense. Third, the petitioner contends that:

> "Paragraph 6 of the Modified Order directs Standard at its peril to pevent jobbers to whom it sells

> gasoline and who are in competition with Standard in the resale thereof from reselling to their retail dealers at prices less than Standard's price to its own retail dealers; requires Standard to police, maintain and regulate such competitor's prices on gasoline, title to which passed to the jobbers on delivery by Standard; and subjects Standard retroactively to punishment for contempt should a jobber-competitor fail to maintain such resale prices."

Substantial evidence in this record shows the following facts as found by the Commission. The petitioner's principal office and place of business is located in Chicago, Illinois. It is engaged in the business of refining and distributing gasoline and other petroleum products throughout fourteen states, principally in the Middle West. The petitioner has a refinery at Whiting, Indiana, to which it supplies crude oil from fields located in other states. One of the divisions in which it distributes its products is known as the Detroit Field, which embraces some thirteen counties in southern Michigan, including the city of Detroit. The Detroit Area, as distinguished from the Detroit Field, is confined to the city of Detroit and its suburbs. The petitioner has no refinery in Michigan, and almost all the gasoline it sells and distributes in the Detroit Field is transported by tankers from its refinery at Whiting through the Great Lakes to the petitioner's marine terminal at River Rouge, outside the city of Detroit. This terminal has a storage tank capacity of sixty-three million gallons. During the summer months, deliveries are made from Whiting weekly and sometimes twice weekly. In the fall, sufficient gasoline is delivered and stored to take care of the estimated requirements during the winter months when navigation on the Great Lakes is closed. The amount of gasoline used in Detroit is fairly constant and can be accurately estimated. During the years from 1936 through 1940, the years here in question, the petitioner supplied 16 to 17% of all the gasoline in the Detroit Area. In addition to the River Rouge tanks, the petitioner operated six bulk plants in the Detroit Area. Practically all of the gasoline sold in the Detroit Area passed through the River Rouge terminal, except that in some instances gas was delivered directly from Whiting by truck and also by the same means to commercial users. Deliveries were made from the River Rouge terminal by tank cars and tank trucks up to February 1, 1940, and thereafter by trucks alone. The delivery trucks were owned and operated or leased and operated by the petitioner through its employees.

The petitioner supplied gasoline to approximately 358 retail service stations, approximately two hundred of which the petitioner owned and leased, and eight of which it leased and subleased. The remaining 150 were independent operators who owned or leased their stations from someone else. The latter had agreements to purchase their entire requirements of Standard Oil gasoline only from the petitioner. While the former had no such agreements, they did not buy gasoline from anyone except the petitioner. The delivery to the retail customers was known as "tank wagon delivery" and was made at a price fixed in Chicago by the petitioner from time to time, known in the trade as the "posted tank-wagon price."

In addition, the petitioner supplied gasoline to four dealers in the Detroit Area, Citrin-Kolb Oil Company, Stikeman Oil Company, Inc., Wayne Oil Company, and Ned's Auto Supply Company, hereinafter sometimes referred to as Citrin, Stikeman, Wayne, and Ned's. These customers were also known as wholesale customers. They had their own storage tanks and trucks for delivery and met the credit qualifications of the petitioner.

During the time in question Citrin, Stikeman, and Wayne sold a substantial portion of their gasoline purchased from the petitioner direct to the public through retail service stations owned and operated by them. Ned's was engaged entirely in the retail sale of gasoline to the public through its own stations. To these last four customers, known, as we have pointed out, as the wholesale customers, the petitioner has discriminated in price by selling its gasoline to them for resale at wholesale and through their own retail stations at a price substantially lower than the prices charged retail purchasers in the Detroit Area for gasoline of the same grade and quality. The petitioner's Red Crown gasoline, its largest selling brand and comprising about ninety per cent of its sales in the Detroit Area, was sold to those four wholesalers at 1½¢ a gallon lower than the prices charged by the petitioner for the same gasoline to other retail dealers in the Detroit Area.

Citrin, in addition to supplying its own stations which sold at retail, from January 1, 1938, to December 31, 1940, sold one million gallons of gasoline annually to Langer and Cohn, who run a chain of service stations, at 1¢ a gallon less than the tank wagon price, and in addition sold another retail service operator at ½¢ a gallon less than the tank wagon price. For a time Citrin also issued special service cards which entitled the holder to a 2¢ a gallon discount on the purchase of gasoline from one of the retail service stations operated by Citrin.

There is no evidence that Wayne ever sold gasoline to retailers at a price lower than the posted tank-wagon price charged by the petitioner to its dealers or that Wayne ever allowed any discounts. The same is true of Stikeman.

Ned's, however, sold at retail exclusively, and it has been its practice since March 7, 1938, to sell to its customers below the prevailing retail service-station price or to give premiums and discounts which result in a price below its posted price.

A lower price at one service station than at another is an important factor in the purchasing public's mind, especially in the price of the petitioner's advertised brands. Any difference in price between two stations selling the same brand of gasoline is very important in influencing the business. The margin of profit between the tank wagon price to a service station and the retail price is small, averaging since November 1, 1939, about 3.3¢ a gallon in the Detroit Area.

In 1937 Ned's was selling the petitioner's Red Crown gasoline to the public at approximately 2¢ a gallon below the prevailing retail service station price, which continued with variations until the latter part of 1939. In 1939 and 1940, when Ned's posted price was the prevailing retail price, it gave premiums and discounts under cover. It has from time to time given commercial discounts of 1 to 2¢ a gallon off the posted tank-wagon price. In 1939, Ned's also issued trading stamps with a value of 2¢ a gallon, which were redeemable in merchandise or gasoline at Ned's stores. Price cutting at Ned's stores has been almost continuous, and this company has been responsible for starting most of the retail price cutting in major brand gasolines in Detroit over a period of several years. This practice of Ned's has caused substantial damage to other retail service station operators selling the petitioner's Red Crown gasoline and also to retail service station operators selling other brands of gasoline.

The price discriminations granted to Ned's, Citrin, Wayne, and Stikeman on gasoline sold by them at retail have given a substantial competitive advantage to these favored dealers in their retail operations over other retailers of gasoline, including retail customers of the petitioner. This competitive advantage is capable of being used and has been used by Ned's and to some extent by Citrin to divert large amounts of business from other gasoline retailers, including customers of the petitioner, with resultant injury to them and to their ability to continue in business and successfully compete with Ned's and Citrin in the retailing of gasoline. The effect of these discriminations in price allowed by the petitioner to Ned's, Citrin, Wayne, and Stikeman has been and may be substantially to lessen competition and to injure, destroy, and prevent competition with each of these four dealers and with their respective customers in the retail sale of gasoline.

There is substantial evidence in this record, and we think it may be assumed to be conclusive, to the effect that the petitioner made its low price to Ned's, Citrin, Wayne, and Stikeman in good faith to meet the lower price of a competitor. The petitioner failed to show that the discriminatory price which it made these four dealers was justified on the basis of any cost savings.

The findings of the Commission based upon the substantial evidence above indicated are sufficient to support the Commission's conclusion of law that the discriminatory sales were in commerce. It is not disputed that the petitioner is engaged in commerce, but it is vigorously insisted that commerce ended at the River Rouge plant and the bulk plants in the Detroit Area and that the petitioner's transactions from there on were wholly intrastate. With this we are unable to agree. The break that occurred at River Rouge was a break in transportation but not in the constant stream of commerce that flowed from the Whiting refinery to the petitioner's customers in Michigan. The stream of commerce flowed continuously from the tanks at the refinery to the tankers on the lake; from the tankers to the tank at River Rouge and the bulk plants in Detroit: and from there into tank cars and tank trucks to the petitioner's customers. There may have been several breaks in transportation in getting from one vehicle or receptacle to the other in completing the commercial transaction of getting the petitioner's gasoline from Whiting into the Detroit territory, but the stream of commerce was never broken, no matter how many receptacles were used on the way. The rest at River Rouge was not like a warehouse where the goods awaited further sale and distribution. Although the gasoline was not brought to River Rouge pursuant to orders already taken, the demands of the Michigan territory were fairly constant, and the petitioner's customers' demands could be accurately estimated, so the flow of the stream of commerce kept surging from Whiting to Detroit.

We think this case quite analogous to *Stafford* v. *Wallace*, 258 U. S. 495, 42 S. Ct. 397, 66 L. Ed. 735. In that case, the livestock came by carrier interstate and intrastate into the receiving pens of the stockyards where the animals were fed, watered, and held until sales were consummated, either to the packers who drove them across the street to the packing house, or to the wholesale dealers or feeders who reshipped them. The transportation was broken at the yards. The animals came to rest, but the stream of commerce moved on to final destination; and the stockyards, with its holding pens, was held to be in commerce, just as here the various changes in the manner of movement may have slowed down the stream of commerce between Whiting and Michigan, but never stopped it. The tanks at River Rouge were similar to a "packaging house" on the way to market. The tank cars and trucks were the most convenient "packages" that could be used to complete the distribution of the gasoline. It is unlike *Walling* v. *Goldblatt Bros.*, 128 F. 2d 778, where the warehouse was only a detached stockroom for retail stores of a retailer. There the stream of commerce ended at the warehouse for the most part. Here it reached at River Rouge only an intermediate stage preliminary to its final disposition to the petitioner's customers.

We decline, as the Supreme Court did in *Stafford* v. *Wallace, supra*, p. 519, "* * * to defeat this purpose in respect of such a stream and take it out of complete national regulation by a nice and technical inquiry into the noninterstate character of some of its necessary incidents and facilities when considered alone and without reference to their association with the movement of which they were an essential but subordinate part." After all, as Justice Holmes said in *Swift and Company* v. *United States*, 196 U. S. 375, 398, 25 S. Ct. 276, 49 L. Ed. 518, "* * * commerce among the States is not a technical legal conception, but a practical one, drawn from the course of business." The modern concept of commerce is one which gives full sweep to the commerce clause of the Constitution within the limits of the implementing statute, a liberal view of the Congressional purpose as expressed in the statute, and a realistic view of what business is doing as it moves across state lines to accomplish its purpose. The late cases support the view that the petitioner's operations are in commerce from the refinery to its customers. *Walling v. Jacksonville Paper Co.*, 317 U. S. 564, 63 S. Ct. 332, 87 L. Ed. 460; *Binderup* v. *Pathe Exchange*, 263 U. S. 291, 309, 44 S. Ct. 96, 68 L. Ed. 308; *Mid-Continent Petroleum Corporation* v. *Keen*, 157 F. 2d 310, 314; *Republic Pictures Corporation* v. *Kappler*, 151 F. 2d 543, 545; *Walling* v. *American Stores Co.*, 133 F. 2d 840.

Now as to the contention that the discriminatory prices here complained of were made in good faith to meet a lower price of a competitor. While the Commission made no finding on this point, it assumed its existence but held, contrary to the petitioner's contention, that this was not a defense.

Prior to June 19, 1936, when the Robinson-Patman Act went into effect, the Clayton Act, Section 2,[1] provided:

> "That it shall be unlawful for any person engaged in commerce, * * * either directly or indirectly to discriminate in price between different purchasers of commodities * * * where the effect of such discrimination may be to substantially lessen competition or tend to create a monopoly in any line of commerce: *Provided,* That nothing herein contained shall prevent discrimination in price between purchasers of commodities on account of differences in the grade, quality, or quantity of the commodity sold, or that makes only due allowance for difference in the cost of selling or transportation, or discrimination in price in the same or different communities made in good faith to meet competition * * *."

Thus it will be seen that a discrimination in price made in good faith to meet competition was a defense under Section 2 of the Clayton Act, as was a showing that the discrimination was made because of cost savings, or proof of the other defenses given by the Act. But since large buyers could always get such price meeting by suppliers to justify a discrimination in price in their favor, the purpose of the Act to avoid such discrimination was easily evaded. Congress sought to change this bypass by changing the discriminatory price, made in good faith to meet the low price of a competitor, from a defense, as it then was, to a procedural aid to enable a seller to overcome the prima facie case made by showing a difference in price to customers in the same community for goods of the same quality. This was done by amending Section 2 of the Clayton Act by Section 2(a) and (b) of the Robinson-Patman Act.[2] The amended Section 2(a) still made it unlawful to make a discriminatory price, as before, and it kept as a defense the cost savings and other defenses of the old Clayton Act, but took out of the defense category the provision for making a lower price to meet competition. As to this, it was provided in Section 2(b) as follows:

---

[1] 38 Stat. 730 (1914), 15 U. S. C. Sec. 13 (1934).

> "Upon proof being made, at any hearing on a complaint under this section, that there has been discrimination in price or services or facilities furnished, the burden of rebutting the prima-facie case thus made by showing justification shall be upon the person charged with a violation of this section, and unless justification shall be affirmatively shown, the Commission is authorized to issue an order terminating the discrimination: *Provided, however,* That nothing herein contained shall prevent a seller rebutting the prima-facie case thus made by showing that his lower price or the furnishing of services or facilities to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor, or the services or facilities furnished by a competitor."

This amendment, it is clear, provided that if a discrimination in price were shown, the burden of justifying it was upon the party making the discriminatory price, and he could make this prima facie case by showing that he acted in good faith to meet the low price of a competitor. That it was not intended as a defense is apparent from the Conference Report resolving the disagreement of the two Houses. The purpose of Congress is so clearly set out in the Conference Report that we quote it as follows:

> "The Senate bill contained a further proviso: 'That nothing herein contained shall prevent discrimination

---

[2] 49 Stat. 1526, (1936), 15 U. S. C. Sec. 13 (1946).

> in price in the same or different communities made in good faith to meet competition.' This language is found in existing law, and in the opinion of the conferees is one of the obstacles to enforcement of the present Clayton Act. The Senate receded, and the language is stricken. A provision relating to the question of meeting competition, intended to operate only as a rule of evidence in a proceeding before the Federal Trade Commission is included in subsection (b) in the conference text as follows:
>
> " '*Provided, however,* that nothing herein contained shall prevent a seller rebutting the prima-facie case thus made by showing that his lower price or the furnishing of services or facilities to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor, or the services or facilities furnished by a competitor.' " (Congressional Record, June 15, 1936, p. 9414.)

The Chairman of the House Conferees stated on the floor of the House as he presented the Conference Report:

> "It is to be noted, however, that this does not set up the meeting of competition as an absolute bar to a charge of discrimination under the bill. It merely permits it to be shown in evidence. This provision is entirely procedural.
>
> * * * * *
>
> "If this proviso were construed to permit the showing of a competing offer as an absolute bar to liability for discrimination, then it would nullify the act entirely at the very inception of its enforcement, for in nearly every case mass buyers receive similar discriminations from competing sellers of the same product." (Congressional Record, June 15, 1936, p. 9418.)

The intent of Congress is clear and the language used to express its intent, it seems to us, is not ambiguous. That Section 2(b) is as the Conference Report says it was intended to be, seems to be the view of the Supreme Court as expressed in *Trade Comm'n. v. Staley Co.*, 324 U. S. 746, 65 S. Ct. 971, 89 L. Ed. 1338, which reversed this Court in *A. E. Staley Mfg. Co. v. Federal Trade Commission*, 144 F. 2d 221, wherein we held the prima facie case had been rebutted. Chief Justice Stone said (p. 752):

> "It will be noted that the defense that the price dis-

> criminations were made in order to meet competition, is under the statute a matter of 'rebutting' the Commission's 'prima-facie case.' Prior to the Robinson-Patman amendments, Sec. 2 of the Clayton Act provided that nothing contained in it 'shall prevent' discriminations in price 'made in good faith to meet competition.' The change in language of this exception was for the purpose of making the defense a matter of evidence in each case, raising a question of fact as to whether the competition justified the discrimination."

The showing made here by the petitioner that it made the lower price in good faith to meet competition, we assume, as the Commission apparently did, was made out. The effect of it was to rebut the prima facie case made by the Commission's proof of the petitioner's discriminatory prices. If nothing further appeared in this record, the case might well have ended there. The reason for making the discrimination was effective to rebut the prima facie case in price discrimination, but it still remained a discrimination, and that discrimination affected competition on the retail level among the retail customers of the wholesalers to whom the petitioner has sold. The discrimination in price in favor of the parties in this case, which the petitioner had a right to make as against its competitors, was then used by the petitioner's customers to work havoc among competitors on the retail level. The petitioner had given a club to its wholesalers which they passed on to their retailers to bludgeon their competitors. This is what the Commission is trying to stop, and it is towards the elimination of this evil that the cease and desist order is directed.

The Commission here considered the other evidence as to the effect on competition of this continuing discrimination and found, and it was justified in finding, that the discrimination not only may but did affect competition. There is substantial evidence in this record that the petitioner's favored wholesalers were in a position to do and did do injury to competition. Where as here the discrimination is between purchasers who are in competition and the competition which is alleged and proved to be injured is among the retail customers of the favored purchasers and other retailers, the fact that the seller's discriminatory price was made to meet his own competition is not controlling. The discrimination continued here and its effect was direct and harmful to competition and was properly condemned by the Commission's order, notwithstanding the petitioner's discrimination in price was made in good faith to meet competition of its own.

The case of *Samuel H. Moss, Inc.,* v. *Federal Trade Commission,* 148 F. 2d 378, does not, as we understand it, hold that Section 2(b) is a defense in all events. It holds only that a lower price discrimination made in good faith to meet competition, standing alone, may be a defense. If there were no further showing that the lower price lessens or tends to prevent competition, the justification in the discrimination would be made out. But in the instant case, the Commission went further and showed that the petitioner's discrimination in price to its wholesale customers did have the effect to substantially lessen competition or to injure, destroy, or prevent competition. Note, however, that it would have been necessary for the Commission to prove only that such discrimination in price *may* have that effect. *Trade Comm'n* v. *Morton Salt Co.,* 334 U. S. 37, 68 S. Ct. 822, 92 L. Ed. 948. It is not actual injury alone, but the prospect reasonably to be expected of injury to competition which the statute seeks to prevent.

We agree with the Commission that the showing of the petitioner that it made the discriminatory price in good faith to meet competition is not controlling in view of the very substantial evidence that its discrimination was used to affect and lessen competition at the retail level.

The petitioner objects to Paragraph 6 of the cease and desist order. This paragraph reads as follows:

> "6. By selling such gasoline to any jobber or wholesaler at a price lower than the price which respondent charges its retailer-customers who in fact compete in the sale and distribution of such gasoline with the retailer-customers of such jobbers or wholesalers, where such jobber or wholesaler resells such gasoline to any of its said retailer-customers at less than respondent's posted tank-wagon price or directly or indirectly grants to any such retailer-customer any discounts, rebates, allowances, services or facilities having the net effect of a reduction in price to the retailer."

This paragraph is intended to eliminate the effects of the discriminatory price made to these customers, Gitrin, Wayne, and Stikeman, who do a wholesale business. To avoid the force of this paragraph, the petitioner may do one of two things: First, discontinue selling to wholesalers at a price different than that made to retailers. The petitioner's three largest competitors in Detroit have found it agreeable to do so. The petitioner argues that this is an elimination of wholesalers. If this be true, it is elimination only where their existence cannot be justified except on the exploitation of a differential in price not justified by any cost savings to obtain that price. This does not impress us as either illegal, unwarranted, or unjust.

Secondly, the petitioner may under the right to choose its customers refuse to sell to wholesalers who sell to retailers below the price the petitioner makes to its own retailers. The petitioner does not have to make price control agreements with anyone. It has only to govern its own conduct to avoid the impact of an unlawful discrimination. To govern its conduct, the order makes the petitioner deal with its wholesalers at its peril as to what they might do with the gasoline in the future. The petitioner has no control and can have no control over the price of the gasoline after it is sold to the wholesalers. The latter may put any price on it they may choose. They may give it away if they like. The petitioner should not be required to police its wholesalers and to sell to them at the petitioner's peril. The petitioner should be liable if it sells to a wholesaler it knows or ought to have known is engaging in or intends to engage in the competitive practices condemned by this proceeding. Under the order as drawn, the petitioner would be liable if afterwards the wholesaler should resell at a price lower than the petitioner charged its retailers. If the petitioner is to be hailed into court for a violation of the Commission's order, the petitioner must be guilty of knowingly choosing a customer who is using or intends to use its price advantage to undersell the petitioner in its prices made to its retailers.

We would modify Paragraph 6 to read as follows:

> "By selling such gasoline to any jobber or wholesaler at a price lower than the price which respondent charges its retailer-customers who in fact compete in the sale and distribution of such gasoline with the

> retailer-customers of such jobbers or wholesalers, where such jobber or wholesaler, to the knowledge of the respondent or under such circumstances as are reasonably calculated to impute knowledge to the respondent, resells such gasoline or intends to resell the same to any of its said retailer-customers at less than respondent's posted tank-wagon price or directly or indirectly grants to any such retailer-customer any discounts, rebates, allowances, services or facilities having the net effect of a reduction in price to the retailer."

The order as modified will be enforced, and judgment thereon will be entered accordingly.

And on the same day, to-wit, on the eleventh day of March, 1949, the following further proceedings were had and entered of record, to-wit:

UNITED STATES COURT OF APPEALS

For the Seventh Circuit,

Chicago 10, Illinois.

Friday, March 11, 1949.

Before:

Hon. Otto Kerner, Circuit Judge.
Hon. Sherman Minton, Circuit Judge.
Hon. F. Ryan Duffy, Circuit Judge.

Standard Oil Company,
Petitioner,
No. 9215 *vs.*
Federal Trade Commission,
Respondent.

Petition for Review of an Order of the Federal Trade Commission.

This cause came on to be heard on the transcript of the record from the Federal Trade Commission, and was argued by counsel.

On consideration whereof, it is ordered and adjudged by this Court that Paragraph 6 of the Modified Order of the Federal Trade Commission to cease and desist, entered in this cause on August 6, 1946, be modified to read as follows:

> "By selling such gasoline to any jobber or wholesaler at a price lower than the respondent charges its retail customers who in fact compete in the sale and distribution of such gasoline with the retail customers of such jobbers or wholesalers, where such jobber or wholesaler, to the knowledge of the respondent or under such circumstances as are reasonably calculated to impute knowledge to the respondent, resells such gasoline or intends to resell the same to any of its said retailer customers at less than respondent's posted tank-wagon price or directly or indirectly grants to any such retailer customer any discounts, rebates, allowances, services or facilities having the net effect of a reduction in price to the retailer."

The said order of the Federal Trade Commission, as modified above, will be enforced and a Decree thereon will be entered accordingly.

And afterward, to-wit, on the twenty-ninth day of April, 1949, the following further proceedings were had and entered of record, to-wit:

IN THE UNITED STATES COURT OF APPEALS

For the Seventh Circuit.

Standard Oil Company, a corporation, *Petitioner,* *vs.* Federal Trade Commission, *Respondent.*	No. 9215.

FINAL DECREE MODIFYING FEDERAL TRADE COMMISSION'S ORDER TO CEASE AND DESIST AND AFFIRMING AND ENFORCING SAID ORDER AS MODIFIED.

The petitioner herein, Standard Oil Company, a corporation of the State of Indiana, having filed with this Court on the 4th day of October, 1946, its petition to review and set aside an order to cease and desist issued by the Federal Trade Commission, respondent herein, on August 9, 1946, under the provisions of the Clayton Act, as amended; and a copy of said petition having been served upon the respondent herein; and said respondent having thereafter, to wit: on the 7th day of November, 1946, certified and filed herein, as required by law, a transcript of the entire record in the proceeding lately pending before it, in which said order to cease and desist was entered; and the respondent herein, Federal Trade Commission, having filed with this Court on the 18th day of November, 1946, its cross-petition for affirmance and enforcement of its order to cease and desist, aforesaid, and a copy of said cross-petition having been served upon the petitioner; and the matter having been heard by this Court on briefs and oral argument of counsel; and this Court thereafter, to wit: on the 11th day of March, 1949, having rendered its decision modifying Paragraph 6 of said order to cease and desist and affirming and enforcing said order as modified;

Now, Therefore, It Is Hereby Ordered, Adjudged And Decreed, that Paragraph 6 of the aforesaid order to cease and desist, issued by the respondent herein as aforesaid, be and the same is hereby modified so as to read as follows:

> 6. By selling such gasoline to any jobber or wholesaler at a price lower than the price which respondent charges its retailer-customers who in fact compete in the sale and distribution of such gasoline with the retailer-customers of such jobbers or wholesalers, where such jobber or wholesaler, to the knowledge of the respondent or under such circumstances as are reasonably calculated to impute knowledge to the respondent, resells such gasoline or intends to resell the same to any of its said retailer-customers at less than respondent's posted tank-wagon price or directly or indirectly grants to any such retailer-customer any discounts, rebates, allowances, services or facilities having the net effect of a reduction in price to the retailer.

And, It Is Hereby Further Ordered, Adjudged And Decreed, that the said order to cease and desist issued by the Federal Trade Commission, respondent herein, on the 9th day of August, 1946, as aforesaid, and as herein modified by the decision of this Court on the 11th day of March, 1949, as aforesaid, be, and the same is, hereby affirmed and petitioner is commanded to obey the same;

And, It Is Further Ordered, Adjudged And Decreed, that the Standard Oil Company, a corporation of the State of Indiana, and its officers, representatives, agents and employees, directly or through any corporate or other device, in connection with the sale of gasoline in commerce, as "commerce" is defined by the Clayton Act, as amended, shall forthwith cease and desist, as required by the terms of such affirmed and modified order set out below, from discriminating, directly or indirectly, in the price of such gasoline of like grade and quality, as among purchasers:

> 1. By selling such gasoline to competing purchasers at different prices in the manner and under the circumstances stated in the findings as to the facts herein.
>
> 2. By continuing or resuming the discriminations in price of such gasoline referred to and described in the Commission's findings as to the facts herein.
>
> 3. By otherwise discriminating in price between purchasers of such gasoline in a manner and degree

substantially similar to the manner and degree of the discriminations referred to and described in the Commission's findings as to the facts herein.

4. By selling such gasoline to some retailers thereof at prices lower than the prices charged other retailers who in fact compete with them in the sale and distribution of such gasoline.

5. By allowing a price to any dealer, jobber, or wholesaler on such gasoline sold by such dealer, jobber or wholesaler at retail lower than the price which respondent charges its retailer-customers who in fact compete in the sale and distribution of such gasoline with such dealers, jobbers, or wholesaler in their retailing capacity.

6. By selling such gasoline to any jobber or wholesaler at a price lower than the price which respondent charges its retailer-customers who in fact compete in the sale and distribution of such gasoline with the retailer-customers of such jobbers or wholesalers, where such jobber or wholesaler, to the knowledge of the respondent or under such circumstances as are reasonably calculated to impute knowledge to the respondent, resells such gasoline or intends to resell the same to any of its said retailer-customers at less than respondent's posted tank-wagon price or directly or indirectly grants to any such retailer-customer any discounts, rebates, allowances, services, or facilities having the net effect of a reduction in price to the retailer.

For the purpose of comparison the term "price" as used in this order includes discounts, rebates, allowances and other terms and conditions of sale.

The above specified requirements of this order are subject, however, to the following provisos:

(a) That none of the prohibitions of the order shall be taken as inhibiting any price differentials by respondent that were not found under the facts herein to have a tendency to injure, destroy or prevent competition with respondent's customers receiving the benefit of such differentials or with their customers.

(b) That none of the prohibitions of the order shall be taken as preventing any price differentials by respondent which make only due allowance for differences in respondent's cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such gasoline is to such purchasers sold or delivered.

(c) That none of the prohibitions of the order shall be taken as inhibiting a lower price to jobbers than to retailers where respondent thereby makes only due allowance for its differences in cost of manufacture, sale or delivery resulting from the differing methods or quantities in which such gasoline is to such purchasers sold or delivered.

(d) That none of the provisions of the order shall be taken as inhibiting any price differentials by respondent that reflect differences in the grades and qualities of such gasoline.

And It Is Hereby Further Ordered, Adjudged And Decreed, that this ourt retain, and it does hereby retain, jurisdiction of this proceeding to the extent necessary to compel obedience to said order to cease and desist, as herein modified, but without prejudice to the right of the Federal Trade Commission to initiate such contempt proceedings or other proceedings for that purpose as may be warranted by law.

By the Court.

April 29, 1949.

And afterward, to-wit, on the seventh day of May, 1949, there was filed in the office of the Clerk of this Court a designation of record for Supreme Court, which said designation is in the words and figures following, to-wit:

IN THE UNITED STATES COURT OF APPEALS

For the Seventh Circuit.

Standard Oil Company,
a corporation,
Petitioner,
vs.
Federal Trade Commission,
Respondent.
No. 9215.

DESIGNATION FOR SUPREME COURT RECORD.

To the Honorable the Judges of the United States Circuit Court of Appeals for the Seventh Circuit:

Comes now the Petitioner in the above entitled cause and hereby designates for printing and for inclusion in the record before the Supreme Court of the United States the following documents:

1. The printed record of proceedings before the Federal Trade Commission filed in the United States Circuit Court of Appeals for the Seventh Circuit on July 12, 1948, which printed record already includes the following documents heretofore filed with this court:

(a) Petition for review and statement of points filed October 4, 1946.

(b) Cross-petition of Federal Trade Commission filed November 18, 1946.

(c) Stipulation regarding exhibits and order approving same dated December 27, 1946.

(d) Petitioner's designation of record filed December 27, 1946.

(e) Respondent's designation of record filed January 6, 1947.

2. Order dated January 28, 1949 granting leave to the Retail Gasoline Dealers Association of Michigan, Inc., to file brief as amicus curiae.

3. Minutes of hearing before the United States Circuit Court of Appeals for the Seventh Circuit and order dated February 16, 1949, taking the cause under advisement.

4. Opinion of the United States Circuit Court of Appeals for the Seventh Circuit, dated March 11, 1949.

5. Order on aforesaid opinion dated March 11, 1949.

6. Decree dated April 29, 1949, modifying the Federal Trade Commission order to cease and desist and enforcing said order as modified.

7. This designation for Supreme Court record dated May 6th, 1949.

May 6, 1949.

STANDARD OIL COMPANY,
Petitioner,

vs.

FEDERAL TRADE COMMISSION,
Respondent.

PETITION FOR WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE SEVENTH CIRCUIT.

To the Honorable Chief Justice and Associate Justices of the Supreme Court of the United States:

Your petitioner, Standard Oil Company, respectfully prays for a writ of certiorari to the United States Court of Appeals for the Seventh Circuit to review a decree of that Court (R. 5307-10) entered April 29, 1949, modifying a cease and desist order issued by the Federal Trade Commission August 9, 1946 (R. 5254) and affirming and enforcing said order as modified. A certified transcript of the record in this case, including the proceedings in said Court of Appeals, is furnished herewith in accordance with Rule 38 (1) of the Rules of this Court.

OPINION AND DECREE BELOW.

This is the first proceeding in which a Federal agency or a Federal Court has denied a seller the right to meet competition in good faith by reducing his price to an individual customer to meet a price offered to the customer by a competitor. Such a price reduction—admittedly made in good faith to retain the business of that customer—was held to be a price discrimination violative of Section 2 of the Clayton Act as amended because of its effect on competition among retailers, despite the proviso of Section 2(b) thereof:

> "*Provided, however*, that nothing contained herein shall prevent a seller rebutting the prima facie case thus made by showing that his lower price * * * to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor * * *."

The court below also sustained the Commission on two other contested issues (R. 5293-5305, 173 F. 2d 210) for which review is sought:

> The Federal Trade Commission has jurisdiction of a price discrimination case under Section 2 only "* * * where either or any of the purchases involved in such discrimination are in commerce * * *". The court held that the purchases in the State of Michigan involved in the alleged discrimination were "in commerce" although fulfilled by delivery out of a local Michigan storage terminal where the gasoline had been at rest for several months.
>
> The court prohibited petitioner from selling to a wholesaler at a lower price than petitioner sells to retailers in the same territory when petitioner knows or "has reason to know" that the wholesaler intends to resell to his retailer customers at a price less than petitioner sells to its own retailer customers.

THE MATTER INVOLVED.

Petitioner's business in the State of Michigan consisted solely of the sale and distribution of petroleum and related products. This case is exclusively concerned with petitioner's sale of gasoline to two classes of customers in the Detroit region: (a) to a varying number of retail service station operators buying in small tank *wagon* quantities; and (b) to four jobbers* buying in larger tank *car* quantities. The functional difference between a retail service station operator and a jobber is outlined in the margin.**

These jobbers were supplied with petitioner's gasoline out of its Marine Terminal near Detroit; the service stations were supplied out of the Terminal or out of petitioner's six Detroit bulk plants which were in turn supplied from the Terminal. Petitioner sold and delivered gasoline in tank car quantities to the four jobbers at its regular tank car price, which, in the case of its largest selling brand, was 1½¢ per gallon lower than the regular tank wagon price at which it sold and delivered in smaller quantities to the service stations (R. 116). This price differential or jobber margin was held to be unlawful price discrimination. Similar or larger jobber margins were available to all jobbers at all times from other suppliers of comparable gasoline (R. 127, 1063-4, 1092, 1893).

---

* Stikeman Oil Company; Wayne Oil Company; Citrin-Kolb Oil Company; Ned's Auto Supply Company (R. 113).

** Retail service stations have limited storage capacity and cannot receive deliveries in excess of a "tank *wagon*" quantity. Jobbers, however, maintain large bulk storage plants, equipped to take large deliveries in "tank *car*" quantities, which they, in turn, deliver to retail service stations. Jobbers also differ from retail service stations in that they operate their own tank wagons for making deliveries to service stations, buy a large minimum annual gallonage, and are accorded a tank car price which is necessarily lower than the tank wagon price at which they sell to retailers. Some jobbers also operate service stations of their own (R. 119, 934, 1890-1, 5098).

The practices of the four jobbers varied. Stikeman and Wayne sold almost entirely at wholesale and always at the prevailing tank wagon price (R. 5166-7). Citrin resold almost entirely at wholesale and always at the prevailing tank wagon price, except in the case of Langer-Cohn, a retailer to whom Citrin accorded a discount, and in the case of one other customer who received a discount for a brief time. Citrin resold at retail for a short period at one of its own service stations at less than the prevailing service station price (R. 5166). Ned's resold entirely through its own retail service stations, frequently at prices below the prevailing service station price (R. 5167). Petitioner has never in the past made any attempt to control its customers in respect of their resale price (R. 196-8).

The court found that the differential between tank car and tank wagon price accorded by petitioner to Ned's and Citrin and the discount allowed by Citrin to Langer-Cohn were eventually passed on to the public in the form of service station prices lower than those generally prevailing; that this resulted in some loss of patronage by service station operators who tried to maintain the higher price to the public and compelled some service station operators to reduce their price to the public; and that the tank car differential constituted a price advantage which, because of this sequence of events, was injurious to competition at the retail level (R. 5297, 5302).

Facts Relating to the Defense of Meeting in Good Faith the Lower Price of a Competitor.

The evidence was conclusive, and it was assumed both by the Commission and by the court below (R. 5297, 5299, 5302), that the tank car price was accorded to each of the four jobbers by petitioner in good faith to meet an equally low price proved to have been specifically offered each of them by other suppliers of gasoline of comparable grade and quality. Petitioner had already lost three jobber customers to competitors because it had failed to meet the lower prices offered them by such competitors (R. 1912-6); and, during the period complained of, competitors were trying to take away petitioner's four remaining jobber customers by quoting tank car prices even lower than petitioner's regular tank car price (R. 5096, 5104). Not only was petitioner warranted in believing it would have lost these jobber customers to competitors had it not quoted the price here complained of (R. 1893, 5098, 5104; Mason R. 5262, 5264), but it would in fact have lost the four jobbers as customers had it not met, in whole or in part, the specific lower prices offered them by designated competitors (R. 5121, 5122, 5104). Petitioner never undercut the prices offered by competitors to its four jobber customers.

The distribution of gasoline is highly competitive in the Detroit region. These four jobbers, operating their own bulk storage and delivery facilities, will be able, in the future as in the past, to continue to buy at a tank car price, as low or lower than petitioner's tank car price, from other suppliers of branded gasoline comparable in grade and quality to petitioner's (R. 948, 1062-3, 1893). Suppliers distributing only through jobbers* in the Detroit region (irrespective of their practice in other regions) can and will sell to these particular four jobbers in tank car quantities at a tank car price even lower than petitioner's, and, inasmuch as they will be selling at one price only, they will be entirely beyond the reach of Section 2 of the Clayton Act as amended and the Commission will be without power to proceed against them regardless of the prices at which their customers might resell at wholesale or retail (R. 1092-3).

---

* In certain localities some suppliers of gasoline, comparable in grade and quality to petitioner's, distribute only by tank wagon delivery to retailers (R. 1622, 945-6); others only by tank car delivery to jobbers or wholesalers (R. 971, 1092-3); and others, as petitioner, by both methods (R. 971, 1020, 1622).

The sole reason advanced for depriving petitioner of its right in good faith to meet the price of a competitor is that the Commission and the court deemed that petitioner's exercise of that right produced results injurious to competition at the retail level (Com. R. 5170-1, 5179; Op. R. 5302-3). If the Decree should be permitted to stand, there will be no rectification of the so-called injury to competition at the retail level; the four jobbers will be in a position to obtain the tank car differential from suppliers distributing in the Detroit region through jobbers only and to pass on to their customers a portion of such differential.

Facts Relating to Jurisdiction: Were the Purchases Involved in This Case "in Commerce"?

All of the gasoline sold by the petitioner in the Detroit region came from petitioner's Marine Terminal, at River Rouge, Michigan, which had a storage capacity of some 63,000,000 gallons (R. 185-6, 5062-3). Gasoline was shipped by petitioner's lake tankers from its Whiting, Indiana, refinery during the summer months and stored in the Terminal to supply the estimated fluctuating demands of existing and prospective customers throughout the year and particularly during the winter months when lake navigation was closed (R. 186). Shipments of gasoline were commingled in tanks at the Terminal with stocks of the same grade previously received and stored there (R. 186, 188), became part of the mass of property in the State, and State taxes were paid thereon (R. 194-5). None of the gasoline stored in the Terminal was earmarked for or destined to any given customer (R. 186). Although petitioner had various activities in other Mid-West States, none of the gasoline stored in the Terminal was transported or sold out of the State of Michigan (R. 188).

Approximately half of the gasoline stored at the Marine Terminal was delivered to the jobber and service station customers of petitioner and the rest to its consumer customers (R. 4776). Delivery was made to the service stations by tank wagon trucks owned and operated by petitioner, either out of the Terminal or out of the six large bulk plants maintained by petitioner in Detroit (R. 108-9, 121-2). Deliveries out of the Terminal to petitioner's and jobbers' bulk plants were made in tank car quantities by tank cars or transport trucks owned and operated by common carriers (R. 108, 113[illegible] 186-7). The jobbers in turn delivered to their customers in smaller quantities by tank wagon trucks owned and operated by them (R. 1891). No direct shipments were made from petitioner's Whiting, Indiana, refinery either to the service stations or to the four jobbers except six tank cars shipped to the jobbers in an emergency during the month of April, 1939 (R. 122, 4717-26).

No shipments to the Marine Terminal were made in response to prior orders of jobbers or service stations (R. 186). Neither jobbers nor service stations were required by contract or understanding to purchase any designated amount of gasoline from petitioner. Neither jobbers nor service stations were required by contract or understanding to deal exclusively in petitioner's brands of gasoline (R. 116, 162, 4702, 4713); some, in fact, handled Ford Benzol gasoline (R. 222, 467, 470).

Orders for gasoline were given by the jobbers and the service station dealers to petitioner's Detroit office, to the Marine Terminal, to tank wagon drivers or to salesmen. None was given to any office of petitioner outside the State of Michigan (R. 191-3). All payments were collected in

Michigan and deposited in Michigan banks. Michigan taxes were paid on all property in Michigan, including land, buildings, inventory at the Marine Terminal and bulk plants, bank account, and on sales where due (R. 192-3, 194-6).

JURISDICTION TO REVIEW.

Jurisdiction of this Court is invoked under Title 28, United States Code, Sections 1254(1) and 2101. The decree of the Court of Appeals for the Seventh Circuit to be reviewed was entered April 29, 1949 (R. 5307-10).

THE QUESTIONS PRESENTED.

1. Whether the Commission, under Section 2 of the Clayton Act as amended, may deprive a supplier of the right to retain a jobber customer by meeting in good faith the lower price offered such customer by a competing supplier where the Commission deems that the effect thereof has been injurious to competition at the retail level.

2. Whether Section 2 of the Clayton Act as amended, construed to deprive a supplier of this basic right, contravenes the due process clause of the Fifth Amendment.

3. Whether "either or any of the purchases involved in" the discrimination (*i.e.*, the purchases of the jobbers on the one hand or of the service station operators on the other) are "in commerce" as required by Section 2(a) where such purchases are made wholly within the state, and are filled from stocks stored for long periods of time

in a local marine terminal but not shipped there in response to previous orders.

4. Whether a supplier of gasoline, selling both to wholesalers and retailers in the same area, may be required to enter into a price maintenance program by an order to cease and desist from selling to a wholesaler who, the supplier knows or has reason to know, intends to resell to his retailer customers at a price below that at which the supplier sells to its own retailer customers.

REASONS RELIED ON FOR THE ALLOWANCE OF THE WRIT.

1. The lower court's denial of the right of a supplier to reduce its prices to certain customers in good faith to meet equally low prices offered them by competitors (a) is of prime significance in connection with laws regulating competition and of great importance to all industry, large and small; (b) is apparently contrary to a decision of the Court of Appeals for the Second Circuit; and (c) is, we believe, in conflict with the principles laid down by this Court in price discrimination and other cases.

2. Section 2 of the Clayton Act as amended, as construed by the court below, contravenes the due process clause of the Fifth Amendment, especially in view of the fact that the only practical consequence of the Decree will be to transfer the patronage of petitioner's jobber customers to other suppliers without changing competitive conditions at the retail level. The constitutionality of the Act, thus construed, is a question of great consequence, never passed upon by this Court.

3. The decision below that the purchases by the jobbers and service stations were "in commerce", on the ground that storage in a local gasoline terminal differs essentially, if not in principle, from storage in a local merchandise warehouse, (a) is of vital importance to the oil industry, (b) has been decided otherwise by other Courts of Appeals, (c) and is apparently in conflict with opinions of this Court.

4. The decision of the court below modifying Paragraph 6 of the Order to require a supplier to cease and desist from dealing with a wholesaler when such wholesaler "to the knowledge of" the supplier, "or under such circumstances as are reasonably calculated to impute knowledge" to the supplier, resells or intends to resell the gasoline to his retailer customers at a price less than the supplier's price to its own retailer customers, (a) will require the establishment of price maintenance programs, (b) will jeopardize the businesses of independent wholesalers functioning as merchandisers, and (c) will entail basic alterations of marketing procedures, which should not be required without previous review and consideration of this Court.

WHEREFORE, your petitioner respectfully prays that a writ of certiorari be issued out of and under the seal of this Court, directed to the United States Court of Appeals for the Seventh Circuit, sitting at Chicago, Illinois, commanding said court to certify and send to this Court, on a day to be designated, a full and complete transcript of the record and of all proceedings heretofore had in said Court of Appeals in this cause, to the end that this cause may be reviewed and determined by this Court; that the decree of said Court of Appeals be reversed and set aside;

and that the petitioner be granted such other and further relief as may seem proper.

BRIEF.

I.

The present is the first and only case in which the Federal Trade Commission or the judiciary has held that a manufacturer, distributor or seller may not reduce his prices in specific instances for the sole and only purpose of meeting competitors' prices and thus retaining his own customers.

The ruling below (R. 5293-5305) that a supplier may not in good faith meet the prices of his competitors when the Commission concludes that the effect on competition is injurious is in conflict with *Federal Trade Commission* v. *Staley Mfg. Co.*, 1945, 324 U. S. 746, and *Corn Products Refining Co. et al.* v. *Federal Trade Commission*, 1945, 324 U. S. 726.

In the *Staley* case this Court held that the basing point system of pricing constituted price discrimination which resulted in injury to competition among those who purchased glucose from suppliers and used it in subsequent manufacture. The Court then considered the affirmative defense proffered under the proviso to Section 2(b) and said (p. 750):

> "The sole question we find it necessary to discuss here is whether respondents have succeeded in justifying the discriminations by an adequate showing that the discriminations were made 'in good faith' to meet equally low prices of competitors."

The Court (pp. 750-760) reviewed and discussed the evidence having to do with this defense and finally held that the showing was "inadequate" inasmuch as specific offers by specific competing suppliers to specific customers had not been proved. This long discussion would have been entirely academic and unnecessary had injury to competition at any level been sufficient to override the defense.

In the *Corn Products* case, where injury to competition among purchasers of glucose was proved, the Court said of the affirmative defense (p. 741):

> "* * * Examination of the testimony satisfies us, as it did the court below, that it was insufficient to sustain a finding that the lower prices allowed to favored customers were in fact made to meet competition. Hence petitioners failed to sustain the burden of showing that the price discriminations were granted for the purpose of meeting competition. Cf. *Federal Trade Commission* v. *A. E. Staley Mfg. Co., post*, p. 746."

Again, the examination of the testimony would have been unnecessary if, as a matter of law, the defense were obviated by the effect on competition.

In *Federal Trade Commission* v. *Cement Institute et al.*, 1948, 333 U. S. 683, the Court said, at p. 727:

> "Most of the objections to the order appear to rest on the premise that its terms will bar an individual cement producer from selling cement at delivered prices such that its net return from one customer will be less than from another, even if the particular sale be made in good faith to meet the lower price of a competitor. The Commission disclaims that the order can possibly be so understood. Nor do we so understand it. * * * It is thus apparent that the order by its terms is directed solely at concerted, not individual activity on the part of the respondents."

Thus the opinion below is in opposition to the *Staley and Corn Products* cases and to the rationale of *Cement Institute*.

The opinion below is also in conflict with the *per curiam* opinion of the Court of Appeals for the Second Circuit in

Samuel H. Moss, Inc. v. *Federal Trade Commission*, 1945, 148 F. 2d 378 (cert. den. 326 U. S. 734, reh. den. 326 U. S. 809), where Judges L. Hand, A. N. Hand, and Clark reviewed and interpreted Sections 2(a) and (b) and said, at page 379, that even where it appears that a seller

> "* * * has lessened, or prevented, competition, the proviso of § 2(b) will still excuse him, if he can show that his lower price did not undercut his competitors, but merely 'met' their 'equally low price'. In short, that is a defense to the violation of § 2(a). This is as we interpret § 2(a) and § 2(b) when read together."

The decision below also appears to be in conflict with that of the Court of Appeals for the Sixth Circuit in *General Shale Products Corp.* v. *Struck Construction Co.*, 1942, 132 F. 2d 425, at 429 (cert. den. 318 U. S. 780).

Actual or "reasonably possible" injury to competition must be present in every price discrimination case (*Corn Products Refining Co., et al.* v. *Federal Trade Commission*, 1945, 324 U. S. 726, 742; *Federal Trade Commission* v. *Morton Salt Company*, 1948, 334 U. S. 37, 46, 50. If injury to competition rebuts the affirmative defense of meeting a competitor's price in good faith, it necessarily follows that the affirmative defense is unavailable in any case and that the proviso to Section 2(b) is without meaning.

The Commission and the Court placed great reliance on the legislative history of the Robinson-Patman Act to sustain their novel interpretation of the proviso to Section 2(b), particularly on the Conference Report and Representative Utterbach's remarks (R. 5180-2, 5300-01). This legislative history was fully considered and appraised in the *Staley* case where the Court said (p. 753) that the change embodied in the language of Section 2(b) with respect to the good faith meeting of competition "* * * was for the purpose of making the defense a matter of evidence in each case, raising a question of fact as to whether the competition justified the discrimination" (citing the Conference Report and Representative Utterbach). It is difficult to imagine a case where the competition more strongly justified the discrimination than the present one where, as the court below held (R. 5297, 5302), the evidence was conclusive that the lower prices to the four jobber customers were made in good faith by petitioner to meet specific equally low offers of competitors and where the sole purpose was to enable petitioner to retain its customers.

The Commission itself, both before and after this case, has by appropriate provisos in its orders preserved the right in individual cases to meet in good faith equally low prices of competitors, even where actual injury was found (*A. E. Staley Mfg. Co.*, 1942, 34 F. T. C. 1362; *Ferro-Enamel*, February 26, 1946, 42 F. T. C. 36). The Ferro-Enamel order was issued subsequent to the Commission's original Findings and Conclusions in this case (R. 5182).

The position of the Commission is not only at odds with its previous and subsequent orders but is apparently in conflict with the views of the Department of Justice. As recently as January, 1949, a formal report to the Senate Interstate and Foreign Commerce Committee concerning a bill to amend the Clayton Act, signed by Peyton Ford, the Assistant to the Attorney General, states:

> "Section 3 of the bill would amend Section 2(b) of the Clayton Act. The section [Sec. 2b] now permits sellers to justify otherwise forbidden price discriminations on the ground that the lower prices to one set of buyers were made in good faith to meet the prices of a competitor."*

---

*U. S. Printing Office, "Comparative Absorption of Transportation Costs"; Hearings before a Subcommittee of the Committee on Interstate and Foreign Commerce of the U. S. Senate; 81st Congress, First Session, on S. 236; Jan. 24, 25, 26, and Feb. 18, 1949, p. 320.

The reasoning of the decision below, if allowed to stand, will necessitate a nationwide reconstruction of the marketing procedures not only of the oil industry but of many other industries. The right of a supplier to compete with his competitors by meeting their prices is so fundamental that no restriction should be placed upon it without the review and consideration of this Court.

II.

The interpretation of the court below raises a serious question of the constitutionality of Sections 2(a) and (b) of the Clayton Act as amended by the Robinson-Patman Act.

The right in good faith to meet the lower price of a competitor in order to keep a customer is of first significance in our competitive system. It has never heretofore been denied. In *International Salt Co.* v. *United States*, 1947, 332 U. S. 392, a Sherman Act case, this Court said at p. 399, " * * * Of course, the Clayton Act itself permits one charged with price discrimination to show that he lowered his price in good faith to meet competition." When the case was returned to the District Court, the trial judge modified the decree to allow the defendant to depart from uniform prices "where necessary in good faith to meet competition" (C. C. H. (Trade Regulation) par. 61,128). The right to meet lower prices in individual instances was also preserved in the *Cement Institute* case, *supra*, and was recognized in *Federal Trade Commission* v. *Morton Salt Co.*, 1948, 334 U. S. 37 at 43.

The denial of such a basic right would, we believe, transgress the Fifth Amendment. In *Fairmont Creamery Co.* v. *Minnesota*, 1927, 274 U. S. 1, this Court held unconstitutional a statute of Minnesota which prohibited a buyer of milk from paying a higher price in one locality than in another after due allowance for cost on the grounds that the statute inhibited the buyer "from meeting local competition by increasing the price only at that place * * *" (274 U. S. at p. 8).

Should the decree of the court below be sustained, the four jobbers would transfer their patronage to other companies supplying comparable gasoline in the Detroit region at the tank car price to jobbers only (R. 1092-3) and who would be beyond the reach of the Commission inasmuch as such suppliers sell at one price only. The jobbers, buying from such suppliers at their tank car price, would therefore be free to cut prices in the future as in the past, with the same effects on competition. The net practical result of this construction of the statute would be to switch petitioner's jobber customers to others. We submit that such a construction would be in contravention of the Fifth Amendment.

III.

The lower court's decision that the storage of gasoline at the Marine Terminal differed from the storage of goods in a local warehouse (Op. R. 5297-8) and hence did not constitute an end of interstate commerce is in apparent conflict with the decision of the First Circuit in *Lipson* v. *Socony Vacuum Corp.*, 1937, 87 F. 2d 265, cert. granted 300 U. S. 651, dism. per stip. 301 U. S. 711, which is an oil case in which the facts were similar with respect to the commerce point.*

---

* It is also in conflict with *Daly* v. *Citrin*, 1943, Dist. Ct., E. Dist. Mich., 53 F. Supp. 876, which dealt with petitioner's storage at the Marine Terminal involved in this case, and with *Nachman* v. *Shell Oil Co.*, 1945, Dist. Ct., Dist. Md., C. C. H. (Trade Regulation) p. 57758, where local storage of gasoline was held to terminate interstate commerce. See also *Crutchfield* v. *Cherry*, 1947, Dist. Ct., W. Dist. Tenn., 7 W. H. (B. N. A.) 1080; *Williams et al.* v. *Bill Mosier's Inc.*, 1942, Dist. Ct., W. Dist. Okla., 2 W. H. (B. N. A.) 662, in both of which interstate movement of gasoline was held to have ceased at a local storage facility.

The decision of the court below that storage at the Marine Terminal did not end the interstate movement because of the ability of the petitioner to predict with some degree of accuracy its customers' fluctuating demands for gasoline in the locality is, we believe, in conflict with the reasoning of this Court in *Walling* v. *Jacksonville Paper Co.*, 1943, 317 U. S. 564, 569, 570, and with decisions of other courts of appeals: the First Circuit in *Domenech* v. *Pan American Standard Brands, Inc.*, 1945, 147 F. 2d 994; the Tenth Circuit in *Jewel Tea Co.* v. *Williams*, 1941, 118 F. 2d 202.

It is jurisdictional in this case that "either or any of the purchases" of gasoline by the four jobbers or the 358 service station operators at prices found to be discriminatory were "in commerce" (Section 2(a)). That the purchases "affected commerce" is not enough. *Federal Trade Commission* v. *Bunte Bros.*, 1941, 312 U. S. 349; *Higgins* v. *Carr Bros. Co.*, 1943, 317 U. S. 572. The court below nevertheless cited on this point cases involving statutes wherein the Congress exerted its full power over commerce (R. 5298), *e. g.*, *Stafford* v. *Wallace*, 1922, 258 U. S. 495. It is submitted that the court failed to distinguish between the two lines of cases; see *Polish National Alliance* v. *National Labor Relations Board*, 1944, 322 U. S. 643 at 647.

The question is of outstanding importance to the oil and other industries. Whether or not the bona fide storage of gasoline at a local terminal is analogous in principle to the storage of other kinds of merchandise at a local warehouse should, we believe, be settled by this Court.

IV.

Paragraph 6 of the Order as modified by the court (R. 5305-6) applies only after the jobber has been shorn of all retail operations. It requires petitioner:

(1) either to cease selling to wholesalers (performing the sole function of wholesaling and not selling at retail) or else to cease selling to retailers in the same locality; or

(2) to sell to wholesalers and retailers in the same locality at the same price, which not only is a practical impossibility but which also disregards the functional difference between wholesalers and retailers; or

(3) to cease dealing with any wholesaler who petitioner knows, or should know, will not maintain petitioner's price to retailers.

Neither the courts nor the Commission in any other case have required suppliers to distribute solely by wholesale or solely by retail; nor to charge the same price to wholesalers and retailers; nor to establish price maintenance systems.

Whether the Commission may order suppliers to control resale prices by selection of complaisant wholesalers is an innovation of dubious legality. *Federal Trade Commission v. Beech-Nut Packing Co.*, 1922, 257 U. S. 441.

The court below, denying petitioner's contention that interstate commerce ended with storage at the Marine Terminal, held that interstate commerce came to an end when the petitioner disposed of its gasoline to its customers (R. 5297). The jurisdiction of the Commission must end where interstate commerce is found to end; yet Paragraph 6 as modified permits the Commission, through petitioner as an enforcing agency, to exercise jurisdiction over the price of gasoline after its interstate movement was held to have ended and therefore over wholesalers who, the court held, were not engaged in interstate commerce.

Conclusion.

It is respectfully submitted that this case calls for the exercise of the supervisory powers of this Court and that the writ should be allowed.

IN THE

Supreme Court of the United States

October Term, 1949.

No. 107.

STANDARD OIL COMPANY,

Petitioner,

vs.

FEDERAL TRADE COMMISSION,

Respondent.

BRIEF FOR PETITIONER.

DECISIONS BELOW.

The opinion and decree of the Court of Appeals for the Seventh Circuit issued March 11, 1949 (R. 5293), 173 F. 2d 210. The final order of the Federal Trade Commission was entered August 9, 1946 (R. 5254), 43 F. T. C. 56.

JURISDICTION TO REVIEW.

Jurisdiction is conferred upon this Court by Title 28, United States Code, Section 1254(1). Certiorari was granted herein November 7, 1949.

STATUTE INVOLVED.

Sections 2 (a) and (b) of the Clayton Act, as amended by the Robinson-Patman Act (Act of October 15, 1914, as amended by Act of June 19, 1936, 49 Stat. 1526; 15 U. S. C., sec. 13), attached as Appendix B, pp. ii.

STATEMENT OF THE CASE.

The complaint in this case challenged the right of petitioner under the Robinson-Patman Act to sell its gasoline to its four jobber customers in Detroit* at 1½¢ per gallon less than it sold to its service station customers in the same area (R. 2, 34). Petitioner defended on the ground that it made the lower price in order to retain the four jobbers as customers and to meet in good faith equally low prices offered them by competitors (R. 17-22). It was also contended that "the purchases involved" were not "in commerce" (R. 5-8). The farther defense of cost justification was not pursued in the court below and is therefore eliminated.

---

* Citrin-Kolb Oil Company, Stikeman Oil Company, Wayne Oil Company, Ned's Auto Supply Company.

THE FACTS.

With few exceptions, all the material facts in this case are contained in the Commission's Findings of Fact (R. 5161-82) or, if not mentioned by the Commission, in the Trial Examiner's Report (R. 5047-128).

During the period 1936 to 1940 petitioner, a producer and refiner with principal office at Chicago, was engaged in distributing petroleum and related products in 14 Middle West States (R. 5163). It did not produce or refine in Michigan; its business there consisted solely of distribution (R. 5162-3). This case concerns exclusively petitioner's sale of gasoline in the region of Detroit, Michigan, to two classes of customers: (a) to approximately 358 independent retail service stations buying in tank wagon quantities; and (b) to the four jobbers buying in larger tank car quantities.

Petitioner sold to all its service station customers at the same price—*i. e.*, the tank wagon price (R. 5058, 131, 161).* The deliveries made by tank wagon to these service stations averaged 700 to 800 gallons (R. 112).

Petitioner sold to all its jobber customers at the same price—*i. e.*, the tank car price. These four jobbers, who during the period involved were petitioner's only jobber customers in Detroit, purchased at the tank car price, which (in the case of Red Crown** gasoline) was 1½¢ less than the tank wagon price (R. 5061). The deliveries made in tank car loads (or equivalent transport truck loads) to these jobbers averaged 8,000 to 12,000 gallons (R. 122).

---

* During the early part of the period 1936-1940, there were 18 months when Ned's (before it became a jobber) purchased at ½¢ below the tank wagon price (R. 5168) for reasons appearing below.

** Red Crown constituted 90% of petitioner's sales in Detroit, Stanolind constituted 3 to 4%, and Solite with Ethyl 7 to 10% (R. 5162). The prices of Stanolind and Solite with Ethyl as well as the tank car differential differed somewhat from the price of Red Crown (R. 5061).

Petitioner did not attempt to control the resale prices of its jobber customers (R. 197-9) nor did it attempt to control the prices at which its service station customers resold gasoline (R. 196-7).

Citrin, Wayne and Stikeman during 1936-40 and Ned's during 1938-40 "under industry practice and contemplation were bona fide jobbers" (R. 5098) because each of them maintained sufficient bulk storage to take delivery in tank car quantities, owned and operated tank wagons and other facilities for delivery to service stations, had an established business sufficient to insure purchases of from one to two million gallons a year, and had adequate credit responsibility (R. 5096-7-8), notwithstanding the fact that Ned's resold entirely at its own service stations to the consuming public and that the other three resold in part in the same way.* The Trial Examiner found that three of them met the definition of "jobber" contained in the N. R. A. Code for Marketing Refined Petroleum Products approved by the Federal Trade Commission and were registered in the State of Michigan as jobbers prior to the passage of the Robinson-Patman Act (R. 5097-8)—

---

* Wayne in 1936, 1937 and 1938 sold all gasoline at wholesale but in 1939 it sold 7.6% and in 1940 14.2% at retail stations operated by it temporarily until suitable tenants could be found (R. 5059-60). Stikeman was withdrawing from the operation of its own service stations and since 1938 sold entirely at wholesale (R. 5060). Citrin, also withdrawing from the operation of its own stations, sold at retail 15% in 1937 and 6.5% in 1940 (R. 5060). Ned's sold substantially all its gasoline through the service stations owned and operated by it—4 in 1936, 6 in 1937 (R. 5059). See also table at R. 5122.

Ned's was recognized as a jobber in 1938.* The Commission in its Findings of Fact, not denying the established industry practice, held that the classification of these four as jobbers was "arbitrary" because "there was no requirement that the said jobbers should sell only at wholesale" (R. 5166-7-8).

During the period 1936-40 Michigan was one of the most highly competitive gasoline marketing areas in the country. This was due in part to the fact that of the total Michigan gasoline consumption, which can be taken at 1,100,000,000 gallons annually, approximately 333,000,000 gallons were refined annually in Michigan from oil produced from Michigan wells (R. 1380); of the 25 Michigan refineries 2 were operated by major companies and 23 by non-major companies (Res. Ex. 24, R. 4826). So-called non-major brand gasolines, which did not have the same public acceptance as major brands, had always been marketed at a differential below major brands of about 2¢ per gallon. When this differential exceeded 2¢ such non-major brand gasolines became increasingly competitive and seriously affected the marketability of major brands (R. 5108, 1787, 327, 2113). In 1938 service stations in Detroit were selling non-major brands at from 3¢ to 6¢ a gallon below the prevailing retail price of petitioner's gasolines (R. 1907) and Michigan refineries were offering Michigan gasoline to jobbers at 3¢ below the prevailing tank wagon price of major brands (R. 1908).

During the period there were 10,000 to 12,000 jobbers in the United States (R. 5249, 9340) of which approximately

---

* Throughout this brief we shall not use the word "dealer" which is ambiguous.

The word "jobber" shall apply to one who conforms to the industry classification of jobber and who therefore may resell at wholesale, retail or both.

The word "wholesaler" shall apply to one who resells only at wholesale.

130 were licensed in Wayne County in which Detroit is located (Res. Ex. 26 B-D, R. 4857-9). There were about 200,000 service stations in the country* of which 3,000-4,000 were located in Detroit (R. 5062) and of which petitioner and its jobbers supplied 452-463 (Com. Ex. 128-A, R. 4786). There were 20 so-called major oil companies in the United States** of which 16 were operating in Michigan*** and 9 in the Detroit area (R. 5106).

Total gallonage sold in the Detroit area by all companies aggregated from about 363,735,380 gallons to 460,664,890 gallons annually, of which petitioner's sales totaled from approximately 60,000,000 gallons to 75,000,000 gallons annually (Res. Ex. 58, R. 4879) constituting 16.2% to 17.4%. Petitioner's sales to its four jobbers ran from 8,095,972 gallons to 14,954,638 gallons annually (idem). Total sales of major-brand gasoline to jobbers in the Detroit area in 1940 were 103,783,982 gallons while the sales of non-major brands to licensed jobbers in 1940 amounted to 64,716,210 gallons (Res. Ex. 57-A&B, R. 4877-8; Res. Ex. 58, R. 4879).

Methods of distribution in the oil industry differ in different communities; for example, some suppliers of gasoline "do not sell to jobbers in fields in which they sell direct to the retail trade" (R. 5126-7, 1622, 945-6); others sell only to jobbers (or wholesalers) in a given field (R. 971, 1075, 1092-3); and others, as petitioner, sell both to jobbers and retailers in some fields (R. 5127, 971, 1020, 1622).

Relative to meeting competitors' prices.

The Trial Examiner affirmatively found that the tank car price accorded to the four jobbers, and the ½¢ discount accorded Ned's from 1936-8, were made in each instance to meet equally low prices repeatedly offered them by petitioner's competitors and that petitioner had to meet the competitors' prices to retain them as customers (R. 5096, 5104, 5122). He held as a matter of law that, had injury to competition not resulted therefrom, the granting of the lower price to them would have been lawful (R. 5096, 5105). He found that the effect of petitioner's lower price to Ned's and the four jobbers "was," "tended" and "may be" to substantially lessen competition with them and their customers (R. 5125-6) because of which, he held, the granting of the lower price was unlawful.

---

* TNEC Monograph, 1941, No. 39, p. 41.

** Idem p. 3.

*** Idem p. 94.

The Commission accepted the Examiner's novel Conclusions of Law but did not overturn his Finding of Fact that petitioner's lower price was made for the purpose of retaining the jobbers as customers and to meet equally low prices of competitors (R. 5178-82). The court below said there is "substantial evidence in this record" of petitioner's good faith in this respect "and we think it may be assumed to be conclusive" (R. 5297; see also 5299, 5302).

The record shows many specific instances where petitioner's competitors tried to win these jobbers by lower quotations for gasoline of like grade and quality. Each competitive offer was actually reported to petitioner. Petitioner's tank car prices allowed the jobbers were not as low as many of the competitive offers, and never lower. That these jobbers could have purchased comparable grades of gasoline at lower prices from many other sources and that petitioner could not have retained them as customers without allowing them the tank car price is indisputable (R. 5099-104, 1893, 1062-3, 1086, 1092, 1988-91, 1996-2014) and doubtless explains the Commission's inability to make a contrary finding.

Relative to effect on competition.

Ned's, which had been a price cutter for at least 15 years (R. 504-5), continued during 1936-40 to sell to the public at times below the prevailing retail service station prices and to accord discounts and premiums amounting to 1¢ to 2¢ a gallon off the prevailing service station price (R. 5169). Citrin in 1938 or 1939 gave discount cards to purchasers of gasoline at one of its service stations entitling the holder to a discount of 2¢ a gallon on Red Crown (R. 5170). Wayne and Stikeman did not allow any discounts or rebates to the public at the few service stations operated by them; nor did they sell at wholesale to their service station customers at less than petitioner's posted tank wagon price: *i. e.*, the price petitioner sold to its retailer customers (R. 5166-7, 5108).

Citrin from January 1, 1938, to December 31, 1940, sold a million gallons annually at wholesale to Langer-Cohn, an operator of service stations, at 1¢ a gallon less than petitioner's posted tank wagon price and smaller quantities to another retailer-customer at ½¢ less (R. 5166, 5171). Langer-Cohn at its few service stations at times resold to the consuming public at as much as 2¢ a gallon less than the prevailing service station price (R. 5171).

During the period 1936 to November, 1939, competition among service stations in Detroit was keen. Price cutting was common practice. The Trial Examiner pointed out that in the latter part of 1936 and early 1937 major brand gasolines were sold at some retail service stations below the then prevailing retail price by three large tank car customers of companies other than petitioner, by one large retailer not supplied by petitioner, by several small dealers not supplied by petitioner and by Ned's (R. 5113). Price cutting by other stations followed and increased progressively until January, 1939, when it subsided for a while, started again, and finally ended in November, 1939 (R. 5113-4). There was evidence that neither Ned's nor Citrin had initiated such price cutting but had merely attempted to meet in part the discounts offered by other retail service stations competitive with theirs (R. 5112, 1843-59, 907-15, 1628-45, 1652-85). The court (R. 5296) and the Commission (R. 5170) said that Ned's had been responsible for retail price cutting in major brand gasolines over a period of several years and thereby injured competition.

The Commission held that the service station operator's margin is represented by the difference between the tank wagon price which he pays and the consumer price which he receives. This margin varied from time to time but was found to have been 3.3¢ a gallon after November 19, 1939, on the principal brands of major companies (R. 5169), all of which are of substantially equal quality in the public mind (R. 5107, 325). The Commission found that the ½¢ lower price made to Ned's from 1936 to 1938 and the 1½¢ lower price made to the four jobbers constituted a competitive advantage injuring and lessening competition with them and with their respective customers (R. 5170).

The Commission called fifteen operators of Detroit service stations who testified that they had experienced price competition with Ned's, Citrin and Langer-Cohn and had lost customers to them, particularly during 1938 (R. 5114-5, 407-548, 575-98).

Harrison, a Commission witness, testified that if "all" major companies had refused to sell to retail operators at tank car prices "it would improve the competitive situation in Detroit" (R. 345); that the desire of a marketer enjoying a preferential price to expand frequently leads to price cutting (R. 343). Clark, Professor of Marketing at Northwestern University, a witness for petitioner, testified that jobbers perform definite economic functions (R.

1012, 13); that the jobber method is "necessary from the point of view of economy and service to retailers and consumer" (R. 1015); that it "leads to more economical distribution" (R. 1019) and more competition (R. 1023); "Without the jobber you would have a very much smaller number of competitors in the field" (R. 1020); and that distribution through different types (retailer, wholesaler, jobber) fosters competition in price and service (R. 5119-20, 1022-3, 1043, 1047).

Relative to "purchases in commerce."

All of the gasoline sold by petitioner in Detroit was shipped from its Whiting, Indiana, refinery over the Great Lakes by its lake tankers to its Marine Terminal located at River Rouge, Michigan, where such gasoline came to rest and was commingled with other gasoline of the same grade previously stored there over a period of time (R. 5163, 99-100, 186). Approximately half of the gasoline stored at the Terminal was delivered to jobber and service station customers of petitioner and the rest to its consumer customers (Com. Ex. 87, R. 4776). No gasoline in the Terminal was transported out of the state; all was destined for sale and delivery entirely in Michigan; and all was in fact sold and delivered entirely in Michigan (R. 188).

The Marine Terminal consisted of a tract of land on which was located sufficient tankage to store at one time 63,000,000 gallons of gasoline, together with suitable equipment and an office building to house the Terminal management and clerical help (R. 5163, 5057, 5063). The manager of the Terminal was paid from Chicago, was under general supervision of the Manufacturing Department of the Chicago office, and was entirely independent of the Detroit Division Office (R. 5063-4).

The Detroit Division Office had supervision of all sales in the Detroit field (R. 5057, 5063). It had approximately 450 employees under its jurisdiction, including office personnel, salesmen, truck drivers, stock men, and employees at the local bulk plants. The activities of all employees were confined to the State of Michigan. They were hired and paid by the Detroit Office and the records of their employment were kept in that office (R. 5063, 183-5, 189-90). The manager of the Detroit Division Office was under the general supervision of the Sales Department of the Chicago Office (R. 5063).

Purchases by Petitioner's Service Station Customers. Leasing negotiations for the 200 retail service station properties which petitioner owned and leased to independent operators and for the 8 service stations which petitioner leased and subleased to independent operators were originated, conducted and concluded entirely in Detroit on blank forms approved by the Chicago Office. The executed leases were retained as records of the Detroit Office (R. 5058, 190-1). The leases did not require the operators to handle petitioner's gasoline (R. 5164, 5058, Com. Ex. 1-A, R. 4702), but, with the exception of a few who handled Ford Benzol (R. 222, 467), they generally handled no other brand. There was no contract or arrangement for the purchase or sale of gasoline between petitioner and such operators either in the written lease or otherwise (R. 162).

Written contracts, usually for one year, were entered into between petitioner's Detroit Office and the 150 independent service stations which did not lease or sublease from petitioner (R. 5164, 5058). These contracts outlined the terms under which the station operators bought and petitioner sold petitioner's brands of gasoline (R. 5058, Com. Ex. 2, R. 4713); the operators were not committed to purchase any definite amount nor were they prohibited from dealing in products of others.

New accounts were solicited, contracts or leases were entered into, advertising was installed, orders were taken and tank wagon deliveries were made to these customers, all by employees of the Detroit Office (R. 189-91). All sales, contracts and leases were consummated in Michigan and negotiations were handled without referral to the Chicago Office (R. 190-1). The Detroit Office maintained and operated six bulk storage plants strategically located in Detroit which were periodically supplied with gasoline from the Marine Terminal by tank cars operated by independent common carriers (R. 5063, 114) under carrier contracts entered into in Chicago (R. 5064). These shipments from the Marine Terminal to bulk plants were made without reference to specific orders or contracts (R. 188) and gasoline thus delivered was commingled with gasoline of like grade previously stored there (R. 188). Each bulk plant was operated by a salaried or commission employee of the Detroit Office (R. 189).

Petitioner owned and operated approximately sixty tank wagons to deliver gasoline from the bulk plants to service stations in Detroit (R. 121, 2). Orders from service stations were taken by salesmen, by tank wagon drivers on regular routes making periodical calls, or were transmitted direct to the Detroit Office (R. 191). Orders were relayed to the bulk plants, whence the gasoline was transported by Company owned tank wagons and unloaded into the service station tanks (R. 110, 187). The drivers on delivery made out "tickets" or bills for the gallonage, which bills, together with the cash or credit collected, were returned to the proper bulk plant. The clerk in the bulk plant transmitted a report together with the money and "tickets" to the Detroit Office. The money was deposited in a Detroit bank and the "tickets" remained as permanent records of the Detroit Office (R. 5064, 192). On completion of sale, the gasoline delivered became the purchaser's absolute property and petitioner neither attempted to exercise nor in fact exercised any control over the disposition thereof (R. 196-7).

Purchases by Petitioner's Jobber Customers. Citrin, Wayne and Stikeman, and Ned's after 1938, maintained and operated one or more bulk plants from which they delivered gasoline by their own tank wagons to customers and to their own service stations (R. 5058-9). Petitioner shipped gasoline from the Marine Terminal to the bulk plants of these jobbers by tank car.* Petitioner and the jobbers were free to terminate the relationship at any time, the jobbers were on a day to day basis (R. 5058-9, 116). The jobbers were not spot market buyers and, except for Ford Benzol, handled only petitioner's gasoline (R. 2086-7).

When a jobber wanted gasoline he called the order clerk in petitioner's Detroit Office who made up an order and transmitted it to the Marine Terminal. After delivery by tank car to the jobber's bulk storage plant, the Detroit Office made out an invoice and mailed it to the jobber. The money remitted was placed in a Detroit bank and a copy of the invoice was kept in the Detroit Office as a permanent record of the transaction (R. 192-3). Gasoline so delivered became the jobber's absolute property and petitioner neither attempted to nor in fact did exercise thereafter any control over its disposition or resale price (R. 198).

---

* During the years 1936-40, six tank cars of gasoline were shipped direct from Whiting to the jobbers during the period March 31 to April 10, 1939 (R. 122, Com. Ex. 5-A to J, R. 4717-26). Such a nonrecurrent, sporadic instance, not in the regular course of a business, does not affect the outcome of this case (*Daly* v. *Citrin*, 1943, Dist. Ct., E. Dist. Mich., 53 F. Supp. 876, 878, 879; *Urban* v. *Victory Naval Uniform Co.*, 1947, Dist. Ct., Dist. Mass., 71 F. Supp. 270; *Semble*, *Mabee* v. *White Plains Publishing Co.*, 1946, 327 U. S. 178, 181, and *Phillips* v. *Meeker Cooperative Light & Power Ass'n*, 1945, Dist. Ct., Dist. Minn., 63 F. Supp. 733).

The Marine Terminal. Shipments of gasoline were made from petitioner's Whiting refinery to the Marine Terminal, without reference to any specific orders or contracts (R. 188), in contemplation of ultimate resale to present or prospective customers not only in Detroit but in the whole Detroit region (R. 5163, 5062). No shipment unloaded at the Marine Terminal was earmarked for or destined to any particular customer (R. 186) although of course the varying requirements of existing jobbers, service stations and commercial and other users could be estimated on a general over-all basis because of past experience (R. 5163, 207-8). Shipments were made during the summer months, sometimes weekly or twice weekly (R. 5163), and the Terminal tanks were filled to capacity in the summer and fall to take care of withdrawals in the late winter months when lake navigation was closed to tankers (R. 186, 207). The inventory of commingled gasoline in the Terminal tanks may have been put there from time to time over a period of months (R. 188).

Petitioner paid taxes to the State of Michigan on its Michigan real estate and personal property; on its land, equipment and facilities at the Marine Terminal, its bulk plants, its leased-out service stations, and its Detroit Office. It paid Michigan sales taxes where due. It paid Michigan personal property taxes on its inventories of gasoline at the Marine Terminal and bulk plants (R. 5064, 194-6).

THE ORDER OF THE COMMISSION.

Paragraph 5 of the Modified Order to Cease and Desist (R. 5256) prohibits petitioner from "allowing a price to any * * * jobber * * * on such gasoline sold by such * * * jobber * * * at retail lower than the price which" petitioner "charges its retailer-customers who in fact compete in the sale and distribution of such gasoline with such * * * jobbers * * * in their retailing capacity." This was designed to reach the jobbers in their *retailing* capacity.

Paragraph 6 was designed to reach the jobbers in their *wholesaling* capacity. It forbade petitioner to sell gasoline to any jobber at the tank car price where such jobber resells such gasoline to any retailer-customer at less than petitioner's posted tank wagon price to its retailer-customers—their respective retailer-customers being in competition with each other.

The Commission held that it was immaterial whether or not petitioner in making the tank car price to the jobbers had acted in good faith to retain them as customers and in order to meet an equally low price of a competitor (R. 5299, 5179). It held that "the defense of meeting an equally low price of a competitor, as provided by subsection (b) of section 2, is not available to" a seller (R. 5182) whenever the effect is deemed injurious to competition.

The Commission did not hold or find in *haec verba* or by necessary intendment that "either or any of the purchases involved in such discrimination are in commerce."

JUDGMENT OF THE COURT BELOW.

On review, the court modified Paragraph 6 of the Commission's Order, and entered its judgment enforcing the Order as modified (R. 5307).

SPECIFICATION OF ERRORS.

The court below erred in sustaining the Commission's Order and enforcing it as modified in that: (1) petitioner's showing that its lower price was made in good faith to meet an equally low price of a competitor constituted a complete defense; (2) Section 2(b), as construed by the court below, does not meet the constitutional requirements of definiteness and reasonableness; (3) Paragraph 6 of the Commission's Order as modified imposes prohibitions forbidden by the antitrust laws and unauthorized by the Clayton Act as amended; and (4) the purchases involved in the alleged discrimination were not in commerce.

SUMMARY OF ARGUMENT.

I. Section 2(b) by unmistakable language accords to a seller charged with price discrimination the right of "showing that his lower price was made in good faith to meet an equally low price of a competitor." This good faith showing has always been regarded as a complete defense to a charge of price discrimination--the Commission has always so regarded it except in the instant case (*infra,* p. 28); the Department of Justice has always so regarded it and recently publicly reiterated its position (*infra,* p. 32).

This Court, examining the language of Section 2(b) in the light of its context and legislative history for the purpose of determining the amount and quality of evidence necessary to establish good faith in meeting an equally low price of a competitor, has indicated that the good faith showing when adequately established will be a complete defense (*Staley, Morton Salt* and other cases, *infra,* p. 21). If, as held below, the defense is not available when there have been effects at the retail level deemed injurious to competition, then the defense will never be available in any price discrimination case and the proviso to Section 2(b) will be completely meaningless (*idem*).

II. The construction of Section 2(b) adopted by the court below renders its meaning so vague and its application so arbitrary as to raise serious constitutional questions which should be avoided by adopting the natural and plain meaning for which we contend.

Realizing that the court's interpretation of the proviso to Section 2(b) renders it entirely nugatory, the Commission now asserts in answer to Congressional inquiries that the defense will be available except in "rare," but entirely undefined, instances which cannot be identified (*infra,* p. 37).

Denial of the right in good faith to meet an equally low price of a competitor would render the statute constitutionally unreasonable and arbitrary, particularly where, as in the instant case, the effect is to transfer patronage from the seller to the competitor whose price the seller is forbidden to meet without in any way altering the competitive situation for the better (*infra,* p. 40). Furthermore, as shown in Point III, the effect of this construction in this case will merely be to restrict distribution by a supplier through retailers and jobbers in the same territory—a result which will actually lessen competition without eliminating any evils contemplated by the statute (*infra,* p. 43).

III. Paragraph 6 of the Commission's Order as modified, under which petitioner's jobbers may continue as wholesalers to purchase from petitioner at the tank car price provided they maintain petitioner's tank wagon price in the territory, is unreasonable and unlawful (*infra*, p. 46). Paragraph 6 will cause either the establishment of resale price programs by methods hitherto considered unlawful and uneconomic (*infra*, p. 46) or the unwarranted harassment and even liquidation of jobbers and retailers (*infra*, p. 47).

IV. The Commission was without jurisdiction of this case in any event unless "either or any of the purchases" of gasoline by the four jobbers or the 358 service stations served by petitioner was "in commerce" (*infra*, p. 50). All the gasoline sold in the Detroit area was delivered out of storage at a marine terminal located at River Rouge within the State of Michigan. Interstate aspects of transportation ended at the Marine Terminal and subsequent distribution from the Terminal solely within the State of Michigan was in local commerce beyond the purview of the Robinson-Patman Act (*idem*). The instant case is analogous to the *Jacksonville Paper* case, not to *Stafford* v. *Wallace* or *Swift* v. *United States* (*infra*, p. 51). The Commission did not find, although attention was called to the omission by the dissenting Commissioner, that "either or any of the purchases involved" in this case was "in commerce."

ARGUMENT.

I.

Meeting in good faith an equally low price of a competitor constitutes a complete defense under the proviso to Section 2(b).

The affirmative proof of meeting in good faith the equally low prices of competitors should have been held controlling in this case in view of the explicit language of Section 2(b), the decisions of this Court, and the basic principles involved.

Section 2(b) of the Clayton Act as amended by the Robinson-Patman Act (Appendix B, p. ii), skeletonized and emphasized, provides as follows:

> "* * * Upon proof being made * * * that there has been discrimination in price * * *, the burden of rebutting the prima-facie case thus made by showing justification shall be upon the person charged with the violation of this Section, and unless justification shall be affirmatively shown, the Commission is authorized to issue an order terminating the discrimination;
>
> "Provided, however, That nothing herein contained shall prevent a seller rebutting the prima-facie case thus made by showing that his lower price * * * was made in good faith to meet an equally low price of a competitor * * *."

The use of the words *"rebutting the prima-facie case thus made by showing,"* preceding the proviso, and the use of exactly the same words in the proviso gives the two parallel provisions a parallel function and, so read, makes the meaning of the Section clear and unambiguous. These words preceding the proviso unquestionably have this meaning: The seller, proved to have made discriminations in price, may rebut *"the prima-facie case thus made by showing* justification," and such showing, when made, admittedly constitutes a complete defense. These same words in the proviso must be given the same meaning. The seller, proved to have made discriminations in price, may rebut *"the prima-facie case thus made by showing* that his lower price was made in good faith to meet an equally low price of a competitor," and such showing, when made, must likewise be held to constitute a complete defense.

Furthermore, after discrimination in price has been proved, the Commission is authorized to issue an order "unless justification shall be affirmatively shown" by the seller, "Provided, however, That *nothing* herein contained shall prevent a seller rebutting the prima-facie case thus made by showing that his lower price" etc. If *"nothing* contained" in the Act is to prevent a seller from showing the good faith meeting of a competitor's equally low price, surely the showing when made is to have a controlling effect on the outcome of the case. It is significant that the phrase "Provided, however, That nothing herein contained shall prevent" etc. is used in three of the four provisos to Section 2(a) and in each instance that which is designated as not "prevented" is specifically made lawful.

The court below admitted that petitioner "had a right to make [the discrimination in price] as against its [own] competitors" (R. 5302); which means that the good faith showing was a complete defense in so far as the discrimination adversely affected petitioner's competitors. But the court held that the good faith showing was not a full defense apparently because the discrimination adversely affected certain retailers: first, retailers who were competing with the jobbers in their retail activity, *e. g.*, retailers competing with Ned's, and second, retailers who were competing with retail customers of the jobbers, *e. g.*, retailers competing with Lagger-Cohn. The language of Section

2(b) affords no logical basis for granting the right "as against its [own] competitors" and withdrawing it as against anybody else.

Furthermore, this interpretation of Section 2(b) renders it empty and meaningless. A seller's right to make discriminations in good faith in order to meet the lower price of a competitor is worthless if it exists only as against the seller's own competitors, that is, only excuses effects on competition at the seller's level. A discrimination in price to meet an equally low price of a competitor is always made to a purchaser and always gives one purchaser a price advantage over some other purchaser. This is true whether the discrimination is made in good faith between purchasers who are competing manufacturers, competing retailers or competing wholesalers. This price advantage accorded to one purchaser and withheld from another purchaser in competition with the first constitutes the injury to competition at the purchaser's level, which inheres in every price discrimination (*Morton Salt,* 1948, 334 U. S. 37, 46, 50). It is also obvious that a discrimination in price made in good faith to a wholesaler to meet an equally low price of a competitor affords such wholesaler a price advantage which he "may" pass on to his retailer customers with resultant injury at the retail level. The lower court's holding that the good faith defense is unavailable whenever there is injury to competition at the retail level or at a level other than the seller's renders the defense unavailable in every price discrimination case.

The court's interpretation of the proviso to Section 2(b), which renders it futile in every price discrimination case, is in direct conflict with the language of *Federal Trade Commission* v. *Staley Manufacturing Co.,* 1945, 324 U. S.

746, and its companion case, *Corn Products Refining Co., et al.* v. *Federal Trade Commission*, 1945, 324 U. S. 726. In the *Staley* case this Court held that the system of pricing there under review constituted price discrimination which resulted in injury to competition among those who purchased glucose from suppliers and used it in subsequent manufacture. The Court then considered the affirmative defense proffered under the proviso to Section 2(b) and said (p. 750):

> "The sole question we find it necessary to discuss here is whether respondents have succeeded in justifying the discriminations by an adequate showing that the discriminations were made 'in good faith' to meet equally low prices of competitors."

The Court in the *Staley* case (pp. 750-60) reviewed and discussed the evidence having to do with this defense and finally held that the showing was "inadequate" inasmuch as specific offers by specific competing suppliers to specific customers had not been proved. This long discussion would have been entirely academic and unnecessary had injury to competition at any level been sufficient to override the defense.

Mr. Chief Justice Stone compared Section 2 of the Clayton Act as amended by the Robinson-Patman Act with Section 2 prior to the amendment (see Appendix A, p. i). The old section was generally interpreted to mean that a seller could make discriminations in price "in the same or different communities to meet competition" other than price competition, *e. g.*, better service or other advantages not capable of exact measurement in dollars and cents. This enabled a seller to undercut the price of a competitor to meet the competitor's better service or public acceptance. It was generally thought that the defense was so general that it would be available in the vast majority of price discrimination cases; it was also generally thought that "meeting competition'' under the old Act enabled one not alone to meet but to beat competitors' prices. The Chief Justice thus summarized the change of language, at p. 752:

> "It will be noted that the defense that the price discriminations were made in order to meet competition, is under the statute a matter of 'rebutting' the Commission's 'prima facie case.' Prior to the Robinson-Patman amendments, § 2 of the Clayton Act provided that nothing contained in it 'shall prevent' discriminations in price 'made in good faith to meet competition.' The change in language of this exception was for the purpose of making the defense a matter of evidence in each case, raising a question of fact as to whether the competition justified the discrimination. See the Conference Report, H. Rep. No. 2951, 74th Cong., 2d Sess., pp. 6-7; see also the statement of Representative Utterbach, the Chairman of the House Conference Committee, 80 Cong. Rec. 9418."

The court below quotes this excerpt from the opinion and, we submit, misinterprets it (R. 5301-2). This excerpt, when read with the whole opinion, plainly means that the Robinson-Patman amendment makes "the defense a matter of evidence, in each case," *e. g.*:

(a) was the lower price made in good faith to meet an equally low price of a competitor or merely to meet a general system of competition (p. 753);

(b) was the lower price made in good faith to meet mere vague rumors of an equally low price offered by a competitor which would not "lead a reasonable and prudent person to believe that the granting of a lower price would in fact meet the equally low price of a *competitor*" (pp. 759-60);

(c) was the lower price made in good faith in self defense to retain a customer or was it made in bad faith to drive the competitor out of business;

(d) did the competitor's offer concern goods of comparable grade and quality;

(e) was the purpose to meet an equally low price of a competitor or was it made in combination with others to lessen competition or to create a monopoly (*Cement Institute* case, *infra*); or

(f) were predatory practices or other factors involved which indicate that the action was not taken in good faith but on the contrary in bad faith?

But when the good faith showing, etc. has been made out under the proviso to 2(b) the opinion in the *Staley* case makes it plain that the showing constitutes a complete defense.

Throughout the *Staley* opinion Mr. Chief Justice Stone uses the words "justify", "justifying", "justification", twelve times.* Occasionally he says in the words of the statute that a respondent has the burden of justifying the discrimination by showing that his lower price was made in good faith to meet a competitor's equally low price. Sometimes he takes a short-cut by saying that the discrimination must be justified by the competition—meaning, of course, by the good faith meeting of a competitor's lower prices. At page 753 he uses the phrase "whether the competition justified the discrimination" plainly meaning whether the competition was of the kind (*i. e.*, specific price offers by competitors to particular customers of respondent) which excused and exonerated the discrimination in price. At p. 755 he held that "the competitive situation did not justify respondents' pricing system" meaning, of course, that respondent, adopting a whole pricing system, had not shown that his lower price was in each instance made to particular customers to meet an equally low price offered them by competitors. "The respondent must justify the discrimination", "The discrimination must be justified by the competition", "The competition must justify the discrimination",—all mean that the affirmative showing allowed by the proviso to Section 2(b) justifies the discrimination and is a complete defense to the charge.

---

* 324 U. S. 748(3), 750(2), 751, 753(2), 754, 755, 756 and 759.

The opinion below is also in conflict with the *per curiam* opinion of the Court of Appeals for the Second Circuit in *Samuel H. Moss, Inc.* v. *Federal Trade Commission*, 1945, 148 F. 2d 378 (cert. den. 326 U. S. 734, reh. den. 326 U. S. 809), where Judges L. Hand, A. N. Hand, and Clark reviewed and interpreted Sections 2(a) and (b) and said, at page 379, that even where it appears that a seller

> "* * * has lessened, or prevented, competition, the proviso of § 2(b) will still excuse him, if he can show that his lower price did not undercut his competitors, but merely 'met' their 'equally low price.' In short, that is a defense to the violation of § 2(a). This is as we interpret § 2(a) and § 2(b), when read together."

The decision below also appears to be in conflict with that of the Court of Appeals for the Sixth Circuit in *General Shale Products Corp.* v. *Stryck Construction Co.*, 1942, 132 F. 2d 425, at 429 (cert. den. 318 U. S. 780).

In *Federal Trade Commission* v. *Morton Salt Co.*, 1948, 334 U. S. 37, this Court referred to the *Moss* case with approval. At page 43, it likewise classified the good faith meeting of a lower price as a "justification" as follows:

> "The legislative history of the Robinson-Patman Act makes it abundantly clear that Congress considered it to be an evil that a large buyer could secure a competitive advantage over a small buyer solely because of the large buyer's quantity purchasing ability. The Robinson-Patman Act was passed to deprive a large buyer of such advantages except to the extent that a lower price *could be justified* by reason of a seller's diminished costs due to quantity manufacture, delivery or sale, *or by reason of the seller's good faith effort to meet a competitor's equally low price*." (Emphasis ours.)

The Court thus places justification by reason of a seller's diminished costs, etc., in the same category as justification by reason of the seller's good faith effort to meet a competitor's equally low price, *i. e.*, in the category of a complete defense to a charge of price discrimination.

Again, in the *Cement Institute* case, 1948, 333 U. S. 683, this Court, at page 725, said:

> "Section 2(b) permits a single company to sell one customer at a lower price than it sells to another if the price is 'made in good faith to meet an equally low price of a competitor.' But this does not mean that § 2(b) permits a seller to use a sales system which constantly results in his getting more money for like goods from some customers than he does from others. We held to the contrary in the *Staley* case. There we said that the Act 'speaks only of the seller's "lower" price and of that only to the extent that it is made in "good faith to meet an equally low price of a competitor." The Act thus places emphasis on individual competitive situations, rather than upon a general system of competition.' *Federal Trade Comm'n.* v. *Staley, supra,* at 753."

The holding that injury to competition at any level will nullify the affirmative showing of good faith in meeting an equally low price of a competitor introduces a notable discrepancy when applied to Section 2(e) cases (discrimination in services or facilities). The proviso to Section 2(b) is specifically applicable to 2(e) cases (*Elizabeth Arden, Inc.* v. *Federal Trade Commission*, 1946, 2 Cir., 156 F. 2d 132; semble *Great Atlantic & Pacific Tea Co.* v. *Federal Trade Commission*, 1939, 3 Cir., 106 F. 2d 667). But injury to competition is no element of the offense in 2(e) cases, and the absence or presence of injury to competition is immaterial. Thus the very same proviso to Section 2(b) which provides a complete defense in 2(e) cases affords only a conditional or rebuttable defense in Section 2(a) cases according to the decision below. This inconsistency has been adverted to by many papers on this subject, *e. g.*, Austern, H. Thomas, "Required Competitive Injury and

Permitted Meeting of Competition", Robinson-Patman Act Symposium, 1947 C. C. H. p. 63 at pp. 76, 86-7.

The court below, in interpreting Section 2(b), set forth the statement of the Chairman of the House Conferees on the Floor of the House when the Bill was presented (R. 5300-1). If recourse to Congressional proceedings is appropriate notwithstanding the clear language of the Act, we submit that the brief summarization of Congressional action contained in the *Staley* case (324 U. S. 752-3, *supra* p. 23), which refers to the Chairman's statement, is adequate and is about all that can rightly be gleaned from the admittedly confused* record. Furthermore, if construction can be aided by the Congressional discussions, we call attention to the remarks of Representatives Patman, 80 Cong. Rec. 8231, Gilchrist, idem 8241, Celler, idem 8117, Boileau, 8124, McLaughlan, 8229, Culkin, 8238, and particularly Patman, idem 8235, where he explains the House provision, finally adopted, as follows:

> "The phrase 'equally low price' means the corporate chain will have the right to compete with the local merchants. They may meet competition, which is all right, but they cannot cut down the price below cost for the purpose of destroying the local man.
>
> Mr. Cooper of Ohio: What does the gentleman's proviso mean?
>
> Mr. Patman: It means they may meet competition, but not cut down the price below cost. It means an equally low price but not below that. It permits competition, but it does not permit them to cut the price below cost in order to destroy their competitors. * * *"

The Senate's understanding of the Conference Report is shown by the following colloquy between Senators Vandenberg and Van Nuys, who presented the Conference Report in the Senate:

---

* Raoul Berger and Abraham Goldstein in 44 Illinois Law Review 315, p. 322; 62 Harvard Law Review 1249, 1251.

> "Mr. Vandenberg: * * *.
>
> "The fact has been called to my attention that Section 3 of the bill, as agreed upon in conference, makes certain discriminations punishable by fine and also subject to treble damages, while similar discriminations under section 2(b) would be subject to rebuttal by showing, for instance, that a reduced price was made in good faith to meet an equally low price of a competitor. In other words, it is asserted to me that the defense allowed under section 2(b) is not permitted under section 3, although the act or the offense would be the same.
>
> "Mr. Van Nuys: I think the Senator is mistaken there. The proviso to which he refers is simply a rule of evidence rather than a part of the substantive law. If a prima facie case is made against an alleged unfair practice, the respondent may rebut the prima facie case by showing that his lower prices were made in good faith to meet the prices of a competitor. That is a rule of evidence rather than substantive law." (80 Cong. Rec. 9903.)

We repeat that the summarization of legislative intent set forth in the *Staley* case, *supra* p. 27, is a fair review of the conflicting ideas and purposes of individual legislators and of the synthesis of such divergencies into the language of Section 2(b).

The position of the Commission in this case, emasculating the good faith defense under Section 2(b), is a complete reversal of its former treatment of the defense:

First: In price discrimination cases the Commission habitually added saving clauses to its cease and desist orders preserving the right of respondents in good faith to meet equally low prices of competitors (*e. g., Bausch & Lomb Optical Co.*, 1939, 28 F. T. C. 186; *Anheuser-Busch, Inc.*, 1940, 31 F. T. C. 986). Subsequent to the original Findings in this case, it inserted the same saving clause in the *Ferro-Enamel* case, Feb. 26, 1946, 42 F. T. C. 36.

Second: In the *Cement Institute* case, 1948, 333 U. S. 683, objection was made to the form of the order forbidding an "individual cement producer from selling cement at delivered prices such that its net return from one customer will be less than from another, even if the particular sale be made in good faith to meet the lower price of a competitor" (p. 727). But this Court said that "The Commission disclaims that the order can possibly be so understood. Nor do we so understand it."

Third: In 1941, Walter B. Wooden, Assistant Chief Counsel, and Hugh E. White, Examiner, Federal Trade Commission, filed a paper entitled "An Analysis of the Basing-point System of Delivered Prices, etc." with the Temporary National Economic Committee of the Seventy-Sixth Congress, 1941, published as Monograph 42, where at page 139 they say:

> "From its enactment, in 1914 until its amendment in 1936, the Clayton Act specifically safeguarded the right of a seller to discriminate in price for various reasons, among them being discrimination in good faith to meet competition. *The amended Act now safeguards the right of a seller to discriminate in price in good faith to meet an equally low price of a competitor; but he has the burden of proof on that question.* This right is guaranteed by statute and could not be curtailed by any mandate or order of the Commission. The Commission has never proposed that this right be disturbed by amendment of the statute. *The right of self defense against competitive price attacks is as vital in a competitive economy as the right of self defense against personal attack.*" (Emphasis ours.)

Until the instant case there was not the least doubt but that the good faith defense under Section 2(b) was full and complete and was unqualifiedly sanctioned by the administrators of the statute.

The present official stand of the Commission is anomalous. In response to written questions addressed to the Commission by Senator Johnson, Chairman of the Subcommittee on Trade Policies of the Senate Interstate and Foreign Commerce Committee, Commissioner Davis, with concurrence of Commissioners Fergusson and Ayres, responded as follows.

> "Question 37. Does the Clayton Act permit sellers to meet competition in good faith?
>
> "Answer. In the ordinary case, the answer is 'Yes', since ordinarily competition is not injured by this type of discrimination. As to the rare instance in which an injury to competition appears, the interpretation of the statute is squarely before the courts in the Standard Oil case, in which decision is now pending.
>
> "Question 38. Do you believe that meeting competition in good faith should be a defense to a charge of price discrimination under the Clayton Act?
>
> "Answer. Yes.
>
> "Question 39. Where a seller in good faith reduces his price to meet the lower price of a competitor, do you believe he should be permitted to meet that lower price, when he does so in good faith, even if his doing so may cause an injury to a competitor, or to a competitor of his customer?
>
> "Answer. Yes. If good faith is present, injury to competition will be rare; and in general the policy of the law should not discourage active competition by preventing the meeting of competition in good faith." (Emphasis ours.)*

To the same effect is the testimony of Robert B. Dawkins, Associate General Counsel, who testified:

> "The Commission has publicly indicated that it would see no objection to a permanent change in existing law that would make the meeting of an equally low

---

* Hearings Before Subcommittee of the Senate Committee on Interstate and Foreign Commerce on S. 236, 81st Cong., 1st Sess., Jan. 24, 25, 26, and Feb. 18, 1949 (U. S. Gov't. Printing Office, 1949), pp. 274-5.

> price of a competitor in good faith a full defense in price discrimination cases.*"

On June 9, 1949, E. L. Davis, acting chairman of the Commission, wrote to Congressman F. E. Walter, Chairman Subcommittee of the House Committee on the Judiciary, that:

> "* * * all of the Commissioners believe that on balance it would be preferable to make the good faith meeting of competition a complete defense."**

The Commission in this case thus stands for a strained and unnatural construction of the proviso to Section 2(b) which it confesses does not accord with the policy of furthering competition by encouraging the meeting in good faith of the equally low price of a competitor and which, it also confesses, should be straightway amended by the Congress.***

While the Commission officially strives to ride two horses going in opposite directions, members of its staff have not been reluctant publicly to express disagreement with its position in the instant case. Allen C. Phelps, Assistant Chief Trial Counsel and Chief of Export Trade Division, Federal Trade Commission, testified before the Senate Trade Policies Committee on January 25, 1949, as follows regarding the Commission's stand on Section 2(b) in the court below:

---

* Hearings before Senate Judiciary Committee on S. 1008, 81st Cong., 1st Sess., March and April, 1949, p. 72.

** Hearings Before Subcommittee No. 1 of the House Committee on the Judiciary on S. 1008, 81st Cong., 1st Sess., June 8 and 14, 1949 (U. S. Gov't. Printing Office, 1949), p. 61.

*** Moreover, as appears above, the Commission has failed to explain why the injury to competition which they say will render the defense unavailable occurs only in "rare instances" and not in every price discrimination case,

> "This position, if upheld in the courts, in my judgment will effectively and completely erase Section 2(b) from the Robinson-Patman Act."*

And Austin H. Forkner, Attorney for the Federal Trade Commission, after pointing out that the good faith meeting of a lower price of a competitor under the proviso to Section 2(b) should apply to Section 2(f) cases (*i. e.,* those brought against persons knowingly inducing or receiving an unlawful discrimination in price), said:

> "But in addition to the defenses on the merits, a respondent under Section 2(f) has a number of possible justifications under Section 2(a) which the law concedes as *tolerances for discriminations which are otherwise unlawful.* They admit the discrimination and excuse it. This is in the nature of a confession and an attempt to avoid the consequences. A respondent must prove affirmatively the justification he advances since he has, in effect, admitted a prima facie case against himself on which an order to cease and desist may issue. (Emphasis theirs.)
>
> "Now he can seek to show that because he has conformed to the law, by proving justification, the order should not issue. *The permitted justifications* may be briefly noted as (1) a cost justification, (2) lower prices due to changing market conditions, and (3) *or the meeting of an equally low price of a competitor.* This reasoning follows the nine or more Commission's Cease and Desist Orders issued against respondents under Section 2(f) of the Act."** (Emphasis ours.).

The official attitude of the Department of Justice, which has the major responsibility for the over-all coordination of the antitrust laws, is also publicly opposed to that of the

** Speech entitled "The Significance of Section 2(f)," Robinson-Patman Act Symposium, 1948 (Commerce Clearing House), pp. 66, 80, 81.

Commission. The Department maintains that the good faith defense of meeting the equally low price of a competitor under Section 2(b) not only should be, but is, a complete defense. Assistant Attorney General Herbert A. Bergson, testifying for the Department before the Senate Trade Policies Committee January 25, 1949, stated:

> "The Section [2(b)] presently permits sellers to justify otherwise forbidden price discriminations on the ground that the lower prices to one set of buyers were made in good faith to meet the equally low prices of a competitor."*

In a formal report dated February 25, 1949, on behalf of the Department to the Senate Interstate and Foreign Commerce Committee concerning Senate Bill 236 to amend the Clayton Act, signed by Peyton Ford, the Assistant to the Attorney General, this statement is repeated verbatim.** It is therefore the studied view of the Department of Justice that, without limitation or qualification, Section 2(b) presently permits sellers to justify otherwise forbidden price discriminations on showing that the lower prices to one set of buyers were made in good faith to meet the equally low prices of a competitor.

* Hearings Before Subcommittee of Senate Committee on Interstate and Foreign Commerce on S. 236, 81st Cong., 1st Sess., Jan. 24, 25, 26, and Feb. 18, 1949 (U. S. Gov't. Printing Office, 1949), p. 77. See also Bergson's testimony before Subcommittee No. 1 of the House Committee on the Judiciary on S. 1008, 81st Cong., 1st Sess., June 8 and 14, 1949 (U. S. Gov't Printing Office, 1949), where he said at p. 12: "First, we would recommend deletion of the * * * Kefauver Amendment. * * * Insertion of this phrase in the bill has the effect of retaining the rule of *Standard Oil Co.* v. *F. T. C.* (173 F. 2d 210), a decision by the Court of Appeals for the Seventh Circuit which held that good faith competition is not a defense where the effect would be to lessen competition. While we recognize the competitive problem which arises when one purchaser obtains advantages denied to other purchasers, we do not believe the solution to this problem lies in denying to sellers the opportunity to make sales in good faith competition with other sellers."

** *Id.*, p. 320.

Nor is this interpretation a new thing in the Department of Justice; for in the *International Salt* case, 1947, 332 U. S. 392, where the charge was unreasonable restraint of trade and monopoly by requiring exclusive handling of lessor's products in leased machines, objection was raised that the decree prevented the lessor from reducing rentals in some sections of the country to compete with lower rentals offered by competitors, and the Court said at p. 399:

> "Of course, the Clayton Act itself permits one charged with price discrimination to show that he lowered his price in good faith to meet competition. Obviously, the District Court was not intending to prevent competition or to disable the appellant from meeting or offering it. The Government, too, says it would not oppose permitting a lower price to meet, in good faith, the equally low price of a competitor if the need arose."

Subsequently the trial court amended the decree to allow such meeting of competitors' prices (C. C. H. Trade Regulation, Par. 61,128).

Since the issuance of the complaint in this case, students of the subject have almost uniformly condemned the Commission's artificial construction of Section 2(b).* The acceptance of the Commission's position by the court below has been analyzed and disapproved by the commentators and writers in the Law Reviews which have covered this subject.*

In conclusion: —the instant case will necessarily determine whether the good faith defense of the proviso of Section 2(b) is *always* available or *never* available. The Commission's 1948 Statement of Policy recognizes that there is no middle ground:

> "Section 2 of the Clayton Act, as amended by the Robinson-Patman Act, prohibits price discriminations which injure or prevent competition, unless either the price differences can be justified by differences in cost or else the price reductions have been made in good faith to meet the equally low prices of competitors.[1]"

and in the footnote:

> "[1] In a case now pending before the court in the Seventh circuit (*Standard Oil Company* v. *F. T. C.*), the Commission is now seeking to ascertain whether or not, where there is proof that the *statutory injury* to competition resulted from a discrimination in price,

Contra: Patman, Wright, 1938, "The Robinson-Patman Act," Chapter 3, "Price Discrimination to Meet Competition."

*62 Harvard Law Review 1249, May, 1949; Adelman, M. A., "Integration and Anti-Trust Policy," 63 Harvard Law Review 27, at 60-74, November, 1949; Berger, Raoul, and Goldstein, Abraham S., "Meeting Competition under The Robinson-Patman Act," 44 Illinois Law Review 315-330, July-Aug., 1949; University of Illinois Law Forum, No. 3, p. 541, 1949. Contra: 49 Columbia Law Review 863, June, 1949.

> this discrimination is nevertheless lawful if it arose by meeting competition in good faith."* (Emphasis ours.)

Since "statutory injury to competition" will result from every discrimination in price if sufficient in amount to give a price advantage or to affect the resale price (as said in the *Morton Salt* case, 1948, 334 U. S. 37 at pp. 46, 47, 50), it follows that the good faith defense will be unavailable in *every* case if it is unavailable in the instant case.

II.

Section 2(b) as construed by the court below does not conform to constitutional standards of definiteness and reasonableness.

The construction of Section 2(b) adopted by the Commission and the court below encounters constitutional obstacles which can, and should be, avoided by taking instead the natural and generally accepted meaning of the statutory language. *National Labor Relations Board* v. *Jones & Laughlin Steel Corp.*, 1937, 301 U. S. 1, 30; *Ex Parte Endo,* 1944, 323 U. S. 283, 299; *Anniston Mfg. Co.* v. *Davis,* 1937, 301 U. S. 337, 351.

As construed below, the Act lacks that standard of definiteness which is required by decisions of this Court. Nor does it meet the requirement that a law shall not be unreasonable, arbitrary or capricious and that the means selected shall have a real and appropriate relation to the objects sought to be attained.

Indefiniteness.

Civil offenses, as well as criminal, particularly where a treble damage penalty may result, must be defined in a statute in terms which can, within reasonable limits, be understood and complied with.* *Small* v. *American Sugar Refining Company*, 1925, 267 U. S. 233, *Winters* v. *New York*, 1948, 333 U. S. 507.

---

* CCH, Trade Regulation, Par. 10,412, p. 10,177.

Manifestly, a statutory provision which operates, as does one affecting the right to meet a competitor's lower price, upon the very nerve center of competitive activity, must afford to the businessman a reasonable concept of what is permissible and what is forbidden. The businessman, at the moment when he is confronted with a lower competitive offer, must be aware of the legal criteria which determine his right to meet the lower price. Certainly he may not be required to act at his peril, subject to a subsequent application of the statute by the Commission, or the court (in a treble damage suit), which he could not reasonably anticipate or of which his lawyer could not advise him. The Commission's novel application of the statute in this case, which was approved by the court below, deprives the businessman of any readily understandable guide.

The greatest confusion which the interpretation below introduces into the Act is its nullification in effect of the proviso to Section 2(b) which will "effectively and completely erase Section 2(b) from the Robinson-Patman Act" (*supra*, pp. 31-2). This transforms the proviso from an oasis to a mirage.

Faced with the necessity of disavowing an interpretation which would render the proviso entirely futile in all price discrimination cases and at the same time to justify to the Congress its unavailability in the instant case, the Commission recently tried to explain that the defense will be nullified only in "rare" instances (*supra*, p. 30). It is significant that the Commission, in explaining to the Congress its attitude toward the Section 2(b) defense in the instant case, makes no mention of the theory which it urged upon, and which was accepted by, the court below, namely, that the good faith showing under the proviso to Section 2(b) is unavailable whenever there is "actual injury to competition at the retail level." While the court below was obviously impressed with this theory, neither it nor the Commission has pointed to anything in the statute or the legislative history which even faintly suggests that the statute is concerned with more than one standard of injury or makes any distinction between injury to competition at the retail level and injury to competition at any other level.

---

* "Due Process Requirements of Definiteness in Statutes," 62 H. L. R. 77, reviews the tests of requisite clarity together with the applicable precedents.

But the Commission's "rare instance" explanation still leaves the statute hopelessly vague because the phrase is incapable of reasonably exact definition. The only attempt of the Commission to define the "rare instance" in its answers to the Congressional inquiries (*supra*, p. 30) is found in the bare assertion that when discriminations in price are made between competing purchasers in good faith to meet an equally low price of a competitor, injury to competition will be "rare." We can understand the contention that discriminations to meet an equally low price of a competitor will *never* injure competition because such good faith meeting of a competitor's lower price enhances competition; and that such good faith meeting of price will *never* injure the purchaser discriminated against because the so-called "favored" buyer was destined in any event to receive the equally low price offered him. But this leaves no room for the "rare instance" which remains entirely undefinable.*

While this most recent attempt to rationalize the Commission's inconsistent position leaves the Act too vague, the abandoned explanation which the Commission promulgated in its Findings rendered it utterly confusing.

---

* The Commission itself is bewildered. While it asserts to the Congress that discriminations made in good faith to meet an equally low price of a competitor will rarely cause injury to competition, it states in *Minneapolis-Honeywell Regulator Company*, CCH Trade Regulation Service, 1948,

The Commission in its Findings asserted that the good faith meeting of an equally low price of a competitor is not a defense "where competitive injury is affirmatively shown" (R. 5180; see also 5179, 5181, 5182). This imports another indefinable phrase: Does "competitive injury affirmatively shown" mean the actual injury that has occurred in the past or does it mean injury that "may" occur in the future? The only injury which is pertinent in a price discrimination case is the statutory injury defined in the *Morton Salt* case (*supra*, p. 21): that which inheres in giving a price advantage to one of two competing customers "sufficient in amount to influence resale prices." Proof that the recipient of the price advantage actually used such advantage to lure away customers by cutting prices or rendering better service was held to be unnecessary. Surely such redundant evidence of loss of customers and patronage—although readily procurable in every price discrimination case where the discrimination is more than *de minimis*—cannot be sufficient to deprive one of the right in good faith to meet an equally low price of a competitor. Therefore, whether the phrase "competitive injury affirmatively shown" is intended by the Commission to be synonymous with the statutory injury defined in the *Morton Salt* case or whether it is intended to be synonymous with loss of custom and patronage, it can, in either case, serve only to becloud the issue.

This proceeding was launched to determine whether price discriminations made in good faith to meet competitors' prices are lawful when there is "statutory in-

---

par. 13,675, p. 12,948, that the very evidence establishing the good faith defense of meeting an equally low price of a competitor may constitute in and of itself proof of injury to competition; that the mere retention of customers who received the lower price constitutes an adverse effect upon the competitor who sought to woo them away.

jury" to competition (Statement of Policy, *supra*, p. 35). Since "statutory injury" is present in every price discrimination forbidden by Section 2(a), it is apparent that the Commission seeks power to nullify the Section 2(b) defense in every case but intimates it will exercise the power only in "rare instances," *i. e.,* in selected cases and—for aught that appears—selected on the basis of its own whim.

Construed as a complete defense Section 2(b) is unambiguous and meaningful. Construed as less than a complete defense the proviso will be vague and meaningless.

Unreasonableness.

As interpreted below, the Act would also be so unreasonable and capricious as to offend the standards of due process. *Mayflower Farms* v. *Ten Eyck*, 1936, 297 U. S. 266, 274.

Whatever might be said about the right to "meet competition" under the Clayton Act prior to the Robinson-Patman Amendment, there is no basis following that Amendment and following the *Staley* and *Cement* cases for any suggestion that the good faith meeting of an equally low price of a competitor would bring about any of the evils at which the statute is aimed. The Commission and the courts have it entirely within their power to prevent predatory practices, monopolization and other abuses (*supra*, p. 23) by an affirmative finding of bad faith, or by a finding that the purpose was not to meet equally low individual competitive price offers to specific customers. No such obnoxious elements are present here. Hence the Commission did not find, and on the overwhelming evidence could not have found, bad faith.

Where it is assumed that there were no such abuses and that the lower price was made to meet equally low prices of competitors in order to retain customers of long standing, it would seem unreasonable and arbitrary in and of itself to abrogate the defense. The meeting of the lower price of a competitor is of the very essence of our competitive system, heretofore considered fundamental. A state statute which in terms denied the defense of good faith meeting of competition was held unconstitutional by this Court (*Fairmont Creamery Company v. Minnesota*, 1927, 274 U. S. 1) and it seems to us that subsequent cases approving state statutes fixing uniform prices have not destroyed the vitality of the *Fairmont* case with respect to the right to meet competitors' prices. State statutes, which are in effect local Robinson-Patman Acts, almost invariably recognize the right in good faith to meet an equally low price of a competitor.*

It must always be borne in mind that the restrictions imposed by the Commission on petitioner and its jobber customers in this case cannot be imposed on many of petitioner's competing suppliers and the jobbers supplied by them. For example, the court below recognizes that suppliers who distribute in a given area at one price only through jobbers are not subject to the Robinson-Patman Act nor to the restrictions imposed in the instant case (R. 5304). Other suppliers who are beyond the reach of the Commission are the very substantial number who distribute gasoline refined in Michigan from oil produced in Michigan and whose sales in Michigan are therefore not in commerce. Other suppliers not subject to the restrictions of the Order are those who might be able to prove that their lower price to jobbers represents only due allowance for savings in cost of sale and delivery to the jobbers in larger quantities or by different methods than to retailer customers in the same area. The effect of the denial of petitioner's right to meet competitors' prices must be surveyed in this background.

---

* 118 A. L. R. 486; 128 A. L. R. 1120; 163 A. L. R. 1124 and annotations.

Such statutes, without apparent exception, provide an exemption for the good faith meeting of competitive prices either (1) by express statutory provision or (2) by requiring wrongful intent,—which is incompatible with good faith. *Pennsylvania* and *New Jersey* statutes which permitted the good faith meeting of a competitor's "legal" price were held invalid because of the indefiniteness of the term "legal" (*Commonwealth v. Zasloff*, 1940, 338 Pa. 457, 13 A. 2d 67; *Lief* v. *Packard-Bamberger & Co.*, 1939, 123 N. J. L. 180, 8 A. 2d 291). *Kentucky* and *Washington* statutes are interpreted to afford a meeting competition defense. *Minnesota* amended the statute held unconstitutional by this Court in the *Fairmont* case by adding a meeting competition defense whereupon the statute was upheld by the State Court (idem).

Surveyed in this background, the Commission's denial of the good faith defense in the present case is particularly oppressive not only because of the fact that petitioner's so-called discriminatory prices were made in good faith solely to retain its own customers of long standing, but also because these customers all belonged to a distinct class of buyers, so recognized throughout the industry. It was not contended that petitioner's prices to the four jobbers were lower than those at which jobbers of comparable brands generally purchased their supplies. Nor was it contended that petitioner's prices to its retail service station customers were below the level of prices paid generally by retail service stations which purchased in tank wagon quantities for resale. Furthermore, it must be conceded that the Clayton Act cannot prevent these four jobbers or any jobbers from obtaining comparable gasoline from other suppliers at equally low or even lower prices than petitioner's, provided only that such other suppliers distribute in Detroit through jobbers only or distribute only Michigan produced and refined gasoline. It must also be conceded that these jobbers, or any jobber buying from such a supplier, would be at liberty to buy comparable gasolines at a tank car price as low as or even lower than petitioner's tank car price, regardless of whether they resell it at wholesale or at their own service stations, and regardless of whether they maintain the prevailing tank wagon prices on their resales at wholesale. Such other supplier could legally sell and the jobbers could legally buy at tank car prices representing as great or even a greater tank car discount than petitioner afforded. Thus it cannot be said that denial of the right to meet competitors' prices in this case will accomplish the objectives of the Order.

It is patent that the Commission's Order strikes primarily at dual distribution in the same territory (see Point III, *infra*, p. 45). It is only because petitioner sells to two classes of customers in the same area, admittedly at the going price to each of them, that petitioner, to avoid the restrictions of Paragraph 6 of the Order, may find it necessary to discontinue dealing with one or the other. The business abandoned by petitioner can be taken over by other suppliers on the same terms and conditions. A legislative enactment in terms barring such dual distribution and pricing would seem to be of doubtful constitutional validity in the absence of a legislative finding, express or implied, that such dual distribution is injurious to the competitive system (cf. *Standard Oil Company of California*, 1949, 337 U. S. 293, 311-312). But here we have no such legislative enactment and no such legislative finding. The unreasonableness of holding that petitioner is deprived of the right in good faith to meet an equally low price of a competitor must be viewed in the light of these circumstances. To deny this right in any case is questionable; but to deny it in this case where the effect of the denial will be without benefit to anyone is, we submit, arbitrary and capricious.

True, the Commission has made a finding of injury to competition, but this finding must also be viewed in the light of the facts in this case. The retention of the four jobber customers by the petitioner in the face of the equally low or lower offers made to them by competitors can have but little, if any, effect on the over-all competitive picture. Surely if the right in good faith to meet a competitor's equally low price should be preserved in any case, it is worthy of preservation in the instant case.

As shall be shown in Point III, dual distribution may be maintained in the same region under the Order only if suppliers are willing to impose and jobbers are willing to suffer controls which may become competitive strait-jackets. What purpose can be served in requiring a wholesaler to maintain the dual supplier's tank wagon price when other wholesalers of comparable brands may cut the prevailing tank wagon price with impunity? It seems bootless to toss out the suggestion that petitioner can avoid all price discriminations by selling to jobbers and service stations at the same price when it is obvious that such policy will entail the liquidation of one or the other as customers. Equally bootless is the futile saving clause in the Order (R. 5256) which allows a dual distributor to make a jobber discount representing only due allowance for the suppliers' lesser costs in purveying to jobbers than to service stations: the suppliers' savings will not equate to the jobbers' expense of performing the wholesale function plus the profit necessary for existence.

This case typifies the dangers of law-making by an administrative agency in a particular case without full inquisition of legislative character. Arbitrary damage will be inflicted on various classes of distribution without benefit to the economy and without accomplishment of the purposes of the Act.

III.

Paragraph 6 of the Order.

Paragraph 6 of the Order, as amended by the court below, prevents petitioner from selling to its jobbers in their wholesaling capacity at a price lower than petitioner charges its retail service station customers (where the jobbers' retail customers and petitioner's retail customers are in competition with each other) where such jobber "to the knowledge of [petitioner] or under such circumstances as are reasonably calculated to impute knowledge to [petitioner] resells such gasoline or intends to resell the same to any of its said retailer-customers at less than [petitioner's] posted tank-wagon price, or directly or indirectly grants to any such retailer-customer any discounts, rebates, allowances, services or facilities having the net effect of a reduction in price to a retailer." Petitioner can avail itself of two options:

> First: To cease selling to its jobbers in their wholesaling capacity and at the same time to its retailers in the same locality (*i. e.,* to retailer customers who compete with the retailer customers of the jobber), in which event the Paragraph has no application; or
>
> Second: If petitioner continues to sell to its wholesalers and retailers in the same territory, either (a) to discontinue "selling to wholesalers at a price different than that made to retailers" (R. 5304)*; or (b) to see to it that the wholesaler maintains petitioner's tank

---

* Op. of court below (R. 5304): "First, discontinue selling to wholesalers at a price different than that made to retailers. The petitioner's three largest competitors in Detroit have found it agreeable to do so. The petitioner argues that this is an elimination of wholesalers. If this be true, it is elimination only where their existence cannot be justified except on the exploitation of a differential in price not justified by any cost savings to obtain that price. This does not impress us as either illegal, unwarranted, or unjust."

> wagon prices in its resales where "to the knowledge of" petitioner or "under such circumstances as are reasonably calculated to impute knowledge to" petitioner the wholesaler resells or intends to resell at less than petitioner's posted tank wagon prices (R. 5304-5).

This is the first case in which it has been held that a supplier in a given locality who sells to all retailers at a single posted tank wagon price and to all wholesalers in the same territory at a single tank car price is guilty of unlawful discrimination if he knows or ought to know that the wholesaler intends to sell to service stations at a price lower than the supplier sells to its own service station customers in the same territory. By definition, retailers and wholesalers are not in competition with each other; and it has hitherto been thought that a differential in price is not an unlawful discrimination unless granted to purchasers in competition with each other. By definition, the supplier has parted with all title to and control over his product; and it has hitherto been thought that its subsequent disposition was none of his business and should be none of his business. In no other case has a court, either directly or by indirection, required suppliers to distribute in the same territory solely by wholesale or solely by retail; or to charge the same price to wholesalers and retailers; or to establish price maintenance systems by requiring wholesalers to resell to retailers at the supplier's retailer price.

No supplier in his right mind would embark upon a price maintenance system to see to it that the wholesaler maintained the supplier's retailer prices. An agreement by the wholesaler to maintain prices would doubtless be unlawful (*Dr. Miles Medical Co.* v. *Park & Sons Co.*, 1911, 220 U. S. 373; *United States* v. *Bausch & Lomb*, 1944, 321 U. S. 707, 721; *United States* v. *U. S. Gypsum Co.*, 1948, 333 U. S. 364, 389). Nor would petitioner be safe in establishing an espionage system over its jobbers and in "cutting off" any wholesaler who does not maintain them (*Federal Trade Commission* v. *Beech-Nut*, 1922, 257 U. S. 441). Section 11 of the Clayton Act (15 U. S. C. sec. 21) explicitly provides: "No order of the [Federal Trade] Commission * * * shall in any wise relieve or absolve any person from any liability under the antitrust laws."

Apart from the effect upon petitioner, who might find it necessary to give up customers of long standing, and apart from the effect upon the public if major company suppliers should be not merely authorized but required to enforce the maintenance of their resale prices by their jobber customers, Paragraph 6 places the jobbers in a particularly unfortunate situation. Jobbers such as petitioner's customers in this case, who may have had long-standing relations with their suppliers and who may have spent many years and devoted their major efforts to building up good will for the brand designation of their respective suppliers, will, if this case be sustained, face the unhappy choice (1) of maintaining in their wholesale operations their suppliers' tank wagon prices although many of their competitors will not be hampered by similar price restrictions; or (2) of changing suppliers in order to avoid the restrictions brought about by this case; in so doing, of course, the jobber will lose the benefits of the good will that he has established for the trade-name upon which he built up his business, and will have to start afresh to build up trade acceptance of a new product perhaps by cutting prices to induce customers to try the new brands of gasoline.

As always when an administrative body engages in the complicated business of law-making in a particular case without comprehensive hearings and investigations, the Order, even as fixed up by the court below, fails to make provision for conditions that may arise in the future as they have arisen in the past. Suppose a price-cutter should approach a jobber's service station customer with the offer of a lower price, suppose the jobber is faced with losing that customer or of meeting the cut price—does the Order permit him to do so? It does not—petitioner must "cut him off." Suppose an enterprising competitor should approach one of these jobber service station customers with an offer to build cement runways or paint buildings or the like, and suppose the jobber is faced with losing that customer or of meeting such competitive offer—does the Order permit him to do so? It does not. Under no circumstances may petitioner allow him to sell to any service station customer at less than petitioner's tank wagon price "or directly or indirectly grant to any such retailer customer any discounts, rebates, allowances, services or facilities having the net effect of a reduction in price to the retailer." It seems obvious in this highly competitive industry that competitors of these jobbers will quickly take advantage of the competitive strait-jacket in which they are placed by Paragraph 6 and will lure away their customers one by one.

As will be seen in our next point, interstate commerce was held to have ended upon delivery of the gasoline to petitioner's customers. The jobbers in this case are therefore on the lower court's theory not in commerce and therefore not subject to the Commission's jurisdiction. But the Commission, by Paragraph 6 and through petitioner as an enforcing agency, will exercise control over the terms and conditions of resales at wholesale by a limited number of jobbers, which resales are held not to be in interstate commerce. The Commission will have the power of life and death over those who, on its own theory, are not in commerce.

Paragraph 6 as modified and its amazing tendencies towards price maintenance and profit control has met widespread disapproval (Harry L. Shniderman, "The Tyranny of Labels," 60 Harvard Law Review 571; Jerrold G. Van Cise, "Functional Prices," Robinson-Patman Act Symposium, 1947, published by Commerce Clearing House, p. 89; John T. Haslett, "Price Discriminations and Their Justifications Under the Robinson-Patman Act of 1936," 46 Michigan Law Review 450; 1949 the University of Illinois Law Forum No. 3, p. 541; M. A. Adelman, "Integration and Anti Trust Policy," 63 Harvard Law Review 27, pp. 60-77).

Paragraph 6 constitutes an "extraordinary reversal of position by the Commission" (Van Cise, *supra*). As pointed out by Commissioner Mason dissenting (R. 5260-3), Congress refused to abolish functional pricing. The Commission has been opposed to price maintenance programs and for that reason has opposed the passage and continuance of the Miller-Tydings Act (*e. g.,* Report of Federal Trade Commission on Resale Price Maintenance, 1946). Yet the Commission has seized upon a relatively minor incident in this case—sales by Citrin to Langer-Cohn and one other service-station customer at 1¢ and ½¢ a gallon below petitioner's regular tank wagon price—to promulgate Paragraph 6 with its "sweeping implications of private resale price maintenance or public profit margin control" (Shniderman, *supra*).

IV.

The Commission was without jurisdiction because none of the purchases involved in the alleged discrimination was in commerce.

The Commission was without jurisdiction of this case unless "either or any of the purchases" of gasoline by the four jobbers or the 358 service stations was "in commerce" (Sec. 2 (a), Appendix B, p. ii).

The court below on the analogy of *Stafford* v. *Wallace*, 1922, 258 U. S. 495, and *Swift* v. *United States*, 1905, 196 U. S. 375, held that the purchases were in commerce. We respectfully submit that these two cases are not analogies for two reasons: first, because both cases involved a statute wherein the Congress had exercised its full power over commerce, whereas in the instant case the Congress limited the Commission's jurisdiction to purchases "in commerce" and did not extend the Commission's jurisdiction to purchases "affecting commerce"; and, second, because the *Stafford* and *Swift* cases involved the stockyards and packing plants in so far as they affected the flow or stream of commerce from many states to the Stock Yards in Illinois and out of Illinois to many other states, whereas the statute in the instant case does not cover purchases which merely affect the flow of commerce—it raises the question whether interstate transportation ended at the Marine Terminal in Michigan from which no gasoline was exported to other states.

This Court has frequently pointed out the distinction between the full exercise of governmental power which extends to matters "affecting commerce" and the limited exercise of power by regulation of activities "in commerce." In *Federal Trade Commission* v. *Bunte Bros.*, 1941, 312 U. S. 349, which was a case under Section 5 of the Federal Trade Commission Act employing the phrase "unfair methods of competition in commerce," the Court said at page 355:

> "* * * This case presents the narrow question of what Congress did, not what it could do. And we merely hold that to read 'unfair methods of competition in [interstate] commerce' as though it meant 'unfair methods of competition in any way affecting interstate commerce,' requires, in view of all the relevant considerations, much clearer manifestation of intention than Congress has furnished.'"*

The issue to be determined is whether any of the purchases involved in this case was "*in commerce*" not whether petitioner was engaged in commerce nor whether these purchases *affected* commerce.

We believe this case is analogous to the third category of shipments discussed in *Walling* v. *Jacksonville Paper Co.*, 1943, 317 U. S. 564. That case, like this one, involved out-of-state shipments into a warehouse with subsequent sale and distribution entirely within the importing state. The Court first said (pp. 567-8) that a mere temporary pause at a warehouse does not constitute termination of an interstate journey. Second, the Court held (pp. 568-9) that an interstate movement does not terminate when goods pause at a warehouse if "there is a practical continuity of movement from the manufacturers or suppliers without the state" due to the shipment in fulfillment of special orders for the particular merchandise; for example, when the merchandise is "printed at the mill with the name of the customer." Third, as to goods not shipped on special order and not warehoused as a mere "ritual," the Court said at p. 569:

---

* Other cases in which this distinction has been recognized and commented upon include: *Ward Baking Co.* v. *Federal Trade Commission*, 1920, 2 Cir., 264 Fed. 330; *Gerdert* v. *Certified Poultry & Egg Co., Inc.*, 1941, Dist. Ct. S. Dist. Fla., 38 F. Supp. 964; *Eddings* v. *Southern Dairies*, 1942, Dist. Ct., E. Dist. So. Carolina, 42 F. Supp. 664; *Lewis* v. *Shell Oil Co.*, 1943, Dist. Ct., N. Dist. Ill., 50 F. Supp. 547; *Polish National Alliance* v. *National Labor Relations Board*, 1944, 322 U. S. 643, 647.

> "*Finally, the Administrator contends that most of the customers form a fairly stable group, that their orders are recurrent as to the kind and amount of merchandise, and that the manager can estimate with considerable precision the needs of his trade.* It is therefore urged that the business with these customers is 'in commerce' within the meaning of the Act. Some of the instances to which we are referred are situations which we have discussed in connection with goods delivered pursuant to a prior order, contract, or understanding. For the reasons stated they must be included in the group of transactions held to be 'in commerce.' As to the balance, we do not think the Administrator has sustained the burden which is on a petitioner of establishing error in a judgment which we are asked to set aside. We do not mean to imply that a wholesaler's course of business based on anticipation of needs of specific customers, rather than on prior orders or contracts, might not at times be sufficient to establish that practical continuity in transit necessary to keep a movement of goods 'in commerce' within the meaning of the Act. It was said in *Swift & Co.* v. *United States*, 196 U. S. 375, 398, that 'commerce among the States is not a technical legal conception, but a practical one, drawn from the course of business.' While that observation was made apropos of the constitutional scope of the commerce power, it is equally apt as a starting point for inquiry whether a particular business is 'in commerce' within the meaning of this Act. We do not believe, however, that on this phase of the case such a course of business is revealed by this record. *The evidence said to support it is of a wholly general character and lacks that particularity necessary to show that the goods in question were different from goods acquired and held by a local merchant for local disposition.*" (Emphasis ours.)

To the same effect is the companion case, *Higgins* v. *Carr Bros. Co.*, 1943, 317 U. S. 572.

Under the reasoning of the *Jacksonville* case the interstate aspects of the shipment of petitioner's gasoline into Michigan ceased at the Marine Terminal. The gasoline came to rest there. It was not earmarked and could not have been earmarked for any customer. It was destined solely for distribution in Michigan. There were no contracts in advance of shipment for any definite amounts. The warehousing at the Terminal was not a mere pause in the journey or a mere "ritual": the gasoline remained there for long periods of time, even throughout the winter months.

The lower court's decision that the storage of gasoline at the Marine Terminal differed from the storage of goods in a local warehouse (R. 5297-8) and hence did not constitute an end of interstate commerce is in apparent conflict with the decision of the First Circuit in *Lipson* v. *Socony Vacuum Corp.*, 1937, 87 F. 2d 265, cert. granted 300 U. S. 651, dism. per stip. 301 U. S. 711, which is an oil case in which the facts were similar with respect to the commerce point.*

The lower court's decision also conflicts with the reasoning of *Atlantic Coast Line Railroad* v. *Standard Oil Co. of Kentucky*, 1927, 275 U. S. 257, which held that petroleum products delivered from tankers into storage terminals in Florida became subject to intrastate transportation rates and regulations after such storage. In this case it was contended (p. 271):

---

* It is also in conflict with *Daly* v. *Citrin*, 1943, Dist. Ct., E. Dist. Mich., 53 F. Supp. 876, which dealt with petitioner's storage at the Marine Terminal involved in this case, and with *Nachman* v. *Shell Oil Co.*, 1945, Dist. Ct., Dist. Md., C. C. H. (Trade Regulation), p. 57758, where local storage of gasoline was held to terminate interstate commerce. See also *Crutchfield* v. *Cherry*, 1947, Dist. Ct., W. Dist. Tenn., 7 W. H. (B. N. A.) 1080; *Williams et al.* v. *Bill Mosier's, Inc.*, 1942, Dist. Ct., W. Dist. Okla., 2 W. H. (B. N. A.) 662, in both of which interstate movement of gasoline was held to have ceased at a local storage facility.

> "* * * these are continuous streams of oil from Baton Rouge or Tampico into bulk stations in the interior of Florida where it is sold to the customers of the plaintiff, and that its interstate character continues through that entire passage."

It was suggested that the fuel oil was being discharged from the tankers into Standard of Kentucky's storage facilities at the same time that oil was being discharged from the storage tanks into tank cars for distribution, but it was held (p. 271) that such simultaneous inflow and outflow

> "* * * is not at all inconsistent with its being a closing of an interstate or a foreign transportation and a beginning of intra-state distribution for the purposes and business of the plaintiff."

The court considered the pertinency of *Stafford* v. *Wallace* and concluded (p. 273):

> "The use of this authority [*United States* v. *Ferger*, 250 U. S. 199] as a basis for the conclusion in *Stafford* v. *Wallace* clearly shows that the case can not be cited to show what is interstate and what is intrastate commerce in a controversy over rates to determine whether they come normally within the regulation of Federal or State authority."

By the same token the *Stafford* case is not citeable here.

Other cases fully supporting our contention that the interstate movement of gasoline ceased at the Marine Terminal and that both the sales to the jobbers and the sales to the service stations of gasoline delivered out of the Marine Terminal were intrastate sales and therefore not in commerce include *Jewel Tea Co.* v. *Williams*, 1941, 10 Cir., 118 F. 2d 202; *Domenech* v. *Pan American Standard Brands, Inc.*, 1945, 1 Cir., 147 F. 2d 994. In each of these cases under facts not distinguishable in principle from those involved in the instant case, the court held that the interstate phase ended with the storage at the local warehouse.

The false analogy which the lower court has drawn between the instant case and the *Stock Yards* and other cases involving the full exercise of Governmental power over the "stream," "flow" or "course of commerce" is responsible for the failure of the court below to rule that the interstate aspect of transportation ended at the Marine Terminal. It is also responsible for the holding of the court below that the gasoline did not lose its interstate character until it reached the tanks of the service stations and the bulk plants of the jobbers in Detroit (R. 5297-8-9).

But it was never contemplated that the jurisdiction of the Commission should reach thus deeply into local matters. If the principle is allowed to stand, the distinction between "affecting commerce" and "in commerce" is swept away. Employees of the service stations in Detroit engaged in ordering gasoline or assisting in its delivery into the service station tanks will be held to be "employees in commerce" under the "in commerce" provision of the Fair Labor Standards Act contrary, we believe, to the following cases: *Walling* v. *Jacksonville Paper Co.*, 1943, 317 U. S. 564; *Walling* v. *Silver Bros. Co. Inc.*, 1943, 1 Cir., 136 F. 2d 168; *Kantar* v. *Carchell*, 1945, 8 Cir., 150 F. 2d 47; *Daly* v. *Citrin*, 1943, Dist. Ct., E. Dist. Mich., 53 F. Supp. 876; *Crutchfield* v. *Cherry*, 1947, Dist. Ct., W. Dist. Tenn., 7 W. H. (B. N. A.) 1080. In *Walling* v. *Goldblatt Bros.*, 1942, 7 Cir., 128 F. 2d 778, 781, 782, 783, it was specifically pointed out that the "current of commerce" test should not be applied to "in commerce" cases because such fallacious use of the analogy will defeat the intent to leave local affairs to local authorities. If the Congress wished to reach thus deeply into local affairs it could easily have done so by framing the statute in "affecting" commerce language.

It is significant that while the complaint alleged that all of the purchases complained of were "in the course of commerce," neither the Trial Examiner nor the Commission were able to say in so many words that the "purchases were in commerce." The Commission could only find that petitioner was engaged in commerce, that it has at all times maintained a course of trade in commerce and that "In the course and conduct of its business in the Detroit metropolitan area, * * * since September 10, 1936, has regularly supplied gasoline to approximately 358 retail service stations * * *." (R. 5164.) To say the least, this is a curious method of avoiding the necessity of making the simple jurisdictional finding that "the purchases involved in such discrimination are in commerce." Commissioner Mason, dissenting, called attention to this remarkable omission (R. 5268) but the Commission did not rectify it.

Conclusion.

The mutual opposition between the philosophy of the Sherman Act and that of the Robinson-Patman Act has been frequently remarked. The instant case vastly enlarges the area and intensity of conflict. The open disagreement of the Department of Justice with the Federal Trade Commission in this case is attributable to the extent to which the reach of the decision below impinges upon the general antitrust program.

It is possible to reconcile the apparent divergencies so long as the Robinson-Patman Act is held to do away with unjustifiable price discriminations; but it is not possible to reconcile the divergencies if the Act be held to abolish price discriminations made in good faith to meet equally low prices of competitors, particularly where the Commission finds it necessary to require practices of the type forbidden by the Sherman Act.

Contrary to the over-all antitrust policy, the Commission in this case has attempted to stratify important segments of the distributive system and to establish price controls and uniformity of price structure, despite the rulings of this Court in the *Sugar Institute* and *Gypsum* cases.*

It is, of course, within the province of the Congress to restrict the scope of the Sherman Act in areas where it considers free competition not in the public interest but, until Congress has clearly evinced such an intention, our basic policy manifested by the Sherman Act should remain unchanged. Although the major suppliers of gasoline could undoubtedly in time adjust their operations to eliminate dual distribution, perhaps by taking over the businesses of the jobbers whom they can no longer serve, the principal impact of the Commission's decision will be upon the small businessman, the jobber who has had the misfortune of handling the product of a dual distributor.** Those jobbers who are eliminated or forced to seek a new source of supply or constrained to submit to a competitive straitjacket will not share the equanimity with which the Commission surveyed their unhappy lot.

It is also within the province of the Congress to enlarge the jurisdiction of the Commission to include purchases which merely *affect* commerce; but, Congress having deliberately restricted the jurisdiction to purchases *in* commerce, it is not within the province of the Commission or the courts to disregard the limitation.

---

* *Sugar Institute* v. *United States*, 1936, 297 U. S. 553, 587; *United States* v. *U. S. Gypsum Co.*, 1948, 333 U. S. 364, 397.

** "It would take a skilled intellectual contortionist to consider the *Indiana Standard* case as involving small v. big business" (63 H. L. R. at p. 77).

For these and other reasons herein stated, the judgment of the court below should be reversed and the Order of the Commission dismissed.

APPENDIX A.

Section 2 of the Clayton Act, 38 Stat. 730 (1914), 15 U. S. C., Sec. 13 (1934), Prior to the Robinson-Patman Amendment.

Sec. 2. That it shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities,*

> which commodities are sold for use, consumption, or resale within the United States or any Territory thereof or the District of Columbia, or any insular possession, or other place under the jurisdiction of the United States,
>
> where the effect of such discrimination may be to substantially lessen competition, or tend to create a monopoly in any line of commerce:

Provided, That nothing herein contained shall prevent discrimination in price between purchasers of commodities on account of

> differences in the grade, quality, or quantity of the commodity sold,
>
> or that makes only due allowance for difference in the cost of selling or transportation, or
>
> discrimination in price in the same or different communities made in good faith to meet competition:

And provided further, That nothing herein contained shall prevent persons engaged in selling goods, wares, or merchandise in commerce from selecting their own customers in bona fide transactions and not in restraint of trade.

---

* Indenting, emphasis and paragraphing ours.

APPENDIX B.

Section 2 (a) and (b) of the Clayton Act as Amended by the Robinson-Patman Act June 19, 1936, 49 Stat. 1526; 15 U. S. C., Sec. 13.

SEC. 2. (a) That it shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade and quality,*

> where either or any of the purchases involved in such discrimination are in commerce,
>
> where such commodities are sold for use, consumption, or resale within the United States or any Territory thereof or the District of Columbia or any insular possession or other place under the jurisdiction of the United States,
>
> and where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them:

Provided, That nothing herein contained shall prevent differentials which make only due allowance for differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such commodities are to such purchasers sold or delivered:

Provided, however, That the Federal Trade Commission may, after due investigation and hearing to all interested parties, fix and establish quantity limits, and revise the same as it finds necessary, as to particular commodities or classes of commodities, where it finds that available pur-

---

* Indenting, emphasis and paragraphing ours.

hasers in greater quantities are so few as to render differ-
ntials on account thereof unjustly discriminatory or pro-
notive of monopoly in any line of commerce; and the
oregoing shall then not be construed to permit differen-
ials based on differences in quantities greater than those
o fixed and established:

nd provided further, That nothing herein contained shall
revent persons engaged in selling goods, wares, or mer-
handise in commerce from selecting their own customers
n bona-fide transactions and not in restraint of trade:

nd provided further, That nothing herein contained shall
revent price changes from time to time where in response
o changing conditions affecting the market for or the
narketability of the goods concerned, such as but not
imited to actual or imminent deterioration of perishable
goods, obsolescence of seasonal goods, distress sales under
ourt process, or sales in good faith in discontinuance of
usiness in the goods concerned.

SEC. 2. (b) Upon proof being made, at any hearing on a
omplaint under this section, that there has been discrimi-
nation in price or services or facilities furnished, the bur-
len of **rebutting the prima-facie case thus made by showing**
justification shall be upon the person charged with a vio-
ation of this section, and unless justification shall be affirm-
atively shown, the Commission is authorized to issue an
order terminating the discrimination:

Provided, however, That nothing herein contained shall
prevent a seller **rebutting the prima-facie case thus made**
by showing that his lower price or the furnishing of serv-
ices or facilities to any purchaser or purchasers was made
in good faith to meet an equally low price of a competitor,
or the services or facilities furnished by a competitor.

Sherman Act, 26 Stat. 209 (1890) as amended; 15 U. S. C. Secs. 1, et seq. (1946) 14

IN THE

Supreme Court of the United States

October Term, 1949.

No. 107.

STANDARD OIL COMPANY,

Petitioner,

vs.

FEDERAL TRADE COMMISSION,

Respondent.

REPLY BRIEF FOR PETITIONER.

I.

eting in Good Faith an Equally Low Price of a Competitor—The Proviso to Section 2(b).

(a)

he Commission now asserts (Com. Br., pp. 44-7) that its
ncession with respect to petitioner's good faith meeting
equally low prices of competitors was "only for the pur-
se of this decision" and was not "a concession of actual
t." Its brief concludes with a plea in the alternative
t ~~the case be remanded to~~ the Commission for a finding
the good faith issue for, it is suggested, that the Com-
ssion might on remand adopt a more "vigorous" view
good faith.

his is not a case in which the Commission, having mutually exclusive grounds of decision, and having acted upon one of those grounds, found it unnecessary to consider the other. In this case the good faith defense was one of the principal defenses offered by petitioner. Voluminous evidence was taken upon it. The Trial Examiner who heard and saw the witnesses found the issue in petitioner's favor, and the Commission, although it made no formal finding, did, in fact, consider the issue and must, in fact, have accepted the Trial Examiner's finding; the grounds upon which it placed its decision were predicated upon the assumption that petitioner had proved its good faith defense. And it stands to reason that the Commission would hardly have strained to adopt what is admittedly a novel, previously unheard of, interpretation of the statute which would nullify the effect of the good faith showing, unless it had first reached the conclusion that that showing had been made.

If the Commission had been of the opinion in 1944 when the factual issue was presented to it that the good faith defense had not been proved, it would have been a simple matter to dispose of the case on that issue. The only reasonable conclusion from all the circumstances is that the Commission in fact concluded that good faith defense had been affirmatively proved. The technicality of the absence of a formal finding would not justify the resubmission of this case to the present Commission after all these years for what in substance would be a reconsideration of the issue of good faith, in order that it may now, as counsel appear to anticipate, adopt a "more vigorous" construction of that provision of the statute. Presumably, counsel, consistently with the argument in the present brief, will urge upon the Commission that the statutory injury to competition is in itself inconsistent with the good faith defense of meeting competitors' prices.

The fragmentary treatment in the Commission's brief of the voluminous testimony in the record on the subject of meeting lower competitive offers, is not only considerably less than complete but is, we believe, inappropriate.

Commission's brief makes no mention of the fact that petitioner, prior to the initiation of these proceedings, supplied seven jobbers but lost three of them on account of failure to meet lower offers from competitors. It omits mention of the uncontradicted testimony of petitioner's witnesses that petitioner could not have hoped to keep any of its remaining four jobbers unless it had sold to them at the tank car price (R. 947-51, 1062-3, 1086, 1092, 344-5, 1843), a fact which is recognized by the Trial Examiner (5098-5104) and also by the Commission in its Findings of Fact (R. 5179); or the testimony of another witness that the 1½¢ jobber margin allowed by petitioner was the smallest such margin allowed to jobbers anywhere (R. 951).

Austin, now counsel for the retailers *amici*, then representing the Commission, said in his brief filed with the Commission:

> "It is conceded also that the evidence is to the effect that during the time in which respondent has sold to Citrin-Kolb and Ned's at tank car prices, it has done so in the belief that it could not hold the business of these customers at higher prices." (Brief of Attorney for Commission, Docket No. 4389, p. 47.)

The Commission itself in its Findings of Fact immediately preceding the excerpt quoted in the Commission's brief at page 23 recited (R. 5179) petitioner's contention, without questioning its validity, that:

> "* * * the lower prices allowed the four dealers were made in good faith to meet an equally low price of a competitor for the reason that said four dealers could at any time herein involved have purchased gasoline of grade and quality comparable to that sold by the respondent at equally low or lower prices from other suppliers in Detroit."

In the court below petitioner, for the enlightenment of the court, also set forth in its brief a representative portion of the evidence relating to specific offers of specific competitors of comparable gasolines in order to demonstrate that the Trial Examiner's finding was indisputable* (Pet. Br. below, pp. 11-18). The Commission's brief below contained not one word in opposition; its silence, we submit, constituted a complete and final waiver of this factual question. The opinion of the court below indicates that it had examined the evidence and it held that there was "substantial evidence in this record" and "we think it may be assumed to be conclusive" that the lower price to the four jobbers was in each instance made in good faith to meet an equally low price of a competitor (R. 5297; see also R. 5299, 5302). This finding by the court below would likewise seem to be conclusive.

The Commission would hardly have been warranted in passing over the issue of the good faith defense and in presenting its case to the Court on the grounds now being mooted unless it had first satisfied itself with respect to the good faith aspect. The late Walter B. Wooden, counsel for the Commission, said in his argument before it on April 25, 1946:

> "With some trepidation I now approach what is by all odds the most difficult and in many respects the most important issue in the case. * * *
>
> "That issue concerns the legal and possibly the constitutional status of respondent's defense under Section 2(b) as to meeting an equally low price of a competitor in good faith.
>
> * * * * *
>
> "The Commission has seen fit to treat it as not an absolute substantive defense in this case, for reasons

---

*For the convenience of this court we have caused to be filed with the Clerk certified copies of the briefs in the court below.

> set forth in paragraph twelve [R. 5178-82] of its findings. *The Commission there described the evidence offered by respondent on the question of good faith to meet an equally low price of a competitor, and apparently no evidence controverting it was offered.*
>
> "Desiring to test the legal status of such defense, the Commission found that it was not material as a matter of law whether such defense could be sustained as a matter of fact under the circumstances of this case. Accordingly, it made no finding on the factual question.
>
> "*The result, I suppose, is the same as though the existence of the respondent's good faith to meet an equally low price of a competitor had been conceded.*" (Emphasis ours. Pp. 100-1 of Official Report of Oral Argument before Federal Trade Commission, Electreporter, Inc., Official Reporter.)

It is apparent to us, as it was apparent to Wooden, that the Commission considered the showing to have been fully established and conceded.

The Commission thus seeks at this late date to take advantage of its own deliberate omission to make a formal finding in respect of an issue which was fully settled.

(b)

A remarkable omission in the Commission's brief is its failure to reply to our contention that if the good faith defense is not available in the instant case it will be unavailable in every price discrimination case (Pet. Br., pp. 35, 36).

Counsel now plainly assert that the good faith defense is unavailable when the Commission has proved statutory injury to competition at the purchaser level, *i. e.*, when the Commission has proved a difference in price to competing purchasers more than *de minimis** (Heading to Point I, Com. Br. p. 21; See also p. 35).

While they contend that the good faith showing will rebut the Commission's "*prima facie* case", this showing in turn will be surrebutted and nullified, they maintain, if the Commission should "show by additional and affirmative evidence that the effect of the discrimination may be to substantially lessen competition, etc." They fail, however, to point out wherein their surrebuttal would differ from the "*prima facie* case", in the light of the *Morton Salt* case, which holds that a showing of a discrimination in price between competing purchasers not only makes out a *prima facie* case but also a complete case for the Commission, in the absence of any proof of justification.

Furthermore, in order to develop their fine-spun argument the Commission is compelled to maintain that different meanings should be given to the same words when they are repeated in the same section of the same statute. "Rebutting the *prima facie* case" in Section 2(b), according to the Commission, means completely and finally rebutting the case, where the same words in the proviso to Section 2(b) contemplate a provisional rebuttal which is subject to surrebuttal by the introduction of additional evidence. Likewise the Commission's theory necessarily accords to the phrase "discrimination in price" a meaning in Section 2(b) which is much less comprehensive than the meaning ascribed to the same phrase in Section 2(a) (Com. Br. pp. 35-6). Finally, the word "justification," admittedly meaning a complete and final justification with respect to the matters set forth in the proviso to Section 2(a), is construed by the Commission as merely a provisional justification with respect to the good faith defense in the proviso to Section 2(b)—which flies directly in the face of the opinions of this Court in the *Staley* and *Morton Salt* cases (Pet. Br. pp. 24-5).

---

* At other places in the brief, counsel refer to actual injury and affirmative proof of injury, suggesting that they perhaps believe that the type of evidence held to be unnecessary and redundant in the *Morton Salt* case will fortify their position (Com. Br. pp. 24, 35, 36, 37; Pet. Br. p. 39).

Nor is there any warrant for the assertion that the grounds of justifications set forth in Section 2(a) constitute matters in confession and avoidance and a complete defense, but that the justification referred to in the proviso to Section 2(b) is limited to a traverse of the Commission's proof of effect on competition (Com. Br., pp. 34-44). All of the provisos are introduced in the same language and all of them clearly provide defenses in confession and avoidance.

It is palpably absurd, also, to urge that proof of good faith in meeting a competitor's price can serve in this case only in so far as it tends to show that adverse effects on competition have not occurred (Com. Br. pp. 34-44), and at the same time to contend that such proof "does not logically rebut" (Com. Br. p. 37) and "does not preclude" the reasonable probability (Com. Br. p. 43) that competition has been adversely affected.

The tortuous arguments (Com. Br., pp. 38 *et seq.*) with respect to criminal motive and criminal intent are beyond our comprehension. We nowhere suggested that subjective intent or motive or "a pure heart" has any bearing on a price discrimination case.

To rationalize their disregard of well-settled tenets of statutory construction, counsel have been compelled to seize upon and embellish selected Congressional utterances and reports which we submit are not representative of the compromise finally enacted (Com. Br. p. 27 *et seq.;* Pet. Br. p. 23); nor have they shown that the results which they seek would either be desirable or warranted, inasmuch as there is no question but that if petitioner is compelled to cut off its four jobbers, they could and would buy from other suppliers at prices as low as, or even lower than, petitioner's prices.

II.

Constitutionality.

Instead of replying to our contentions based upon the due process clause, the Commission's brief contents itself with knocking down straw men largely of their own creation. The discussion (Com. Br., pp. 49-51) of procedural due process is entirely irrelevant; and whereas our arguments were directed to whether the Commission's construction of the present statute is consistent with the requirements of the Fifth Amendment, the Commission has preferred to discuss the academic question whether Congress could under any circumstances deny the right of a seller to meet in good faith the lower price of a competitor.

Whether or not a statute would be valid which in terms barred any price discrimination, regardless of the good faith meeting of the lower price of a competitor, we maintain that a statute under which the good faith defense "may or may not be applicable" (Com. Br., p. 32), depending on the mere whim of the Commission, must fall for indefiniteness (Pet. Br., pp. 36-40). Likewise the statute would be invalid, as being arbitrary and capricious, where its application, as contended for by the Commission in this case, would be a futility so far as carrying out any of the purposes with which the statute is concerned and where the sole effect is to bar dual distribution and to cause unwarranted injury to jobbers who have built up their businesses around the brand names of suppliers engaged in dual distribution (Pet. Br., pp. 40-44).

Vagueness.

The Commission in its brief abandons the "rare" case concept, which was employed to mollify the Congressional Committee. It now apparently acknowledges, as logically it must, that the only injury with which the statute is concerned is the statutory injury described in Section 2(a), and that under its theory the good faith defense would fail in every case where this injury is made out, which means, as we urged in our main brief, in every price discrimination case (Pet. Br., pp. 39-40).

The further intimation of the Commission that proof of good faith meeting of the lower price of a competitor is not a defense in any event but solely a matter of "evidence" or "mitigation" (Com. Br., p. 39), where there is no indication whatsoever as to what weight, if any, is to be given to such evidence, or what the evidence would be in mitigation of, serves only to confirm that the Commission considers that the applicability of the Section 2(b) proviso is a matter of grace to be administered by the Commission as it may choose.

Nor is the Commission's position aided by the alternative suggestion that the good faith defense would be applicable only if it "logically" rebutted the Commission's proof of injury to competition (Com. Br., pp. 17, 37). The fact that the favored customer was bound to receive the lower price in any event, where good faith has been shown, so that the meeting of the lower price would not affect the competitive situations of the parties concerned, might well be deemed to rebut proof that the injury was caused by the price discrimination. But if this proposition be unacceptable, then good faith meeting of competition can never rebut the Commission's *prima facie* case, and the proviso to Section 2(b) becomes a nullity, rendering the meaning of the statute as we contend, hopelessly vague and indefinite.

Unreasonableness.

As previously indicated, it does not avail the Commission to argue that Congress, if it should legislatively find that price discriminations constitute an evil which should be eradicated by outlawing all price discriminations regardless of the good faith meeting of the lower price of a competitor, might constitutionally enact such a statute. As pointed out in our main brief, not only has Congress made no such finding but the retention of the proviso in Section 2(b) negatives any purpose of Congress to nullify the good faith defense. Under these circumstances, we maintain that it is arbitrary and capricious to apply the statute, as the Commission would in this case, so as to deny the good faith defense with the sole result of eliminating dual distribution, where there is no indication or any reason to believe that either competition or competitors will be benefited (because the same customers will pay the same prices anyhow), but where the dual distributors and particularly those purchasing from them will be seriously harassed.

We are charged (Com. Br., p. 61) with a "bold assertion of a constitutional right to discriminate in price to meet an equally low price of non-discriminating competitors despite the destruction of such competitors and the death of competition* itself which may ensue." This

---

*That such hyperbolic phraseology as "death of competition" and, from the opinion below, "havoc" and "bludgeon" go beyond the actual facts of this case, is commented on by M. A. Adelman, "Integration and Anti-trust Policy," 63 H. L. R. 27, 71:

> "One has visions of ruinous competition, of heads rolling, of prices cut 'until some of those fellows have gone bankrupt. When you cause that, I think that isn't clean competition.' Here, from the FTC's brief [the Commission's brief in the court below], is the extent of this ruthless annihilation:
>
> '*Many of the dealers* who testified as witnesses

somewhat startling characterization of our position is hardly supported by the actual fact that petitioner is simply seeking the privilege of holding four of its own long-time customers by selling to them at prices no lower than those offered to them by other suppliers. Far from seeking to aggrandize itself at the expense of competitors, petitioner is seeking solely to protect the business that it already has. In view of the further fact that the court below, after reviewing the evidence, confirmed petitioner's good faith, the attempted comparison of petitioner's practices in this case with the local price-cutting practices of "the old Standard Oil Company" is an unworthy effort of Commission's counsel to provide color otherwise wholly lacking in the Commission's case.

It is because the good faith showing of meeting a competitor's price presupposes *ex hypothesi* that the so-called "favored" customer would have received the price in any event, that we believe that the decision of this Court in the *Fairmont Creamery* case, 1927, 274 U. S. 1, retains its validity. *Central Lumber Company* v. *South Dakota*, 1912, 226 U. S. 157, and *State* v. *Fairmont Creamery Company of Nebraska*, 1911, 153 Iowa 702, 133 N. W. 895, cited by the Commission, are both distinguishable because the statutes in those cases dealt with discriminations where there was a specific intent to injure competition. Nor can the "possibility" of injury to com-

---

> for the Commission stated that Ned's stations were the first Standard Oil stations to cut prices in their respective neighborhoods, and that in the Fall of 1937 and the Spring of 1938 *they lost many customers* who told them that they were buying their gasoline at Ned's * * *'."

To this statement Adelman appends a footnote as follows:

> "If the skeptical reader suspects that the FTC had any stronger examples or evidence, I would beseech him to read the Brief and the Findings."

petition, with which the Robinson-Patman Act is concerned, be treated on a parity with those state statutes which depend upon a showing of purpose or intent to injure competition. Nothing in the *Cement* and *Corn Products* cases cited by the Commission can be considered to support the Commission's position that all price discriminations may be outlawed since the Court in those cases recognized the right to meet competition in good faith.

III.

Paragraph 6 of the Order.

Counsel attempt to sustain Paragraph 6 of the Order, which restricts the jobbers *as wholesalers*, by insisting that the Paragraph is merely a necessary enforcing or supplemental measure to make effective those portions of the Order which relate to sales to the jobbers *as retailers*. They say at pp. 70-1:

> "If the prohibition contained in Paragraph 6 were not included in this order there would be nothing to prevent Ned's, solely a retailer, from transferring its business to Citrin and purchasing Red Crown gasoline from Citrin at 1¢ a gallon below the tank-wagon price, delivered at Ned's stations. Ned's would obtain substantially the same competitive advantage over other retailers which it now obtains by purchasing in tank-car quantities from petitioner. Petitioner would achieve the same result which it now obtains, merely using Citrin as a conduit for sales to Ned's." (See also Com. Br., 19, 69.)

But it is obvious that petitioner could not, without violating Paragraph 5, afford a lower price to Ned's as a retailer by colluding to use "Citrin as a conduit"; hence it is obvious that Paragraph 6 is not necessary as an enforcing measure.

Furthermore, counsel proceed to discuss Paragraph 6, not as a supplemental enforcing measure but as the remedy for an additional purported substantive offense, for they say in effect at page 68 that if petitioner sells to wholesalers in tank car quantities at 1½¢ a gallon below the price it charges retailers in the same territory and if the wholesaler passes along a part of this wholesale margin to his retailer customers by selling at less than petitioner's posted tank wagon prices, then there is a violation of Section 2 of the Clayton Act as amended (Com. Br., p. 68). But whether Paragraph 6 is designed merely to strengthen Paragraph 5 or whether it is designed to prevent some additional purported substantive offense, it cannot be justified for reasons set forth in petitioner's main brief.

Nor is it true, as stated at page 69, that, "Apparently, petitioner's objections to Paragraph 6 go only to the terms of that paragraph." True, we pointed out that Paragraph 6 must be doctored up again—to permit the wholesalers to meet the competition of other wholesalers or of suppliers who will try to lure their customers away (Our Br. pp. 47-8).* But we deny that the sale at the tank car price to wholesalers and at the tank wagon price to retailers in the same territory constitutes in and of itself a discrimination in price forbidden by the Robinson-Patman Act; and the Commission has been unable to point to any authority so holding. We furthermore contended and still contend that there was no violation because the tank car price afforded each of the jobbers was afforded them in good faith in order to meet an equally low price of competitors, and also because the purchases alleged to be discriminatory were not in commerce.

---

*E. g., see R. 883-8, 893-4, for lower offers of competitors made to Langer-Cohn and another customer of Citrin.

IV.

The Purchases Were Not in Commerce.

The failure of the Commission to find that "either or any of the purchases involved" were "in commerce," noted by the dissenting Commissioner (R. 5628-9) and pointed out in our brief (p. 56), is ignored in the Commission's brief. Not only is no explanation offered of the absence of this jurisdictional finding, but counsel seek to avoid the express limitation of Section 2(a) of the Clayton Act to transactions "in commerce" by urging the relationship between the Clayton Act and the Sherman Act. But, however much the Sherman and Clayton Acts may be in *pari materia* in other respects, it is perfectly clear that Congress did not choose in Section 2(a) of the Clayton Act to exhaust its power under the commerce clause. Sherman Act cases are therefore not determinative in construing the meaning of "in commerce," as used in the Clayton Act.

Counsel, recognizing that *Walling* v. *Jacksonville Paper Company*, 1943, 317 U. S. 564, relied upon by petitioner, is controlling, makes a vain attempt to fit that case into its argument on the commerce point. In the first two categories of goods there involved, interstate commerce was held to continue beyond the local warehouse, but in the third category, alone pertinent here, the interstate movement was held to have terminated at the local warehouse. It is necessary only to describe the first two categories to demonstrate the futility of the Commission's effort to fit the facts of the present case into either of them.

The facts with respect to the first category of goods involved a virtual subterfuge in order to avoid the Fair Labor Standards Act. Goods which previously had been delivered from the railroad terminal directly to specific customers, were formalistically unloaded into the warehouse, checked, reloaded and promptly sent on to the customer. This "ritual" was held not to supply a break in the interstate movement. The second category concerned goods prepared especially for particular customers and ordered pursuant to pre-existing contracts or understandings. Such importation of particular merchandise for specific customers was held to remain interstate to and including the delivery to the customers in question.

There is no suggestion that any particular gasoline in the present case was brought into the State of Michigan for specified customers. All the gasoline brought into the state and stored in petitioner's marine terminal was available for eventual sale and delivery within the state to any and all customers using the various grades of gasoline. Only half of the gasoline stored at the marine terminal was sold to the jobbers and retail dealers with which this case is concerned (Com. Ex. 87, R. 4776). While petitioner's employees were able to estimate in advance the approximate needs of petitioner's customers collectively, there is no indication that any particular quantities of gasoline were stored for particular classes of customers. Consequently, while the Commission's brief quotes at length from portions of the Court's opinion concerned with the first two categories of goods involved in the *Jacksonville* case, it is quite apparent that it is only with respect to the third category of goods, as to which commerce was held to have terminated at the warehouse, that the *Jacksonville* case is analogous to the case at bar.

CONCLUSION.

All the zeal and ingenuity of Commission counsel cannot obscure the fact that this case is, after all, concerned only with whether petitioner may lawfully seek to retain four of its long-time customers by meeting in good faith the lower offers made to them by competitors. Although counsel would picture these customers as "mass buyers" who could exact price reductions by their sheer size, actually they are typical small businessmen comparable with the 126 other jobbers in Michigan and the 12,000 or more jobbers throughout the United States, all of whom buy at the tank-car price. If petitioner were forced to cut them off, they would buy at the same or lower price from other suppliers.

It is submitted that the Solicitor General has not participated in the presentation of this case (Com. Br. p. 86) for the reason that the Department of Justice (as pointed out in our main brief, pp. 32-4, 56-7) does not agree that the public interest will be served by preventing one from retaining his customers by meeting in good faith the prices offered them by competitors or that Paragraph 6 of the Order is consonant with the Department's over-all administration of the antitrust laws.

For the reasons stated, the judgment below should be reversed without remand and the complaint dismissed.

Respectfully submitted,

FEDERAL TRADE COMMISSION

ON PETITION FOR WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE SEVENTH CIRCUIT

MEMORANDUM FOR THE FEDERAL TRADE COMMISSION

The first and principal question which the petition presents concerns the proper interpretation of the proviso to Section 2(b) of the Clayton Act, which states that a seller may rebut a prima facie case of price discrimination by showing that his lower price "was made in good faith to meet an equally low price of a competitor." The question presented is whether the proviso makes such a showing an absolute defense to a charge of illegal price discrimination or whether it merely means that such a showing shall be one of the facts given consideration in determining whether the price discrimination has effects on competition such as to bring it within the prohibitions of Section 2(a) of the Act.

The Government is of the opinion that the foregoing question of federal law has not been settled by this Court, and that it is of general public importance and should be settled by this Court if Section 2(b), as it now stands, remains in effect.

S. 1008, 81st Congress, provides for amending Section 2(b) of the Clayton Act. The bill has passed both branches of Congress and the House has accepted the conference report on the bill. The Senate, however, has postponed until next January further consideration of the conference report. If S. 1008 should become law, the first question presented by the petition in the instant case may become moot.

The Government does not think it necessary to discuss the other questions which the petition presents, inasmuch as the first question is of sufficient importance to warrant review of the case by this Court.

For the foregoing reasons, the Government does not oppose allowance of the petition for certiorari.

PHILIP B. PERLMAN,
Solicitor General.

Opinion below 1
Jurisdiction 1
Statute involved 2
Questions presented 3
Statement 4
Summary of argument 16

Argument:

I. Good faith to meet an equally low price of a competitor under Section 2 (b) of the Clayton Act, as amended, is not a justification for discriminations in price which have the injurious effects on competition specified in Section 2 (a) of the Act 21
II. Sections 2 (a) and 2 (b) of the Clayton Act, as amended, meet all requirements of constitutional due process when construed as not making good faith to meet an equally low price of a competitor an absolute justification for price discriminations which injure or destroy competition or which tend to create monopoly 48
III. Paragraph 6 of the Commission's order is necessary and appropriate for effective relief against petitioner's unlawful discriminations 66
IV. Petitioner's discriminations in price against which the Commission's order is directed were discriminations in the course of commerce among the several states under Section 2 (a) of the Clayton Act, as amended 74
Conclusion 85

OCTOBER TERM, 1949

No. 107

STANDARD OIL COMPANY, PETITIONER

v.

FEDERAL TRADE COMMISSION

ON WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE SEVENTH CIRCUIT

BRIEF FOR FEDERAL TRADE COMMISSION[1]

OPINION

The opinion of the Court of Appeals for the Seventh Circuit was issued March 11, 1949 (R. 5293) and is reported in 173 F. 2d 210.

JURISDICTION

The decree of the Court of Appeals was entered on April 29, 1949 (R. 5307). The petition for a writ of certiorari was filed June 9, 1949, and was allowed on November 7, 1949. The jurisdiction of this Court is invoked under Title 28, United States Code, Section 1254 (1).

---

[1] Commissioner Lowell B. Mason dissents.

STATUTE INVOLVED

Section 2 of the Clayton Act, 38 Stat. 730, as amended by the Robinson-Patman Act (Act of October 15, 1914, as amended by Act of June 19, 1936), 49 Stat. 1526; 15 U. S. C. 13, provides in part:

> (a) That it shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade and quality, where either or any of the purchases involved in such discrimination are in commerce * * * where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them * * *.
>
> (b) Upon proof being made, at any hearing on a complaint under this section, that there has been discrimination in price or services or facilities furnished, the burden of rebutting the prima facie case thus made by showing justification shall be upon the person charged with a violation of this section, and unless justification shall be affirmatively shown, the Commission is authorized to issue an order terminating the discrimination; *Provided, however,* That nothing herein contained shall prevent a

seller rebutting the prima facie case thus made by showing that his lower price or the furnishing of services or facilities to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor, or the services or facilities furnished by a competitor.

QUESTIONS PRESENTED

1. Whether good faith to meet an equally low price of a competitor under Section 2 (b) of the Clayton Act, as amended, is a justification for discriminations in price which have the injurious effects on competition specified in Section 2 (a) of the Act.

2. Whether Sections 2 (a) and 2 (b) of the Clayton Act, as amended, meet all requirements of Constitutional due process when construed as not making good faith to meet an equally low price of a competitor an absolute justification for price discriminations which injure or destroy competition or which tend to create monopoly.

3. Whether Paragraph Six of the Commission's order is necessary and appropriate for effective relief against petitioner's unlawful price discriminations.

4. Whether petitioner's discriminations in price against which the Commission's order is directed were discriminations in the course of commerce among the several States under Section 2 (a) of the Clayton Act, as amended.

STATEMENT

In this proceeding under Section 11 of the Clayton Act, 15 U. S. C. 21, the Federal Trade Commission charged petitioner with discriminating in price between different purchasers of products of like grade and quality in violation of Section 2 (a) of that Act, as amended by the Robinson-Patman Act, 49 Stat. 1526; 16 U. S. C. 13 (R. 2–5, 34–36). After hearing, the Commission made findings of fact (R. 5161), entered an order to cease and desist (R. 5183), and subsequently a modified order to cease and desist (R. 5254). Thereafter, respondent filed in the Court below a petition to review the Commission's final order (R. 5270), and the Commission filed a cross-petition for its enforcement (R. 5280). The Court below modified Paragraph 6 of the Commission's final order (R. 5305) and entered a decree affirming and enforcing the order as modified (R. 5307).

The findings of the Commission, together with certain supplementary facts established by uncontradicted evidence and pertinent to the issues now before this Court, may be summarized as follows:

The petitioner, Standard Oil Company of Indiana, an Indiana corporation, with its principal office and place of business located in Chicago, Illinois, is engaged in the business of refining and distributing gasoline and other petroleum products throughout fourteen States, principally in the Middle West. Among others, petitioner has a refinery at Whiting, Indiana, to which it supplies crude oil from fields located in other States. One of twenty-seven divisions of the territory in which it distributes its products is known as the Detroit Field, which embraces some thirteen counties in Southern Michigan, including the City of Detroit. The Detroit Area, as distinguished from the Detroit Field, is confined to the City of Detroit and its suburbs. The petitioner has no refinery in Michigan and almost all of the gasoline it sells and distributes in the Detroit Field is transported by tankers from its refinery at Whiting through the Great Lakes to the petitioner's marine terminal at River Rouge in the outskirts of Detroit. This terminal has a storage capacity of about 63,000,000 gallons. During the Summer months, deliveries are made from Whiting weekly and sometimes twice weekly. In the Fall, sufficient gasoline is delivered and stored to take care of the estimated requirements during the Winter months when navigation on the Great Lakes is closed. The amount of gasoline used in Detroit is fairly constant and can be accurately estimated. During the years from 1936 through 1940, the years here in question, the petitioner supplied 16.2 percent to 17.4 percent of all the gasoline in the Detroit Area. In addition to the River Rouge tanks, the petitioner operated six bulk plants in the Detroit Area. Practically all of the gasoline sold in the Detroit Area passed through the River Rouge terminal, except that in some instances gasoline was delivered directly from Whiting by truck and also by the same means to commercial users. Deliveries were made from the River Rouge terminal by tank cars and tank trucks up to February 1, 1940, and thereafter by trucks alone. The delivery trucks were owned and operated or leased and operated by the petitioner through its employees. (Paragraphs 1, 2, and 3 of the Commission's findings; R. 5162–5.)

Prior to September 10, 1936, petitioner operated all retail service stations owned or leased by it in the Detroit Metropolitan Area, but on that date, it discontinued all retail operations and leased or sublet all stations owned or leased by it to independent operators. Since September 10, 1936, the petitioner supplied gasoline to approximately 358 retail service stations, approximately 200 of which the petitioner owned and leased and 8 of which it leased and subleased. The remaining 150 were operated by independent operators who owned or leased their stations from some one else. The latter had an agreement to purchase their entire requirements of petitioners gasoline only from the petitioner (Com. Ex. 2; R. 2090). While the former had no such agreements, they did not buy gasoline from any one except the petitioner (R. 2092). The delivery to the retail customers was known as "tank-wagon delivery" and was made at a price fixed in Chicago by the petitioner from time to time, known in the trade as the "posted tank-wagon price."

The petitioner also supplied gasoline in the Detroit Area to four dealers: Ned's Auto Supply Company, Citrin-Kolb Oil Company, Stikeman Oil Company, Inc., and Wayne Oil Company, hereinafter sometimes referred to as Ned's, Citrin, Stikeman, and Wayne.

Ned's Auto Supply Company was engaged exclusively in the retail sale of petitioner's gasoline direct to the consuming public through its own chain of service stations. Prior to September 1, 1936, Ned's negotiated with petitioner at its Chicago office and demanded that petitioner allow it a discount in the price of gasoline purchased, with a threat to take its business to another supplier. (R. 1813–5, 1989.) Thereupon, in the course and conduct of its business during the period from September 1, 1936, to March 7, 1938, the petitioner discriminated in price by selling its gasoline for resale direct to the purchasing public to Ned's at ½ cent a gallon lower than the price charged by petitioner for gasoline of the same grade and quality to other retail dealers in the Detroit Area. (Paragraph 6 of the Commission's findings; R. 5167–8.) Although Ned's was engaged exclusively in the retail sale of petitioner's gasoline, petitioner, nevertheless, on March 7, 1938, classified it as a "jobber" in the Detroit Area.[2] And in the course and conduct of its business since March 7, 1938, the petitioner has discriminated in price by selling its gasoline for resale direct to the purchasing public to Ned's at 1½ cents a gallon lower than the price charged by the petitioner for gasoline of the same grade and quality to other retailers, customers of petitioner and competitors of Ned's, in the Detroit Area.[3]

Since June 19, 1936, Ned's has owned and operated in the Detroit Area a chain of retail gasoline service stations where the petitioner's gasoline so purchased has been resold at retail to consumers thereof in competition with other retailers of gasoline, purchasing from the petitioner or from other manufacturers. (Paragraph 4 of the Commission's findings; R. 5165.)

---

[2] This classification of Ned's as a "jobber" appears arbitrary since the record discloses that petitioner has refused permission to other retail service-station operators to buy in tank-car quantities (R. 83-4); the petitioner would not permit a group of retail dealers to pool their requirements and purchase in tank-car quantities, using joint storage facilities (R. 2080-1); tank-car capacities are 6,500 to 12,000 gallons (R. 512); one retail service-station operator, having a storage capacity of 16,000 gallons at his station, applied to petitioner in 1938 for deliveries in tank-car quantities at tank-car prices, but was refused (R. 807-16); another retailer, selling a volume of about 350,000 gallons of gasoline a year at his two stations, although he could have obtained bulk storage, was refused tank-car delivery and prices by petitioner (R. 3584); bulk storage and hauling facilities could be secured by any retail service-station operator or operators if permitted to purchase from petitioner on a tank-car basis; and there are a number of transportation companies in Detroit, who make a business of hauling gasoline for hire (R. 524, 1575).

[3] The petitioner's Red Crown gasoline, its largest selling brand, comprising 90 percent of its sales in the Detroit Area, was sold to Ned's since March 7, 1938, at 1½¢ a gallon lower than the price charged by petitioner for gasoline of the same grade and quality to other retailers in the Detroit Area. (Paragraphs 2 and 4 of the Commission's findings; R. 5162-5.)

The volume of gasoline sold in the Detroit Area through retail gasoline stations is more or less constant, and fluctuations that occur are chiefly due to variation in the number of cars in use from year to year. A lower price at one service station than at another is an important factor in the purchasing public's mind, particularly when the difference in price occurs in the major brands of gasoline. Any difference in price between two stations selling the same gasoline, or major brands of gasoline, is very important in influencing the flow of business. The margin of profit of the retail service station operator between the tank-wagon price which he pays and the prevailing retail service station price on the regular brand of gasoline of the major companies is small. The retailer's margin between petitioner's posted tank-wagon price and prevailing retail selling price of its Red Crown gasoline has been only 3.3¢ a gallon in the Detroit Area since November 19, 1939. Consequently, any reduction allowed to a retail service station operator below the regular tank-wagon price gives such operator a material advantage over other retail operators who pay the full tank-wagon price. (Paragraph 8 of the Commission's findings; R. 5168–71.)

In 1936, Ned's purchased 2,401,600 gallons of gasoline from petitioner which it resold to the public through its retail outlets or service stations. In 1937, Ned's was openly advertising cut prices, and was selling petitioner's Red Crown gasoline to the public at approximately 2¢ per gallon below the prevailing retail service station price, which continued with variations until the latter part of 1939. In 1937, the volume of gasoline sold by Ned's increased to 4,240,500 gallons. In 1939 and 1940, when Ned's posted price was approximately the same as the prevailing retail price, it gave various under-cover discounts and premiums. It has from time to time given commercial discounts varying from 1¢ to 2¢ per gallon off the posted price. In 1938, although the total volume of gasoline sold in the Detroit Area during that year was 10 percent less than the volume sold in 1937, the volume of gasoline sold by Ned's increased to 4,880,500. In 1938, Ned's had increased its retail service stations to five. (Paragraph 8 of the Commission's findings; R. 5168–71.) In 1939, Ned's also issued trading stamps with a value of 2¢ a gallon which were redeemable in merchandise or in gasoline at Ned's stores. In 1940, Ned's was operating six retail service stations. One other station, owned by Ned's, was operated for Ned's by an individual on a salary and commission basis. (Paragraph 5 of the Commission's findings; R. 5165–7.)

Price cutting at Ned's stations[4] has been almost

---

[4] The following table shows petitioner's posted tank-wagon price, its tank-car price, the prevailing retail service-station price, and Ned's posted price, for Red Crown gasoline, on each of various dates from 1937 to 1940, inclusive. This table is compiled from Commission's Exhibits 3 and 22, R. 4715–6; 4727, and testimony at pages 233–4–5. Prices shown are cents per gallon exclusive of all taxes. Taxes amounting to 4.4 cents a gallon are deducted from Ned's prices, which as stated in the record included taxes of approximately that amount. Many of the retail service station operators who testified as witnesses for the Commission stated that Ned's stations were the first Standard Oil stations to cut prices in their respective neighborhoods, and that in the Fall of 1937 and the Spring of 1938 they lost many customers who told them that they were buying their gasoline at Ned's because Ned's was giving them a discount of 2¢ a gallon. (Witnesses Leake, R. 407, Mertoglio, R. 416, Hawley, R. 429, Maloney, R. 451, Ruehle, R. 458, Tanski, R. 467, Tapert, R. 479, Christian, R. 409, Wotring, R. 575, Lefstad, R. 582, and Ferguson, R. 593.)

(Federal tax increased from 1 to 1½ cents per gallon July 1, 1940.)

continuous, and that company has been responsible for starting most of the retail price cutting in major brands of gasoline in Detroit over a period of several years. This practice on the part of Ned's has caused substantial damage to other retail service station operators selling the petitioner's Red Crown gasoline and to retail service station operators selling other brands of gasoline. The ability of Ned's to continue the price cutting practice was greatly enhanced through the low discriminatory price allowed it by petitioner while, at the same time, limiting other retailer-customers to a margin of profit of approximately 3.3¢ per gallon. (Paragraph 8 of the Commission's findings; R. 5168–71.)

The Commission found that the price discriminations granted by the petitioner to Ned's, both prior to March 7, 1938, and subsequent thereto, have given a substantial competitive advantage to Ned's over other retailers of gasoline, including retailer-customers of the petitioner; that this competitive advantage is capable of being used, and has been used, by Ned's to divert large amounts of business from other gasoline retailers to Ned's, including retailer-customers of the petitioner, with resultant injury to them and to their ability to continue in business and successfully compete with Ned's in the retailing of gasoline. The Commission further found that the effect of the discriminations in price allowed by the petitioner to

Ned's has been, and may be, substantially to lessen competition and to injure, destroy and prevent competition with Ned's in the retail sale of gasoline. (Paragraph 8 of the Commission's findings; R. 5168–71.)

During the period of time involved herein, Citrin, Stikeman, and Wayne were engaged in selling petitioner's gasoline at retail direct to the consuming public through ~~94 to 106~~ retail service stations owned and operated by them, as well as selling petitioner's gasoline at wholesale to other retailers, and, although these three favored dealers have, since June 19, 1936, owned or operated in the Detroit Area gasoline service stations where the petitioner's gasoline purchased by them has been resold at retail to consumers thereof in competition with other retailers of gasoline purchasing the same from the petitioner or from other manufacturers, the petitioner has nevertheless, classified these dealers as "jobbers."[5] (Paragraphs 3, 4, and 5, of the Commission's findings; R. 5164–7.)

In the course and conduct of its business since June 1936, the petitioner, in addition to the discriminatory prices allowed to Ned's has also discriminated in price by selling its gasoline for resale direct to the purchasing public to Citrin, Strikeman, and Wayne at prices substantially lower than the prices charged by the petitioner for gasoline of the same grade and quality to other retailers in the Detroit Area. The petitioner's Red Crown gasoline, its largest selling brand, comprising 90 percent of its sales in the Detroit Area, was sold as aforesaid to these three jobbers at 1½¢ a gallon lower than the prices charged by the petitioner for gasoline of the same grade and quality to other retailers in the Detroit Area. (Paragraphs 2 and 4 of the Commission's findings; R. 5162–5).

---

[5] In allowing "jobber" classification in the Detroit Area to these three dealers and to Ned's, the petitioner required only that they purchase substantial quantities of gasoline, own or control bulk plants where gasoline in large quantities could be delivered, and have sufficient financial standing or credit rating to warrant the extension of credit. There was no requirement that they would sell only at wholesale. (Paragraphs 3 and 5 of the Commission's findings; R. 5164–7.)

During the period from January 1, 1938, to December 31, 1940, Citrin-Kolb Oil Company sold a million gallons of gasoline annually to Langer and Cohn (Lanco),[6] retail service station operators, at 1¢ per gallon less than petitioner's tank-wagon price and in addition sold another retail service station operator (located at 8501 Gratiot Street in Detroit, Com. Ex. 33, R. 4732–3) at ½¢ per gallon less than petitioner's tank-wagon price (Paragraphs 5 and 7 of the Commission's findings; R. 5166–8).

---

[6] Commission's witnesses Branton (R. 521) and Ward (R. 529) testified that they lost customers to stations operated by Langer and Cohn during the period from 1936 to 1939, when these stations were giving discounts of 2¢ a gallon on Red Crown gasoline. Branton testified that the Lanco station near him put out advertising circulars advertising discounts on gasoline; and as late as 1941 gave premiums (R. 523–526). Some of the dealer witnesses testified that certain stations operated by, or purchasing from Citrin started cutting their prices at about the same time or shortly after advertised price cutting was commenced by Ned's Auto Supply Company, and that these witnesses lost business which customers told them was due to the fact that they were able to buy below the prevailing retail price at the Citrin stations (Witnesses Tapert, R. 479, Branton, R. 521, Ward, R. 529, Richards, R. 537, and Ferguson, R. 593).

The Commission found that the price discriminations granted by the petitioner to Citrin, Stikeman and Wayne on gasoline sold by them at retail have given a substantial competitive advantage to these favored dealers in their retail operations over other retailers of gasoline, including retailer-customers of the petitioner; that this competitive advantage is capable of being used, and to some extent by Citrin, has been used to divert large amounts of business from other gasoline retailers, including customers of the petitioner, with resultant injury to them and to their ability to continue in business and successfully compete with said dealers in the retailing of gasoline. The Commission further found that the discriminations in price allowed to Citrin permitted this dealer to sell a million gallons of gasoline annually to one retailer-customer at a delivered price of 1¢ per gallon less than petitioner's posted tank-wagon price and to sell another customer at a discount of ½¢ per gallon less than petitioner's posted tank-wagon price; that Citrin, by passing on in part to Langer and Cohn (Lanco), the benefits of the discriminatory prices, allowed by petitioner, enabled said Langer and Cohn to sell said gasoline to the consuming public at discounts of as much as 2¢ per gallon, which not only gave said Langer and Cohn a competitive advantage over other retailers of gasoline, including retailer-customers of petitioner, but also had the effect of diverting business from such retailers to said Langer and Cohn and of substantially lessening competition and injuring, destroying and preventing competition between said Langer and Cohn and other retailers of gasoline, including retailer-customers of petitioner. The Commission further found that the effect of the discriminations in price allowed by the petitioner to Citrin, Stikeman and Wayne has been, and may be, substantially to lessen competition and to injure, destroy and prevent competition with each of said dealers and with their respective customers in the retail sale of gasoline. (Paragraph 8 of the Commission's findings; R. 5168–71.)

SUMMARY OF ARGUMENT

I. The only question before this Court for its decision is the validity or invalidity of the Commission's order under existing law. Petitioner's contention that the "good faith" proviso of Section 2 (b) is an absolute substantive defense to a charge of violation of Section 2 (a) in any case as a matter of law is controverted by the legislative history as well as by the language of the proviso. The proposal ~~that meeting competition~~

in good faith be made an absolute justification for a discrimination in price otherwise prohibited was considered and rejected by the Congress in the enactment of the Robinson-Patman Act. If this proviso were construed to permit the showing of a competing offer as an absolute bar to liability for discrimination, then it would nullify the Act entirely at the very inception of its enforcement; for in nearly every case, mass buyers receive similar discriminations from competing sellers of the same product. The Commission's construction and application of Sections 2 (a) and 2 (b) correctly and clearly demonstrate that where, as in the instant case, the adverse effects upon competition have been affirmatively established, proof of good faith in meeting an equally low price of a competitor under the proviso of Section 2 (b) does not constitute a substantive justification for the petitioner's discriminations in price. This is particularly true where, as in the instant case, the competition injured is retail competition between competing purchasers, since the fact that the seller acted in good faith to meet the price of the seller's competitor is not inconsistent with and does not logically rebut the proof that retail competition between competing purchasers is injured by the discrimination. This Court, in the *Staley* case, infra, p. 30, has expressed the view that the "good faith" proviso does not provide a substantive justification for violation of Section 2 (a) and that proof of meeting competition in good faith is sufficient to rebut only a prima facie case of violation of Section 2 (a) and, beyond that, is merely evidence to be considered by the Commission with other evidence in determining as a question of fact in each case whether the seller's competition justified the discrimination in price.

II. The Commission's construction and application of Sections 2 (a) and 2 (b) meet all requirements of constitutional due process. Petitioner's argument that it has a constitutionally vested right to discriminate in price when meeting an equally low price of a competitor regardless of the injury done to competition is equivalent to a contention that the constitutional power of Congress to regulate commerce among the several States is limited by an inherent and inalienable private right to discriminate in price when done in good faith to meet an equally low price of a competitor. Section 2 (b) as thus construed by petitioner is elevated to the status of a constitutional guarantee. Petitioner's construction of this statute would make it ineffectual. The Court should adopt the Commission's construction that would make this statute an effective rather than an ineffective instrument for the protection of the competitive system against injurious discrimination. To accept petitioner's contentions would give constitutional sanction, under the circumstances here present, and which are of frequent occurrence, to discrimination which injures and destroys competition or which tends to create monopoly. The effect of adopting the contention would be to make petitioner's economic philosophy a part of the Constitution. Rejecting it would simply recognize the constitutional right of Congress to deal with discrimination and the competitive devastation which so frequently characterizes it in the light of legislative and administrative experience.

III. The Commission's order in this case would be incomplete and possibly ineffective if it only prohibited petitioner from discriminating in price between competing retailers. The prohibition should necessarily extend to the selling of gasoline to any wholesaler in the Detroit Area who resells it to retailers at less than petitioner's posted tank-wagon price or who directly or indirectly grants to his retailer-customers any discounts, rebates, allowances, services or facilities having the net effect of a reduction in price to the retailer. If petitioner cannot sell to both tank-car resellers and tank-wagon resellers in the same territory at different prices without injuring competition with the tank-car resellers or with their customers, petitioner should abandon the practice of selling to both of these classes of customers in the same marketing area. As a practical matter, Paragraph Six will not prevent petitioner from continuing to sell to Detroit wholesalers in tank-car quantities at tank-car prices. If petitioner notifies its three wholesaler customers that it will refuse to sell to them if they resell to retailers at less than the posted tank-wagon price, as petitioner may lawfully do, there can be little doubt that these wholesalers will comply. Since petitioner has chosen to engage in the dual method of operation in the Detroit Area, it must accept the responsibility and burden of seeing that the difference in the prices charged to its two classes of customers does not result in competitive injury. If it cannot do this, then it has the alternative of adopting the course followed by several of its competitors, of distributing its products in a single marketing area either through wholesalers or directly to retailers, but not by both methods.

IV. There is a practical continuity of movement of the petitioner's gasoline flowing through the Indiana refinery to petitioner's customers in Detroit, with no intermediate sales and with only such temporary physical interruptions to the flow as petitioner finds convenient for its own internal purposes as a corporation which distributes and sells its gasoline in fourteen states. The petitioner's storage tanks are merely the "throat" through which the "current of commerce" flowed from petitioner to its specific retailer customers in the State of Michigan. Petitioner's gasoline was transported in interstate commerce with the intention on the part of petitioner and its specific customers, in advance of transportation, that such gasoline would be delivered to its specific customers. The retail gasoline service stations under contract and lease and the stations operated by the four favored dealers were the intended final destination of the greater portion of this gasoline. The modern concept of commerce is one which gives full sweep to the commerce clause of the Constitution within the limits of the implementing statute, a liberal view of the Congressional purpose as expressed in the statute, and a realistic view of what business is doing as it moves across state lines to accomplish its purpose.

ARGUMENT

I

GOOD FAITH TO MEET AN EQUALLY LOW PRICE OF A COMPETITOR UNDER SECTION 2 (b) OF THE CLAYTON ACT, AS AMENDED, IS NOT A JUSTIFICATION FOR DISCRIMINATIONS IN PRICE WHICH HAVE THE INJURIOUS EFFECTS ON COMPETITION SPECIFIED IN SECTION 2 (a) OF THE ACT.

At the outset, since counsel for petitioner have referred to the position of the Commission relative to certain proposed legislation,[7] now pending in the Congress, quoting on page 31 of petitioner's brief a statement of the Commission in its letter of June 9, 1949, to Congressman F. E. Walter, Chairman, Subcommittee of the House Committee on the Judiciary, it seems necessary to clarify the Commission's position upon the legislative question by quoting further from the same letter,[8] as follows:

---

[7] S. 236, 81st Cong., 1st Sess. S. 1008, 81st Cong., 1st Sess.

> * * * It appears that there is some misunderstanding of the Commission's position on this matter. Therefore, the Commission has approved the following statement of its views. * * *
>
> The Commission does not object to the bill with the principle of the Kefauver amendments included therein, nor does it make elimination of these amendments a condition of its approval. * * *
>
> The amendments under discussion involve the question whether or not a price discrimination that injures competition is lawful if it is undertaken in good faith to meet the equally low price of a competitor. Without the Kefauver amendments, the bill would make good faith in such a discrimination a complete defense to a charge under section 2 (a) of the Clayton Act. * * *
>
> On June 7 representatives of the Commission informed you that all of the Commissioners believe that on balance it would be preferable to make the good-faith meeting of competition a complete defense. They endeavored to make clear, however, that the Commission regards the matter as one of selecting the balance of advantage upon a policy question as to which

---

[8] Hearings before Subcommittee No. 1 of the House Committee on the Judiciary on S. 1008, 81st Cong., 1st Sess., June 8 and 14, 1949. (U. S. Gov't Printing Office, 1949) p. 61.

> the two sides of the scale are very nearly equal, because whatever choice is made, some competition will be strengthened and other competition weakened. They sought to indicate, therefore, that *the Commission does not strongly urge either view upon the Congress.* * * * [Emphasis supplied.]

The Commission's order herein is based upon its construction and application of the existing law and this order has been unanimously upheld by the Court below. It is therefore submitted that the question of what the law should be is a legislative matter solely for the Congress, that the question before this Court for its decision is the validity or invalidity of the Commission's order under existing law, and that is the only question.

The petitioner contends as a complete justification that the discriminatory prices herein complained of were made in good faith to meet equally low prices of competitors. With respect thereto, the Commission, as reflected by Paragraph Thirteen of its findings, has found that: "Since the record in this case affirmatively shows that the discriminations in price in favor of the named jobbers and in favor of Ned's Auto Supply Company as a tank-wagon purchaser from September 1, 1936, to March 7, 1938, and as a tank-car purchaser thereafter, have resulted in injuring, destroying, and preventing competition between said favored dealers and retail dealers in respondent's gasoline and other major brands of gasoline, the Commission is of the opinion, and so finds, that the defense of meeting an equally low price of a competitor as provided by subsection (b) of section 2 of the Clayton Act is not available to the respondent on the basis of the present record."

The Commission's findings of actual injury to competition are supported by substantial affirmative evidence, and, before this Court, stand unchallenged and uncontradicted. In fact, it would be difficult to conceive a case of price discrimination more clearly in violation of the obvious intent of the Robinson-Patman amendment of the Clayton Act, unless, as contended by petitioner, the "good faith" proviso of Section 2 (b) of the Act is an absolute substantive defense to a charge of violation of Section 2 (a) in any case as a matter of law. Petitioner's contention that this proviso should be so construed and applied is controverted by the legislative history as well as by the language of the proviso.

Prior to June 19, 1936, when the Robinson-Patman Act went into effect, Section 2 of the Clayton Act, 38 Stat. 730 (1914) 15 U. S. C., Sec. 13 (1934), declared discrimination in price to be unlawful where the effect of such discrimination may be to substantially lessen competition or tend to create a monopoly in any line of commerce, with provisos permitting, among other things, discriminations in price "in the same or different communities made in good faith to meet competition." Under that proviso, proof establishing that a discrimination in price was made in good faith to meet competition may have been a complete substantive defense.

In framing the Robinson-Patman Act, Congress was concerned with the growth of chain stores and the use made of mass buying power to obtain price concessions from sellers greatly in excess of the concessions and allowances granted to their smaller competitors. It was recognized that Section 2 of the Clayton Act permitting discriminations in price in good faith to meet competition was vague, indefinite, and uncertain to such an extent that it was unenforceable in the very cases the statute was intended to reach. Under Section 2 of the original Clayton Act, a chain or other large buyer, merely by finding two or more sellers of like goods willing to grant to him the same preferential price, could obtain an unearned competitive advantage over his smaller competitors and neither the sellers nor the buyer would be subject to prosecution even though the ability of the smaller competitors to compete with the chain or other large buyer was injured or destroyed by such price discrimination.[9]

In these circumstances, as stated by the Court below, "Congress sought to change this bypass by changing the discriminatory price, made in good faith to meet the low price of a competitor, from a defense, as it then was, to a procedural aid to enable a seller to over-come the prima-facie case made by showing a difference in price to customers in the same community for goods of the same quality."[10]

In the instant case, Ned's Auto Supply Company was engaged exclusively in the retail sale of petitioner's gasoline direct to the consuming public through its own chain of gasoline stations. According to the petitioner's version, Ned's was able to induce other suppliers competing with the petitioner to offer to sell gasoline to Ned's in tank-car quantities at tank-car prices and that the petitioner had to do the same to meet competition regardless of the injurious effects upon competition at the retail level between Ned's and other retailer-purchasers of petitioner's gasoline. In other words, Ned's, although exclusively a retailer, was arbitrarily classified by petitioner as a wholesaler and given wholesale prices which petitioner did not make available to its other retail customers which resulted in injurious effects upon competition at the retail level. This presents the type of case which Congress found evaded the purpose of the original Clayton Act and also presents exactly the type of case which Congress enacted the Robinson-Patman Act to reach.

---

[9] See Sen. Rep. 1502, 74th Cong., 2d Sess., p. 3; H. Rep. 2287, 74th Cong., 2d Sess., p. 3; Final Report on the Chain Store Investigation, Sen. Doc. No. 4, 74th Cong., 1st Sess.

[10] 173 F. 2d 210 (C. A. 7, 1949).

The proposal that meeting competition in good faith be made an absolute justification for a discrimination in price otherwise prohibited was considered and rejected by Congress in the enactment of the Robinson-Patman Act. As originally introduced, the Robinson-Patman Act did not contain such a provision. In the Senate, a provision having that effect was proposed as an amendment to the Robinson-Patman bill. 80 Cong. Rec. 6426, 6435. In the House, the Judiciary Committee reported the Bill with the proviso substantially as enacted in Section 2 (b) of the present Act. 80 Cong. Rec. 8139. The Conference Committee rejected the Senate's version and approved the House amendment. The action on the provision was reported by the Conference Committee as follows:

> The Senate bill contained a further proviso: "That nothing herein contained shall prevent discrimination in price in the same or different communities made in

good faith to meet competition." This language is found in existing law, and in the opinion of the conferees is one of the obstacles to enforcement of the present Clayton Act. The Senate receded, and the language is stricken. A provision relating to the question of meeting competition, intended to operate only as a rule of evidence in a proceeding before the Federal Trade Commission is included in subsection (b) in the conference text as follows:

"*Provided, however,* That nothing herein contained shall prevent a seller rebutting the prima facie case thus made by showing that his lower price or the furnishing of services or facilities to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor, or the services or facilities furnished by a competitor."[11]

The Chairman of the House Conferees stated on the floor of the House as he presented the Conference report:

> * * * It is to be noted, however, that this does not set up the meeting of competition as an absolute bar to a charge of discrimination under the bill. It merely permits it to be shown in evidence. This provision is entirely procedural. It does not determine substantive rights, liabilities

---

[11] 80 Cong. Rec. 9414; H. Rep. 2951, 74th Cong., 2d Sess., pp. 6–7.

and duties. They are fixed in the other provisions of the bill. It leaves it a question of fact to be determined in each case, whether the competition to be met was such as to justify the discrimination given, as one lying within the limitations laid down by the bill, and whether the way in which the competition was met lies within the latitude allowed by those limitations.

* * * * *

* * * If this proviso were construed to permit the showing of a competing offer as an absolute bar to liability for discrimination, then it would nullify the Act entirely at the very inception of its enforcement; for in nearly every case mass buyers receive similar discriminations from competing sellers of the same product.

* * *[12]

The Robinson-Patman Act in Section 2 (a) made it unlawful to make a discriminatory price, as theretofore provided in Section 2 of the original Clayton Act, and kept as a defense the cost savings and other defenses of the original Clayton Act, but took out of the defense category the provision for making a lower price to meet competition. As to this, Section 2 (b) of the Robinson-Patman Act provided:

Upon proof being made, at any hearing on a complaint under this section, that

---

[12] Cong. Rec. June 15, 1936, p. 9418.

> there has been discrimination in price or services or facilities furnished, the burden of rebutting the prima facie case thus made by showing justification shall be upon the person charged with a violation of this section, and unless justification shall be affirmatively shown, the Commission is authorized to issue an order terminating the discrimination; *Provided, however,* That nothing herein contained shall prevent a seller rebutting the prima facie case thus made by showing that his lower price or the furnishing of services or facilities to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor, or the services or facilities furnished by a competitor.

In this amendment, it appears to us, as it did to the Court below, that the "intent of Congress is clear and the language used to express its intent, * * * is not ambiguous." Further, we are also of the opinion that this Court has expressed the view that Section 2 (b) is as the Conference Report says it was intended to be in *Trade Comm'n v. Staley Co.,*[13] which reversed the Court below in *A. E. Staley Mfg. Co.* v. *Federal Trade Commission,*[14] where the Court below had held that the prima facie case had been rebutted.

In the *Staley* case, this Court, speaking through Chief Justice Stone, in part, stated:

---

[13] 324 U. S. 745 (1945).

[14] 144 F. 2d 221 (C. A. 7, 1943, 1944).

> It will be noted that the defense that the price discriminations were made in order to meet competition, is under the statute a matter of "rebutting" the Commission's "prima facie case." Prior to the Robinson-Patman amendments, Sec. 2 of the Clayton Act provided that nothing contained in it "shall prevent" discriminations in price "made in good faith to meet competition." The change in language of this exception was for the purpose of making the defense a matter of evidence in each case, raising a question of fact as to whether the competition justified the discrimination.

This Court has thus held that the "good faith" proviso of Section 2 (b) does not provide a substantive justification for violation of Section 2 (a); that proof of meeting competition in good faith is sufficient to rebut only a prima facie case of violation of Section 2 (a) and, beyond that, is merely evidence to be considered by the Commission with other evidence in determining as a question of fact in each case whether the seller's competition justified the discrimination in price.

In order to determine whether the meeting of competition justified the discrimination, the Commission must consider the effect of the discrimination as well as the competition met by the seller, since proof that competition was met in good faith is sufficient to rebut a prima facie case.

It follows that, such proof having been made, the Commission can no longer rely upon the inference of injury to competition drawn from the prima facie case and the injurious effect of the discrimination must be affirmatively shown. But when the discrimination is proved by affirmative evidence to have had any of the effects on competition specified in Section 2 (a), the Commission may find on all the evidence that the fact that the seller's lower price was made in good faith to meet its own competition was not sufficient to justify a discrimination in price resulting in substantial injury to competition between its customers at the retail level.

The action of Congress in deliberately taking the "good faith" proviso out of Section 2 of the original Clayton Act, where it was a substantive defense and by transferring it to Section 2 (b), where it was made a procedural section of the Robinson-Patman Act, discloses in itself the intention of Congress to reduce the legal status of the proviso from that of a substantive defense to the status of an evidentiary matter that may or may not be applicable on the merits of a charge of unlawful price discrimination.

There is nothing difficult in construing the application of the procedural provisions of Section 2 (b) if consideration is first given to the several elements of an unlawful discrimination in price under Section 2 (a) of that Act. These elements may, for convenience, be divided as follows: (1) Jurisdiction, (2) goods of like grade and quality, (3) discrimination in price, and (4) the adverse effects upon competition.

The Court of Appeals for the Second Circuit in *Moss* v. *Federal Trade Commission*,[15] has held in effect that once the Commission has shown that a respondent has charged two prices, Section 2 (b) then shifts the burden of proof to the respondent to prove that the lower price did not have an injurious effect upon competition. This case does not, as we understand it, hold that the "good faith" proviso of Section 2 (b) is a defense to all charges of unlawful price discrimination under Section 2 (a). It holds only that a lower price discrimination made in good faith to meet competition, standing alone, may be a defense. However, in the instant case, the Commission went further and established by affirmative evidence that the petitioner's discriminations in price to the four favored customers did have the effect substantially to lessen competition or to injure, destroy or prevent competition. While it would have been necessary for the Commission to prove only that such discrimination in price may have that effect,[16] the Commission has established in the instant case that petitioner's discriminations in price have had an injurious effect on competition beyond that required under Section 2 (a) of the Clayton Act, as amended.

---

[15] 148 F. 2d 378 (C. A. 2, 1944), cert. den. 326 U. S. 734.

[16] *Federal Trade Commission* v. *Morton Salt Co.*, 334 U. S. 37 (1948).

The first half of Section 2 (b) provides that "upon proof being made, at any hearing on a complaint under this section, that there has been discrimination in price * * * the burden of rebutting the prima-facie case thus made by showing justification shall be upon the person charged with a violation of this section, and unless justification shall be affirmatively shown, the Commission is authorized to issue an order terminating the discrimination."

This part of Section 2 (b), in the light of the *Moss* and *Morton Salt* cases, clearly means that proof of discrimination in price without proof of the adverse effects specified in Section 2 (a) makes a prima-facie case of unlawful discrimination and that the burden of rebutting the prima-facie case thus made by showing justification shall be upon the person charged with a violation. The word "justification" clearly refers to the substantive defenses made available by the provisos of Section 2 (a) and the provision relative to meeting an equally low price of a competitor in good faith is not included in that section..

The second half of Section 2 (b) states: "*Provided, however,* That nothing herein contained shall prevent a seller rebutting the prima-facie case thus made by showing that his lower price * * * to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor * * *." Such a showing is not referred to as and manifestly is not intended to be a "justification" for price discrimination. And neither 2 (a) nor 2 (b) provides, as did Section 2 of the original Clayton Act, "that nothing herein contained shall prevent discrimination in price * * * made in good faith to meet competition." It is clear that the effect of the "good faith" proviso of 2 (b) extends only to the matter of "rebutting the prima-facie case," thereby shifting the burden of proof to the Commission on the issue of whether the discrimination has or may have any of the effects specified in Section 2 (a). The Commission must then resolve that issue, not by inference drawn from the mere fact of discrimination in price, but upon all the affirmative evidence, giving due weight to the fact, if proved, that the seller's lower price was made in good faith to meet his competitor's price.

Actually the entire Section 2 (b) is procedural and deals only with the shifting of the burden of proof and the rebuttal of a prima-facie case. Since the term "discrimination in price" was used in connection with the term "the prima-facie case," Congress evidently did not intend the term "discrimination in price" to refer to all of the elements of unlawful discrimination in price including the effects upon competition as set forth in Section 2 (a). It clearly appears that the term "discrimination in price" as used in Section 2 (b) does not include, and, as held in the *Moss* and *Staley* cases, Section 2 (a) does not require affirmative proof of actual injury to competition when the other elements of an unlawful price discrimination are established. Other interpretations would make Section 2 (b) appear meaningless, for to require affirmative proof of the adverse effects of the discrimination in price upon competition, before the prima-facie case exists, is to make no distinction whatever between proof of a "discrimination in price" as "a prima-facie case" and proof of all of the elements of an unlawful discrimination in price. It is the proof of a "discrimination in price" as that term is used in Section 2 (b) and not proof of all of the elements of an unlawful discrimination in price, as set forth in Section 2 (a), which prima-facie makes the Commission's case. If proof of good faith in meeting an equally low price of a competitor is made, the Commission could no longer rely upon a prima-facie case, but must show by additional and affirmative evidence that the effect of the discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce or to injure, destroy or prevent competition between the discriminator and its competitors or between customers of the discriminator or with the customers of such customers.

This construction of Sections 2 (a) and 2 (b) we submit correctly and clearly demonstrates that where, as in the instant case, the adverse effects upon competition have been affirmatively established, proof of good faith in meeting an equally low price of a competitor under the proviso of Section 2 (b) does not constitute a substantive justification for the petitioner's discriminations in price. This is particularly true where, as in the instant case, the competition injured is retail competition between competing purchasers, since the fact that the seller acted in good faith to meet the price of the seller's competitor is not inconsistent with, and does not logically rebut, the proof that retail competition between competing purchasers is injured by the discrimination.

Considering further the construction and application of Sections 2 (a) and 2 (b) of the Clayton Act, as amended, the term "good faith" as used in Section 2 (b) presumably means an honest and reasonable belief that the seller is meeting the equally low price of a competitor. By conceding that such belief exists and consequently such good faith, still the question would remain as to whether that proviso is a complete and substantive defense to an otherwise unlawful discrimination.

In considering the issue whether good faith to meet an equally low price of a competitor is a complete justification of a discrimination in price otherwise unlawful under Section 2 (a), some of the analogous concepts of the criminal law may be helpful. Even in criminal law, the accused is presumed to intend the natural and probable consequences of his acts. Moreover, even though a person does not specifically intend the consequences which flow from his acts, he is criminally responsible for them if they are the natural and probable consequences. Therefore, it follows that to give a discriminator under Section 2 (a) complete absolution because he does not specifically intend to injure or prevent competition is to give him a greater freedom from legal responsibility for the consequences of his acts than is found in the criminal law.

Again in criminal law there is a clear distinction between motive and intent. Intent to do the thing that is done is a necessary ingredient of a criminal offense, but, as before indicated, that intent may readily and even conclusively be presumed. But if the thing done be unlawful, good motive is not a justification although it may be relevant in certain cases on the issue of whether the accused actually did the thing with which he is charged.

"Good faith" as used in Section 2 (b) is more analogous to motive than it is to what the criminal law calls intent. In that view of the matter, Section 2 (b) merely permits the showing of good motives in explanation or in mitigation of the offense charged under Section 2 (a). This seems to be the view of Congressman Wright Patman, who, in discussing the "good faith" proviso of Section 2 (b) in Chapter 3 of his book entitled "The Robinson-Patman Act," stated:

> The Robinson-Patman Act prohibits unfair differentials in the price charged by a manufacturer or wholesaler to his several customers in competition with one another, but provides that if one seller shall meet an equally low price of a competitor in good faith with no subservient intent to circumvent other provisions of the Act, he may cite that fact in mitigation of his violation of other provisions. Some have erroneously interpreted this proviso as one granting the right to discriminate in price to meet competition.
>
> The proviso [in section 2 (b) of the present Act] does not permit price discrimination to meet competition. It does not so state. It merely grants to the accused, in defense of a charge of having violated the Act, the opportunity to offer in rebuttal, as a mitigating circumstance, evidence that he may have engaged in an unlawful discrimination in order to meet competition.

Logically there appears to be no more reason why the good motive of meeting the equally low price of a competitor should be a complete justification than that good motive should be a complete justification in a criminal case. To conclude otherwise is to assume that for some unstated reason the public interest requires the acceptance of justification by motive where injury to competition is involved but requires its rejection where criminal and conventional trespassers on property rights are involved. Again, to conclude otherwise is to assume that the public interest in maintaining a competitive economy is of a lower order of importance than the public interest in protecting society against criminal offenses.

In *United States* v. *Aluminum Co.*,[17] Circuit Judge Learned Hand said with regard to the necessary intent under the Sherman Act that "to read the passage as demanding any 'specific intent' makes nonsense of it, for no monopolist monopolizes unconscious of what he is doing." Judge Hand defines specific intent as "an intent which goes beyond the mere intent to do the act." (Id.) In the same way, it would make nonsense of Section 2 (a) of the Clayton Act, as amended, to interpret it as requiring a specific intent for no discriminator discriminates unconscious of what he is doing, and he is conclusively presumed to be conscious also of its reasonably probable consequences. Legally speaking whatever line of reasoning makes nonsense of Section 2 (a) is, of course, itself nonsense. What then shall be said of a line of reasoning which insists not only that a specific intent must be read into Section 2 (b) but that when so read it becomes a complete and substantive defense to a violation of Section 2 (a) although 2 (a) requires no intent whatever except to do the act there prohibited and to produce its natural, probable consequences? Such reasoning amounts to saying that Sections 2 (a) and 2 (b) are mutually contradictory and the practical result is that Section 2 (b) would be taken as being paramount to Section 2 (a).

---

[17] 148 F. 2d 416, 432 (C. A. 2, 1945).

If the words "good faith" as they appear in Section 2 (b) are to be given a subjective meaning by imputing a specific intent then there is nothing to prevent Section 2 (a) from also being given a subjective meaning by imputing a specific intent to injure or prevent competition. This raises the question whether "good faith," as used in Section 2 (b) serves any purpose other than emphasis, although even assuming that the term serves some other purpose, the question remains whether subjective and specific intent shall prevail. If the words "good faith" were not in Section 2 (b), it might be necessary to read them into the language "to meet the equally low price of a competitor." But even though this were necessary, it would merely raise the question whether there was reasonable ground to believe that the discrimination was occasioned by the equally low price of a competitor. Unless there is reasonable ground for such belief, "good faith" in any objective legal sense cannot exist.

So the conclusion is reached that the words "good faith" really add nothing to Section 2 (b) and we must face the question whether the reasonable probability that the discrimination was in order to meet the equally low price of a competitor shall override the reasonable probability under Section 2 (a) that the discrimination will injure or prevent competition. No one would contend that Section 2 (a) requires any specific intent to injure or prevent competition. In this connection, it is well to remember that the "good faith" referred to in Section 2 (b) has no grammatical or logical connection with the acts prohibited under Section 2 (a) but only with meeting the equally low price of a competitor. That is by sharp contrast with Section 2 of the original Clayton Act which provided that "nothing herein contained shall prevent discrimination in price" which was "made in good faith to meet competition." Even then the burden of proof on that question was on the one claiming the benefit of such exemption. So the question obtrudes as to why "good faith" should be read back into Section 2 (a) by interpretation as the substantive defense and complete justification that it once was, after Congress moved it over into Section 2 (b) and gave it the status of a rebutting factor in a prima facie case.

At present, Section 2 (b) merely provides that such "good faith" may be shown in rebuttal of a prima facie case of discrimination. However, assuming arguendo that this provides a complete justification for a discrimination otherwise unlawful, where does this logically lead? If we apply the elementary principle that a person must be taken to have intended the reasonable consequences of his acts, it follows that if there be a reasonable probability that his price discriminations substantially injure or prevent competition or tend to create a monopoly then he must be taken to have intended such consequences. The fact that such person may also be meeting the equally low price of a competitor cannot logically relieve him of having intended a reasonably probable injury to competition. Possibly this might not follow if that fact were such as to preclude the reasonable probability that he is injuring competition. But obviously the fact that he may be discriminating to meet the equally low price of a competitor does not preclude such a probability.

The logical conclusion from this reasoning is not only that the forbidden injury to competition and good faith to meet an equally low price of a competitor may exist side by side, but that the imputed intent to injure competition may coexist with such imputed "good faith." This poses the ultimate issue whether the public interest in protecting competition against discriminatory pricing shall prevail over an individual seller's interest in discriminating in price in order to meet the equally low price of a competitor. It is not difficult to see that if the individual seller's interest be held to prevail as a matter of law, then Section 2 (a)'s prohibition of discriminatory pricing becomes largely a nullity and Sections 2 (a) and 2 (b) taken together become for the most part merely a declaration of the individual right to discriminate.

In concluding the discussion of this question, we wish to emphasize that the Commission has not conceded as a fact that petitioner's discriminations in price were in good faith to meet equally low prices of competitors. If it is inferred that the Commission has conceded this fact, such concession must be considered only for the purpose of this decision and not as a concession of actual fact.

The Commission has not considered petitioner's "good faith" as a factual issue and has made no finding of fact thereof. If this issue had been considered, the Commission may well have made a vigorous interpretation of the "good faith" proviso of Section 2 (b). For illustration, the Commission, in passing upon this issue, would undoubtedly have considered, among others, the following: (1) That petitioner granted a preferential price only to those purchasers that petitioner desired to classify as "jobbers"; (2) that competing offers made to Citrin by certain major oil companies include The Gulf Refining Company and The Texas Company against whom the Commission has pending charges of unlawful price discrimination[18] in the Detroit Area during the period involved in the instant case; (3) that there is no evidence of any competing offers to Stikeman or Wayne at any time prior to the issuance of the complaint herein; (4) that there is no proof that any of the persons who made alleged competing offers were authorized to act in that capacity, with the exception of offers to Ned's by Red Indian Oil Company, relating to Fleetwing gasoline, a non-major brand; (5) that the majority of alleged competing offers were from non-major companies and in some cases from companies selling unbranded gasoline or companies which had no distribution in Detroit; and (6) that with the exception of the offer by Red Indian Oil Company, there is no proof of any competing offer to Ned's which was open to acceptance in the Fall of 1936 and in March 1938. Again, the Commission may well have considered the objective test of injury as the only practicable way of determining the petitioner's "good faith," since a subjective interpretation of "good faith" would only make that term analogous to such terms as "with a pure heart" or "in good conscience."

---

[18] *In the Matter of The Gulf Refining Company*, F. T. C. Docket No. 4390; *In the Matter of The Texas Company*, F. T. C. Docket No. 4391.

If this Court should conclude that the Commission erred in its interpretation of Section 2 (b) and that the judgment affirming its order should, therefore, be set aside, this should not result in a decision permitting the petitioner to continue its discriminations in price if, in fact, the petitioner is not in good faith meeting equally low prices of competitors. On the contrary, in that event, it is submitted that the Court should direct that this case be remanded to the Commission for determination of the issue of "good faith" tendered by the petitioner under Section 2 (b).

"Congress has left to the Commission the determination of fact in each case whether the person, charged with making discriminatory prices, acted in good faith to meet a competitor's equally low prices. The determination of this fact from the evidence is for the Commission." *Federal Trade Commission* v. *Staley Manufacturing Co.*[16] In the present case the Commission failed to make such factual determination upon the ground that it was immaterial (R. 5179), because the Commission was of the opinion that under the circumstances of this case the petitioner had violated the statute even if its lower prices had been made in good faith to meet equally low prices of competitors. If the Commission's assumption as to

---

[19] 324 U.S. 746, 758 (1945).

the law should prove to be unfounded, it is for the Commission, rather than a reviewing court, to determine initially whether the petitioner has sustained the burden of establishing that it is within the proviso of Section 2 (b).

Where the question presented was whether the prohibitions of an order of the Commission exceeded the limits of its discretionary authority respecting relief, this Court held that the courts should not pass upon this question until the Commission had reconsidered the question of relief in the light of a relevant factor which the Commission had not passed upon when the case was before it. *Jacob Siegel Co.* v. *Federal Trade Commission.*[20] *A fortiori,* the cause should be remanded to the Commission where, as in this case, it had concluded that certain conduct was illegal without having made a factual determination material to its ruling as to illegality. *Federal Communications Commission* v. *Pottsville Broadcasting Co.,*[21] Cf., Mr. Chief Justice Taft and Mr. Justice Brandeis "doubting," in *Federal Trade Commission* v. *Curtis Publishing Co.*[22]

II

SECTIONS 2 (a) AND 2 (b) OF THE CLAYTON ACT, AS AMENDED, MEET ALL REQUIREMENTS OF CONSTITUTIONAL DUE PROCESS WHEN CONSTRUED AS NOT MAKING GOOD FAITH TO MEET AN EQUALLY LOW PRICE OF A COMPETITOR AN ABSOLUTE JUSTIFICATION FOR PRICE DISCRIMINATIONS WHICH INJURE OR DESTROY COMPETITION OR WHICH TEND TO CREATE MONOPOLY

Petitioner contends that the construction of the Commission and of the Court below to the effect above stated cannot be confirmed by this Court without contravening the due-process clause of the fifth amendment to the Constitution. Accordingly petitioner's position is that it has a Constitutionally vested right to discriminate in price when meeting the equally low price of a competitor no matter how much injury may be done to competition. Such a position is equivalent to a contention that the Constitutional power of Congress to regulate commerce among the several states is limited by an inherent and inalienable private right to discriminate in price when done in good faith to meet an equally low price of a competitor. Section 2 (b) as thus construed by petitioner is elevated to the status of a Constitutional guarantee. If that process of elevation is valid, the due-process clause of the Constitution would become a limitation on the Interstate Commerce Clause and on the Constitutional power of Congress to regulate such commerce.

The presumptions against the soundness of such a startling result are of the most cogent character. Where the constitutionality of an act of the legislature is doubtful the courts adopt the principle of resolving those doubts in favor of such presumptions. Only if and when the unconstitutionality of the legislation is clear and palpable do the courts undertake to declare it void under the fundamental law of the land. A corollary to these judicial principles is that in choosing between one construction of the statute which would make it constitutional and another construction which would make it unconstitutional, the courts will invariably choose the former. Of course, we do not suggest that petitioner's construction would make the statute unconstitutional; we have merely insisted that such a construction would make it ineffectual. However, we do suggest that the same considerations which induce the courts to adopt a construction that would make a statute constitutional as against one that would make it unconstitutional should induce them also to adopt a construction that would make this statute an effective rather than an ineffective instrument for protection of the competitive system against injurious discrimination.

The fifth amendment simply provides that "no person" shall "be deprived of life, liberty or property without due process of law." When petitioner invokes the protection of that amendment it is tantamount to claiming that price discrimination either is a form of freedom of contract which cannot be interfered with by Congress if done in good faith to meet an equally low price of a competitor or that such discrimination is a property right of similar sanctity. But even though price discrimination were to be regarded as a constitutional right, it is protected by the Constitution only against deprivation "without due process of law." We submit that if there be any deprivation of liberty or property here involved it would occur only through due process of law. Congress enacted the Clayton Act and the Robinson-Patman Act pursuant to its plenary and exclusive power to regulate commerce among the several states. It set up an agency to hear and determine the facts concerning price discrimination and to enter an appropriate order to cease and desist whenever such facts showed a violation of the Congressional prohibition. Congress provided for a complete judicial review of such orders on questions of law and a limited review on questions of fact quite similar to that long followed by appellate courts in reviewing the verdicts of lay juries. So far as the process by which petitioner's supposed rights are being challenged it would be difficult if not impossible to provide a process that embodies more complete and equitable protection to private rights. To support its challenge to the constitutionality of the statute as construed by the Commission and the court below in this case, petitioner must point out some constitutional defect in the process which Congress established for dealing with the problem of destructive price competition in interstate commerce. Otherwise there is no constitutional question but merely one of statutory construction.

For the purpose of making still plainer our position on the constitutional question we are of the opinion that the statute does not approach the limits of constitutional authority to deal with price discrimination in interstate commerce. We believe that if Congress had seen fit to ban all discriminations in price without regard to the effect in a given case, it would have acted within it constitutional prerogative. We believe that if Congress had not seen fit to make due allowance for specified differences in cost a complete justification for price discrimination, it could have omitted such justification from the act without constitutional objection. By the same token it could have transferred the cost defense to Section 2 (b) as it did transfer the good faith defense and thus have made of it merely a rebuttal to a prima-facie case under Section 2 (a). These observations may serve to illuminate the fact that although petitioner's objection is couched in terms of constitutionality, it really incarnates no more than petitioner's concept of what is good public policy with regard to price discrimination. That concept may be presumed to rest in turn upon petitioner's economic philosophy. In either event the alleged constitutional question resolves itself into the question whether Congress acted wisely and for the general public interest if it actually did what we say Congress intended to do under our construction of the good faith clause of Section 2 (b). No matter how unwisely Congress may be thought to have acted if that construction of the statute be adopted, such lack of wisdom is not unconstitutional. There have been many statutes which the courts have upheld against attack on constitutional grounds despite doubt, disbelief or even disdain on the part of the judges concerning the wisdom of the legislation. All arguments that because the economic effects of our construction would be fundamentally bad or inequitable, Congress did not in fact legislate as the Commission and the Court below say it did, are not relevant on the matter of legislative power. They go only to the matter of legislative intent which is a matter of statutory construction.

To support its contention of unconstitutionality under the fifth amendment petitioner relies heavily if not exclusively on the case of *Fairmont Creamery Co.* v. *Minnesota.*[23] In that case this

---

[23] 274 U. S. 1 (1927).

Court in an opinion by Mr. Justice McReynolds but with Justices Stone, Holmes, and Brandeis dissenting, set aside a state statute as an encroachment on the liberty of contract protected by the fourteenth amendment because the statute undertook to prohibit discrimination in prices for butterfat paid in different localities by centralized creameries. The fourteenth amendment imposes the same restriction upon the states with regard to deprivation of life, liberty, or property without due process of law that the fifth amendment imposes on the Federal government. The state statute which was set aside in the *Fairmont* case was an amended statute declaring discrimination in prices paid unlawful regardless of the purpose of such discrimination or its effect in destroying competition or creating monopoly. The state explained the reasons for such an amendment by informing the Court as follows:

> In 1923 the legislature amended the law by striking therefrom the ingredient of intent or motive, thus making it an offense to discriminate in prices between localities, except as affected by the cost of transportation, whether done for the purpose of creating a monopoly or destroying competition or not (chapter 120). It was designed to meet and correct the same evils as the old statute. It must be assumed that in the judgment of the legislature the remedy prescribed by the old law was ineffectual to accomplish the de-

> sired results. The State, having found the old law ineffective to prevent the evil because of the almost impossibility of proving by competent evidence that price discrimination between localities was for the purpose of creating a monopoly, determined in its legislative judgment to prohibit discrimination between localities without regard to intent or motive (Id. 2-3).

In his opinion, Mr. Justice McReynolds quoted from the Minnesota Supreme Court opinion which had upheld the amended statute to the following effect:

> A centralized creamery, supplied with ample capital and facilities, has the ability and meets the temptation to destroy competition at a buying station by overbidding, absorbing the resultant losses, if any, through the profits of its general business and, when competition is ended, to buy on a noncompetitive basis. If it does all this successfully, it has a monopoly, and may or may not treat producers justly. The statute seeks to prevent the destruction of competition by forbidding overbidding unless the dealer makes prices at other buying points correspond after proper allowances for the cost of transportation. If the statute is obeyed destroying competition is expensive. The statute limits the right of the creamery to contract at its buying points on a basis satisfactory to itself and its patrons. The

State must concede this, and it does (Id. 7).

This Court further said that "it seems plain enough that the real evil supposed to threaten the creamery business was payment of excessive prices by powerful buyers for the purpose of destroying competition." Nevertheless, the Court held also that "the inhibition of the statute has no reasonable relation to the anticipated evil—high bidding by some with purpose to monopolize or destroy competition." The Court also declared that "buyers in competitive markets must accommodate their bids to prices offered by others," and the payment of different prices in different localities "does not ordinarily produce evil consequences but the reverse," and that the statute prevented "plaintiff in error from carrying on its business in the usual way heretofore regarded as both moral and beneficial to the public and not shown now to be accompanied by evil results as ordinary incidents" (Id. 8–9).

There is reason to believe that the decision and opinion in the above case were not based upon any clear and palpable lack of due process but rather that it was a reflection of the views of a divided court on the economic unwisdom of the state statute which was set aside. The question whether the statutory inhibition had any reasonable relation to the anticipated evil was a question of legislative wisdom and not of legislative power and in any event the opinion itself as above indicated recognized that there was such a relation. Whether the discrimination prohibited by the state statute produced evil consequences or the reverse was likewise a legislative and not a Constitutional or judicial question. Whether the practice or discrimination forbidden by the statute should continue to be regarded by the state as "both moral and beneficial to the public" was definitely within the legislative province.

If the *Fairmont* case be taken as authority for setting aside the amended State statute because of the alleged lack of relation between the evil and the statutory remedy and as authority for concluding that the original statute would not have been set aside because it was limited to discriminations having the purpose and effect of destroying competition or creating monopoly, then Sections 2 (a) and 2 (b) of the statute here involved are distinguishable from the decision in the *Fairmont* case. For the present statute does not prohibit all discrimination in price as the amended Minnesota statute did. It prohibits only such discrimination as injures or prevents competition or tends to create monopoly. It thereby supplies the relation between the evil and the statutory remedy which the Court held was absent in the *Fairmont* case.

The *Fairmont* case appears less applicable as a precedent when viewed in the light of the prior decision of this Court in *Central Lumber Com-*

pany v. *South Dakota.*[24] There the Court in a unanimous opinion by Justice Holmes (who dissented in the *Fairmont* case) upheld the constitutionality of a State statute which prohibited discrimination in price between different communities and sections of the State "after equalizing the distance from the point of production." The Court said:

> We must assume that the legislature of South Dakota considered that people selling in two places made the prohibited use of their opportunities and that such use was harmful, although the usual efforts of competitors were desired. It might have been argued to the legislature with more force than it can be to us that recoupment in one place of losses in another is merely an instance of financial ability to compete. If the legislature thought that that particular manifestation of ability usually came from great corporations whose power it deemed excessive and for that reason did more harm than good in their State, and that there was no other case of frequent occurrence where the same could be said, we cannot review their economics or their facts. That the law embodies a widespread conviction appears from the decisions in other States. *State* v. *Drayton,* 82 Nebraska, 254. *State* v. *Standard Oil Co.,* 111 Minnesota 85; 126 N. W. Rep. 527. *State* v. *Fairmont Cream-*

---

[24] 226 U. S. 157 (1912).

ery, 153 Iowa, 702; 133 N. W. Rep. 895. *State* v. *Bridgeman & Russell Co.,* 117 Minnesota, 186; 134 N. W. Rep. 496.

The statute involved in the *South Dakota* case prohibited discrimination "intentionally, for the purpose of destroying the competition of any regular, established dealer * * * or to prevent the competition of any person who in good faith intends and attempts to become such dealer" (Id. 159). The statute here involved defines the competitive injury in terms of effect rather than of purpose or intent but such purpose or intent may be inferred if necessary from the elementary principle that one is presumed to intend the reasonable consequence of his acts. While the Minnesota statute by amendment had eliminated purpose as an element of the offense, that can hardly account for the difference in the two decisions. In the *Minnesota* case the Court set the statute aside although saying that it was "plain enough" that the statute was aimed at the evil of payment of excessive prices by powerful buyers for the purpose of destroying competition.[25] In the light of the decision in the *Central Lumber Co.* case, the inference again suggests itself that what the Court thought was unconstitutional in the *Fairmont* case was really nothing more than it thought was bad public policy and unsound economics.

Among the cases cited with approval by this Court in upholding the South Dakota statute in the *Central Lumber Company* case was *State* v. *Fairmont Creamery Co.* of Nebraska.[26] There the Supreme Court of Iowa had upheld the constitutionality of an Iowa statute quite similar to the Minnesota statute which this Court set aside some fifteen years later. The Iowa Court had made certain observations quite in keeping with those made by this Court in upholding the South Dakota statute as follows:

---

[25] 274 U. S. 1, 8 (1927).

> The particular methods which are condemned by the legislative act under consideration are set forth therein. It is quite manifest that a company sufficiently large in its capital and in the scope of its business could obtain a monopoly for itself in whatever territory it chose, by adopting the methods which are enumerated and prohibited in the statute. The temporary maintenance of artificial prices for the sole purpose of destroying a weaker competitor and creating a monopoly is one of the modern evil inventions. All that is required for its sure success is that there be great inequality of financial resources in favor of the offending party. A multitude of people buy milk and cream for immediate consumption. Comparatively few buy milk and cream "for the purpose of manufacture." To the multitude who buy for immediate consumption, a monopoly would be quite impossible, and its

---

[26] 153 Iowa 702.

> attempt quite absurd. But those who buy milk and cream "for the purpose of manufacture" sustain a distinctly different relation to the trade and to the community in which they operate. The magnitude of their operations is limited only by the magnitude of their resources. The motive to monopolize is present as well as the ability to reap its fruits when acquired. In the nature of the case, the discriminations which are condemned in the legislative act are practicable as a practice only to those who engage in the business on a large scale. We are impressed, therefore, that the classification adopted is one which arises quite naturally, and that it rests upon a substantial and practical distinction. Subsequently the same reasoning is applicable to those persons who "buy poultry, eggs, and grain for storage." The argument may require modification in its detailed application to the latter class; but we will not dwell longer upon it. (133 N. W. Rep. 898–899.)

Petitioner characterizes its alleged right to discriminate in good faith to meet an equally low price of a competitor as "a basic right" and one "of first significance in our competitive system." It makes that claim regardless of any adverse effect on competition or tendency to create monopoly. Petitioner even claims this as a basic constitutional right of first significance despite its admission in the same connection that the lower price which it had met in Detroit was a non-discriminatory price.[27] No matter how plausibly petitioner may state its position in essence it is a bold assertion of a Constitutional right to discriminate in price to meet an equally low price of non-discriminating competitors despite the destruction of such competitors and the death of competition itself which may ensue. It embodies an assertion of the Constitutional right of a business to get bigger and bigger by a process of constantly getting more money per unit of goods from some customers than from others, utilizing the profits from such discrimination to force competitors to follow its price leadership. Except for the intangible subjective halo of good faith it is an assertion of the same right to discriminate in price which the old Standard Oil Company employed so ruthlessly before it was dissolved and because of which Section 2 of the Clayton Act was originally enacted. As the Honorable Louis D. Brandeis said in testifying to the need for such legislation before becoming a member of this Court, price discrimination was the most powerful of all weapons used by Standard except railroad rebates. He said it "would cut the price in the districts where a competitor established himself, and thus destroy him, meanwhile reimbursing himself for the cut in that region by charging high prices tinuity of movement" from out of state manufacturer through the wholesaler to the consumer. The Court, speaking through Mr. Justice Douglas, said, at page 567:

---

[27] Petitioner's brief supporting Writ of Certiorari, pp. 5, 6.

> The opinion of the Circuit Court of Appeals is susceptible of the interpretation that such a pause at the warehouse is sufficient to make the Act inapplicable to the subsequent movement of the goods to their intended destination. We believe, however, that view would result in too narrow a construction of the Act.

And again at page 568:

> The entry of the goods into the warehouse interrupts but does not necessarily terminate their interstate journey. A temporary pause in their transit does not mean that they are no longer "in commerce" within the meaning of the Act. As in the case of an agency (cf. *De Leach* v. *Crowley's, Inc.*, 128 F. 2d 378) if the halt in the movement of the goods is a convenient intermediate step in the process of getting them to their final destinations, they remain "in commerce" until they reach those points. Then there is a practical continuity of movement of the goods until they reach the customers for whom they were intended. That is sufficient. Any other test would allow formalities to conceal the continuous nature of the interstate transit which constitutes commerce.

And again at page 569:

> If there is a practical continuity of movement from the manufacturers or suppliers without the state, through respondent's warehouse and on to customers whose prior orders or contracts are being filled, the interstate journey is not ended by reason of a temporary holding of the goods at the warehouse. The fact that respondent may treat the goods as stock in trade or the circumstance that title to the goods passes to respondent on the intermediate delivery, does not mean that the interstate journey ends at the warehouse. The contract or understanding pursuant to which goods are ordered, like a special order, indicates where it was intended that the interstate movement should terminate. Numerous authorities are pressed on us for the contrary view and for the conclusion that when the goods enter the warehouse, they are no longer "in commerce".

And again at page 570:

> We do not mean to imply that a wholesaler's course of business based on anticipation of needs of specific customers, rather than on prior orders or contracts, might not at times be sufficient to establish that practical continuity in transit necessary to keep a movement of goods "in commerce" within the meaning of the Act. It was said in *Swift & Co.* v. *United States*, 196 U. S. 375, 398, that "commerce among the States is not a technical legal conception,

> but a practical one, drawn from the course of business." While that observation was made apropos of the constitutional scope of the commerce power, it is equally apt as a starting point for inquiry whether a particular business is "in commerce" within the meaning of this Act.

And again at page 571:

> The fact that all of respondent's business is not shown to have an interstate character is not important. The applicability of the Act is dependent on the character of the employees' work. *Kirschbaum Co.* v. *Walling*; [316 U. S. 517, 524]. If a substantial part of an employee's activities related to goods whose movement in the channels of interstate commerce was established by the test we have described, he is covered by the Act. Here as in other situations (*Kirschbaum Co.* v. *Walling, supra,* p. 523) the question of the Act's coverage depends on the special facts pertaining to the particular business.

The Clayton Act, as amended, is, like the Federal Trade Commission Act, supplementary to the Sherman Act, and, like the Sherman Act, is designed to protect the public from abuses arising in the course of competitive interstate and foreign trade. Its paramount aim is the protection of the public from evils likely to result from destruction of competition or the restriction of it in a substantial degree. This Act fits into the broad pattern of anti-monopolistic and anti-trust laws enacted by Congress to protect the general public, and competition, from acts and practices which by their very nature are destructive of that free and open competition which is the life blood of a healthy competitive system such as is essential and necessary to the economic welfare of this country.

The commerce referred to in the Clayton Act should not be examined through the small end of field glasses; and the "in interstate commerce" clause, as used in the Act, is not, and should not be, construed as, a technically phrased tax provision which requires a narrow, strict, legal interpretation; nor should the judicial microscope be so finely adjusted that the field of vision is narrowed and restricted to exclude from consideration all and every element of petitioner's business activities (relating to its distribution of gasoline in the Detroit Area) except those that are plainly obvious and without the least uncertainty, related to the actual transportation and movement of gasoline in *uninterrupted and continuous transit from Whiting, Indiana,* to the gasoline service stations here involved in Detroit. Such technical and microscopic examination would restrict the construction and application of the Act so as to destroy completely its effectiveness, and it would nullify the efforts of this Commission to carry out the will of Congress as expressed by said Act and would open the way for the petitioner and other large corporations to departmentalize their business, arrange the physical movement of their products so that there would always be a break in the continuity of transit at a warehouse, thus interrupting the interstate movement in the state where the customer is located.

We agree with petitioner that the question presented to this Court is of paramount importance. The interest of the public is vitally concerned, for, if this Court should hold that petitioner's activities as found by the Commission and confirmed by the lower Court, in the sale and distribution of its product were not in interstate commerce, then petitioner would be in a position to claim exemption in every State of the Union in which it does business from the requirements of national legislation against price discrimination in the course of any of its business in commerce.

There are many decisions holding that no such technical concepts of compartmentalized commerce are acceptable. These cases represent a consistent development of the law on what is interstate commerce. The cases at variance with them are but judicial throw-backs to the "horse and buggy" days before gasoline and the automobile did so much to change the concept of commerce from a technical, legal one to a practical one that fits the revolutionized course of modern business.

As this Court said in *Stafford* v. *Wallace,*[40] speaking through Mr. Chief Justice Taft, at page 521:

> * * * Whatever amounts to more or less constant practice, and threatens to obstruct or unduly to burden the freedom of interstate commerce is within the regulatory power of Congress under the commerce clause, and it is primarily for Congress to consider and decide the fact of the danger and meet it. This court will certainly not substitute its judgment for that of Congress in such a matter unless the relation of the subject to interstate commerce and its effect upon it are clearly non-existent.

And at pages 518–519:

> The application of the commerce clause of the Constitution in the *Swift Case* was the result of the natural development of interstate commerce under modern conditions. It was the inevitable recognition of the great central fact that such streams of commerce from one part of the country to another which are ever flowing are in their very essence the commerce among the States and with foreign nations which historically it was one of the chief purposes of the Constitution to bring under national protection and control. This Court declined to defeat this purpose in respect of such a stream and take it out of complete

---

[40] 258 U. S. 495 (1922).

> national regulation by a nice and technical inquiry into the noninterstate character of some of its necessary incidents and facilities when considered alone and without reference to their association with the movement of which they were an essential but subordinate part.

And, speaking through Mr. Justice Sutherland in *Binderup* v. *Pathe Exchange, Inc.*,[4] at page 309, this Court said:

> If the commodity were consigned directly to the lessees, the interstate character of the commerce throughout would not be disputed. Does the circumstance that in the course of the process the commodity is consigned to a local agency of the distributor to be by that agency held until delivery to the lessee in the same State, put an end to the interstate character of the transaction and transform it into one purely intrastate? We think not. The intermediate delivery to the agency did not end and was not intended to end the movement of the commodity. It was merely halted as a convenient step in the process of getting it to its final destination. The general rule is that where transportation has acquired an "interstate character it continues at least until the load reaches the point where the parties originally intended that the movement should finally end."

---

[4] 263 U. S. 291 (1923).

In this connection the Court below aptly stated:

> The modern concept of commerce is one which gives full sweep to the commerce clause of the Constitution within the limits of the implementing statute, a liberal view of the Congressional purpose as expressed in the statute, and a realistic view of what business is doing as it moves across state lines to accomplish its purpose. The late cases support the view that the petitioner's operations are in commerce from the refinery to its customers. *Walling* v. *Jacksonville Paper Co.*, 317 U. S. 564, 63 S. Ct. 332, 87 L. Ed. 460; *Binderup* v. *Pathe Exchange*, 263 U. S. 291, 309, 44 S. Ct. 96, 68 L. Ed. 308; *Mid-Continent Petroleum Corporation* v. *Keen*, 157 F. 2d 310, 314; *Republic Pictures Corporation* v. *Kappler*, 151 F. 2d 543, 545; *Walling* v. *American Stores Co.*, 133 F. 2d 840.

We therefore respectfully submit that the decision of the lower Court is in full accord with this Court's decisions in many cases involving the meaning of the phrase "in interstate commerce" based upon similar or analogous facts.

CONCLUSION

For the reasons stated, the judgment below should be affirmed or, in the alternative, the Court should direct that this case be remanded to the Commission for determination of the issue of "good faith" tendered by the petitioner under Section 2 (b).

Respectfully submitted,

FEDERAL TRADE COMMISSION,
✓ By W. T. KELLEY,
General Counsel.
✓ JAMES W. CASSEDY,
Associate General Counsel.

I hereby authorize the filing of the foregoin brief.

PHILIP B. PERLMAN,
Solicitor General.

U. S. GOVERNMENT PRINTING OFFICE: [illegible]

elsewhere."[28] In the present case, petitioner has reimbursed itself for the cut in price to some Detroit customers by charging higher prices to competing customers in the same city.

Petitioner's effort to clothe its discriminations with constitutional as well as statutory immunity rides upon the vehicle of an assumption and assertion that discrimination in good faith to meet an equally low price of a competitor cannot be restricted without destroying a basic right that is of prime importance in the competitive system of private enterprise. If successful such an effort would, of course, identify an economic philosophy of price discrimination with that liberty of contract which is referred to in the fifth amendment. There are conflicting schools of economic thought on the subject of price discrimination and on its economic function and significance. We are not seeking to have read into the Constitution an economic philosophy at variance with that of petitioner. But we are greatly concerned that petitioner's economic philosophy not become a constitutional doctrine. Regardless of the merits of the opposing schools of economic thought on the matter of price discrimination the issue should by all means be settled in the legislative field and not transferred to the field of fundamental law. That means there is nothing before this Court other than a pure matter of statutory construction.

---

[28] Hearings before House Committee on Interstate and Foreign Commerce on H. R. 13305, pp. 4, 5, 63rd Cong., Second and Third Sessions (1914).

However, in repelling petitioner's attempt to rationalize good faith to meet an equally low price of a competitor into a constitutional guarantee, it is relevant to present some of the economic considerations which make it at least doubtful that price discrimination can be a normal expression of a condition of free competition. If those considerations are well founded, petitioner's argument is not entitled to recognition on the constitutional level. Petitioner's constitutional argument would move us far in the direction of a rationalization of price discrimination as being something sacrosanct and indispensable to the maintenance of a competitive system and as something embodying hard and vigorous competition which does not become ruthless or destructive until the discriminator loses his temper and replaces his subjective good faith with a specific malevolent intent. Under that rationalization competition would become a soft and flaccid affair because it lacks the stimulus of discrimination.

In the *Cement Institute* case the Federal Trade Commission found without challenge that in an actively competitive market "there is a well-recognized principle of economics that in the sale of units of equal desirability the seller will not accept less from one buyer than from another."[29]

---

[29] 37 F. T. C. Decisions 87, 250–251.

That economic principle was accepted by the expert economic witnesses on both sides of the case. They differed only in the way they sought to apply it to the facts presented. Economic writers recognize this principle.[30]

Nor have the Federal courts been altogether oblivious to this economic principle. In *Corn Products Refining Co.* v. *Federal Trade Commission*,[31] the United States Court of Appeals for the Seventh Circuit unanimously stated it as follows:

> Systematic price discrimination is irreconcilable with free, active competition. It is not the kind of price competition found in a truly competitive market.

To a similar effect was the dissenting opinion of Judge Hamilton of the United States Court of Appeals for the Sixth Circuit when he said in the *Goodyear* case:[32]

> Monopolistic prices are always possible when a seller is able to deal differently

with the same classes of buyers of the same product or to manage in some other way to sell his goods in virtually separate markets. Recognizing this practice and in order to suppress monopolies at their inception, the Congress penalized sales of the same article to different customers at different prices.

In closing this discussion of petitioner's constitutional contentions, we assert that to accept them would give constitutional sanction, under the circumstances here present and which are of frequent occurrence, to discrimination which injures and destroys competition or which tends to create monopoly. Whatever the statute actually is and whatever Congress intended it to mean under the principles of statutory construction, petitioner insists that it cannot mean what the Court below and the Commission have held it to mean without contravening the Constitution. Petitioner rests that contention upon a fallacious and non-existent economic relationship by the maintenance of the competitive system of free private enterprise and maintenance of a freedom to discriminate in price, which the statute regards as destructive of that system. The effect of adopting the contention would be to make petitioner's economic philosophy a part of the Constitution. Rejecting it would simply recognize the constitutional right of Congress to deal with discrimination and the competitive devastation which so frequently characterizes it in the light of legislative and administrative experience and discretion.

III

PARAGRAPH 6 OF THE COMMISSION'S ORDER IS NECESSARY AND APPROPRIATE FOR EFFECTIVE RELIEF AGAINST PETITIONER'S UNLAWFUL DISCRIMINATIONS

Paragraph 6 of the Commission's order (R. 5256) was modified by the Court below (R. 5305–10), as indicated in italics, to read as follows:

> 6. By selling such gasoline to any jobber or wholesaler at a price lower than the price which respondent charges its retailer-customers who in fact compete in the sale and distribution of such gasoline with the retailer-customers of such jobbers or wholesalers, where such jobber or wholesaler, *to the knowledge of the respondent or under such circumstances as are reasonably calculated to impute knowledge to the respondent,* resells such gasoline *or intends to resell the same* to any of its said retailer-customers at less than respondent's posted tank-wagon price or directly or indirectly grants to any such retailer-customer any discounts, rebates, allowances, services, or facilities having the net effect of a reduction in price to the retailer.

The petitioner contends that this paragraph (a) will require the establishment of price maintenance programs, (b) will jeopardize the business of independent wholesalers functioning as merchandisers, and (c) will entail basic alterations of marketing procedures, which should not be required without previous review and consideration of this Court.

Petitioner sells its Red Crown Gasoline at tank-car prices to Citrin, Stikeman and Wayne who resell a substantial portion thereof at wholesale to a number of retail gasoline service stations in the Detroit Area. The price allowed by petitioner to these wholesalers is 1½¢ a gallon less than petitioner's posted tank wagon price which petitioner grants to its 358 retailer-customers, under contract and lease as hereinabove described, who purchase directly from petitioner in the Detroit Area. The price at which these wholesalers resell to their retailer-customers is normally the posted tank-wagon price of the petitioner. Thus the petitioner's 358 retailer-customers are engaged in competition with the retailer-customers of these three wholesalers.

The petitioner's 358 retailer-customers are prevented either by the terms of their leases or their contracts with petitioner from purchasing from wholesalers and petitioner does not permit them to purchase in tank car quantities at tank car prices. There is, therefore, no real competition between petitioner and Citrin, Stikeman and Wayne, the above named wholesalers.

It is undisputed that a differential of 1½¢ a gallon is sufficient to enable wholesalers buying in tank-car quantities to resell at a profit to their retailer customers, or to some of them, at prices lower than petitioner's posted tank-wagon price.

Citrin, for instance, sold a million gallons of petitioner's gasoline to Langer and Cohn, operating five retail service stations in the Detroit Area, at one cent a gallon less than petitioner's posted tank-wagon price.

In their wholesale operations in the Detroit Area, Citrin, Stikeman and Wayne are not engaged in competition with gasoline retailers, but this does not mean that petitioner's practice of charging them a lower price for the gasoline they resell at wholesale than it charges its customers in the Detroit Area who resell at retail may not be a violation of Section 2 (a) of the Clayton Act, as amended.

If petitioner sells to wholesalers in tank-car quantities at 1½¢ or more a gallon below the price it charges retailers in the same territory, and if a wholesaler then passes along a part of his wholesale margin to his retailer customers, selling to them below the tank-wagon price which petitioner charges retailer customers purchasing directly from petitioner, the resulting competitive advantage and injury would be the same as if petitioner sold directly to some of its retailer customers at discriminatory prices. The competitive advantage thus obtained by the retailer customers who purchase from the dealers favored by the petitioner results directly from the lower price allowed by petitioner to the favored dealers, and violates Section 2 of the Clayton Act, as amended, even though the competition affected is competition with the retailer customers of the favored dealers and not with the favored dealers themselves.

Section 2 (a) of the Clayton Act prohibits discriminations in price in interstate commerce between purchasers of goods of like grade and quality, sold for resale, where the effect of such discrimination may be "to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them." The Commission has found that the effect of the petitioner's discrimination in price to Citrin, Stikeman, and Wayne has been, and may be, to injure, destroy, and prevent competition with the respective customers of said wholesalers in the resale of gasoline. Upon the state of facts hereinbefore outlined, this finding cannot be challenged, and petitioner does not challenge it. Neither does petitioner deny that under these circumstances, its discrimination in price between wholesalers and retailers in the same sales area violates Section 2 (a). Apparently, petitioner's objections to Paragraph 6 go only to the terms of that paragraph.

The Commission's order in this case would be incomplete and possibly ineffective if it only prohibited petitioner from discriminating in price between competing retailers. The prohibition should necessarily extend to the selling of gasoline to any wholesaler in the Detroit Area who resells it to retailers at less than petitioner's posted tank-wagon price or who directly or indirectly grants to his retailer-customers any discounts, rebates, allowances, services, or facilities having the net effect of a reduction in price to the retailer.

There is nothing startling about prohibiting a supplier from selling to wholesalers and retailers in the same sales area at a differential so great as to enable the wholesalers to undersell their supplier, where the retailer customers of the supplier cannot buy from wholesalers but are in direct competition with the wholesaler's customers. If the supplier and its wholesalers were in fact competitors it would not be good business for a supplier whose principal distribution is direct to retailers to sell to wholesalers at a price which would enable the wholesalers to take away the retailer customers of the supplier. In this case it has been demonstrated that there is and can be no real competition between petitioner and its wholesalers.

If the prohibition contained in Paragraph 6 were not included in this order there would be nothing to prevent Ned's, solely a retailer, from transferring its business to Citrin and purchasing Red Crown gasoline from Citrin at 1¢ a gallon below the tank-wagon price, delivered at Ned's stations. Ned's would obtain substantially the same competitive advantage over other retailers which it now obtains by purchasing in tank-car quantities from petitioner. Petitioner would achieve the same result which it now obtains, merely using Citrin as a conduit for sales to Ned's.

Petitioner contends that it has no control over the price at which its favored dealers resell the gasoline purchased by them, and that it should not be required to police sales of its customers. The answer is that, if petitioner cannot sell to both tank-car resellers and tank-wagon resellers in the same territory at different prices without injuring competition with the tank-car resellers or with their customers, petitioner should abandon the practice of selling to both of these classes of customers in the same marketing area.

As a practical matter, an order such as provided in Paragraph 6 will not prevent petitioner from continuing to sell to Detroit wholesalers in tank-car quantities at tank-car prices. If petitioner notifies its three wholesaler customers that it will refuse to sell to them if they resell to retailers at less than the posted tank-wagon price, as petitioner may lawfully do, there can be little doubt that these wholesalers will comply. *United States* v. *Colgate & Company;*[33] *Cudahy Packing Co.* v. *Frey & Son, Inc.*[34]

---

[33] 250 U. S. 300 (1919).

[34] 216 F. 65 (C. A. 4, 1919), 256 U. S. 208 (1921).

And, regardless of what the favored wholesalers' reaction to such a requirement might be, petitioner having chosen to engage in the dual method of operation in the Detroit Area must accept the responsibility and burden of seeing that the difference in the prices charged to its two classes of customers does not result in competitive injury. If it cannot do this, then it has the alternative of adopting the course, followed by several of its competitors, of distributing its products in a single marketing area either through wholesalers or directly to retailers, but not by both methods.

As stated by the Court below:

> This paragraph [6] is intended to eliminate the effects of the discriminatory price made to these customers, Citrin, Wayne and Stikeman, who do a wholesale business. To avoid the force of this paragraph, the petitioner may do one of two things. First, discontinue selling to wholesalers at a price different than that made to retailers. The petitioner's three largest competitors in Detroit have found it agreeable to do so. The petitioner argues that this is an elimination of wholesalers. If this be true, it is elimination only where their existence cannot be justified by any cost savings to obtain that price. This does not impress us as either illegal, unwarranted, or unjust.

Secondly, the petitioner may under the right to choose its customers refuse to sell to wholesalers who sell to retailers below the price the petitioner makes its own retailers. The petitioner does not have to make price-control agreements with anyone. It has only to govern its own conduct to avoid the impact of an unlawful discrimination. To govern its conduct, the order makes the petitioner deal with its wholesalers at its peril as to what they might do with the gasoline in the future. The petitioner has no control and can have no control over the price of the gasoline after it is sold to the wholesalers. The latter may put any price on it they choose. They may give it away if they like. The petitioner should not be required to police its wholesalers and to sell to them at the petitioner's peril. The petitioner should be liable if it sells to a wholesaler it knows or ought to have known is engaging in or intends to engage in the competitive practices condemned by this proceeding. Under the order as drawn, the petitioner would be liable if afterwards the wholesaler should resell at a price lower than the petitioner charged its retailers. If the petitioner is to be hailed into court for a violation of the Commissioner's order, the petitioner must be guilty of knowingly choosing a customer who is using or intends to use its price advantage to undersell the petitioner in its prices made to its retailers.

IV

PETITIONER'S DISCRIMINATIONS IN PRICE AGAINST WHICH THE COMMISSION'S ORDER IS DIRECTED WERE DISCRIMINATIONS IN THE COURSE OF COMMERCE AMONG THE SEVERAL STATES UNDER SECTION 2 (a) OF THE CLAYTON ACT, AS AMENDED

The record discloses that petitioner was engaged in the business of refining, distributing, and selling gasoline to retail dealers for resale to the public in fourteen States, including the State of Michigan. The greater portion of the gasoline sold by petitioner to its customers in the Detroit area was supplied to the operators of 150 independently owned gasoline service stations in accordance with their contracts with petitioner, was supplied to meet the requirements of the lessees of 208 gasoline service stations leased to them by petitioner, and was supplied to meet the requirements of the four favored dealers. This gasoline was made from crude oil produced in the States of Kansas, Oklahoma, Texas, and Wyoming, was transported from the oil fields to petitioner's refinery at Whiting, in the State of Indiana, and after being refined was transported by tankers through the Great Lakes to the State of Michigan where it was temporarily placed in storage tanks and then transported by petitioner to these specific customers in the Detroit area of that State.

Petitioner's gasoline was thus transported in interstate commerce with the intention on the part of petitioner and these specific customers, in advance of transportation, that such gasoline would be delivered to these specific customers. The retail gasoline service stations under contract and lease and the stations operated by the four favored dealers were the intended final destinations of the greater portion of this gasoline. The temporary storage of the gasoline at petitioner's River Rouge Marine Terminal and at the six bulk plants in the Detroit area was merely a convenient intermediate step in the process of transporting the gasoline to its final destination since it obviously would not have been convenient to deliver this gasoline to these specific customers from the tankers which transported it through the Great Lakes.

All of petitioner's gasoline sales to its customers in the Detroit area are transactions between residents of different states and require for their consummation the interstate shipment of the gasoline. These customers form a stable group and their orders are recurrent as to the kind and amount of gasoline. Throughout the period of time involved in this proceeding, the requirements of these specific customers were constant and continuous and by means of its office records and close intimate contact with the operators of the gasoline service stations, petitioner could and did estimate with precision the requirements of these specific customers.

Petitioner's Detroit office is merely the agency through which it engages in the wholesale marketing of gasoline in that area of the State of Michigan. Delivery of the gasoline is entirely in the hands of the petitioner and title to the gasoline does not pass from petitioner to its customers until delivery to them is made at their retail gasoline service stations in the Detroit area. The sales, as well as the transportation, are in and a part of interstate commerce. Each is interdependent upon the other. The petitioner's storage tanks are merely the "throat" through which the "current of commerce" flowed from petitioner to the aforesaid specific retailer customers in the State of Michigan.

Thus, there is a practical continuity of movement of the petitioner's gasoline flowing through the Indiana refinery to petitioner's customers in Detroit, with no intermediate sales and with only such temporary physical interruptions to the flow as petitioner finds convenient for its own internal purposes as a corporation which distributes and sells its gasoline in fourteen states.

Petitioner contends that the decision of the lower Court holding that the sales involved in this proceeding were in interstate commerce within the intent and meaning of the Clayton Act, as amended, was: (1) in conflict with this Court's reasoning in *Walling* v. *Jacksonville Paper Co.;*[35]

---

[35] 317 U. S. 564 (1943).

(2) in conflict with the decisions in: *Lipson* v. *Socony-Vacuum Corp.*;[36] *Domenech* v. *Pan American Standard Brands, Inc.*;[37] *Jewel Tea Co.* v. *Williams*;[38] and that (3) the lower Court failed to distinguish between the line of cases involving sales "in commerce" and those involving sales "affecting commerce" (br. pp. 6-7). The first contention completely ignores the language used by this Court in the *Jacksonville* case; the second is wholly beside the point;[39] and, since the evidence placed the sales here involved "in commerce" there was no reason, need, or occasion for the lower Court to differentiate between the "in commerce" and the "affecting commerce" line of cases, the third is immaterial.

The decision of the lower Court in the instant case was squarely in line with the reasoning of this Court in the *Jacksonville* case holding that a break in the continuity of transit at a warehouse is not controlling if there is "a practical con-

[37] 147 F. 2d 994 (C. A. 1, 1945).

[38] 118 F. 2d 202 (C. A. 10, 1941).

[39] The *Lipson* cases were actions at law to recover treble damages and were decided on a demurrer to an amended declaration, the Court holding that the amended declaration failed to allege concisely and with substantial certainty, as required under the applicable laws of Massachusetts, any cause of action either as to interstate commerce or as to injury to competition. The facts in the *Domenech* case and the *Jewel* case clearly distinguish them from the instant case.

STANDARD OIL COMPANY,
Petitioner,

vs.

FEDERAL TRADE COMMISSION,
Respondent.

APPLICATION FOR LEAVE TO FILE BRIEF ON BEHALF OF RETAIL GASOLINE DEALERS ASSOCIATION OF MICHIGAN, INC., AS *AMICUS CURIAE*, IN OPPOSITION TO PETITION FOR WRIT OF CERTIORARI.

To the Honorable, the Chief Justice and Associate Justices of the Supreme Court of the United States:

Your applicant, Retail Gasoline Dealers Association of Michigan, Inc., respectfully makes application to this Court for leave to file the accompanying brief, as *amicus curiae*, in opposition to the petition for writ of certiorari filed herein by the petitioner, Standard Oil Company.

Your applicant is a Michigan non-profit membership corporation serving the interests of the retail gasoline dealers of that State. The Association has more than 2,000 members in the State of Michigan, and more than 1,450 members in the Detroit Metropolitan Area. Its Detroit membership is fairly representative of all the retail gasoline dealers of that area.

The retail gasoline dealers of Detroit have a direct and vital interest in the outcome of this proceeding. They are the principal beneficiaries of the order of the Federal Trade Commission which is the subject of the proceeding, and are the persons who would be most directly affected if that order should be set aside.

The Commission's complaint herein charged, and the Commission found upon the evidence, that petitioner has discriminated in price in the sale of its gasoline in the Detroit Metropolitan area by selling such gasoline to four dealers, classified as jobbers but who resell in whole or in part at retail, at prices substantially lower than the price which petitioner charges for the same gasoline to the 350 to 400 other retail dealers whom it supplies in Detroit. The Commission charged and found, and it was not disputed upon review in the Court of Appeals, that these price discriminations have had and may have the effect of injuring, destroying and preventing competition between the four favored dealers and the other retailers in Detroit who are forced to purchase their gasoline from petitioner at higher prices. The Commission's order, and the decree of the

Court of Appeals which this Court is now asked to review, prohibit those discriminations in price. Said order and decree have for their direct purpose and primary effect the protection of the retail gasoline dealers of Detroit from injurious and ruinous competition engendered by petitioner's said discriminations. The retail gasoline dealers of Detroit, therefore, have a direct and legitimate interest in the said order and decree which are the subject of the present petition for certiorari.

Your applicant, through the undersigned as its attorney, has participated in this case in its previous stages before the Federal Trade Commission and the United States Court of Appeals for the Seventh Circuit. In April, 1946, the undersigned appeared and presented oral argument before the Commission, on behalf of Retail Gasoline Dealers Association of Michigan, Inc., at a hearing upon motions to set aside or modify the Commission's order. Upon review the Court of Appeals permitted your applicant to file a brief as *amicus curiae* and to present oral argument in support of the Commission's order.

The purpose of the brief herewith submitted is to correct certain misstatements in the petition as to the effect of the decree below, and as to the nature and significance of the questions presented, which it is believed should be called to the attention of this Court; also to present certain pertinent facts not stated in the petition which it is believed the Court will find material in determining whether to grant certiorari.

WHEREFORE your applicant respectfully prays that it be granted leave to file the accompanying brief, as *amicus curiae*.

Respectfully submitted,

CYRUS AUSTIN,
Attorney for Retail Gasoline Dealers Association of Michigan, Inc.

WILBUR DUBERSTEIN,
Counsel.

Dated, July 18, 1949.

BRIEF ON BEHALF OF RETAIL GASOLINE DEALERS ASSOCIATION OF MICHIGAN, INC., *AMICUS CURIAE,* IN OPPOSITION TO PETITION FOR WRIT OF CERTIORARI.

I. Neither the Commission's Order Nor the Decree of the Court of Appeals Has the Effect of Denying to a Seller the Right to Lower His Price to a Customer in Good Faith to Meet the Price of a Competitor.

At the outset of its petition, petitioner states that the Federal Trade Commission and the Court of Appeals have "denied a seller the right to meet competition in good faith by reducing his price to an individual customer to meet a price offered to the customer by a competitor". This characterization of the effect of the decree below is repeated throughout the petition and brief. The first reason offered by petitioner for the allowance of the writ is "the lower court's denial of the right of a supplier to reduce its prices to certain customers in good faith to meet equally low prices offered them by competitors". The claim that the Commission and the Court have so construed the Clayton Act is the principal reason relied on by petitioner for allowance of writ of certiorari.

The Commission's order does not deny to petitioner the right to lower its price to an individual customer or customers in good faith to meet an equally low price of one of its competitors. A seller's right to do that was not questioned either by the Commission or by the Court. Petitioner's true contention was, and is, that the statute permits a seller to lower his price to one customer to meet his own competition *and at the same time to charge higher and* *discriminatory prices to other competing customers,* even where the discrimination is affirmatively proved to have resulted (or to be one which may result) in injury to competition with the favored customer. The question presented is not whether a seller may meet a competitor's price, but whether section 2(b) of the Clayton Act makes a showing that the seller's *lower* price was made in good faith to meet the price of his competitor an absolute justification for *discrimination* in price declared unlawful by section 2(a).

Following this Court's construction of section 2(b) in *Federal Trade Commission* v. *Staley Manufacturing Co.* (324 U. S. 746, 752), and relying on the language and history of the statute, the Court of Appeals held (173 F. (2d) 210) that the good faith meeting of a competitor's lower price, while sufficient to rebut a *prima facie* case (made by showing only discrimination without proof of effect on competition), does not constitute a substantive defense where all of the elements of violation of section 2(a) have been affirmatively proved.

There is some attempt in this petition to argue that petitioner's discrimination in price in Detroit did not result in injury to competition because petitioner's favored customers (who resold at retail in competition with some 350 other retailer customers paying a higher price) would have been able to obtain an equally low price from other suppliers. No such contention was made on review in the Court of Appeals. The Commission's findings of fact as to injury to competition were not contested. The sole question raised on this branch of the case was whether a seller's good faith meeting of competition with respect to his lower price is a complete justification for price discrimination regardless of the effect of the discrimination on competition between the seller's customers.

II. The Above Question of Statutory Construction Has Already Been Decided by This Court in the *Staley* Case, and the Decision of the Court of Appeals in This Case Is Not in Conflict With, But Follows, This Court's Decision.

Petitioner's contention is, in effect, that the Robinson-Patman amendment to the Clayton Act in 1936 did not change the Clayton Act with respect to the effect to be given the defense of "meeting competition". Prior to 1936 section 2 of the Clayton Act contained the following proviso:

> "That nothing herein contained shall prevent * * * discrimination in price in the same or different communities made in good faith to meet competition."

The Robinson-Patman Act struck that proviso out of section 2(a) (which corresponds to old section 2), and inserted a quite different proviso in a new procedural section, section 2(b), which defines a prima facie case and provides that a seller *may rebut such prima facie case* by showing that his lower price was made in good faith to meet the equally low price of a competitor. Affirmative defenses available to a seller were retained in section 2(a), which now contains no mention of meeting competition.

Petitioner is now contending that this change in the statute was meaningless and that "meeting competition" is still an affirmative defense just as it was under the old Clayton Act.

This question has already been considered and decided by this Court in *Federal Trade Commission* v. *Staley*

Manufacturing Co., 324 U. S. 746, 752, where the Court said:

> "It will be noted that the defense that the price discriminations were made in order to meet competition, is under the statute a matter of 'rebutting' the Commission's 'prima-facie case'. Prior to the Robinson-Patman amendments §2 of the Clayton Act provided that nothing contained in it 'shall prevent' discriminations in price 'made in good faith to meet competition'. *The change in the language of this exception was for the purpose of making the defense a matter of evidence in each case, raising a question of fact as to whether the competition justified the discrimination.*" (Italics supplied.)

We read the above as clear pronouncement that under the Robinson-Patman Act "meeting competition" is no longer a substantive defense; that such proof is now sufficient to rebut only a *prima facie case* of violation of section 2(a), thus raising an issue of fact to be determined by the Commission upon the evidence in each case, as to whether the competition justified the discrimination.

In this case the Commission found upon the evidence that the competition met did not justify the discrimination, in view of the injurious effect of the discrimination upon competition between petitioner's customers, even assuming that petitioner's lower price to the favored customers was made in good faith to meet its own competition (Findings, Paragraph Thirteen, R. 5182). The factual basis for that finding was not challenged in the Court of Appeals. It would seem, therefore, that the Commission's said finding conforms to this Court's construction of the statute in the *Staley* case, and is now conclusive.

In view of the foregoing it is submitted that, with respect to the effect to be given to the defense of "meeting competition", the decision of the Court of Appeals presents no important question of federal law not heretofore settled by this Court, and is not in conflict with the prior decisions of this Court.

III. The Decision of the Court Below Presents No Question as to the Constitutionality of Sections 2(a) and 2(b) of the Clayton Act.

The petition alleges that this case presents the question "Whether Section 2 of the Clayton Act as amended, construed to deprive a supplier of this basic right, contravenes the due process clause of the Fifth Amendment".

Petitioner's contentions in this respect are based upon the false premise that the Commission and the Court of Appeals have construed sections 2(a) and 2(b) of the Clayton Act as "depriving petitioner of its right in good faith to meet the price of a competitor". As above pointed out, neither the Commission nor the Court has questioned the right of a seller to meet a competitor's price in good faith. The statute as construed in this case does not have the effect of preventing such meeting of competition.

Petitioner's real complaint is that the Court below has not construed the statute as permitting it to discriminate in price between its customers at will, regardless of the effect on competition between its customers, so long as it can show that its lower price to the favored customers was made to meet a price offered by one of its own competitors. The denial of this construction does not present a question as to the constitutionality of section 2 of the Clayton Act.

IV. Both Branches of Congress Have Recently Passed Legislation Amending Section 2(b) of the Clayton Act Which, If Enacted at This Session, Will Remove From This Case the Question of Construction of Existing Federal Law.

On June 1, 1949, the Senate passed the O'Mahoney bill, S. 1008, amending the Federal Trade Commission Act and the Clayton Act. Section 3 of the bill, as introduced, amended the proviso of section 2(b) of the Clayton Act so as to permit a seller to justify an otherwise unlawful price discrimination by showing that his lower price was made in good faith to meet the equally low price of a competitor. It was pointed out and conceded on the floor of the Senate (and again when the bill reached the House) that the purpose and effect of this amendment was to change the law as construed by the Federal Trade Commission and the Court of Appeals in this case. The Senate thereupon amended section 3 of the bill so as to provide (in section 2(b) of the Clayton Act) that such meeting of competition is not a defense where the discrimination results in substantially lessening competition. As so amended the bill was passed. The proponents of the amendment stated that its purpose was to preserve the rule in this case.

When the bill reached the House of Representatives the House Judiciary Committee struck out the Senate amendment to section 3. On the floor of the House on July 7th an amendment was again inserted, after lengthy debate, providing that meeting competition may justify price discrimination "if the discrimination is not such that its effect on competition may be that prohibited by this section". The bill passed the House with that amendment.

The result is that both the Senate and the House have rejected an attempt to overturn the decision of the Commission and the Court of Appeals in this case and have met that attempt by writing said decision into the statute, subject to conference agreement and final passage.

In view of the seeming probability that this bill will be finally passed at this session of Congress and become law, we believe that the above brief summary of its history is appropriate at this time. If it is enacted, this case will no longer present a question of construction of existing statutory law.

V. The Interstate Commerce Question Presented by This Case Is Not a Novel One, and Has Been Disposed of in Principle by This Court in Many Prior Cases.

The gasoline which petitioner sold at discriminatory prices in Detroit was shipped there via the Great Lakes from its refinery at Whiting, Indiana. The gasoline was unloaded at petitioner's marine terminal on the edge of Detroit, whence it was transported either directly to the customers' tanks or indirectly via six bulk storage plants located in various parts of the city. The same retail service stations were supplied the year around and their requirements were well known and constant subject to seasonal variations. These service stations did not buy gasoline from any other source, their entire requirements being supplied by petitioner. The same was substantially true of the four jobbers, who operated certain service stations of their own (one jobber was solely a retailer) and supplied others.

Petitioner's marine terminal on the outskirts of Detroit was merely a reservoir through which the gasoline passed from tank steamer to tank truck, en route from refinery to customer. This reservoir was, of course, large enough to assure a continuous supply of gasoline to the service stations and other customers during the winter months when Great Lakes navigation was suspended.

This Court will recognize such a stream of interstate commerce as one which, upon analogous facts, it has had occasion to consider and has ruled upon in many previous cases. It is submitted that this branch of the case does not present a situation calling for review by this Court for any of the reasons usually assigned by the Court for granting certiorari.

Conclusion.

It is submitted that the petition for writ of certiorari to the United States Court of Appeals for the Seventh Circuit should be denied.

Respectfully submitted,

CYRUS AUSTIN,
Attorney for Retail Gasoline Dealers Association of Michigan, Inc., Amicus Curiae.

WILBUR DUBERSTEIN,

OCTOBER TERM, 1949

No. 107

STANDARD OIL COMPANY,
Petitioner,

vs.

FEDERAL TRADE COMMISSION,
Respondent.

BRIEF AMICUS CURIAE OF EMPIRE STATE PETROLEUM ASSOCIATION, INC., OHIO PETROLEUM MARKETERS ASSOCIATION, INC., ILLINOIS PETROLEUM MARKETERS ASSOCIATION, INDIANA INDEPENDENT PETROLEUM ASSOCIATION, INC., IOWA INDEPENDENT OIL JOBBERS ASSOCIATION, WISCONSIN PETROLEUM ASSOCIATION, SOUTH DAKOTA INDEPENDENT OIL MEN'S ASSOCIATION, NEBRASKA PETROLEUM MARKETERS, INC., NORTH CAROLINA OIL JOBBERS ASSOCIATION, VIRGINIA PETROLEUM JOBBERS ASSOCIATION, FLORIDA INDEPENDENT PETROLEUM MARKETERS ASSOCIATION, AND PENNSYLVANIA PETROLEUM ASSOCIATION, INC.

This *amicus curiae* brief is filed (with the consent of the parties pursuant to Rule 27, paragraph 9) by Empire State Petroleum Association, Inc., a trade association of 225 independent New York gasoline jobbers, Ohio Petroleum Marketers Association, Inc., a trade association of 200 independent Ohio gasoline jobbers, Illinois Petroleum Marketers Association, a trade association of 508 independent Illinois gasoline jobbers, Indiana Independent Petroleum Association, Inc., a trade association of 248 independent Indiana gasoline jobbers, Iowa Independent Oil Jobbers Association, a trade association of 350 independent Iowa gasoline jobbers, Wisconsin Petroleum Association, a trade association of 300 independent Wisconsin gasoline jobbers, South Dakota Independent Oil Men's Association, a trade association of 335 independent South Dakota gasoline jobbers, Nebraska Petroleum Marketers, Inc., a trade association of 268 independent Nebraska gasoline jobbers, North Carolina Oil Jobbers Association, a trade association of 168 independent North Carolina gasoline jobbers, Virginia Petroleum Jobbers Association, a trade association of 40 independent Virginia gasoline jobbers, Florida Independent Petroleum Marketers Association, a trade association of 80 independent Florida gasoline jobbers, and Pennsylvania Petroleum Association, Inc., a trade association of 101 Pennsylvania gasoline jobbers.

This case involves the legality, under Section 2(b) of the Clayton Act as amended by the Robinson-Patman Act (15 U.S.C. 13, par. a.), of a difference in price made in *good faith* to meet the equally low price of a competitor, when the Federal Trade Commission makes a finding that such good faith competition adversely affects competition.

While the order before this Court was entered against petitioner,[1] its main force is directed at gasoline jobbers and attacks their functional discount. The sanctions imposed deal a death blow to those jobbers who suppliers also sell to retailers in the same area. It also restricts the opportunities of jobbers generally. Petitioner's brief does not adequately show the serious impact of the order on jobbers.

---

[1] Throughout this brief Standard Oil Company, the petitioner in this Court, is referred to as "petitioner."

The Circuit Court alarmed jobbers when it advised petitioner that in order to comply with the order it could either—

> "First, discontinue selling to wholesalers at a price different than that made to retailers. * * * The petitioner argues that this is an elimination of wholesalers. If this be true, it is elimination only where their existence cannot be justified except on the exploitation of a differential in price not justified by any cost savings to obtain that price. This does not impress us as either illegal, unwarranted, or unjust.
>
> "Secondly, the petitioner may under the right to choose its customers refuse to sell to wholesalers who sell to retailers below the price the petitioner makes to its own retailers" (Rec. 5304; 173 F. 2d 210, 217).

The conclusion of the lower court that elimination of gasoline jobbers (of whom there are 12,000 in the United States—R. 5249) is neither illegal, unwarranted, nor unjust is a compelling reason for this brief. We do not believe that conclusion could have properly been reached with a full understanding of its impact or of the importance of jobbers as a factor in the competitive marketing of petroleum.

In spite of the jobbers' apparent interest in the question, the Commission denied the National Council of Independent Petroleum Associations leave to intervene for the purpose of opposing the order (R. 5254). The successor to that organization, The National Oil Jobbers Council recently adopted a resolution describing the effect of the order as "wholly arbitrary, capricious, and unjustifiable."[2]

ARGUMENT

THE APPLICATION TO, AND UNREASONABLE IMPACT ON, JOBBERS OF THE COMMISSION'S ERRONEOUS AND ILLOGICAL CONSTRUCTION OF SECTION 2(b) OF THE CLAYTON ACT.

Petitioner sold gasoline to each of its retail station customers in Detroit in tank wagon quantities at its tank wagon price. It sold to each of its jobber-wholesaler customers in tank car quantities at its tank car price, which was 1½¢ a gallon below its tank wagon price. This functional jobber discount was held to be an illegal price discrimination in violation of the Robinson-Patman Amendment to the Clayton Act (15 U.S.C. 13). The Commission held inapplicable the provision, in clear language, of Section 2(b) of the Act permitting a seller to justify a discrimination by showing that he made the lower price in good faith to meet the equally low price of a competitor.

The record shows that the questioned practice reflects the normal and customary manner in which gasoline is sold not only in Detroit but throughout the United States. There are 130 licensed gasoline jobbers in Wayne (Detroit) County (R. 4857-9). The 126 who bought from suppliers other than petitioner purchased in tank car quantities at tank car prices just as the petitioner's four jobber customers did.

The trial examiner found that—"Long prior to the [Robinson-Patman Act], the jobber system of distribution was widely employed in the oil industry, and the term 'jobber' was generally understood to mean one who was engaged in the purchase and sale of petroleum products (and particularly with reference to gasoline), who had sufficient storage to take delivery in tank-car quantity and resold a substantial part to resellers and the remainder direct to the public through retail service stations operated by him'' (R. 5096).

The trial examiner also found that—''Each [of petitioner's four jobber customers], at the time of recognition [as a jobber], and at all times thereafter, possessed all the qualifications for classification as a jobber exacted by (1) the generally understood meaning in the oil industry of the term 'jobber'; (2) the definition of the term 'Approved by the Federal Trade Commission'; and (3) [petitioner's] own standard'' (R. 5097).

The trial examiner reached the ''Conclusion of Fact'' that the ''differentials on its branded gasoline'' that petitioner made to its four jobbers ''were granted to meet equally low prices offered by competitors on *branded gasoline of comparable grade and quality*''[3] (R. 5104).

The Commission did not overrule these findings of its trial examiner. It found, however, that—''It is not material whether the discriminations in price granted by the [petitioner] to the said four dealers were made to meet equally low prices of competitors. * * * even though the lower prices in question may have been made by [petitioner] in good faith to meet the lower prices of competitors, this does not constitute a defense in the face of affirmative proof'' that there was an injury at the retail station level (R. 5179).

The Circuit Court said that the four customers to whom petitioner made the lower price ''were also known as wholesale customers'' (R. 5295; 173 F. 2d 210, 212). As to petitioner's good faith in making the lower price, the Circuit Court said—''There is substantial evidence in this record, *and we think it may be assumed to be conclusive,* to the effect that the petitioner made its low price to [the four jobber-wholesaler customers] *in good faith to meet the lower price of a competitor*" (R. 5297; 173 F. 2d 210, 213).

---

[3] Emphasis in quotations is supplied throughout this brief, unless otherwise noted.

Of the Commission's view as to petitioner's good faith, the Circuit Court said—"Now as to the contention that the discriminatory prices here complained of were made in good faith to meet a lower price of a competitor. While the Commission made no finding on this point, *it assumed its existence* but held, contrary to the petitioner's contention, that this was not a defense" (R. 5299; 173 F. 2d 210, 214).

A. THE ORDER WILL NOT PREVENT THE JOBBERS FROM BUYING AT TANK CAR PRICES.

As previously indicated, a jobber owns bulk storage and truck distribution facilities. Historically the jobber performed the marketing functions of independent refiners. In recent years, however, the jobber has generally started in business as a small retailer. This small retailer may, under our free enterprise system, expand his operations through acquiring additional stations and securing the business of others until he has an adequate volume to justify acquisition of a bulk plant. He is then able to purchase in tank car quantities. As the Retail Gasoline Dealers' Association of Michigan correctly pointed out in its *Amicus Curiae* brief in the court below (pp. 8-9), petitioner did not encourage retailers to acquire facilities which would enable them to buy in tank car quantities. But, a gasoline buyer who acquires a bulk storage plant and a fleet of trucks and has sufficient volume to buy in tank car quantities, *can not be prevented from buying at tank car prices* whether his supplier likes it or not. If his old supplier refuses to sell to him in tank car quantities at tank car prices he may take his business to another who will. Neither is required to do business with the other. Each is free to compete for the best terms of sale. The business expansion to the status of "jobber" represents an economic advancement for a small businessman.

Since the Robinson-Patman Amendment has no application to a seller who charges the same price to all his customers, refiners who sell only at wholesale in tank car quantities are not within the provisions of the Act. Their jobbers may resell either at retail or to retailers below the going tank wagon price without consequence to either the refiner or the jobber. Price cutting *by jobbers whose suppliers sell only at wholesale* would not permit invoking the sanctions under the Robinson-Patman Amendment even as construed by the Commission in this case.

The order in terms thus operates only against jobbers supplied by refiners who maintain dual distribution, selling to both retailers and wholesalers. Since there will always be some refiners who sell only in tank car quantities to tank car buyers, and would therefore be free to sell to jobbers at tank car prices, the jobbers will continue to be free to purchase at tank car prices from such suppliers. Those jobbers, however, whose suppliers now employ dual methods of distribution will be required to either: (1) transfer their business to a supplier who sells only in tank car quantities; (2) sell out to their supplier who will then take over their distribution functions; or (3) go out of business.

Gasoline in tank car quantities is freely available, somewhat as is wheat or corn. Anyone desiring to purchase wheat or corn in carload quantities may so do. On any public grain exchange he can buy carload quantities at the same price paid by either the largest or the smallest miller (except for grain exchange commissions).

Tank car spot market quotations for gasoline are publicly printed.[4] While most jobbers prefer the continuity of doing business with the same supplier, any petroleum buyer with facilities to purchase gasoline in tank car quantities can do so at tank car prices. There are a substantial number of refiners who sell only in tank car quantities and still many others who sell only at wholesale in particular markets. Jobbers will always be able to buy from these suppliers at tank car prices.

---

[4] See market quotations daily in Chicago Journal of Commerce and many other trade publications.

It follows that the order will not eliminate the jobber nor can it prevent him from buying at tank car prices. We now show that by imposing restrictions which prevent dual distribution by refiners, the Commission's order, without warrant, imposes an undue restriction on jobbers whose suppliers also sell to retailers and limits the source of supply available to all jobbers.

B. THE COMMISSION'S ORDER WILL EFFECTIVELY PREVENT JOBBERS FROM OBTAINING THEIR SUPPLIES FROM REFINERS ENGAGED IN DUAL DISTRIBUTION.

Paragraph 6 of the order prohibits petitioner from selling to jobbers at a price lower than petitioner charges to retailers who compete with the customers of its jobbers, if petitioner has actual or constructive knowledge that the jobber resells below petitioner's posted tank wagon price or grants any service or facility having the effect of a reduction in price (R. 5256).

This provision has the effect of requiring petitioner to discontinue selling to any jobber who resells below petitioner's posted tank wagon price or grants any service or facility (i.e. a new pump, painting a station, etc.) which amounts to a reduction in price. The prohibition applies without regard to whether the jobber is required by good faith competition with others to make the price reduction. Paragraph 6 of the order coerces jobbers into maintaining rigid resale prices, fixed by petitioner's posted tank wagon price, under penalty of being cut off from their source of supply.

The jobber of petroleum products is generally engaged in intrastate commerce (except in those cases where he operates in two states) and is not subject to the Clayton Act. This order, however, not only extends the Act to jobbers in intrastate commerce, through control of their suppliers, but imposes restrictions on the competitive conduct of independent jobbers which the Act itself does not require.

The Clayton Act, as amended by the Robinson-Patman Act, does not prohibit anyone from reducing his price when he does so to all his customers. But this order prohibits independent gasoline jobbers from reducing their prices, unless *the petitioner* reduces its posted tank wagon price.

The Act does not prohibit jobbers from lowering their price, or furnishing free facilities such as a new pump, to any customer when doing so does not have the specified effect on competition. But this order prohibits independent gasoline jobbers from doing any of these things unless his supplier elects to lower its price or grant a similar service.

The jobber who buys from a dual distributor is simply denied the right to compete with jobbers whose suppliers sell only in tank car quantities. He is both denied the right to compete for new customers or even to hold his present customers against a competitive price cutting attack. He is denied the right to engage in good faith competition as effectively and as completely as though his supplier could and did lawfully dictate the prices and terms of sale at which he must do business. His course of conduct is prescribed for him, not by the performance of competitors, but by the conduct of his supplier toward its retail customers.

All sales initiative, competitive activity and even self-defense against price cutting attacks is to be determined for the independent jobber by his supplier.

A Report to the Temporary National Economic Committee in 1941 by the Commission's staff (printed as Monograph No. 42) argued that the good faith meeting of an equally low price was an absolute defense. It said—"The right of self-defense against competitive price attacks is as vital in a competitive economy as the right of self-defense against personal attack."[5]

We assume it is conceded that the country's 12,000 gasoline jobbers should be permitted to do business in "a competitive economy." The criminal law guarantees the individual an unlimited "right of self-defense against personal attack." Jobbers ask no more than, but insist upon, "the right of self-defense against competitive price attacks." The foregoing statement is by the late Walter B. Wooden, the Commission's chief advocate in pricing matters. It is as strong a statement of the necessity for engaging in good faith competition to meet the equally low price of competitors as the English language permits.

Paragraph 5 of the order prohibits petitioner from selling gasoline to jobbers, for resale at retail to consumers, at a lower price than the petitioner charges its retailer customers (R. 5256). Again, however, the restriction applies only to suppliers with dual distribution. The refiner who sells only in tank car quantities may sell at the tank car price without regard to the manner in which the buyer may resell the gasoline.

Jobbers have heretofore thought that when they purchased gasoline in a competitive market at a competitive price it became their property. They have believed that gasoline purchased by them was theirs to dispose of in any lawful manner. The law does not prohibit gasoline jobbers from also operating retail stations. Gasoline is not a packaged or trade marked article where the product of one seller may differ widely from that of other sellers. Tank car buyers can and will continue to buy at tank car prices without regard to the use to which they may put the product.

---

[5] Report prepared by Walter B. Wooden and Hugh B. White of the Commission's staff and submitted to the Temporary National Economic Committee by the Commission's Director of T.N.E.C. Studies. Monograph No. 42, p. 139.

This requirement of the order can only force jobbers who also operate service stations to buy their gasoline from suppliers who sell only to tank car buyers. Present dual suppliers will be encouraged, if not compelled, to buy out their jobbers in order to protect desired distribution. This is directly contrary to the Commission's professed objective of seeking to prevent acquisitions that lessen competition.

The order, of course, does permit a jobber discount equal to savings in costs on sales to jobbers. The Circuit Court, as shown above, thought it was not unjust to eliminate the jobbers if their "existence cannot be justified except on the exploitation of a differential in price not justified by cost savings."

To make the refiner's savings in cost the measure of the jobber's margin is both unwarranted and unjust. It would result in further concentration in the oil industry by forcing some refiners to take over the distribution functions now performed by many of the jobbers. Cost savings allow the jobber a discount equal to only the major oil companies' cost of distribution (which is subject to fluctuation from time to time, leaving the jobber no basis for planned business operation). Assuming that the independent jobber can distribute gasoline as economically as the major oil companies, the cost saving differential would allow him nothing for return on investment, profit or general overhead. Obviously this means the elimination of the jobber, at least as far as his obtaining his supplies from a dual distribution supplier. There is nothing in the Act, or in its legislative history, to sustain the belief that Congress intended to impose any such restriction on jobbers.

The jobber also performs services in addition to the physical distribution of gasoline. These services include the development of outlets, sales stimulation, supplying and maintaining equipment such as pumps, tanks, lifts and air compressors, extending credit, servicing accounts, soliciting new accounts, advertising and otherwise creating good will.

Retail gasoline dealers, who are apparently convinced that they will profit from the order, have suggested that the order fix the jobber discount.[6] The jobber's answer to that suggestion is no different than would be that of the retailer to a suggestion that the law fix the margin of the retailer's mark-up. Why is the jobber to be denied the opportunity to buy at a competitive price and to make a profit in a competitive industry? Why should such a restraint be imposed upon jobbers, and competition among them virtually prohibited, in order to enable some retailers to achieve individual transitory stability through the elimination of price cutting (even assuming that the order in this case will eliminate price cutting—an assumption which in fact is not supported by the Commission's findings)?

It has been inferred that the 1½¢ a gallon jobber functional discount is excessive. The fact is that 1½¢ was then the low point in the range of the jobber discount (R. 951). The record is that the average was then 2¢ and the maximum about 3¢ (R. 951). In *United States* v. *Socony-Vacuum Oil Co.,* et al., (Indictment No. 11364, Western Dist. of Wisc., filed December 22, 1936) major oil companies were indicted under the Sherman Act for conspiring *to restrict* the jobber margin to 2¢. The generally prevailing jobber margin is now 2½¢ and upward.

---

[6] See brief of *Amicus Curiae* for Retail Gasoline Dealers Association of Michigan, Inc., in the Circuit Court, p. 33.

This order makes the burdens of dual distribution so great that, even in the unlikely case that the jobber could continue buying from a dual supplier, it does not seem possible for such refiners to continue to sell to jobbers. If required to abandon its dual distribution, it is not difficult to imagine which customers petitioner will abandon. Only 18% of its business in Detroit was with jobbers (R. 4879).

When another major oil company desired to eliminate its jobbers, a Committee of Congress was prompt to express its disapproval.

A Report of the Senate Small Business Committee (1949) on "Oil Supply and Distribution Problems,"[7] says—

> "The most disturbing indication of a plan to eliminate the independent oil jobber was contained in a speech made by a vice-president of Standard Oil Co. (Ohio) before the American Management Association just prior to the opening of the oil subcommittee hearings. His efforts to explain his remarks about savings in the industry by 'elimination of the wholesale jobber' fell far short of convincing."

Gasoline jobbers are essentially small businessmen for whose welfare the Congress has frequently expressed concern as is shown by the activities of the Congressional Small Business Committees.

The record does not indicate what proportion of the 12,000 jobbers are supplied by refiners with dual distribution. Presumably the situation varies in different communities. Regardless of whether dual or single distribution preponderates in an area, the elimination of dual distribution will inflict a harsh result on jobbers without a corresponding public benefit. In communities where most of the jobbers may buy from suppliers who have dual distribution, this arbitrary requirement is inflicted upon the great bulk of the jobbers and prohibits what is the normal business practice, and will require almost revolutionary changes in methods of distribution in such communities; many of whom will be required to change their brands or go out of business. In the communities where the jobbers who buy from suppliers with dual distribution are in the minority, the order imposes upon those jobbers a restriction which is not applied to the majority of their competitors, who remain free to buy from their suppliers at tank car prices. In these areas jobbers purchasing from dual distributors will be at the mercy of their competitors whose suppliers sell only in tank car quantities.

---

[7] Report No. 25 (81st Congress) Senate Special Committee to Study Problems of Small Business, January 31, 1949, pp. 8-9.

Theoretically a refiner need only avoid selling to both wholesalers and retailers in the same territory to avoid the restrictions upon dual distribution. Practically, however, this can only be accomplished by an insulating area between the two territories in which the refiner has no jobber or retailer customers. Otherwise there would always be the probability of injury to a retailer near the edge of one territory through competition with a jobber, or a customer of a jobber, in the adjacent territory. Gasoline stations several miles apart may be in actual competition with one another.[8] The elimination of dual distribution will have dire consequences not only upon jobbers now dealing with dual distributors, but upon jobbers generally.

With respect to jobbers now obtaining their supplies from dual distributors, many of whom have devoted their adult lives to building up their individual businesses on the foundation of the supplier's brand name, they will be compelled to sacrifice their life's effort. The capital which they have invested, the good will they have developed with their customers, will all be jeopardized as they will be faced with the necessity of commencing anew to build up patronage for a different and competitive brand.

---

[8] See brief of *Amicus Curiae* for Retail Gasoline Dealers of Michigan, Inc. in Circuit Court, pp. 4-5.

With respect to jobbers not now buying from a dual distributor, particularly new jobbers entering the field, the market in which they will seek their source of supply will be arbitrarily narrowed. Competition for their business as well as sales to them will be restricted to suppliers not having their own direct distribution in the same area. It cannot be over-emphasized that this will have no effect upon the price level at which jobbers will buy—they will continue to buy at the tank car price—but some suppliers will be prevented from competing for their trade.

There is no compelling or justifiable reason to force these men to make the choice between going out of business, selling out to their suppliers, or transferring their business to a supplier who sells only at wholesale.

C. MEETING THE PREVAILING JOBBER PRICE IN GOOD FAITH DOES NOT INJURE COMPETITION AND ITS PROHIBITION IS CONTRARY TO SETTLED NATIONAL POLICY.

The public policy of the United States, frequently expressed by the Congress, is full adherence to the competitive system. The Commission professes to advocate competition. In a recent Report to the Congress,[9] it said—

> "The capitalist system of free initiative is not immortal, but is capable of dying and of dragging down with it the system of democratic government. * * * Either this country is going down the road to col-

---

[9] Report of the Federal Trade Commission on the Merger Movement (1948) p. 69. While the remarks were directed at the elimination of competition through monopoly, they are equally applicable to the elimination of competition from any cause.

> lectivism, or it must stand and fight for competition as the protector of all that is embodied in free enterprise."

This order actually prohibits *good faith competition,* although the basic function of the antitrust laws is to compel competition in industry. Restrictions upon a seller's freedom to compete *in good faith* are abhorred.

The Commission's philosophy underlying this order seems to be that the financial stability of some retail gasoline dealers in Detroit must be maintained, even at the expense of the undermining of the stability of the competitive economy as a whole, and particularly the jobbers.

The December 1948 Report to the President of the Council of Economic Advisers, criticizing the recent tendency to prohibit "pricing making policies previously accepted as legitimate features of hard rivalry for business," says[10]—

> "The philosophy of the Sherman Act appears to be yielding to a policy of 'ethical competition' which does not differentiate between the stability of the individual firm and the stability of the total economy."

All price fixing conspiracies have as their ultimate objective promoting the "stability of the individual firms" that enter into the combination. But all conspiracies are uniformly struck down by this Court because they are destructive of the "stability of the total economy."

The petitioner proved that its lower price to each of its four jobber customers was made in good faith to meet or partially meet specific offers of competitors to each of these jobber customers for gasoline of comparable grade and quality (R. 5099-5104). It has not been denied that if petitioner had not made the lower price to these jobbers it would have lost them as customers. The evidence in the record on the petitioner's good faith meeting of equally low or lower prices to retain these jobbers as customers was said by the Circuit Court to be overwhelming. Nor was it disputed by the Trial Examiner, or the Commission, who assumed that the showing of good faith had been established (Supra, pp. 5-7).

---

[10] Council of Economic Advisers Third Annual Report to the President (December, 1948) p. 15.

Irrespective of the showing of good faith by proof of meeting specific offers of its competitors for gasoline of comparable grade and quality, as far as the jobber is concerned the fact is that jobbers must, and will, continue to purchase at tank car prices as low or lower than those charged by petitioner in order to continue in business. If petitioner's jobber customers can be expected to buy at those prices, regardless of their source of supply, how can the fact that they purchased from petitioner possibly result in an injury to competition?

Let us assume that price cutting by tank car buyers or their customers results in a competitive disadvantage to retailers who purchase at tank wagon prices. That disadvantage, however, does not result from the petitioner meeting *in good faith* the equally low price at which its competitors may lawfully sell to jobbers who resell below petitioner's posted tank-wagon price. *The disadvantage results from the fact that the distributors of other brands may lawfully engage in that practice.* The disadvantage would not be different if the jobber had purchased from a refiner (competing with petitioner) who sold only to tank car buyers. The good faith meeting of the prevailing market price at which competitors are lawfully selling does not injure competition.

To prohibit sellers from making sales which their competitors are free to make does not prevent injury to competition—it prevents competition. Nor is competition at the retail level protected from injury by transferring business from refiners who sell to both jobbers and retailers to those refiners who sell only to jobbers.

The error in the Commission's logic results from its treating injury to a competi*tor* as being synonymous with injury to competi*tion*. Competition is a contest in which business rivals are the contestants. In any such contest someone is likely to be affected adversely, but it does not follow that the contest has been lessened.

The statement of the House Managers accompanying a Conference Report recently approved by the House[11] is in part—

> "Competition is a contest between sellers for the business of a buyer. In such a contest one seller gets the order while other sellers lose the order. That is competition. * * * In any competitive economy we cannot avoid injury to some of the competitors. The law does not, and under the free enterprise system it cannot, guarantee businessmen against loss. That businessmen lose money or even go bankrupt does not necessarily mean that competition has been injured. 'Competition,' Mr. Justice Holmes observed, 'is worth what it cost.'
>
> "We must always distinguish between injury to competition and injury to a competitor. To promote and protect competition is the primary function of the antitrust laws. However, we cannot guarantee competitors against all injury. This can only be accomplished by prohibiting competition."

This order seeks to protect individual competitors at the retail level from the effects of competition by in fact prohibiting competition.

---

[11] Conference Report (House Report No. 1422) on S.1008 filed October 13, 1949, approved by the House of Representatives, October 14, 1949.

If is not claimed that the practice complained of injured competition between the petitioner and other suppliers. As the lower court held, its sales in good faith competition with other refiners would not injure competition at that level. But this order lessens competition between refiners.

It is not claimed that competition was injured at the wholesale level. An increased number of sellers competing in good faith for the business of jobbers does not injure competition. Nor does the good faith meeting of an equally low price of other jobbers injure competition between them. But this order also lessens competition at that level.

Finally, the good faith meeting of an equally low price cannot be regarded as injuring competition at the consumer level. This order—designed to maintain rigid retail prices—merely deprives the consumer of the benefits of competition.

The four jobbers to whom petitioner made its lower tank car price could have purchased at tank car prices from other suppliers. One hundred twenty-six other Detroit jobbers in fact purchased from other suppliers at tank car prices, and it was the price action of such competitors as a class that adversely affected retailers.

We have shown above that those who remain in the jobbing business will continue to purchase gasoline at tank car prices. We have shown that competition is not injured when a supplier sells to jobbers at the price at which its competitors lawfully sell to jobbers. The seller's good faith in meeting the equally low price of a competitor is also apparent when he sells at the price at which his customer can purchase comparable products from others. Even apart from the specific offers in evidence, the fact that tank car prices are readily and lawfully available to jobbers in Detroit, as elsewhere throughout the United States, makes it apparent that in selling to its jobbers at the tank car price petitioner acted in good faith.

The avowed purpose of this order is to prevent price cutting at retail stations by denying jobbers the right to engage in competitive pricing. The Commission attempts to accomplish this by compelling their suppliers to control the jobber's resale prices. Price cutting can be avoided only by requiring all sellers to maintain rigid resale prices, and even then OPA experiences indicated that such prices could not be enforced by law unless justified by a supply and demand relationship approximating such price levels.

This order forces the petitioner to follow a course of conduct which, if adopted on its own initiative, would undoubtedly be held to impose illegal control over jobber resale prices. The order compels jobbers to follow a course of conduct which, if adopted by themselves or by agreement with their supplier, would in all probability be held to be a conspiracy in restraint of trade. These competitive restraints are no less iniquitous or burdensome because they are required by an order of the Federal Trade Commission.

Assume petitioner had asked its jobbers to maintain rigidly petitioner's posted tank wagon price. Those jobbers who did so, knowing that others had been asked to, and must do so for the success of the plan, would probably be charged with a conspiracy in restraint of trade under the Sherman Act. On substantially similar facts this Court found a conspiracy in *Interstate Circuit, Inc.* v. *United States*, 306 U. S. 208 (1939).

While petitioner has not written its jobbers asking them to maintain its posted tank wagon price, the Circuit Court has published a decision which tells those jobbers that they must maintain petitioner's posted tank wagon price under penalty of being cut off from their source of supply.

Assume the petitioner adopted a program of investigating prospective jobber customers to determine their price maintenance practices and refused to sell to those who indulged in price cutting. On substantially similar facts this Court found, in *Ethyl Gasoline Corporation* v. *United States*, 309 U. S. 463 (1940), an illegal control over jobber resale prices.

Even price maintenance at the retail level, in intrastate commerce, is unlawful under state antitrust laws. In *State of Wisconsin* v. *Retail Gasoline Dealers' Association of Milwaukee, Inc., et al.,*[12] the association and certain of its members were found to have conspired to maintain retail gasoline prices. The court found that the association sent bulletins to its members suggesting resale prices which were adhered to by more than 90% of its members, while only 55% of non-member dealers to whom the bulletins were sent maintained the suggested price.

This order requires what it is the purpose of the antitrust laws to prevent. It does not prevent injury to competition, it prevents competition. To sustain this order is to encourage price maintenance practices now regarded as illegal. We submit that the order is contrary to settled national policy.

D. THE COMMISSION'S CONSTRUCTION OF SECTION 2(b), ADMITTEDLY PRODUCING A RESULT NOT IN THE PUBLIC INTEREST, IS UNREASONABLE AND ILLOGICAL.

The Federal Trade Commission has repeatedly urged—both during the time the case was pending below and since the decision of the Court of Appeals—that the good faith meeting of a competitor's equally low price *should* be a full defense to a charge of price discrimination.

---

[12] Circuit Court of Milwaukee County, Wisconsin, Case No. 213-601, May 11, 1949, C.C.H. Trade Regulation Service, p. 62,284, ¶ 62,448.

Its publicly released Policy Statement of October, 1948 said good faith meeting of an equally low price was a defense to a charge of price discrimination, but a footnote added that in this case, then pending in the court below, the Commission was "seeking to ascertain" whether the defense was available where there was "proof [of] the statutory injury to competition."[13]

In January 1949 the Commission told a Senate Committee that good faith meeting of an equally low price should be a full defense because "the policy of the law should not discourage active competition by preventing the meeting of competition in good faith."[14] Three weeks after the decision of the court below, the Commission told another Senate Committee it saw no objection to a change in the law to make good faith meeting of an equally low price a full defense.[15]

In June 1949 the Commission told a House Committee that "all of the Commissioners believe it would be preferable to make the good faith meeting of competition a complete defense," because failure to do so "necessarily involves the risk of impairing the vigor of competition among sellers."[16]

Presumably the Commission entered, and now supports, this order (although strongly urging it should not be the law) because of strong convictions that its construction is required by the clear language of the statute and the expressed Congressional intention. Although the Commission's anomalous position cannot otherwise be justified, there is no clear basis on which to support its construction of the statute. The available authorities all support that construction of Section 2(b) which makes the good faith meeting of an equally low price a full defense. Petitioner has shown that the face of the statute (Brief pp. 19-21) as well as the legislative history (Brief pp. 27-28) support this construction of the statute.

---

[13] Notice to Staff, dated October 12, 1948, by Federal Trade Commission, publicly released on that date.

[14] Printed Hearings on S.236 (81st Congress) before a subcommittee of the Senate Interstate and Foreign Commerce Committee, p. 274.

[15] Printed Hearings on S.1008 (81st Congress), before a subcommittee of the Senate Committee on the Judiciary, p. 72.

[16] Printed Hearings on S.1008 (81st Congress) before a subcommittee of the House Committee on the Judiciary, p. 61.

The petitioner's brief (p. 25) points out that in *Federal Trade Commission* v. *Morton Salt Co.*, 334 U. S. 37 (1948), this Court held that a price difference to competing customers was itself sufficient to support a finding of injury to competition. This makes Section 2(b) meaningless if good faith meeting of competition is not a full defense. But the Commission has now gone a step further and in effect said that a seller's proof that his lower price was made in good faith to meet competition is itself proof of the required adverse effect on competition. In the Minneapolis-Honeywell order[17] the Commission said—

> "The competitive effects of respondent's discriminatory prices on other manufacturers of controls are persuasively indicated by its own arguments that its discriminatory prices were made for the purpose of meeting competition. These arguments show that respondent's discriminatory prices were made to retain the business of others and that they were largely successful in doing so. *To the extent that business is held by or diverted to respondent from its competitors by its discriminatory prices and unfair practices, competition has been adversely affected within the meaning of the law.*"

This Court has in three cases had occasion to consider the construction of Section 2(b). In each instance it assumed that the showing of good faith meeting of a competitor's equally low price was a full defense to a charge of price discrimination.[18]

---

[17] Order entered January 14, 1948 in In The Matter of Minneapolis-Honeywell Regulator Co., Docket No. 4920.

The Commission's 1941 Report to the Temporary National Economic Committee (Printed as Monograph No. 42) expressly asserted that the good faith meeting of an equally low price was a full defense to a charge of price discrimination under Section 2(b) of the Clayton Act, as amended by the Robinson-Patman Act.[19]

The Assistant Attorney General in Charge of the Antitrust Division (Herbert A. Bergson) has testified before a Senate Committee that *the present law* "permits sellers to justify otherwise forbidden price discrimination on the ground that the lower prices to one set of buyers were made in good faith to meet the prices of a competitor,"[20] and testifying before a House Committee he recommended the elimination of a statutory amendment that would have confirmed the decision of the court below.[21] The Assistant to the Attorney General (Peyton Ford) later wrote the Senate Committee confirming that *the present law* makes good faith meeting of an equally low price a full defense.[22]

---

[18] See *International Salt Company* v. *United States*, 332 U. S. 392, 3 (1947) where this Court said—"Of course, the Clayton Act itself permits one charged with price discrimination to show that he lowered his price in good faith to meet competition. Obviously, the District Court was not intending to prevent competition or to disable the appellant from meeting or offering it. The Government, too, says it would not oppose permitting a lower price to meet, in good faith, the equally low price of a competitor if the need arose." In *Federal Trade Commission* v. *Cement Institute, Inc., et al.*, 333 U. S. 683, 6 (1948) this Court said—"Section 2(b) permits an individual company to sell one customer at a lower price than it sells to another if the price is 'made in good faith to meet an equally low price of a competitor.' " And in *Federal Trade Commission* v. *A. E. Staley Mfg. Co.*, 324 U. S. 746 (1945) this Court noted "that the *defense* is that the price discriminations were made in good faith to meet competition" (p. 752) and that "the *defense* is a matter of evidence in each case" (p. 753).

[19] Report prepared by Walter B. Wooden and Hugh B. White of the Commission's staff and submitted to the Temporary Economic Committee by the Commission's Director of T.N.E.C. Studies. Monograph No. 42, p. 139.

[20] Printed Hearings on S.236 (81st Congress) before a subcommittee of the Senate Interstate and Foreign Commerce Committee, p. 77.

Even the Commission's Associate General Counsel (Robert B. Dawkins) testified before a Senate Committee that *the present law* made the good faith meeting of an equally low price a full defense, although as must be expected in view of the pendency of this case he added that others held a contrary view).[23]

The construction which the Commission has given the statute cannot be sustained by the plain language of the Act. It produces a result which the Commission has urged should not be the law.[24] The construction given runs contrary to the public interest and no economic public benefit can flow therefrom. The Department of Justice opposes the Commission's construction of the statute, as does its Associate General Counsel. This Court has assumed that the statute makes the showing of good faith meeting of an equally low price a full defense to a charge of price discrimination. We submit that it does do so.

[21] Printed Hearings on S.1008 (81st Congress) before a subcommittee of the House Committee on the Judiciary, p. 12.

[22] Printed Hearings on S.236 (81st Congress) before a subcommittee of the Senate Interstate and Foreign Commerce Committee, p. 320.

[23] *Ibid.*, pp. 92-3.

[24] Senate Bill 1008 is now pending in the Congress. In a form making the good faith meeting of a competitor's equally low price a full defense to a charge of price discrimination, the bill was approved by the Attorney General, the Federal Trade Commission, the Council of Economic Advisers, and the White House. See Congressional Record, July 6, 1949, page 9164. The Conference Report on the Bill (filed October 13, 1949, approved by the House October 14, 1949, and set for consideration by the Senate January 20, 1950) makes the good faith meeting of an equally low price of a competitor a full defense to a charge of price discrimination, subject to the limitation that the provision shall not make lawful any combination, conspiracy or unlawful agreement; or any monopolistic, deceptive, fraudulent or oppressive practice. House Report No. 1422.

CONCLUSION

It is respectfully submitted that the real parties in interest here are the gasoline jobbers who were not before the Commission. We urge that the order should be reversed.

Respectfully submitted,

WILLIAM SIMON,
One North La Salle Street,
Chicago (2), Illinois

Attorney for (Jobber)
Amicus Curiae.

December, 1949.

STANDARD OIL COMPANY, *Petitioner,*

v.

FEDERAL TRADE COMMISSION, *Respondent.*

BRIEF FOR AMICUS CURIAE.

(Citrin-Kolb Oil Company.)

The decisions below, jurisdiction to review, and statute involved are set forth at pp. 1-2 of Petitioner's Brief.

STATEMENT OF THE CASE.

The Complaint in this case challenged the right of Petitioner under the Robinson-Patman Act to sell its gasoline to its four jobber customers in Detroit at 1½¢ per gallon less than it sold to its service station customers in the same area (R. 2, 34). Petitioner defended on the ground that it made the lower price in order to retain the four jobbers as customers and to meet in good faith equally low prices offered them by competitors. Amicus Curiae, Citrin-Kolb Oil Company, is one of the four jobbers, and is immediately affected by the order of the court below.

THE FACTS.

Amicus will add to the facts stated by Petitioner only such facts as will underscore its interest in this proceeding. It began operations in 1922 and was recognized as a jobber by Petitioner in 1929, after which it engaged largely in the wholesale business (R. 5060). It operated retail stations only when a station it owned or leased became tenantless, and then only until some suitable tenant could be found (R. 859, 5060). The amount of gasoline sold by it at retail declined from 15.4% in 1937 to 6.5% in 1940 (R. 5060). From January 1, 1938, to December 31, 1940, Amicus sold a million gallons of gasoline annually to Langer and Cohen, retail service station operators, at 1 cent per gallon off tank-wagon price; and it sold another retail service station operator at ½ cent per gallon off tank-wagon price (R. 5166). The lower prices to Langer and Cohen and the other retailer were made by Amicus to meet offers by competing sellers at a lower price (R. 893-894, 883). Amicus has been identified with Petitioner's products from 1926 at least (R. 1258), and the business of Amicus and its station-customers has been built around Petitioner's products.

THE INTEREST OF AMICUS.

If the order of the court below is permitted to stand, the business of Amicus will be seriously threatened: (1) it will not be able to meet the competition of other jobbers or suppliers who seek to lure its service-station customers by lower prices; (2) it will be unable to supply such of its service stations as it is compelled temporarily to operate during tenantless periods without paying Petitioner a different and higher price; (3) it will be able to compete freely only if it changes to some other supplier and abandons the Standard Oil good will that it has built up over the past quarter of a century; and (4) it might then lose some of its service-station customers who have likewise been identified with Petitioner's products over a long period, and might wish to retain a Standard Oil affiliation.

Amicus is alarmed by the challenge, inherent in the decision below, to the traditional right of a jobber to sell both at wholesale and retail. It believes that any fetters on free competition in the oil industry must react to its own disadvantage. It submits that the face of the statute requires reversal of the decision below. Were the statute less plain, weighty considerations of policy should yet impel this Court to adopt a construction of § 2(b) of the Robinson-Patman Act necessitating reversal.

SUMMARY OF THE ARGUMENT.

I. Section 2(b) creates an exemption from the prohibitions of § 2(a). This is uncontroverted with reference to the "cost" differential proviso of § 2(a) which affords the "justification" of § 2(b) that "rebuts" the Commission's prima facie case, and which can not be defeated by proof of "injury to competition". The parallel § 2(b) provision for "rebutting the prima facie case" by showing that the "lower price * * * was made in good faith to meet an equally low price" must equally be given the effect of a conclusive "defense" or exemption.

The view of the court below that removal of the "meeting competition" proviso from § 2(a) and its insertion in § 2(b) removed it from the "defense category" gives to mere physical location the effect of an implied repeal when requirements of draftsmanship furnish an easier explanation. The Commission's argument that the § 2(b) "rebuttal" may be defeated by a showing of the "injury to competition" prohibited by § 2(a) makes the availability of the exemption from the prohibition turn on the absence of the prohibited conduct. This provides a defense where none is needed and reads the exemption out of the statute. Such a construction is so unreasonable as to require rejection.

The legislative history is too confused to carry weight, and were it clearer, it could not alter the plain meaning of the statutory language, since a literal construction does not produce an absurd or unreasonable result.

II. The privilege accorded by § 2(b) to a seller of defending himself against a competitor who lures his customers by a lower price is as vital in a competitive economy as the right of self defense against personal attack. It also benefits consumers because competing offers of lower prices to a seller's customers generate pressure conducing to lower prices.

The practical consequences of the order below are of no benefit to consumers or retailers and directly injure Amicus and Petitioner. Were § 2(b) less plain, the Court should reverse an order which injures some without helping others.

ARGUMENT.

I.

The Face of the Statute.

Section 2(a) contains prohibitions from which, we shall demonstrate, § 2(b) grants an exemption. The Commission maintains that availability of that exemption depends on proof that Petitioner was not guilty of the conduct prohibited. Such a construction offends common sense and is precluded by the plain terms of the statute.

Section 2(b), 15 U. S. C. §13(b) provides:

> "Upon proof being made, at any hearing on a complaint under this section, that there has been discrimination in price or services or facilities furnished, the burden of *rebutting the prima facie case* thus made by showing *justification* shall be upon the person charged with a violation of this section, and *unless justification* shall be affirmatively shown, the Commission is authorized to issue an order terminating the discrimination: *Provided, however,* That nothing contained in sections 12, 13, 14-21, 22-27 of this title shall prevent a seller *rebutting the prima facie case* thus made by showing that his lower price or the furnishing of services or

> facilities to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor, or the services or facilities furnished by a competitor." (Emphasis supplied throughout)

The "rebuttal" and "justification" provided for by the first part of § 2(b) incontrovertibly furnish a complete defense to the Commission's prima facie case in the case of the "cost" differentials exempted by the "cost" proviso of § 2(a). This results from the express terms of the proviso [15 U. S. C. § 13(a)]:

> "*Provided*, That nothing contained in sections 12, 13, 14-21, 22-27 of this title shall prevent differentials which make only due allowance for differences in the cost of manufacture, sale, or delivery * * * ."

And the court below recognized that:

> "The amended Section 2(a) * * * *kept as a defense* the cost savings and other defenses of the Clayton Act, * * *." (R. 5300)

Proof of a cost differential, therefore, in "rebutting the prima facie case" under the first clause of §2(b) furnishes "justification" in terms of a conclusive defense. That the "justification" was meant to be conclusive is further demonstrated by the fact that

> "*unless* justification shall be affirmatively shown, the Commission is authorized to issue an order terminating the discrimination * * * ."

By plain implication, this language exhibits an intention to withhold the power to issue an order *if* "justification shall be affirmatively shown." And it manifestly leaves no room for a replication by the Commission that there has been an injury to competition.

The § 2(b) first part provision for "rebutting the prima facie case * * * by showing justification," including proof of "cost differentials," is paralleled by the second part provision for "rebutting the prima facie case * * * by showing" the meeting of competition in good faith. Since the first part of § 2(b) equates rebuttal with a conclusive "defense," the identical provision for "rebutting the prima facie case" by proof of "meeting competition" contained in the second part of § 2(b) must equally be given the effect of ~~such a~~ "defense." This Court has itself made that identification:

> "The Robinson-Patman Act was passed to deprive a large buyer of such [quantity-purchase] advantages *except* to the extent that a lower price *could be justified* by reason of a seller's *diminished costs* due to quantity manufacture, delivery or sale, *or* by reason of the seller's good faith *effort to meet* a *competitor's* equally *low price*." *Federal Trade Commission* v. *Morton Salt Co.*, 334 U. S. 37, 43.

As the italicized word "except" suggests, we are dealing with an "exemption" from the prohibitions of § 2(a). The "cost" differential proviso contained in § 2(a) is patently an "exemption" from those prohibitions; and this Court has analogized the "justification" under § 2(b) to the "exemption" afforded by § 2(a):

> "the general rule of statutory construction that the burden of proving *justification* or *exemption* under a special exception to the prohibitions of a statute generally rests on one who claims its benefits, requires that respondent undertake this proof under the proviso of § 2(a). Secondly, § 2(b) of the Act specifically imposes the burden of showing justification upon one who is shown to have discriminated in prices." *Federal Trade Commission* v. *Morton Salt Co.*, 334 U. S. 37, 44-45.

This statement is in accord with the House Report on the original Patman bill, which, in discussing § 2(a) of that bill, the language of which is the same as the present § 2(b), stated:

> "This proviso represents a *contraction* of an *exemption* now contained in section 2 of the Clayton Act

which permits discriminations without limit where made in good faith to meet competition. It should be noted that while the seller is *permitted to meet local competition,* it does not permit him to cut local prices until his competitor has first offered lower prices, and then he can go no further than to meet those prices. If he goes further, he must do so likewise with all his other customers, or make himself liable to all of the penalties of the act, including treble damages. In other words, the *proviso permits* the seller *to meet the price* actually previously offered by a local competitor * * *."[1]

> "As originally introduced, the Robinson-Patman amendment contained no provision similar to that in §2 of the Clayton Act as originally enacted, which provided 'That nothing herein contained shall prevent * * * discrimination in price in the same or different communities made in good faith to meet competition.' In the Senate this existing provision was added by amendment to the Robinson-Patman bill. 80 Cong. Rec. 6426, 6435. In the House, the Judiciary Committee reported the bill with the proviso, substantially as enacted in §2(b). 80 Cong. Rec. 8139. The Conference Committee rejected the Senate version and approved the House amendment." Federal Trade Commission v. A. E. Staley Mfg. Co., 324 U. S. 746, 752, n. 1.

Thus the intention of the House was given effect.

We have referred to the legislative history to confirm its plain meaning. On the whole, however, the debates are so equivocal and confused as to preclude confident resort thereto. Here, as in Gemsco, Inc., v. Walling, 324 U. S. 244, 260,

> "The plain words and meaning of a statute cannot be overcome by a legislative history which, through strained processes of deduction from events of wholly ambiguous significance, may furnish dubious bases for inference in every direction."

Were that history less equivocal, it could yet not derogate from the plain meaning of the statutory terms, since a literal application does not produce an absurd or unreasonable result. R. E. Schanzer v. Bowles, 141 F. (2d) 262, 264; Fides, A. G. v. Comm'r of Internal Revenue, 137 F. (2d) 731, 735; Wodehouse v. Comm'r of Internal Revenue, 166 F. (2d) 986, 992; Hatfried, Inc. v. Comm'r of Internal Revenue, 162 F. (2d) 628, 631; Peoples Natural Gas Co. v. Federal Power Commission, 127 F. (2d) 153, 155; McComb v. C. A. Swanson & Sons, 77 F. Supp. 716, 732.

---

[1] H. Rept. No. 2287, 74th Cong., 2d Sess., p. 16 (1936).

Manifestly it was the intention of the House to perserve the "meeting competition" defense, to "contract" rather than withdraw the "exemption".

As we read the record, three arguments *contra* have been relied on by the Commission and the court below. We have pointed out that the reliance of the court below on the legislative history is misplaced. *Supra* note 1. The court likewise advanced the view that the amended § 2(a)

> "*took out of the defense category* the provision for making a lower price to meet competition. As to this it was provided in Section 2(b) * * *." (R. 5300)

Thus the mere physical location of one exemption as contrasted with another was transformed into an implied repeal. An implied repeal is not favored, and there is an easier explanation. The present § 2(b) is broader in scope than the original Clayton Act proviso; it refers not only to discrimination in price as did the prior § 2, but also to services and facilities, now covered by § 2(e). Location of the proviso in § 2(a), which substantially re-enacts the old § 2, would have required that it be repeated in the new § 2(e), a repetition avoided by incorporating the exemption in § 2(b).

Finally, the Commission seeks to defeat the § 2(b) exemption by resort to § 2(a), maintaining

> "The meeting of an equally low price of a competitor in good faith is not a defense to a charge of price discrimination where competitive injury is affirmatively shown and so replaces the rebuttable presumption of the prima facie case."

This, the Commission elaborates,

> "results from the difference between such a case and the *prima facie* case referred to in Section 2(b). Section 2(b) defines a prima facie case as '* * * proof * * * that there has been discrimination in price * * *'. *This definition must be compared with the prohibitions of Section 2(a)* which makes such a dis-

> crimination unlawful only in the event it injuriously affects competition. If proof of good faith in meeting an equally low price of a competitor is made, then Commission could no longer rely upon its prima facie case, but must show additional and affirmative evidence that the effect of the discrimination may be to substantially lessen competition * * *. Where such injurious effect on competition is affirmatively proved, the proof made as to meeting an equally low price of a competitor under the proviso of Section 2(b) does not constitute a substantive justification or defense." (R. 5180-5181)

Thus the Commission makes the test of the exemption from the prohibition of § 2(a) the absence of the conduct prohibited!

To implement the prohibition of § 2(a), § 2(b) sought to lift from the Commission the burden of *proving* that a price discrimination *resulted* in substantial *injury to competition* by making proof of price discrimination alone a prima facie case. It remained open to the Commission, of course, to fortify this presumption, to bolster its prima facie case by proof of actual injury to competition. But the § 2(b) rebuttal becomes necessary only when there is a violation of § 2(a), whether that violation be shown by presumption or proof. Stated differently, § 2(b) provides for a complaint (which can rest on the prima facie case), an answer rebutting—and no more. The Commission would import into § 2(b) a "replication" to the answering rebuttal of respondent,[2] a "replication" for which no provision was made, and which would merely consist in proving the § 2(a) injury to competition which Congress declared *need not be proved.*

If the rebuttal of § 2(b) is only to prevail upon proof that respondent was not guilty of the conduct prohibited by § 2(a), the privilege of rebutting by a showing of "meeting competition" will be transmogrified into a meaningless maneuver. The Commission's attempt to make the § 2(b) exemption from the prohibitions of § 2(a) turn on proof that respondent was not guilty of the conduct prohibited by § 2(a) would read the § 2(b) exemption out of the statute. For the lower price to meet competition, conferring, as it must, a price advantage to the favored customer over other customers, will in almost every case involve a "reasonable possibility" of injury to competition and hence constitute an unlawful "discrimination." *Federal Trade Commission* v. *Morton Salt Co.,* 334 U. S. 37, 46. In sum, § 2(a) prohibits only discriminations which substantially lessen competition. Where a discrimination does not have that effect, there is no need to invoke § 2(b). To make the § 2(b) exemption depend on conduct that is not prohibited by § 2(a) is to provide a defense where none is needed. Thus the Commission's construction of § 2(b) is so unreasonable as to require rejection.

---

[2] The Commission is of course free to disprove the "rebuttal" of meeting competition in good faith without "replication." Compare Rules 7(a) and 7(d) of the Federal Rules of Civil Procedure.

We submit, in light of the foregoing, that the terms of § 2(b) disclose that proof of meeting competition in good faith, like proof of the cost differentials of § 2(a), furnishes a complete defense and exempts the respondent from the prohibitions of § 2(a).

II.

Considerations of Policy.

(a) Were the statute less plain—and the divided counsels of the Government (See Petitioner's Brief, pp. 29-35) demonstrate that the Section is at best equivocal—considerations of policy would yet dictate reversal of the decision below. Construction of an equivocal statute requires analysis of the underlying practicalities. Cf. *Textile Mills Sec. Corp.* v. *Comm'r of Internal Revenue,* 314 U. S. 326, 335. As Mr. Justice Holmes said of a truly doubtful case,

> "what really is before us is a conflict between two social desires, each of which cannot both have their

> way. The social question is which desire is stronger at the point of conflict."[3]

The conflicting desires in the present case are highlighted by the divisions in the Government: the desire of the Anti-Trust Division, which we share, to foster free competition,[4] as opposed to the Commission's desire to swaddle a particular group in anti-competitive safeguards.

That we are not unjust in thus describing the Commission's position is made manifest by the record. Harrison, a Government witness, testified that to prevent Standard Oil from selling to the four jobbers involved and to substitute a comparable major company as seller "would not in any way cure or help to cure this competitive [retail] situation." (R. 344-345). Thereupon Commission counsel asked

> "If *all* of the major oil companies were prevented from selling to retail operators at tank car prices in the Detroit area, would that improve the competitive situation in Detroit?
>
> "A. I think it would."[5]

---

[3] Quoted in Frank, *Law and the Modern Mind*, 258 (1935).

[4] "While we recognize the competitive problem which arises when one purchaser obtains advantages denied to other purchasers, we do not believe the solution to this problem lies in denying to sellers the opportunity to make sales in good faith competition with other sellers." Assistant Attorney General Bergson testifying before H. Comm. on Judiciary, Hearings on S. 1008, 81st Cong., 1st Sess., June 8, 1949, p. 12.

[5] The Trial Examiner found that a "marketeer" with a favorable differential

> "reduces his price to the public. That is always the start of the price cutting orgies which occur periodically.
>
> "If *all* the major oil companies were prevented from selling to retail operators at tank-car prices in the Detroit area it would improve the competitive situation in Detroit." (R. 5118)

In a vigorous dissent from the Commission's Order (R. 5257, 5269) Commissioner Lowell B. Mason stated:

> "In my opinion, the Commission in this case has dealt with the facts and the law just as Procrustes dealt with the unfor-

This was reaching for the moon; for those suppliers who sell only to jobbers, including the jobbers engaged in retail operations, are outside the ban of the Robinson-Patman Act, as the court below recognized.[6] But it harks back to the desire to insulate middlemen from competition which inspired the Robinson-Patman amendment.

That amendment was engrafted on the anti-trust law—the legal mainspring of competition—largely in response to pressure[7] by middlemen for protection from the over-successful competition of the chain stores. By employing streamlined methods of distribution, by developing low-gross high-volume selling, the chains demonstrated the inefficiency of the older high-gross low-volume method of distribution. They markedly reduced the cost of distribution,

---

tunate guests who slept in his bed. The Commission has cut off the facts of the case that do not fit in with the order, and it has stretched out the statute until it is no longer the law Congress passed but becomes the law that the Commission would like to enforce."

We commend the realistic analysis of Commissioner Mason to the Court.

[6] R. 5304. And the Commission has squarely held that a manufacturer may sell at "one-price" to wholesalers and selected retailers, Bird & Co., Inc., 25 F. T. C. 548 (1937); and see cases digested in Chairman Ayres' report to the Congress, 81 Cong. Rec. App. 2339, 2340 (1937), even though those retailers who purchase from wholesalers at a mark-up are necessarily placed at a competitive disadvantage as against the "selected" retailers.

[7] McNair, *Marketing Functions and Cost and the Robinson-Patman Act* (1937) 4 Law and Contemp. Prob. 334; Burns, *The Anti-Trust Laws and the Regulation of Price Competition* (1937), 4 Law and Contemp. Prob. 301, 308; Evans, *Anti-Price Discrimination Act of 1936* (1936), 23 Va. L. Rev. 140, 140-146; Note, *Trouble Begins in the "New" Sherman Act: The Perplexing Story of the A. & P. Case*, 58 Yale L. Jour. 969, 970 (1949).

We do not suggest that *unequivocal* legislation, enacted in response to "pressure", should be inhospitably received, but merely that in construing an ambiguous portion of the pressure-generated Robinson-Patman Act, the Court may more safely rely on the main stem of anti-trust principle than on a "pressure" deviation therefrom.

thereby making an important economic contribution; for while mass production has steadily reduced costs, there remains a large spread between such costs and retail prices. Measured by the interest of consumers, the Robinson-Patman amendment merely preserved from the purging force of competition a group of middlemen who levied an uneconomic toll on the ultimate consumer.[8]

Section 2(b) was a little oasis in this anti-competitive desert; it authorized a seller to defend himself against a competitor who sought to lure a customer through a low price. We cannot improve on the explanation by highly-placed Commission officials in 1941—which, if it ran *against* petitioner, would doubtless be dignified as a contemporaneous administrative construction:

> "The amended Act now safeguards the right of a seller to discriminate in price in good faith to meet an equally low price of a competitor * * *. The right of self-defense against competitive price attacks is as vital in a competitive economy as the right of self defense against personal attack." T. N. E. C. Monograph No. 42 at p. 139 (1941) "*An Analysis of the Basing-Point System* * * *" by Walter B. Wooden, Assistant Chief Counsel and Hugh E. White, Examiner, of the Federal Trade Commission.

This right of self defense also conferred a boon on consumers, for "aggressive buying makes inroads on fixed prices." Learned and Isaacs, *The Robinson-Patman Law:*

---

[8] It is one of the ironies of this "pressure" legislation that the Court below should have suggested the elimination of wholesale groups, a chief sponsor of the Act. The Court suggested that Standard Oil "discontinue selling to wholesalers at a price different from that made to retailers," saying that this could result in "elimination of wholesalers" "only where their existence cannot be justified except on the exploitation of a differential in price *not justified by* any *cost savings* to obtain that price" (R. 5300). This would appear to dispatch the well-recognized functional discounts to wholesalers as distinguished from retailers. Thus does an irrational amendment spawn irrational consequences.

Some Assumptions and Expectations (1937) 15 Harv. Bus. Rev. 137-139. It is well-known that

> "manufacturers frequently hesitate to make downward price changes for fear of 'spoiling the market' in case demand proves to be inelastic." McNair, *supra* note 7 at 337.

One of the few ways in which a seller's "one-price policy" could be influenced downward under the Robinson-Patman Act was by the pressure of competing offers to his customers at a lower price. Given enough of these, the seller would be forced to react to buyer pressure and lower his prices all along the line.[9]

It must not be over-looked that a small seller too may find that his customers are being lured by the lower prices of competing sellers, large and small. To force such a seller to make a general reduction of his prices in order to meet competition is to deprive him of the right of self defense, for a general reduction can often drive him to the wall.

Nor should the effect of an individual price-reduction to meet competition be under-valued. Sellers have learned that a price reduction has an

> "unfortunate tendency to spread, as the long history of frantic efforts to stamp out price discrimination will testify." [10]

Thus the price reduction to meet a competitor's lower price may be the entering wedge for generally lower price levels.

---

[9] Criticism has been levelled at the oil industry on the ground that it is gripped by

> "a pronounced fear of 'spoiling the market,' and a corresponding disinclination to undertake open price competition." Rostow, *A National Policy for the Oil Industry*, 12 (1948).

Were an oil seller to risk 'spoiling the market' in order to meet competition, he would run into the ban of the decision below unless he would cut prices all along the line.

[10] Note in Yale L. Jour. *supra*, note 7 at 975, and see Adelman, *Effective Competition and the Anti-Trust Laws*, 61 Harv. L. Rev. 1289, 1331 (1948).

Abolish price competition and sellers will be constrained to embrace brand competition. But brand emphasis and high advertising costs tend to increase the ultimate price to the consumer and to make for a "sticky" price.[11]

Against this background we submit that § 2(b) should be construed to safeguard a merchant's right of self defense, and to give expression to the consumer's interest in lower prices. We turn from general economic considerations to the practical consequences of effectuating the Commission's position in this case.

(b) Even if the face of the statute afforded stronger support for the Commission's position, the *practical consequences in this case* of the Commission's position should make this Court reluctant to adopt a Procrustean rule. That consumers in Detroit can derive no benefit from an attempt to freeze retail prices is self-evident. It is no less plain that the Detroit retailers cannot benefit from elimination of Standard Oil as the supplier of the "price-cutting" jobbers who sell at retail, for the latter can shift to some other supplier who, because he sells only at the wholesale "one-price", is not prevented from selling to them at Standard's jobbers price or lower. These are not idle speculations, for the Trial Examiner found that Standard's competitors tried at various times to lure these jobbers away by lower quotations for gasoline of like grade or quality (R. 5100-5104). Is not the "injury" to the retailer technical rather than real when the price-cutting jobber can and will receive from Standard's competitor the low price offered by Standard to meet that competitor's equally low price?

The jobber too is placed under serious disadvantages by the order of the court below. Since Standard is advised to cut off jobbers who do not adhere to its prices (R. 5304), the order contemplates that its jobbers will maintain those prices. Competing jobbers, who purchase from Standard's "one-price" competitors, labor under no such disability. They may cut prices to their heart's content and lure away service-station customers from Standard's jobbers. To be sure, Standard's jobbers can escape from this restriction by switching to competing suppliers who have offered lower prices. But this is to jettison the goodwill built up over a long period of association with Standard's brands, and to impel them to indulge in fresh price-cutting in order to induce acceptance of new brands of gasoline. And it may lose them the customers who have built their business around Standard's brands. The real injury thus inflicted on the jobbers (R. 5103) is balanced by no compensating advantage to retailers, for the jobbers will buy as cheaply elsewhere and continue their price-cutting.

---

[11] Burns, Symposium, *The Effectiveness of the Federal Anti-Trust Laws*, 39 Amer. Econ. Rev., at p. 694 (1949); Adelman, *supra*, note 10 at 1328.

There is finally the effect on Standard. The logic of the decision below requires it to abandon either its service stations customers or its jobbers who sell at retail.[12] True, it may take over the business of its jobbers, but the Government views with alarm the expanding reach of big business. An alternative is to "police" its customers, though the court below stated that Standard "should not be required to police its wholesalers." (R. 5304). Yet it placed Standard under liability

---

[12] In his dissent (R. 5257, 5263) from the Commission's Order, Commissioner Lowell B. Mason stamped the Commission's insistence that a jobber be charged one price for what he sells at wholesale and another for what he sells at retail as "determining price by use", stating that it

> "was once considered and flatly rejected by Congress. 'Pricing by use' was including in the House Committee (Judiciary) Report 2287 of March 31, 1936, 74th Cong. 2d Session. This is what it said:
>
> > 'For the purpose of such classification of customers as wholesalers or jobbers or retailers, the character of the selling of the purchasers and not the buying shall determine the classification, and any purchaser who * * * does both a wholesale and retail business shall, irrespective of quantity purchased, be classified as a wholesaler on purchases for sale to retailers only * * * and as a retailer on purchases for sale to consumers.'
>
> This ideology Congress refused to adopt and before final passage of the Robinson-Patman Act, all such language was stricken from the bill."

> "if it sells to a wholesaler it knows or *ought to have known* is engaging in *or intends to engage in* the competitive practices condemned by this proceeding." (R. 5304).

Given jobbers who are known to have engaged in price-cutting in the past, this formula renders "policing" almost inescapable if Standard is to avoid liability in the future. The remedy, suggests the court below, is to cut off price-cutting jobbers—a startling suggestion, coming from a court. Price-fixing is in bad repute; a grudging exception has been made for those who exercise a right to choose customers and reject those who cut prices, *Federal Trade Commission* v. *Beech-Nut Packing Co.*, 257 U. S. 441; and this Court not long since said that one who exercises this right treads a "narrow path." *United States* v. *Bausch & Lomb Optical Co.*, 321 U. S. 707, 729. A misstep from this "narrow path" inferentially invites charges of anti-trust violation which can be safely faced only after the "narrow path" is somewhat more plainly demarked. And the jobbers may shift to Standard's competitors rather than maintain its prices.

We submit that no practical benefits to retailers or consumers can result from the order, that it inflicts useless injuries on retailing jobbers, and that it will deprive "dual" sellers of a large portion of their business without benefiting consumers or retailers. We submit that a construction of § 2(b) which will "permit" a seller to meet competition in good faith will preserve both the seller's right of self defense and the consumer's interest in price competition. These policy considerations should impel this Court to reverse the decision of the court below. Finally, we submit that the terms of §2(b) plainly require this Court to reverse that decision.

Respectfully submitted,

Preliminary Statement of Case 3

The Factual Background of Petitioner's Discriminations in Price in Detroit 5

The impact of price discrimination on retail gasoline competition 5

Petitioner refuses to sell to its retailer customers, other than Ned's, in tank car quantities at tank car prices 8

Petitioner's retailer customers cannot purchase their gasoline from wholesalers 11

No true competition exists between petitioner and its wholesaler customers 13

The Contested Issues: Contentions of the Parties 18

Summary of Argument 20

Argument 24

Point I—The legislative history of the Robinson-Patman Act shows that Congress intended to eliminate "meeting competition" as an affirmative defense or justification for price discrimination prohibited by Section 2(a). Petitioner's interpretation of the proviso of 2(b) would defeat the principal objective of the Act, which was to protect competition between individual purchasers from the same seller 24

PAGE

POINT II—Acceptance of petitioner's construction would mean that the Robinson-Patman Act weakened the Clayton Act. Petitioner has not justified its *difference* in prices on the ground of meeting competition, which even old Section 2 required 34

POINT III—Section 2(b) is a purely procedural section governing only Federal Trade Commission proceedings. It makes proof of meeting competition effective as rebuttal in a Commission proceeding to the same extent as in court actions, to which Section 2(b) does not apply. Such proof will be effective in some cases and not in others 41

POINT IV—This case presents no substantial constitutional question 47

POINT V—Petitioner's objections to Paragraph 6 of the Commission's order are without merit. The prohibitions of that paragraph are essential to the effectiveness of the order 48

Conclusion 55

STANDARD OIL COMPANY,
Petitioner,
vs.
FEDERAL TRADE COMMISSION,
Respondent.

BRIEF ON BEHALF OF RETAIL GASOLINE DEALERS ASSOCIATION OF MICHIGAN, INC., MICHIGAN PETROLEUM ASSOCIATION, INC., AND NATIONAL CONGRESS OF PETROLEUM RETAILERS, INC., *AMICI CURIAE.*

Interest of Amici Curiae.

Retail Gasoline Dealers Association of Michigan, Inc. is a Michigan non-profit membership corporation serving the interests of the retail gasoline dealers of that State. The Association has more than 2,000 members in the State of Michigan, and more than 1,450 members in the Detroit Metropolitan Area. Its Detroit membership is fairly representative of all the retail gasoline dealers of that area.

The retail gasoline dealers of Detroit have a direct and vital interest in the outcome of this proceeding. They are the principal beneficiaries of the order of the Federal Trade Commission which is the subject of the proceeding, and are the persons who would be most directly affected if the decree of the United States Court of Appeals affirming that order should be set aside.

Michigan Petroleum Association is also a non-profit membership corporation, representing the independent jobbers of Michigan. The jobbers of Michigan are engaged in the business of petroleum marketing in the specific geographical areas concerned in this case, and are directly interested in the decree herein due to the protection which it affords to them and to their customers.

National Congress of Petroleum Retailers, Inc., incorporated under the laws of Michigan as a non-profit membership corporation, is a trade congress of affiliated retail gasoline dealer associations throughout the nation, formed for the purpose of fostering and promoting the interests and welfare of the 275,000 gasoline retailers in the United States. It is the only trade association of retail dealers in petroleum products having a nation-wide representation. Its membership is comprised of 38 state and local associations of petroleum retailers (including the Michigan Association) located in twenty-three states and the District of Columbia.*

The interest of the National Congress of Petroleum Retailers in the affirmance of the decree of the court below is identical with that of the Michigan retailers' association. The record herein indicates that the practices prohibited by said decree are engaged in by petitioner and by other oil companies in areas in various parts of the United States.

The complaint herein charged, and the Commission found, that petitioner has discriminated in price in the sale of its gasoline in the Detroit metropolitan area by selling such gasoline to four dealers, classified by petitioner as jobbers but who resell in whole or in part at retail, at prices substantially lower than the price which petitioner charges for the same gasoline to the 350 to 400 other retail dealers whom it supplies in that area. The Commission found, and it is not now disputed, that these price discriminations have had and may have the effect of injuring, destroying and preventing competition between the four favored dealers and the other retailers in Detroit who are forced to purchase their gasoline from petitioner at higher prices. The Commission's order, and the decree of the Court of Appeals here for review, prohibit those discriminations in price. Said order and decree have for their direct purpose and primary effect the protection of the retail gasoline dealers of Detroit and other areas served by petitioner from injurious and ruinous competition engendered by petitioner's said discriminations. Presumably the law of this case will be observed and followed by other oil companies in Detroit and elsewhere. The retail gasoline dealers of Detroit and of the nation, therefore, have a direct and important interest in the said order and decree.

---

* A list of the affiliated gasoline retailer associations comprising the membership of the National Congress of Petroleum Retailers is

Preliminary Statement of Case.

The situation presented by this case is that of a large gasoline retailer, and three wholesalers who resold in part at retail, who were able to demand and obtain, because of the quantities in which they purchased, a substantially lower price for petitioner's gasoline than the price charged for the same gasoline to more than 350 other retailers reselling it in competition with the four favored dealers under the same brands. While the favored dealers were classified by petitioner as "jobbers" and bought in tank car quantities, they were in fact retailers and the Commission found that the lower price to them was not justified by any cost savings to petitioner in serving them. The Commission retailers a substantial competitive advantage over the retailers paying the higher price, which has resulted and may result in serious injury to competition.

One of the wholesalers not only resold at retail, but also passed along a part of its price advantage to certain of its customers, thereby giving them as well a competitive advantage over the retailers buying from petitioner direct.

The Commission concluded that by these discriminations petitioner was violating *Section 2(a)* of the Clayton Act. The sufficiency of the Commission's findings to support that conclusion is not in dispute, except as to interstate commerce. Petitioner's principal contention is that Section 2(a) is not a complete section defining a prohibited offense, but is modified by the proviso of Section 2(b); that a *discrimination* in price declared unlawful by Section 2(a) is not unlawful if the seller can show only that the *lower* of his two prices was made in good faith to meet a price offered by one of his competitors; and that such a showing is a complete defense to a charge of violation of Section 2(a) regardless of the amount of the discrimination and regardless of its effect on competition between the seller's customers.

The Commission held that the effect to be given proof of "meeting competition" is not a matter of law but a matter of evidence, and that such proof was not available to petitioner as a defense *on the facts of this case* because it did not and could not rebut or overcome the Commission's evidence of injury to competition resulting from the discrimination. The Commission entered its cease and desist order accordingly, which order has been unanimously affirmed (with slight modification) by the United States Court of Appeals for the Seventh Circuit.

The Factual Background of Petitioner's Discriminations in Price in Detroit.

The Impact of Price Discrimination on Retail Gasoline Competition.

There is no business in which competition is more sensitive to, or more immediately affected by, price discrimination than the retail gasoline business. There are several reasons why this is true.

First, the gasoline trade is on wheels. In a large metropolitan area like the Detroit area the average driver of an automobile can without inconvenience buy gasoline at any one of hundreds of service stations throughout a territory of many square miles through which he drives regularly. There are 3700 or 3800 retail gasoline service stations in metropolitan Detroit (R. 298), of which some 450 stations (including those supplied by wholesalers) dispense petitioner's gasoline from Red Crown pumps (R. 5057-60). A commuter who usually buys his gasoline at a service station near his suburban home will pass dozens of service stations every day driving to and from his work, and can and will transfer his business to a station many miles from his home when he sees a price cutting sign advertising a cut of even a fraction of a cent a gallon. For this reason, competition with a retail gasoline station is not limited to nearby stations, and a competitive advantage obtained by one station, particularly where located on a main artery of traffic, will be felt by other stations many miles away.

A second reason for the sensitivity of competition between retail gasoline dealers is that the volume of retail gasoline business is practically constant, except for seasonal variations, depending almost entirely upon the number of automobiles in use in the area from year to year. There is no such thing as "new" gasoline business to be obtained by advertising, salesmanship or price cutting. If a dealer increases his business by any of these means he must do so by taking that business away from other dealers (R. 153). This means that whenever a gasoline retailer obtains an advantage in price which enables him to increase his volume, the increase will be at the expense of other dealers and will be immediately felt.

When one retail dealer obtains a price advantage in purchasing gasoline, price cutting to attract more volume is the almost inevitable result (R. 320, 1047). Price is the most potent factor in gaining and regaining customers at a retail service station. The vast majority of gasoline purchasers in Detroit are wage earners. They are very price-conscious, and price is the predominating factor that brings their trade in or keeps it away (R. 325, 338). Since the branded gasolines of the major oil companies are of substantially the same quality in the public mind (R. 325), a lower price at one service station selling a major brand than at another is a very important factor in attracting business.

Still another reason why a price advantage given certain dealers is not only quickly felt in the retail gasoline business but has a serious effect upon the ability of other retailers to compete, is found in the fact that in a highly competitive area like Detroit the dealer's margin between the price he pays and the price at which he sells is very narrow. From November, 1939 to the time this case was tried the margin in Detroit between the posted tank wagon price of the major oil companies and the prevailing retail selling price was only 3.3 cents a gallon (Comm. Ex. 3, R.

4715). A survey of retail gasoline marketing costs in Detroit made in 1938 by Herbert F. Taggart, Professor of Accounting at the University of Michigan, showed that the average cost of ~~selling~~ gasoline at retail service stations was 4.8 cents a gallon, and that the average cost of sale by the most efficient 25% of the stations was 3.5 cents a gallon (R. 674, 4748, Comm. Ex. 76). These statistics show that, allowing a reasonable salary for the service station operator as a cost of sale, most service stations in Detroit had to sell gasoline at or below cost and rely on the sale of other products for profit, if any. This explains why most retail dealers paying the tank wagon price cannot profitably cut their selling price to obtain additional volume and why their ability to compete at all is seriously endangered when part of their customers are diverted to the stations of other dealers who are enabled to cut their price by reason of being permitted to buy in tank car quantities at a differential greater than their cost of distribution (R. 323-4).

Petitioner's tank car price to the four favored dealers for its Red Crown gasoline which they resold at retail, was 1½ cents a gallon below the tank wagon price charged other retailers. This differential gave the tank car buyers a net price advantage over their competitors of something more than a cent a gallon. (Critin-Kolb was able to resell to one customer at a cent below tank wagon price (R. 1878-9); and Ned's Auto Supply Company abandoned employing contract haulers to transport its gasoline from storage tank to service station at .45 cents a gallon in favor of using its own trucks, which presumably cost less (R. 1825). This meant that the four tank car buyers had a retail operating margin about 30 per cent greater than the margin available to other retailers at prevailing prices, which, of course, constituted an enormous competitive advantage.

Petitioner Refuses to Sell to Its Retailer Customers, Other Than Ned's, in Tank Car Quantities at Tank Car Prices.

Petitioner's business in Detroit is established and has been built up as the business of selling gasoline direct to retail dealers by tank truck (tank wagon) delivery to the service station. Only about 18 percent of the gasoline sold by petitioner in the Detroit area in 1940 was sold to jobbers, including that resold at wholesale (Res. Ex. 58, R. 4789).

Prior to 1936 petitioner operated its own retail service stations, selling direct to the public. It had acquired, and has continued to acquire, many valuable and strategically located service station properties. Petitioner now owns about 200 service station properties in Detroit, and nearly 80 percent of the gasoline sold by it there to operators of retail stations is sold to the lessees of these properties (Comm. Ex. 119, R. 4783). Gasoline service stations are property not readily converted to other use since they are constructed with underground storage tanks, driveways, pumps and fixtures suitable only for dispensing gasoline.

Petitioner maintains six bulk plants in the City of Detroit for the purpose of supplying its "tank wagon" retailer customers (R. 108). Petitioner owns and operates a fleet of tank trucks in which the gasoline is delivered from the bulk plants directly into the service stations tanks of those customers. Petitioner also owns an office building in Detroit and employs over 350 persons in the operation of its business of distributing and selling to retailers (R. 184).

The Commission has found that petitioner's tank car differential to jobbers is not justified by differences in cost of sale and delivery. It follows that petitioner makes a greater profit per gallon on tank wagon sales to retailers than on tank car sales to jobbers. The testimony on the issue of cost justification indicates that petitioner probably realizes a net profit of from three-quarters of a cent to a cent more per gallon on tank wagon sales than on tank car sales. Tank car sales to jobbers are made on credit and a cash discount of 1% for payment within ten days is allowed. Gasoline delivered by tank truck to service stations is sold for cash, and no discount is allowed (R. 159).

Petitioner thus has an enormous investment in its business of selling gasoline by tank wagon delivery to retail service stations as above described. Any great increase in sales of its branded gasoline to jobbers would result in reducing the volume of sales to its own tank wagon buyers upon which its investment and profits depend. In this situation it is to be expected that petitioner would adopt a sales policy preventing its tank wagon customers, so far as possible, from either buying as jobbers or buying from jobbers. This record shows that that is petitioner's policy, and that the policy is enforced.

In a number of instances retail service station operators have applied to petitioner for permission to buy in tank car quantities at tank car prices, but such requests have been denied (R. 145, 552-558, 2088-9). Some service stations in Detroit have sufficient storage capacity to receive delivery of gasoline in 8,000 to 10,000 gallon quantities (R. 395). There is no reason why transport truck (tank car) deliveries could not be made to their tanks (R. 114). Bulk storage and hauling facilities could be secured by any retail dealer or dealers if permitted to purchase on a tank car basis. There are a number of transportation companies in Detroit who make a business of hauling gasoline for hire (R. 395, 984).

It is also contrary to petitioner's policy to permit a group of dealers to pool their requirements and purchase in tank car quantities by using joint storage facilities. Citrin-

Kolb Oil Company when it first started to buy from petitioner as a jobber had joint storage facilities with Carnick Oil Company, another jobber, and Citrin-Kolb was informed by petitioner that unless they stopped that practice immediately and obtained their own bulk plant Standard would refuse to sell to them at tank car prices because it did not wish to set a precedent of allowing two or more dealers to get together and buy at the jobber margin by obtaining bulk storage (R. 1256).

Since 1936, only one dealer in the Detroit area reselling petitioner's gasoline wholly or principally at retail has been permitted to buy as a jobber. That dealer is Neds Auto Supply Company, one of the four jobbers named in the Commission's complaint. In 1936 Neds had four large retail stations, and its gasoline volume was 2,401,000 gallons. On September 1, 1936 petitioner began to sell to Neds at one-half cent a gallon below the posted wagon price, continuing to make deliveries into Neds' tanks by tank truck. In 1937 Neds was openly advertising cut prices and its volume increased to 4,240,000 gallons (Res. Ex. 54).

In March, 1938, Ned's prevailed upon petitioner to classify it as a jobber and permit it to purchase petitioner's gasoline in tank car quantities at tank car prices. In that year a general business depression existed causing the volume of gasoline sold in Detroit to fall 10% below 1937 (R. 1904). Ned's gasoline volume, on the other hand, increased to 4,880,000 gallons. In July and October of that year Ned opened two new super-service stations.

Petitioner states (brief, p. 4) that the four dealers to whom it sold as jobbers were classified as jobbers "under industry practice" because they owned bulk storage tanks and delivery trucks, purchased more than a million gallons a year, and had good credit. If that is true, then it simply means that it was an industry practice to grant a quantity price to purchasers taking certain annual quantities by carload delivery, which discount was not available to their smaller competitors. Actually, however, these requirements or qualifications for buying as a jobber were petitioner's own arbitrary requirements for the Detroit area, made so high, of course, that no retailer other than Ned's could meet them (R. 119). Of nineteen jobbers in Oklahoma supplied by petitioner in 1939, only one bought over a million gallons, and eight bought less than 100,000 gallons during the year (R. 2575-6).

It thus appears that petitioner has discriminated in price since 1936 in favor of one large chain retailer and three wholesaler-retailers in Detroit while refusing to allow its other retailer customers to purchase in the same quantities or at the same price. The injurious effect of this discrimination in the competitive situation above described, is readily understandable and is graphically portrayed in this record.

Petitioner's Retailer Customers Cannot Purchase Their Gasoline From Wholesalers.

Not only are petitioner's retailer customers in Detroit (other than the four jobbers) unable to buy their gasoline at the jobber price; they are also in practice prevented by lessee relationship with petitioner or by contract from buying petitioner's gasoline from any other source.

About 60 percent in number of the retail dealers purchasing gasoline from petitioner in Detroit are petitioner's lessees. Petitioner leases its service station properties by short term leases on the understanding that the operators will purchase their gasoline from petitioner by tank wagon delivery at tank wagon prices (R. 2123-4). The leases do not expressly require the lessees to buy their requirements of gasoline from petitioner, but none of its lessee stations have ever been serviced with gasoline by any other company (R. 2092). Most leases are for one year periods (R. 107; Comm. Ex. 1, R. 4702).

Service station operators selling petitioner's branded gasoline, but who are not petitioner's lessees, are required to enter into contracts with petitioner (Comm. Ex. 2, R. 4713) containing a clause requiring the dealer to buy from petitioner all of his requirements of petitioner's gasoline at tank wagon prices, payment in cash at time of delivery. Thus about 40 percent of petitioner's retailer customers are prevented by contract from purchasing petitioner's gasoline from any other source.

All business done by petitioner with tank wagon customers in Detroit since 1936 has been done under one of these leases or contracts (R. 210). The result is, of course, that petitioner's tank wagon customers are not at liberty to obtain their supply of gasoline from wholesalers dealing in petitioner's brands, even if the wholesaler should offer them a price below petitioner's tank wagon price.

The retail dealers purchasing at tank wagon prices from petitioner are tied to petitioner not only by leases and contracts, but by petitioner's ownership of the tanks, pumps and tools used in service station operations and its control of the identification advertising used at the stations selling its gasoline. "Identification advertising" means advertising material furnished by petitioner to service stations to identify its products, including the Red Crown globes on the gasoline pumps, "Standard Service" signs, road maps and circulars. Such advertising is supplied by petitioner to all retail service stations selling its regular brands. The globes and signs remain the property of petitioner and can be removed by it from the service station at any time. They can be obtained from no other source, and without such identification the dealer would lose business (R. 157-8, 2107-8).

No True Competition Exists Between Petitioner and Its Wholesaler Customers.

In the above situation it is obvious that there can be no real competition in the Detroit area between the three wholesalers selling petitioner's gasoline and their supplier. It would be most naive to suppose that petitioner would allow its wholesalers to compete for and take away from petitioner the business of the retailer customers from whom its revenue is principally derived. Any doubt on that point was dispelled by Mr. Jacob Citrin, partner in Citrin-Kolb Oil Company, petitioner's largest wholesaler, who testified that his company has never sold to a single customer who was formerly a direct customer of petitioner (R. 1316).

The jobbers supplied by petitioner, in their wholesale as well as in their retail operations, are dependent upon petitioner's good-will and therefore necessarily subject to its control. Petitioner has no contracts with its jobbers and it may refuse to sell to any one of them at any time. Each of the wholesalers supplies from 15 to 60 service stations and buys regularly from petitioner. Each of them sells only petitioner's gasoline and has built up its business upon the public acceptance of petitioner's brands. The record shows clearly that they were accepted by petitioner as tank car customers upon the understanding that they would deal only in petitioner's gasoline as long as they continued to purchase from petitioner (R. 2187-8). Petitioner installs its globes and signs at the service stations supplied by its wholesalers, identifying the petroleum products sold at those stations as petitioner's products (R. 2914). Petitioner does not sell in tank car quantities, for resale under its brand names, to occasional buyers or to buyers who also deal in other brands (R. 2086-7).

The above facts present a situation which on its face seems very anomalous. The success of petitioner's business in Detroit depends upon the volume of gasoline sold by the retail dealers whom petitioner supplies directly at tank wagon prices. To assure that volume, petitioner maintains an enormous investment in service station properties at good locations throughout the City, and in bulk plants and trucks. It refuses to permit the rank and file of its retailer customers to purchase in tank car quantities at tank car prices, yet petitioner sells and is here insisting that it should be permitted to sell to one large retailer and to three wholesalers who have resold in part at retail, at discriminatory tank car prices which may be used and have been used to take away gallonage from the very retail dealers whose sales are the life blood of petitioner's business and the majority of whom are its lessees.

The answer to this anomaly is found in the fact that petitioner can and does control its jobbers. Concededly petitioner does not want to lose their business, but it is equally certain that it could not afford to grant them a differential of 1½ cents a gallon if they were free to use that differential without restriction to undersell petitioner at wholesale and its retailer customers at retail and thereby take over a substantial part of petitioner's business and impair its investment.

This record indicates that it results to the advantage of petitioner and other major oil companies to have a limited number of retail operators in an area like Detroit who, by being given a lower price, are enabled to cut retail prices from time to time and thereby force other retailers in the area to reduce their prices in an attempt to meet competition, *provided the strings can always be pulled and open* *price cutting stopped when the competitive strain reaches a point where it might produce price competition among the major oil companies.* Let us look at the facts.

Prior to the Spring of 1938 the retail dealers' margin in Detroit (difference between tank wagon price and prevailing service station price) was from 4 cents to 4.5 cents a gallon (Comm. Ex. 3; R. 4715). In September, 1936 petitioner began to sell to Ned's Auto Supply Company by tank wagon delivery at ½ cent a gallon below its posted tank wagon price. It is significant that petitioner commenced this discrimination in favor of Ned's at the same time that it discontinued its prior practice of selling direct to the public through its own service stations. Petitioner did not lower its price to Ned's while Ned's was competing with petitioner's own retail stations. In the Fall of 1936 and early in 1937 Ned's and three retailers selling other major brands began posting signs advertising prices below the then prevailing retail price (R. 389-90). This price cutting spread and increased progressively in Detroit during 1937 and 1938. In March, 1938 petitioner began to sell to Ned's at tank car prices. Several witnesses testified that during this period Ned's was advertising discounts of 2 cents a gallon on Red Crown gasoline; that this price cutting spread and became very prevalent in the Detroit market in 1938 and most of the dealers lost volume to such an extent that they were forced to cut their prices to meet competition; that after they cut their prices they regained some of their volume but not their profits.

In the Spring of 1939 prices were stabilized for a few months until another price war broke out in the Fall of that year. The Sun Oil Company, which does not sell to jobbers in Detroit, then reduced its tank wagon price to its Detroit dealers to enable them to meet competition (R. 328-9). This, of course, meant price competition with petitioner from a major competitor, and was quite a different matter. Petitioner had to reduce its tank wagon price to meet Sun's price. As was to have been expected the retail price cutting which produced this situation was cleaned up very quickly and in the latter part of November, 1939 the tank wagon price was restored to its former level and the retail dealers' margin became established at 3.3 cents a gallon with very little advertised price cutting going on from that time until this case was tried (Comm. Ex. 3; R. 436, 442-8). During 1940 the Federal Trade Commission was investigating petitioner's price discriminations in Detroit, and the complaint in this case was served on December 1st of that year.*

---

* The above situation is graphically portrayed by the following table, showing petitioner's posted tank wagon price, its jobber tank car price, the prevailing retail service station price, and Ned's posted price, for Red Crown gasoline, on each of various dates from 1937 to 1940, inclusive. This table is compiled from Commission's Exhibits 3 and 22 (R. 4715, 4727) and testimony at R. 234-5. Prices shown are cents per gallon exclusive of all taxes.

	Dealer Tank Wagon Price	Jobber Tank Car Price	Prevailing Retail Serv. Sta. Price	Ned's Posted Price
February 1, 1937	9.6¢	8.1¢	13.6¢	11.6¢
August, 1937	9.9	8.4	14.1	12.1
January, 1938	9.6	8.1	14.1	12.1
April, 1938	9.8	8.3	14.3	12.1
June 1, 1938	9.8	8.3	13.8	12.3
July 1, 1938	9.8	8.3	12.3	12.3
August, 1938	8.8	7.3	12.3	10.9
October, 1938	8.8	7.3	12.1	10.6
November 29, 1938	8.8	7.3	12.1	9.9
January, 1939	7.6	6.35	10.0	9.9
March, 1939	7.6	6.35	10.7	9.9
May, 1939	7.6	6.1	10.7	9.9
July, 1939	8.1	6.6	11.4	11.4
November 1, 1939	7.4	6.15	9.3	9.1
November 15, 1939	6.4	5.4	9.3	8.1
December, 1939	8.1	6.6	11.4	11.3
July, 1940	8.1	6.6	11.4	11.3

The record shows that when Ned's was not openly posting cut prices it gave undercover discounts, redeemable coupons and premiums (R. 245-256).

The net effect of this period of cut price competition (which many witnesses testified was started by Ned's) was a reduction of the dealers' operating margin by about 1 cent a gallon. The resulting margin of 3.3 cents a gallon was close to the lower limit of the cost of the most efficient retailer of selling gasoline at retail, as established by the Taggart Survey (Comm. Ex. 76; R. 674, 4748). The price paid by the public is the sum of the tank wagon price plus the dealer's margin. A lowering of the dealer's margin increases the percentage of the price paid by the public which goes into the till of the major oil company. After such a margin reduction the tank wagon price can be raised without pushing the retail price above what the public was accustomed to paying previously. Unfair price competition between retailers is stimulated by giving an unearned advantage to a few, while tank wagon price competition between major oil companies remains practically non-existent (R. 126, 129).

Petitioner places much emphasis in its statement of facts on competition by Michigan refiners and other "off brand" (non-major) suppliers. The record shows that 87 percent of the total volume of gasoline sold in the Detroit area is sold by major oil companies under their own brands (R. 335). The volume of the non-major group (which includes all the Michigan refiners) combined with third-grade major brand gasoline (such as Stanolind) is only 12 to 13 percent of the total (R. 328). While the non-major gasoline regularly sells at a lower price, the number of stations marketing such gasoline is never sufficient to affect the result of surveys periodically made to determine the prevailing retail price (R. 2027).

One of petitioner's witnesses testified that throughout its entire territory petitioner has very few jobber customers (R. 3230). It is submitted that petitioner's practice of discriminating in price in favor of a few jobbers here and there who are in fact retailers, to the direct injury of the rank and file of petitioner's retailer customers who cannot buy as jobbers or from jobbers, should be judged, as should also the propriety of the Commission's order in this case, in the light of the above facts. No more clear and flagrant violation of Section 2(a) of the Clayton Act could exist in any case.

Petitioner does not attempt to deny its discriminations in price or the effects above described. It remains to consider (1) whether such a violation of Section 2(a) may be justified under the proviso of Section 2(b) by proof that competitors of the seller were offering to sell to the favored jobbers at equally low prices, and (2) whether there is any merit to petitioner's objections to the terms of Paragraph 6 of the Commission's order.

The Contested Issues & Contentions of the Parties.

Petitioner challenges the Commission's order and the decree affirming it in three respects, each presenting a question of law for the decision of this Court upon the Commission's undisputed findings of fact.

1. Petitioner construes the proviso of Section 2(b) as meaning that a *discrimination* in price declared unlawful by Section 2(a) of the Clayton Act may be completely justified by proof that the seller's *lower* price was made in good faith to meet the equally low price of one of its competitors. The contention is that if a seller encounters competition in selling to one customer, and meets that competition, he is free to charge as high a price as he chooses to his other customers, even though the discrimination results in substantial competitive injury to the customers paying the higher price.

Petitioner asks this ~~Court to hold that if it has justified~~ its *lower* price as made in good faith to meet competition, it does not need to justify its *discrimination* in price, on that ground or any other ground. It makes no pretense of having shown that its higher price, or the *difference* in its prices, was necessary to enable it to meet competition.

The Commission, on the other hand, asserts that where all the elements of violation of Section 2(a), including injury to competition, are affirmatively proved, the proviso of Section 2(b) does not provide an absolute justification for the violation of Section 2(a) so established; that Section 2(a) is a complete section setting forth all available affirmative defenses; and that the 2(b) proviso makes meeting competition a defense only to the extent that such proof may be *effective as a matter of evidence* to rebut or controvert the Commission's evidence of violation of Section 2(a). The Commission found that since the record *in this case* affirmatively shows that petitioner's discrimination in price may result and has resulted in injuring, destroying and preventing competition with its favored retailer customers, "the defense of meeting an equally low price of a competitor as provided by subsection (b) of Section 2 of the Clayton Act is not available to the respondent on the basis of the present record" (Findings, Paragraph Thirteen, R. 5182).

Petitioner also claims that the Commission's construction of the 2(b) proviso is so unreasonable and indefinite as to raise a question of constitutionality. The Commission denies that a substantial constitutional question is presented.

2. Petitioner objects to the *terms* of Paragraph 6 of the order, as modified by the Court of Appeals. It does not dispute that the differential knowingly received by Citrin-Kolb, one of the wholesalers, resulted in injury to compe-

tition with certain of Citrin-Kolb's customers and violated Section 2(a). The Commission, however, did not unqualifiedly prohibit this differential, but limited the prohibition to cases where a wholesaler actually engages in the practice of passing on a part of his wholesale differential to retailer customers competing with petitioner's direct retailer customers. The Court of Appeals qualified this prohibition still further by restricting it to cases where petitioner knows or has reason to know that the differential is being so used.

Petitioner complains that Paragraph 6 would prevent it from selling to wholesalers and retailers in the same sales area except by "the establishment of resale price programs." The Commission takes the position that the effect of the discrimination is the same whether the wholesaler resells at retail himself or passes along his price advantage to his customers, that Section 2(a) is violated in either case, and that without Paragraph 6 the order would be ineffective.

3. Petitioner contends that its interstate commerce in its gasoline transported into Michigan for sale to its Detroit customers comes to an end when the gasoline reaches its marine terminal at River Rouge, and that its sales of such gasoline to Michigan dealers are not in the course of interstate commerce. This issue is fully presented in the briefs filed by petitioner and by the Commission, and will not be discussed in this brief.

Summary of Argument.

1. The legislative history of the Robinson-Patman Act shows clearly that Congress deliberately discarded the old defense of "meeting competition" as an absolute justification for injurious price discrimination. The main purpose of that Act was to prevent chain stores and other large

buyers from using their mass buying power to demand and obtain preferential price treatment not available to their smaller competitors. The meeting competition proviso of old Section 2 was found to be one of the principal obstacles to enforcement in this respect. This case presents a typical example of a large chain retailer, and certain wholesalers who resold in part at retail, demanding and obtaining a preferential price solely because of their large purchasing power, which price was denied or was unavailable to their competitors. The case is the same as where several suppliers of a commodity offer an unearned quantity discount available only to large buyers, or where it is the practice for a number of suppliers to classify chain retailers distributing to their own stores as wholesalers and grant them the wholesale price, or where sellers discriminate between purchasers at different points by the use of fictitious basing points because it is industry practice for competitors do the same. Petitioner sold to Ned's, a chain retailer, at the "going" jobber price and to its smaller retailer customers at the "going" tank wagon price. Petitioner's construction of the proviso of Section 2(b) would nullify the Robinson-Patman Act by enabling large retailers to obtain a competitive advantage over their competitors merely by demanding and obtaining equally low competitive price offers from two or more suppliers.

2. If petitioner's construction of the 2(b) proviso is correct, then the Robinson-Patman Act did not strengthen, but weakened, the Clayton Act. Even the old meeting competition proviso required a seller to show that his *discrimination* in price, not merely his lower price, was made in good faith to meet competition. Petitioner contends that under the Robinson-Patman Act it is enough to justify a discrimination in price between competing customers for the seller to show that his *lower* price was made to meet a

competitor's price, and that it is no longer necessary to show that his higher price, or the difference in his prices, was made in good faith to meet competition. Congress could not have intended to so weaken the Clayton Act. Unlawful discrimination by a competitor does not justify retaliation. On the other hand, if the seller's competitor is not discriminating, but is merely underselling him, then his remedy is to meet that price competition without unlawful discrimination. This decree will protect retailers purchasing from petitioner and from its jobbers alike from the effects of unfair discrimination in the sale of petitioner's branded gasoline, and presumably will be complied with by other major brand companies. Gasoline sold under nonmajor brands is a minor competitive factor.

3. By its history and express language Section 2(b) applies only to Federal Trade Commission proceedings. It was inserted in the Act as a "precautionary provision" to assure that court rules of evidence and burden of proof would be observed in Commission hearings. "Meeting competition", therefore, is not a defense in triple damage and injunction suits where the 2(b) proviso has no application. Congress could not have intended to provide different defenses and rules of proof in Commission proceedings than in court actions. The only possible answer is that Congress intended that evidence of meeting competition should have exactly the same effect as rebuttal evidence in Commission hearings that it has in court. In cases where such evidence is responsive and overcomes or controverts the Commission's or plaintiff's evidence of injury to competition it may establish a defense. Where, as in the present case, it is not responsive but is wholly consistent with the proof of injury to competing customers resulting from the discrimination, it does not succeed as rebuttal and is no defense. That was in substance the rationale of the decision below.

4. No substantial constitutional question is presented. The decree herein does not prevent petitioner from meeting a competitor's price. The issue is whether meeting a competitor's price to one customer (which may always be done) justifies a higher and discriminatory price to other customers. Sections 2(a) and 2(b) would be valid if all provisos were deleted; indefiniteness of permissive exemptions (even if the 2(b) proviso were such) can raise no question of constitutionality.

5. Petitioner objects to the *terms* of paragraph 6 of the order as modified by the court below without denying the violation at which that paragraph is aimed. It is undisputed that the differential to Citrin-Kolb was used by Citrin-Kolb to give certain of its customers a competitive advantage over retailers buying direct from petitioner. This practice, if permitted, would allow petitioner to discriminate indirectly between retailers of its gasoline, while prohibited from doing so directly. A supplier who sells at different prices to different customers in the same sales area takes the risk of violating the Act. If a wholesaler buying at a differential opens up his own retail store and becomes in part a retailer, the supplier cannot prevent it but is chargeable with the consequences. Similarly, if the wholesaler achieves the same result by passing on part of his differential to his customers, the supplier is responsible for the resulting competitive injury to his own customers and it is no defense to say that he cannot control the price at which the wholesaler resells. Without paragraph 6 the decree would be ineffective.

The decree protects wholesalers by protecting their retailer customers to the same extent that it protects the retailer customers of petitioner. The only jobbers affected are those who demand the privilege of using their wholesale differential to create a competitive advantage for themselves or their customers at the retail level.

ARGUMENT.

POINT I.

The legislative history of the Robinson-Patman Act shows that Congress intended to eliminate "meeting competition" as an affirmative defense or justification for price discrimination prohibited by Section 2(a). Petitioner's interpretation of the proviso of 2(b) would defeat the principal objective of the Act, which was to protect competition between individual purchasers from the same seller.

Section 2(a) of the Clayton Act is a complete section declaring certain price discriminations unlawful without reference to any other section; it contains provisos creating some, and therefore presumably all, affirmative defenses. The complaint herein charged, the Commission found, and the order recited a violation of *that section.* That the proof established a violation of Section 2(a) is not in dispute except as to interstate commerce. Petitioner asserts, however, that Section 2(a) is not a complete section but is modified by the proviso of Section 2(b); and that even though none of the affirmative defenses permitted under 2(a) is established, a discrimination prohibited by that section is not unlawful if the seller's lower price was made in good faith to meet an equally low price offered by one of his competitors.

An intention on the part of Congress to modify the substantive provisions of a section complete on its face by a *proviso* of another section can hardly be inferred in the absence of express language to that effect. The function of a proviso is to modify what goes immediately before, and the first part of Section 2(b) deals only with matters of evidence and burden of proof. Nothing in the first part of that section adds to or detracts from the offense defined or the defenses made available in Section 2(a).

The proviso of Section 2(b) does not in terms permit *discrimination in price* where the seller's lower price is made in good faith to meet the price of a competitor; it only permits such meeting of competition to be shown in *rebuttal of the Commission's prima facie case* of violation of Section 2(a). Presumptively, therefore, the rebuttal permitted is rebuttal within the scope of the issues of 2(a), effective to the extent that it overcomes or controverts the Commission's evidence or inferences drawn therefrom. That this was the intention of Congress is made so clear by the legislative history of the Act as to leave no room for doubt.

The Robinson-Patman Act grew out of the Federal Trade Commission's chain store investigation, completed in 1934.* Its report showed that many large chains were receiving discounts, allowances and other advantages greatly in excess of those granted, not only to competing retailers, but even to wholesalers. Section 2 of the Clayton Act had been found insufficient to cope with these practices. With regard to the provisos of that section, the House Judiciary Committee stated in reporting the Patman bill in 1936:

> "These provisos have so materially weakened section 2 of that Act, which this bill proposes to amend, as to render it inadequate, if not almost a nullity." (H.R. Rep. 2287, 74th Cong. 2d Sess., p. 7.)

---

* *Final Report on the Chain Store Investigation*, Sen. Doc. No. 4, 74th Cong., 1st Sess. See also: *Hearings before Special Committee on Investigation of American Retail Federation*, 74th Cong., 1st Sess. (1935), and *Investigation of Trade Practices of Big Scale Retail and Wholesale Buying and Selling Organizations*, 74th Cong., 1st and 2d Sess. (1935-1936).

In reporting the Robinson and Patman bills favorably both the Senate and House Committees emphasized the purpose to protect the competitive opportunity of the small businessman by prohibiting all price differentials except those which could be justified in full by cost savings. The purposes of the final bill were summarized in the report of the House Conferees as follows:

> "The object of the bill briefly stated is to amend section 2 of the Clayton Act so as to suppress more effectually discriminations between customers of the same seller not supported by sound economic differences in their business positions or in the cost of serving them." (H.R. Rep. 2951, 74th Cong. 2d Sess.)

The primary remedial objective of the Robinson-Patman Act, therefore, was the protection of the smaller independent merchants from injury to their competitive position resulting from discriminatory advantages extended by manufacturers and producers to mass distributors who were using their concentrated buying power to demand and obtain price concessions and preferential allowances and services. As stated by this Court in *Federal Trade Comm. v. Morton Salt Co.*, 334 U. S. 37, 43:

> "The legislative history of the Robinson-Patman Act makes it abundantly clear that Congress considered it to be an evil that a large buyer could secure a competitive advantage over a small buyer solely because of the large buyer's quantity purchasing ability. The Robinson-Patman Act was passed to deprive a large buyer of such advantages except to the extent that a lower price could be justified by reason of a seller's diminished costs due to quantity manufacture, delivery or sale, or by reason of the seller's good faith effort to meet a competitor's equally low price."

We do not believe that by the above language this Court meant that the Act permits a seller to give an unearned price advantage to a large buyer whenever he can show, as he usually can, that another seller is willing to sell at the same price or discount to obtain that buyer's business. To so hold would mean that the seller's interest in meeting his own competition is to be the sole test of his right to discriminate in price between competing customers, which would defeat the very legislative purpose which the Court recognizes.

The "meeting competition" proviso was considered one of the principal loopholes in old Section 2, and Congress deliberately discarded it. Both the original Robinson bill and the original Patman bill omitted any provision similar to the old "meeting competition" proviso. In the Senate the old proviso was inserted in the Robinson bill by amendment. In the House the Judiciary Committee reported the Patman bill with a section substantially identical with present Section 2(b). The Conference Committee rejected the Senate version and approved the House amendment in the form enacted. The report of the House conferees, referring to the Senate proviso, stated:

> "This language is found in existing law, and in the opinion of the conferees is one of the obstacles to enforcement of the present Clayton Act. The Senate receded, and the language is stricken. A provision relating to the question of meeting competition, *intended to operate only as a rule of evidence in a proceeding before the Federal Trade Commission,* is included in subsection (b) * * *" (H.R. Rep. 2951, 74th Cong. 2d Sess.; italics supplied).

In presenting the Conference Report in the House, the Chairman of the Conferees explained the 2(b) proviso as follows:

> "It is to be noted, however, that *this does not set up the meeting of competition as an absolute bar to a charge of discrimination under the bill. It merely*

permits it to be shown in evidence. This provision is entirely procedural. It does not determine substantive rights, liabilities and duties. They are fixed in the other provisions of the bill. It leaves it a question of fact to be determined in each case, whether the competition to be met was such as to justify the discrimination given, as one lying within the limitations laid down by the bill, and whether the way in which the competition was met lies within the latitude allowed by those limitations.

"This procedural provision cannot be construed as a carte blanche exemption to violate the bill so long as a competitor can be shown to have violated it first, nor so long as that competition cannot be met without the use of oppressive discriminations in violation of the obvious intent of the bill.

* * * "*If this proviso were construed to permit the showing of a competing offer as an absolute bar to liability for discrimination, then it would nullify the act entirely at the very inception of its enforcement; for in nearly every case mass buyers receive similar discriminations from competing sellers of the same product.*" (80 Cong. Rec. 9418; italics supplied.)

In the Senate, Senator Logan stated:

"The purpose of the bill is to stop up loopholes found in section 2 of the Clayton Act. Section 2 of the Clayton Act has been abated. There was a provision in it, as Senators will remember, allowing the granting of price differentials to meet competition in a particular community. That was perhaps unwise, although at the time of the passage of the Clayton Act it was well designed to remedy the evils then in existence. However, since then time has proved that there are ways to evade the Clayton Act, and therefore it is necessary to strengthen its provisions; and the bill seeks to do nothing else." (80 Cong. Rec. 3119.)

Petitioner's price discrimination in favor of its four jobber-retailers in Detroit is typical of the discriminations which Congress sought to reach and prevent in passing the Robinson-Patman Act. This is particularly true as to Ned's Auto Supply Company. Ned's was a large retailer operating a chain of four super-service stations located at strategic points in the City of Detroit. These stations competed with most of the other Standard stations in the Detroit metropolitan area. Stated most favorably to petitioner, the case is that Ned's, buying over 2,000,000 gallons of gasoline a year, procured bulk storage facilities and prevailed upon other suppliers to offer to sell to it in tank car quantities at tank car prices. Ned's then went to petitioner and demanded that petitioner classify it as a jobber and sell to it at petitioner's jobber price, and petitioner did so because of the threat of losing Ned's business.

Petitioner's contention is that if it encounters competition in selling to one customer, and meets that competition in good faith, it may then sell at any price it chooses to other competing customers. If that is what the Act means, then it has wholly failed to accomplish its purpose. There would be nothing to prevent a large grocery, drug or tobacco chain from establishing warehouses for the reception of goods in large quantities for distribution to its own stores (as many of them do), and demanding of its suppliers that it be classified as a wholesaler and granted the wholesaler price, or even a lower price. Such a chain would have no difficulty in finding a number of suppliers, as to many lines of goods, willing to accede to its demands. Yet that situation is precisely the one portrayed by the Commission's report of its Chain Store Investigation in 1934 and which led to the enactment of the Robinson-Patman Act.

Stripped of its non-essentials, this case boils down to the simple matter of four retailers who were given a quantity price differential which was not available to their competitors and which was not justified by differences in seller's costs. Qualification for the differential was on the basis of annual purchases and it was denied other retailers who were able to buy and take delivery in carload quantities. The three wholesalers were accorded the differential without regard to the amounts they resold at retail. This is in substance the *Morton Salt* case (334 U. S. 37), where Morton granted unjustified quantity discounts to certain large retail chains and others purchasing specified quantities in carload lots during a 12-months period. The Court pointed out (p. 42) that these discounts "were enjoyed by certain wholesalers and retailers who competed with other wholesalers and retailers to whom these discounts were refused", and that this was directly contrary to the policy of the Act. Surely the decision in that case would not have been different had Morton shown that it was industry practice to grant these discounts to large volume buyers, or that some of its competitors were offering them the same discounts.

Petitioner concedes, and in fact argues in its defense, that it merely followed an *industry practice* in classifying large retailers as jobbers and selling to them at the jobber price. Petitioner asserts that the four dealers to whom it sold as jobbers "all belonged to a distinct class of buyers; so recognized throughout the industry"; and admits that it sold to both "classes" at "the going price" (brief, pp. 42, 43). Furthermore, petitioner's Detroit manager testified that petitioner has certain "requirements" which a retailer in Detroit must meet to qualify for classification as a jobber (R. 119), and petitioner refers to these at page 4 of its brief as following industry practice. While these requirements (principally purchasing in large volume and tank storage) were made so high (as to volume) that only Ned's and the wholesalers could meet them, the implication is that the tank car price was available to any retailer who could qualify, regardless of any specific competing offers.

According to petitioner, the major oil companies competing in a given territory have two prices, a tank wagon price and a tank car price, customers being classified according to volume, *and each company meets its competitors' higher price as well as its lower price to each class of customers.* At least, petitioner admits that that is its practice. This does not differ except in degree from the situation which confronted this Court in the *Staley* and *Cement Institute* cases, where the sellers' basing point prices differed between competing customers at different delivery points and where, as here, the differentials were not justified by difference in costs. In those cases, as here, the sellers met their competitors' higher prices, as well as their lower prices, at each point. As we read the opinion in the *Staley* case (324 U. S. 746, 752-755) this Court held, before reaching the question of "good faith", that even if Staley's lower prices involving freight absorption were made in good faith to meet competitors' prices, that did not justify its higher prices to other customers involving phantom freight.

Likewise here, to the extent that the difference between the "going price" to the tank car buyers and the "going price" to the tank wagon buyers exceeds the difference in cost of serving them, the latter are forced to subsidize their own competitors. And petitioner's practice of selling to certain large retailers at its jobber price while denying that price to others "constantly results in his getting more money for like goods from some customers than he does from others", which this Court has said Section 2(b) does not permit (*Cement Institute* case, 333 U. S. 683, 725).

This Court's opinion in the *Staley* case, if we understand it correctly, has already disposed of petitioner's contention that meeting a competitor's price in good faith is an absolute defense in every Section 2(a) case. The Court there considered the change made by the Robinson-Patman Act in the language of the "meeting competition" proviso and its transfer to procedural section 2(b), and stated (324 U. S. at p. 752):

> "The change in the language of this exception was for the purpose of making the defense a matter of evidence in each case, raising a question of fact as to whether the competition justified the discrimination."

Since the question whether competition was met in good faith was a "matter of evidence" under the old proviso, we understand the above language to mean that *if the "defense" is proved* it *then* raises a question of fact in the particular case as to whether the competition justified the discrimination.

Of course, in order to determine whether the competition justified the discrimination the Commission must consider the nature and effect of the discrimination as well as the competition met by the seller. We have no doubt that by "the competition" this Court referred to all the competition affected by the discrimination. The question in every case is whether, upon all the facts including meeting competition, the net effect of the discrimination may be that prohibited by the Act.

The Commission's position in this case is, that even assuming petitioner's price to its four jobbers in Detroit was made in good faith to meet the equally low price of certain of its competitors, that fact cannot justify a discrimination in price affirmatively shown to have resulted in serious competitive injury to hundreds of retail dealers engaged in direct competition with the four jobbers. The injury to competition between petitioner's tank car customers and tank wagon customers did not depend on whether petitioner's tank car price was made in good faith to meet competition; it was the result of the amount of the differential and the competitive situation existing in the retail sale of gasoline in Detroit. The Commission found that upon this record, substantial injury to competition having been affirmatively shown, it is not material whether the lower prices granted by petitioner to the four jobbers were made to meet equally low prices of petitioner's competitors, and that it was therefore unnecessary for the Commission to determine whether petitioner's tank car prices were in fact made in good faith to meet such competition (R. 5179, 5182).

Paragraph Thirteen of the Commission's findings (R. 5182) is as follows:

> "Paragraph Thirteen: Since the record in this case affirmatively shows that the discriminations in price in favor of the named jobbers and in favor of Ned's Auto Supply Company as a tank-wagon purchaser from September 1, 1936, to March 7, 1938, and as a tank-car purchaser thereafter, have resulted in injuring, destroying, and preventing competition between said favored dealers and retail dealers in respondent's gasoline and other major brands of gasoline, the Commission is of the opinion, and so finds, that the defense of meeting an equally low price of a competitor as provided by subsection (b) of Section 2 of the Clayton Act is not available to the respondent on the basis of the present record."

It is submitted that this finding is conclusive unless, as contended by petitioner, meeting competition in good faith is an absolute defense to a charge of violation of Section

2(a) in every case as a matter of law. Certainly this record provides ample factual ground for the finding. It would be difficult to conceive a case of price discrimination more clearly "in violation of the obvious intent" of the Robinson-Patman Act.

POINT II.

Acceptance of petitioner's construction would mean that the Robinson-Patman Act weakened the Clayton Act. Petitioner has not justified its *difference* in prices on the ground of meeting competition, which even old Section 2 required.

Section 2 of the original Clayton Act permitted a seller to justify a *discrimination in price,* otherwise unlawful, by showing that it was made in good faith to meet competition. That section contained the following proviso:

> "That nothing herein contained shall prevent * * * discrimination in price in the same or different communities made in good faith to meet competition."

Under that proviso, in order to justify a discrimination in price, the seller had to justify his higher price as well as his lower price. He had to show that the *difference* in his prices was made in good faith to meet competition. Presumably this meant that he had to show that it was necessary for him to charge a higher price to some customers than to others because of the competition he met.

A seller might have justified a discrimination in price between competing customers, under the old proviso, by showing that his competitor's price to certain customers was so low that he could not meet it by lowering his price to all his customers and make a necessary or reasonable profit. If the discrimination was not between competing customers (as where a seller lowers his price to all customers in a certain area to meet local competition), he might have shown that his local price was made in good faith to meet and not to beat his local competitor, and that the higher price charged elsewhere did not result in injury. Some such proof was necessary to justify the *difference* in prices which constituted the discrimination.

Petitioner now contends that under the Robinson-Patman amendment it is no longer necessary for a seller charged with injurious price discrimination to show that the *discrimination* was made in good faith to meet competition. Petitioner claims that under the present proviso a seller need only justify his *lower* price on that ground, and that if he can do so he has a complete defense.

Petitioner does not assert, and the record does not show, that its price to the four jobbers was so low as to justify a higher price to its other retailer customers. It does not claim that it was necessary for it to make a higher margin of profit in selling to tank wagon customers than to tank car customers. On the contrary, it sold to the jobbers at its regular tank car price and to its tank wagon buyers at the "going" tank wagon price, at a differential not justified by cost differences. It relies only on evidence that the large buyers demanded the price they got, and that other suppliers were willing to give it. Such evidence does not show that discrimination against other retailers was necessary to meet competition, and would have been insufficient as a defense even under the old proviso.

It is not intended to suggest that if the price to the jobbers had been still lower the discrimination might have been justified. The point is that in an Act passed for the avowed purpose of *strengthening* the Clayton Act, Congress could not have intended to let down the bars to injurious price discrimination whenever the seller can show that another supplier is offering the same price to the favored customer. A seller in a competitive industry usually encounters competition in selling to large purchasers, and petitioner's construction of the meeting competition proviso would license oppressive discrimination.

Section 2(a) is aimed at injury to competition resulting from a *difference* in the prices charged different purchasers, and is not concerned with the prices charged any single customer or class of customers. If Congress had intended to retain "meeting competition" as a defense, it would at least have required proof logically justifying the seller's *discrimination* in price on that ground.

Actually, as the legislative history shows, Congress in framing the Robinson-Patman Act deliberately eliminated even the old defense of meeting competition. Selling to one customer at a price so low as to necessitate charging higher and discriminatory prices to others is economically unsound, even when necessary to meet competition, except possibly as a temporary expedient until recourse can be had by the seller to the courts in a case where the competitor is violating the law.

If a seller loses a customer to a competitor as a result of a discriminatory price offered by the competitor, the Clayton Act gives him a right of action for three times his damages, and he may also seek an injunction in the District Court. To permit retaliation in such a case would be to let one violation of law justify another. In the *Staley* case (324 U. S. at p. 754) this Court cited the statement of the Chairman of the House Conferees, in presenting the Conference Report on the Robinson-Patman bill, that

> "this procedural provision cannot be construed as a carte blanche exemption to violate the bill so long as

> a competitor can be shown to have violated it first, nor so long as that competition cannot be met without the use of oppressive discriminations in violation of the obvious intent of the bill."

And Senator Logan, in explaining the Robinson bill in the Senate pointed out that one of the weaknesses of old Section 2 was "in that it permits discriminations to meet competition and thereby tends to substitute the remedy of retaliation for that of law which results in destructive consequences to the main purposes of the bill." (80 Cong. Rec. 3113.)

On the other hand, if the competitor who offers a lower price to the seller's customer is not discriminating in price, then the situation is one of normal price competition between sellers, and the remedy is to meet that competition without engaging in unlawful discrimination. If the seller cannot meet such competitor's price in fair competition it is because the competitor either is more efficient or has some lawful advantage such as lower transportation costs due to proximity to the customers solicited. In either case normal competitive forces come into play and the business will and should go to the seller able to offer the lowest non-discriminatory price.

Petitioner construes the proviso of Section 2(b) as if it read:

> "*That nothing herein contained shall prevent discrimination in price* where the seller's lower price * * * to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor, * * *."

The italicized language was contained in the old proviso. If Congress had intended to retain "meeting competition" as a substantive defense, merely changing the specifications as to the competition to be met, it undoubtedly would have retained that language. Instead, the words "discrimination in price'' were dropped, and the words ''a seller rebutting the prima facie case thus made by showing'' were substituted. The striking out of the former words, and the placing of the proviso in a separate procedural section ''intended to operate only as a rule of evidence,'' indicates plainly that the legislative intent was not to weaken the requirements of, but to eliminate, the former substantive defense.

Petitioner asserts at pages 42-43 of its brief that if the decree below is affirmed it will simply result in the four jobbers being taken over by other suppliers at the same or lower prices and will not benefit petitioner's retailer customers against whom it is now discriminating. This is only to say that petitioner should not be compelled to comply with the Act because in its opinion the Act fails in its purpose. Nevertheless, the fallacy of this argument exposes the fundamental weakness of petitioner's position in this case.

The argument made is that these jobbers would be taken over as customers by some Michigan refiner, or some other supplier selling only to jobbers in Detroit who would not be violating the Robinson-Patman Act. In the first place, the Michigan gasoline is ''off-brand'' or non-major gasoline, which petitioner concedes sells at a price of 2 cents or more a gallon below the major price (brief, p. 4), obviously has little public acceptance, and is a minor competitive factor. All non-major gasoline sold in Detroit amounts to less than 13 percent of the total (R. 328).

Furthermore, it is significant that the record shows no instance of a major oil company distributing gasoline to retailers in the Detroit area, or in any metropolitan area, only in tank car quantities, although petitioner's two nearest competitors in sales volume in Detroit (Sun and Socony-Vacuum) do not sell to jobbers and limit their distribution to retailers buying at the tank wagon price (R. 333, 2130).

Petitioner's own Assistant Sales Manager, Marshall, stated that while these jobbers could obtain "as favorable or possibly a more favorable price than they are enjoying today," "they would be limited * * * to buying products not generally distributed in this area, having no public acceptance, and possibly of not as acceptable quality" (R. 1092-3). It appears, therefore, that if petitioner is prevented from selling to these jobbers in their retailing capacity at an unjustified differential, its prediction of their ability to obtain another equally competitive brand of gasoline at as low a price without violating the Robinson-Patman Act will turn out to be nebulous.

But let us suppose that another major oil company, not now marketing in Detroit, should enter that field and sell its branded gasoline to these and other retailers in tank car quantities, at 1½ cents or more below the major tank wagon price. That would mean that a major competitor would be selling gasoline to retailers at a lower price than petitioner and other major companies. Presumably the new competitor, having no retail outlets of its own, would sell to all who would buy in tank carloads, a privilege now denied to many of petitioner's customers who are able to or could arrange to take tank car delivery. This would be price competition between major oil companies, a healthy condition but one which this record and common knowledge indicates is practically non-existent. Petitioner and other major companies would have to reduce their tank wagon price to meet the new competition or lose both customers and gallonage. Undoubtedly the competition would be met, and the public would benefit.

Such competition would be quite different from the present situation where a strictly limited number of retailers are given a price advantage over the tank wagon stations of the same supplier. Business diverted from the latter to Ned's is gallonage lost by petitioner to itself—a situation which petitioner can and does control to the extent necessary for its own protection, as shown by the statement of facts herein. The tank wagon retailers, who furnish the bulk of petitioner's business, are forced to compete at a disadvantage with Ned's stations *selling the same brand*, a situation which would not exist if Ned's bought elsewhere. These dealers may expect protection from their supplier against competition from another source, but are helpless when the supplier himself discriminates against them.

The record shows, and it is common knowledge, that the tank wagon prices of the major oil companies are generally the same (R. 126, 129). The only instance of major company price competition which petitioner's Detroit manager could cite in Detroit was the instance in the fall of 1939 when price cutting initiated by Ned's and two or three other "subsidized" jobbers got out of hand and Sun Oil Company reduced its price to its retailers to enable them to meet competition (R. 127-8). This "price war" lasted only a few weeks, after which the major tank wagon price went back to its exact former level and, significantly, Ned's advertised price cutting was stopped although Ned's still had its price advantage (See table, p. 16, *supra*).

Unfortunately, the prospect of the decree herein producing bona fide price competition between the major oil companies is remote; but if that result were achieved it would be greatly to the benefit of retail gasoline dealers and of the public. The purpose of the decree is, and its effect will be, to stop the prevailing practice of the major oil companies of giving an unearned competitive advantage to a few strategically located retailers, thereby artifically stimulating unfair price competition between their own customers, for the purpose of keeping the dealer's margin at a ruinous level without reducing the price at which he buys.

POINT III.

Section 2(b) is a purely procedural section governing only Federal Trade Commission proceedings. It makes proof of meeting competition effective as rebuttal in a Commission proceeding to the same extent as in court actions, to which Section 2(b) does not apply. Such proof will be effective in some cases and not in others.

It is submitted that the following reasoning demonstrates that meeting competition is not a defense either in a Commission proceeding or in a court action for enforcement of the provisions of Section 2 of the Clayton Act, and points out the correct construction of the meeting competition proviso:

(1) Section 2(b), by its express language and by its legislative history, is applicable only in Federal Trade Commission proceedings.

(2) Since that section is not governing in injunction and triple damage suits in the District Courts, meeting competition cannot be a defense to such actions.

(3) It could hardly have been the intention of Congress to prescribe different rules of proof and different defenses in Commission proceedings than in court actions under the same Act.

(4) It follows that Section 2(b) should be regarded as a procedural section merely declaratory of established rules of evidence and burden of proof as applied by the courts, enacted for the purpose of assuring their application in Commission proceedings.

Section 2(b) was referred to in the House Judiciary Committee report on the Patman bill as an "added precautionary provision," and in the Conference Report to the House as a section "relating to certain questions of procedure before the Federal Trade Commission" (H.R. Reports Nos. 2287 and 2951, 74th Cong. 2d Sess.). In presenting the Conference bill in the House, the Conference Manager stated with regard to this section:

> "Owing to a body of court decisions to the effect that the legal rules of evidence do not in certain respects apply to hearings before administrative commissions, and to the uncertainty thus suggested, the bill contains a subsection stating the rule as to burden of proof * * * as applicable to hearings before the Federal Trade Commission." (80 Cong. Rec. 9418.)

The above explanation points out the complete answer and solution to the much debated question as to the meaning of Section 2(b). Most of the commentators seem to have overlooked or ignored it. The simple fact is that Section 2(b) was inserted in the Act solely for the purpose of assuring the application of court rules of proof in Commission proceedings. Its provisions are wholly procedural, and are merely declaratory of established rules of evidence and burden of proof. Whether the addition of the section as a "precautionary provision" was necessary is immaterial; the fact is that it was added for that purpose and has no substantive effect.

The language of Section 2(b) expressly limits its application to Commission proceedings. It applies to "hearings on a complaint", and provides that if a prohibited discrimination is prima facie established, and is not affirmatively justified, "*the Commission* is authorized to issue an order *terminating the discrimination.*" The section is thus limited to Commission "hearings" and cease and desist orders.

There is no basis in the language of the section or in its history for giving the proviso a broader application than the first half of the section. The function of a proviso is to limit or modify what goes immediately before; and the proviso relates to "the prima facie case" mentioned in the first part of the section. The entire section obviously was intended to govern only Commission proceedings and not court actions.

It follows that Section 2(b) is not a part of the statute as applied to triple damage and injunction units brought in the District Courts pursuant to Sections 4, 15 and 16 of the Act. The authority of the Attorney General to enforce the provisions of Section 2 by injunction suits in the District Courts is co-extensive with the enforcement authority of the Federal Trade Commission. It is scarcely conceivable that Congress could have intended to provide a substantive defense to a respondent in a Commission proceeding that would not be available if he were sued by the United States, or by an injured party, in a District Court. If that result was not intended, then the meeting competition proviso, like the rest of Section 2(b) must be deemed wholly procedural, inserted in the Act to assure conformity of rules of proof in Commission proceedings and court actions.

The obvious conclusion is that *proof that a seller's lower price was made in good faith to meet the equally low price of a competitor has exactly the same effect as rebuttal evidence in a commission proceeding that it has in a court action.* Where it succeeds in rebutting or overcoming the Commission's or the plaintiff's affirmative case it may establish a defense; where it is not responsive it does not succeed as rebuttal and not a defense.

Proof that the seller's lower price was made in good faith to meet a competitor's price will be effective as rebuttal in some cases and not in others. The legislative history indicates that in inserting this proviso in Section 2(b) Congress had in mind the type of case where proof that the seller's lower price was made in good faith to meet his competitor's equally low price effectively rebuts a prima facie case of unlawful discrimination, *as a matter of evidence*. Such is the case where there is no discrimination between competing purchasers and the only competition alleged to be injured is competition between the seller and his own competitor. *Muller* v. *Federal Trade Comm.*, 142 F. 2d 511 (6th Circ. 1944) and *Moss* v. *Federal Trade Comm.*, 148 F. 2d 378 (2d Circ. 1945) are cases of that type. The dictum of the court in the *Moss* case as to the effect of the 2(b) proviso must be read in the light of the fact that only seller competition was involved. In such cases proof that the competitor's price was met in good faith effectively rebuts an inference of injury to competition drawn from the mere fact that the seller's price where he met competition was lower than the price charged elsewhere to non-competing customers.

On the other hand, where injury to competition between the seller's customers is charged, the fact that his lower price was made to meet his own competitor's price to one customer is not inconsistent with resulting injury to competition between that customer and other customers paying a substantially higher price, and does not overcome the inference of such resulting injury. In such a case the rebuttal is not responsive and fails.

Petitioner's argument proceeds on the assumption that Congress has provided that proof that a seller met his competitor's price in good faith shall be treated as *sufficient in every case* to rebut an inference that discrimination in price may result in injury to competition, even where it does not logically overcome such an inference or controvert the evidence on which it is based. The language of the proviso does not require such a forced construction.

The assumption that because the proviso refers to rebuttal of a prima facie case it affords a complete defense in every case overlooks the distinction between rebuttal by affirmative justification (confession and avoidance) covered by the first part of 2(b), and rebuttal in the true sense of proof which is responsive to and overcomes the effect of evidence introduced by the other side. The function of the proviso is to qualify the first part of the section by making clear that rebuttal of a prima facie case is not limited to a showing of affirmative justification and that proof of meeting competition is still available to a seller in a Commission proceeding *as evidence* to refute or contradict the Commission's proof or inferences based thereon.

It is true that the thing which "nothing herein contained shall prevent", in each of the provisos of Section 2(a) as well as the proviso of 2(b), is lawful. Of course, it is lawful for a seller to rebut a prima facie case of unlawful price discrimination, *if he can*, by showing that his lower price was made to meet the price of a competitor. That does not mean that such proof will *succeed* as rebuttal in a case where it is not responsive to the Commission's (or plaintiff's) evidence that the discrimination is one which may result in substantial injury to competition. That was in substance the reasoning followed by the court below, and was the basis for the Commission's conclusion that it was unnecessary for it to determine whether petitioner's price to the jobbers in this case was in fact made in good faith to meet the offers of its competitors.

In originally deciding this case the Commission seems to have considered that proof that the seller's lower price was made in good faith to meet competition is sufficient to rebut what it refers to as prima facie evidence of injury to competition, even where the injury proved or inferred is injury to competition between competing customers (findings, paragraph 12, R. 5180). The Commission drew a distinction between prima facie evidence and "affirmative proof"; but decided that since in this case injury to competition between the four jobber-retailers and their competitors was affirmatively shown, petitioner's evidence that it met its own competitor's prices in selling to the jobbers was not responsive and did not rebut the Commission's case.

We do not concur with the Commission's dictum that if it had proved something less than actual resulting injury to competition, petitioner's good faith as to its lower price, if established, might have succeeded as rebuttal. As this Court stated in the *Morton Salt* case (334 U. S. at p. 50):

> "It would greatly handicap effective enforcement of the Act to require testimony to show that which we believe to be self-evident, namely, that there is a 'reasonable possibility' that competition may be adversely affected by a practice under which manufacturers and producers sell their goods to some customers substantially cheaper than they sell like goods to competitors of those customers."

Proof of a substantial discrimination in price between competing customers clearly is sufficient, in any case where competition between such customers is alleged to be injured, to support an inference that the effect of the discrimination "may be" to injure competition; and in the absence of any evidence rebutting that inference additional proof should be unnecessary. Proof that the seller's *lower* price was made in good faith to meet his own competitor's price to one customer is entirely consistent with, and does not rebut, an inference that competitive injury may result from his substantial *discrimination* in price between competing customers.

The court below also was of the opinion that the Commission must do more than prove two prices (which is in accord with this Court's opinion in the *Morton Salt* case, *supra*), but went on to point out that the Commission had proved more than was necessary and that 'It is not actual injury alone, but the prospect reasonably to be expected of injury to competition which the statute seeks to prevent.'' There can be no doubt that the Commission could and should have reached the same result in this case even if substantial loss of business by petitioner's retailer customers to the favored "jobbers" and their customers had not been proved.

POINT IV.

This case presents no substantial constitutional question.

The constitutional question attempted to be raised by petitioner is so lacking in substance as to deserve little if any discussion.

The order and decree in this case do not deny to petitioner the right to meet a competitor's price in selling to any customer, for the purpose of meeting competition or for any other reason. Neither does Section 2(a) or Section 2(b) of the Clayton Act, as construed by the Commission and by the Court of Appeals herein, deny that right to petitioner.

The question here presented is not whether a seller may meet competition. The question is whether the fact that he encounters competition in selling to one customer, and meets his competitor's price to that customer, is made by the statute a justification for charging a higher and discriminatory price to other competing customers without regard to the effect of the discrimination.

Section 2(a) is directed at *discrimination* in price in the course of interstate commerce which may result in injury to competition or a tendency toward monopoly. That section is not concerned with a seller's higher or lower price as such (if he has two prices) but only with the difference between them and its effect. A seller has no constitutional right to discriminate in price between two competing customers whenever a competitor offers a lower price to one of them, even though he may consider it in his interest to injure one rather than lower his price to both.

The provisos of Section 2(a), in so far as they furnish exemptions from the affirmative prohibitions of the section, are permissive defenses to be taken advantage of by the person claiming them. The same would be true of the proviso of Section 2(b) if, as petitioner contends, it also provided an exemption from the prohibitions of 2(a). Both sections would be equally valid if all of the provisos were omitted. Therefore, whether the 2(b) proviso be wholly procedural or wholly substantive or partially both, the claim of uncertainty and indefiniteness raises no constitutional question. The offering of an illusory exemption cannot invalidate a prohibitory statute which would be valid if it offered no exemption at all.

POINT V.

Petitioner's objections to Paragraph 6 of the Commission's order are without merit. The prohibitions of that paragraph are essential to the effectiveness of the order.

Petitioner sells its branded gasoline at tank car prices to three wholesalers in the Detroit metropolitan area each of whom resells to from fifteen to sixty retail gasoline service stations in that area. The price at which these wholesalers resell is normally the posted tank wagon price of their supplier. They make deliveries by tank truck to their customers' service station tanks in the same manner that deliveries are made by petitioner to its retailer customers.

Petitioner also sells its branded gasolines at its posted tank wagon price to from 350 to 400 retail service station operators in the Detroit area. These tank wagon customers are engaged in competition with the tank wagon customers of the wholesalers. The tank car differential to the wholesalers on Red Crown gasoline (petitioner's largest selling brand) is 1½ cents a gallon; on Solite with Ethyl 1¾ cents.

This record shows without dispute that a differential of 1½ cents a gallon is sufficient to enable wholesalers buying in tank car quantities to resell at a profit to their retailer customers, or to some of them, at prices lower than petitioner's tank wagon price. The best, but not the only, evidence of this is the fact that the largest of the wholesalers, Citrin-Kolb Oil Company, actually has done so. Citrin-Kolb from 1936 to 1941 sold a million gallons of petitioner's gasoline a year to the operator of a chain of five retail service stations in Detroit, delivered at the stations, at a cent a gallon below petitioner's tank wagon price. Max Biber, general manager of Citrin-Kolb Oil Company, testified that "the only expense involved is the hauling and we can make money at hauling gasoline for a half a cent a gallon" (R. 1878-9). Citrin-Kolb Oil Company also gave a rebate of ½ cent a gallon off the posted tank wagon price to at least one other service station in Detroit during the period covered by the testimony in this case (Comm. Ex. 33, R. 4733).

We have shown in the statement of facts in this brief that petitioner's tank wagon customers are not at liberty to buy petitioner's branded gasolines from wholesalers even if a wholesaler should offer them a price below petitioner's tank wagon price. *All of these 350 to 400 dealers are prevented* *either by means of short term leases or by contracts from purchasing from wholesalers, and petitioner does not permit them to purchase in tank car quantities at tank car prices.*

In this situation, if a wholesaler passes along a part of his wholesale margin to certain of his retailer customers, selling to them below the price paid by petitioner's direct retailer customers, the resulting competitive injury is the same as if the favored customers of the wholesaler purchased directly from petitioner at the discriminatory price.

Section 2(a) of the Clayton Act prohibits discriminations in price in interstate commerce between purchasers of goods of like grade and quality, sold for resale, where the effect of the discrimination may be "to injure, destroy or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, *or with customers of either of them*". The Commission has found that the effect of the petitioner's discriminations in price to its three Detroit wholesalers has been, and may be, to injure, destroy and prevent competition with the respective customers of said wholesalers in the resale of gasoline. Upon the state of facts above outlined, this finding cannot be challenged, and petitioner does not challenge it. Neither does petitioner deny that under these circumstances its discrimination in price between wholesalers and retailers in the same sales area violates Section 2(a). Its complaint against paragraph 6 of the Commission's order goes only to the terms of that paragraph and is at most a plea for modification.

Petitioner objects to paragraph 6, as modified by the court below, on the ground that it would compel petitioner to require its wholesaler customers to maintain their resale prices at not less than petitioner's posted tank wagon price.

This contention is nothing more than a smoke screen. Paragraph 6 does not require petitioner to do anything except stop discriminating in price in favor of wholesalers and against retailers under conditions, shown to have existed, in which the Commission has found such discrimination to result in injury to competition and to be unlawful.

When a seller discriminates in price between different purchasers of the same goods he must, if he would avoid violation of the Clayton Act, assume the burden of ascertaining and keeping himself informed that the conditions under which he sells do not make his price discriminations unlawful. Lack of knowledge that such conditions exist is no defense. Neither is it a defense that the conditions are beyond his control.

Specifically, if petitioner chooses to sell at a substantial difference in price to wholesalers and to retailers in the same territory, it knows and takes the risk that the wholesalers may open retail stores and use their price advantage in selling direct to the public in competition with petitioner's retailer customers, or may pass on a part of their price margin to their customers who compete with petitioner's retailer customers. If it is true that petitioner has no control over the resale prices of its wholesalers, neither can it prevent them from selling at retail. Yet if a wholesaler engages in either of the above practices and petitioner continues to sell to him at the wholesale differential, the differential becomes an unlawful discrimination because under those conditions it may result in injury to competition with the wholesaler in his retailing capacity, or with his customers. In order to avoid violation of the Act petitioner must either assume the burden of keeping itself informed that its wholesalers do not engage in either of those practices or it must abandon the discrimination. This order requires no more.

Petitioner would hardly contend that paragraph 4 of the order compels it to require its retailer customers not to compete with each other, or that paragraph 5 compels it to require its jobber customers not to resell at retail. It makes no objection to either of those paragraphs; yet paragraph 6 only prohibits doing by indirection what paragraph 5 prohibits doing directly.

There is nothing startling about prohibiting a supplier from selling to wholesalers and retailers in the same sales area at a differential so great as to enable the wholesalers to undersell their supplier, where the retailer customers of the supplier cannot buy from wholesalers but are in direct competition with the wholesaler's customers. If the supplier and its wholesalers were in fact competitors it would not be good business for a supplier whose principal distribution is direct to retailers to sell to wholesalers at a price which would enable the wholesalers to take away the retailer customers of the supplier. In this case it has been demonstrated that there is and can be no real competition between petitioner and its wholesalers.

If the prohibition contained in paragraph 6 were not included in this order there would be nothing to prevent Ned's Auto Supply Company from transferring its business to Citrin-Kolb Oil Company and purchasing Red Crown gasoline from Citrin-Kolb at one cent a gallon below the tank wagon price, delivered at Ned's stations. Ned's would obtain substantially the same competitive advantage over other retailers which it now obtains by purchasing in tank car quantities from petitioner. Petitioner would achieve the same result which it now obtains, merely using Citrin-Kolb as a conduit for sales to Ned's.

While the modification of paragraph 6 made by the Court of Appeals does not materially weaken the order, the limitation of enforcement to "such circumstances as are reasonably calculated to impute knowledge to the respondent" introduces a less than definite standard which is undesirable. We submit that this modification was unnecessary to accomplish the purpose for which it was intended. As above pointed out, it is no justification for discrimination that the seller did not know that a supposed wholesaler customer was reselling at retail; and the burden should also be on the seller to keep himself informed as to whether a wholesaler customer *engages in the practice* of reselling to retailers who compete with petitioner's direct customers at prices below that charged the latter by petitioner. Perhaps it is easier for a seller to know at what level of competition his customers resell than to know their pricing practices, but that is a matter of degree. Petitioner's two largest competitors in Detroit avoid this dilemma by selling only to retailers at tank wagon prices (R. 2129-30, 333).

The opinion below states that "Under the order as drawn, the petitioner would be liable if afterwards the wholesaler should resell at a price lower than the petitioner charged its retailers." This objection could be sufficiently obviated by inserting the words "engages in the practice of reselling" in place of the word "resells", in the middle of the paragraph. The words added by the Court of Appeals could then be, and we think they should be, taken out.

The statement that compliance with this decree by oil companies selling in interstate commerce would injure jobbers generally and "deal a death blow" to those whose suppliers sell to retailers in the same area, is absurd. The decree will affect only those jobbers who demand an unfair price advantage in reselling at retail in competition with retailers paying a higher price for the same brand of gasoline, or who use their differential to give such an advantage to certain of their customers with their supplier's consent. Certainly no one would suppose that a major supplier like petitioner, the success of whose business depends on the volume of its sales to retailers at tank wagon prices, and who has an enormous investment in service station properties, would permit its own wholesalers to undersell it except to such controlled extent as it deems for its own benefit.

The decree herein benefits the 100 or more retailer customers of Wayne Oil Company, Stikeman Oil Company, and Citrin-Kolb Oil Company, (except the few given a discriminatory price by Citrin-Kolb) to the same extent that it benefits petitioner's 350 retailer customers, other than Ned's.

The jobbers most directly affected by the discriminatory practices at which this order and decree are aimed, are best able to appraise the effect of said order and decree on the conduct of their business, are the Michigan jobbers represented by the Michigan Petroleum Association, one of the associations filing this brief. In view of the unwarranted statements made in the *amicus curiae* brief filed herein on behalf of certain jobber associations in other states, we call the Court's attention to the resolution adopted by the Executive Committee of Michigan Petroleum Association in November, 1945, shortly after the issuance of the Commission's original order in this case:

> "The Committee made a thorough study of the pr[illegible]ons of the opinion and order of the Commission, and was of the firm belief that such order will have the positive effect of preventing destructive and unfair competition and will thereby maintain the existence of the small petroleum operator whose enterprise, like all small business, is the backbone of America.

"A survey of the Michigan industry reveals a comparatively few jobbers operate retail stations of their own, but that those who do maintain retail stations can easily come within the terms of the order by leasing such stations out to private individuals. The Michigan group denounces the attempts of some factions in the petroleum industry which have sought to becloud the real meaning of the order by presenting certain ghost-like hazards to the jobbing trade which do not exist. It should be pointed out that the FTC order seeks to do just one thing—to prevent unfair competition between retail outlets, and does not in any way erect hazards to any part of the petroleum marketing picture.

"In the opinion of the Committee, there is no bogey man in the order which will in any way disrupt or hamper any present jobber wholesale operations." (Official Report of Proceedings before the Federal Trade Commission, Docket No. 4389, In the Matter of Standard Oil Company, April 25, 1946.)

Conclusion.

The decree of the United States Court of Appeals for the Seventh Circuit should be affirmed.

Respectfully submitted,

CYRUS AUSTIN,
Attorney for Retail Gasoline Dealers Association of Michigan, Inc., Michigan Petroleum Association, Inc., National Congress of Petroleum Retailers, Inc.

Supreme Court of the United States

October Term, 1949

No. ~~107~~ 1

STANDARD OIL COMPANY,
Petitioner,

vs.

FEDERAL TRADE COMMISSION,
Respondent.

APPLICATION FOR LEAVE TO PRESENT ORAL ARGUMENT ON BEHALF OF *AMICI CURIAE.*

To the Honorable, the Chief Justice and Associate Justices of the Supreme Court of the United States:

Retail Gasoline Dealers Association of Michigan, Inc., Michigan Petroleum Association, Inc., and National Congress of Petroleum Retailers, Inc., *amici curiae,* by Cyrus Austin, their attorney, hereby respectfully make application to this Court and request that leave be granted their said attorney to present oral argument before this Court in the above-entitled proceeding, in support of the decree of the United States Court of Appeals for the Seventh Circuit here for review.

The undersigned is a member of the Bar of this Court, and has filed a brief herein on behalf of the aforesaid *amici curiae,* in support of the said decree, upon the written consents of the parties to said proceeding.

Retail Gasoline Dealers Association of Michigan, Inc., is a membership corporation serving the interests of the retail gasoline dealers of that State. The Association has upwards of 2,000 members, more than 1,450 of whom are in the Detroit metropolitan area; and its membership is fairly representative of the retail gasoline dealers of that area and of the State.

Michigan Petroleum Association, Inc., is a membership corporation representing the independent petroleum jobbers of Michigan, many of its members being engaged in the business of marketing gasoline in the Detroit area.

National Congress of Petroleum Retailers, Inc., also a non-profit membership corporation, is a trade congress of affiliated retail gasoline dealer associations located in twenty-three states and the District of Columbia. It was formed for the purpose of fostering and promoting the interests and welfare of the 275,000 gasoline retailers in the United States, and is the only trade association of retail dealers in petroleum products having a nation-wide representation.

The charge in this case is, and the undisputed findings are, that the petitioner, Standard Oil Company, has discriminated in price in the sale of its branded gasoline in the Detroit metropolitan area by selling such gasoline to four retailers at prices substantially lower than the price which petitioner charges for the same gasoline to the more than 350 other retail dealers whom it supplies in Detroit. The order of the Federal Trade Commission, and the decree of the Court of Appeals here for review, prohibit those discriminations in price. Said order and decree have for their direct purpose and primary effect the protection of the retail gasoline dealers of Detroit and other areas served by petitioner, including the customers of the jobber-wholesalers whom petitioner supplies, from the injurious effects of said discriminations.

The retail gasoline dealers and jobbers of Michigan and the retail gasoline dealers of the nation, therefore, have a direct and vital interest in the outcome of this proceeding. They are the persons most directly affected by the discriminations which the Commission has sought to prevent herein and which the decree of the court below prohibits. They are, in fact, the real parties in interest in the affirmance of said decree.

The undersigned has participated in this case as an attorney from its very inception and is necessarily more familiar with its history and background than any attorney now representing the Federal Trade Commission. As attorney for the Commission the undersigned prepared the complaint herein and conducted the trial of the case for the Commission as the record will show. Before leaving the Commission's employ in January, 1944, he briefed and argued the case before the Commission. In April, 1946, as attorney for the Michigan retailers' association, he presented oral argument before the Commission on motions for rehearing and for modification. In February, 1949, he filed a brief on behalf of the Michigan association and presented oral argument in the Court of Appeals for the Seventh Circuit, by permission of the court, on review of the Commission's order.

Thus the undersigned has participated in every oral argument made in this case since the complaint was issued, and it hoped that this Court will see fit to permit him to be heard upon this final presentation. He believes that he can be of aid to the Court in presenting and clarifying the issues, and submits that it is important to the interest of the above *amici curiae* that he be heard.

This application is made at this time because the undersigned was under the impression that such an application would be inappropriate, and would not be considered, prior to the filing of the brief of the *amici curiae* and the consents of the parties. Petitioner's brief was not served until December 19th, and the undersigned was admitted to the Bar of this Court on the same date. With Christmas intervening the preparation of an adequate brief for the *amici curiae* within the time limited has been difficult. The undersigned also understood that the Court would be in session during the week of January 3rd.

Wherefore, Retail Gasoline Dealers Association of Michigan, Inc., Michigan Petroleum Association, Inc., and National Congress of Petroleum Retailers, Inc., pray that their undersigned attorney be granted leave to present oral argument in their behalf when this case is heard by this Court. One-half hour for argument is requested.

Respectfully submitted,

Cyrus Austin,
Attorney for Retail Gasoline Dealers Association of Michigan, Inc., Michigan Petroleum Association, Inc., National Congress of Petroleum Retailers, Inc.,
42 West 44th Street,
New York 18, N. Y.

Supreme Court of the United States

October Term, 1950

No. 1

STANDARD OIL COMPANY,
Petitioner,
vs.

FEDERAL TRADE COMMISSION,
Respondent.

APPLICATION FOR LEAVE TO PRESENT ORAL ARGUMENT IN BEHALF OF *AMICI CURIAE*.

(Upon Reargument)

To the Honorable, the Chief Justice and Associate Justices of the Supreme Court of the United States:

The undersigned, as attorney for Retail Gasoline Dealers Association of Michigan, Inc., Michigan Petroleum Association, Inc., and National Congress of Petroleum Retailers, Inc., *amici curiae*, respectfully makes application to the Court and requests that he be granted permission to present oral argument before the Court, upon reargument of the above-entitled cause, in behalf of the said three associations.

Your applicant is a member of the Bar of this Court, and has filed a brief herein on behalf of the above-named associations, as *amici curiae*, in support of the decree of the United States Court of Appeals for the Seventh Circuit here for review. Said brief was filed upon the written consents of the parties to this proceeding.

The Court has placed this cause on the Calendar for reargument at the October, 1950, Term. Prior to the original argument your applicant applied to the Court for leave to participate in the oral argument, on behalf of the aforesaid *amici curiae*. Said application was granted, and your applicant did appear and present argument before the Court, on January 10th last. The Court will be able to judge whether the further presentation of oral argument by your applicant will be of aid to the Court in the decision of this cause. Further elaboration of this application, therefore, is unnecessary.

However, it is submitted that this application should be granted for the same reasons stated in the prior application. The interest of the gasoline retailers and jobbers of Michigan, and of the nation, represented by your applicant, is such that they should be heard if the principal issues in this case are to be fully reargued. The prior application is reprinted as an appendix hereto, for convenient reference.

Respectfully submitted,

CYRUS AUSTIN,
Attorney for Retail Gasoline Dealers Association of Michigan, Inc., Michigan Petroleum Association, Inc., and National Congress of Petroleum Retailers, Inc.,

APPENDIX

APPLICATION FOR LEAVE TO PRESENT ORAL ARGUMENT ON BEHALF OF *AMICI CURIAE.*

(Granted January 9, 1950.)

To the Honorable, the Chief Justice and Associate Justices of the Supreme Court of the United States:

Retail Gasoline Dealers Association of Michigan, Inc., Michigan Petroleum Association, Inc., and National Congress of Petroleum Retailers, Inc., *amici curiae*, by Cyrus Austin, their attorney, hereby respectfully make application to this Court and request that leave be granted their said attorney to present oral argument before this Court in the above-entitled proceeding, in support of the decree of the United States Court of Appeals for the Seventh Circuit here for review.

The undersigned is a member of the Bar of this Court, and has filed a brief herein on behalf of the aforesaid *amici curiae*, in support of the said decree, upon the written consents of the parties to said proceeding.

Retail Gasoline Dealers Association of Michigan, Inc., is a membership corporation serving the interests of the retail gasoline dealers of that State. The Association has upwards of 2,000 members, more than 1,450 of whom are in the Detroit metropolitan area; and its membership is fairly representative of the retail gasoline dealers of that area and of the State.

Michigan Petroleum Association, Inc., is a membership corporation representing the independent petroleum jobbers of Michigan, many of its members being engaged in the business of marketing gasoline in the Detroit area.

National Congress of Petroleum Retailers, Inc., also a non-profit membership corporation, is a trade congress of affiliated retail gasoline dealer associations located in twenty-three states and the District of Columbia. It was formed for the purpose of fostering and promoting the interests and welfare of the 275,000 gasoline retailers in the United States, and is the only trade association of retail dealers in petroleum products having a nation-wide representation.

The charge in this case is, and the undisputed findings are, that the petitioner, Standard Oil Company, has discriminated in price in the sale of its branded gasoline in the Detroit metropolitan area by selling such gasoline to four retailers at prices substantially lower than the price which petitioner charges for the same gasoline to the more than 350 other retail dealers whom it supplies in Detroit. The order of the Federal Trade Commission, and the decree of the Court of Appeals here for review, prohibit those discriminations in price. Said order and decree have for their direct purpose and primary effect the protection of the retail gasoline dealers of Detroit and other areas served by petitioner, including the customers of the jobber-wholesalers whom petitioner supplies, from the injurious effects of said discriminations.

The retail gasoline dealers and jobbers of Michigan and the retail gasoline dealers of the nation, therefore, have a direct and vital interest in the outcome of this proceeding. They are the persons most directly affected by the discriminations which the Commission has sought to prevent herein and which the decree of the court below prohibits. They are, in fact, the real parties in interest in the affirmance of said decree.

The undersigned has participated in this case as an attorney from its very inception and is necessarily more familiar with its history and background than any attorney now representing the Federal Trade Commission. As attorney for the Commission the undersigned prepared the complaint herein and conducted the trial of the case for the Commission as the record will show. Before leaving the Commission's employ in January, 1944, he briefed and argued the case before the Commission. In April, 1946, as attorney for the Michigan retailers' association, he presented oral argument before the Commission on motions for rehearing and for modification. In February, 1949, he filed a brief on behalf of the Michigan association and presented oral argument in the Court of Appeals for the Seventh Circuit, by permission of the court, on review of the Commission's order.

Thus the undersigned has participated in every oral argument made in this case since the complaint was issued, and it hoped that this Court will see fit to permit him to be heard upon this final presentation. He believes that he can be of aid to the Court in presenting and clarifying the issues, and submits that it is important to the interest of the above *amici curiae* that he be heard.

* * * * * * * * * *

WHEREFORE, Retail Gasoline Dealers Association of Michigan, Inc., Michigan Petroleum Association, Inc., and National Congress of Petroleum Retailers, Inc., pray that their undersigned attorney be granted leave to present oral argument in their behalf when this case is heard by this Court. One-half hour for argument is requested.

Respectfully submitted,

CYRUS AUSTIN,
Attorney for Retail Gasoline Dealers Association of Michigan, Inc., Michigan Petroleum Association, Inc., and National Congress of Petroleum Retailers, Inc.
